[If the land described in section 1(b) should revert to the United States by operation of paragraph (4) of section 2, the District may acquire such land from the United States, during the two year period ending after the date the land has reverted to the United States, by quitclaim deed, upon application to the Secretary of the Interior and the payment of the fair market value of such land and any improvements thereon.]

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 1738) was passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. CONVEYANCE OF LAND.

(a) CONVEYANCE.—Subject to section 2, the Secretary of the Interior shall convey, without consideration , all right, title, and interest of the United States in and to land described in subsection (b) to the Rogue Community College District in Josephine County, Oregon (hereafter in this Act referred to as the "District").

(b) LAND DESCRIPTION.—The land referred to in subsection (a) is land in Josephine County, Oregon, described as Township 36 South, Range 6 West, W.M., Section 27 southwest ¼, northeast ¼.

SEC. 2. LIMITATIONS ON CONVEYANCE.

The conveyance authorized by section 1(a) is subject to the following limitations:

(a) ENCUMBRANCES.—Such conveyance shall be subject to all encumbrances on the land existing as of the date of enactment of this Act.

(b) MINERAL RIGHTS.—Such conveyance shall reserve to the United States all minerals in the land, including geothermal rights, together with the right to prospect for, mine, and remove the minerals and geothermal resources.

(c) RIGHT OF WAY FOR DITCHES AND CANALS.—Such conveyance shall be subject to the proviso in the fourth undesignated paragraph under the caption entitled "United States Geological Survey" in (the first section of the Act of August 30, 1890 (26 Stat. 371, 391)(43 U.S.C. 945).

(d) REVERSIONARY INTEREST.—Such conveyance shall be subject to a reversionary interest in the land described in section 1(b) to be held by the United States. If such land ceases to be used for educational purposes, all right, title, and interest in and to such land shall revert to the United States and shall be identified, classified, and managed as Oregon and California Railroad Grant Lands.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the bill as amended, was passed.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## AUTHORIZATION TO PRINT ADDITIONAL COPIES OF THE DOCUMENT "OUR FLAG"

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 311, a concurrent resolution just received from the House to authorize the printing of additional copies of the document "Our Flag."

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 311) providing for the printing of additional copies of the booklet entitled "Our Flag."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 311) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## ORDERS FOR TOMORROW

RECESS; JOURNAL OF PROCEEDINGS; RESERVATION OF LEADER TIME; MORNING BUSINESS; AND, THE CAMPAIGN REFORM BILL

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:30 a.m. tomorrow; that immediately following the prayer the Journal of Proceedings be deemed to be approved; that the time for the two leaders be reserved for their use later in the day; and, that Senator SPECTER be recognized to speak for up to 30 minutes in morning business.

I further ask unanimous consent that upon the conclusion of his remarks the Senate resume its consideration of S. 137, the campaign reform bill, for debate only and that upon conclusion of that debate on tomorrow, the bill be laid aside and that no call for the regular order serve to bring the bill back, except one made by the majority leader after consultation with the Republican leader.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I say one thing in connection with the majority leader's very fine event with the Chancellor of Germany today. I think that was a very fruitful exchange. I thank the majority leader for holding that and giving us all an opportunity to visit with the Chancellor of such a staunch ally. I thought that was all conducted with great civility and good humor and was very productive.

Mr. MITCHELL. For the information of our other colleagues who were not present, it was a meeting in which Chancellor Kohl talked with and answered questions from a group of Senators, which was very productive and informative. I thank my colleague for his comments.

## RECESS UNTIL 9:30 A.M. TOMORROW

Mr. MITCHELL. Mr. President, if there is no further business and if no other Senator is seeking recognition, I ask unanimous consent that the Senate stand in recess, under the previous order, until 9:30 a.m. tomorrow.

There being no objection, the Senate, at 9:26 p.m., recessed until Friday, May 18, 1990, at 9:30 a.m.

## CONFIRMATIONS

Executive nominations confirmed by the Senate May 17, 1990:

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

DONALD G. WISEMAN, OF NORTH CAROLINA, TO BE A MEMBER OF THE OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION FOR THE REMAINDER OF THE TERM EXPIRING APRIL 27, 1993.

VELMA MONTOYA, OF CALIFORNIA, TO BE A MEMBER OF THE OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION FOR THE REMAINDER OF THE TERM EXPIRING APRIL 27, 1991.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

# EXTENSIONS OF REMARKS

## THE RAINBOW LOBBY AND RIGHT TO KNOW

**HON. MERVYN M. DYMALLY**
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. DYMALLY. Mr. Speaker, two organizations—the Rainbow Lobby, not to be confused with Rev. Jesse Jackson's Rainbow Coalition, Probe magazine, and an individual—Nancy Ross, filed a $2 million lawsuit against me and sought a temporary restraining order to restrain me from "copying or distributing" certain documents in my possession.

This week a Federal judge refused to grant the above said organizations a restraining order. In their press statement, on this matter, the groups claimed that release of the documents could jeopardize the safety of Zaire opposition leaders. Accordingly, I have erased the names of these persons from the document. It should be noted that these two documents have been circulating in Washington for several months, and they are obviously in the possession of other parties.

I am submitting for Member's review the so-called secret documents. It would not take too much time to conclude that this is a case of: First, much ado about nothing; and second another attempt to harass me; a fact which they boasted about in a written statement at a conference in New York, May 4, 1990, on harassment.

Following are two documents about their suit:

AUGUST 4, 1989.

MEMORANDUM

Re Zaire Investigation.
To: Jackie, Cathy and Mike.
From: Rich.

The following is a summary of new information learned over the last few weeks regarding the Dymally-Mobutu connection and Mobutu's possible travel to the U.S. in the fall:

DAN MORGAN

I spoke with Dan Morgan, a reporter with the Washington Post earlier today. I had called Morgan to tell him about the covert funding to Zaire story because I had heard from another investigator that he had been doing an ongoing series of stories about the Congressional budget process. Morgan also has a reputation as being a reporter who will dig for a story and has written extensively about Grover Connell.

Morgan was not interested in the covert funding to Zaire story saying that he has not been following foreign operations very closely. He recommended that I talk to David Ottaway about it. Morgan did say he was interested in the Dymally story (which I had also mentioned to him) and he asked that we send him our clips. Morgan said that he would talk to another Post reporter Jim McGee (sp?) who he described as being a "beat up on Black Congressman specialist." McGee has written the Post stories on Gus Savage and on Bill Gray.

COALITION FOR A FREE AFRICA

Mike K. spoke with Steve Askin today who is back in Harre, Zimbabwe. Askin said that the non-profit who he referenced in his Christian Science Monitor story was the Coalition for a Free Africa, which received a quarter million dollars donation from Mobutu. Askin said he saw a report which listed the donation and Griffy acknowledged to him that he had received the donation from Mobutu.

According to the California Secretary of State's office the Coalition for a Free Africa was registered as a public benefit non-profit organization on January 16, 1986. Richard Griffy of 1635 North Cahuenga Blvd., Hollywood is the President.

The Secretary of State's office will be sending us their income taxes (990s) for the last few years.

As we have reported in the past, Dymally, has received monies from the Coalition for a Free Africa for travel to Africa, South America and within the U.S. Dyamally was also instrumental in getting an oil contract from Griffy's company Adpic.

BLACK MANAFORT STONE & KELLY

Black Manafort Stone & Kelly signed a $1 million contract to represent Zaire that commenced July 1, 1989. Black Manafort is a prominent Washington consulting firm that Lee Atwater had worked for and is also emersed in the current HUD scandal. Black Manafort also represents Unita.

Stu Sweet is handling the Zaire account for Black Manafort and Stone. Sweet also handles the Unita account for the company. According to one Capitol Hill source, Sweet is a Democrat who was given the Unita account because he could appeal to moderate Democrats on the Hill. Sweet "may have a relationship" to Rep. Dave McCurdy a conservative democrat who sits on the intelligence committee and is pro-Unita.

According to Sweet, Black Manafort will focus on trying to increase the economic assistance provided to Zaire. He talked about how Zaire was one of the poorest countries in Africa that badly needs to have its road system repaired.

He described Zaire as being a close ally of the U.S. and said that it was "ironic" that Congress wanted to cap military assistance at $3 million when that money was going to maintain five C130 transport planes. Sweet argued that it was Mobutu who took the lead in confronting Khadafy in Chad and that it was these C130s that were used to transport troops and weapons to Chad. "Frankly our government should be thankful" to Mobutu for the leadership that he has provided.

The call to Sweet got cut off at this point as his car went under a tunnel cutting off contact with his cellular phone.

MOBUTU WATCH

Mike K. spoke to Edward von Koberg who said that he was still representing Zaire and was surprised to learn that we knew of Zaire's contract with Black Manafort. He said that Mobutu's trip in September was being handled by the Ambassador. He did not specify what dates that Mobutu would be in the U.S.

A State Department source that I spoke to said that he was unaware whether or not Mobutu was coming to the U.S. in September. He did suggest that Mobutu might be coming for the opening of the United Nations General Assembly which takes place at the end of September. A Capitol Hill source who is also very knowledgeable about Mobutu also thought that would be a likely time for Mobutu to return to the U.S.

The General Assembly officially opens on September 19. The general debate that many heads of States participate in begins on September 25 and runs through October 13. If Mobutu is speaking at the UN it would be during this period.

The official list of speakers for the debate has not been released yet. Walid Mouran an Iraqui journalist who heads the UN journalist association said that he would inquire with his sources to see if Mobutu is scheduled to speak and would let us know on Monday.

NATIONAL ENDOWMENT FOR DEMOCRACY

I spoke with Barbara Haig at the National Endowment for Democracy. Dave Peterson who handles Africa for NED was in Africa when I called. Haig did know that NED was considering doing a conference on one party democracy in Africa.

"Someone said it would be good" to have this conference in Zaire. Haig then said that the "someone" was Dymally. "He raised it as a possibility." Haig thought that Zaire, "might be a difficult place to have it." NED currently has no programs in Zaire.

The group that NED is talking to about organizing this conference is called CERDET which is located in Senegal. CERDET has received funding from NED in the past. The person in Senegal who they want to organize this conference is named Nzo.

Patterson was "discussing" this conference with people while he was over in Africa. Patterson had met a Dymally staff person, Melvina, while he was in Senegal during this trip.

The issue of one party democracy is a big issue in Africa said Haig. A lot of Westerners think that democracy has to look a certain way with multiple parties. "We thought that it would be good to take a look at it and how it has not worked so far."

DYMALLY GOES TO ZAIRE

Dymally is planning on traveling to Zaire in August, according to a Capitol Hill source.

---

To: Deborah, Fred, Jackie, Hazel, Alvaader.
From: Nancy.

REPORT ON TRIP TO BRUSSELS, POLISARIO AND ALGERIA

1. Brussels: Brussels is the seat of the European Parliament and the soon to be capital of Europe. It's an extremely middle class city, you constantly feel the anti-semitism and the growth of fascism is very prevalent. The fascists won 20% of the vote in Antwerp and a large percentage (in the

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

teens) in Brussels. The North African community, mainly the Moroccans are the brunt of the fascists wrath. Even cab drivers blame the Moroccans for the economic problems—taking jobs away from them, etc.

The Zairians are treated differently—like their children (but not too close) with all the patronizing and contempt people have for children, to say nothing of the racism. Immigrants are a big issue amongst the progressive community. Only the European community can vote. It doesn't matter how long you lived in Belgium you can't vote.

Brussels is as dead as Paris. Abu has notes on all our meetings which are included in his report. This report will give an overview of whom we met with along with some additional thoughts and observations.

We met with every Zairian opposition group that exists and ones we didn't even know existed. There are presently two factions of the UDPS. It's hard to know whose who. One is headed by a man named K whose close to Ronald van den Bogaert. He's very nice, as are most people but not doing anything. The other is C who has been ousted from the UDPS but still calls himself UDPS. R said C has gotten into fists fights with pro-Mobutu people at press conferences and that was all the press would focus on. So while well meaning he was misrepresenting the party. We had dinner with K (whose wife is G's sister, glad to say that she is much more progressive) and lunch with C and his family. Other UDPS people from France were suppose to have joined us at C's but they came two hours late and we had to leave.

C at least came up with some ideas of what to do. Presidential elections come up in 1991. Given there are no opposition candidates to Mobutu that are allowed, people either vote for or against Mobutu. Green cards mean a pro-Mobutu vote and red cards are against. People must vote in Zaire. When people go to the polls there is an armed guard there, if they take a red card they're arrested, beaten, etc. At some point the red cards disappear. If there was to be some kind of international campaign, it seems that there would have to be an internal to Zaire campaign as well, like the Vote No campaign in Chile.

Another UDPS member we met with was O who was in the hospital after a lung operation. The man has a very moving story. He was tortured and beaten. Mobutu's guards jumped on his chest and destroyed his lungs. You actually can see a hole in his chest.

We met with T's sons some of whom were more political than others, and at least one of which seemed very progressive. They were actually very serious, asking us questions about our legislation, how congress works, what we were trying to accomplish, etc. Given they aren't leftists they and their friends were the most serious. We also briefly met with T's brother who had to escape from Zaire and is now teaching in Antwerp.

Ronald has much influence over the UDPS. It's like his movement, though other than disseminating information they really don't do much. Ronald just quit his job at the European Parliament working for the Socialist Party. He said that now that the Socialist are in power they've completely backed off of their opposition to Mobuto. At one point Ronald told us about a coup that was in the process of being planned. This information is confidential. He said that there is a man named (not sure of spelling) B based in Zambia who used to be in the FLNC, but whose key supporters are former Mobutu military people, that is in the process of planning a coup. He said they have trained an army which is based in Zambia. They plan on attacking Shaba and Kinshasa. He said that Mobutu probably has gotten wind of something in the works but expects an attack in another region, not in Kinshasa. He said they believe a mistake of Shaba I and II was they didn't move into Kinshasa at the same time they attacked Shaba. They feel they must gain support from the people in Kinshasa so as to make sure that Shaba can't be isolated. R said B does not have an ideology, mainly anti-Mobutu, though he is progressive. However, his collaborators are conservative. I asked how they could train without being seen. He said Zambia is large and it's easy to hide. He said they've been bringing weapons into Zaire for sometime now and hiding them. He said things are so chaotic its not that difficult. He also said that B had once written a book, but didn't remember the name of it.

I'm not sure if this is connected, but a few months ago, the Zambians called me and asked if we would check on a Belgium news story saying that the Zambians were working with anti-Mobutu military forces that were planning on overthrowing Mobutu. I checked the story out and none of the press people in Belgium ever read anything like that. The story came in the News information packets the Zambians receive from their ministry. I asked N, without saying why, if he heard of B and he hadn't. I asked him if he knew of any groups based in Zambia. He said that someone told him that Solidarite, Ludo Martin's paper (who I mention below) mentioned that some former Zairian military men were based in Zambia, but that was all the article said.

Our Belgium Press Conference: You saw the results of our press conference. Some of the coverage was good, and some of it used A's statement about burning down Mobutu's castles to attack us. There is a political and geographic split in Belgium between the north which is Flemish and the south which is French. The Flemish papers tended to be supportive and the French more conservative. Both in both cases we got lots of press coverage and were all over the Belgium newspapers. We have developed several good media contacts, and met individually or spoke with most of the progressive media. As you know, Glenwood Roane from ZARI was at the press conference handing out Clouds Blur the Rainbow. One 'leftist' type press person from de Morgan, who ended up writing a supportive piece was the only one who asked if we allied with Larouche and aren't we opportunizing off of the RC. He asked this in a separate interview we had with him when we returned to Brussels.

We also met with C who said she was going to write a piece on the Rainbow Lobby to counter the article in Het Belang which said we did nothing except Zaire and reportedly got our money from Antwrep diamond dealers. So far the article has not been printed. She's away so I haven't been able to check what happened.

We met with many of the MNC/L groups. Our posture was that we don't support any particular opposition group but all the opposition to Mobutu, and mainly the work we could do together was share information. They all basically asked us for either money so they could make the revolution or to bring them to Washington so they could tell the truth about Mobutu.

We met with the Government in Exile whose leader, passed through here last year, that's how we met C. They're extremely middle class, and asked us to represent them. A asked them who recognized them given they were a government in exile. They then proceeded to ask us to introduce them to governments.

We met with D and A who is an older man who fought in the Shaba uprisings and was part of the original FLNC. Like the rest of these folks they seem well meaning but have nothing. They claim they have an FLNC active chapter inside Angola headed by Lt. Colonel. Did you ever hear of this person? What I've heard from others is that basically the Zairian opposition inside Angola has been dispersed. Many are farmers or have been integrated into the Angola. While some are part of the Angolan army, I have heard that they are dispersed and not a cohesive Zairian unit.

Met with F and K—another MNC/L group. They too asked us to bring them to Washington. Their saving grace was F's wife who is a former Zairian student and helped organize student demo's in Brussels after police opened fire on students in Kinshasa. She was very progressive, and not surprising super interested in the independent movement. Generally, we found the women to be much more progressive and smarter than the men. Also met with M's group which was all Zairian students, very middle class. One of their students had just escaped from Zaire after participating in student demonstrations. They set up a classroom type forum, where one young man gave a presentation explaining the history of Zaire, and they we presented and they asked questions. Nothing more to say.

We met with an organization of NGO's (non-government org's) called NCOS. This is a church funded organization that has development projects in Zaire. They're very decent and very patronizing. They said at one point, "how do we make a revolution in Zaire." They just wrote a book on corruption in these programs, in French which we have. They also have a newspaper they put out in Zaire. They're good to exchange information with.

Met with Green Party in Belgium parliament. They work on Zaire, but the thing to talk to them about is third party politics. While we began to talk about NAP, the meeting was cut short since they had to go to parliament. We probably should start sending them the NA. We were supposed to meet with them when we came back to Brussels but both Abu and myself were too sick so had to cancel. They produce briefing papers on Zaire on particular issues coming before parliament which would be helpful to have, such as on the debt situation.

One thing about the European Parliament before I forget. They have several projects in Zaire and in Africa—In Zaire, Cocoa coffee plantations, rehabilitation of copper mines and rebuilding roads.

Met with the Rainbow Group—they're folks who are centered around the European Parliament both as staffers but also as people who have no job relation to the EP. They're mainly CP members and some independent leftists. They say they have a women's group involved but no one from the women's group could come to the meeting. They said they came together because the Green's, by virtue of getting elected wouldn't take certain positions on social issues. They're again very decent but haven't built anything. The CP in Belgium has a long history but barely exists from what I could tell. The CP has a seat in the Flemish congress, but not in the European

or Belgium parliament. The North and South (Flemish & French) have separate parliaments plus there is a Belgium parliament. In 68 or 72 the CP broke with the Soviet Union. They were part of the Euro Communism movement. Now they say they are trying to find expression outside the social democratic controlled movement. They emphasized that they were not sectarian communists, eager to work with everyone and that they believed in democracy. We met with 2 CP members and one independent leftist who had heard of Fulani and said he wanted to see if he could raise money to bring her to Belgium.

The CP plus another group that was centered around a progressive former European Parliament person and former minister (religious not political) named *Jef Ulburgh* were very eager to keep in touch and develop an alliance with us, not just on Zaire issues but on other issues as well. We were like a spark of hope for them. They were thrilled to learn about the independent movement. Two of the people who worked with *Ulburgh* asked lots of questions about how we raised money, what issues we organized around, etc. *Ulburgh* was the one who introduced all the anti-Mobutu resolutions into the EP. He was a member of the Socialist Party but the party just refused to accept him again. I'm not exactly sure how the EP works. His name was on a list of potential delegates to the EP, and the party can chose a certain number of delegates. *Ulburgh* says he was too radical. *Ulburgh* and others are eager to build a movement but don't know how and I believe don't know what they're building a movement around. In the meantime he is going to southern Italy to begin organizing around immigration issues. As a minister he had organized in the Italian community who came to Belgium from 1969 to 80 to work in the mines. He built an organization called the World School which ran support programs for the miners. *Ulburgh* also just ran as a Socialist Party delegate from southern Italy and did quite well. The way we left it with *Ulburgh* was that we would exchange information, invite each other to conferences and to speak if appropriate.

The Rainbow Group said one of the ways the debt crisis works in Mobutu's favor is when Belgium cancels the debt to Zaire, that means he is more able to pay the commercial banks. Who ends up paying the state debt is the people of Belgium.

## A TRIBUTE TO THE AYER POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Ayer Police Department for their dedicated and outstanding service to the people of Ayer, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Ayer Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Phillip L. Connors and those who serve in the Ayer Police Department:

Donald Haapakoski, Bradley Madge, John Wyman, Paul Cormier, William O'Connell, David Bonner, Mark Coulter, Judith Hadley, Dana Beauvais, Harver LaPrade, John Bousack, William Murray, Lt. Arthur Boisseau.

## ABANDONED BABIES ADOPTION ACT

### HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BLILEY. Mr. Speaker, today, along with Representative H. FAWELL, Representative C. HOLLOWAY, and Representative L. SMITH, I am introducing legislation to amend the foster care and adoption assistance sections of the Social Security Act. This legislation addresses the tragic problem of so-called border babies, or babies abandoned at birth by their parents.

The premise of the legislation and the impetus behind the legislation is simple—these children have a right to form a bond with loving parents in a stable home. Yet, what too often happens to these children who are not only abandoned at birth but often substance abused before birth, is that they languish first in the hospitals and then in foster care. Foster care is intended to be a temporary situation. However, the way it currently exists, it is not. For example, in New York City, 60 percent of the babies discharged from the hospital to foster care were still in foster care 3 years later.

In a recent study by the Office of the Inspector General [OIG] of the Department of Health and Human Services it was observed that the adoption process can take up to 3 years. Currently, legal rules and agency policies can make it so difficult to free children for adoption that fewer than 10 percent of the children in foster care are even put up for adoption.

Given the current situation in the child welfare system, it is critical that steps be taken to expedite the adoption of children who are abandoned during the formative months occurring shortly after birth. That is the intent of this legislation. It requires that States amend their laws and policies to expedite the procedures to recruit and place abandoned babies in permanent adoptive homes.

Within 30 days after a baby is abandoned the State must recruit and place this child with a preadoptive family. This preadoptive family shall have 90 days to petition the court for an expedited adoption hearing. This expedited or fast track procedure was recommended by the OIG study for ensuring permanent homes, and removing placement barriers.

An abandoned baby is defined under the legislation as a baby who is not older than 6 months. What we want to do, quite simply, is to speed up the adoption process for these newborns while they are still adoptable. Experts agree that newborns have a clear advantage over older children in being adopted.

Finally, this legislation requires that abandoned babies be considered children with special needs in order to make them eligible for the adoption assistance program.

This legislation is aimed at society's most vulnerable population: babies abandoned at birth.

## TRIBUTE TO REV. ROBERT V. LOTT

### HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GREEN. Mr. Speaker, at the end of this month, the St. Francis de Sales Parish Center, in Manhattan, will pay tribute to a distinguished member of my constituency, Rev. Robert V. Lott. On Wednesday evening, May 30, 1990, the parish will celebrate the 25th anniversary of Rev. Lott's ordination to the priesthood.

Father Lott, pastor at the St. Francis de Sales Church in New York, has maintained an undying commitment to clerical service. He has been involved with the North American Academy of Liturgy, the Archdiocesan Liturgical Commission and has held many different parish assignments throughout his career. His community involvement includes active participation with such organizations as the Council of Senior Centers and Services of New York City, the Partnership for the Homeless, and the United Neighbors of East Midtown, to name a few.

Father Lott will be honored at Wednesday's special event in New York City for all his outstanding accomplishments in community and church service. I should like to extend a heartfelt congratulations to Father Lott on this very special occasion.

## A TRIBUTE TO KEITH T. JONES

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Keith T. Jones, of Rumford, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for East Providence Senior High School, in East Providence, RI.

This award is presented to the student, chosen by East Providence Senior High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Keith has certainly met these criteria while at East Providence Senior High School. He is graduating first in his class with a GPA of 95.89. Keith is also a member of the French Club and is a member of the school's varsity baseball team.

I commend Keith for his outstanding achievements and wish him all the best in his future endeavors.

## ZAIRE LEADS PROTECTION OF AFRICAN ENVIRONMENT

### HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. PORTER. Mr. Speaker, I would like to commend the Government of Zaire for their recent moves to protect the environment of Africa.

The recent White House Conference on Science and Economic Research Related to Global Change brought together a multitude of countries. At the conference Zaire provided a clear example of what an under-financed, developing country can do to protect the environment.

The Government's environmental policy is unprecedented in central Africa. Recently, Zaire announced several progressive steps including: the protection of 7.8 percent of Zaire's national territory in parks and nature preserves with plans for doubling the reserves to some 37.5 million hectares in the next decade. Zaire also strengthened laws dealing with environmental protection and established a trained body of personnel to combat the poaching of Zaire's elephant population.

Today Zaire is one of the leading African nations in the environmental arena. We must regard these efforts and encourage other African nations to follow this example.

## EDWARD J. DERWINSKI DISTINGUISHED PUBLIC SERVANT

### HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BROOMFIELD. Mr. Speaker, this morning, a dear friend and former colleague will receive the Distinguished Service Award from the U.S. Association of Former Members of Congress. I can think of no one who is more deserving of this high honor.

For almost a quarter of a century, Ed Derwinski and I served together in the House, working side by side on the House Foreign Affairs Committee, where Ed earned a reputation as one of our most knowledgeable members on foreign affairs.

Ed retired from Congress in 1983 but not from public service. Secretary of State George Shultz tapped him to serve as Counselor of the State Department and later as Under Secretary of State for Security Assistance, Science and Technology. His accomplishments earned him the State Department's Distinguished Service Award in 1988. Among those notable achievements were his role in resolving longstanding irritants between the United States and traditional allies as varied as Canada and Iceland and the new nations of Micronesia and Oceania.

When the new Department of Veterans Affairs was created last year, President Bush called on Ed to be our Nation's first Secretary of Veterans Affairs. Once again, he has served with distinction.

It is indeed an honor to join my colleagues in extending our sincerest best wishes and congratulations to Ed Derwinski.

## A TRIBUTE TO THE TOWNSEND POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Townsend Police Department for their dedicated and outstanding service to the people of Townsend, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Townsend Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a Nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief William May and those who serve in the Townsend Police Department:

Richard Vance, Barry Brown, Erving Marshall, David Profit, John Johnson, John Carter, Paul Morrison, James Marchand, Cheryl Mattson, and Thaddeus Rochette.

## A TRIBUTE TO JENNIFER M. FARIA

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Jennifer M. Faria, of Bristol, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for Bristol High School, in Bristol, RI.

This award is presented to the student, chosen by Bristol High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Jennifer has clearly met these criteria while at Bristol High School. Her academic record is outstanding as she is graduating sixth in her class. Her extracurricular activities are also equally impressive. She is the vice president of the student council and a member of the executive board. Jennifer is the secretary for the National Honor Society and the editor of the school yearbook. She is a varsity cheerleader and is also the secretary of the French Club.

I commend Jennifer for her outstanding achievements and wish her all the best in her future endeavors.

## ALLOW CHIROPRACTORS TO BE COMMISSIONED IN THE MILITARY

### HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. EVANS. Mr. Speaker, today, I am offering a bill to allow chiropractors to be commissioned in the military and provide care as members of the armed services.

Chiropractors are an integral part of our Nation's health care system. Chiropractic services are provided under Medicare, Medicaid and vocational rehabilitation. All 50 States, including the District of Columbia, Puerto Rico, and the Virgin Islands license chiropractors as recognized health professionals. The Department of Health and Human Services defines chiropractors as category I health providers, the category that includes medical doctors and dentists.

Despite this recognition in other branches of government, the Department of Defense does not commission chiropractors as officers. Because of this, members of our Armed Forces are missing an effective form of health care.

My bill, in addition to allowing chiropractors to be commissioned, would establish pay rates for military chiropractors roughly equivalent to the rate for military dentists. The bill would also establish special pay requirements for chiropractors who have been board certified, undergone internship service, or have fulfilled service requirements.

I urge my colleagues to join me in sponsoring this commonsense legislation which would insure that our fighting men and women receive the best possible medical care. It is time that the Department of Defense got in line with the rest of the Federal Government on this issue. As somebody who has personally enjoyed the benefits of chiropractic service, I think it is long overdue.

## SUBSTANCE ABUSE TREATMENT CORPS ACT OF 1990

### HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GREEN. Mr. Speaker, today I rise with my colleagues, Mr. STARK, Mr. GLICKMAN and Mr. GRANT to introduce legislation which

would address the staffing crisis in drug and substance abuse treatment. The primary objective of the Substance Abuse Treatment Corps Act of 1990 is to get more drug and substance abuse treatment personnel into our Nation's areas of need, both urban and rural. This legislation adopts many of the concepts of the National Health Service Corps and focuses on training and placing more substance abuse treatment providers.

The lack of sufficient numbers of treatment personnel is the leading contributor to the crisis in substance abuse treatment. The Substance Abuse Treatment Corps Act will remedy that shortage by increasing the availability of treatment services for drug and alcohol abuse in health worker shortage areas. If adopted, this legislation will go far to attract certified and qualified individuals to serve in the Substance Abuse Treatment Corps. In return, the Federal Government will agree to repay, for each year of service, not more than $20,000 of the principal and interest of the individuals educational loans.

As many of my colleagues know, an abundance of statistical evidence reveals there is a crisis in substance abuse treatment. According to a recent study released by the National Association of State Alcohol and Drug Abuse Directors [NASADAD], only one in eight people who need treatment is receiving it. The latest National Drug and Alcoholism Treatment Unit Survey from the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism indicated that only 1 in 11 people who needed treatment was being served.

The need for substance abuse services in New York City and throughout the Nation continues to be unmet and the current treatment system has been unable to expand. In 1989 the State of New York reported that 4,891 people were on the waiting list for drug abuse treatment, and an additional 2,166 were on the waiting list for alcohol abuse treatment. The average days estimated between request for treatment and admission to treatment is 65 days. We should not have to tell an addict who wants treatment to come back in 2 months or 6 months. We should have treatment facilities that can handle the demand for treatment.

Although the administration has proposed increasing the Federal anti-drug budget by $1.1 billion—total drug war budget $10.6 billion—in fiscal year 1991, more than 70 percent of that total would be spent on law enforcement and interdiction. Treatment, which effectively reduces demand, has tragically been underfunded in our war on drugs.

The Substance Abuse Treatment Corps Act of 1990 is a response to the President's call for improving the existing drug and substance abuse treatment system with more adequately trained personnel. The legislation has been endorsed by the National Association of State Alcohol and Drug Abuse Directors, the American Association for Marriage and Family Therapy and The American Society of Addiction Medicine, Inc.

The Substance Abuse Treatment Corps Act will go a long way to address the demand side of the substance abuse problem that continues to plague individuals and families in both urban and rural America. I encourage my colleagues to give this proposal serious consideration as we continue in our efforts to eradicate the drug scourge.

## REFUSENIKS CONTINUE TO BE DENIED BASIC HUMAN RIGHTS

### HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. PORTER. Mr. Speaker, last year President Bush stated that he would not waive the Jackson-Vanik amendment for the Soviet Union until the Soviets codified and faithfully implemented a law on freedom of emigration.

Despite the fact that 1989 saw a record exodus of Soviet Jews, the President remained true to his word and I commend him for that.

On the eve of the upcoming summit, I urge him to once again stand firmly behind human rights and compel the Soviets to honor their stated commitment to freedom of emigration.

There are still over 300 long-term refuseniks who are arbitrarily being denied their basic human right to live where they choose.

One case, Boris Kelman, a 10-year secrecy refusenik, was recently told that he would not be allowed to apply to leave. Why? Because his invitation came from a cousin and not a first degree relative.

Mr. Speaker, this is completely unacceptable.

There is no compelling reason why we should reward the Soviets with preferential trade treatment so long as they continue to violate international human rights agreements.

Our policy should remain—no benefits until all refuseniks are released and free immigration is institutionalized under the rule of law.

## A WARM WELCOME TO THE PRESIDENT OF TUNISIA

### HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BROOMFIELD. Mr. Speaker, I urge my colleagues to join me in giving a warm welcome to President Zine el Abidine Ben Ali of the Republic of Tunisia on the occasion of his first State visit to Washington. I hope that his visit is both productive and enjoyable.

The United States-Tunisian relationship is over 200 years old. Tunisia was among the first countries to recognize the independence of the United States during our Nation's early years. Since that time, the United States and Tunisia have maintained a good relationship and share many values. Today, Tunisia remains one of the most open and democratic States in the Arab world.

The foundation of Tunisia's success was laid under the leadership of Habib Bourguiba, the father of independent Tunisia. After President Bourguiba became ill in 1987, there was a smooth transition of power in accordance with the Tunisian Constitution. Since that time, President Ben Ali has pledged his commitment to strengthening democratic values. Since assuming the Presidency, he has also implemented economic and political reforms which will benefit the people.

On the political side, President Ben Ali has sought to make the government more responsive to the needs of the Tunisian people. He has limited the number of terms that a President may serve and most political parties have been legalized. Last year, free and open elections were held for the first time with a wide range of political parties participating. In addition, thousands of political prisoners have been released and their civil rights restored in a general amnesty announced in 1989. The United Nations Convention on Torture was ratified by the Tunisian Parliament.

On the economic side, the government of President Ben Ali has implemented a structural reform program supported by the United States, the IMF and the World Bank. Tunisia has met or exceeded all of the IMF targets despite the significant economic challenges that confronted that country. The lingering effects of a 2-year drought has forced the Tunisian Government to spend 10 percent of its budget on unanticipated grain imports. This has slowed economic growth. Tunisia currently faces a heavy external debt burden and high unemployment. Nevertheless, it continues to be a responsible debtor nation and has met all of its international obligations.

President Ben Ali is to be commended for his commitment to democracy and the progress that Tunisia has achieved thus far. I believe that the United States should continue to assist the Government of Tunisia in meeting its goal of economic and political freedom for all Tunisian citizens. Welcome to America, President Ben Ali!

## TRIBUTE TO THE LITTLETON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Littleton Police Department for their dedicated and outstanding service to the people of Littleton, MA, in the protection of life, liberty, and property.

Each day, the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Littleton Police Department, the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this

time to recognize the contributions of Chief Thomas Odea and those who serve in the Littleton Police Department:

Joseph Lombardo, Robert Romilly, Steven Ziegler, John Hagan, Paul Hollingsworth, Greg Irvine, John Kelly, Matthew King, Paul Baratta, and Thomas Delegee.

## REQUIREMENTS WITH RESPECT TO INFANTS BORN TO SUBSTANCE-ABUSING WOMEN

### HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BLILEY. Mr. Speaker, today, I am introducing legislation with Representative CLYDE HOLLOWAY to ensure that newborns born to drug-abusing mothers are given the appropriate medical attention they so desperately need. This proposal would require States to establish procedures to test and treat newborn infants born to drug abusers.

Newborn urine toxicology screens are an important way of identifying which mother-child pairs are in need of help. I believe that testing newborns for drugs would aid the health provider in establishing or supporting a diagnosis of neonatal drug withdrawal; in identifying the drugs used in order to anticipate the course of withdrawal, and to guide drug therapy if required.

Clearly, newborn urine toxicology should be used in conjunction with a complete knowledge of maternal drug history. However, testimony before the Select Committee on Children, Youth, and Families reveals that many health care providers do not know how to take a drug history. Furthermore, several studies show that self-reported drug use among pregnant women results in underidentification of illicit drug use. Simply put, self-reports are not an accurate measure of illicit drug use among pregnant women.

This legislation will provide an opportunity for the mother to confront her addiction and with the support of medical and social work professionals make important decisions, not only about her own treatment, but about the future of her newborn child.

The rights of the mother would be protected under this legislation by requiring a clear medical determination that she is drug or alcohol addicted prior to testing the infant. Furthermore, this legislation protects the rights of the health-care provider by granting immunity from civil or criminal liability for performing such tests. This will allow physicians to aggressively treat these fragile and sick newborns from the moment they are born.

Children born disabled by maternal drug use can only benefit from early detection and the development of appropriate services designed to meet their special needs. Testimony before the Select Committee on Children, Youth, and Families reveals that a newborn baby can be a powerful motivator in helping a drug-addicted mother seek treatment.

Only by early identification can appropriate action be taken to get both mother and baby the help they so desperately need.

## IN SUPPORT OF HUMAN SERVICES REAUTHORIZATION

### HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mrs. MORELLA. Mr. Speaker, I am pleased to speak in support of H.R. 4151, the human services reauthorization bill, which reauthorizes the Head Start Program. This year marks the 25th anniversary of Head Start, a program begun in 1965 as part of the war on poverty, to ensure that economically disadvantaged children would begin school ready to learn.

H.R. 4151 would reauthorize the Head Start Program through fiscal year 1994. Follow Through, State Dependent Care Development Grants, and Community Food and Nutrition are among the other programs reauthorized by this legislation.

Mr. Speaker, I urge my colleagues to continue to support Head Start. It is a program that works. It has served nearly 11 million children in the past 25 years. Reauthorization of H.R. 4151 will show the Federal Government's firm commitment to America's neediest residents and dearest hopes.

## A TRIBUTE TO CHRISTOPHER LA-BONTE

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Christopher LaBonte, of Pawtucket, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for William E. Tolman Senior High School, in Pawtucket, RI.

This award is presented to the student, chosen by Tolman High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Christopher has clearly met these criteria while at Tolman. He is this year's student council president as well as the editor of the yearbook. Christopher was also a class officer for his junior year.

I commend Christopher for his outstanding achievements and wish him all the best in his future endeavors.

## CONGRATULATIONS TIM SETTERDAHL

### HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. EVANS. Mr. Speaker, today, I would like to take a moment to congratulate a young man from Rio, IL, Tim Setterdahl. Tim, a sixth grader at Alwood Elementary School, was recently awarded first place in the "Round the World Writing Contest," sponsored by the International Trans-Antarctic Expedition.

The essay contest was part of a science project that gave students the opportunity to track the trans-Antarctic expedition that was led by William Steger of Minneapolis. As part of the project, students at AlWood staged their own expedition donning winter coats and pulling sleds loaded with supplies through the school halls.

It is certainly refreshing to see students like Tim and his classmates take such an active interest in world events, for it is today's youth who will assume leadership roles in our Nation's future. I am, therefore, pleased to insert Tim's essay into the RECORD.

ROUND THE WORLD WRITING CONTEST

(By Tim Setterdahl)

International cooperation will help Antarctica's environment and the world's. One way is to renew the treaty. I think it should be renewed because, if not, Antarctica's beauty would be on the verge of becoming a continent of man instead of a continent of nature's beauty. If there wouldn't be a treaty, all countries would be fighting for land and soon Antarctica would have no more beauty.

My next idea is to have more international expeditions such as this one. I think this expedition will help people realize that the beauty of Antarctica can occur in their own country. This idea may help people not to pollute the air and that might save the ozone layer.

I think this expedition will help the relationships between all the countries. Maybe they will realize and cherish, all together, the world's environment. Also, maybe they will realize the earth is very fragile and will learn to treat nature and the world's environment with care.

For sure, there should be no wars in Antarctica! It would ruin Antarctica's reputation. Antarctica is supposed to be a peaceful place, and it should stay the way it is now, peaceful. If a war should just happen, Antarctica would never be the same ever again.

I think each person who goes to Antarctica should have a purpose to go there. If too many people go there, they will just make Antarctica trashy and hopefully that will never happen.

I think the animals should be protected in Antarctica. Some animals are only able to exist in Antarctica. Hunters shouldn't be able to hunt them for meat or oil, for some examples. Animals that can stand temperatures about 80 degrees shouldn't be killed. Someday if hunters kill the animals, they might become extinct.

The plant life also shouldn't be killed. Of the very few plants living in Antarctica, the extraordinary plants might be killed and then someday the plants, just like the animals, may also become extinct.

I don't think countries should be able to drill for oil in Antarctica. I think all of Antarctica's natural resources should just be left alone. It would be neat to think of Antarctica as being 100 percent natural.

## A TRIBUTE TO THE CARLISLE POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Carlisle Police Department for their dedicated and outstanding service to the people of Carlisle, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Carlisle Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief David Galvin and those who serve in the Carlisle Police Department:

Earnest Steward, John Sullivan, Nancy Iosue, Craig Grogan, Richard Tornquist, Bruce MacNeil, Thomas Whelan, Neal Archambault, William Tee, Stephen Otto, W. Royce Taylor, Mark Schofield, Leo Crowe, Kevin Walsh, Steven Curley.

## CHAPIN HOME FOR THE AGING HONORS JOHN A. GAMBLING

### HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ACKERMAN. Mr. Speaker, I rise so I may share with you and all of our colleagues a little bit of the glorious history of New York City—my hometown.

In a few days, the citizens of the city will celebrate the anniversary of the Chapin Home for the Aging.

Mr. Speaker, this place is truly among the institutions of New York. Shortly after the Civil War, an outstanding woman of vision and energy, Mrs. Edwin H. Chapin, realized a growing need within the growing city was for a humane home where the senior citizens who served their city and Nation so well could find support and rest. So in 1869, the Chapin Home was opened.

As the new century took hold, so too did the industrial revolution with its associated hustle, bustle, and pollution. As I have indicated, Mrs. Chapin was a woman of great vision and, in 1910, she moved the home to a better location. She chose a new home for her home in Queens, a Borough of New York without equal, and my home county.

Today, Mr. Speaker, on the 121st anniversary of the Chapin Home for the Aging, plans are underway for more improvements, including a new 220-bed building.

As part of this year's celebration, the wise trustees of the Chapin Home have decided to honor another institution equally essential to New York—radio personality, John A. Gambling. John A. is the current host of WOR Radio's "Rambling With Gambling" program.

For 65 years, the City has started its day listening to "Rambling With Gambling." John A.'s father, John B., inaugurated the broadcast in 1925. In the future, the station will continue to bring news, information, and intelligent conversation to the city with John A.'s son, John R., at the helm.

Today, when Billboard Magazine formally recognizes John A. Gambling as "Air Personality of the Year," these experts are simply acknowledging fact.

When the listeners of the metropolitan area choose John A. as New York's favorite radio personality, they merely confirm what is already well known to John A.'s fans and competitors alike.

Not as well known, John A. and his wife, Sally, are the proud parents of three children and five grandchildren. Besides John R., the Gambling daughters, Ann and Sarah, pursue their own professional careers while maintaining their families.

New York City is a richer place because both John A. Gambling and the Chapin Home are there.

Mr. Speaker, I call upon all my colleagues in the U.S. House of Representatives to join me in paying tribute to John A. Gambling and the Chapin Home for the Aging.

## IN HONOR OF DIAMOND ELEMENTARY SCHOOL

### HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mrs. MORELLA. Mr. Speaker, I take great pleasure in commending Diamond Elementary School in Gaithersburg, MD, for being honored as an outstanding school in the U.S. Department of Education National School Recognition Program. The program each year honors outstanding schools on the basis of their instructional programs, school improvement efforts, quality of teaching, school climate, and parent and community involvement. This year's emphasis was also placed on schools with a "can-do" attitude toward problem solving.

I congratulate Mr. Alfred Sklarew, principal of Diamond Elementary, and the students and staff, on this public recognition of their fine school. The success of this Montgomery County public school can be attributed to strong administrative leadership, the commitment of the staff and teachers, and enthusiastic support from the community. Mr. Sklarew stated, "Our motto is We Dream, We Dare, We Do. The outstanding staff, parents, and students at Diamond are proud of this award. All of our excellence came shining through."

Let me take this opportunity to thank Diamond Elementary School for its service to the community of Montgomery County, MD, and to wish them continued success in the years to come.

## A TRIBUTE TO GILLIAN L. FELDMAN

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Gillian L. Feldman, of Lincoln, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for Lincoln High School, in Lincoln, RI.

This aware is presented to the student, chosen by Lincoln High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Gillian has certainly met these criteria during her stay at Lincoln High School. Her academic record is impressive. Gillian is a Presidential Scholars Program semifinalist and is a commended student in the National Merit Program. She is a member of both the Rhode Island and the National Honor Society. Gillian is also honored as this year's salutatorian for Lincoln High School.

I commend Gillian for her outstanding achievements and wish her all the best in her future endeavors.

## NATIONAL POLICE WEEK AND PEACE OFFICERS MEMORIAL DAY

### HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SANGMEISTER. This week has been declared National Police Week and May 15th as Peace Officers Memorial Day. I would like to take this time to recognize all current and former police officers for the dedication and sacrifice they have displayed on and off duty. Most people work 8 hours and call it a day. For a police officer, his or her responsibilities and duties run 24 hours a day, 7 days a week. Even though police officers do have regular work schedules, they must be continuously on alert. What would our lives be without the protection of police officers? I find it unthinkable. For those who take the police for granted, just imagine the insecurity and disorder that would exist without them. With great pride, I can say the police officers of the Fourth Congressional District are truly our finest. Mr. Speaker, at this time, I would like to pay special tribute to those brave officers who have died in the line of duty. These heroes have given the supreme sacrifice of all—their previous lives. Finally, I want to thank the National Law Enforcement Officer Memorial Fund for their efforts on behalf of police officers throughout

the Nation for making it possible to establish a memorial in the Nation's Capital.

## ON BEHALF OF PROF. ERIC E. CONN

### HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. FAZIO. Mr. Speaker, today I rise in honor of the notable accomplishments of Eric E. Conn, a California professor and plant biochemist, who has not only been a pioneer in his field, but has also dedicated himself to the promotion of valuable scholarly accomplishments. In recognition of this level of dedication, Conn was awarded in March the 1990 University of California at Davis, Prize for Teaching and Scholarly Achievement, which is believed to be the largest monetary award of its kind in the country.

Established by the Cal Aggie Foundation, the $25,000 prize pays tribute to Professor Conn's ability to set high standards for academic achievement in undergraduate teaching.

Frank Press, president of the National Academy of Sciences, describes Conn as an inspiration and credit to all scientists, noting the importance of providing students with a high-quality education. Professor Conn, who was elected to the prestigious scientific organization in 1988, is, according to Press, a reminder to the education field that "one person can make a difference."

Eric Conn has been a member of the UC Davis faculty since 1958, and in that time has been credited with playing an instrumental role in the development of biochemical research and teaching on campus. He helped shape the campus' budding biochemistry and biophysics department in the late 1950's and established the department's basic biochemistry course, which he continues to teach with his colleagues. To supplement the course, he coauthored the textbook "Outlines of Biochemistry," which is now in its fifth edition and used in classrooms around the world.

Professor Conn is renowned for his research in the area of cyanogenic glycosides, substances that produce cyanide in plants. His studies focused on understanding the process of cyanide formation in plants and the role played by the poisonous substance in plant metabolism. According to other scientific research in the field, the cyanide substance provides a valuable chemical line of defense for the roughly 2,000 plant species known to produce cyanide, protecting them from grazers and the invading growth of other plants.

Mr. Conn's laboratory on the UC Davis campus, is nationally recognized for its emphasis on natural plant products, and has attracted graduate students and postdoctoral researchers from at least 10 countries, including Germany, Denmark, Australia, and Japan.

During his years as an instructor, Professor Conn has been responsible for enlightening thousands of undergraduate students to the chemical processes that power living things. Like his colleagues, students consistently give him high ratings for his enthusiastic teaching style. Not only has he proven to be an effective communicator, he also gives up time outside of the classroom to assist students.

Former students of Professor Conn described his approach to teaching as one which makes learning a pleasurable experience. He utilizes his clarity and patience, and creates explanations that are worth waiting for.

Professor Conn maintains that he has no formal teaching philosophy, although he admits being influenced in teaching style by former professors at the University of Colorado and the University of Chicago. From these two men, Ruben Gustavson and Birgit Vennesland, he developed an understanding of lecturing skills, and the importance of imparting enthusiasm and encouragement to students.

During his years as an instructor, Professor Conn has been recognized for his aptitude as a teacher and scientist with awards such as the Distinguished Teaching Award and the Faculty Research Lecturer Award, which is given annually by faculty peers at UC Davis. On a more literary note, he was a coeditor of a 15-volume reference set titled "The Biochemistry of Plants: A Comprehensive Treatise," later described by researchers as an emerging classic for plant scientists. He is past president of the Phytochemical Society of North America and the American Society of Plant Physiologists and has served on the editorial board of several scientific journals.

Mr. Speaker, today I wish to highlight and applaud Mr. Conn's most recent achievement and, at the same time, draw attention to his lifelong commitment to quality education and scientific innovation. His service to UC Davis as an instructor and researcher are invaluable to both his students and the scientific community. I wish him luck in all future endeavors and congratulate him on all his past achievements.

## A TRIBUTE TO THE WESTON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Weston Police Department for their dedicated and outstanding service to the people of Weston, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Weston Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief James McShane and those who serve in the Weston Police Department:

Robert F. Allenberg, Mark Alonzi, Roland W. Anderson, Jr., Edward J. Barbetti, Paula A. Barbetti, Ronald E. Benotti, John C. Bentley, Gilbert C. Boyles, John Brewer, Edmund Burke, Susan Cappello.

Robert M. Cook, Vincent P. Corcoran, John Cronin, Patricia Delaney, John J. Forti, William F. Garrigan III, Thomas M. Healey, Francis J. Hines, Jr., Michael E. Joyal, John Lyons, Daniel C. Maguire.

Stephen A. McShane, Betty J. Millen, Robert C. Millen, Jr., Dale A. Muldoon, Walter P. Nelson, Thomas F.W. Nime, Leo Richards, Steven F. Shaw, Richard P. Staunton, Douglas Gray, Barbara Terrio, Brian Malone, Michael Murray, Thomas Zagami.

## THE C-17 AND FAST SEALIFT: THE CONTINUING NEED FOR STRATEGIC MOBILITY

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ANDERSON. Mr. Speaker, the past year has brought remarkable changes in the world, changes which have greatly impacted our thinking on the necessity and numbers of American forward-deployed troops. The virtual disintegration of the Warsaw Pact as an effective fighting force, the eruption of democracy in Eastern Europe, and the imminent reunification of Germany have all brought into question the need for a large American troop presence in Europe. The Central Intelligence Agency's new estimates of greatly increased warning time NATO would have before a Soviet invasion of Western Europe means we can look seriously at how to bring the majority of our boys home from Europe. Any floors that the administration has recommended on numbers of U.S. servicemen in Europe are quickly turning into ceilings. To complement European developments, Secretary of Defense Cheney recently announced troop reductions in the Pacific Rim.

In these exciting times of peace and arms reductions, we must not lose sight of the important fact that the United States is a European power. Even more salient is the fact that the United States has emerged from the cold war as the only superpower on this Earth. There is no nation which holds the combination of military and economic power as the United States does, bemoaners of America's decline aside. Our commitments to peace, stability, and the protection of American interests have not diminished. With this in mind, our thinking must be long term if we are to continue to enjoy the current dividend of peace we have earned through the expenditure of American lives, effort, and money. If we have learned one overriding lesson

through the last 45 years, it is that peace is reinforced through strength, both economic and military, and the resolve to use that strength should the need arise.

I state this belief today because I see a disturbing trend arising. There are many Americans who would bring our boys home, leaving the United States an isolated and impotent power. The death of hundreds of thousands of American servicemen in the past century should have taught us by now that peace is to be earned and not wished for. I believe we can start to reduce America's forward-deployed forces, but we must then build the ships and planes we need to put them back in place should the circumstance arise. A soldier or a tank sitting in the United States counts for little if we do not have the capability to put that force on target when needed.

This fact makes it imperative that Congress support the C–17 and fast-sealift programs. Both programs provide the United States with the capacity to move large amounts of material over short periods of time. We have only to look to "Operation Just Cause" in Panama to see the demands upon strategic airlift. This relatively small operation used a staggering percentage of our airlift capability. Those planes used are not getting any younger. At some point in the near future, a significant amount of our airlift will have met its useful service life. The structures can only take so many flying hours. The C–17 not only modernizes an aging fleet, but remedies a serious shortfall. I am concerned that Secretary of Defense Cheney's Major Aircraft Review bit too deeply into the number of these aircraft we are going to build. The C–17 will be able to put a great deal of equipment into an area on short notice, and on airfields that are short and primitive. The plane can perform both the tactical and strategic mission; a capability no other airlifter in the Air Force's Military Airlift Command can perform.

The fast sealift program, like the C–17, strengthens our ability to move equipment in a timely fashion. While it is certainly true that the requirement to transport supplies and equipment to Europe from the United States in 4 or 5 days may have become obsolete due to the events in Eastern Europe and the Soviet Union, no Member of this Congress believes there aren't still significant threats to United States interests and allies in the world. The capability to intervene quickly is critical. I would emphasize a crucial axiom of war: The side that puts the most men, equipment, and material in the area of operations the quickest, and then has the capacity to resupply and reinforce that initial commitment, is the side that invariably wins. These programs are not tradeoffs and one should not be emphasized over the other. Studies have shown we do not have enough of either capability. Should the United States have to intervene somewhere, and the fight is not as short as the one we saw in Grenada or Panama, I have no doubts both systems would be utilized.

There are those who would detract from these programs, labeling them unnecessary in the postcold war world. Increasing estimates of the warning time which the United States will have to prepare for a conflict in Europe is often the statistic most referred to denigrate our need for these programs. But increased warning time does not mean we have increased the time period in which we will act. Too often we debate, redebate, and then debate a little more the wisdom of action in the face of ominous warnings and act only the minute before a crisis. Often action only occurs after a crisis. Furthermore, it is clear that our military focus is slowly being refocused off the plains of Europe and on the possibility of wars in the Third World. Past experience has taught us that minor conflicts can become hot very quickly.

Giving the armed services and the President the capability to respond to crises with the proper application of force if it is deemed necessary is critical. All the sophisticated hardware, quality personnel, and training in the world matter not one bit if our military forces cannot be put on target in a timely manner. Fast sealift and the C–17 allows the President great flexibility and the capacity for a speedy response in a wide range of conflicts. If we are to maintain our status as the leader of the free world, and preserve democracy for future generations, we must have these programs and we must fully support them.

## HONORING THE THIRD ANNUAL SPECIAL OLYMPICS IN HOLYOKE, MA

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. CONTE. Mr. Speaker, it gives me great pleasure to bring to the attention of my colleagues the third annual Special Olympics which is being held in Holyoke, MA, on May 23 and 24. Over 350 special needs students will be participating in a variety of modified athletic events.

I am proud to represent the people of Holyoke who have worked hard over the past 3 years to make the Special Olympics the success it is today. The community support combined with the dedication of the Holyoke Public School staff have produced a much anticipated and most successful event.

We all know that the principle behind the Special Olympics is to provide the most enjoyable, beneficial and challenging activities for mentally retarded athletes. Special Olympics believes that through sports training and competition, people with mental retardation benefit physically, mentally, socially, and spiritually; families are strengthened; and the community at large, both through participation and observation, is enriched by sharing with mentally retarded people an environment of equality, respect and acceptance. The people of Holyoke have incorporated the principles created in 1968 by the Joseph P. Kennedy, Jr. Foundation into their annual Special Olympic games.

I am proud to inform you, Mr. Speaker, that in this year's games, the families of Special Olympic athletes will be taking an active role in the program. The success of parent-child events which stress cooperative efforts carries over into their work, their education, and their home life. These are just several of the benefits which result from the camaraderie and spirit associated with the Special Olympic games.

I salute the participants of the third annual, Holyoke, MA, Special Olympics. It is important that we continue to expand this program and keep alive the motto of the Special Olympics athletes: "Let me win, but if I cannot win, let me be brave in the attempt."

## TRIBUTE TO THE MOUNT CLEMENS PUBLIC LIBRARY

### HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BONIOR. Mr. Speaker, I rise today to pay tribute to the Mount Clemens Public Library on its 125th anniversary.

In 1865, at the end of the Civil War, the Mount Clemens Public Library was born. The first location of the library was in a room on the third floor of the old Union School building. Its founder, Mr. Silas Wood, was principal of the Union School from 1865 to 1869. Mr. Wood's collection of books was a 19th century version of the book mobile. The books moved from the school to the courthouse and then to the chamber of commerce building.

Finally, Mr. J.B. Estabrook, superintendent of schools, solicited funds from multimillionaire industrialist, Mr. Andrew Carnegie. In 1902, Mr. Carnegie referred to Mount Clemens, MI, as "a go ahead city." With those words he donated $17,000 for the construction of a library to be built on land formerly owned by the city's founder, Mr. Christian Clemens. This building served as the library's home for 65 years, but by the late 1950's every square inch of space had been used for either work or storage.

It became obvious that a new library was needed. In 1969, under the leadership of Library Director Ms. Miriam Altman, the present library building was opened. Today, the library collection includes over 120,000 book volumes, 180 periodical subscriptions, sound recordings on LP, cassette and compact disc and over 700 documentary and feature film video cassettes.

On this the 125th anniversary of its founding, the commitment of the library staff is the same as Silas Wood's was back in 1865: To provide the best possible informational, educational and recreational materials to the citizens of Mount Clemens.

## A TRIBUTE TO DOUGLAS QUENTIN WILLIAMS

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Douglas Quentin Williams, of Cumberland, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for Cumberland High School, in Cumberland, RI.

This award is presented to the student, chosen by Cumberland High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Douglas has certainly met these criteria during his stay at Cumberland High School. Douglas moved to Rhode Island from Texas in his sophomore year. While enrolled in honors courses at Cumberland, Douglas maintained a 3.7 GPA and will graduate fifth in his class. He has also been selected to the National Honor Society.

I commend Douglas for his outstanding achievements and wish him all the best in his future endeavors.

## A TRIBUTE TO ANGELO TSAKOPOULOS

### HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. FAZIO. Mr. Speaker, I rise to honor one of Sacramento, CA's most outstanding citizens, Angelo Tsakopoulos. A visionary, a philanthropist, and a humanitarian, he is truly the embodiment of the American dream.

On May 10, 1990, the Society of Fellows of the Anti-Defamation League honored Angelo Tsakopoulos by presenting him with the Distinguished Community Service Award. Hundreds of his friends and admirers joined his wife, Sofia, and his family at the Arco Arena for a gala dinner to witness this tribute to Mr. Tsakopoulos.

Few people ever achieve the success and stature that Angelo Tsakopoulos has. His love of family, his generosity to numerous causes and his commitment to the betterment of his community have earned him the recognition he so rightly deserves.

I would like at this point to enter into the RECORD the speech that Angelo Tsakopoulos made in acceptance of the ADL award. At a time when we are experiencing a rise in racial and ethnic tensions, his remarks are particularly relevant. I highly recommend that each of my colleagues read this excellent speech.

SPEECH BY ANGELO TSAKOPOULOS BEFORE THE ANTI-DEFAMATION LEAGUE, MAY 10, 1990

Members of the clergy, honored guests, dear friends: I cannot fail to be moved by this honor which comes from an organization whose purpose and program are recognized as the fountainhead of human relations.

I realize that this award is not to honor the accomplishments of an individual but to symbolize a great moral cause—the cause of justice, civil rights and fair treatment for all citizens alike. THAT . . . I believe, is the spirit and design of the award. It is an expression of vigil—seeing that our heritage of democratic ideals is a reality for all Americans and for all mankind.

Being linked with such a noble belief arouses a lasting feeling of gratitude. It is a pleasure to join the ranks of past recipients of ADL's Distinguished Community Service Award.

Several years ago a provocative article titled—(are my Jewish friends ready for this)—"Are the Jews really a Greek Tribe?", appeared in the Jewish Chronicle of London.

The author was Joseph Yahuda, a master of Hebrew and Greek as well as an eminent Inner Temple lawyer. He wrote "that Biblical Hebrew is, in fact, Greek, conceivably camouflaged Greek—but Greek nonetheless. Moreover, the ancient Hebrews are themselves an ancient Greek tribe."

In Yahuda's view, a group of the Hebrews led by Abraham, the great dissenter, broke away from the traditional religious conceptions of the Greek tribes. This group insisted on worshiping the one Eternal Power behind the images that the other Greeks worshiped.

Now, that's a fascinating thread of history for scholars to unravel. But—there is a common connection between the Greek and Jewish Experience. We see it here in America.

Starting about the turn of the century, the doors of this bountiful land were opened wide for over two decades to welcome newcomers from other nations. They crossed the seas by the tens of thousands, hoping that their adopted land would be free of old-world prejudices and economic barriers. With only their dreams, these immigrants left their native lands to build a future in a new world.

This extraordinary history is familiar to most of us. After all, we are the product of the greatest immigration story in America.

Unfortunately there is a dark side to this story. Naturalized citizens of that generation tell us that for many, their American experience was pitted with discrimination and unfair treatment.

One outcome of the Jewish experiences of those early days is the Anti-Defamation League of B'nai B'rith, an agency of broad accomplishments in the field of civil and human rights. Its presence is worldwide. Its influence is significant.

The footprints of ADL can be traced along our country's trail of human rights. Long ago, when films and the media portrayed offensive stereotypes, the young ADL was in the forefront of curbing bias. Thus, it became a torch of tolerance and decency. Before World War II, the League rallied the national conscience against Hitler's propaganda, and ADL emerged as a force in the hearts and minds of the American people. After the war, the organization spearheaded the offensive to eliminate discrimination against minorities by selected professional groups, graduate schools, and neighborhoods.

From such actions, ADL gained a solid reputation in the private sector's efforts to secure opportunity for all Americans. The League's role is well-known in the passage of the 1960's civil rights law as well as in landmark cases before the United States Supreme Court on school desegregation. Such participation brought strength to our national community and earned the gratitude of our people.

I congratulate the Anti-Defamation League on its distinguished contributions as a guardian of fair play in the civic and economic life of our country.

As we know, American Jews were not alone in their struggle to combat the disease of bigotry and bias. Like them were the Irish, Italians, Asians, Blacks and Mexicans. The early Green immigrants also fought acts of violence and hostile prejudice. Here in the West the Bingham Strike of 1912, Ludlow Massacre of 1914, Carbon County Strike of 1922 are names of only a few bloody events that made a difference in the fight for justice and human rights.

In that climate of toil and rage, along with poisonous attacks of the Ku Klux Klan, AHEPA—the American Hellenic Education Progressive Association—was founded in 1922 in Atlanta, Georgia, where ten years earlier Leo Frank was tried by prejudice as the "Yankee Jew". He was falsely accused and subsequently lynched, an act that spurred the birth of the Anti-Defamation League.

There were many more unjust acts—most too painful to recount.

Oppression is bad in any form. We should be grateful to our parents and grandparents who recognized this, and fought oppression by organizing groups, such as the ADL, NAACP and AHEPA.

My feelings are rooted deeply in the soil of occupation where Hitler's lieutenants were the masters of my family's fate in Greece. In those black years, life was a matter of survival. At first-hand I learned about the meaning of injustice, cruelty, and suffering. Although very young then, I can still remember the power and the destruction of those evil times.

Those years are in the news again. East Germany's first democratic government is trying to heal the past, asking to be forgiven for Nazi atrocities. Rightfully, Scott Ury of the Anti-Defamation League said that part of the change in human rights for all people sweeping Eastern Europe "includes these new governments—and particularly East Germany—taking responsibility and admitting the crimes of the past."

Mr. Ury's assertion is relevant throughout the world. A case in point is the denial of the mass murder of 1.5 million Armenians by Ottoman Turkey between the years 1915–1923. This was the first genocide of the twentieth century. It is a matter of historical record. But a shocking development is the well-organized and well-financed propaganda effort to rewrite the pages of history on this genocide. If the revision is allowed, then there will be hope of success for those who claim that the Holocaust victims were simply casualties of war. Such thinking is wrong. We must remember past horrors and atrocities. History must not be rewritten to exclude them. The need to remember is why we have commemorative events.

Recently when U.S. Senate Resolution 22 condemning the death of Armenians as genocide was defeated, many of us reacted as did state Senator Nicholas Petris calling the defeat "deplorable conduct and a shame on our leaders for failing to face-up to the facts."

I appeal to the Anti-Defamation League for its cooperation, and indeed, its leadership. I urge ADL through its 31 regional offices in the United States to support the Armenian Genocide resolution when it comes up again for a vote n the U.S. Senate. If the world community had reacted as it should have to Turkey's genocide of the Armenians, Hitler would not have been able to say "Who remembers the Armenians" and there may not have been a Holocaust in World War II.

Sadly, the Turkish government even violates the laws of the United States. It's American-equipped forces occupy almost forty percent of the small island-nation of Cyprus, and threaten Greek sovereignty in the Aegean. For the first time in fifty years, places of worship of another people are being systematically destroyed or converted into mosques. In other times, synagogues were destroyed or changed into warehouses. Even now, today, a United States ally is turning church after church into mosques.

If yesterday it was a synagogue and today it is a church, then tomorrow it might be a synagogue again that comes under attack. We must stand together. We must not allow this to go on in Cyprus or anywhere.

I also appeal to ADL and its International Affairs Division for active support of the rule of law bills which condition all aid to Turkey on—among other points—the removal of Turkey's illegal occupation troops and colonists from Cyprus.

These disputes are not simply Greek-Turkish issues. The disputes involve the rule of law, the fundamental principle of democratic government—majority rule with minority rights, and, in general, basic human rights. It's in the American interest to apply our laws to all nations alike.

Concerning recent events in the Holy Land, I applaud the many Jewish organizations and ADL in particular, for the strong statement made by Abraham Foxman, the League's National Director. His statement expressed deep concern about Israel's secret financing of a takeover of property owned by the Greek Orthodox Church in the Christian Quarter of Jerusalem's Old City.

Here in America if we are to continue to pave the way toward the kind of society that we all seek to build, we must educate our people with such programs as "A World of Difference" sponsored by the Anti-Defamation League of B'nai B'rith. That program mobilizes key resources in local communities to reduce prejudice, to recognize diversity, and to promote understanding among groups. This matter is urgent, for there is a disturbing rise in crimes of bias involving militant skin-head gangs in our cities . . . hostilities against African-American, Hispanic and Asian students on school campuses, attacks against gays, and physical abuse of American-Asians in gulf ports. These trends are unacceptable.

I believe in the work of ADL. I urge all of us to actively support ADL in its efforts to protect civil liberties and human rights of all Americans—and to protect democracy. In this way we will keep America—with all her faults—the greatest country in the history of mankind.

In closing I recall my visit to Yad Vashem, the Holocaust memorial in Jerusalem. There one learns the most bitter, yet instructive lesson in history; For in Yad Vashem, one sees not only the documentation of the crime but also the triumph of faith.

There is a special library in Yad Vashem which contains on microfilm, the records of the victims of the Holocaust. There are millions of records. As one enters this library, there is an exhibit called "Page of Testimony". This "Page of Testimony" is a microfilm page from the history of each individual who perished in the Holocaust, and includes name, date and place of birth, and date and place of death.

The very first "Page of Testimony" a visitor sees in Yad Vashem is from Greece and reads as follows:

Last name: Vechoropoulos.
First name: Israel.
Born in: Yannina, Greece in 1878.
Father's name: Moshe.
Mother's name: Stamoula.

and, this simple statement,

"Israel Vechoropoulos perished in Auschwitz in March 1944."

I dedicate this award of the Anti-Defamation League to you, Israel Vechoropoulos, son of Moshe and Stamoula of Yannina, son of Greece and child of Israel.

And to all of you, my dear friends, thank you for taking time to share this occasion with me.

God Bless you all.

## A CONGRESSIONAL SALUTE TO FLOYD CLAY IN HONOR OF HIS SELECTION AS THE "1990 MAN OF THE YEAR"

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to an outstanding citizen and a person I hold in the highest regard, Floyd Clay. Mr. Clay, in recognition of his distinguished career and all that he has achieved as a Los Angeles Harbor Commissioner, has been named the "1990 Man of the Year" by the Maritime Trades Department Southern California Ports Council AFL-CIO. It is an honor to bring Floyd Clay to your attention.

As a member of the Harbor Commission, Mr. Clay oversees the maritime service activity and development of Worldport LA, the leading container port in the United States. Floyd Clay was nominated to the post by Los Angeles Mayor Tom Bradley, who like many others, recognized his tremendous experience and expertise in labor relations. He also serves as a business representative and executive board member for the Los Angeles County and Vicinity District Council of Carpenters. He joined the United Brotherhood of Carpenters in 1962, followed by his appointment in 1984 as financial secretary/business representative of local 1437.

Floyd Clay was also recently appointed to serve as a Worldport LA representative to the governing board of the Joint Powers Authority [JPA] for the Consolidated Transportation Corridor [CTC] because of his longtime involvement with efficient, state-of-the-art cargo transportation systems that benefit people and the environment alike. As a result of Floyd Clay's efforts, the CTC has become an innovative project comprising railroad, street, and other related construction improvements aimed at facilitating the movement of international and domestic cargo to and from the port of Los Angeles. The CTC is also expected to reduce traffic congestion through extensive use of rail cars, resulting in improved air quality.

Mr. Speaker, I take great pride in recognizing Mr. Clay for all his vast achievements and activities in the community. He has done a great deal to make living and working in southern California a little better. I salute Floyd Clay on being named the 1990 Man of the Year, and wish his wife, Laura, and his children, Larry and Laurie, all the best for the future.

## TRIBUTE TO THE BEDFORD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Bedford Police Department for their dedicated and outstanding service to the people of Bedford, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Bedford Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a Nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Donald Eunson and those who serve in the Bedford Police Department:

John R. McGrath, Herbert W. Pike, Robert A. D'Auria, Cary A. Whelpley, Michael A. Clouter, Thomas McNeany, Alden P. French, David M. Porter, Mark D. Barbieri, Robert A. Bartlett, Tracey Cook, James F. Graham, and Eric M. Isnor.

Louis Scott Jones, Michael A. L'Heureux, Michael A. McGravy, Robert D. McGrath, Joseph P. O'Brien, Richard F. Petrino, Robert E. Pittman, Paul C. Saunders, Jr., John B. Snyer, Jr., Jeffrey Wardwell, John P. Brosnahan, Jr., and Patrick J. Towle.

## THE REAUTHORIZATION OF THE NEA

### HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. WEISS. Mr. Speaker, I would like to share with my colleagues a New York Times, May 17, 1990, editorial entitled "America's Art, Smeared." This editorial reminds us of the National Endowment for the Art's manifold and consequential contributions, and puts the current controversy surrounding its reauthorization in perspective. Judging by recent events, this reminder is much needed.

Before proposals to disembody the NEA fully materialize, one must consider the facts: In its nearly 25 years of existence, the NEA has approved approximately 85,000 grants to arts organizations and to individuals. Less than 20—less than 0.0235 percent—of these

projects have been charged with violating public interest.

I urge my colleagues to heed "America's Art, Smeared." It is critical that we in Congress support the NEA which has benefited thousands of artists—and millions of Americans.

[From the New York Times, May 17, 1990]

AMERICA'S ART, SMEARED

To listen to all the angry commotion surrounding the reauthorization of the National Endowment for the Arts, you'd think the Endowment was in the business of funding smut. That's exactly what some far-right activists would like the American public to think.

They couldn't be more wrong—or more destructive to a program of inestimable value to the entire spectrum of American artistic activity.

In its 25 years, the Endowment has sometimes been described as too elitist and other times as too folksy, and at no times has it pleased all of the people all at once. But not until last year was it ever hit with an obscenity rap.

At that time the Endowment partly financed a retrospective of photographs by Robert Mapplethorpe, some of which depicted a sadomasochistic male homosexual subculture. And last year the Endowment awarded $15,000 to Andres Serrano, one of whose photographs was of a crucifix submerged in the artist's urine. The work of both men is confrontational, and unnerving. It has also become the weapon of those determined to smear and trash the Endowment.

Never mind that the N.E.A. has nourished an astonishing range of creativity: small museums and great art institutions; hundreds of theater and dance companies across the country; a 92-year-old maker of bobbin lace in South Dakota; thousands of film, radio and television ventures; countless artists, some of them famous now, who might never have been heard from otherwise.

Never mind that the $119 million in grants the Endowment made in 1988 encouraged citizens to contribute $1.3 billion of their own money so those projects could be completed.

No, the only things that people like Senator Jesse Helms of North Carolina and an organization that calls itself the American Family Association are able to see is those two controversial photography grants. The shining record of those 25 years of accomplishment is lost in the tumult. Worse than tumult; hysteria.

"To my mind it's like the story of Chicken Little," says Representative Sidney Yates, the Illinois Democrat who has long been such a spirited champion of the N.E.A. "When an acorn fell on his head he shouted, 'The sky is falling, the sky is falling.' Those who are criticizing the N.E.A. claim pornography is rife there. But ask them where and they've only two answers. Mapplethorpe. Serrano."

Six weeks ago the Bush Administration refused to endorse Senator Helm's proposal to stifle the N.E.A. by restricting the content of programs it supports. Since then, however, the American Family Association has become even more inflammatory and misleading. It falsely claims, for instance, that an allegedly pornographic show had N.E.A. funding. Representative Philip Crane, Republican of Illinois, once a far-right candidate for President, has introduced a bill to abolish the agency.

And now, smelling blood in the water, the National Assembly of State Arts Agencies shamelessly proposes that most of the Endowment's money be given directly to local arts councils. To do that would truly plunge national arts policy, and funds, into just the political pressures that Congress has worked so carefully to avoid.

The N.E.A. has, by someone's standards, made misjudgments in its lifetime, and if it is doing its job of fostering creativity it will make more. But it has made no mistake as great as that which will be made if good men and women in Congress, in the arts community, in the White House and across the country don't now stand up for an institution that has benefited thousands of artists—and millions of Americans.

## OLDER AMERICANS FREEDOM TO WORK ACT

### HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SANGMEISTER. Mr. Speaker, I want to thank my colleague and good friend from Illinois, Mr. HASTERT, for introducing the Older Americans Freedom to Work Act. I believe it is time to stop penalizing senior citizens who want to continue to make a contribution by participating in the work force. Until recently, the law held that workers between the ages of 65 and 69 lose $1 in Social Security benefits for every $2 they earn above $8,800. This year seniors are taxed $1 for every $3 they earn above $9,360. The initial rationale for this law was to encourage seniors to retire early and make way for younger workers trying to enter the work force. Times have changed. Studies indicate that we are now entering a phase where there will be a shortage of workers since there are fewer younger people today. The bill introduced by Mr. HASTERT would eliminate the Social Security earnings limit for persons who reach normal retirement age. Mr. Speaker, we should be encouraging seniors to enter the work force, not discouraging them like the current law does. These are Americans with great experience who can still make important contributions to society. Let's stop penalizing workers who want to work. Support the Older Americans Freedom to Work Act.

## A TRIBUTE TO KIMBERLY BETH RICCITELLI

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Kimberly Beth Riccitelli, of North Providence, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for La Salle Academy, in Providence, RI.

This award is presented to the student, chosen by La Salle Academy, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Kimberly has certainly met these criteria during her years at La Salle Academy. She is graduating in the top 5 percent of her class and is a member of the National Honor Society. She is the recipient of the Harvard Book Award. Kimberly has been on the social committee for 4 years and her homeroom representative for 2 years. She has worked on the school yearbook for 2 years and has also ran outdoor track for 4 years.

I commend Kimberly for her outstanding achievements and wish her all the best in her future endeavors.

## TRIBUTE TO REV. ARTHUR W. FAUSER

### HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BONIOR. Mr. Speaker, I rise today to pay tribute to a dedicated individual, Rev. Arthur W. Fauser. Reverend Fauser is celebrating his 40th year as a priest.

Arthur Fauser was born October 20, 1925 in Detroit, MI. He was baptized in St. Charles Church in Detroit on November 8, 1925. He received his first Holy Communion and was confirmed at St. Paul's in May 1933. After graduation from St. Paul High School in June 1942, he entered Sacred Heart Seminary in Detroit. He then obtained his theological training at Mt. St. Mary's of the West in Norwood, OH.

Arthur Fauser was ordained a priest for the archdiocese of Detroit on May 20, 1950 at Blessed Sacrament Cathedral by then Archbishop Edward Mooney. Father Fauser offered his first mass at his home parish of St. Paul's in Grosse Pointe.

In September 1968 he was appointed pastor of St. Joseph's Parish in Erie, MI. Then, in 1971, he was appointed as archdiocesan consultor of Cardinal Dearden, a position he still holds. Since 1973 he has served as pastor for: St. Martin de Porres in Warren, Our Lady Queen of Hope in Detroit, St. Albert the Great in Dearborn Heights and currently for Our Lady Queen of All Saints in Fraser.

I commend Reverend Fauser on his inspirational leadership. He is a touchstone in our community and will long be remembered as a true friend.

## REUBEN A. BURTON RETIRES AFTER 34 YEARS OF SERVICE

### HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. FAZIO. Mr. Speaker, I rise today to pay tribute to Reuben A. Burton, a man of enormous talents and energy, who retired from the State Department of Education February 28, 1990, after 34 years of service in the field of education. Dr. Burton is known and respected throughout the State and Nation for his exper-

tise in desegregation planning and implementation, investigation and prevention of unlawful discrimination, improvement of the racial climates of schools, and the development of new and innovative programs.

Dr. Burton began his career in education as an elementary school teacher in the Los Angeles Unified School District. After moving to Oakland, he served for 12 years as an elementary school teacher, school site administrator, and central office administrator in the Oakland Unified School District. While serving in Oakland, Dr. Burton developed and directed one of the first "Schools Without Walls" programs in the Nation. This program allowed students from nine school districts to come together and implement a curriculum that was designed by students, parents, and the private sector.

The success of the "Schools without Walls" program came to the attention of the State Department of Education in 1969 when Dr. Burton accepted the position of consultant in the State's title I program. In 1970, Dr. Burton moved to Washington, DC, where he worked for the U.S. Office of Education as Associate Director and chief, State grants and liaison of the National Right to Read Program. Dr. Burton served as the program's Deputy Director from 1970–73. During this time, Dr. Burton traveled throughout the United States working with chief State school officers to assist local school districts.

In 1973, Dr. Burton returned to the State department of education, as a consultant in intergroup relations. In 1974, he was named assistant chief; and in 1983, he became unit manager.

Today, Dr. Burton heads his own education consulting firm known as the Burton Group. Through the Burton Group, Dr. Reuben A. Burton will continue his lifelong commitment to equality in education.

Dr. Burton earned a B.A. from San Francisco State College, his elementary teaching credential from Los Angeles State College, a masters degree in education administration and general administrative credential from the University of California, Berkeley, and a doctorate in educational leadership from the United States International University, San Diego.

While living in Washington, DC, he met and married Frances Norton. They have a son, Reuben Anthony.

Mr. Speaker, it is with distinct pleasure that I salute the achievements of Dr. Reuben A. Burton and offer my best wishes for the future.

## TRIBUTE TO ALBERT GARCIA

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BROWN of California. Mr. Speaker, today we began consideration of what will undoubtedly prove to be a landmark piece of legislation: The Americans With Disabilities Act. As we began debate on this bill I was attending a luncheon in honor of five postal employees who have been selected as finalists for the 1990 Outstanding Employee with Disabilties Award, one of whom resides in my district in San Bernardino, CA. Mr. Speaker, because of my attendance at this luncheon I unfortunately missed two votes on the rule governing consideration of the Americans With Disabilities Act. However, based on what I saw and heard at this event, I am even more strongly committed to protecting the rights of handicapped Americans, and more convinced than ever that passage of this law is long overdue.

Mr. Albert Garcia has a 25-year record of service with the Postal Service and is currently employed by the San Bernardino Post Office Timekeeping Unit. Mr. Garcia already had a lengthy career with the Postal Service when, in 1982, he lost the sight in both eyes due to complications arising from diabetes. Mr. Garcia was forced to retire from his job and receive disability payments.

It is a tribute to Mr. Garcia's determination and strength of character that he did not allow his disability to prevent him from leading a full life. Rather than accepting his blindness he sought training at the Lighthouse for the Blind, where he met others with blindness and learned basic living skills, Braille, and how to use a cane. As a veteran, Mr. Garcia was also eligible for training at the Western Blind Rehabilitation Center, which is the VA Center for Visually Impaired Veterans. While enrolled there, he learned to use the video tech machine, which magnifies reading material 88 times its actual size. Mr. Garcia quickly learned to use this device in order to regain career status as a postal employee.

To prove his skills, Mr. Garcia requested and received samples of timecards and timekeeping forms. He demonstrated his ability to rapidly and accurately post and compute timecards, and in June 1986, he was offered a job as a time and attendance clerk.

The Postal Service selected Mr. Carcia as its western regional nominee not only for his proficiency in performing all timekeeping functions, but also for his dedication to his job. He has taken an active role in working with the blind in his community, through the Lighthouse for the Blind and other organizations.

The U.S. Postal Service has an outstanding record of employing so-called disabled citizens. This is a tribute not only to the character and determination of these employees, but also to the Postal Service's efforts to recruit and retain employees in a nondiscriminatory manner. Unfortunately, our society as a whole does not have an outstanding record in this regard.

An estimated $300 billion is lost each year due to the fact that many disabled Americans who could work, and desire to work, are barred from employment either by a lack of accessible transportation, accessible buildings, and plain and simple prejudice. It is a loss to every member of our society to deny handicapped individuals the opportunity to work and to live a complete life.

Passage of the Americans with Disabilities Act is an important first step toward removing the barriers to employment which the handicapped must contend with every day. I applaud those who, like my constituents, Mr. Albert Garcia, have already overcome those barriers. His courage and determination is an inspiration to us all.

## HONORING THE 50TH ANNIVERSARY OF THE ORDINATION OF REV. CASIMIR S. SWITALSKI OF NORTHAMPTON, MA

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. CONTE. Mr. Speaker, I rise today to commend and honor one of my most distinguished constituents, Rev. Casimir "Charles" Switalski. On May 18, the Reverend Casimir S. Switalski will celebrate the 50th anniversary of his ordination into the priesthood. I speak to you today to call attention to this distinguished occasion and a man devoted to helping others.

Father Charles as he is known to his friends, has dedicated his life to Catholicism. Upon completion of his studies at the Grand Seminary in Montreal, Canada, Father Charles was ordained at St. Michael's Cathedral in Springfield, MA on May 18, 1940. He celebrated his first mass at his home parish, St. John Cantius in Northampton, MA on May 19, 1940, the same parish he was to return to in 1975.

His leadership and concern for others has provided a source of comforting influence and inspiration to all those who have known and worked with him. Since his first parish assignment at St. Stanislaus Church in South Deerfield in 1940 until his present parish, St. John Cantius Church of Northampton, MA, Reverend Switalski has given his utmost for the benefit of others. There are not many members of the clergy, Mr. Speaker, who have the unique ability to incorporate into their work such pride in their heritage. Father Charles is one of those individuals. His is a proud Polish-American who has worked tirelessly to preserve his heritage while performing his duties within the church.

My constituents have been the real beneficiaries of Father Charles many God-given talents for he has brought an unselfish dedication and devotion to each assignment. Whether it may be celebrating Sunday mass, comforting a grieving family, feeding the hungry or doing so much for so many that may only be seen by God's eyes, Father Charles is there. It is now time for us, to whom he has given so much, to extend to him our many thanks and sincere gratitude. He is a dedicated servant and a model for the young and old alike to follow.

Father Charles' many years of hard work, Mr. Speaker, have touched the lives of thousands who will never forget his selflessness and caring. I salute a man dedicated to helping others who rightly deserves the recognition given to him. Congratulations, Father Charles, on the 50th anniversary of your ordination and may you be blessed with many more successful years ahead.

## A TRIBUTE TO THE WESTFORD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Westford Police Department for their dedicated and outstanding service to the people of Westford, MA, in the protection of life, liberty and property.

Each day the newspapers are is full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Westford Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say "thanks" for a job well done. Let us take this time to recognize the contributions of Chief Joseph R. Connell and those who serve in the Westford Police Department:

Robert M. Welch, Jr., Edward A. Cossette, David W. Hogg, Terence J. Kane, Timothy L. Pomerleau, Edward P. Rochon, Joseph J. Roy, John Tzkiopoulos, Gregory E. Balzotti, John D. Caron, Hervey P. Cote, Lisa M. Davis, Wiliam F. Duggan, George E. Higgans, Michael J. Jelley.

Scott J. Mack, Joseph T. Murray, Mary Ann O'Connell, Raymond V. Peachey, Michael J. Perciballi, Michael A. Rochon, Walter R. Shea, Kevin P. Sullivan, Stephen F. Timothy, Joseph A. Walker, David S. Connell, George W. MacGregor, Jr., Thomas M. McEnaney.

## A TRIBUTE TO MICHAEL DEL ROSSO

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Michael Del Rosso, of Seekonk, MA, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for St. Dunstan's Day School, in Providence, RI.

This award is presented to the student, chosen by St. Dunstan's Day School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Michael has clearly met these criteria while at St. Dunstan's. Michael is the president of the student council this year. Michael also has a deep concern for others who are in crisis. Michael has gone with his church group to Jamaica to help rebuild homes after a hurricane. In addition, he works as a server at the Amos House Soup Kitchen. Besides his work at Amos House, Michael also works at the Caratunk Wildlife Refuge.

I commend Michael for his outstanding achievements and wish him all the best in his future endeavors.

## DR. KOOP RECEIVES HARRY S. TRUMAN AWARD

### HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SKELTON. Mr. Speaker, on May 6, the annual Harry S. Truman Award was presented in Independence, MO, to Dr. C. Everett Koop, the former Surgeon General of the United States. Dr. Koop's remarks were certainly timely and challenging, and I enclose them herewith so the members may read them:

REMARKS OF C. EVERETT KOOP, M.D.

It is truly an honor for me to be with you today, to have been designated as this year's recipient of the Truman Award. This is an honor and occasion that I shall cherish.

I am particularly pleased that you have chosen to give the award to a medical doctor, to someone who had devoted his professional life to the health of the American people.

It is also appropriate that your award recognize the contributions of a health professional, because it is in the field of health that our society faces its most critical choices in the years ahead.

I appreciate this award in a special way, because I often thought of Harry Truman when I first went to Washington. After all, people used the same words to describe Truman and me when we first assumed office. One of the phrases that comes to mind is "uniquely unqualified."

But I think we both proved our critics wrong. The people who yelled, "Give him hell, Harry!" said to me, "Sock it to 'em Doc!"

Far from being an unqualified haberdasher, Harry Truman was more well-read in American history than any President in memory. And he used that knowledge to lead this Nation through some of its most trying years. The events of the last year in Europe do much to confirm the thrust of his leadership.

I wish I had known him personally.

In a similar way, I trust, this Philadelphia childrens' surgeon picked up enough savvy to be family doctor to the Nation at a time it needed a physician.

Harry Truman preserved and even enhanced the office he inherited and then won on his own. I tried to do the same, to guard zealously the integrity of the office and the opportunity to exert moral suasion from the Office of Surgeon General.

Truman also knew the value of no-nonsense plain talk. And direct action. I guess I've been accused of the same.

I may have had the reputation for straight and frank talk, but believe me I never shot from the hip.

I am now in the first few months of my life in the private sector, where I plan to continue my concerns as a public servant. Public service, for some of us, is a reward in itself.

But for me, public service, with the appreciation and gratitude I have received from the public, is also source of humility and deep personal satisfaction.

This afternoon, then, I'd like to talk a little about citizen C. Everett Koop, as he participated in one corner of the American National Government over the past 8 years.

But let me warn you that this will not be an exercise in "Kiss-and-tell." I don't find that behavior to my taste at all.

Also, as a practicing surgeon for nearly 40 years, I still carry the ingrained habit of not violating the confidences of a patient. Not that everyone in Washington requires special care. Well, certainly not everyone.

But let me begin.

First, I must tell you that the privilege of being Surgeon General has been the most demanding and most exciting position I have ever held. I am still grateful to President Reagan for having nominated me in 1981 and for his re-nomination of me in 1985.

You may remember, I'm sure, that my nomination was not without some controversy, which is putting it as delicately as I can. In private life I had been an outspoken person with very strong opinions on important issues. And these opinions—and my age, 65—were used as arguments against my being the country's Surgeon General.

The Congress and many people across the country debated these matters for about 8 months. But I did too.

I asked myself if I should—or could—vow to be a changed person in order to gain the Senate's approval.

Should I, for example, deposit my religious beliefs in a blind trust?

Should I donate my moral values to some worthy charity?

Before moving to Washington, should I pack away my ethics in an attic trunk?

And I said, "No, none of the above."

I truly believed then—and I believe now—that the best approach you can make to public service is to promise to give it everything you have . . . of whatever it is you do have . . . to draw to the fullest extent from your own storehouse of knowledge and personal life experience, and to squeeze out every ounce of good judgment, of deep fellow feeling, and of love of country.

As I say, that was my approach, and I think it was and is the right one. But it doesn't make the assignment any easier. On the contrary, this approach merely made me more receptive to the new information that I would be absorbing in this position.

Like many others who are called to Washington, I too felt great pride in being able to serve my country, and I too have been forced to discover things about myself and my country that I did not fully understand until this experience.

And that's probably the premise of my remarks today: That government service forces you to know more than you do know—even more than you may care to know—about the way our democracy works, about the motives, good and bad, of your fellow citizens—including colleagues and close friends—and about yourself.

I do not believe you can truly prepare yourself for the experience, because I do not believe you can really predict how you will act in a situation affecting the lives of a few—or a few million—total strangers.

And in the heady excitement of being called by the President, of being followed around by the press, of late-night conversa-

tions with powerful Senators and Congressmen, when all this is happening, you cannot—at the same time—truly understand what your job is going to be like.

You simply don't know.

And you don't dare ask.

When I was your Surgeon General, I frequently said that I had neither power nor budget. That was certainly true, for I had only a tiny staff and—in Washington terms—a tiny budget, enough to keep me in paper clips and photocopies.

But I think I was able to accomplish a large agenda solely through the power of moral suasion. In the right hands, moral suasion can do more than a bigger bureaucracy or a larger appropriation.

I suppose history will link my name, and that of every other Surgeon General with smoking, and that's fine with me. After all, during my tenure, smoking fell from 33% to 21% of the population.

But I think my name will be inextricably bound with another deadly affliction of the American people. I'm speaking, of course, about AIDS.

AIDS could become the disease that breaks the social compact in American society.

Thus far, the American people have been very tolerant of people who get sick because they do something they very likely know is not a smart thing to do. Hence we've relied upon general tax revenues to support V.D. clinics, alcoholism and drug treatment centers, diet and nutrition counseling, family planning, emergency medical services for highway trauma, and so on.

Some of you here today no doubt will expect medical treatment for conditions attributable at least in part to your own lifestyle decisions.

It's hard to explain this public support for rehabilitative medicine in a few words, but I suppose it boils down to this:

The American people know that the flesh is weak, but they also believe in redemption and they're willing to help pay for it: syphilitics can be cured, alcoholics can be rescued, highway daredevils can be reformed, people can adopt a more sensible diet.

But AIDS has arrived on the scene and has become the first serious wedge to be driven into our remarkable public health compact. The reason, I'm sorry to say, is simple enough to understand.

A person becomes infected with H.I.V. by doing things that most people don't do.

If the infection develops into AIDS and a life-threatening cancer or infectious disease, a number of public programs are available to provide medical care and certain social services, also.

Right now, such care is running about $20,000 to $30,000 per year per AIDS patient.

The average length of time a person with AIDS receives such care is 12 to 18 months.

And then the person dies.

After a prodigious investment of public funds, there is no rescue, no reformation of character, no one is saved or redeemed and returned to society, as is the case with the other afflictions I mentioned, such as alcoholism, obesity, and drug-abuse.

This disease, therefore, presents the toughest challenge yet to the American concept of public health.

The ethical burden of AIDS is compounded because young black and Hispanic Americans appear among the AIDS case reports twice as often as they appear in the population generally. The minorities with AIDS tend to be poor, uninsured or underinsured, and urban, living in those same major metropolitan areas where the health delivery systems are already strained to the limit.

Already in New York City well over 20% of the beds in hospitals are filled with AIDS patients. It is safe to say hospitals in your communities will face this problem by the end of the decade, if they are not already struggling with it.

Poverty is one of the reasons for a higher incidence of AIDS in these minority communities and is often linked to living conditions reflecting existing race and ethnic discrimination. We cannot let a new discrimination based on disease be added to others.

I fear a growing resentment against all AIDS patients, but against blacks and Hispanics in particular.

We need to make sure that we keep our ethics straight as we deal with this challenge. We need to make sure that the growing AIDS crisis brings out the best in us: Frank talk, common sense, caring and compassionate action. The best of American qualities, reflected so well in the man from Independence.

Thank you.

## CENTRAL EUROPE'S OFFICIAL DEBT

### HON. JOHN J. LAFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. LAFALCE. Mr. Speaker, on May 16, the Financial Times printed an editorial, entitled "Solutions for the Debt Problem," that called on the governments of the industrialized world to take the next step in solving the debt crisis, particularly in central Europe.

Since 1983, when the Mexican Government first threatened to default on its loan payments to western banks, the international financial system has been embroiled in a tug of war between creditors and debtors. The major losers have been the people of the Third World whose economic growth has stagnated, and American factories which lost valuable export markets, particularly in Latin America.

Last year, the Bush administration took an important step to relieve the debt burden for many of these countries by urging banks to forgive some outstanding debts in exchange for certain guarantees. This policy has become known as the Brady plan. However, while governments have now convinced private creditors that loans to these nations are no longer worth 100 percent of face value, the same governments are insisting on valuing their loans to these debtors at full face value.

Now, a new front has opened on the debt war—central Europe. Having won the cold war with the democratization of Poland, Hungary, Czechoslovakia, and East Germany, it is now time we set out to win the peace. This means that these nations must develop thriving market economies that bring prosperity to their citizens.

Unfortunately, some of these nations are being crushed by an unserviceable debt burden. Unlike the largest Latin American debtors, however, much of this debt—particularly in Poland—is owed to western governments, not private banks.

The Financial Times editorial points out, that, without official debt relief, the current debt strategy is "full of anomalies and contradictions." For example, "Mexico is better treated than Poland," despite the fact that Poland has, in one bold stroke, completely overhauled its economy, introducing market forces.

To correct this anomaly, and help jump start these newly emerging market economies in central Europe, I have introduced legislation that will allow these debts to be paid in local currencies, greatly reducing the demand on scarce foreign exchange. In addition, the legislation urges the President to negotiate similar arrangements for these nations with the other industrialized powers. Private creditors would also be expected to follow through with similar plans for reducing the debt burden left by a legacy of four decades of Communist economic policy.

Mr. Speaker, I commend the editorial to your attention, and ask that it be included in the RECORD.

[From the Financial Times, May 16, 1990]

SOLUTIONS FOR THE DEBT PROBLEM

"An improvement in the economic performance of indebted developing countries remains one of the foremost international economic priorities for the 1990s." Thus wrote the staff of the International Monetary Fund in its World Economic Outlook, published this month. Unhappily, the objective of ending the eight-year-old Third World debt crisis remains as elusive as ever.

The governments of industrialized countries have, it is true, made important concessions to the heavily-indebted countries over the past two years. Many have converted aid loans into grants. At the 1988 Toronto summit, heads of government agreed on a formula to allow relief on the debt owed by the poorest African countries to export credit agencies. Last year saw the adoption of an initiative of the US Treasury Secretary, Mr. Nicholas Brady, which encouraged the use of resources—mainly from the International Monetary Fund and World Bank—to encourage banks to write-off some loans to middle-income countries.

Although the financial benefits that have accrued to developing countries have been modest so far, policy-makers have at least shifted the focus of the strategy away from further increases in debt obligations and towards a lowering of debt burdens. They have also conceded that onerous levels of foreign debt can be an obstacle to the adoption of desperately needed improvements in economic policies.

ANOMALIES

Unfortunately, the developed countries have not followed this realisation to its logical conclusion. As currently conceived, debt strategy is full of anomalies and contradictions. For example, governments have persuaded commercial banks that their loans to middle-income debtors are no longer worth 100 cents on the dollar, but they persist in the illusion that this is not true of official export credits.

This produces the absurd result that Mexico is better treated than Poland. Poland owes two-thirds of its $41 billion foreign debt to western export credit agencies which—although they are not demanding interest payments until April 1991—have not conceded debt write-offs. Mexico, however, which owes most to western banks, has

just completed a package to lower its $100 billion debt burden.

Apart from the big four debtors—Argentina, Brazil, Mexico and Venezuela—nearly all indebted countries owe more to western governments than to bank creditors. Any comprehensive initiative to resolve the problem of Third World debt must tackle debt owed to the former. This may well reduce new export credits to rescheduling countries. So be it. Experience suggests, in any case, that the use of tied export credits is far too often of dubious benefit to economic development.

WRITE OFFS

Debt relief should not be extended to loans from international financial institutions. If it were forced to forgive arrears, the IMF's role at the heart of the financial system could be fatally undermined. Similarly, write offs would raise the cost of borrowing for the World Bank and other development banks, and so damage the cause of development in the long term.

Equally, a widening of debt relief must not go ahead on a purely ad hoc basis. The Fund and Bank should, instead, act analogously to domestic bankruptcy courts. Their role would be to ascertain the ability of heavily indebted countries to meet their current debt burdens, while sustaining economic growth and political stability. Where that combination seems impossible, they should recommend adequate levels of debt relief, while insisting upon the quid pro quo of a satisfactory programme of economic adjustment.

Contingency clauses to benefit both creditors and debtors in case of external economic shocks could be included, but any debt relief package should, if possible, be once and for all. The arbitrary divisions which currently separate candidates for various forms of debt relief would disappear. Instead, a general assessment of a country's long-term ability to pay would end in a proper division of the burden between the private and offical creditors.

## AN AFFIRMATION OF TOLERANCE AND RESPECT

## HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. RANGEL. Mr. Speaker, I rise to call your attention to a speech by Mayor David N. Dinkins of New York City. It is a thoughtful examination of the racial problems confronting my great city, along with some commonsense prescriptions for relieving them. I am presenting the speech to my fellow Members of Congress as a tribute to the wisdom and leadership of the man who delivered it, and in the hope that its wise counsel will guide us, not only in New York, but elsewhere in our great and diverse republic:

AN AFFIRMATION OF TOLERANCE AND RESPECT

(Address by Mayor David N. Dinkins)

First of all, let me thank you all for coming this evening on such short notice. And to those who are unable to attend due to religious observance, I trust that my message will reach you through other means, for I know that all who share this city and all who love this city are deeply committed to the cause for which we gather tonight.

Last year, I spoke to you about a campaign to bring us together. It was a cause that touched a yearning deep inside each of us, to come together in affirmation of respect—respect for ourselves, for each other and for this city that we all call home.

My friends, that campaign did not end last year; it has only just begun.

Together we've tasted a tiny piece of the sweet substance called hope; yet again and again, we're confronted by the bitterness of hate.

So we gather tonight, here at the seat of government, to reaffirm our commitment, to renew our mission, and to reassert a simple truth: All of us want to live our lives in peace and dignity—free to walk any street and shop in any store, at any time, in any neighborhood, without fear of force or violence.

NEVER LEAD BY DIVIDING

As I've said to you before, I am the mayor of all the people of New York. And my administration will never lead by dividing, by setting some of us against the rest of us, or by favoring one group over others.

At the same time, and in the same spirit, we will never allow any group or any person to turn to violence or the threat of violence to intimidate others, no matter how legitimate their anger or frustration may be.

The most basic purpose of government is to protect public safety, to enforce the law amidst the chaos and confusion of urban life.

That is a mission I am prepared to meet—and I will do whatever is necessary and whatever is right to maintain public order and public safety.

Ours is a rule of law. And tonight, as I speak, two groups of 12 people sit in Brooklyn deliberating upon whether the law should punish two young men for the killing of Yusuf Hawkins.

I cannot affect their decision; it must be made on the basis of the evidence presented in court, and none other. And that process—the jury process—is still the fairest and best method of judging our fellow citizens that anyone has ever come up with in the history of humanity, regardless of the verdict in any particular case.

BENSONHURST—A PAINFUL PASSAGE

This trial has been a painful passage for our city—and there will be more.

But one thing is for sure: No verdict can undo the damage that was done on the devastating night last August.

The hate that was unleased upon Yusuf Hawkins can never be called back.

The pain that ripped through his body, his family and this city can never be fully healed.

And his sacrifice must never be forgotten.

The senseless death of Yusuf Hawkins was a hateful crime. But our anger must not lead us to hate.

This was a crime committed by individuals. All of Bensonhurst did not commit this crime; rather, a few people committed this crime in Bensonhurst.

We must absolutely, categorically reject the despicable notion of group guilt. We abhor those who preach it; and we must be mindful that predictions of violence and anger tend to be self-fulfilling. We must be on guard against such impulses; we must isolate them and condemm them.

WE MUST REPRESS OUR RAGE

When a lawyer defending an accused person—no matter how unpopular—is assaulted on the courthouse steps, all of us have been assaulted, because our system of justice is the best guardian of civilized society.

Hopefully, those individuals responsible for the death of Yusuf Hawkins will feel the strong arm of the law. But whatever the outcome—as we have so many times over so many years—we must repress our rage, channel our energies, and come together to make this tragedy transforming.

I've already seen far too much pain and far too much hate in my lifetime.

This city is sick of violence. We're aching—and we must heal the pain.

Most in this town don't have it easy. People work hard, scrape by, we love our families and we try to build a life of comfort and happiness.

Housing costs too much, the environment seems unsafe, and the daily pounding of the prospect of crime takes its insidious toll.

WE'VE SIMPLY BEEN ABANDONED

And we all know that despite all we're doing, a lot of things aren't going better. Crack and AIDS are tearing away at the very fabric of our city. The economy, of the region and the nation, is likely to get worse before it gets better; and we've simply been abandoned by the national Government in Washington.

As frustrations build and pressures mount, people are more likely to lash out. In tough times, child abuse increases, alcohol abuse rises, and the bonds of civility and decency fray.

Unfortunately, some small-minded people prey upon these pressures, spreading a message not of unity but of division, and fixing the blame not on the social and economic challenges we share but on those who are alien or different.

I challenge all of the people of this city to reject these calls to bigotry, because if the bigots succeed in spreading their poison, it's nobody's fault but our own.

Right now, each of you must look into your own hearts, in your own families. Look honestly at yourselves—and your own communities—and ask whether you can be swayed by prejudice, and what you're going to do about it.

Because no matter how much government can do, government cannot substitute for the content of our character.

Let us not permit the prejudice of a few—in Flatbush, in Bensonhurst or anywhere else—to silence the good will of the rest of us.

It's an old story, a cycle of immigration and discrimination that's as old as this city itself.

In the mid-19th century, gangs of active New Yorkers attacked Irish immigrants right here at Broadway and Park Row.

Irish-Americans lashed out at African-Americans in the bloody Draft Riots of 1863, leaving many lynched at the same time as our nation fought to free them from slavery.

In the 1870's, the Chrystie Street gang rampaged against Italians and Jews.

During the Depression, Jews were assaulted for advocating that this country intervene in Europe to fight the Fascists and save the Jews.

Historians tell us that no group of European-Americans has been as battered and as bruised as Italians, and African-Americans have never been free of the fear of attack.

OUR GREATEST STRENGTH

Our diversity is our greatest strength but again today, it threatens to become our greatest weakness.

New times bring new Americans who become new targets. And recently, too much venom has been injected into the lives of some of our newest Americans—Asian-Americans, especially Korean-Americans.

This prejudice is by no means limited to one community or one conflict. Remember, not too many years ago, some members of a community were up in arms, defiantly protesting a Korean grocery in their neighborhood—on Park Avenue.

Some Korean-Americans, new to the ways of their world, may mistakenly offend others or overreact to what they perceive as provocation. And my Commissioners of Human Rights and Consumer Affairs will be holding workshops for all retailers to learn about consumer rights.

But that's not the heart of this recent wave of anti-Asian sentiment.

Vincent Chin was a young Chinese-American who lived in Detroit. He was beaten to death by auto workers who thought he was Japanese, because they felt their jobs threatened by Japanese competition.

They weren't after Vincent Chin, they would have gone after any Asian, just as Jusuf Hawkins could have been any African-American who happened down that street that night.

I oppose all bigotry against anyone, anywhere. I abhor it; I denounce it; and I'll do anything—anything right and anything effective—to prevent it.

Yet sometimes denunciation and confrontation are simply not solutions. They may make us feel better—just to make a bad situation worse.

I have clearly stated my views about the conflict between African-Americans and Korean-American storeowners on Church Avenue in Flatbush. I oppose any boycott based on race. I've instructed officials of my government to intervene and to facilitate settlement of this dispute.

THERE FROM THE BEGINNING

We've been there from the beginning—and this situation will be resolved.

Last month, I appointed a fact-finding task force of African-American, Korean-American and other civic leaders. Its co-chairs are: Laura Blackburne, Executive Director of the Institute for Mediation and Conflict Resolution, and Rev. Dr. S. Michael Helm of the United Methodist Church. Their work continues, as do civil and criminal proceedings against the alleged perpetrator of the original incident.

But whatever happened in that incident did not warrant this sort of ongoing intimidation. Boycotts can be an appropriate and effective response—but this one is not and the vast majority of the people in that community know it.

Tonight, I say publicly what my representatives have said privately to all parties in this dispute: I am personally prepared to mediate, to resolve this in a constructive, peaceful way.

I call upon all involved to set aside their intransigence, to come in, to sit down to settle this—and to settle it now.

I WILL BEAR ANY BURDEN

My personal committment is absolute. I will bear any burden and walk any mile—and I am confident that we will be able to settle this situation through mediation and conciliation.

And once this dispute is calmed, the Red Apple Market and Church Fruit will once again be able to compete fairly and freely in the marketplace, with their neighbors of all heritages.

But this is bigger than just one boycott in Brooklyn. We must recognize that individual incidents are not isolated, but interconnected; that we must work constantly to strengthen the fabric of our diverse people, and solidify the bonds of our mosaic.

And we must recognize as well that the solution is not only rhetorical, not only a function of moral guidance, but a fundamental role of government, a responsibility we must perform not just in the face of crisis and conflict, but every day.

ANTI-HATE AGENDA

Recognizing this role, I am formulating an agenda mobilizing government in recognition of this responsibility.

The plan will be fleshed out over the coming weeks, but tonight, let me offer an outline.

It starts with law enforcement, to give our police and prosecutors the tools they need to do the work we need.

I will not rest until the Senate of this State passes the bias-related violence bill.

It must cover not only racial and religious bias, but bias based on sexual orientation as well. Those who killed James Zappalorti because he was gay are just as culpable and just as dangerous as those who killed Michael Griffith because he was black and those who killed Israel Rosen because he was a Hasidic Jew.

DATA ON HATE CRIMES NEEDED

Those were hate crimes—and I am asking the Federal Government to fully fund the collection of data on such crimes so we know where they're occurring and where we must focus our efforts.

In addition, I am instructing my Deputy Mayor for Public Safety, Judge Milton Mollen, to form a working group with the five District Attorneys and the Police Department to respond to gang activities and work for passage of a tough new law against group violence.

But repairing the rifts of this city requires more than tough law enforcement and better community policing.

It requires an all-out effort to bring all New Yorkers into the economic mainstream—through community business development programs and other appropriate mechanisms.

And we're working as well to tear down the remaining barriers to progress.

STUDY OF LENDING BIAS

I have instructed my Commission on Human Rights to conduct a systematic study of discrmination in lending—and a survey of the real needs of community-based businesses.

These initiatives in law enforcement and business development will be buttressed by a massive mobilization on intergroup relations.

It will start with the creation of a new, enhanced bias strike force at the Human Rights Commission.

This strike force will reach out, affirmatively and aggressively, to find tensions and stop problems before they start.

My Community Assistance Unit is now organizing group-to-group, community-to community contacts and communication to overcome ignorance and fost understanding and respect.

I will personally participate in this program—and I am asking the leaders of our business, labor and religious communities to join me.

CALLING ON THE CLERGY

In addition, right now, starting this weekend, I am calling upon the clergy of New York to speak to their congregations and join in this affirmation of tolerance and respect. And today, I have sent a letter to every elected official in New York City asking them to convene public meetings in the communities they represent to discuss the path to racial and ethnic harmony.

The media must join in, too—with public service announcements and programming that fights bigotry by teaching tolerance.

Above all else, we must reach out to our youth.

Last year juvenile arrests jumped 70 percent—and group robberies by youths increased 400 percent.

We need early intervention—not just by parents at home but by the schools as well.

The State Education Commissioner, Dr. Thomas Sobol, has recently announced a systemwide initiative for multicultural education.

It's an initiative I support but it's only a start. We need to teach our kids not just to understand each other but also to understand what hurts each other.

Prejudice is found in a million differnt forms in a million different places. But we can't fight it if we can't recognize it.

That's why I'll be joining with Chancellor Fernandez to make prejudice prevention an active part of the life of this city.

The future of this city belongs to the children of this city—all of the children of this city.

CHILDREN OF THE OPPRESSED

And whether they or their families come from Korea or Cambodia—from Haiti, Honduras or the Soviet Union—New York is again, as it always has been, a city of immigrants.

They come in droves, from Ireland and India, from Jamaica and Japan, from Ecuador and El Salvador, and up from the red clay hills of Georgia, the Mississippi Delta and the streets of Memphis and Mobile.

We came to escape tsars and dictators, hunger and deprivation.

Our people, all of our people, share a common ancestry of oppression—and a common aspiration to leave that history behind and to embrace the full promise of America.

The children of the oppressed must now turn to each other as allies and neighbors instead of turning on each other as enemies.

Tonight, one of those children—a boy whose family fled Papa Doc's Haiti—lies in a bed at New York Hospital. He's a cute kid, a tough little rascal named David Opont.

LIFE IN A LITTLE BOY'S EYES

And like the city in which he lives, young David is suffering. He's scarred and he struggles to overcome the damage that anger has inflicted upon him.

When I visit him, I see life in his eyes. Despite all he's seen, David's eyes are wide open, looking not behind him in fright but ahead in the fond hope that he will heal and move on.

Let us resolve tonight to make his story our story. For like David Opont, we can emerge from the flames of anger to face a future of health and happiness.

So let's emerge from our pain, not bitter but proud.

Let us all walk toward the future together, following our hopes and not our fears.

And David, when you get up out of your bed and you're back home with your family, we want you to live in a city at peace with itself. We're going to quit tearing ourselves apart—and begin the long hard work of sewing our city back together.

If you can struggle and survive, so can we. Your wounds will heal—and so must ours. David we're going to do it for you Buddy—and for all like you—because you are our future.

Thank you.

God bless you.

And keep the faith.

## SESQUICENTENNIAL OF THE SIGNING OF THE TREATY OF WAITANGI

### HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. McEWEN. Mr. Speaker, I rise today to extend congratulations and best wishes to the people of New Zealand as this great country commemorates the sesquicentennial of the signing of the Treaty of Waitangi, the symbol of the life together of the communities of that country as a nation.

Just as Americans attach great significance to the Fourth of July and its meaning, New Zealanders accord the Treaty of Waitangi special significance. In 1840 a pact was signed with good and true intent, and that was the beginning of the nation called New Zealand. Over the past 150 years, New Zealanders, have forged a great nation based upon the principles of freedom and democracy.

Mr. Speaker, our two countries are natural partners, with shared history, culture, language, and values. In fact, the Waitangi celebrations follow the sesquicentennial in 1989 of diplomatic relations between the United States and New Zealand. With the establishment of an American Consular Office in the Bay of Islands in 1839, the United States consul was the first diplomatic representative to be appointed to New Zealand. That makes the United States the longest standing diplomatic partner of New Zealand.

The United States and New Zealand share a common belief in the democratic process and the fundamental values underlying it, and both countries are inextricably a part of the western community of free nations. The sons of both nations fought alongside one another in two world wars and in Korea and Vietnam, oftentimes shedding their blood thousands of miles from home in the ultimate expression of the commitment to the rule of law and to freedom, peace, and prosperty for all peoples.

Mr. Speaker, since relations were established in 1839, the relationship between United States and New Zealand has expanded and deepened. Commercial contract has increased significantly, and trade is booming today. Cultural, academic and science contacts have steadily increased, especially in period since World War II. Innovation, individualism and growth—long the hallmarks of American enterprise—also mark New Zealand endeavour and reflect the style of the bilateral relationship.

Americans and New Zealanders, bound by common values, look to a bright future that continues our tradition of mutual respect and cooperation. Today, we share a great many interests. We are both strong agricultural nations and are focusing on those concerns together in the current GATT Round. We share a belief in the importance of the free and open market economy and are working to improve cooperation in the Asia-Pacific region. We have common interests in the South Pacific region, the United Nations, and in Antarctica. Together we are working to protect the environment and to win the war against drugs.

There are few countries with which the United States has enjoyed relations that are as close and as cordial as those with New Zealand. The relationship is like that within a closely knit family. Our common heritage, experience and interests are such that we must continue to nourish that close relationship. We also continue to cooperate to further enhance our bustling economic relationship and encourage the tourism trade that establishes invaluable people to people links between our countries.

Mr. Speaker, although New Zealand is a nation of just over 3 million people, it has played a part on the world stage that belies its size. I urge my colleagues to join me today to congratulate New Zealand on its celebration of the Treaty of Waitangi and to record the hope that the excellent relationship we currently enjoy might continue to develop and strengthen to the mutual benefit of our peoples.

## A TRIBUTE TO THE CONCORD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Concord Police Department for their dedicated and outstanding service to the people of Concord, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Concord Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Carl Johnson and those who serve in the Concord Police Department:

Linda Layne, William Augello, Baryn Carlton, Brian Coonradt, Barry Neal, Ed Conlin, Marion Fletcher, Paul Flynn, James Forten, John Foster.

Wayne Gerhardt, David Goranson, Richard Hodgson, Thomas Houk, John Kennedy, Kimberly Doughty, Richard Krug, Paul Macone, Paul McGraph, Douglas Meagher.

Joseph Morahan, William Nutter, James Ring, Robert Robillard, Fred Ryan, Jonathan Schleffer, Robert Shea, John Skinner, Rosemary Teven, Peter Powler, Leonard Weatherbee.

## A TRIBUTE TO AMY JARRET

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Amy Jarret, of Woonsocket, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for Mount St. Charles Academy, in Woonsocket, RI.

This award is presented to the student, chosen by Mount St. Charles Academy, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Amy has clearly met these criteria during her stay at Mount St. Charles. She is an honor roll student and a member of the National Honor Society. Amy is a class officer and serves as president and chairperson for the Woonsocket Youth Council. She also participates in the Drama Club, Campus Ministry, and is a member of Students Against Drunk Driving.

I commend Amy for her outstanding achievements and wish her all the best in her future endeavors.

## SKELTON SPEAKS TO LAKE OZARK ASSOCIATION

### HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SKELTON. Mr. Speaker, for the last 6 years, the Congress has designated the third week in May as National Tourism Week. Again this year, May 13 through 19, we will take time to recognize the contributions of the tourism industry to our Nation's economy. The United States' third largest industry and its largest export, travel and tourism has reinforced U.S. economic vitality and helped to preserve the natural and cultural heritage of many American communities.

Last month, the Lake Ozark Association in Osage Beach, MO, invited me to speak about the issue of tourism and tourism development. As you may know, tourism is a subject that has interested me for many years, and I currently chair the House Small Business Subcommittee which oversees tourism issues. Travel and tourism makes important contributions to the economy of the Lake of the Ozarks region, and has the potential to significantly contribute to the economic development and diversification of other rural communities in our Nation.

In honor of National Tourism Week, and in order to further promote the idea of rural tourism development, I would ask that the text of my speech before the Lake Ozark Association be placed in the extensions of remarks of the CONGRESSIONAL RECORD:

REMARKS OF CONGRESSMAN IKE SKELTON

Thank you for having me here today. It is a pleasure for me to be here with the Lake Ozark Association, to be with old friends like John Walker here, and also a great joy for me to talk a little about tourism, which we all know is extremely important to you here at the lake, but which is also important to the State of Missouri, and to the United States as a whole.

Just look around, and you can see what tourism can do for an area. Missouri's tourism industry makes an incredible contribution to the state's economy, but it doesn't come without a lot of hard work. Tourism employs more than 90,000 people in Missouri, and brings over $5 billion to the State economy each year.

Those are impressive numbers, but except for those involved in or having contact with the industry, few people realize the important role of tourism in our Nation's economy. Travel and tourism is the third largest retail or service industry in the United States (behind automobile dealers and food stores), and in 1988 it was a $314 billion industry. Experts predict that tourism will be one of the world's largest industries by the year 2000.

My interest in tourism goes back a few years when I became chairman of the House Small Business Subcommittee which oversees tourism issues. At that time, my subcommittee duties also included the area of exports, so we focused primarily on the importance of tourism to the U.S. export economy.

It seems strange to those unfamiliar with the tourism story that tourism should be considered an export, just like any other American good or commodity that is produced and manufactured and then sent abroad. But the economics of the situation is the same. When foreign tourists come to the United States, they bring new money—export earnings—to the U.S. economy.

What's more, tourism isn't just any export—tourism is our Nation's largest export. Last year, foreign visitors spent $43 billion while traveling in the United States. Our next highest export, agriculture, earned $37 billion in 1989. And, for the first time since tourism economic statistics began to be recorded in the 1950's, in 1989 the U.S. earned a tourism trade surplus of $1.2 billion. Tourism is one of our few industries that has been actually able to claim a surplus in recent years. This is an encouraging trend, especially significant in light of the U.S. trade deficit figures, which stood at $108.6 billion in 1989.

More recently, my tourism interests have focused on the subject of rural tourism. Those of us in Congress who represent rural America are very concerned about what is happening there. The quality of life in many of our rural communities is declining, many of our small towns are literally disappearing. Yet, there are many shining examples of rural communities that have been revitalized. This has been accomplished in a number of ways, and among them, tourism development holds particular promise for the economic development of rural areas.

There is a growing awareness around the country of the economic contribution of the tourism industry to rural areas. And no wonder considering the staggering contribution the industry makes to the economy. Most important, the tourism industry is made up of small businesses. Studies indicate that the vast majority of jobs being created in rural areas are in small businesses, and the Southern Rural Policy Board recently found that most of the growth in non-metro areas is due to tourism.

After a series of field hearings on tourism, it became clear to my subcommittee that although many Federal agencies already participate in tourism promotion programs, no coherent national policy on rural tourism exists and there is little coordination and communication between agencies. So last winter, the Congress directed the USTTA to carry out a study to determine how tourism development can be used to encourage small business growth in rural areas.

The study was completed last October and the findings concluded and confirmed that travel and tourism could be an important tool for rural economic revitalization, and it should be an essential component of the broader rural economic development strategies. The idea is that through the promotion of tourism in rural areas we can increase market support for existing businesses and create conditions for new economic development.

You know, economics is important, and if tourism development can help economies in our rural communities it cannot be ignored. But rural tourism is more than that. It is a chance to see what America is all about—our history, culture and heritage. It is also a chance to escape and take pleasure in our past. We don't have to go into a museum and look at our history behind a glass—we can participate in it. Visitors to rural areas may be looking to relieve another era, or perhaps they want to learn about America at historic sites that are still as they were then or maybe they just want to get away from it all and enjoy our country's natural beauty.

Rural tourism is small towns, scenic roadways, lakes and streams, historic battlefields, old mills, oktoberfests, wineries, and Ozark mountain music. You know, there are communities that don't realize what they have to offer. Things rural Americans see and experience every day are just that—everyday things to them. But to the potential traveler they are a vacation experience.

More than 70 percent of our foreign tourists are in the United States for a repeat visit. New York, Los Angeles, and other gateways to America are usually all they see—and they think that they have seen the real America. It is more of a challenge to get overseas travelers to visit the Lake of the Ozarks region and other similar rural communities. But I'm sure that many of the people who are here on repeat visits would like to see something different, something that not everyone who comes to the United States will experience. Rural America offers them this. And what rural areas offer to our foreign tourists is also just waiting to be experienced by our American neighbors on the other side of the country or maybe just from the other side of town.

As I wrap up, I want to tell you a little bit about what is going on in Washington to help our tourism industries as a whole. At this time, the tourism Policy and Export Promotin Act is moving through the Senate and was just introduced in the House, where it has more than 100 cosponsors. One of the major provisions of the legislation is the creation of a rural tourism foundation, a tax-exempt organization to help promote rural tourism and encourage public/private partnerships for tourism development in rural communities.

This legislation also establishes goals to help the U.S. meet and maintain a tourism export surplus, improve conditions between Government agencies to promote the U.S. as a tourist destination, and sets up appropration levels for the United States Travel and Tourism Administration (USTTA).

Currently, the USTTA is funded at a level of $14 million. The U.S. spends about a nickel for every person in the United States to promote this country overseas, which places us behind Malaysia, $43.9 million, Tunisia, $39.3 million, Thailand $19.0 million, and Morocco $18.6 million, to name a few. It is time that the U.S. did more, and the Tourism Policy and Export Promotion Act sets out funding levels up to $17 million by 1992. This is still far less than most other nations, but in ths era of budget constraints it is a start.

I am very optimistic that by the end of the session we should have passed this legislation and soon we will be making significant contributions to rural development and the development of the tourism industry.

I know that in a lot of respects I'm simply preaching to the choir, but it is important even for people experienced in the tourism business (or in any business for that matter), to sit back and take into account what they have in mind for their business, take a look at what you have accomplished, examine your weaknesses, your strengths, and establish some reasonable and realistic goals for success in the future.

Some of you may have attended last November's Governor's Conference on Tourism, held at the Lodge of Four Seasons. I was unable to attend, but I heard how successful that event was. I'd like to call your attention right now to the theme of the conference—partners. There is a tendency sometimes to look at local competition and feel like you can't be successful if down the road there is a place that is attracting all kinds of tourists. But I know for a fact, from the hearings that my tourism subcommittee has held, from the letters I receive, and from the stories I am told, the way to build a strong tourism enterprise is to work together, in paratnership, with the surroundig communities. By working together, I know that the more people visit down the road the more likely they will be to stop by your town for a while. The success of your business colleagues can actually help you by drawing people to your area time and time again.

Again, I'd like to thank you for having me here and listening to my thoughts on tourism.

## A TRIBUTE TO RICHLANDTOWN BOROUGH ON ITS CENTENNIAL

### HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. KOSTMAYER. Mr. Speaker, I rise today to salute the borough of Richlandtown, PA. From its incorporation as a borough on November 11, 1890 to its centennial celebration this year, Richlandtown has been an important and shining example of the American small town.

On October 12, 1681, William Penn granted most of modern day Richland Township to Griffith Jones. The land was first settled in 1710 and its boundaries were surveyed and designated by 1740. Since 1681, the borough has been known as the "Great Swamp," Three Lanes End, Ducktown, Frogtown, and Flatland. However, the name Richland was commonly used due to the fertile farmland in the area.

Richlandtown has flourished since its incorporation in 1890. In its early days, the borough boasted 65 houses as well as thriving cobbling, cigar making, and cloth manufacturing industries. The oldest house of worship in Richlandtown, the Lutheran and Reformed Church, was completed in 1808. The post office was established in 1839, under the direction of Postmaster Christian A. Snyder. The Richlandtown Fire Co., founded in 1905, now has over 30 members and 7 pieces of equipment. As of 1990, Richlandtown has over 300 homes and more than 1,200 residents, and it is still growing.

Richlandtown Borough has for 100 years contributed much to Bucks County and to the Commonwealth. The community has always shown a spirit of good will and cooperation. Again, I congratulate Richlandtown Borough on the occasion of its centennial, and I wish it continued success for the next 100 years.

## CIVIC ACHIEVEMENT AWARD PROGRAM

### HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Ms. ROS-LEHTINEN. Mr. Speaker, as a Florida-certified teacher, I am concerned about our young people's lack of knowledge of important national events, people, places, ideas, and values. The continuing strength and vitality of American democratic traditions depend on the civic awareness of future generations. I would like to highlight a special program designed to provide supplementary citizenship education to elementary and middle school students.

The Civic Achievement Award Program [CAAP] was developed out of a need to improve the level of civic literacy in American elementary school students. The program is administered by the Close Up Foundation with additional funding provided by Burger King Corp. CAAP combines experiential learning with critical thinking, excellent with academics, and fun with helping others.

The program is divided into three projects. The first is the learning project where students master essential knowledge and concepts about six subjects: U.S. history, Government, geography, economics, culture, and current events; the second is a research project that helps students understand that knowing how to find and use information is an important and necessary citizenship skill; the third is the civic project which gives students an opportunity to identify, study, and take action on an important community issue.

I congratulate the schools that were selected for this wonderful program: Allapattah Elementary; Auburndale Elementary; Citrus Grove Elementary; Coral Gables Elementary; Dunbar Elementary; Edison Park Elementary; Fairlawn Elementary; Flagler Elementary; Kensington Park Elementary; Kinloch Park Elementary; Miramar Elementary; Pharr Elementary; Riverside Elementary; Shadowlawn Elementary; Southside Elementary; Phyllis Wheatley Elementary; Allapattah Junior High; Citrus Grove Middle; Kinloch Park Middle; Miami Edison Middle; Booker T. Washington Middle; and Shenandoah Junior High.

Mr. Speaker, this program is extremely valuable for preparing America's youth to participate in our pluralistic democracy. The Civic Achievement Award Program indeed exemplifies the commitment to excellence in education.

## TRIBUTE TO THE ACTON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise to day on the occasion of National Police Week to pay tribute to the Acton Police Department for their dedicated and outstanding service to the people of Acton, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Acton Police Department, the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief George Robinson and those who serve in the Acton Police Department:

John McNiff, Frank Widmayer, Robert Rhodes, Robert Parisi, Thomas Rogers, James Mcpadden, Bruce Nadeau, William Hayes, Bernard Harrison, Brian Goodman, Ronald Johnson, Paul Cogan, Robert L. Cowan, Jr., Albert Crowley, Jr.

Raymond LaRoche, Raymond Grey, Jeffrey Dudley, James Goodemote, James Cogan, Jr., Christopher Browne, Pablo Hernandez, Michael Oman, Todd Fenniman, Michael Coughlin, Christopher Prehl, Fred Rentschler, John Cooney, Stewart Fenniman.

## OLDER AMERICANS MONTH

### HON. CASS BALLENGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BALLENGER. Mr. Speaker, the month of May is Older Americans Month, and this year we especially celebrate the 25th anniversary of the enactment of the Older Americans Act. The Older Americans Act setup a special agency, the Administration on Aging, within the Department of Health and Human Services to provide grants to States to establish and improve programs for the elderly. Through these programs, our Nation's elderly have been able to realize the important part they play in our society.

In recognizing the contributions of senior citizens in our society, I would like to point out that there are still barriers to this participation. The Social Security Earnings Test is one such barrier. I am a cosponsor of the Older Americans Freedom to Work Act of 1989 (H.R. 2460) that would repeal the Social Security earnings test for individuals 65 or older. Repeal of the earnings test would give senior citizens the opportunity to continue to be productive without being penalized financially for doing so. As the title of the bill indicates, I would like to give Older Americans the "freedom to work."

In conjunction with Older Americans Month, I am pleased to have Wilson and Virginia Setzer from Gastonia, NC here in Washington this week to participate in the Senior Intern Program. The Setzers visited my office Wednesday morning, and had the opportunity to see firsthand the workings of a congressional office. We also attended the "Freedom to Work" rally in support for repealing the Social Security earnings test. I would like to thank Wilson and Virginia for coming to Washington, and I appreciate their eagerness and initiative in participating in the program.

## PEACE CORPS BUSINESS PERSONS VOLUNTEER SERVICE

### HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. DORGAN of North Dakota. Mr. Speaker, today I am introducing a resolution calling on the Peace Corps to tap the volunteer spirit of American business people to provide technical assistance to the nascent private sector in Eastern Europe.

I believe that the Peace Corps, which already has assistance agreements with the Governments of Poland, Hungary, and Czechoslovakia, could expand its current focus to launch a Business Persons Volunteer Service in Eastern Europe. From discussions I have held over the past 2 months I have found enthusiasm in the Peace Corps for mobilizing American business persons to share their experience and skills with Eastern Europeans.

In my State of North Dakota I have met with business people and farmers, several of whom are ex-Peace Corps volunteers, who have told me that they would offer their services free of charge to impart their business skills to Eastern Europeans, either by providing short-term training in Europe, or by sponsoring internships at their businesses and farms in North Dakota. In fact the genesis for this resolution came from one of those ex-PCV's who is one of my State's most successful business and community leaders. These are people who are both culturally sensitive to working in other countries and who know how to get things done in the business world.

Along with several of my colleagues, who are cosponsoring this resolution, I see an opportunity to build a people-to-people program which could create enduring relationships between American volunteers and Eastern European participants and institutions and enhance mutual understanding.

While this resolution is not intended to establish an exclusive franchise for voluntarism in Eastern Europe for the Peace Corps, I believe use of Peace Corps structures would be cost effective, could attract many high quality volunteers, and result in effective and culturally sensitive programs.

Finally, I suggest the Director of the Peace Corps launch this initiative by inviting business people with a record of volunteer service, including ex-PCV's, to form a task force to recommend program elements.

The Peace Corps has already launched its Eastern European programs while many of us are still talking about the need to help build democracy and help small businesses in Eastern Europe. With Congress' encouragement, which this resolution is intended to provide, Peace Corps will have the opportunity to build a new and needed dimension—the Business Persons Volunteer Service—into its Eastern European program.

## AN EDUCATION AGENDA FOR THE 1990'S

### HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GLICKMAN. Mr. Speaker, at a time when public attention and Government action are focused on education as a top national concern, we must focus on creating solutions which address the pervasive problem we face: a nation of students lacking the skills needed to successfully carry this country into the 21st century.

World events provide the United States an opportunity to redirect national priorities to meet pressing national needs. However, reform does not come easily. Many of these needs can be met simply by making some tough choices for our children, our teachers, and ourselves as parents and concerned citizens. With this in mind, I commend to my colleagues the following editorial from the May 13, 1990, issue of my hometown newspaper, the Wichita Eagle:

AN AGENDA—SCHOOL REFORM PLAN SIMPLE, BUT UNTRIED

President Bush has sponsored a national educational conference. Gov. Mike Hayden has sponsored a state educational conference. The Wichita Board of Education, the WI/SE Partnership and the Wichita Eagle have sponsored a Sedgwick County educational conference.

Enough conferences. Enough experts. Enough jargon about "mastery learning," "effective education" and "outcomes-based" schooling.

Indeed, it would require a week of Earth Days merely to sweep up the name tags, the reports and statistical graphs from all the educational conferences held during the past year. Meanwhile, the U.S. Education Department reported earlier this month that national high school graduation rates are down, scores on college admissions tests are stagnate or declining and that even smart American kids aren't doing as well as those of earlier years.

There are no secrets to better schools. The answers have been there all along, though they are resisted by an American society that often treats children as necessary nuisances and by an educational establishment that has put its own convenience ahead of academic excellence.

The simple, workable solutions include:

Turn off the television set. American children between the ages of 2 and 17 typically watch 22 to 25 hours of television a week. And that doesn't include video games. Illiteracy and poor reading abilities would disappear if parents read to the children and enforced regular reading hours at home.

Get teenagers out of the workforce. Many teenagers spend more time flinging hamburgers or selling sneakers than studying. Many of the kids work only to buy such teenage "necessities" as fast cars and chic fashions. The United States is the worst country in the industrialized world at exploiting its children for cheap labor.

Make teachers true professionals. Schools should abandon current salary systems that reward primarily longevity and graduate hours. Peer-review pay plans are needed to give teachers the power to set standards for their field, as doctors, lawyers and most other professionals do.

End the monopoly of education schools in training teachers. Aspiring teachers should take more liberal arts and fewer pedagogy and educational theory courses. Teachers should be masters of their subject matter. Most education schools are geared to the career interests of the professors, not to the students or real scholarship.

Extend the school day and year. Young Americans spend less time in class than most of their peers in developed countries. A Japanese student, for example, attends school 240 days a year, compared with 180 for the typical American.

Toughen the high school curriculum. With its lack of rigor and focus, the average high school curriculum seems designed to entertain rather than educate young Americans. No wonder U.S. students are at the bottom of international tests in science, math and virtually every other catergory of academic ability.

Oversee school performance. Educators are geniuses at avoiding public accountability. Kansas, for example, has no statewide testing or other system to let taxpayers know how well the schools are doing.

The list is not new. It's based on sound research. It's an agenda for the 1990s.

## THE REPUBLIC OF CHINA CELEBRATES A PRESIDENTIAL INAUGURATION

### HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MARLENEE. Mr. Speaker, I know I speak for most of my colleagues here in Congress as I offer my best wishes and congratulations to the people of the Republic of China on Taiwan on the occasion of their Presidential inauguration this Sunday, May 20. My only regret is that I cannot personally attend the inauguration ceremonies of the first freely elected President of the Republic of China.

President Lee Teng-hui was overwhelmingly elected by the electoral college of the Republic of China on March 21 as the eighth President. This culminated the process of the most free election in the history of the Republic of China. Mr. Speaker, when any objective analyst contrasts this peaceful democratic process in the Republic of China with the brutal crackdown of prodemocracy Chinese students in Tiananmen Square last year, I can only conclude that the Communist leadership of the People's Republic of China should emulate President Lee's example by submitting to free and open elections.

Over the next 6 years of his term, I expect that President Lee will continue democratic reforms, expand the official and unofficial ties of the Republic of China with the free world, and maintain strong ties with the United States.

I am very confident of President Lee's ability to lead his nation of 20 million hardworking men and women to a peaceful and prosperous future. I anticipate even greater free market economic growth and development in the Republic of China as she plays a key role in the world economy in the 1990's.

Meanwhile, Mr. Speaker, the ties between the Republic of China and the United States will grow even stronger as we continue our mutual efforts to reduce trade barriers and tariffs through the promotion of free trade. This will inevitably lead to continued prosperity for our two people.

Mr. Speaker, I send my best wishes to President Lee as he assumes the awesome responsibilities of leadership of this island of democracy and freedom in the Pacific.

## A TRIBUTE TO THE PEPPERELL POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Pepperell Police Department for their dedicated and outstanding service to the people of Pepperell, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave

officers of the Pepperell Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief David Young and those who serve in the Pepperell Police Department:

Thomas Lane, James Scott, Allen Davis, Benjamin McDonald, Kenneth Beers, Steven Bezanson, James Peters, Armando Herrera, Peter Gibbs, Jessica Leblanc, Brian Goldman, Alan Kessieur, and Kevin Cooney.

## JOSE CENTENO, SR., PIONEER SAN ANTONIO BUSINESSMAN

### HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GONZALEZ. Mr. Speaker, I would like for you and my colleagues to know about the life of Jose Centeno, Sr., my neighbor and long-time friend in San Antonio, who was a pioneer Mexican-American businessman, whose goal was to help those who were considered to be hard-core unemployable.

Mr. Centeno built a chain of grocery stores on San Antonio's deep westwide, the predominately Mexican-American part of San Antonio where there have been large numbers of unemployable people, some of whom went off the unemployment rolls when Mr. Centeno hired them.

At his death recently at 91 years of age, Mr. Centeno left a tremendous legacy to his daughter and son, Lile Centeno Alfonsin and Eloy Centeno, and to his daughter-in-law, Alice Little (who was the wife of his deceased son, Joe Centeno, Jr.), and to his 18 grandchildren, and 14 great grandchildren.

The 18 grandchildren, in the order of their birth, are: Priscilla Rodriguez, Michelle Moke, Lillita Moke, Raegean Alonso, Jose Centeno III, JoAnn Centeno, Jeanette Santos, Andy Centeno, Eloy Centeno Jr., Alice Jo Centeno, Julie Moke Munoz, Darrell Centeno, Julie Moke Munoz, Darrell Centeno, Susie Centeno, Frederick Centeno, Jose C. R. Alfonsin, Horacio E. Alfonsin, Carlos A. Alfonsin Jr., and Claudia Centeno.

The 14 great grandchildren are: Michael Joseph Rodriguez, Jesusita L. Rodriguez, Kiki I. Rodriguez, Joe Centeno IV, Aramis Centeno, Luis Santos Jr., Eloy Santos, Francisco Santos, George Alonso, Amber Centeno, Bianca Centeno, Stephanie Santos, Joey Centeno, and Monica Centeno.

Mr. Speaker, I would like to share with you and my colleagues the article which appeared in the San Antonio Express/News on April 26, 1990, regarding Mr. Centeno's life and death.

[From the San Antonio Express/News, Apr. 26, 1990]

CENTENO FOUNDED SUPERMART CHAIN

Jose Centeno Sr. was the founder of Centeno Supermarkets Inc. and chairman of the board.

He was a pioneer Mexican-American businessman whose goal was to help those who were considered to be hard-core unemployable, according to his son, Eloy Centeno, president of the San Antonio supermarkets.

The senior Centeno, 91, died Tuesday in a local hospital after a lengthy illness. He was born in Matamoras, Mexico, and was the son of a physician. As a youth, Centeno joined the revolution, displaying courage beyond his years.

In the early 1920s, he moved to San Antonio looking for his future, and found it in his love of the retail business. Despite his father's wish that he continue the family tradition of practicing medicine, he began his career handling produce at the old Gonzalez Grocery Store.

As a young man, Centeno worked for Joe Barash, who owned two local clothing stores. This further developed Centeno's skills in the retail business.

In 1922, he met and married Jesusita Lopez, and they became the parents of three children. The couple soon began selling groceries from one room of their home on Rivas Street, on the deep West Side. His wife died in 1988.

ONE STORE BECAME MANY

Eventually, with hard work and perseverance, they built this small operation into a chain of grocery stores at a time when few Mexican-Americans were succeeding in business.

"In the 1930s and '40s, there were few opportunities for Mexicanos who wanted a decent job at a decent wage." Eloy Centeno said. "Papa always made sure the less fortunate had a chance.

"Through the years he trained literally hundreds of people in the stores, many of whom went on to successful, productive careers with their retail operations."

"His daughter, Lile Centeno Alfonsin, recalls, "Papa used to say you could only wear one pair of shoes at a time. In spite of his success, his greatest joys were simple ones revolving around his family, whom he liked to keep very close to him.

"He was known as 'Papa Grande' to his family and encouraged his children's involvement in business and in the community at an early age. He was proud to see his son become chairman of the board of City Public Service and a candidate for mayor."

"When Mr. Centeno first came to San Antonio as a young man, he studied medicine under Dr. Aureliano Urrutia Sr.," said architect Henry Munoz, another family spokesman. "Eventually, he was at the Gonzalez Grocery Store and really followed his heart in selecting his career.

"Though he became extraordinarily busy with his business, the most important thing to him was his family. After my wife, the former Julie Moke, lost her father, and after the death of his son, Joe Centeno Jr., Mr. Centeno became the father figure to both sets of his grandchildren. He helped raise all of his grandchildren to a large extent."

Survivors, all of San Antonio, are his daughter; his son; 18 grandchildren; and 14 greatgrandchildren.

The body will lie in state Thursday at home, 235 W. Kings Highway. The rosary will be recited at 7 p.m. Friday in Our Lady of Grace Catholic Church. Mass will be celebrated at 9 a.m. Saturday in San Fernando Cathedral. Burial at 10 a.m. in San Jose Burial Park will be arranged by Porter Loring Mortuary.

## TRIBUTE TO DR. RICHARD D. DECOSMO

### HON. CURT WELDON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. WELDON. Mr. Speaker, I would like to take this opportunity to pay tribute to Dr. Richard D. DeCosmo, president of Delaware County Community College in Media, PA. Dr. DeCosmo will be honored with the first Honorary Alumni Membership Award given by the Delaware County Community College Alumni Association, commemorating his 10 years as president of the college.

Dr. DeCosmo is a 1958 graduate of the University of Detroit with a master of arts degree and achieved a doctorate of education from Loyola University of Chicago in 1977. He served as a political science instructor, director of admissions and chief student personnel officer at Macomb County College in Warren, MI. At Moraine Valley Community College in Palos Hills, IL, Dr. DeCosmo served as dean of student community services and dean of student personnel services. In 1975, he was promoted to executive vice president of Moraine Valley, and in 1980, accepted the position as president of Delaware County Community College.

Along with the overall responsibilities as president of Delaware County Community College, Dr. DeCosmo is well-known for his professional affiliations and activities and community involvement. He serves as a member of the Governor's Task Force on Work Force Development, treasurer of the Pennsylvania Association of Colleges and Universities, a volunteer for the American Red Cross, and Delaware County Public Service Chairman of the United Way of Greater Philadelphia. This is just a few of many.

Mr. Speaker, I am most proud and honored to have Delaware County Community College located in Pennsylvania's Seventh Congressional District of which I represent, and am grateful to have the opportunity to recognize and share the merits of an outstanding educator, administrator, and public servant.

## IN MEMORY OF JIM HENSON

### HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GREEN. Mr. Speaker, I rise today to honor the memory of Jim Henson, the talented puppeteer and entertainer who passed away yesterday at the age of 53. Mr. Henson delighted children and adults alike worldwide with his creations of famous puppet charac-

ters such as Kermit the Frog, Oscar the Grouch, and Miss Piggy, to name a few.

While attending the University of Maryland, Mr. Henson worked as a puppeteer at a local television station. It was there that Jim coined the phrase "muppet." He considered his creations to be part puppet and part marionette. After completing his fine arts degree, Jim moved on to "Sesame Street," an educational television program for young children. "Sesame Street," which is produced by the Children's Television Network in my congressional district in New York City, has assured me that the show will go on.

At this time, I should like to join my colleagues in thanking Mr. Henson for the laughter and joy he gave us all by bringing his muppets to life. It is my understanding that the Henson family is also in the entertainment business, and it is my hope that they continue the muppet legacy.

## BAYARD L. "RED" MENDENHALL'S 80TH BIRTHDAY

### HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SWIFT. Mr. Speaker, May 30 marks a special day for one of my constituents as he celebrates his 80th birthday.

Bayard Mendenhall, or "Red" as he is universally known, was born in Hollywood, CA, on May 30, 1910. At the age of 19 he began working for the U.S. Government under the Bureau of Reclamation. During his 44 years of distinguished service, Red worked on a variety of irrigation projects for the Bureau. He served as project manager on the Fontenelle Dam, Riverton and the Upper Green River storage projects, and project construction engineer on the Seedskadee project.

In 1964, Red moved to Washington State in order to become chief of engineering and construction for the Columbia Basin project in Ephrata, WA. He served in this capacity for 9 years. Upon his retirement in 1973, Red received the Distinguished Career Service Award from the Bureau of Reclamation.

Red currently resides in Friday Harbor, WA, with his wife, Jane. He is the father of three children, grandfather of four, and great-grandfather of one.

Mr. Speaker, I know my colleagues here in the U.S. House of Representatives join me in extending congratulations and best wishes to Mr. Mendenhall on this happy occasion.

## A TRIBUTE TO THE ANDOVER POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Andover Police Department for their dedicated and outstanding service to the people of Andover, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Andover Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief James F. Johnson and those who serve in the Andover Police Department:

Hector G. Pattullo, Richard W. Enos, John Kevin Lynch, Donald G. Mooers, John P. Houlihan, Phillip Froburg, George W. Miller, Steven C. Avery, Arthur J. Ricci, John F. Bernhardt, Kevin J. Winters.

William MacKenzie, Barbara Connolly, Richard O. Aumais, David R. Grant, Ronald M. Hagerty, Calvin Metcalf, Joseph Ouellette, Joseph Hastings, Henry J. Picard, John W. Milne, James S. Reilly.

David L. St. Jean, Thomas F. Siopes, Frank W. Froburg, Kevin J. Burke, Donald Pattullo, John N. Pathiakis, William E. Canane, Robert J. Cronin, Brian Pattullo, Stephen Martellini, Dennis J. Lane, Harry Collins, Mark McDermott, William J. Wallace.

Randall Peterson, James E. Haggerty, Laurence Hickman, Lee J. Britton, Charles Heseltine, Craig F. Poirier, Daniel G. Igoe, Cecillia K. Blais, James Hashem, James Moses, Matthew Aumais, Colin D. Radford, Joseph Thibodeau, Brian T. McAnally.

## IN TRIBUTE TO THE HONORABLE EDWARD J. DERWINSKI

### HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ROSTENKOWSKI. Mr. Speaker, it gives me great pride to join the Association of Former Members of Congress in tribute to the Honorable Edward J. Derwinski, Republican of Illinois.

Ed Derwinski has distinguished himself, his native town of Chicago, his home State of Illinois, his country, and this body in so many ways that it is entirely fitting that he be honored here today by his friends, the current and former Members. Without taking a thing away from other former Members who have been recognized in this forum, I hasten to add that this particular ceremony is long overdue.

Ed Derwinski's career as a Member of Congress needs no additional summary by this Member. His many contributions to the work of the Congress comprise a remarkable record of achievement, in terms both of legislative accomplishment and of representation of his constituents' best interests.

Ed and I started in Congress together, in January 1959, after serving together in the Illinois Legislature. We learned to lean on each other in those early days, and I cannot think of a better man to have had as a friend.

His departure from Congress in 1983, after serving 11 terms, represented as much a personal loss to me as it was an institutional loss to the House of Representatives.

After 22 years' service in the Congress, as you know, Ed then became Under Secretary of State for Security Assistance in the Reagan administration. The President was doing nothing less than recognizing Ed's considerable international experience as a member of the House Committee on Foreign Affairs and as Chairman of the U.S. Delegation to the Interparliamentary Union—not to mention his personal diplomatic skills.

Some things happen by fate—in accordance with a larger plan. I believe that having Ed Derwinski at the State Department during the years leading up to the Eastern European democracy revolutions was one of them. Ed's personal understanding of, and empathy for, the freedom aspirations of the people of Poland, Hungary, Czechoslovakia, and their neighbors had to have been a key element in the openness of the Reagan administration to helping those nations realize their dreams.

He was present for the breaking of the ice and the removal of final sanctions. He served as a reliable and sophisticated channel for messages of encouragement and support to the opposition leaders. And he handled relations with those still in power with great skill and effectiveness. He also was instrumental in keeping his old friends on the Hill informed of where things stood from day to day.

In recognition of his accomplishments at State, President Bush bestowed on Ed an honor of the highest order—the assignment to lead the VA from the status of an independent agency to a seat at the Cabinet table with the full rank it deserves. In this latest incarnation of Ed Derwinski, public servant, the gentleman is writing a bold record of decisive leadership, coupled with an engaging and heartwarming humanitarian manner.

As Secretary of the Veterans' Administration, Ed Derwinski has exceeded our hopes in elevating it to Department status. He has personally brought new respect both to our veterans and to those who serve our veterans so faithfully, as no one else could have. It has proven to be another brilliant appointment. We have to acknowledge the worth of a man who makes his Presidents look so good.

On a personal level, this opportunity to pay tribute to Ed Derwinski is almost more of a pleasure than it is a privilege. Let's face it, ladies and gentlemen, Ed Derwinski is simply a man who is fun to have as a friend—a real lovable guy. When you've seen him dance and laugh and sing Polish ballads from the heart—you hope for a chance to express your appreciation publicly.

I remember clearly our days together in Springfield as newly elected State representatives. After my first experience of Ed Derwinski as troubadour, I knew he had a long political career ahead of him. He was one of those blessed individuals whose voice only

got better the longer we journeyed into the night.

As further evidence of my affection for Ed, I want him to know that the only campaign I ever really enjoyed was when his wife—Bonita Margalus—this was before Ed and Bonnie were married—ran against me for reelection. I learned in that campaign what a great woman Bonnie is, and I really knew that Ed had a lot on the ball when she became his bride.

Let me close by congratulating the Association of Former Members of Congress for bestowing this honor on Ed Derwinski. You have done the right thing in recognizing that he has distinguished himself among former Members. By continuing his public service in the executive branch so commendably, he has thus brought credit not only to himself, but to this body and to the association as well.

Thank you again for this opportunity to take part in the celebration of Ed Derwinski's career.

## CENTRAL EUROPE'S OFFICIAL DEBT

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. LaFALCE. Mr. Speaker, on May 16, the Financial Times printed an editorial, entitled "Solutions for the Debt Problem," that called on the governments of the industrialized world to take the next step in solving the debt crisis, particularly in central Europe.

Since 1983, when the Mexican Government first threatened to default on its loan payments to Western banks, the international financial system has been embroiled in a tug of war between creditors and debtors. The major losers have been the people of the Third World whose economic growth has stagnated, and American factories which lost valuable export markets, particularly in Latin America.

Last year, the Bush administration took an important step to relieve the debt burden for many of these countries by urging banks to forgive some outstanding debts in exchange for certain guarantees. This policy has become known as the Brady plan. However, while governments have now convinced private creditors that loans to these nations are no longer worth 100 percent of face value, the same governments are insisting on valuing their loans to these debtors at full face value.

Now, a new front has opened on the debt war—central Europe. Having won the cold war with the democratization of Poland, Hungary, Czechoslovakia, and East Germany, it is now time we set out to win the peace. This means that these nations must develop thriving market economies that bring prosperity to their citizens.

Unfortunately, some of these nations are being crushed by an unserviceable debt burden. Unlike the largest Latin American debtors, however, much of this debt—particularly in Poland—is owed to Western governments, not private banks.

The Financial Times editorial points out, that, without official debt relief, the current debt strategy is "full of anomalies and contradictions." For example, "Mexico is better treated than Poland," despite the fact that Poland has, in one bold stroke, completely overhauled its economy, introducing market forces.

To correct this anomaly, and help jump-start these newly emerging market economies in central Europe, I have introduced legislation that will allow these debts to be paid in local currencies, greatly reducing the demand on scarce foreign exchange. In addition, the legislation urges the President to negotiate similar arrangements for these nations with the other industrialized powers. Private creditors would also be expected to follow through with similar plans for reducing the debt burden left by a legacy of four decades of Communist economic policy.

Mr. Speaker, I commend the editorial to your attention, and ask that it be included in the RECORD.

[From the Financial Times, May 16, 1990]

SOLUTIONS FOR THE DEBT PROBLEM

"An improvement in the economic performance of indebted developing countries remains one of the foremost international economic priorities for the 1990s." Thus wrote the staff of the International Monetary Fund in its World Economic Outlook published this month. Unhappily, the objective of ending the eight-year-old Third World debt crisis remains as elusive as ever.

The governments of industrialised countries have, it is true, made important concessions to the heavily-indebted countries over the past two years. Many have converted aid loans into grants. At the 1988 Toronto summit, heads of government agreed on a formula to allow relief on the debt owed by the poorest African countries to export credit agencies. Last year saw the adoption of an initiative of the US Treasury Secretary, Mr. Nicholas Brady, which encouraged the use of resources—mainly from the International Monetary Fund and World Bank—to encourage banks to write-off some loans to middle-income countries.

Although the financial benefits that have accrued to developing countries have been modest so far, policy-makers have at least shifted the focus of the strategy away from further increases in debt obligations and towards a lowering of debt burdens. They have also conceded that onerous levels of foreign debt can be an obstacle to the adoption of desperately needed improvements in economic policies.

ANOMALIES

Unfortunately, the developed countries have not followed this realisation to its logical conclusion. As currently conceived, the debt strategy is full of anomalies and contradictions. For example, governments have persuaded commercial banks that their loans to middle-income debtors are no longer worth 100 cents on the dollar, but they persist in the illusion that this is not true of official export credits.

This produces the absurd result that Mexico is better treated than Poland. Poland owes two-thirds of its $41bn foreign debt to western export credit agencies, which—although they are not demanding interest payments until April 1991—have not conceded debt write-offs. Mexico, however, which owes most to western banks, has just completed a package to lower its $100bn debt burden.

Apart from the big four debtors—Argentina, Brazil, Mexico and Venezuela—nearly all indebted countries owe more to western governments than to bank creditors. Any comprehensive initiative to resolve the problem of Third World debt must tackle debt owed to the former. This may well reduce new export credits to rescheduling countries. So be it. Experience suggests, in any case, that the use of tied export credits is far too often of dubious benefit to economic development.

WRITE OFFS

Debt relief should not be extended to loans from international financial institutions. If it were forced to forgive arrears, the IMF's role at the heart of the financial system could be fatally undermined. Similarly, write offs would raise the cost of borrowing for the World Bank and other development banks, and so damage the cause of development in the long term.

Equally, a widening of debt relief must not go ahead on a purely *ad hoc* basis. The Fund and Bank should, instead, act analogously to domestic bankruptcy courts. Their role would be to ascertain the ability of heavily indebted countries to meet their current debt burdens, while sustaining economic growth and political stability. Where that combination seems impossible, they should recommend adequate levels of debt relief, while insisting upon the *quid pro quo* of a satisfactory programme of economic adjustment.

Contingency clauses to benefit both creditors and debtors in case of external economic shocks could be included, but any debt relief package should, if possible, be once and for all. The arbitrary divisions which currently separate candidates for various forms of debt relief would disappear. Instead, a general assessment of a country's long-term ability to pay would end in a proper division of the burden between the private and official creditors.

## PSYCHOLOGISTS ENDORSE SUBSTANCE ABUSE TREATMENT CORPS ACT

### HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. STARK. Mr. Speaker, today, Representatives GREEN, GLICKMAN, GRANT, and I introduced the Substance Abuse Treatment Corps bill.

I am pleased to report the endorsement of this effort by the American Psychological Association. I believe other groups will be supporting this effort and I hope it can become part of this year's initiatives in the war against drugs.

The APA's letter follows:

AMERICAN PSYCHOLOGICAL ASSOCIATION,
*Washington, DC, May 17, 1990.*

Hon. FORTNEY H. (PETE) STARK,
*Longworth House Office Building,*
*U.S. House of Representatives, Washington, DC.*

DEAR CONGRESSMAN STARK: The American Psychological Association (APA), the leading scientific and professional association representing over 100,000 clinicians, researchers, educators, consultants and students, commends you for your efforts in introducing the Substance Abuse Treatment Corps Act. Psychology plays an integral role in drug abuse treatment, rehabilitation and

prevention. Psychologists are currently actively involved in the war against drugs on all levels, but there remains a need to attract more qualified mental health care professionals to provide services where they are critically needed and often inadequate or unavailable.

The APA supports the concept of the Substance Abuse Treatment Corps Act which will establish a special unit within the National Health Service Corps as a means to encourage qualified professionals, including mental health professionals, to enter the field of substance abuse treatment. Students or professionals making a commitment to work in public/non-profit treatment programs will become eligible for tuition assistance or loan repayment. This program will provide the necessary assistance to enable individuals to work in programs that are often underfunded and understaffed.

Research clearly demonstrates that drug treatment can work so long as those who are providing the treatment have the necessary skills and training and adequate funds are made available to sustain treatment services and aftercare. We believe acknowledging the need to ensure an adequate pool of qualified personnel is a critical component to any serious national drug control strategy.

We thank you again for your continued efforts and support in the development of policy and programs to fight substance abuse. We look forward to working with you on this proposal to ensure passage of legislation which will substantially enlarge the pool of qualified professionals willing to devote themselves to drug abuse prevention, treatment and rehabilitation.

Sincerely,

BRYANT WELCH, J.D., Ph.D.,
*Executive Director for Professional Practice.*

## CUBAN INDEPENDENCE DAY

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. FASCELL. Mr. Speaker, I would like to take this opportunity to wish all my friends of Cuban descent a happy Independence Day.

On May 20, 1902, Cuba was given its independence from the United States under the Platt amendment. A constitution was drafted in Havana, the occupation ended, and the new Republic was formed, the beginning of the modern Cuba.

While Cuba has been a sovereign nation for nearly 90 years, the people of Cuba still are not free. Any celebration of Cuban independence is somewhat hollow because the people of Cuba do not share the freedom and democracy that should be inherent in independence.

I hope that in the near future all those of Cuban descent will be celebrating a new day of independence—day that will celebrate the lifting of the oppressive policies of the Castro regime; day to celebrate Cuba's return to the world community that cherishes freedom, democracy, and a respect for the human rights of all men.

## STATEMENT OF ADM. ELMO R. ZUMWALT, JR.

### HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. EVANS. Mr. Speaker, today, I would like to submit for the RECORD the report by retired Navy Adm. Elmo R. Zumwalt, Jr., for the panel that is advising Veterans' Affairs Secretary Edward J. Derwinski on the issue of agent orange compensation. Admiral Zumwalt, a member of the 15-member panel which held its first meeting yesterday, enthusiastically endorsed the findings of the Agent Orange Scientific Task Force [AOSTF]. He said that his review of the AOSTF report and other scientific studies indicates that 28 diseases should be considered related to Agent Orange exposure.

As many people are aware, the health effects of agent orange on the veterans who were exposed to it in Vietnam are an issue of personal concern to Admiral Zumwalt. When Admiral Zumwalt commended naval forces in Vietnam, he ordered the spraying of the defoliate, Agent Orange. His son, Elmo R. Zumwalt III, a patrol boat commander during the war, died in 1988 of cancer believed to have been related to his exposure to the herbicide.

STATEMENT OF ADM. ELMO R. ZUMWALT, JR.

Mr. Chairman and Members of the Committee: We have been requested by Fred Conway to comment at this meeting on "Human Health Effects Associated With Exposure to Herbicides and/or Their Associated Contaminants—Chlorinated Dioxins-Agent Orange and the Vietnam Veteran: A Review of the Scientific Literature, April 1990," prepared by the Agent Orange Scientific task Force (AOSTF) working with the American Legion, Vietnam Veterans of America, and the National Veterans Legal Services Project.

I ask to do so at this time since, due to a speaking engagement in Massachusetts to which I was committed prior to my appointment as a member of the Committee on Environmental Hazards, I must leave tomorrow before our proceedings are ended.

Let me start by enthusiastically applauding the AOSTF Report. Seven prominent, wholly independent scientists, each highly regarded in the scientific community as knowledgeable about health effects due to exposure to dioxins, found the following:

That there is a significant statistical association between exposure to phenocyacetic acid herbicides and/or their associated contaminants (chlorinated dioxins) in the case of five diseases/disorders;

That the scientific evidence supporting the existence of a significant statistical exposure association is at least as strong as the scientific evidence of a lack of such association for three other diseases/disorders; scientific literature that addresses both human and animal health consequences (from cancers to a range of other disorders, dysfunctions and less well defined symptoms) associated with exposure to dioxin contaminants.

It has been my special assignment over the past seven months at the direction of Secretary Derwinski to undertake just such a study—quite independently of the AOSTF analysis. In a report filed with the Secretary on May 4, 1990, I laid out in some detail (a) the results of my own review of available medical and scientific materials on human exposures to dioxin contaminants found in Agent Orange, (b) the probable association of those exposures with cancers and other debilitating illnesses (including offspring deformities), and (c) how the body of studied literature required the conclusion that a significant number of adverse health effects suffered by Vietnam veterans are more likely than not service-connected.

It was heartening, albeit not entirely surprising to me, that my conclusions on likely health effects from dioxin exposures paralleled closely the Task Force conclusions (see Attachment A). I suggest to you that any objective review by knowledgeable experts in the field would predictably lead to much the same conclusion.

The Committee has yet to undertake any sort of disciplined study of the revelant materials. At our November 2-3, 1989 meeting, we were without adequate guidelines to govern our assessment of individual papers or their amalgamation. Beyond this, there was a noticeable failure to apply with any Committee members, a comprehensive listing of cancers and other illnesses should be compiled. Included on this list should be those health effects for which there exists both the biologic plausibility for an association with Vietnam service (based on phenoxy-herbicide exposure or other known environmental hazards) and the availability of human studies of sufficient number and quality to shed light on whether such an association timely exists.

*Identify Scientific and Medical Papers for Review.*—There is a need to gather for Committee review the relevant literature prepared by scientists in the field and medical experts. Multiple papers from the same study population should be identified and marked for review as one study.

*Retain Outside Expertise.*—Evaluation of the collected materials should be undertaken in the first instance by professional epidemiologists having expertise in the environmental fields implicated. The Committee should, therefore, request the Secretary to authorize appointment of such experts (from both academia and public health departments) to review the literature and offer their assessments to the Committee. A timeframe should be set (i.e., three months) for completion of these expert reviews.

*Devise Specific Review Guidelines.*—It is essential, as I have indicated, that any review of the materials move forward under a clear set of evaluation guidelines. There must be a common understanding of exposure classifications, accepted risk comparisons, study design parameters, environmental control factors, and the like. The Committee should direct the staff to devlop such a set of guidelines for distribution to the members within three weeks. A meeting can then be scheduled to discuss, revise and finalize a set of guidelines to be used in the review process.

Upon receipt of the epidemiologists' evaluations, the Committee can schedule a series of sessions for its review of the results on a disease-by-disease basis, taking into account at the time all that is known from experimental tests on animals as well as the latest scientific knowledge from the field of immunology. If there appears to be an evidentiary basis for concluding that a particular health effect is more likely than not linked to phenoxy-herbicide exposure or dioxin exposure, Vietnam veterans suffering such a symptom are entitled to the presumption that the illness is service-connect-

ed, and this Committee should take that position in its report to the Secretary.

Let me emphasize in closing that my own extended assessment of the issue for the Secretary satisfied me that not only the 13 health effects identified in the AOSTF Report, but an additional 14 others are sufficiently associated with contaminants found in Agent Orange to justify service-connected compensation. Nor do I believe that my report can be regarded as the last word on the list of related illnesses. The fact is that we are in an area of developing scientific and medical expertise and the harder one looks into the question of health risks from exposures to dioxin contaminants the more we are finding a causal connection.

This Committee has the responsibility to examine this developing body of evidence and go where it leads, without predisposition, bias or predilection. The integrity of our process has already come under some question; what we now do and how we do it will be closely watched on a number of fronts. We owe it to ourselves, and most particularly to our veterans involved in Vietnam, that our review is both the most thorough and the most professional effort of which this nation is capable. That is a privilege the Vetnam veterans deserve and have not yet been accorded.

ATTACHMENT A—ADVERSE HEALTH EFFECTS RELATED TO EXPOSURE

AOSTF Statistically Significant:
1. non-Hodgkins disease
2. soft tissue sarcoma
3. skin disorders/chloracne
4. subclinical hepatotoxic effects
5. porphyria cutanea tarda

As Likely As Not:
6. Hodgkins disease
7. neurologic effects
8. reproductive and developmental effects

Sound Evidence (Less than statistically significant):
9. leukemia
10. cancers of the kidney
11. cancers of the testes
12. cancers of the pancreas
13. cancers of the stomach
14. cancers of the prostate
15. cancers of the colon
16. cancers of the hepatobiliary tract
17. cancers of the brain
18. psychosocial effects
19. immunological abnormalities
20. gastrointestinal ulcer
21. altered lipid metabolism

ZUMWALT STUDY

As Likely As Not (Very High Confident-V or Confident-C)
1. non-Hodgkins disease (VHC)
2. soft tissue sarcoma (VHC)
3. chloracne and other skin disorders/skin cancer (VHC)
4. other liver disorders (C)
5. porphyria cutanea tarda (VHC)
6. Hodgkins disease (VHC)
7. neurologic defects (VHC)
8. birth defects (VHC)
9. leukemia (C)
10. kidney (C)
11. testicular (C)
12. pancreatic cancer (C)

24. lung cancer (VHC)
25. hematopoetic diseases (VHC)
26. nasal/pharyngeal/esophogeal cancer
27. malignant melanoma (C)

## A TRIBUTE TO THE GROTON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Groton Police Department for the dedication and outstanding service to the people of Groton, MA in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Groton Police Department, the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief George Rider and those who serve in the Groton Police Department:

John Saball, James Downes, Jr., Jack Balonias, Douglass Hatch, Irmin Pierce, Francis Duclos, Walter Kumpu, Steven Alvarez, Gary McKeon, Patricia Grigas, Thomas Daly, and Scott Sauve.

## TRIBUTE TO THE RECIPIENTS OF THE TRIUMPH OF THE HUMAN SPIRIT AWARD

### HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the recipients of the Triumph of the Human Spirit Award, which is sponsored by Hillside Rehabilitation Hospital of my 17th Congressional District of Ohio.

The Triumph of the Human Spirit Award is given to people who have faced physical or mental challenges and have overcome these difficulties. The people at the Hillside Rehabilitation Hospital feel that those who have faced the challenge of a disability or helped those faced with disabilities deserve special recognition.

There were three individuals and one organization that received the award this year. The first category of this award is the outstanding disabled individual: physical rehabilitation, and this year's recipient was Grant W. Jones. Mr. Jones was paralyzed in 1964 after an automobile accident. He has been instrumental in getting legislation passed requiring handicapped accessibility to buildings and sidewalks. Mr. Jones is the director of speech pathology and audiology at Hillside. Since he has taken over as director, he has increased his department from three to seven people thus enabling the department to serve a variety of patients' needs.

The second category is outstanding disabled individual: chemical dependency. The winner in this category was Michelle Jones, R.N. In 1984 Mrs. Jones entered an inpatient treatment center for her addiction to alcohol. Since that time she has been able to rebuild her life. She entered the nursing program at Kent State University, Trumbull Campus, in June 1985. In 1988 she finished her courses and subsequently passed her boards. Since that time she has been working at University Hospital where she is a clinical registered nurse and works on the medical/surgical floor.

The third catagory is outstanding community service: individual. The recipient in this category was Carl A. Nunziato. Mr. Nunziato served in Vietnam as a captain in the 25th Infantry. While on his second tour of duty, he was involved in a mortar attack in which he lost his left leg up to his knee and his right foot. He spent 23 months at Walter Reed Army Hospital in rehabilitation. He received the Purple Heart, the Bronze Star, Air Medal, Armed Forces Expeditionary Medal, National Defense Medal, Vietnam Service Medal, and the Vietnam Campaign Medal with three Battle Stars for his valiant effort. Mr. Nunziato entered Case Western Law School and received his J.D. in 1971. He is presently the vice president and corporate secretary for Dollar Savings and Trust Co. of Youngstown as well as corporate secretary of Ohio Bancorp. He is the cofounder of the Youngstown Chapter of the Governor's Subcommittee for Barrier Free Architecture. He has also received numerous civic awards, including Goodwill Industries Community Service Award, the Ohio Governor's Community Service Award, and the Outstanding Handicapped Ohioan.

The final award given was for outstanding community service: organization. The Rotary Club of Warren was this year's recipient of the award. Since its establishment in April 1920 the Rotary Club has been helping handicapped children. The club has undertaken a number of projects to help orthopedically handicapped children. It has saved Trumbull County and Warren city schools at least $11,000 on equipment purchased by the Rotary Club.

Mr. Speaker, I would like to take this opportunity to recognize the recipients of the Triumph of the Human Spirit Award. These three people and the Rotary Club of Warren have all shown outstanding dedication and compassion to the disabled of our community. Grant Jones, Michelle Jones, and Carl Nunziato have all overcome tremendous odds and hardships to get to the points they are today. They are shining examples of courage and

can be used as role models not only for other handicapped people but for all. I am proud to represent the recipients of this year's awards.

## BEGINNING FARMER AND RANCHER CREDIT ACT OF 1990

### HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. PENNY. Mr. Speaker, today I am introducing, along with Representatives TALLON, JOHNSON of South Dakota, DORGAN of North Dakota, GRANDY, STALLINGS, and TAUKE, the Beginning Farmer and Rancher Credit Act of 1990 to increase Farmers Home Administration [FmHA] farmer program borrower assistance to beginning farmers.

This legislation will: define a new category of FmHA-eligible beginning farmers and ranchers; create a market-placement mechanism for targeting assistance to eligible borrowers; leverage private farm ownership lending through a new FmHA down payment loan; limit total Government assistance to beginning farmers; and earmark funds for the beginning farmer programs.

Getting started in farming today is a difficult task, and young farmers are becoming few and far between. During the 1980's, financial conditions slowed entry into farming and forced many younger farmers and ranchers to leave agriculture. The USDA's Economic Research Service estimates that as a result of farm financial difficulties, nearly half of all farm assets are owned by farmers who will be likely to retire in the next 10 years. In my own State of Minnesota, the average age of farmers is nearly 60 years.

Traditionally, the Farmer Home Administration has provided credit assistance to beginning farmers and has helped to establish thousands of successful commercial farms and ranches. Recently, however, the FmHA has drifted away from its basic mission of providing modest and temporary credit assistance to beginning family-sized farms. During the difficult times of the 1980's, the FmHA used most of its resources to deal with the problems of previous agency and commercial borrowers, but largely ignored the credit needs of beginning farmers.

I believe that the Beginning Farmer and Rancher Credit Act would address these shortcomings in FmHA borrowing and would be an excellent addition to the 1990 farm bill. This legislation would create new opportunities for our young and aspiring farmers and help to maintain the American tradition of independent family farms.

The text of the bill is as follows:

H.R. 4857

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Beginning Farmer and Rancher Credit Act of 1990".

SEC. 2. FINDINGS AND STATEMENT OF PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) for decades the Federal Government, acting through the Farmers Home Administration, has provided credit assistance to beginning farmers and ranchers and has helped to establish hundreds of thousands of successful commercial farms and ranches;

(2) recently, the Farmers Home Administration has drifted away from its basic mission of providing modest and temporary credit assistance to beginning family-sized farms and ranches;

(3) during the 1980's, the Farmers Home Administration used most of its resources to deal with the problems of previous agency and commercial borrowers, but largely ignored the needs of beginning farmers and ranchers.

(4) recent reports show that credit is becoming increasingly unavailable to beginning farmers;

(5) in February 1990, the General Accounting Office issued a report, entitled "Farmers Home Administration: Use of Loan Funds by Farmer Program Borrowers", which indicated that 81 percent of all Farmers Home Administration lending during fiscal year 1988 went to previous commercial borrowers, and in September 1988, the Inspector General of the Department of Agriculture issued a report, entitled "Farmers Home Administration's Management of Farmer Program Guaranteed Loans Needs Improvement", which indicated that 99 percent of Farmers Home Administration farm program loan guarantees made between October 1, 1985, and June 7, 1987, were used to finance commercial borrowers;

(6) during the 1980's financial conditions slowed entry into agriculture and forced disproportionate numbers of younger farmers and ranchers to leave agriculture, and the Economic Research Service estimates that, as a result, nearly half of the farm assets in the United States is controlled by farmers who are likely to retire in the next 10 years;

(7) the demographics of agriculture in the United States requires the Federal Government to respond promptly to assist entry into agriculture, and promote the economic and social health of agriculture and the rural communities in which agriculture is based; and

(8) a new approach is needed to ensure that Farmers Home Administration lending to beginning farmers and ranchers is cost-effective, provides as many opportunities as possible for entry into agriculture, protects the interests of the Federal Government, helps beginning farmers and ranchers to establish viable farming and ranching operations, and enables beginning farmers and ranchers to obtain commercial credit as quickly as possible.

(b) STATEMENT OF PURPOSE.—The purpose of this Act is to assist qualified beginning farmers and ranchers in obtaining the financial assistance necessary to enter agriculture and establish viable farming and ranching operations, consistent with sound fiscal policy, by—

(1) requiring the Farmers Home Administration to—

(A) evaluate the credit needs of such farmers and ranchers;

(B) provide loan guarantees and interest assistance with respect to such farmers and ranchers, thereby enabling such farmers and ranchers to obtain loans from private lenders at lower effective interest rates than would otherwise be possible in order to carry out a financially viable farming plan; and

(C) provide direct loans to such farmers and ranchers if commercial loans are not available to such farmers or ranchers;

(2) allowing such farmers and ranchers to obtain loans from the Farmers Home Administration as part of the down payment on a farm or ranch, thereby assisting such farmers and ranchers in financing the acquisition of the farm or ranch;

(3) giving such farmers and ranchers first priority in the purchase or lease of Farmers Home Administration inventory property which is not purchased or leased by the previous owner or operator of the property or any member of the family of such owner or operator;

(4) placing strict limits on the annual and aggregate per borrower cost to the Federal Government of providing assistance to such farmers and ranchers; and

(5) requiring that a portion of the amounts authorized for fiscal years 1991 through 1995 for farm ownership and operating loans be used for making loans to such farmers and ranchers.

SEC. 3. MARKET PLACEMENT.

Section 351 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1999) is amended by adding at the end the following:

"(i)(1) Notwithstanding subsections (b), (c), and (d), the Secretary shall establish and carry out an interest rate reduction program under this subsection for loans to qualified beginning farmers and ranchers which are guaranteed under this title.

"(2)(A) The Secretary shall evaluate, in accordance with regulations to be prescribed by the Secretary, the farming plan and financial situation of each qualified beginning farmer or rancher who applies for assistance under this title, by determining the following:

"(i) The amount which the applicant will need to borrow to carry out the applicant's proposed farming plan.

"(ii) The rate of interest which the applicant would be able to pay on amounts borrowed to carry out the proposed farming plan.

"(iii) Whether or not the applicant's proposed farming plan is financially viable, and if not, the changes needed to produce a financially viable farming plan.

"(iv) Whether or not, and if so, the extent to which, the applicant will require the following kinds of assistance in order to obtain the financing required to carry out a financially viable farming plan:

"(I) Guarantees under section 309(h) to repay 90 percent of the principal and interest on loans to the applicant.

"(II) Interest assistance under this subsection to pay that portion of the interest payable on loans to the applicant which exceeds the amount that would be so payable if such interest were payable at the per annum rate determined under clause (ii);

"(B)(i) If the Secretry makes a positive determination with respect to an applicant under subparagraph (A)(iv), the Secretary shall prepare and circulate among lenders a packet containing the following:

"(I) The farming plan of, and financial information about, the applicant.

"(II) A statement that the Secretary has verified all of the financial information contained in the packet.

"(III) A description of the amounts of loan guarantees and interest assistance which the Secretary will provide to the applicant to enable the applicant to carry out a financially viable farming plan.

"(IV) The rate periodically determined by the Secretary to be the average per annum interest rate charged by commercial lenders in the area in which the applicant is located for loans the purpose and maturity of which

are similar to the purpose and maturity of the loan required by the applicant to carry out a financially viable farming plan.

"(V) A statement that if a lender (or a group of lenders) agrees to offer to loan the applicant the amount required for the applicant to carry out a financially viable farming plan at a per annum interest rate that does not exceed the average per annum interest rate described in clause (IV), and if the interest rate on the loan is lowest interest rate offered on similar loans to the applicant by other lenders (or groups of lenders), the Secretary will provide to the applicant the loan guarantees and the interest assistance with respect to the loan, in the amounts determined under subparagraph (A)(iv).

"(VI) All documents and related material required to enable the applicant to obtain the loan guarantees and interest assistance with respect to the loan, in the amounts determined under subparagraph (A)(iv).

"(ii) Each packet prepared under clause (i) shall offer interested lenders an opportunity to interview the applicant but shall not identify the applicant by name.

"(iii) The Secretary shall not require a farming plan to generate more than 105 percent (100 percent during the first 3 years of the plan) of the amount required to service the loans required under the plan in order for the plan to be considered financially viable.

"(iv) If the Secretary receives an offer described in clause (i)(V) with respect to the applicant, the Secretary shall enter into a contract with the lender (or group of lenders) involved to guarantee the repayment of 90 percent of the principal and interest payable on the loan involved, and make interest assistance payments to the lender, in amounts determined under subparagraph (A)(iv), in order to reduce during the term of the loan the interest rate payable by the applicant on the loan.

"(C) If the Secretary is unable to provide loan guarantees and interest assistance to the applicant under this subsection in amounts sufficient to enable the applicant to borrow from other sources the amounts required to carry out a financially viable farming plan, or if the Secretary does not receive an offer with respect to the applicant which meets the requirements of subparagraphs (B)(i)(V), the Secretary shall make—

"(i) an insured loan to the applicant under subtitle A or B, whichever is applicable, at the per annum interest rate determined under subparagraph (A)(ii); or

"(ii) a down payment loan to the applicant under section 310E.".

SEC. 4. DOWN PAYMENT LOAN PROGRAM.

"(a) IN GENERAL.—Subtitle A of the Consolidated Farm and Rural Development Act (7 U.S.C. 1922-1934) is amended by adding at the end the following:

"SEC. 310E. DOWN PAYMENT LOAN PROGRAM.

"(a) IN GENERAL.—Notwithstanding any other section of this subtitle, the Secretary shall use not less than 50 percent of the funds for farm ownership loans under this subtitle to make loans under this section to qualified beginning farmers and ranchers for down payments on farm ownership loans.

"(b) LOAN TERMS.—

"(1) PRINCIPAL.—Each loan made under this section shall be of an amount equal to 30 percent of the price of the farm or ranch to be acquired.

"(2) NO INTEREST.—The Secretary shall not charge interest on any loan made under this section.

"(3) DURATION.—Each loan under this section shall be made for a period of 10 years.

"(4) REPAYMENT.—Each borrower of a loan under this section shall repay to the Secretary 10 percent of the loan amount annually on each of the 1st 10 anniversaries of the date the loan is made.

"(5) NATURE OF RETAINED SECURITY INTEREST.—The Secretary shall retain an interest in each farm or ranch acquired with a loan made under this section, which shall—

"(A) be secured by the farm or ranch;

"(B) be junior only to such interests in the farm or ranch as may be conveyed at the time of acquisition to the person from whom the borrower obtained a loan used to acquire the farm or ranch; and

"(C) require the borrower to obtain the permission of the Secretary before the borrower may grant an additional security interest in the farm or ranch.

"(c) LIMITATIONS.—

"(1) BORROWERS REQUIRED TO MAKE MINIMUM DOWN PAYMENT.—The Secretary shall not make a loan under this section to any borrower with respect to a farm or ranch if the contribution of the borrower to the down payment on the farm or ranch will be less than 10 percent of the price of the farm or ranch.

"(2) MAXIMUM PRICE OF PROPERTY TO BE ACQUIRED.—The Secretary shall not make a loan under this section with respect to a farm or ranch the price of which exceeds the dollar amount specified in section 313(1) as the maximum amount of total principal indebtedness that may be outstanding at any one time for loan made under this subtitle to any borrower in the case of a loan other than a guaranteed loan.

"(3) PROHIBITED TYPES OF FINANCING.—The Secretary shall not make a loan under this section with respect to a farm or ranch if the farm or ranch is to be acquired with financing which contains any of the following conditions:

"(A) The financing is to be amortized over a period of less than 30 years.

"(B) A ballon payment will be due on the financing during the 10-year period beginning on the date the loan is to be made by the Secretary.

"(d) ADMINISTRATION.—The Secretary shall, to the maximum extent practicable—

"(1) facilitate the transfer of farms and ranches from retiring farmers and ranchers to persons eligible for insured loans under this subtitle;

"(2) make efforts to widely publicize the availability of loans under this section among—

"(A) potentially eligible recipients of such loans;

"(B) retiring farmers and ranchers; and

"(C) applicants for farm ownership loan under this subtitle;

"(3) encourage retiring farmers and ranchers to assist in the sale of their farms and ranches to qualified beginning farms and ranchers by providing seller financing; and

"(4) coordinate the loan program established by this section with State program that provide farm ownership or operating loans for beginning farmers.".

SEC. 5. INVENTORY LAND.

Section 335(e)(1)(C) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985(e)(1)(C)) is amended by redesignating clause (iv) as clause (vi) and by inserting after clause (iii) the following:

"(iv) Qualified beginning farmers and ranchers.

"(v) All other persons who are eligible for assistance under this title".

SEC. 6. LIMITATIONS ON ASSISTANCE FOR QUALIFIED BEGINNING FARMERS AND RANCHERS

The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) is amended by adding at the end the following:

"SEC. 359. LIMITATIONS ON ASSISTANCE FOR QUALIFIED BEGINNING FARMERS AND RANCHERS.

"(a) IN GENERAL.—Notwithstanding any other section of this title.

"(1) LIMITATIONS ON ASSISTANCE UNDER SUBTITLE A.—

"(A) ANNUAL LIMITATION.—The maximum cost of the assistance that the Secretary may provide under subtitle A to a qualified beginning farmer or rancher for a fiscal year shall be an amount equal to—

"(i) $100,000, multiplied by the sum of 1 and the percentage, determined by the Secretary, by which the average of the prices for which farmland in the United States is sold has changed during the period beginning with the fiscal year in which this section takes effect and ending with the fiscal year that immediately precedes the fiscal year for which the cost of assistance is calculated; multiplied by

"(ii) the amount (if any) by which 0.05 is exceeded by the lesser of—

"(I) the then current average (weighted by principal) market yield of outstanding marketable obligations of the United States having a maturity of 10 years; or

"(II) 0.14.

"(B) MAXIMUM COST OF ASSISTANCE.—The Secretary shall not provide additional assistance under subtitle A to a qualified beginning farmer or rancher for a year that occurs after the first 10 years the qualified beginning farmer or rancher is provided assistance under subtitle A if, after the provision of the additional assistance, the aggregate cost of all assistance provided under a subtitle A to the qualified beginning farmer or rancher would exceed the aggregate of the maximum amounts determined under subparagraph (A) for such 10 fiscal years.

"(2) LIMITATIONS ON ASSISTANCE UNDER SUBTITLE B.—

"(A) ANNUAL LIMITATION PER BORROWER.—The maximum cost of the assistance that the Secretary may provide under subtitle B to a qualified beginning farmer or rancher for a fiscal year shall be an amount equal to—

"(i) $100,000, multiplied by the sum of 1 and the percentage, determined by the Secretary, by which the average cost of producing agricultural commodities in the United States has changed during the period beginning with the fiscal year in which this section takes effect and ending with the fiscal year that immediately precedes the fiscal year for which the cost of assistance is calculated; multiplied by

"(ii) the amount (if any) by which 0.05 is exceeded by the lesser of—

"(I) the then current average (weighted by principal) market yield of outstanding marketable obligations of the United States having a maturity of 1 year; or

"(II) 0.13.

"(B) MAXIMUM COST OF ASSISTANCE.—The Secretary shall not provide additional assistance under subtitle B to a qualified beginning farmer or rancher for a year that occurs after the first 10 years the qualified beginning farmer or rancher is provided assistance under subtitle B if, after the provi-

sion of the additional assistance, the aggregate cost of all assistance provided under subtitle B to the qualified beginning farmer or rancher would exceed the aggregate of the maximum amounts determined under subparagraph (A) for such 10 fiscal years.

"(b) DETERMINATION OF COST OF ASSISTANCE.—The cost of assistance provided to a qualified beginning farmer or rancher under this title shall be determined as follows:

"(1) COST OF LOANS.—The cost of a loan for a fiscal year shall be—

"(A) the principal amount of the loan; multiplied by

"(B) the amount (if any) by which—

"(i) the lesser of—

"(I) the then current average (weighted by principal) market yield of outstanding marketable obligations of the United States having a maturity of 10 years; or

"(II) 0.14; exceeds

"(ii) the per annum interest rate payable by the borrower on the loan.

"(2) COST OF LOAN GUARANTEES.—The cost of a loan guarantee for a fiscal year shall be the amount (if any) paid by the Secretary to the lender during the fiscal year under a contract entered into pursuant to section 351(i).

"(c) SPECIAL RULE.—In determining the amount of assistance to be provided under subtitles A and B to a qualified beginning farmer or rancher, the Secretary shall ensure that the individual pays interest at a rate which is—

"(1) not greater than the per annum rate at which the individual can safely afford to pay such interest, taking into account farm operating costs and living expenses; and

"(2) not less than 5 percent per annum.".

SEC. 7. DEFINITION OF QUALIFIED BEGINNING FARMER OR RANCHER.

The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) is amended by adding after the section added by section 6 of this Act the following:

"SEC. 360. DEFINITION OF QUALIFIED BEGINNING FARMER OR RANCHER.

"As used in this Act, the term 'qualified beginning farmer or rancher' means an individual—

"(1) who is eligible for assistance under this title;

"(2) who is not farming or ranching, or who has operated a farm or ranch for not more than 10 years;

"(3)(A) in the case of an owner or operator of a farm or ranch, who, individually or with the immediate family of the owner or operator—

"(i) materially and substantially participates in the farm or ranch; and

"(ii) provides a majority of the day-to-day labor and management of the farm or ranch; and

"(B) In the case of an individual seeking to own or operate a farm or ranch, who, individually or with the immediate family of the individual, will—

"(i) materially and substantially participate in the farm or ranch; and

"(ii) provide a majority of the day-to-day labor and management of the farm or ranch;

"(4) who agrees to participate in such loan assessment, borrower training, and financial management programs as the Secretary may require;

"(5) whose net worth (including the net worth of the spouse and dependents (if any) of the individual) does not exceed $100,000, based on fair market value;

"(6) who does not own land or who, directly or through interests in family farm corporations, owns land the aggregate acreage of which does not exceed 15 percent of the median acreage of the farms in the county in which the individual is to obtain land is located, as reported in the most recent census of agriculture taken under section 142 of title 13, United States Code;

"(7) who controls, through ownership or lease, assets usable in farming or ranching the value of which does not exceed $400,000; and

"(8) who demonstrates that the available resources of the family of the individual are not sufficient to enable the individual to enter or continue farming or ranching on a viable scale.".

SEC. 8. NEW LOAN AND GUARANTEE AUTHORITY; SET ASIDE FOR LOANS AND GUARANTEES TO QUALIFIED BEGINNING FARMERS AND RANCHERS.

Section 346(b)(1) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1994(b)(1)) is amended—

(1) by amending subparagraphs (A), (B), and (C) to read as follows:

"(b)(1) For each of fiscal years 1991 through 1995, real estate and operating loans may be insured, made to be sold and insured, or guaranteed, in accordance with subtitles A and B, respectively, from the Agricultural Credit Insurance Fund established under section 309, in an amount equal to $3,700,000,000, as follows:

"(A) $1,600,000,000 shall be for insured loans, of which not less than $700,000,000 shall be for insured loans to qualified beginning farmers and ranchers.

"(B) $2,100,000,000 shall be for loan guarantees, of which not less than $825,000,000 shall be for guarantees of loans to qualified beginning farmers and ranchers.

"(2) Not less than $950,000,000 of the amounts allocated under paragraph (1) for insured loans and loan guarantees shall be used as follows:

"(A) Not less than $350,000,000 shall be for insured farm ownership loans under subtitle A, of which not less than $300,000,000 shall be for insured farm ownership loans for qualified beginning farmers and ranchers.

"(B) Not less than $600,000,000 shall be for guarantees of farm ownership loans, of which not less than $325,000,000 shall be for guarantees of insured farm ownership loans made to qualified beginning farmers and ranchers.

"(3) $100,000,000 of the amounts allocated under paragraph (1) for insured loans and loan guarantees shall be placed in a reserve and used solely for loans in response to localized natural disasters under subtitle C for persons eligible for assistance under subtitle B.

"(4) For each of the fiscal years set forth in paragraph (1), the Secretary may transfer not more than 25 percent of the amounts authorized for loan guarantees to amounts authorized for insured loans.";

(2) by striking subparagraph (D); and

(3) by redesignating subparagraph (E) and clauses (i), (ii), and (iii) of such subparagraph, as paragraph (5) and subparagraphs (A), (B), and (C), respectively.

## FEDERAL HELP NEEDED TO IMPROVE OSTEOPOROSIS AND OTHER BONE DISORDERS

### HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Ms. SNOWE. Mr. Speaker, today I am pleased to introduce the Osteoporosis and Related Bone Disorders Research, Education, and Health Services Act of 1990 and the Medicare Bone Mass Measurement Coverage Act of 1990. I feel that it is especially fitting to introduce these legislative proposals at this time which has been designated as "National Osteoporosis Prevention Week." Senators CHARLES GRASSLEY and JOHN GLENN, with whom I have collaborated for many years on osteoporosis and other issues affecting the elderly, are introducing these same bills in the U.S. Senate.

Osteoporosis, or porous bone, is a major debilitating disorder characterized by an excessive loss of bone tissue which highly increases the risk of bone fractures, particularly of the hip, neck, wrist and spine. It is a major public health problem, affecting at least 24 million Americans—almost half of all women over age 45, 90 percent of women over age 75 and many men as well. Because the disorder develops silently over many years with no symptoms, many people are unaware they have it until a suddent bump, strain or fall causes their weakened bones to break or their spinal vertebrae to collapse.

Osteoporosis is responsible for at least 1.3 million fractures in the United States each year, including 250,000 hip fractures, 500,000 vertebral fractures and 200,000 wrist fractures. Direct medical costs for the care of these fractures was estimated to be over $10 billion a year in 1988, with cases related to hip fractures accounting for over $7 billion. As hip fractures are concentrated in persons over age 65 and the rate of fracturing increases sharply with age, future costs of caring for hip fracture patients could reach between $30 and $60 billion by the year 2020 unless effective prevention and treatment is found for the disease.

Unnecessary death from hip fractures is the most tragic consequence of osteoporosis. The mortality rate from hip fractures is an alarming 12 to 20 percent, particularly affecting elderly women. Of those who survive a hip fracture, 20 percent will need nursing home care, often for the rest of their lives. Over one-fifth will be unable to walk for at least a year and many will never walk again.

With the rapid expansion of the older population in the next century, a high rate of older persons are expected to survive into their eighties and nineties because of declining deaths from strokes and heart disease. Moreover, according to the lead article in the May 2, 1990 issue of the Journal of the American Medical Association, without major advances in prevention and treatment, the costs of caring for the increased number of hip fracture and dementia patients in this old-old age group will soar dramatically. The researchers concluded that, in today's difficult financial cli-

mate, a "positive approach to reducing health care costs is to mobilize research resources on common diseases and disorders that lead to long-term disability in the oldest old."

The legislation which I am introducing, the "Osteoporosis and Related Bone Disorders Research, Education, and Health Services Act of 1990" will expand, intensify and coordinate Federal research on osteoporosis. Although there have been significant advances in osteoporosis research, lack of funding has resulted in a very low award rate for research grants on osteoporosis at the National Institutes of Health. Much of the basic research on the causes of osteoporosis and risk factors that can be modified is yet to be done. Research on promising treatments to restore bone loss and to prevent further bone loss must also be expanded and tested in clinical trials. Therefore, this bill would authorize an additional $36 million in Federal funding for osteoporosis research.

In addition, the bill would establish: First, an Interagency Council on Osteoporosis and Related Bone Disorders within the Department of Health and Human Services to promote and coordinate research, education and health promotion programs; second, an advisory panel on osteoporosis and related disorders, of non-Federal experts on the disease, which would make recommendations on biomedical research, health promotion and services, and education to Congress and the Secretary of the Department of Health and Human Services; third, grants for three model education, health promotion and disease prevention projects for the following target populations: young and teenage girls, midlife women, older men and women; and fourth, a resource center on osteoporosis and related disorders to compile and disseminate information about research results, services and educational materials to health professionals, patients and the public.

I am also introducing the Medicare Bone Mass Measurement Coverage Act of 1990 to expand Medicare coverage for diagnostic testing of osteoporosis. Bone mass measurement is the only accurate way to detect and diagnose low bone mass in order to assess the risk of fracture and select therapy to prevent further loss. Currently, the Health Care Financing Administration [HCFA] only covers reimbursement for bone mass measurement for single photon absorptiometry which has been surpassed for several years by more sophisticated, cost-effective and accurate technologies.

Years of review and reliance on obsolete data have continually delayed HCFA approval of newer bone mass measurement technologies which have been wholeheartedly endorsed by the scientific community. My bill limits Medicare reimbursement for updated bone measurement technologies to four groups which are most at-risk to have or develop osteoporosis and, therefore, most at-risk for developing fractures. As such, the following target groups would be covered: First, estrogen-deficient women at clinical risk for osteoporosis; second, individuals with vertebral abnormalities, such as compression fractures; third, individuals receiving long-term glucocorticoid steroid therapy; and fourth, individuals with primary hyperparathyroidism.

I anticipate that the impact of the cost of such coverage on Medicare expenditures would be very low or budget neutral and would produce small savings in the short run. In the long run, Medicare and long-term care savings would be substantial if a large share of the direct medical, hospital and nursing home costs for fractures of osteoporosis patients could be prevented. In addition, Medicare will benefit as insurance companies are likely to follow Medicare's lead and extend coverage for these updated bone measurement technologies to women under age 65. This would result in cost savings to the Medicare Program as the disorder could be detected at an earlier age when prevention is still possible.

Mr. Speaker, I believe that a major Federal commitment must be made in order to overcome the high human and fiscal costs of osteoporosis. The pain, suffering, immobility and deaths due to bone weakening and fracturing could be substantially reduced and hopefully eventually eliminated through enhanced biomedical research and prevention and treatment programs. I believe that the legislation which I am introducing today is a significant step toward these goals and I urge support for its provisions.

## A TRIBUTE TO THE MAYNARD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Maynard Police Department for their dedicated and outstanding service to the people of Maynard, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Maynard Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order, that our neighborhoods are not held hostage to the threats of criminals, and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service of your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say "thanks" for a job well done. Let us take this time to recognize the contributions of Chief Arner S. Tibbets and those who serve in the Maynard Police Department:

Alfred T. Whitney, Jr., James Corcoran, Edwin Grierson, Philip Graven, John Callahan, James Dawson, Charles Walsh, Stephen Jones, Allan Alappas, Mark Knowlton.

Edward Byrne, Edward Lawton, Patrick Currin, Douglas Macglashing, Thomas Natoli, John Kaziukonis, Karl Nyholm, Clifford Wilson, Mary McCue, Douglas Tucker.

## BILL McCOLLAM GIVES UP HELM AT EEI

### HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mrs. BOGGS. Mr. Speaker, on April 30 a very good friend of mine from New Orleans, William McCollam retired as president of the Edison Electric Institute. A leader in the electric utility industry during a challenging transition period, Bill McCollam will continue his valuable service to the industry as president emeritus of EEI with a special responsibility for expanding the organization's role in the increasingly important international arena.

Bill McCollam became president of the institute, the national association of investor-owned electric utility companies, in April 1978. His first major assignment was to merge EEI and the National Association of Electric Companies, then move the new organization from New York City to Washington, DC.

The successful completion of this important transition displayed two characteristics that would mark his stewardship: a continual striving for greater efficiency in serving the industry, its customers and investors; and an emphasis on affirmative, forward-looking Government relations, public communications, and technical programs.

During McCollam's tenure at EEI, the industry had to adapt to the effects of several fuel supply crises, numerous new environmental regulations, and public concern about the safety of nuclear energy; as well as to important regulatory changes affecting power transmission, coal transportation, and investment risk. It is a tribute to his executive ability and his effectiveness in the corridors of power that the industry today is much better positioned to serve the American people than it was a decade ago.

Bill McCollam will be remembered not only for his role in establishing the electric power industry as a respected, credible organization in Washington, but also for helping the public understand the Nation's energy needs, and the role of electric power in meeting those needs.

McCollam began his career in the industry with Arkansas Power & Light Co. in 1961. After 9 years at AP&L in various executive capacities, including vice president and senior vice president, he joined New Orleans Public Service Inc. [NOPSI] as executive vice president in July, 1970. He was elected president in April 1971, a position he held until moving to EEI.

While president of New Orleans Public Service, McCollam became chairman of the North American Electric Reliability Council [NERC], which consists of nine regional reliability councils encompassing the power systems of the United States and four Canadian provinces. He is a past chairman of the Southwest Power Pool.

Both as chairman of NERC and as a representative of Middle South Utilities—the parent

company of AP&L and NOPSI, now known as Entergy Corp.—McCollam was a frequent spokesman for the Nation's electric utility systems on questions of national, regional, and State energy policy.

A native of New Orleans, McCollam holds B.S. degrees from Louisiana State University and the U.S. Military Academy, and an M.S. in engineering from MIT. He is also a graduate of the U.S. Army Command and General Staff College. He served in the Army Corps of Engineers from 1946 to 1961, rising to lieutenant colonel prior to joining AP&L.

A registered professional engineer—New York—and a former member of the Louisiana Engineering Society, he received the organization's A.B. Paterson Award in 1975 for managerial achievement in an executive position. He was also installed as a member of the Louisiana State University Alumni Hall of Distinction in 1985.

Active in community affairs in New Orleans, he was president—now chairman—of the Chamber of Commerce of the New Orleans Area; served on the executive board of the New Orleans Area Council, Boy Scouts of America; was on the Business School Council of Tulane University's Graduate School of Business Administration and the university's president's council; and was a director of Loyola University, the New Orleans Philharmonic Symphony Society, and the New Orleans Chapter of the American Red Cross.

He presently serves on the boards of the Advanced Reactor Corp., the Alliance to Save Energy, and the Thomas Alva Edison Foundation.

He is married to the former Hope Flower Joffrion. They have three children: a daughter, the Reverend Dr. Ellendale McCollam Hoffman, Old Saybrook, CT; and two sons, William C. of Galveston, TX, and Dr. Stephen M. of Atlanta, GA.

Bill's career has been one of dedication to the electric utility industry and to making this Nation a better place by working to develop the power resource the American people need and expect to power their factories, to light their cities, and to make the modern conveniences in their homes a reality. I salute him and thank him for his service.

## TRIBUTE TO REV. JOHN J. DEMKOVICH ON THE SILVER ANNIVERSARY OF HIS ORDINATION

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ROE. Mr. Speaker, on Sunday, June 3, residents of my Eighth Congressional District and the State of New Jersey will join the parish community of St. Mary's Assumption Roman Catholic Slovak Church of Passaic, NJ, and Rev. John J. Demkovich in celebration of the 25th anniversary of his consecration into the sacrament of holy orders.

Mr. Speaker, the faith and devotion of our people in a full communion of understanding—ever caring and respecting the individual beliefs of our fellowman has been the lifeline of our democracy—ever inspiring our people with hope and urging the individual on to great achievements and purposes in pursuing the fulfillment of his or her dreams and ambitions. The exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream and today we express our appreciation to Rev. John J. Demkovich, whose esteemed dedication and unselfish devotion in promulgating spiritual guidance, good will, fellowship, and brotherhood in service to God have truly enriched our community, State, and Nation.

Reverend Demkovich has maintained the highest standards of excellence throughout his lifetime and we are pleased to share the price of his family, many friends and parishioners in the distinguished achievements so unselfishly dedicated to the betterment of mankind. There is so much that can be said of the love, affection, and reverence with which Reverend Demkovich is held by all who have had the good fortune to know him.

Mr. Speaker, we are so proud to have Reverend Demkovich with us in Passaic, NJ. He is the pastor of St. Mary's Assumption Roman Catholic Slovak Church, where he has served in that position for 19 devoted and faithful years. Prior to coming to St. Mary's Assumption in 1971, he served at Holy Trinity of Passaic, St. Mary's Assumption of Denville and St. Margaret's of Morristown.

Reverend Demkovich attended schools in New Brunswick, NJ, graduating from New Brunswick High School in 1951. He began his undergraduate work at Rutgers University and eventually entered Christ the King Seminary at St. Bonaventure University in Olean, NY, where he received his B.A. degree in philosophy.

Mr. Speaker, Reverend Demkovich was active as a missionary, having been accepted as a novice with the Missionaries of Africa in 1958 before attending the White Fathers Seminary at Ottawa, Canada. He eventually came to the diocese of Paterson as a student in 1964 and was ordained May 29, 1965, after finishing his deacon year at Theological College of Catholic University of America in Washington, DC.

Among his many activities, Reverend Demkovich has served as advocate for the diocesan Marriage Tribunal; confessor of Carmel in Morristown, NJ; spiritual director for the Paterson-Curia of the Legion of Mary; diocesan liaison to the National Shrine of the Immaculate Conception, and the diocesan pilgrimage director.

Reverend Demkovich has also been active in the Healing Ministry in Charismatic Renewal. He has also given retreats in the New Jersey-New York metropolitan area and has served as assistant director of the FIAT Rosary Devotion for the United States and Canada.

Mr. Speaker, as Reverend Demkovich celebrates the 25th anniversary of his ordination to the priesthood, I know that you and all of our colleagues here in the Congress will want to join me in extending our warmest greetings and felicitations for the excellence of his service to his church, our Nation, and all mankind. We do indeed salute an esteemed pastor, exemplary clergyman, and great American—Rev. John J. Demkovich, pastor of St. Mary's Assumption Roman Catholic Slovak Church of Passaic, NJ.

## A TRIBUTE TO THE LAWRENCE POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Officer's Week to pay tribute to the Lawrence Police Department for their dedicated and outstanding service to the people of Lawrence, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Lawrence Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Allan W. Cole, Jr., and those who serve in the Lawrence Police Department:

Thomas M. Nastasia, Samuel P. Aliano, Ronald J. Poirier, Frank J. Incropera, Joseph A. St. Germain, Gregory Panagiatakos, Daniel N. Fournier, Herbert G. Baker, Robert F. Blackwell, Joseph W.L. Ouellette, Robert J. Blanchette, Samuel J. Coco.

Emil V. DeFusco, Walter A. Soriano, David G. Kelley, Alfred J. Petralia, Calvin W. Hall, Anthony F. Palmigiano, Michael S. Molchan, Stanley F. Bachta, Daniel M. Foley, William C. Hale, Joseph R. Hamman, Justin T. Hart, Gene G. Hatem.

Victor A. Hidish, James Houlihan, Alberto M. Inostroza, Robert T. Jackson, Ronald W. Jansky, Terry M. Kalil, Paul Karamourtopoulos, Richard J. Kirkham, Michael A. Laird, Jeffrey D. Lannon, William A. Lees, David M. Levesque, Timothy J. Levesque, Anthony R. Lorenzo.

Joss Linares, John F. Lundy, John J. McDonald, Harold M. Maldonado, Denise E. McFarland, Jose Martinez, Charles T. Midolo, Michael A. Misserville, Paul V. Misserville, Lawrence F. Moolic, Thomas K. Mooney, Victor Morales, Dennis M. Murphy, Thomas J. Murphy.

Salvatore T. Nitto, Louis C. Napoli, Robert J. Nochnuk, Richard F. O'Connell, David Padellaro, Michael Padellaro, Donald F. Pappalardo, Neil Perocchi, William B. Pedrick, Denis Pierce, Paul M. Plantamura, Ronald E. Plourde, Horace Privitera.

Michael Phair, Leonard F. Quaglietta, Mark F. Rivet, John V. Reilly, John Rogers, Rosario

Rubino, Paul P. Ruggiero, John Sapienze, Raymond W. Smith, Clayton M. Soucie, Edgar R. St. Onge, Paul J. Sutton, Stephen Takesian.

Wayne Taylor, James A. Thomas, Lawrence P. Viens, Anthony Vallante, Arthur W. Waller, Joseph H. Welch, Thomas M. Wolfendale, William E. Wolfindale, Willy F. Arlesqueeuw, David Augusta, William J. Augusta, William J. Beck, Donald A. Beveridge, Frank A. Biancardi.

John H. Blais, Elaine M. Boucher, Sean Burke, Brian W. Burokas, Kevin G. Callahan, Miguel A. Carattini, Michael J. Carelli, Charles M. Carroll, Thomas J. Carroll, Robert R. Castonguay, Salvatore A. Coco, James Crocker, Donald M. Cronin, Edmund S. Daher.

Emil DeFusco, John R. DeSantis, Ronald J. DeSantis, Arthur J. Deshaies, Calvin A. Deyermond, Dana M. DiFiore, Philip J. DiGloria, Sean Dugan, John D. Edwards, Robert C. Farrington, William M. Fleming, Frank M. Giarusso, Joseph J. Girgenti.

Carlos Gonzalez, Robert R. Grant, Clarence P. Grenier, Alan N. Andrews, Mary R. Bartlett, Melix Bonilla, Richard Brooks, Michael P. Driscoll, Jose A. Flores, Jr., John D. Fornesi, William C. Hale, Jr., Rafael Rosa, Michael Saffie.

## MEET THE PROFESSOR: DR. SEAN BURKE

### HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GONZALEZ. Mr. Speaker, and my distinguished colleagues, if you are over 30 years old, and have spent at least half of those years in San Antonio, then it is almost certain you know "The Professor."

To expand a bit, geographically speaking, if you are of Irish descent and belong to Irish American organizations, then you, too, probably know "The Professor."

Dr. Sean Burke, professor of philosophy at Incarnate Word College, hosted San Antonio television's longest running community service program, "Meet the Professor," for 22 years.

In the fall of 1989, when Dr. Burke celebrated 35 years of teaching at Incarnate Word College, the college published his first book, "Meet the Professor."

The collection of essays, lecture notes, and television scripts pay tribute to Dr. Burke's years of teaching and community service. "Meet the Professor" was edited by two of Dr. Burke's Incarnate Word College colleagues, Dr. Robert Connelly, professor of philosophy, and Dr. Larry Hufford, professor of history and politics.

"Meet the Professor" has received rave reviews from members of the San Antonio press. One writer, Bryce Milligan, book critic for the San Antonio Light newspaper—and who is also of Irish descent—said "the volume represents the core tenets upon which Burke has built his philosophical house. Far from reading like a dry philosophical tome of point-by-point argument * * *—the book—is a lively and point presentation of traditional Catholic beliefs and values stated in the context of modernity."

A native of Dublin, Ireland, Sean Burke was educated at Blackrock College and the Belmont School of Philosophy, both in Dublin, and the Catholic University of America here in Washington. He also holds a licentiate and a doctorate of philosophy from Laval University, Quebec, Canada. His licentiate thesis was titled "Nature of the Intelligible Species," and his doctoral dissertation was titled "Concerning Ryle's 'Knowing How and Knowing That'."

Dr. Burke has taught full or part-time at Laval; Marianapolis College, Montreal, Canada; St. Francis Xavier University, Nova Scotia; St. Mary's College, Xavier, KS; the Federal Penitentiary, Leavenworth, KS; St. Mary's University and Our Lady of the Lake University, both at San Antonio, before he joined the faculty in 1955 of San Antonio's Incarnate Word College.

During his tenure at IWC, Dr. Burke has been a member of board of trustees, a member of the development board since its inception, and the college's Centennial Committee. He has also been president of the Faculty Association, member of the Rank and Tenure Committee, moderator of student government, and a member of the Student Publications Advisory Board.

Dr. Burke has been cited by the Texas Legislature for his community service activities, and by the city of San Antonio for his contributions as an educator, lecturer, writer, journalist, and advisor.

During his 22 years as host/moderator of the Community Service Television Program, "Meet the Professor," later called "Rap Around," on Station KMOL-TV, students from Incarnate Word College and guest speakers met informally to discuss topics of interest to the younger generation. Dr. Burke has been host to such prominent figures as Archbishop Fulton J. Sheen, Cardinal Tomas O'Fiaich, Broness Maria Von Trapp, Sean McBride, Pat O'Brien, and numerous other civic, educational, and religious leaders. Prior to "Meet the Professor," Dr. Burke moderated "Catholic World Report," another community service program on KSAT-TV, also in San Antonio.

Pope Paul VI conferred on Dr. Burke the dignity of "Knight of St. Gregory the Great." Pope John Paul II elevated him to the rank of "Knight Commander," and made him and his wife, Margaret, "Knights of the Holy Sepulcre." He is a member of the Knights of Columbus—4th degree—and the Order of Alhambra.

Dr. Burke was a founding member and vice president of the University Round Table of San Antonio. Very active in Irish cultural activities, he was one of the founders of the Harp and Shamrock Society of Texas. He has been Texas State chairman of the Catholic Activities Committee of the Ancient Order of Hiberians. He has served as program chairman of the Irish Cultural Society. He is also a member of numerous other local and national organizations.

Dr. Burke is in constant demand as a public speaker. His publications range from professional journals to articles in the general press. He has written articles on the Irish and Irish-Americans for the "San Antonio Express/News" for 26 years.

Dr. Burke and his wife, Margaret, also a native of Ireland, have one daughter, Eileen.

Currently Dr. Burke is preparing for philosophy courses he will be teachng this summer at Incarnate Word College. No doubt the numbers are in the millions in terms of the lives of people that have been touched by the immortal words of Dr. Sean Burke.

Both his words and his friendship have certainly touched mine.

## CONGRESSMAN MAVROULES SALUTES DR. RYSZARD GAJEWSKI

### HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MAVROULES. Mr. Speaker, at the end of this month, the Small Business Innovation Research Program [SBIR] will be losing one of its strongest advocates—Dr. Ryszard Gajewski. As director of the Department of Energy's SBIR Program, Dr. Gajewski established the first SBIR Program under the 1982 statute. In that capacity, he also developed a system that guaranteed funding continuity between the first two phases of the program; overcoming the critical funding gap that concerned the many small high technology firms participating in the SBIR Program.

Dr. Gajewski played a very important role in the success of the DOE's SBIR Program. Through his efforts and dedication to scientific and technical excellence, the DOE was able to foster productive, high quality small business research initiatives that were selected on merit and were aimed at furthering the Department's mission.

His leadership and creativity earned him the respect of his colleagues in the other Federal agencies with SBIR Programs, as well as the respect of the small business community.

Dr. Gajewski's enthusiasm for the SBIR Program and the achievements of small high technology firms is well known. I understand that now he will be continuing to put his expertise to good use with one of those very SBIR companies.

While the SBIR Program and the Department of Energy is losing a strong advocate, I am sure that we will continue to hear great things about Dr. Ryszard Gajewski in his new venture.

## A TRIBUTE TO THE SUDBURY POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Sudbury Police Department for their dedicated and outstanding service to the people of Sudbury, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Sudbury Police Department—

the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

To often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Peter Lembo and those who serve in the Sudbury Policy Department.

William Carroll, Ronald Nix, Peter Fadgen, Peter Langmaid, Bruce Noah, Ronald Conrado, Todd Eadie, Jeffrey Gogan, Alan Houghton, John Longo, Neil McGilvary, Michael Shaughnessy.

John Skinnion, Raymond Spinelli, Thomas Miller, George Burney, Anthony Deldon, Mark Gainer, John Harris, Alan Hutchinson, Michael Lucas, Charles Quinn, Wayne Shurling, Timothy Smith, Laura Zaccone.

## TRIBUTE TO DR. EMERSON CLEVELAND WATSON, JR.

### HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. TALLON. Mr. Speaker, I am pleased to commend Dr. Emerson Cleveland Watson, Jr., for his years of commitment to the South Carolina Baptist Convention. Dr. Watson retired from his position of executive assistant to the executive secretary-treasurer to the general board of the South Carolina Baptist Convention in June 1988 and has continued to serve the organization as general consultant. On June 28, he will retire from this position.

Dr. Watson learned early on from his family the importance of religion and values. His father was a farmer and an ordained deacon in the Baptist Church. Growing up in the Watson home was a happy life and Dr. Watson absorbed the love that his parents, siblings, and friends offered.

During his young years, Dr Watson was heavily involved in his local church near Lumberton, N.C. He was baptized in that church and taught Sunday school there from the time that he was 15 years old. Dr. Watson got his call to the ministery the summer before he was to enter college, and was licensed to preach by the Ingold Baptist Church in 1940.

Throughout his career, Dr. Watson has continued hs religious studies in pastoral education, personnel management, counseling of the alcoholic, understanding of the rural church and others.

Dr. Watson's 50-year career in the ministry has taken him from North Carolina to Kentucky to South Carolina. In every parish, he has brought his infectious enthusiasm and his quiet leadership. He has been respected and loved by every sector of his church community for his innate ability to identify with every possible segment of the church.

In his present position, Dr. Watson has provided assistance to the executive secretary-treasurer of the S.C. Baptist Convention in planning and coordination of programs assigned to the general board staff, Christian life and public affairs issues, and in general oversight of convention organizational life. He has brought a unique insight to this position and all who have contact with him know him as a can-do type of person. No job is too big and no person or problem too small for him to tackle.

I commend Dr. Watson for his years of service to mankind, and send my best wishes and congratulations on his retirement. Enjoy it—you deserve it.

## STATE-SPONSORED SPORTS LOTTERIES PROHIBITION LEGISLATION

### HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BRYANT. Mr. Speaker, today I am introducing three bills designed to blunt the spread of a very disturbing trend—State-sponsored or authorized lotteries based upon games of professional sports.

The first bill, the State-sponsored Professional and Amateur Sports Lottery Prohibition Act, would prohibit states from operating, authorizing, sponsoring, advertising, or promoting any lottery, sweepstakes or other betting or gambling scheme based, directly or indirectly, on professional or amateur sporting events.

The second bill, the State-controlled Sports Lottery Clarification Act of 1990, will clarify the provisions of title 18 of the United States Code which exempt State-conducted lotteries from the criminal code's prohibitions. The bill will make it clear that lotteries based on point spreads and other schemes that are tantamount to betting on professional sports are prohibited.

The third bill, the Sports Service Mark Anti-Corruption Act of 1990, previously introduced in the Senate by Senators DECONCINI and HATCH, will clarify our trademark laws to prohibit State and local governments from misappropriating the intellectual property rights of professional sports organizations in order to create sports lotteries.

The State-sponsored Professional and Amateur Sports Lottery Prohibition Act would deny all Federal funding to any State—meaning any of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Trust Territories of the Pacific Islands, or any other territory or possession of the United States, including Indian tribes.

The State-Controlled Sports Lottery Clarification Act of 1990, clarifies that any State-sanctioned lotteries based on professional or amateur sports are subject to all the Federal prohibitions against lotteries, including radio and television advertising, transportation of lottery tickets across State lines and in international commerce and using the U.S. Postal Service to deliver either lottery tickets or advertisements.

This clarification is necessary since the U.S. Department of Justice has very narrowly read section 1308 of title 18 of the United States Code which should prohibit the types of lotteries proposed by the District of Columbia, Lottery Board and already in operation in Oregon.

In recent years, the Congress has loosened such prohibitions on State-sponsored lotteries. That is why here in the Washington, DC area we can hear and see advertisements for various Maryland, Virginia, and D.C. lottery games on radio and TV. Had the District of Columbia persisted in its stated plan to implement a professional or amateur sports-based lottery, all such advertisement would have been prohibited.

The District of Columbia, and any other State, local or municipal jurisdiction which sponsors lotteries based on the outcome of professional or amateur sporting events, will be prohibited from using radio or TV spots to advertise such lotteries, using the U.S. mail for delivering lottery tickets or advertisements, and will not be able to transport lottery tickets in interstate or foreign commerce.

The Sports Service Mark Anti-Corruption Act of 1990 corrects the problem of sports lotteries essentially being free-riders on the intellectual property rights of professional teams and their leagues. The only reasons sports lotteries can exist is because of the successful efforts of the sports teams and leagues to keep the games honest and clean and to promote them often through identification with a service mark. It is wrong to allow States simply to appropriate these efforts and these trademarks for their own gain.

Sports lotteries fundamentally threaten public confidence in, and the integrity of, professional athletics. Anyone who knows the history of athletics in this country realizes that professional and amateur teams and their organizations have fought hard during this century to prevent gambling from corrupting the games. From the Black Sox scandal in 1919 through the point shaving scandal at Boston College about 10 years ago to the sad developments regarding Pete Rose and the recent allegations involving North Carolina State University's basketball team—again and again, gambling has come close to corrupting athletes.

But, what has gone on in the past would be nothing compared to abuses created by State-sponsored sports lotteries. Government-sponsored sports lotteries are both quantitatively and qualitatively different and more worrisome that any gambling activity that has impacted lotteries to date. Permitting State and local governments to make a national business from sports gambling dramatically increases the opportunity to gamble on sports events, the amount of money involved in such events, and the amount of advertising dollars that will focus on such events.

The increase in the amount of sports gambling as a result of government-sponsored sports lotteries will inevitably lead to greatly increased pressures that corrupt athletes and coaches. It is simple common sense that the pressures to cheat increase markedly when

the mothers, fathers, siblings, and friends of players and coaches are gambling regularly on sports events.

There is a major difference between team-sport betting and a typical lottery. Typical lotteries are inherently a gambling vehicle that exists by reason of pure chance. Sports lotteries are entirely different, involving coaches and athletes who, unlike numbers, are subject to temptation and whose performances can have an impact on the game and thus the outcome of the bet.

Even more important, State lotteries not only increase the amount of gambling on sports events, they give the Government's, stamp of approval to this kind of activity.

Public attention is focused away from what is good about American athletics. The games will no longer be prized as opportunities to see just how far the human spirit and human body can take us. Rather, the entertainment will be not the team, but the opportunity to gamble.

One testimony to how highly esteemed team sports are in this country is how they are referred to in common parlance. It is not by accident that sports, in general, and professional sports, in particular, have come to represent various principles of the American dream. Metaphors such as "the level playing field;" maxims such as "It is not whether you win or lose, but how you play the game;" canons about the value of teamwork are all sports derivative. These are examples of the high level of trust and affection sports represent in our culture.

Do we really want to throw all this away? Do we really want to send a message to our young people that anything goes when you raise revenue? As long as the State gets a cut in the activity, it is just fine.

As one sports writer put it, do we want to "indoctrinate these kids that it isn't winning the game that counts, but winning the bet: that it isn't playing the best you can that counts, but whether you cover the point spread."

I urge my colleagues to join me in this effort to prohibit States from making the entertainment of professional and amateur sporting events the point spread and gambling as opposed to the excitement and challenge of the contest based on skill.

Mr. Speaker, I believe we are at important crossroads. Congress has a choice to work to stop sports gambling now or see it corrupt one of our most cherished American traditions. I ask my fellow Congressmen to join me and act swiftly to resolve this problem.

Copies of bills to follow:

H.R. —

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "State-Sponsored Professional and Amateur Sports Lottery Prohibition Act".

SEC. 2. PROHIBITION AGAINST STATE-SPONSORED BETTING ON SPORTS.

(a) RESTRICTION.—Notwithstanding any other provision of law, no State (or political subdivision of a State) may operate, authorize, sponsor, advertise, or promote any lottery, sweepstakes, or other betting or gambling scheme based, directly or indirectly, on professional or amateur sporting events.

(b) WITHDRAWAL OF FEDERAL FUNDS.—No Federal agency or instrumentality may provide funds to any State that—

(1) fails to comply with subsection (a); or

(2) has a political subdivision within its boundaries that fails to comply with subsection (a).

(c) DEFINITION.—For purposes of this Act, the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Trust Territories of the Pacific Islands, or any other territory or possession of the United States. Such term also includes an Indian tribe.

H.R. —

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be referred to as the "State-Conducted Lotteries Clarification Act of 1990."

SEC. 2.

Chapter 61 of Title 18, Section 1307, United States Code is amended—

(1) in subsection (a)(1) by inserting ", except a sports-related lottery," after "lottery";

(2) in subsection (a)(2) by inserting ", except a sports-related lottery," after "lottery";

(3) In subsection (d) striking "'Lottery' does not include the placing or accepting of bets or wagers on sporting events or contests";

(4) by adding a new subsection (e) "Provided, however, the provisions of Section 1307(a) shall not apply to a sports-related lottery that involves the placing of bets or wagers, or otherwise is based directly or indirectly on the games of a professional or amateur sporting event or contest." For the purposes of this section, "sports-related lottery" is defined as an undertaking that involves both chance selections and the outcome of a professional or amateur sporting game or games as elements of the undertaking.

H.R. —

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be referred to as the "Sports Service Mark Anti-Corruption Act of 1990".

SEC. 2. PROHIBITION OF MISAPPROPRIATION OF SERVICE MARKS OF PROFESSIONAL SPORTS ORGANIZATIONS BY STATE LOTTERIES.

The Act entitled "An Act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes," approved July 5, 1946 (15 U.S.C. 1051 et seq.; commonly known as the Trademark Act of 1946) is amended by inserting after section 39 the following new section:

"SEC. 40. PROHIBITION OF MISAPPROPRIATION OF SERVICE MARKS OF PROFESSIONAL SPORTS ORGANIZATIONS BY STATE LOTTERIES.

"(a) IN GENERAL.—No State or other jurisdiction of the United States (or any political subdivision or agency of such State or other jurisdiction) may sponsor, operate, advertise, or promote any lottery, sweepstakes, or other betting or gambling scheme that uses or exploits in any fashion, directly or indirectly, a service mark owned by a professional sports organization.

"(b) USE STANDARD.—For purposes of subsection (a), a lottery, sweepstakes, or the betting or gambling scheme that is based, directly or indirectly, on games of a professional sports organization shall be deemed to use of exploit the services mark owned by the professional sports organization.

"(c) DEFINITION.—For purposes of this section, the term 'professional sports organization' means any person who owns and operates a professional sports team engaged in providing entertainment by playing competitive games, and any league or other association of such persons.".

## A TRIBUTE TO THE WAYLAND POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Wayland Police Department for their dedicated and outstanding service to the people of Wayland, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Wayland Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service for your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Thomas J. O'Laughlin and those who serve in the Wayland Police Department:

Gerald J. Galvin, William Bradford, Bruce Cook, James Forti, Edward Mallard, Stephen McDonough, Sandra O'Brian, Victor Porokopovich, Daniel Sauro, Stephen Williams.

Charles Akins, Ruth Backman, David Connoly, George Driscoll, McKenzie Lamb, Richard Manley, George Norton, Robert Parker, Stephen Rizzo, Arthur Walch.

## HAMPTON HIGH SCHOOL STUDENTS NATIONAL FINALISTS

### HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. WALGREN. Mr. Speaker, when Vaclav Havel, the new President of Czechoslovakia addressed a joint session of Congress only a few months ago, he said, "It is easy to have independence * * * and then leave others to carry [it] out. If everyone thought that way, pretty soon there would be no independence."

Our obligation to be informed, active citizens, grounded in the values and principles upon which our States and Nation were founded, is an obligation to ourselves, our children, and all those around the world who, in the words of the Declaration of Independence, are risking their "lives, fortunes, and sacred honor" in the pursuit of liberty—just as our forebearers did at Bunker Hill, Gettysburg, in wars abroad, and in the streets of Selma.

All of us are aware of the starling statistics of voter apathy in the United States and of the irony that so many abroad look to us for inspiration in pursuit of the right to vote. That irony is compounded when it comes to the lack of knowledge of the U.S. Constitution and its importance in our lives.

It is heartening to know that there are dedicated educators throughout our Nation working together to create the informed citizenry the founders knew was an essential component of our "experiment in Republicanism."

I am proud today to honor such an educator, Mrs. Sally Durrant and pupils from Hampton High School. Together, they represented my State of Pennsylvania in the national bicentennial competition on the Constitution and Bill of Rights, and were chosen as one of the top 10 classes in the Nation. The following young people are shining examples of a new generation of leadership for our Nation, educated in and committed to the fundamental principles and values of our democratic institutions. They are: David Ablauf, Jennifer Allison, Craig Anderson, Brian Baker, Bob Bauman, Michael Best, Aimes Brick, Steve Byrne, Brett Caruso, Bryan Engle, Tara Enie, David Evans, Niema Jones, Ben Martin, Oliver Mihm, Laurie Mink, John Pasquaretle, Wayne Reed, Doug Rowland, Amy Jo Seamen, Michael Stewart, Bonnie Weimer, Jim Wisniewski, Jenna Yendell, Candace Zaiden, Justine Zang, Joerg Zeppenfeld, and Paul Ziegler.

These young Americans are just some of the thousands of elementary, middle, and secondary students around the Nation who have studied the We the People * * * curriculum which covers the basic ideas and philosophies upon which our Constitution is based, why our government is organized the way it is, how the Constitution guarantees and protects individual rights, and the responsibilities these rights entail.

Thomas Jefferson wrote, "Governments are instituted among Men deriving their just Powers from the Consent of the Governed.* * *" What gave meaning to those words, as President Havel reminded us, is that the author and those he inspired backed them up with their lives.

I want to commend these outstanding students for their accomplishments and especially for their commitment to contribute to their country.

## THE PUERTO RICO STATUS REFERENDUM AND DEFINING THE UNITED STATES-PUERTO RICO RELATIONSHIP

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. LAGOMARSINO. Mr. Speaker, I am very pleased with the support that has been shown in the Congress to provide an opportunity for the people of Puerto Rico to choose the type of relationship they prefer with the United States. Through a close bipartisan effort, legislation was drafted and introduced last week, to enable the people of Puerto Rico to exercise self-determination, by choosing independence, statehood, or enhanced commonwealth in a referendum to be held in 1991. H.R. 4764 is a major advancement toward the goal of resolving the longstanding debate over Puerto Rico's relationship with the United States.

Crucial to resolving the status debate is a definition of what each of the status options represent. Prior to the referendum, the Congress will describe the characteristics of each of the relationships, having considered the proposals and requests from the people of Puerto Rico. The status chosen by a majority of the people will be further defined by the Congress, effective after ratification of the terms by the people of Puerto Rico.

The U.S. Constitution will be the ultimate guide in determining the qualities of each relationship. The United States, meaning the Congress and the President, and consistent with the views of the judicial branch, will consider the requests of the people of Puerto Rico in defining each of the relationships. It will be the Congress which will spell out the meaniang of the status options in the law. Old postulates and romantic but unfounded theories will be dispelled by the reality of Federal law.

The people of Puerto Rico need to understand that their decision is extremely important. Their vote will affect more than their own lives. It will affect the lives of their children, grandchildren, and posterity forevermore. Their choice will also affect the character of the United States and inevitably, the world. I have faith in the people of Puerto Rico's ability to wisely choose that which is best for them and their posterity. They will decide having considered with open eyes U.S. citizenship rights, U.S. constitutional protection, political rights, extent of the sovereignty of the United States, and Federal responsibilities.

The Congress is considering legislation to provide a referendum on the status of Puerto Rico, in part, to respond to the request of the three leaders of the principal parties of Puerto Rico to authorize a referendum and commit to honor the results.

However, preceding the January 1989 letter of request by Puerto Rico's three party presidents, were the 350,000 first amendment petitions of U.S. citizens of Puerto Rico asking the Congress to provide a referendum. The fundamental constitutional right of those citizens to ask the Government for a redress of grievances should not and must not be ignored, and constitutes a just basis for scheduling a referendum in Puerto Rico.

In addition, the President of the United States asked the Congress in his first address to a joint session of the Congress in February last year to take the necessary steps to let the people of Puerto Rico decide in a referendum. The President recently reaffirmed his commitment to Puerto Rico self-determination and urged legislation be enacted this year to provide a referendum next year, in the following letter which I received last week:

THE WHITE HOUSE,
*Washington, DC, May 9, 1990.*

Hon. ROBERT J. LAGOMARSINO,
*U.S. House of Representatives, Washington, DC.*

DEAR BOB: Thank you for your letter of March 21.

I strongly believe that this is the year when our nation must move to allow our fellow citizens in Puerto Rico to choose their political fate. We owe it to them as a people and to ourselves as the leader of the Free World. How can we applaud the exciting and momentous movements toward freedom in Eastern Europe, Latin America, and elsewhere while refusing to grant to our own citizens the right of self-determination?

This is why I wholeheartedly support legislation to give the people of Puerto Rico the right to vote on the three principal options for their political future: statehood, continued status as a commonwealth, or independence. I further believe that we should have enough faith in the principles of democracy to let their choice be self-executing under provisions that Congress may prescribe.

My own view on the political future of Puerto Rico is well known: I want it to become the 51st State. The 3.3 million citizens of Puerto Rico deserve to be full members of the American Union, for whose freedoms (and those of other nations) Puerto Ricans have fought so courageously in all of the wars of this country. Before statehood or any other status can come about, however, the people of Puerto Rico must have the right to express their own views on their future. That is why I urge the Congress to act this year to allow a binding plebiscite on the island next year.

I look forward to continuing to work with you on this important issue.

Sincerely,

GEORGE BUSH.

While it is generally expected that the Government of Puerto Rico would implement any referendum that the Congress authorized, a referendum would not be precluded should the local government lack the human or financial resources. The United States could conduct a Federal referendum in Puerto Rico. The Federal Voting Rights Act provides for registration and election observers, officials, supervisors, and workers, when necessary, to ensure the integrity of an election or vote.

The Office of Personnel Management has assigned individuals for this purpose in a number of votes during the past several years. States in which direct Federal election participation has occurred includes New York, California, Missouri, and Arizona.

Clearly the intent of the legislation introduced last week is to have the Government of the Commonwealth of Puerto Rico conduct the referendum. Section 2 of H.R. 4765 authorizes $4 million for grants to the Government of Puerto Rico for the conduct of a referendum. The legislation also provides that "The referendum shall be conducted on 1991 pursuant to the electoral laws of Puerto Rico." The Congress is relying on the Government of Puerto Rico to carry out the referendum authorized at the request of the people of Puerto Rico, the political leaders, and the President.

Conducting referenda is not new to the people of Puerto Rico. They have had ample experience in the past of using this wonderful democratic mechanism to allow the people to express themselves. The history of the evolution of self-government in Puerto Rico is a marvelous case history which all political scientists should carefully examine. At the middle of this century, Puerto Rico achieved an unprecedented level of self-government under the leadership of one of America's great statesmen, Luis Munoz Marin.

Congress and then President Harry Truman agreed to authorize the people of Puerto Rico to elect their own Governor, something no territory had ever done before, and which the territories of Alaska and Hawaii would only do after becoming States a decade later. Furthermore, the people were authorized to develop their own Constitution, which was later approved by the Congress with certain modifications. The Congress was careful to note that the Federal law authorizing increased self-government and political advancement, "* * * would not change Puerto Rico's fundamental political, social, and economic relationship with the United States." (Senate Report 81-2, No. 1779).

After all of these advancements, the congressional committee jurisdiction over Puerto Rico did not change. The Committee on Interior and Insular Affairs retained the same primary jurisdiction for Puerto Rico that existed previously. Not so with the Philippines, Alaska, or Hawaii, which ceased to be United States territories after independence for the former and statehood for the others.

I reflect proudly upon the name, "Commonwealth of Puerto Rico," as it was freely adopted by the people of Puerto Rico as part of an unprecedented advancement in local self-government authorized by the Congress. It represents a model process in the exercise of the Congress' constitutional responsibility to "make all needful rules and regulations respecting the territory or other property belonging to the United States" (Article IV, section 3, clause 2), which has since been applied to other U.S. territories.

However, beyond the name or label of Commonwealth, Puerto Rico remains a territory under the sovereignty of the United States. Territories are further defined depending on whether the U.S. Constitution has been extended in full. A territory is considered incorporated if Congress passes a law extending the Constitution in full or unincorporated without such a law. Laws were passed for Hawaii and Alaska before they were States to extend the Constitution in full, but no similar law has been enacted for Puerto Rico. Therefore, individuals born in the Commonwealth of Puerto Rico, although U.S. citizens, only enjoy the fundamental protection of the Constitution as they reside in an unincorporated territory.

The advanced local self-government of Puerto Rico was admired throughout the world. Governments responsible for administering the 11 trusteeships of the United Nations and those nations administering territories closely examined the democratic government processes that had been instituted in Puerto Rico. It was a new model to be emulated in many parts of the world.

The United States proudly recognizes the achievement in self-government of Puerto Rico by bringing the matter before the United Nations in 1953. It was both accurate and appropriate for the United States to present Puerto Rico as a community which had attained a sophisticated level of self-government, no longer requiring annual oversight by the United Nations. On November 27, 1953, the General Assembly of the United Nations recognized Puerto Rico's political advancement by the free and democratic formation of a constitutional government and agreed that yearly reporting by the United States regarding Puerto Rico was no longer necessary.

President Kennedy issued an Executive memorandum on July 25, 1961, concerning the Commonwealth of Puerto Rico, which made inapplicable provisions of a previous executive order pertaining to the Administration of Puerto Rico by the Department of the Interior. This was entirely consistent with the position presented by the United States to the United Nations regarding Puerto Rico. Advanced local self-government had been achieved and direct administration by a department of the U.S. executive branch was no longer necessary or desirable. The memorandum also directed any matters involving the fundamentals of the relationship should be referred to the Office of the President.

I am pleased to see that President Bush has assigned individuals within the highest levels of the Executive Office of the President to deal with matters involving Puerto Rico. More than any time since President Kennedy issued his Executive memorandum, matters are constantly arising related to the fundamentals of the relationship between the United States and Puerto Rico. The President has sequentially tapped the deputy to the Chief of Staff Andrew Card, Assistant to the President, and Director of Presidential Personnel, Chase Untermeyer, to assume the lead on issues affecting Puerto Rico requiring the administration's involvement. I have been impressed with the dedication of these individuals to carry out their mandate from the President regarding Puerto Rico which is consistent with the Kennedy memorandum.

The people of Puerto Rico will be given the opportunity to choose their preferred relationship with the United States in a free and democratic vote. The U.S. Senate has devoted countless hours to provide a referendum on Puerto Rico's status under the leadership of Senators JOHNSTON and MCCLURE. I am confident that the legislation recently introduced in the House with strong bipartisan support, will result in the Congress achieving the common goal of enabling the people of Puerto Rico exercise self-determination.

## HISTRADRUT FOUNDATION HONORS BRUCE LEE

### HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. TORRES. Mr. Speaker, I rise today to call my colleagues attention to the fact that on May 24, 1990, the Israel Histradrut Foundation will honor Bruce A. Lee, region 6 director of the United Auto Workers.

In the world of international labor, a testimonial by Histradrut carries with it an acknowledgment of a person's commitment to the ideals of democratic and free trade unionism. To be sure, Bruce Lee is a standard bearer of these principles.

Bruce was born in Old Town, ME, during the depths of the Depression. Moving westwardly, he attended college in Arkansas and then in California. I am sure that his young mind and progressive concepts were largely shaped by the social and economic transgressions that were moving our Nation during that period. Moreover, the ensuing period, during which our Nation was at war, clearly brought him into the world of the defense industry and unionism.

He joined UAW Local 1881 in 1957 when he became an employee of Ryan Aeronautical in Torrance, CA. He served his local as bargaining committee chairman and eventually president from 1958 to 1963.

As the UAW expanded its organizing efforts across America, Walter P. Reuther, its then visionary president, appointed Bruce and other union activists to posts as international representatives.

Mr. Speaker, It was during this period that I met Bruce Lee, the two of us being assigned as organizers. We worked together under the tutelage of legendary leaders like Bill Goldmann, John Allard, Bob Burkhart, and Vince Sloan. They left an indelible social and political mark upon us.

In 1973, deeply concerned about the drastic plant closings and corresponding high rates of unemployment among union members, Bruce established the first labor oriented federally funded job training programs in the Los Angeles area. He later started the first Advanced Automotive Training Program in the Job Corps for inner-city youth.

In 1982, Bruce developed, with the California Employment Training Panel and the U.S. Department of Labor, the first aerospace training program for dislocated Rockwell B-1 workers.

From 1983, to the present, he has led the UAW team, that brought Toyota and General Motors together to forge the internationally known success of the New United Motors in Fremont, CA. This action created thousands of jobs for laid-off GM workers in Fremont. In 1984, Bruce, always the consummate organizer, brought together the UAW Labor Employment and Training Corp. [LETC]. Moreover, in 1985 he linked UAW-LETC with the Los Angeles Business Labor Council [BLC], and the Private Industry Council [PIC] to implement a displaced worker program under the Job Training Partnership Act.

As the Nation begins to react to world developments in light of Eastern Europe's democratization and the easing of United States-Soviet cold war tensions that would invariably affect defense production in the United States, the spotlight is being placed on leaders like Bruce Lee, who will be assisting in the conceptual planning necessary to bring about industrial conversion. He will be invited to testify before congressional committees as to his expertise.

Mr. Speaker, I ask my colleagues to join me, in recognizing the honor being bestowed upon UAW regional director, Bruce Lee.

## MAX ELBIN: 44 YEARS A HEAD PROFESSIONAL AT BURNING TREE CLUB

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. MICHEL. Mr. Speaker, our colleagues will be glad to know that Max Elbin, the Presidents' pro for 44 years at Burning Tree Club in Maryland, recently celebrated his 70th birthday. Max has so many admirers and has been such a leader in the world of golf, I thought his friends would like to see a recent article that paid him a much-deserved tribute.

At this point I wish to insert in the RECORD, "70-year-old Elbin Marks 44 Years in Steppingstone Job," from the Washington Times, Thursday, May 17, 1990:

[From the Washington Times, May 17, 1990]

THE 70-YEAR-OLD ELBIN MARKS 44 YEARS IN STEPPINGSTONE JOB

Two days ago, Max Elbin observed 44 years as head professional at Burning Tree Club. In may 1946, after four years in the Air Force, the young native of Cumberland arrived at Lew Worsham's shop at Burning Tree to resume duties as assistant pro. Worsham had a better idea.

"I walked in and he was practically walking out," Elbin remembers. "He said, 'I've got to get up to the [Philadelphia] Inquirer tournament.' After about a week he left me in charge, and darned if he didn't finish second in Philadelphia—lost a playoff to Herman Barron.

"He never came back. The next year, of course, he won the [U.S.] Open in St. Louis. I remember he said before he left, You'll starve to death here, but it'll be a steppingstone to something else".

Right. Something else. Last Friday, the members assembled some 150 friends to honor Elbin on his 70th birthday. It is also 50 years since he was hired as Worsham's aide at this quiet men's golf club, renowned now as the club of presidents, tucked inside the Beltway near River Road.

Mementos from last week's party include letters from two former presidents, Richard Nixon and Gerald Ford; incumbent George Bush, and Vice President Dan Quayle. Elbin was particularly pleased that 15 of his former assistants attended.

He was the last of the three-term presidents of the national PGA body, serving in 1965-68, and he is known as the presidents' pro. Yet, Elbin has always seemed most proud about the number of his assistants who moved up. He counts 30 assistants in the 44 years, and 28 of them took head pro jobs elsewhere. And 15 of them came back Friday to wish their former boss well. His involvement with golf stretches over seven decades, Max and Mary Elbin's five children are all grown, but there doesn't seem to be any thought of retirement. He looks in his usual, vigorous good health, and the club has given no indication it wants a change.

"It may," Elbin said this week, "but I haven't heard that."

## A TRIBUTE TO THE FRAMINGHAM POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Framingham Police Department for their dedicated and outstanding service to the people of Framingham, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Framingham Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Brent B. Larrabee and those who serve in the Framingham Police Department:

Brian Abt, Vincent Alfano, Owen Babineau, Joseph Besardi, Douglas Bevilacqua, Peter Bianchi, Paul Bridges, George Caldwell, Richard Callahan, George Carey.

Steven Carl, Richard Chesmore, Lawrence Chism, Thomas Cobb, Robert Connolly, Charles Cooper, Dolores Coots, Orlo Coots, Stephen Cronin, Joseph Cunningham.

Craig Davis, Michael Degnan, William Delaney, Frank Divittorio, Michael Donnelly, Alan Dubeshter, Jeffrey Eadie, Michael Esposito, Joseph Ferguson, Kenneth Ferguson, James Finks, Paul Fino, Robert Foley, Debra Frazier.

William Fuer, Peter Galvani, Paul Galvin, Joseph Gately, James Gavin, William George, Daniel Giro, Paul Gosselin, James Green, Louis Griffith, James Harrington, Dennis Hayes, Lawrence Hendry, Michael Hill.

Robert Keefe, Paul Kelley, Michael King, Michael Leporati, Larry Linehan, Michael Loughman, Amedio Luciani, William Marden, Frank Masiello, Michael McCann, Wayne McCarthy, Kathleen McGrath, Richard Monson.

Ralph Moore, David Murphy, Richard Murphy, Chris Murtagh, Alan Nardini, Albert Nau, Brad Newman, Paul Nicoli, John Norton, Richard Nummela, Paul O'Connell, Bennedetto Ottaviani, Dominic Pasquantonio.

William Pease, Theodore Piers, Richard Pomales, Kenneth Pond, Dennis Reardon, Fred Romani, Frank Royster, Roy Salvi, Robert Sambuchi, Glen Segal, Paul Shastany.

Michael Siaba, Kevin Slattery, James Smith, Donald Spaulding, James Stoddard, Davis Studley, Richard Teal, Jr., Blaise Tersoni, Louis Tersoni, Peter Tessicini, Robert Tibor.

Joseph Tomasi, Chris Toscano, Steven Trask, Joseph Vitagliano, John Vlzakis, Hugh Walker, Kenneth Webb, Doreen Whalen, Steven Wuorio, Edward Yarosz, Earl Zinck.

## A $1 BILLION PROPOSAL FOR AGING AND INDEPENDENCE RESEARCH, H.R. 4863, JUSTIFIED BY ALZHEIMER'S DISEASE'S $88 BILLION-PLUS ANNUAL SOCIETAL COST

### HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ROYBAL. Mr. Speaker, I am joining with Senator TOM HARKIN and Representative MARY ROSE OAKAR, my colleague on the House Select Committee on Aging, to introduce the Independence for Older Americans Act—a billion dollar legislative commitment to Federal research on aging and independence developed by the Alliance for Aging Research. The Alliance for Aging Research is a coalition of over 40 organizations dedicated to research to improve the independence of aging Americans.

The darkest clouds looming over the heads of aging Americans today and for the foreseeable future are the risks of being struck by long-term, debilitating illnesses which rob Americans of their dignity, their life savings and their independence. Society also falls victim to these illnesses as we are robbed of our children, spouses, parents and grandparents and as we help to shoulder the heavy burden of long-term care. The time has come for us to fight back, and research is our best defense.

The billion dollar commitment to Federal aging and independence research, as proposed in the Independence for Older Americans Act, is necessary and a big commitment, but not nearly as big as the hundreds of billions of dollars lost each year to illnesses striking Americans. Alzheimer's disease alone costs society over $88 billion a year and is becoming the biggest of the misery diseases plaguing and impoverishing Americans and the families who care for them.

A firm and fair Federal commitment to meeting the challenge posed by deadly and debilitating illnesses, like Alzheimer's disease, is long overdue. Joining together the forces from the Congress, the administration and the private sector is critical to boosting the Federal aging and independence research commitment to at least $1 billion annually.

Only last week, I, along with a bipartisan, House-Senate coalition, introduced the Alzheimer's CARE bill as a prime example of how America needs to begin its attack on Alzheimer's disease and the other conditions threatening the independence of Americans.

For a decade, we have pushed hard in the Appropriations Committee to increase funds for aging and independence research generally and for Alzheimer's research specifically. Another step was taken on May 9 when I and the bipartisan, House-Senate CARE coalition joined forces to introduce the Comprehensive Alzheimer's Assistance, Research and Education Act [CARE], H.R. 4770 and S. 2602. CARE embodies my commitment to finding the $570 million a year desperately needed for Alzheimer's research.

Mr. Speaker, I insert a summary of the bill, the Independence for Older Americans Act, in the RECORD.

SUMMARY OF INDEPENDENCE FOR OLDER AMERICANS ACT

Purpose.—To provide for an intensified national effort to improve the health and enhance the independence of Americans through research, training, treatment, and other means and for other purposes.

DESCRIPTION.

TITLE I. TASK FORCE ON INDEPENDENCE FOR OLDER AMERICANS

Sec. 101. Establishment.—The Task Force on Independence for Older Americans is established consisting of the Assistant Secretary for Health, the Surgeon General, the Assistant Secretary for Planning and Evaluation, the Director of the National Institute on Aging [NIA]—as well as the Directors of other Institutes designated by the Secretary—the Commissioner of the Administration on Aging, the Commissioner of the Food and Drug Administration, the Chief Medical Officer of the Department of Veterans Affairs, the Director of the National Institute on Mental Health, the Commissioner of the Social Security Administration, the Administrator of the Health Care Financing Administration, and four Congressional members—two Members of the House of Representatives and two Senators; two from each party. The NIA Director is Chairperson of the Task Force.

Sec. 102. Duties.—The Task Force is to coordinate Federal research on conditions and diseases leading to dependence, establish a mechanism for sharing information among the Federal agencies on the Task Force, identify the most promising for research on diseases and on behavioral and social conditions leading to dependence, establish mechanisms to use research results in the development of policies, programs, and means to improve quality of life, and review public and private spending on such research.

Sec. 103. Reports to Congress.—Within 1 year and annually thereafter, Task Force is to submit a report to appropriate Congressional committees and to the public. The report is to address research progress, potentially important new directions in research, and recommendations for resource allocations.

Sec. 104. Authorization of Appropriations.—Authorizes $100,000 each for fiscal years 1991-93.

TITLE II. GERIATRIC RESEARCH AND TRAINING CENTERS

Sec. 201. Establishment.—The Claude D. Pepper Comprehensive Independence, Research, Training, and Demonstration Centers are established. The Director of the NIA is to enter into cooperative agreements and make grants to public and private nonprofit entities for the development of 15 such centers. In coordination with similar centers, these centers are to conduct research on those factors which reduce the ability of the elderly to live independently, programs to develop researchers, development and demonstration of research applications, development and demonstration of training programs for older Americans and their families, training of health care professionals, and research and demonstration of public education and prevention programs. Authorizes $32.5 million for fiscal year 1991, $40 million for fiscal year 1992, and $50 million for fiscal year 1993.

TITLE III. AVAILABILITY OF INFORMATION TO HEALTH PROFESSIONALS, OLDER AMERICANS, AND THE GENERAL PUBLIC

Sec. 301. National Independence for Older Americans Information Program.—The Secretary, acting through the Director of NIA, shall develop a plan for a National Independence for Older Americans Information Program.

Sec. 302. Information Clearinghouse.—The Secretary, acting through the Director of NIA, shall establish an information clearinghouse on the latest developments, establish a computer-based data system, make the information available to Federal agencies, health care professionals and the general public, support programs to develop model curricula, and set up a toll-free telephone communications system. The Secretary may enter into contracts or cooperative agreements with and make grants to public and private nonprofit entities.

Sec. 303. Public Information Campaigns.—The Secretary, acting through the Director of NIA, shall make grants and may enter into contracts to develop an information campaign for the development and delivery of public service announcements and paid advertising messages concerning health and nutrition and screening techniques. Information provided shall inform the general public concerning the availability of treatments that reduce the need for the dependent care of Americans.

Sec. 304. Authorization of Appropriations.—Authorizes $20 million for fiscal year 1991 and such sums as necessary for fiscal year 1992 and 1993.

TITLE IV. PREVENTION OF AND RECOVERY FROM CHRONIC ILLNESS

Sec. 401. Comprehensive Geriatric Assessment.—NIA, in cooperation with the Health Care Financing Administration, shall support research to determine the most effective geriatric assessment techniques, the most effective method of targeting such techniques, and the most effective means of providing for such needs to maximize health and independence. By March 1, 1994, they are to submit a report to the appropriate Congressional Committees concerning the results of the research and recommended guidelines concerning such research. It shall include the feasibility and cost of a geriatric assessment for older persons when entering all institutional and community-based health services.

Sec. 402. Frailty and Immobility Prevention and Rehabilitation.—The Secretary, acting through the Director of NIA, shall develop model techniques to aid in prevention and rehabilitation from frailty and other mobility problems and model curricula for health professions training. Up to 5 demonstration programs may be established at the Claude Pepper Centers in this Act.

Sec. 403. Prevention of and Recovery From Chronic Illness.—The Secretary, acting through the Director of NIA, shall develop model techniques and curricula for health professionals and paraprofessionals directed at the prevention of and recovery and rehabilitation from chronic and debilitating illness. The Secretary is to submit a report, with respect to these sections, to the appropriate Congressional Committees by March 1, 1992.

Sec. 404. Authorization of Appropriations.—Authorizes $3 million for fiscal year 1991 and $5 million for fiscal year 1992 and 1993.

TITLE V. RESEARCH ON HEALTH, RETIREMENT, AND INDEPENDENCE

Sec. 501. Health Care Data.—The Secretary, acting through the Director of NIA, shall commence a 10-year health and retirement history survey. The Secretary, acting through the Director of NIA, shall establish an advisory panel on data collection to review existing surveys and census data and to coordinate information on health and retirement status of older Americans, including racial and ethnic minorities and rural and inner city residents.

Sec. 502. Health Promotion and Disease Prevention Data.—The National Center for Health Statistics shall include persons age 75 and over in the National Health and Nutrition Examination Survey [HANES], develop questions related to health promotion and disease prevention for the HANES, the National Health Interview Survey and the National Ambulatory Medical Care Survey. Information is to be collected on racial and ethnic minorities and rural and inner city residents.

Sec. 503. Investigator-initiated Research Grants.—NIA is to request proposals from investigators on behavioral, social and environmental mechanisms for promoting health and independence.

Sec. 504. Authorization of Appropriations.—Authorizes, for this title, $5 million for fiscal year 1991, $7.2 million for fiscal year 1992, $7.5 million for fiscal year 1993, and such sums as may be necessary for subsequent fiscal years.

TITLE VI. AUTHORIZATION OF APPROPRIATIONS FOR NIH

Sec. 601. Establishment.—Authorizes such sums as may be necessary in fiscal year 1991, to be added to the NIA and other institutes in proportion to their current spending levels on aging research, to assure that total spending on aging research is not less than $1 billion within the National Institutes of Health.

## WHY I AM PROUD OF AMERICA

### HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. HALL of Texas. Mr. Speaker, recently it was my pleasure to attend the District 1 Veterans of Foreign Wars banquet. One of the speakers was a young man named Michael R. Peterman of Pottsboro, TX. Michael made a very moving speech that evening as he talked about the price of freedom and the American spirit that prevails as a result of paying that price.

It is indeed an honor, Mr. Speaker, to submit this speech today in order that it may be made a permanent part of the CONGRESSIONAL RECORD.

WHY I AM PROUD OF AMERICA

I can remember sitting on the floor of my grandparents' house on cold, snowy winter

days. Those days were always my favorite as a child, because there was no school. On those days, I would get to walk down the hill to my grandparent's house and after my grandmother had given me a mug of steaming hot chocolate, (You know the kind with little marshmallows), and sat me down by the fireplace to warm up, my grandfather would tell me his war stories. He told me of the ships and of the amphibious vehicle he commanded. He told me of the friends he made, and lost, on the beaches in the South Pacific. He told me of the joy of erecting an American flag on an island that they had spent days fighting for. My grandfather also told me of the pain and the fear of death he felt when a bullet pierced his shoulder. The war stories always sounded so grand, but one thing I always noticed were the tears that came to his eyes. I thought he was sad, and maybe he was, but, as I grew older, I realized that he was more proud, than sad. The tears always came at times when he talked about raising the American flag on various islands. The day I realized that, I realized also, that I took the flag and what it stands for, for granted. I mean here I live, in a country where I can worship as I choose, make my choice of which college to attend, and be happy, and I don't really ever stop and think about it.

Freedom is a gift. A gift that people oppressed in a communist country, leave their families and risk their lives for. A picture in a recent newspaper shows a young family who had finally made it across the iron-curtain, the joy and excitement of knowing they are finally free is reflected in the tears on their cheeks. They have gained something that I have had from the very beginning, yet I take it for granted. I'm proud of America. The framers of the Constitution set up a government that many said would never last. Yet, it is this flexible, yet rigid, document, that has kept America a world power for over two hundred years.

America is people helping people. One of the most powerful examples happened several years ago. A young child fell into an abandoned well. Jessica McClure had been playing near an unsealed entry and simply fell in. For three days, America turned faithfully to the news programs, to see if rescuers had saved the girl. I was inspired by the willingness of the members of that community and the people who came from around the nation to try and rescue young Jessica. The first day passed and we were still hopeful, the second day passed and we prayed for her rescue. Men and women worked day and night and finally, on the third day, the worker's efforts paid off, and Jessica McClure was pulled safely from her prison. We, the people, witnessed a miracle. For three days the people of that community forgot about themselves, and their petty arguments and simply came together and worked side by side. Their dedication made America stop for three brief days, moments of lifetimes, and pay attention to one of the world's aspects that is most important; respect for human life! It was on a Friday evening when Jessica was rescued. I was at a football game when they announced her rescue. And for one brief moment everyone forgot about that football game, and simply stood up and cheered, and wept, and laughed for the American spirit that conquers all.

The ability of Americans to pull together at crucial moments, from the San Francisco Earthquake, Hurricane Hugo, Jessica McClure, to a World War, added to my grandfather's proud tears are what make me proud of America. That is what puts goosebumps on my arms as the National Anthem is played. And perhaps this feeling is best summed up by a picture I saw in a photography book. It was a picture of a Vietnam Veteran lifting his son up to kiss the name of the boy's grandfather on the Vietnam Memorial. The grandfather was M.I.A. This is America passed from generation to generation, and that is why I am proud.

Mr. Speaker, there are many such fine young people in our country today—but very few can so ably express themselves. I am honored to be Michael's Congressman, and lucky to be his friend.

## TRIBUTE TO WILLIAM ALBION CARLSON II

### HON. HANK BROWN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BROWN of Colorado. Mr. Speaker, I rise today to pay tribute to William Albion Carlson II. A former speaker of the Colorado House of Representatives and majority leader of the Colorado Senate, he passed away this February at his home in Greeley, CO, at the age of 81. The son of a State representative and the nephew of former Colorado Gov. George Carlson, Bill Carlson spent 18 years in the Colorado General Assembly. First elected in 1938, he served 10 years in the House and 8 years in the Senate. He was particularly noted for his legislation concerning education, aeronautics, and the revision of the Colorado court system.

Born October 30, 1908, he received an education degree and a masters degree from Colorado State College, now the University of Northern Colorado. Earning a law degree from the University of Michigan, he returned to Colorado. He married in 1934 and had four children with his first wife, Lois. He married Jane Hobbie Francis in 1956, practicing law with her for 33 years while raising three more children. He is survived by his seven children, Mrs. Jane Carlson's three sons, 25 grandchildren, and 11 great-grandchildren.

Mr. Speaker, William Albion Carlson II is remembered for his many contributions to our State. What follows are tributes by our former House colleague, Don Brotzman, Denver Post columnist Tom Gavin, and the Colorado General Assembly, in the form of a senate joint memorial sponsored by State Senator Bob Schaefer of Fort Collins.

STATEMENT OF HON. DONALD G. BROTZMAN

It was my good fortune to serve with William Albion Carlson II in the Colorado Senate. He was our majority leader and I worked closely with him as the G.O.P. caucus chairman.

Bill Carlson had impressive credentials to represent the varied interests of Weld County and environs, and the broader interests of the entire State of Colorado. He understood farming and ranching because this was his heritage. He was born into a politically active family and was tutored at the knee of his father, a state representative, and his uncle, who was governor. Bill was trained as a lawyer, which, coupled with his native shrewdness, made him an effective tactician.

Bill's legislative leadership, which is summed up by Tom Gavin in an excellent article in the Denver Post, produced landmark legislation in a number of areas that will benefit Coloradans for generations to come.

I congratulate the Colorado General Assembly and Congressman Hank Brown, whose district includes Weld County, for the recognition they bring to this deserving legislative leader.

WILLIAM ALBION CARLSON

I don't know what you do when you return from vacation, but I slog through the newspapers which pile up. "Longtime state lawmaker William Carlson, 81, dies," the headline said.

Sonofagun. William Albion Carlson. That's how we wrote his name when Bill Carlson was a state Senate power, William Albion Carlson.

But not II, as the obit noted. II would have been a little much for Greeley. I see there's a III up there, also, and that he goes by "Bill." They're great levelers, small towns and small cities. In the little places of America, if you're way up town you're out of town altogether.

Surprised? Yes. Not at Bill Carlson's death, though. My supposition was that he'd died long ago. Out of sight, out of touch . . . you know.

This is not one of those "Me and my pal, Bill," pieces. We weren't close. I developed a sturdy respect for him, however. Bill Carlson, I came to believe, was a straight arrow, a speaker of truth. In politics, startled though you may be to bear this, that's a valued and common trait.

To be honest, though, I thought he was a little . . . well . . . stuffy. Reserved.

Smart. Persuasive. Intelligent, which is different than smart. Bulldog stubborn.

And stuffy.

Memory diffuses, have you noticed that, and I was surprised to learn that my sharpest recall of Bill Carlson involves a slide rule. A lot of you don't know what that is, do you? Look it up. This is not Archeology 101.

He'd get out his slide rule when the yearly school finance tussle began.

In those days there was no knottier legislation than school finance. You'd think it'd be a fairly simple thing, passing out state aid. You have so many dollars and so many pupils and you divide one into the other and . . .

No. Uuh-uh. Forget that. Simplicity is not what we're after. What we're after is a fair advantage, as in more money for the threadbare schools in my district and less for those in your district, which are already so rich they even have pencil sharpeners, for goodness sake!

Canny rural legislators not only developed intricate formulae for these disbursals, but constantly tinkered. They may even have inserted a pig squeal factor one year, I don't know. In time, as you might imagine, no one had the foggiest notion what was going on in school finance.

"The controversial and little-understood school finance bill," was the way Statehouse reporters referred to it. Well, it was either that or try to explain the fool thing. There's a time to plunge earnestly into explanation and a time to deal another hand; is the pot right?

Suspicion and narrowed eyes abounded when the bill hit the floor, and that's when William Albion Carlson whipped out his slide rule and went to work.

"You," he would say to one recalcitrant, "will receive . . ."

Then there'd be a shuffling of research material, an adjustment of the held-high slide rule, further document peering, another tiny slide rule adjustment, a peering into the middle distance, and finally, a conclusion. A percentage. A dollar figure. A satisfied senator. An aye vote.

Time and again he'd do this, slide rule brandished like a medieval mace, and, watching from the press table, I wondered, does he know what he's doing with that device or is this all smoke and mirrors?

He knew.

William Albion Carlson was one of the good ones in a state Senate which had quite a few. Steve McNichols, Ted Gill, Fay DeBerard, Ben Veltri, Darcy Brown, Ernie Weinland, Jim Mowbray, Bill Powers, Wilkie Ham, Sam Taylor, Ranger Rogers, Ray Danks, Don Brotzman, Edgar Elliff, Walter Johnson.

Feel good about your forebear, descendants of William Albion Carlson II.

---

S.J.M. 90-6 BY SENATOR SCHAFFER; ALSO REPRESENTATIVE OWEN—MEMORIALIZING WILLIAM ALBION CARLSON II

Whereas, By The Will of Divine Providence, our beloved former member, the Honorable William Albion Carlson II, departed this life on February 21, 1990, at the age of 81; and

Whereas, William Albion Carlson II was born on October 30, 1908, the son of a state representative and the nephew of former Colorado Governor George Carlson; and

Whereas, He graduated from the Colorado State College of Education with a bachelor of arts degree in 1931 and a master's degree in 1932, and completed his formal education at the University of Michigan, earning a law degree in 1935; and

Whereas, After graduating from law school, Carlson returned to northeastern Colorado where he worked in farming and ranching and as an attorney; and

Whereas, Former Senator Carlson served this state faithfully, representing Weld County and districts in northeastern Colorado for eighteen years; and

Whereas, Carlson was first elected to the Colorado House of Representatives in 1938 and served as Speaker of the House from 1947 to 1948; and

Whereas, In 1948, he was elected to the Colorado Senate, where he served as Majority Leader from 1951 to 1952 and again from 1955 to 1956; and

Whereas, Senator Carlson initiated historic legislation in the areas of public education, aeronautics, corrections, taxes, legislative procedure, and the Colorado court system; and

Whereas, In 1956, Senator Carlson left public office to devote himself to his family and law practice; and

Whereas, Senator Carlson served with distinction as Trustee for the MacGregor Trust at Estes Park, Colorado, and sought Congressional action to secure the area for education and environmental preservation through a conservation easement; and

Whereas, Senator Carlson is remembered by his colleagues as a fair legislator, a dynamic leader, a respected statesman, and a determined gentleman; and

Whereas, It is fitting that we, the members of the Fifty-seventh General Assembly, pay tribute to the years of dedicated public service of the late Senator Carlson and express our deep regret and sorrow occasioned by his death; now, therefore,

*Be It Resolved by the Senate of the Fifty-seventh General Assembly of the State of Colorado, the House of Representatives concurring herein:*

That, in the death of Senator William A. Carlson, the people of this state have lost a devoted public servant and an outstanding citizen and that we, the members of the Fifty-seventh General Assembly, do hereby extend our deep and heartfelt sympathy to the members of his family and pay tribute to a man who served his state well and faithfully.

*Be it Further Resolved,* That copies of this Memorial be sent to Senator Carlson's wife, Mrs. Jane Carlson, the former Jane Hobbie Francis, with whom he practiced law for thirty-three years; to his children by that marriage, Albion John Carlson of Santa Fe, William John Eric Carlson of Salida, and Louisa Warfield of Greeley; to the children of his first marriage to Gerda Bengtson, William A. "Bill" Carlson III and Alvis "Joy" Brever, both of Greeley, Jenn Ponso of Craig and Sonjenne McGechie of Aurora; and to the sons of Mrs. Jane Carlson, Steven Francis of Fort Collins, Nicholas Francis of Longmont, and Thomas Francis of Windsor.

---

## TRIBUTE TO THE LINCOLN POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Lincoln Police Department for their dedicated and outstanding service to the people of Lincoln, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Lincoln Police Department—the public servants on the front line who enforce the laws that we create. These men and women endure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

To often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Dominic James Arena and those who serve in the Lincoln Police Department:

Allen Bowles, Richard Hallet, Thomas Moran, Patrick Kenney, Robert Gallo, Charles Doyle, David Davis, John Fitzgerald, Kevin Mooney, Gerald Mahoney, and Barbara Bardsley.

## FINANCIAL DISCLOSURE STATEMENT

### HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. KASTENMEIER. Mr. Speaker, even though Public Law 95-521, the Ethics in Government Act of 1978, requires public financial disclosure, nonetheless, I am continuing my practice, begun in 1963, of reporting in the CONGRESSIONAL RECORD on my personal financial condition. This disclosure, through its more precise statements, differs in important respects from the report which we are required to file by public law and by House rules.

My report covers the calendar year 1989 and also includes the amount of Federal, State of Wisconsin, and local real estate taxes paid in 1989.

Mr. Speaker, the report follows:

*Financial Disclosure Statement—Statement of Financial Condition, December 31, 1989*

| | |
|---|---|
| Checking account, with the Sergeant at Arms, House of Representatives | $5,155.36 |
| Cash | 73.03 |
| Securities: | |
| 4,000 shares, high yield income fund | 29,500.00 |
| 100 Prudential Bache Cap Return Futures Fund | 9,900.00 |
| Prudential Bache money market funds | 453.00 |

## WORLD FOOD DAY TELECONFERENCE REPORT

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GILMAN. Mr. Speaker, October 16 will be the 10th anniversary of World Food Day. In 1989, a teleconference was held on that day to meet the needs of the American public for information regarding the hunger problem. The National Committee for World Food Day, under the leadership of Patricia Young, arranged for the broadcast to reach over 500 receive sites throughout the United States and Canada. The panel of experts included Senator GORE and Dr. Kurien, the head of the world's largest cooperative. They answered some tough questions on energy, biological diversity, population, and other key issues regarding hunger and development.

World Food Day has been a great success. There are now over 430 organizations involved in its activities. It has educated millions of Americans about the problems and solutions surrounding the world hunger crisis.

Accordingly, I invite my colleagues to review the teleconference report. It is available in full from Patricia Young at the National Committee for World Food Day here in Washington.

Mr. Speaker, I request that the 1989 World Food Day teleconference executive summary be printed in full in the RECORD at this point:

1989 WORLD FOOD DAY TELECONFERENCE
EXECUTIVE SUMMARY

The sixth annual World Food Day Teleconference, broadcast from the studios of George Washington University in Washington, DC on October 16, linked a distinguished panel of experts to 500 receive sites across the United States and Canada. Because of the interest in, and timeliness of, its theme, *Food, Environment and Development*, it is believed to have been the most widely viewed of any in the series that began in 1984 and the largest single development education broadcast ever organized in the U.S.

World Food Day, held for the first time in 1981 and marking the founding, in 1945, of the Food and Agriculture Organization of the United Nations, has captured the imagination of people throughout the world. In the U.S. and Canada, the Day is observed in virtually every community. The U.S. National Committee for World Food Day has grown in membership to 430 private voluntary organizations.

Serving on the teleconference expert panel in 1989 were two distinguished foreign guests, Dr. Verghese Kurien of India, winner of the prestigious World Food Prize and director of a milk cooperative in his country which is called the largest agricultural development project in the world, and Ambassador Stephen Lewis of Canada, former ambassador to the United Nations who now acts in a personal capacity as special advisor to the secretary-general of the UN on African affairs. They were joined by two Americans, Senator Albert Gore (D-TN) and Dr. Roberta Balstad Miller, director of the National Science Foundation's Division of Social and Economic Science. TV and film star Eddie Albert hosted the program, and PBS chief Washington correspondent Judy Woodruff served as moderator. FAO Director-General Edouard Saouma and Secretary of Agriculture Clayton Yeutter also appeared on the program through brief videotaped messages.

THE TELECONFERENCE CONCEPT

In the U.S., the World Food Day teleconference has become a model for development education on global issues, in part because of the enormous growth in interactive participation by official receive sites and the additional millions of viewers accessed through collaborating networks and in part because of the year-around and year-to-year study elements of the project. Its main components are: (1) a Study/Action Packet of print materials, prepared by the non-governmental U.S. National Committee for World Food Day and distributed to all participating schools and other study centers; (2) the three-hour satellite telecast on October 16 composed of three hour-long segments for expert panel presentations, special local site programs and a site-panel question and answer interchange; (3) a written teleconference report including a lengthy section of responses to site questions which could not be taken up during the third hour of the broadcast; and (4) analysis by selected site organizers after year's program to prepare recommendations for the year to come.

All of the teleconference components are designed as college-level curricular aids. More each year, schools are using videotapes of the telecast, the Study/Action Packet and the Teleconference Report as a combined and reusable resource on the teleconference theme or some aspect of it. WFD organizers are now considering ways to offer study guides for faculty to facilitate this use.

THE STUDY/ACTION PACKET

The Study/Action Packet is designed as an integral part of the teleconference program, but it also serves, and is widely used, as a separate study resource by groups not participating in the interactive, official telecast. More than 1,500 copies of the packet were distributed prior to the October broadcast. Funding for the packet was provided through a Biden-Pell Development Education Grant from USAID. General support for the telecast was provided by the U.S. National Committee for World Food Day, FAO, the Covenant Presbyterian Church of Scranton PA, the Kraft General Foods World Food Prize, USDA and the Xerox Foundation.

Although not designed to be a comprehensive analysis of the issues subsumed in its *Food, Environment and Development* theme, the packet served as an overview of many of the questions of current public concern. Its main study section in particular brought into focus issues raised in the "Our Common Future" report of the World Commission on Environment and Development headed by former Norwegian Prime Minister Gro Harlem Brundtland. Special attention was given in this paper to issues that might divide developed and developing nations in their search for solutions. Detailed analysis was given to problems of food-related natural resources of soil and water, to food implications of global deforestation, to atmospheric pollution and climate change, and to the struggle to reduce contamination from agricultural chemicals. The Study/Action Packet also included a bibliography on current study literature and a special section to assist college teleconference organizers in initiating or expanding their programs.

The entire Study/Action Packet was designed to facilitate local duplication and thousands of copies were made of different parts of the packet for distribution through site organizing groups.

TELECONFERENCE OUTREACH

WFD teleconference outreach grew again in 1989—in the number of interactive sites, in participation in programs organized at the sites, and in pick-up or rebroadcast by cooperating television networks and stations. The number of sites (i.e., locations taking part in the interactive third-hour segment of the broadcast) grew from 125 in 1984 to as many as 500 in 1989. The exact figure cannot be known because participation through specialized networks which do not report individually.

In a separate aspect of the teleconference outreach, the program was used for the fourth year by professional organizations for continuing education credits. Credits were offered in 1989 by the American Dietetic Association and the American Home Economics Association, and, through the Catholic University of America, were offered to clergy and social service professionals.

The number of homes throughout the U.S. and Canada which were accessed by cooperating networks and stations reached into the millions. Networks or chains which offered all or part of the broadcast included the Catholic Telecommunications Network of America, the Learning Channel, Vision Interfaith Satellite Network, the Public Broadcasting Services' Adult Learning Satellite Service and individual PBS, educational TV and cable stations throughout the country.

The outreach of the program also took on an entirely new dimension in 1989 through overseas video relay by the WorldNet Service of the U.S. Information Agency. Pick-up of this WorldNet coverage is expected to expand rapidly in future years through promotion by the international WFD network. National Committees are now formed in over 100 countries and are joined together through the offices of the non-governmental Global Confederation for World Food Day located in Italy.

LOCAL SITE PROGRAMS

Over the six-year experience of organizing the teleconference, the U.S. National Committee for World Day believes the single most important development in the program's evolution has been the rising attention given by site organizers to their own programs on dealing with hunger, whether local, national or global, in conjunction with the national telecast. The original concept for this site activity was for the "middle hour" discussion of the points made by the expert panel in the preceding hour along with prepartion of questions to be submitted during the final hour of the telecast.

While this is still a vital part of the teleconference program, more sites each year have gone further, developing full programs within the college setting or involving outreach to surrounding offcampus communities. These site programs sometimes follow the theme of the national broadcast, but also frequently take up local and national hunger and food security issues. Many programs now cover a full day, several days or, in a few cases, a week or more. It was in recognition of this evolving growth that the special section of the 1989 Study/Action Packet on programs organization was prepared with the assistance of 18 colleges with especially successful or innovative programs. This "Manuel of Models" is to be expanded and redistributed in future years.

Another growing aspect of college participation is the growth of interdisciplinary study based on links to food/poverty issues. First contacts of the National Committee office with the colleges tended to be with schools of international agriculture or campus ministry. Today, at various colleges, more than 15 separate schools and departments participate in the teleconference, from anthropology to women's studies and journalism. A special section of the 1990 Study/Action Packet will be designed to encourage and expand curricular integration of the various teleconference components, showing success stories from past years as well as new ideas developed at a special WFD advisory committee meeting of participating colleges held in February of this year.

Off-campus outreach has been another growth area, with organizers and community leaders involved in joint planning of local anti-hunger activities, elected officials and leaders invited to participate in panel programs on food/hunger issues, and food or fundraising activities benefitting local offcampus groups, have led to year-around cooperation in alleviation of local hunger problems.

PROGRAM SUMMARY

The telecast from George Washington University television studios opened with an introduction by Eddie Albert followed by a taped welcoming statement on the theme by FAO Director-General Edouard Saouma who briefly described the range of environmental problems affecting food production and noted his intention to discuss these in the days ahead with U.S. Secretary of Agriculture Yeutter. Moderator Judy Woodruff then noted her hope that the program would go beyond statistics of environmental problems into issues of international cooperation, referring specifically to problems dividing the rich and poor countries raised in the Brundtland report. She then introduced the guest panel and asked each to make a brief statement of their positions.

Senator Gore then began the panel discussion by noting the links between the environmental challenge and world population growth, and the consequent pressure on food resources. He said that a crisis was rapidly coming to a head and would require tough decisions, particularly in developed countries, in both domestic and foreign policies. On the foreign side, he specifically mentioned the need to ease the debt burden on poor countries. Ambassador Lewis of Canada then spoke of the same need—for action by the rich countries at home and also in their relations with the developing group—but said he could not see any seriousness on the part of the rich countries to act. He said that critical decisions need to be made in the next decade that would affect the future of the world, but that the moral leadership was nowhere evident.

Dr. Miller noted that the issues of food, environment and development were closely interconnected and that the response to the problems would have to be on two levels simultaneously—the need for research into the nature and degree of the problems and a second need for corrective political action which she said would be required even before research could be completed. The two would need to go forward together. Dr. Kurien said that he wanted to underscore some of the arguments made by Ambassador Lewis. Using India as an example, he said that the 800 million people of his country could not be denied the fruits of development, and that development inevitably would entail exploitation of resources. He added that since India had a democratically elected government, any leadership which put environmental protection above the basic needs of the people for food and jobs would be quickly rejected.

The moderator noted the apparent conflict in the statements of Dr. Kurien and Sen. Gore, and asked the panelists to comment further on that point. Sen. Gore said there could be no doubt that starvation would have a higher priority than environmental purity, but called for a changed definition of development which would take environmental degradation and resource loss into account. He also said developing countries might be more willing to take strong measures if there was leadership shown in the rich world in solving its own, even larger, problems. Ambassador Lewis underscored the dilemma of financial transfers, pointing out that huge amounts of capital were now moving from poor countries to the rich. Lewis said the natural response of these countries was to say, "Help us with our poverty problem or we won't be able to help on the environment side."

Dr. Kurien said that this smacked of a plea for charity, while in the case of India they felt more need for fairness in trade and other relations such as technology transfer at reasonable cost. But he felt that India could do more to control its population growth, both human and animal. Sen. Gore said he believed the possibility was near when environmentally sound technologies getting locked into the environmentally polluting models of Western development. Also, he noted, there still were areas of importance for knowledge transfer from the poor to the rich countries, citing as an example aspects of biological diversity. Dr. Miller used the example of Madagascar to underscore some of these points. An enormous genetic diversity was being whittled away in that country, she said, as forests were cleared for fuelwood and cropland and also wood for export to meet debt payments. A technology such as solar energy could help to solve all of these problems simultaneously by providing energy, conserving genetic resources and freeing up funds for domestic investment.

Other national examples of problems and solutions were discussed. Sen. Gore noted the emerging concept of debt-for-nature swaps, with some positive examples in Costa Rica. He and Dr. Miller noted an area of converging interest could be the very high use of coal, and consequent carbon emissions, in China and the U.S. Sen. Gore said he had found very great interest in environmentally sound technology not only in China but many other countries he had visited. Ambassador Lewis and Dr. Kurien returned to the need for action in the rich countries. Dr. Kurien cited reports that methane from Indian rice fields was a contributor to "greenhouse" gas, but so were the emissions caused by automobile air conditions in the U.S. But the U.S., he said, wasn't giving up its air conditioners. Ambassador Lewis said that despite the Brundtland report, already two years old, not a single country in the Western world had changed its policies meaningfully in terms of environmental protection.

Sen. Gore said that he recognized that the U.S. was the largest atmospheric polluter, but that a start on a cleanup had been through the international agreement to reduce chlorfluorocarbons. He added that environmental issues were coming to the front of political conern and that that was a reason for optimism. Dr. Kurien added that despite his comments about international aspects, India internally was very aware of of environmental problems and was doing much more than in the past in reforestation and research into environmental technologies such as solar energy. Dr. Miller said there still was not a sufficient sense of urgency and feared that a disaster might have to occur to wake up the world. Ambassador Lewis called on non-governmental organizations of all kinds to step up pressure on their national governments.

THIRD HOUR QUESTION/ANSWER

The third hour of the teleconference was opened with a greeting to participating schools from Secretary of Agriculture Clayton Yeutter, who noted that USDA works closely with FAO and other organizations in the search for solutions to food/environment problems and noted that this challenge would open the way to important and exciting career opportunities in the years to come. The moderator began the question and answer part of the program.

Questions from the sites in the third hour (or answered in writing by panelists afterwards) centered around the points raised in the initial presentations. More than 100 questions were received from the sites. Subjects in which there tended to be very broad interest—both in number and geographic spread—included what the main components of a new model of development could be, whether the world would face an absolute food deficit as population rises, and how could the enormous agricultural production capacity of North American farmers be used to support sustainable agriculture.

The responses to these questions by the various panelists showed a wide divergence of views. On development models, there was agreement that some new methods were required to be sure that economic measurements would reflect environmental impact, requiring the pricing of what were formerly considered free goods, such as air and water, and payment of pollution. An area of disagreement was revealed between Ambassador Lewis and Sen. Gore in that Ambassador Lewis felt that this required sharp restrictions on the market economy because corporate auditing would not voluntarily include social costs. Sen. Gore felt that government interference was as often the problem as the solution, that the market had to be used to find the true cost of environmental elements and that there had to be an acceptance of market forces.

On the question of future food supply, Sen. Gore noted that farming skills and technology had always enabled the world to stay ahead of population, but that the new element was that many modern farming techniques that now provide food surpluses

were in themselves environmentally unsustainable—increasing soil erosion and dependency on inorganic chemicals, depleting ground water, etc. Dr. Kurien noted that food security was linked to population growth in a different way, in that food and other benefits of development were the key elements in reining in population. But he said this debate was too often confined to a national context and should include the responsibility of the advanced countries for Third World poverty. Ambassador Lewis doubted there would be a global food shortage and said he disliked the food-population equation. It would be better to have sound policies for each, he said, for separate reasons. Dr. Miller agreed that the key to slowing population growth lay in improved social and economic opportunity, but was less certain that food deficits could be avoided. She noted that the very large gains in food production of the past several decades had stopped and that population was now growing faster than food supply on a global basis.

In answer to questions dealing with the role of North American farmers, Sen. Gore suggested that some of the problems of farmers would be mitigated by a different approach to agriculture which would be more environmentally sound and sustainable. He called for research into farming practices and institutions that will enable us to increase productivity on smaller farms using low-input agricultural methods. This would also benefit developing countries, he added. Dr. Kurien said he thought the governments of the U.S. and Canada should stop trying to make farmers reduce production, but instead seek better ways to use the surplus food to solve food and development problems in the Third World. Ambassador Lewis said he thought the problems of U.S. and Canadian farmers had more to do with the competition with the European Community than with food aid, and that he doubted that food aid could be a major part of the answer. Food aid was important as a moral consideration rather than an economic solution, he said.

CONCLUSION

In conclusion, moderator Judy Woodruff and host Eddie Albert noted that despite differences between the panelists there was a strong consensus that the global environmental crisis was developing rapidly and that the links between food security, environmental protection and development progress for the poor countries were inextricably linked.

## TRIBUTE TO JOHN ROACH

### HON. PETE GEREN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GEREN. Mr. Speaker, Friday night, May 18, 1990, the Society of Distinguished Americans will present its annual Horatio Alger Award to 12 great Americans who have overcome hardship to achieve notable success in their field. One of those award winners will be a great citizen of Fort Worth, TX, John Roach, chairman of Tandy Corp., but none will be more deserving.

Like other Horatio Alger Award recipients, Roach was not born with the proverbial silver spoon in his mouth. The only child of John and Agnes Roach, John Roach, Jr., had his first job waiting on customers in his father's grocery store in Fort Worth. It was in that job that he learned his first lessons about the virtue of hardwork and loyalty.

After earning his bachelor and masters' degrees at Texas Christian University, and working for 2 years at the Texas Consumer Finance Corp., Roach moved on to Tandy Corp., running its data processing operations. It was there that he met Charles Tandy and found the opportunity to become one of this country's most respected business leaders.

While under Charles Tandy, Roach climbed through the ranks of the organization. Three years after Tandy's death in 1981, Roach was named chief executive officer, making him one of the youngest chief executives of a major American company at 42 years old. One year later, board members elected him chairman.

John Roach has come to epitomize the notion of hard work, opportunity, and service to his fellow man. He has dedicated himself to being the best he could be in the three areas that are most important in his life: being a father, a community leader, and business leader.

With his wife, Jean, to whom he has been married for 30 years, he has raised two daughters, Amy, 23 and Lori, 17. He has been active in numerous civic organizations in Tarrant County including the United Way and the Arts Council of Fort Worth and Tarrant County.

But, in many ways, John Roach is still that kid selling groceries in his father's store. When recently asked what he did for a living, he responded, "I peddle a few radios."

This radio peddler has made Tandy's chain of Radio Shack stores into an American institution that rivals McDonalds in national presence and number of franchises. This man, whom his employees affectionally call J.R., has turned the Tandy Corp. into a company with annual sales of more than $4 billion.

Norman Vincent Peale founded the Society of Distinguished Americans over 40 years ago to motivate and educate young people to the promises held by the free enterprise system. When John Roach receives his Horatio Alger Award this Friday, he will be in the great company of other prestigious Texans; namely, Ross Perot, Trammel Crow, Gov. Bill Clements, Tom Landry, and John Connally.

John Roach and his fellow Alger Award winners could teach us all a thing or two.

## A TRIBUTE TO THE HARVARD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Harvard Police Department for their dedicated and outstanding service to the people of Harvard, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Harvard Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Charles Perry and those who serve in the Harvard Police Department:

William Castro, Richard Walters, Edward Smith, John Coates, Keith DeBruin, Ben Lavine.

## TRIBUTE TO ST. JOHN THE BAPTIST RUSSIAN ORTHODOX GREEK CATHOLIC CHURCH OF SINGAC, NJ, ON ITS 75TH ANNIVERSARY

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ROE. Mr. Speaker, it is with the deepest reverence and the greatest sense of pride that I rise today to pay tribute to an outstanding house of worship in my Eighth Congressional District of New Jersey which, for three-quarters of a century, has been a spiritual focal point and a beacon of faith for countless numbers of worshipers in the greater northern New Jersey area.

I am speaking of St. John the Baptist Russian Orthodox Greek Catholic Church of Singac, NJ, which is celebrating its 75th anniversary in 1990. This landmark occasion will be observed with a gala banquet on June 10, 1990, at the First Russian National Home in Singac. I know this event will be a source of great pride to the entire congregation, and especially to this fine church's spiritual leader, Rt. Rev. George Burdikoff, pastor, and church president, John Humecky.

Mr. Speaker, as a means of providing you and our colleagues with the details of this important church, I would like to insert for the RECORD the official history of St. John the Baptist Russian Orthodox Greek Catholic Church:

ST. JOHN'S RUSSIAN ORTHODOX CATHOLIC CHURCH

The establishment of chruches in Little Falls reflects European conditions which provided the impetus for emigration to America of large numbers of people from a particular region. The year 1880 is generally recognized as the beginning of the change in immigration patterns when the majority of immigrants were no longer from Western European countries. For 40 years following 1880 the majority of immigrants came from Eastern European countries such as Italy, Hungary, Rumania, and Germany.

The founders of St. John's Russian Orthodox Church are representative of the new immigration pattern. Difficult economic conditions and persecution of minorities forced many from Galicia and Carpatho-Russia in Austro-Hungary to the New World, and a small group from this area settled in Little Falls and found employment in the carpet mill.

Some of the early residents traveled to Garfield to attend the Russian Orthodox Church of Three Saints and St. Peter and Paul Russian Orthodox Church in Passaic. After several years they gave thought to organizing their own parish although they were few in number.

During the period of massive immigration to the U.S., it was customary that small enclaves of a particular ethnic group set up social organizations to provide social services, including life insurance programs within their own community. In 1914 such a group was organized as St. John the Baptist Russian Orthodox Brotherhood. This group became the founders of the church, holding their first services in the homes of Havrill Dutkevich and Theodore Rock by Rev. Alexander Alehin of Garfield.

It not long before it was decided to erect a church building at which time two lots on the corner of Weaver Street and Van Pelt Place were purchased for $450, and 2 additional lots were donated by B. Grunauer. Plans for a small wooden chruch were immediately laid, and construction began with the labor and offerings of the parishioners, John Kobelka, a parishioner, agreed to construct the edifice, and the cornerstone was laid on June 28, 1916. In 1921 the rectory was constructed and the interior of the church was decorated with Holy Icons painted by the pastor, Rev. Nikifor Kepitanchuk.

With the influx of people to Singac, the parish grew from the original 25 families to a community of approximately 200 families in 1947. This growth necessitated a larger edifice and on January 29, 1950, an Executive Building Committee consisting of Steve Dutko, Peter Kolanich, Walter Kusha, John Kulick, and the Pastor, the Very Rev. Peter Karel, was established and empowered to obtain suitable plans for the new church. It was decide to construct the new church at the same location.

On September 30, 1951, architects S.E. Greydanus and Son were retained to draw the plans and specifications, and on June 25, 1952, a contract with Prospect Builders was signed. The last service held in the old church was on June 22, 1952.

The construction of the new church began immediately and during the period of construction chruch services were held in Public School No. 3 and the Singac Firehouse. The new edific was blessed on November 8, 1953 by His Eminence, Most Rev. Leonty.

In 1970 a new parish rectory was erected, and at the same time the Cultural and Education Building was constructed to serve the educational needs of the Sunday School and community athletic programs. Additional property on Tolstoi Place and at the end of Van Pelt Place were purchased amounting to nearly 3 acres. Father Karel retired in 1960 after serving for 22 years and was succeeded by the Rev. Father John Sochka who served until 1967. The Rev. Michael Kiriloff began his pastorate in 1968 and was succeeded in 1971 by the Right Rev. George Burdikoff, the current pastor.

In 1988, the Russian Orthodox Church celebrated its millennium of Russian Orthodox Chirstianity in Russia. During that year St. John's was honored with a visit from Metropolitian Gideon Novosibirsk, a standing Member of the Bishop's Synod of the Russian Orthodox church of Russian. Many local parishioners have made pilgrimages to the Mother Church in Moscow also travelling to Kiev and Lenningrad.

The church purchased an estate in Montville in 1979, where a chapel, Christ the Savior, was established.

Evidence of the stability of this religious community is the fact that membership has been maintained at 350 families for nearly 40 years since the erection of the new church in 1952. Its members have made many contributions to the Little Falls community including service in the local government and on the school boards.

Mr. Speaker, I appreciate the opportunity to present a portion of the history of this distinguished church that has remained dedicated to helping others and guiding them spiritually. As St. John the Baptist Russian Orthodox Greek, Catholic Church of Singac celebrates its 75th anniversary, I know that you and all of our colleagues here in Congress will want to join me in extending our warmest greetings and felicitations for both the service and guidance it has provided for its community, State, and Nation.

## FARMERS AND THE LAND

### HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. KOSTMAYER. Mr. Speaker, "It is the countryside that needs preserving * * * especially the land still farmed around the cities," so writes Henry Fairlie in the attached piece from the April 1 issue of "The New Republic."

And while, as Fairlie writes, Americans often think first of protecting the majesty and drama of the Grand Tetons or the Rockies, we seem to have forgotten that part of America where, "everywhere it is soft, rolling and green with little streams, and small roads that dip and rise and twist."

"Get in a van and drive across Pennsylvania," Fairlie advises or through, "Ohio—Indiana, Wisconsin—Minnesota—Iowa—Missouri—even eastern Kansas: Across and through them all, you could not ask for lovelier land."

Americans marvel at the loveliness of Britain, at the tiny villages of France and Holland.

Is Vermont in October less astonishing?

Have you driven across the heart of Iowa and not admired the endless stretches of Lush August Green interrupted only by the barns, silos, and white clapboard farmhouses?

Have you seen the Amish farms in Lancaster County, PA, or the stone farmhouse in Pennsylvania's Chester and Bucks Counties, built before the revolution?

Have you been in the Hudson Valley or the old mill towns of western Massachusetts?

Mr. Speaker, if you have not, then I advise that you do so quickly. These reminders of what America once was are rapidly disappearing.

Efforts to protect them have largerly failed; at the Federal level, there is really no effort at all.

This is why so many of us believe the people are way ahead of Congress and the administration in seeking ways to protect the America countryside.

As Mr. Fairlie writes, "The United States has no Federal or even any strong State legislation like Britain's Great Town and County Planning Act, passed in 1947 * * *."

As chairman of the Oversight Subcommittee on the Interior Committee, I know what Mr. Fairlie is talking about. In hearings over the last year, I have seen it face to face in Killington, VT, where a ski developer wants to cross and mar the Appalachian Trail, in the Hudson Valley where a developer wants to develop the last and largest privately owned parcel of land in metropolitan New York, at Fort Meade, MD, midway between Baltimore and Washington where the Army wants to sell the largest open space left between those two cities to housing developers, at Gettysburg where developers now have the right to build condos adjacent to the battlefield itself.

In New York and Maryland, in Vermont and Pennsylvania, we have no Rockies or Grand Canyon, few areas suitable for wilderness, few rivers still wild and scenic. But we have the countryside, the countryside where America was born and raised and where she lies slowly dying from abuse and neglect.

Henry Fairlie sees it, Americans everywhere see it and weep. Fairlie is right when he writes, "The beauty of America is about to be lost forever."

FARMERS AND THE LAND

(By Henry Fairlie)

If I had been elected president last year, I would have vetoed the farm credit relief legislation. The measure was a knee-jerk (if not simply a jerk's) response to the plight of some farmers on the part of not only legislators from the farm states but far too many city Democrats. It proposed the kind of bail-out that has brought government aid to needy groups into so much disrepute. But having said that, farming still needs our support.

Whenever there is a "farm crisis," the ignorance and prejudices of our urban society are revealed. There is almost no understanding, or even attempt at understanding, our interest in sustaining a healthy agriculture, and with it a vigorous, distinct rural society. Most of the commentary on farming is written by people who were not raised on a farm; have perhaps never been and certainly never worked on a farm. Rather they use the countryside for skiing, wilderness hiking, white-water rafting, or summering in some irrepressibly quaint cottage or condominium on the edge of a potato field not too far from the interstate.

Generations of piffle spoken in defense of the small farmer by farmers and city folk alike have created a false picture of him. The phrases "small farmer" and "family farmer" have to be used with care these days, because technology has so altered the character of farming. For the moment we may speak of the individual farmer. Our interest in preserving the individual farmer is not primarily utilitarian. We do not have farmers only to supply us with food. If the efficient production of food were our only interest, we could virtually do without the individual farmer.

It is also difficult to defend the individual farmer on the ground that his "way of life" is a model for us all. Farmers are not notice-

ably selfless or public-spirited. What most French peasants did after the Second World War was hide their wheat until the price of flour in the devastated and starving cities of France skyrocketed, a meanness that cannot be attributed solely to the fact that they were French. There is cockfighting in the San Joaquin Valley. There is dogfighting in Dane County, Wisconsin. My daughter is manager of the clinic of the Dane County Humane Society, and therefore knows something about it. Her stories about the way of life of some Wisconsin farmers can make your hair stand on end. Closeness to the soil may yield an earthiness of spirit, but that earthiness does not then necessarily yield hearts overflowing with human kindness.

Our main reason for sustaining the individual farmer is stronger and more urgent. The 1980 census was the first since 1820 to show that the rural areas are growing more rapidly than the cities. We have known from the statistics that this has been happening since the early 1970s. But it took a long journey around the country this summer to show me how massive this movement is. It is happening from coast to coast, from the tropics to the snows. This dispersal of population is reaching the same scale as the movement to the cities that had more or less been completed by the early decades of this century.

The main reasons for it are simple. First technology no longer needs concentrations of resources—water, power, coal, and a network of heavy transport—which the smokestack industries could find only in the big cites. Second, people are fed up with commuting from ever more distant suburbs to high-rise offices downtown and are putting a new value on ease of access to the countryside for their increasing leisure.

In many small cities there is another attraction. The new industries like to be near a university or college and draw on its resources for research and its graduates for recruitment. State College, Pennsylvania, had a population of only 36,130 in 1980, yet the Bureau of Census had to declare Centre County in which it stands a Standard Metropolitan Statistical Area because State College (with the campus of Penn State right in its center) has been drawing new industries whose workers then disperse into the surrounding towns and villages.

Centre County is lovely—still, for now. But one cannot but wonder what will happen to it by 2000. What will happen can be seen in Santa Clara County, California, otherwise known as Silicon Valley. Even in 1950 Santa Clara had a population of less than 300,000. It is now more than four times as large. What in 1950 was still one of the loveliest and most fertile orchards in America—the whole county an orchard—is now only the latest, and one of the worst, example of the urban or suburban or exurban or rurban sprawl that Americans never seem to have the will, wish, interest, foresight, vision, or simple care to prevent. Silicon Valley is a pox on California, and insofar as it represents an American blindness it is a national disgrace.

Where was the Sierra Club as the sprawl into Santa Clara began? Probably trying to save one more redwood, when America has more redwoods than any country sensibly needs. It is not the wilderness that needs protecting in America: America has so much wilderness it is ridiculous. It is the countryside that needs preserving, and that means the farmed land. It means especially the land still farmed round the cities. This countryside is not Nature, but Nature made civil: made civil by man and kept civil by the farmer, generation after generation.

Americans talk too often only to the grandeur in their land—the Rockies, the Grand Canyon, the Mojave Desert. They go to England (or France or Italy) and come back praising its soft landscape, its green pastures, its little hedgerow, its country lanes. Get in a van and drive across Pennsylvania, or across the whole of the Middle West, and everywhere it is soft, rolling, and green, with little streams, and small roads that dip and rise and twist. Ohio—Indiana—Wisconsin—Minnesota—Iowa—Missouri—even eastern Kansas: across and through them all, you could not ask for lovelier land. This America could not be more comely, and everywhere, without exception, it has been made and kept by the farmer. It is not, and will not be, safe with anyone else.

For there is another threat to the true countryside of America: the increasing leisure and thirst for the outdoors of the new affluent city people of the high-technology and service economy. People who use the country for recreation do not keep it. They destroy it. No one trashes the country more than the skiers. First they scar a mountainside, just as plainly as does strip-mining. Then round the base of the mountain grow subdivisions and ribbons of chalets. In come the boutiques and delis, the squalor of our time. Have you seen Vermont—lately? Look around Mount Killington: for mile after mile is a land tortured and screaming, the work of the skiers.

Go anywhere—the beauty of America is about to be lost forever. The land will become acres and acres of wilderness, huge protected ranches for Robert Redford, sprawling encampments of the high-technology industries, and ribbons of weekend homes, summer homes, second homes, and recreation resorts. Look at Lake Tahoe.

I often wonder what picture comes to David Stockman's mind when someone says "America." Can it only be of silicon chips? (Even they are not doing very well in Santa Clara—not nearly as reliably as the orchards did for so long.) The United States has no federal or even any strong state legislation like Britian's great Town and Country Planning Act, passed in 1947, which not even Margaret Thatcher has thought to dismantle. Who is going to save the true land of America? You cannot trust most of the environmentalists. They are protectors not of the land, but of the privileged. We have only the farmer, whose own self-interest, not any idealism, makes him keep the land for us. Sustaining him for this purpose is vision.

On Vashon Island off Seattle in the Puget Sound—an island to which I went by ferry to visit a friend—I gazed all afternoon across the broad waters to Mount Rainier. In the dusk of the evening a young doe came down and stood in the Sound. The local authority has been given the power to buy farmland that is threatened by developers, then to lease it back to the farmers, so that the farmland may be kept in perpetuity. That is all that is needed. That vision, that legislation, the small amount of funding.

But can the individual "small," "family" farmer even then survive? The answer is "Yes." In some commodities, especially the farther you go west, "agribusiness" is king (although even then not unchallenged). But you cannot expand, say, a dairy farm the way you can a wheat farm in Kansas, or even a beef-cattle feedlot in Colorado. Dairy farming requires constant attention to, knowledge of, even intimacy with, the herds of cows. Hogs too are rather particular about who looks after them. I could take you to a hog farm in Ohio that is about to be passed on to the son. I could take you to a 60-acre grape farm in New York—and even a ranch in Montana which is in the hands of the fourth generation of a family.

Wherever these people are, the loveliness of this land is safe. Wherever they are driven out, the land is trashed and not brought back. It is up to Americans to decide whether they wish their country to remain the only one of such size in the world in which particular beauty is kept. It means saying the individual, now not so small, but still often "family" farmer.

## A BUSINESS SUCCESS STORY

### HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ANDREWS. Mr. Speaker, I would like to alert my colleagues to an article in the May 15 Washington Post about the remarkable success of Dresser Industries and its chairman and CEO, Jack Murphy, in my home of Houston.

The article chronicles the Bush administration's recent award to Dresser for its tremendous exporting of high-quality industrial tools around the world. Last year, Dresser sold $64 million in industrial tools—exporting twice as many products as its nearest U.S. competitor.

All this takes place at a time when conventional wisdom suggests that U.S.-based manufacturing can no longer compete effectively in world markets. The article indicates that if there is a secret behind Dresser's success, it's a simple, commonsense management strategy and a good, workable relationship with union and non-union employees.

I am inserting this article in the RECORD because I think that Mr. Murphy's and Dresser's success story can be an aspiration for many American businesses.

[From the Washington Post, May 15, 1990]

DRESSER'S HIGH ROAD TO SUCCESS—TOOLMAKER FOCUSED ON QUALITY PRODUCTS MADE IN THE UNITED STATES

(By Stuart Auerback)

HOUSTON, May 14.—Today, the industrial tool division of Dresser Industries Inc., is a Texas-sized success story.

Its $500 pneumatically powered screwdrivers, its $3,000 angle nut wrenches and its $10,000 precision drills are sold around the world to manufacturers of cars, planes, power generators and oil refining equipment.

Sales totaled $64 million last year, a 25 percent increase over four years ago, and its exports have doubled in that period, accounting for one third of sales.

And it did all this while staying at home, at a time when competitive pressures and conventional wisdom seemed to dictate a retreat from U.S.-based manufacturing.

It was in 1983 that Dresser Tool came to the crossroads. The dollar's value was at record highs then against the Japanese yen and other international currencies, enabling foreign competitors to cut prices on import-

ed tools and flood the U.S. market while boosting the price of U.S.-made exports in foreign markets.

To survive the high dollar, Dresser's U.S. competitors opened production centers in low-cost Asian countries such as South Korea.

But T.R. Hurst, president of Dresser Tool, decided to take his company on a different tack—focusing on high quality, expensive products, all made in the United States. He emphasized service and, once the company gained ground domestically in its chosen niches, he aggressively expanded its sales operations overseas.

"We know that we have got to be competitive in manufacturing in the world market. If we couldn't compete in the world, we couldn't compete domestically," said Hurst. "We sat here [in 1983], looked at ourselves and said, 'We are going to be competitive with a made in the USA product.' We decided not to be the biggest but to be profitable and to build on service, quality and technical support. We left the low-cost tool business to others."

It worked. Yesterday, Dresser Tool, one of 18 divisions of Dresser Industries, was honored by the Bush administration for its strong export performance, winning a presidential citation that was presented by Commerce Secretary Robert A. Mosbacher. Commerce officials said that Dresser Tool exports twice as many of its products as its nearest U.S. competitor.

Mosbacher paised Dresser for "turning in a Texas-sized performance. . . . Remaining competitive through advanced manufacturing technology is one of the keys to helping America expand its exports," he added.

Dresser tools are used in aircraft facilities around the world, both to build new planes and to repair existing ones. They have been purchased by major U.S. and foreign car manufacturers for plants in this country and overseas. After selling to the West German factories of automakers such as BMW, Audi and Volkswagen, marketing Vice President M.L. "Jack" McDonald said the company has begun moving into Japanese car plants in this country and Britain and aims eventually to crack the Japanese domestic manufacturing market.

"These are not your dime-store tools," said Hurst, whose company has added a new line of pneumatically powered multiple-headed tools—a series of wrenches or screwdrivers attached to one power source—that cost as much as $150,000 each.

"Our tools are not designed for low-cost manufacture. They are designed to fit the worker's hand . . . when he has to use them eight hours a day. We are not going to win contracts because we are the low boys. We are going to win because we have something better to sell," Hurst said.

Dresser Tool took a big gamble in 1983 when it decided to become a successful exporter while expanding domestic sales. The company completely restructured its manufacturing operation and forged a strong cooperative alliance with its unionized work force that allowed it to cut through antiquated rules and provide the flexibility needed to compete with low-cost foreign manufacturers.

"Had we not done something eight years ago, we might not be where we are today. If our costs had kept going up, we'd be in deep trouble," said Hurst.

"If we hadn't moved overseas," added McDonald, "we would have opened the door for new competition here."

Before moving overseas, though, Dresser had to set its domestic manufacturing house in order. "We don't have anything fancy. You will see a lot of common sense manufacturing here," said Hurst.

Such as bringing to and machine parts to each workstation instead of having well-paid (average salary $14.50 an hour, $35,000 a year) machine-tool operators wasting time standing around the toolshed. Or making the workers responsible for cleaning their own areas, freeing 17 of 20 sweepers to learn better-paid manufacturing jobs.

The company upgrade the equipment, and under the law work rules employees move from one computerized machine to another as the work flow dicates.

"A flexible work is a key to our quality," said Mark A. Ideus, manager of shop operations, who started out on the factory 21 years ago and was the local president for the International Association of Machinists & Aerospace Workers 12 years ago before joining management.

So Maxie Mendoza is happy to do two jobs at once. While his computerized machine tool is performing complex grinding and drilling operations on a precision angle-head wrench—a job that takes 10 to 12 minutes—Mendoza assembles a component for another machine, fitting one part into another by hand.

To union President Willie Allen, who has worked here for 18 years, this kind of flexibility makes sense. "If they get the business, we make the parts. That's my job. It works out real good," said Allen.

"This is a union operation and we build a United States product made in the U.S.A. by union workers."

## A TRIBUTE TO THE METHUEN POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Methuen Police Department for their dedicated and outstanding service to the people of Methuen, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Methuen Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Donald DeSantis and those who serve in the Methuen Police Department:

Angelo M. Alaimo, Joseph D. Alaimo, Vincent A. Alaimo, Albert F. Ange, Shae A. Baddour, M.W. Blanchette, William H. Brown, Gary, J. Cloutier, Donald J. Craig, Shaun, M. Cronin, Stephen P. Debe.

David R. DeBurro, Donald DeSantis, Thomas E. Donovan, John A. Earnshaw, Michael J. Ewing, Walter A. Flanagan, Walter E. Fleming, Thomas A. Fram, Larry F. Giordono, Richard A. Grant, Edward J. Guy.

Raymond Guy, Joseph M. Harb, Michael E. Hates, Michael J. Havey, N.A. Higginbottom, Tod B. Himmer, Frederic E. Hoyte, Richard B. Kirkman, Frank E. Korn, Michael J. Lahey, Frank J. LaScola.

Donald J. Lavigne, David A. Lee, Patricia J. Lough, William A. Lough, Bruce A. MacDougall, Maria Maiuri, Carolyn J. Marcello, Kevin J. Martin, Thomas F. McMenamon, James A. Mellor, Daniel J. Merrill.

Roland J. Mignault, Russell B. Moynihan, Robert A. Murad, Terrence F. Neel, Christine A. Nicolosi, Larry J. Phillips, Richard N. Pilz, Donald A. Privitera, William E. Rayno, Jose L. Santiago.

Joseph A. Scully, Anthony T. Simone, William E. Sieone, Joseph E. Solomon, David P. Stead, Alfred J. Torrisi, Richard N. True, Kevin S. Waithe, Jon P. Walsh, Michael J. Wnek.

## DRIVING MISS DAISY

### HON. GEORGE (BUDDY) DARDEN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. DARDEN. Mr. Speaker, after 664 performances, Alfred Uhry's play "Driving Miss Daisy" has closed in Atlanta's Alliance Studio Theatre, making it the longest running production there.

But the poignant story of an elderly Jewish woman and her black chauffeur lives on. Their special relationship spanning several decades has captured the hearts of all Americans in the Academy Award-winning movie of the same name, starring Jessica Tandy and Morgan Freeman.

The following article by Atlanta Journal-Constitution writer Eileen M. Drennen chronicles the closing of "Miss Daisy" in Atlanta and captures the very essence of that wonderful experience in a few well-chosen words.

RECORD-BREAKING RUN ENDS AS IT PLAYED—WITH DIGNITY

(By Eileen M. Drennen)

"Driving Miss Daisy" will always have a special hold on Atlanta.

Native son Alfred Uhry's Pulitzer Prize-winning play is the city's longest-running theater production. It is responsible for bringing Atlanta people and events to life on stages from New York to Copenhagen to Moscow, and for bringing the city to the big screen in this year's Oscar-winning film version.

So you might have expected "Driving Miss Daisy's" last stand at the Alliance Studio Theatre to be filled with tears and fanfare and ballyhoo. But much like the play itself, Sunday afternoon's farewell stage performance—No. 664—was a restrained but dignified affair.

The three stars—DeAnn Mears as the feisty Jewish widow Daisy, William Hall Jr. as her patient and perceptive black chauffeur Hoke, and Al Hamacher as Daisy's son, Boolie—held hands as they took their bows.

Then they graciously accepted bouquets containing white daisies, cradled them in their arms and walked offstage.

There was no second or third or fourth curtain call. Just a warm, polite standing ovation.

It somehow fits the play's genteel Southern character.

The final performance wasn't planned to coincide with Mother's Day, but the fact that it did added a certain resonance.

The sellout audience of 200 was mainly mothers whose husbands and children had brought them.

Ginny Marchant of Marietta came with husband Bill thanks to two Mother's Day tickets from her daughter. Peg Coleman—visiting from Virginia—came with daughter Jayne Johnson of Dunwoody.

"We got tickets the first time we called this weekend," Ms. Johnson said with glee. "Someone had turned in their tickets. We haven't seen the movie yet, We wanted to see the play first."

While watching the actors develop the relationship between Daisy and Hoke, audience members sniffled and wiped away tears when you might expect them to—in the scene when Miss Daisy tells Hoke he's her best friend, and at the end, when Hoke feeds Miss Daisy pumpkin pie on Thanksgiving because her hands shake too much to feed herself.

It was, like the play, filled with the spirit of family.

"One of the scenes of 'Driving Miss Daisy' has to do with the bonds between parents and children, and in this case, as in so many cases now, where parents have cared for children, then it becomes the children's responsibility to care for the parents," said Sandra Deer, the Alliance's resident playwright.

The Alliance Theatre family—the actors, stage crew and support staff—were treated to a special celebration after the performance. In the Woodruff Arts Center's Circle Room, they drank iced tea and champagne and feasted on "Hoke's fried chicken" and greens.

"It's been a real privilege to do the play here in Atlanta," Mr. Hall said. He leaves for Gainesville, Fla., on Tuesday for yet another production of "Daisy." (His understudy, Kenny Leon, will play Hoke in four special Alliance matinees for high schools this week).

He will play the same part in Gainesville, but Mr. Hall doesn't think it will be quite the same.

"Everybody's been like family here, and that's the worst part—leaving family behind," he said. "And if I say any more, I'm gonna start to cry."

Stagehand Jonathan Dew, 25, said "Driving Miss Daisy" got better every time he saw it—and he saw it 500 times.

"Mary Nell [Santacroce, the Alliance's original Daisy] said it best," he said. "She said it was like good music, like Mozart—every day you hear a new note, you hear something new in the show that rings true."

The "Daisy" lovefest with Atlanta lasted some 20 months at the Alliance Studio Theatre. It began Sept. 28, 1988, with Ms. Santacroce and Mike Hodge as Hoke.

The off-Broadway production in New York, which preceded the Alliance's staging, starred Dana Ivey (Ms. Santacroce's daughter) and Morgan Freeman (both of whom won Obies for their performances). Mr. Freeman went on to star with Jessica Tandy in the film version, which was shot in Druid Hills and around Atlanta. Last March, the movie won four Oscars, including best picture, actress (Miss Tandy), screenplay adaptation (Mr. Uhry) and makeup.

While the play's delicate wit and charm speak to everyman, Atlantans especially embraced "Daisy." They have often driven the same roads as Hoke and Daisy.

For her part, Ms. Santacroce—who performed as Daisy until last New Year's Eve—was philosophical about the end of what's come to be called "Atlanta's play."

"It's like a flower," said Ms. Santacroce. "It can't stay in full bloom. That's not the way things work. We've got to let it have its day, and then turn it into a memory."

## REFORM IN ALBANIA MUST BEGIN WITH ATONEMENT FOR PAST INJUSTICES

### HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BUECHNER. Mr. Speaker, Albania has recently indicated that it will begin to lift the veil of totalitarian oppression with which it has been shrouded for the last 50 years. No doubt the ongoing repudiation of communism around the world is a major factor in this decision. But, regardless of the underlying reasons, freedom-loving people around the world should be pleased. Albania has been far too long, a self-annointed social and political pariah isolated by its anachronistic adherence to the policies of the great villian, Joseph Stalin.

Yet, even as we welcome this opening we must not be blind to the past, for although the past may be forgiven it cannot be ignored. Only by examining the conditions as they have existed in Albania for the last half century, will we understand what lies ahead—and what must be done before moving on.

What we learn from our examination leads inexorably to the conclusion that the road to freedom in Albania will not be an easy one, for the history of Albania is one of infamy, oppression, religious persecution, and blatant disregard for human rights. The Communist Government of Albania must shoulder the responsibility for the injustices it has heaped on its ethnic community—particularly Albanians of Greek ancestry.

Today, there remain more than 400,000 ethnic Greeks in Albanian, survivors in what can only be termed a war of cultural genocide. In the past, ethnic Greeks were targeted as the Communist government attempted to subvert various ethnic groups to the collective will of tyranny. Uprooted from their ancestral homes, ethnic Greeks were forced to resettle in other parts of the country—geographically severed from family and lifetime friends. To ensure the destruction of ethnic identity, families with "inappropriate surnames" were obliged to change them. The Greek orthodox religion was outlawed because it was seen as a devisive element to the propitiation of communism. Atheism became the official policy. Priests and religious leaders were jailed. Churches were closed or torn down. Believers were forced to subvert their religious beliefs or face the wrath of the Albanian Government.

Yet, the Greek Albanians persevered; perhaps beaten into silence they have not been beaten into submission. Isolated and driven from their churches, they remain close to their God. They have been torn from their homes but they have never been torn from their heritage, and though lacking the strength of arms to oppose their oppressors they remain undefeated.

Mr. Speaker, there can be no true repentance without atonement. I ask each of my colleagues to remember this and join with me in pledging that ethnic Greeks and other long suffering citizens of Albania are not betrayed by false promises or cosmetic changes. The tribulations of the ethnic Greek people of Albania may have been largely shielded from the world, yet these people have never abandoned their faith and hope that one day their persecutions would end. Let us welcome Albania into the world community, but only an Albania which celebrates the diversity of its people, recognizing the infamy of its past, and the willingness to redress the injustices heaped upon its oppressed people. We must accept no less, for to do so would be a betrayal of the sacred trust owed to those who have suffered so much.

## THE INTRODUCTION OF THE RESOLUTION TO DEDICATE OCTOBER 1990, AS NATIONAL BREAST CANCER AWARENESS MONTH

### HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mrs. COLLINS. Mr. Speaker, today, I am introducing a resolution to designate October 1990, as National Breast Cancer Awareness Month. Joining me in sponsoring this resolution is Congresswoman MORELLA. Our collaboration underscores the point that the diagnosis and treatment of breast cancer is an issue of concern to everyone, immune from partisanship.

Breast cancer has become the second leading cause of cancer death for American women. It is estimated that there will be 150,000 new cases of cancer diagnosed in 1990, 44,000 of which are expected to result in death. Breast cancer incidence rates have increased about 1 percent per year since the early 1970's, including a 20-percent jump in the first half of the 1980's. One in every ten American women will be diagnosed with breast cancer. Additionally, about 900 American men will be diagnosed with breast cancer during 1990, of whom about 300 are expected to die.

In short, breast cancer incidence remains at a staggering level with no decrease in sight. However, the rate of breast cancer mortality is entirely subject to change.

Early detection of breast cancer, through self-examinations, clinical examinations, and screening mammography, can result in a 5-year survival rate of nearly 100 percent and significantly minimize its consequences. Studies have documented the decrease in breast cancer deaths attributable to early detection,

particularly due to screening mammography's ability to detect cancers too small to be felt by even experienced examiners. Mammograms can also reveal additional lesions too small to be felt once an initial lump has been detected.

Yet, vast numbers of American women do not regularly avail themselves of the advantages of early detection. In some cases it is due to the lack of access to screening mammography because of socioeconomic factors. In other cases, the cost of a mammogram or physical exam keeps women from requesting them. In still other cases it is simply due to an absence of information or a presence of fear.

One of the first steps we must take is to further educate both the public and physicians about the importance of and means for early detection of breast cancer. Women must be encouraged to request procedures for early detection and physicians must be encouraged to recommend them. An awareness of the disease and its mitigation must become better integrated into America's medical routines.

Although today we take a step toward increasing reliance on breast cancer early detection and treatment, the next steps must follow promptly. National Breast Cancer Awareness Month is a good start, but we must not settle for commemoratives.

In 1988, my effort to offer mammography benefits to Medicare patients was successful, as coverage was extended through the Catastrophic Care Act. But, with the act's repeal last year, no mammography benefits remained. Consequently, I introduced H.R. 3701 to restore those benefits. Other Members have introduced bills that follow this same philosophy.

These bills must be the real focus of our efforts. National Breast Cancer Awareness Month must be proclaimed. The month must be utilized, however, to extend the coverage that we are promoting. It is a perfect opportunity to put our money where our mouths are.

Mr. Speaker, I urge my colleagues to join me and Representative MORELLA in taking the first step. I urge my colleagues to cosponsor the resolution to dedicate October 1990, as National Breast Cancer Awareness Month.

## A TRIBUTE TO FATHER ALBERT J. SHAMON

### HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. HORTON. Mr. Speaker, I rise to today to pay tribute to Father Albert J. Shamon of Auburn, NY, who will celebrate the 50th anniversary of his ordination to the holy priesthood tomorrow. My colleague from Syracuse, Hon. JIM WALSH, joins me in this tribute to this central New York institution.

Father Albert is a native of Auburn, one of eight childen born to Asad and Netti Shamon. Growing up, he attended St. Aloysius School and attended high school in Auburn. He then studied at St. Andrew's and St. Bernard's Seminary in Rochester, NY and was ordained to the priesthood in 1940. He also received a M.A. in history from Canisius College.

Through the years Father Shamon has continued his studies in spiritual theology at the Dominican House of Studies in Chicago; biblical theology at Glenn Ellyn; Maryknoll House of Studies, Chicago; and sabbatical at Louvaine University in Belgium. Father Shamon taught at St. Andrews, St. Bernards, and McAully College. He has been pastor throughout the diocese of Rochester, including parishes in Rochester, Victor, and Waterloo, NY, and presently is the administrator at St. Isaac Jogues in Fleming, NY.

Father Shamon is well known throughout the diocese as a speaker and lecturer. He has written a weekly column for many years which appears in the Catholic Courier, the diocesan newspaper. He is the author of many books including "Behind the Mass," "Treasure Untold," "First Steps to Sanctity," as well as a number of periodicals. He has most recently completed published works on "Confession," "The Rosary," and "Prayer."

When Fulton J. Sheen became bishop of Rochester, he named Father Albert his "vicar" for education. Father has been instrumental in maintaining and strengthening the Catholic schools system throughout the diocese and especially the Catholic inner city schools of Rochester. He worked very closely with bishop Sheen through the bishop's tenure in Rochester.

Father Shamon continues his active priesthood. During the past weeks, he has lectured in Ohio and spent a week speaking in Connecticut. He will celebrate his 50th anniversary in Rome with a scheduled visit with his Holiness Pope Paul II. He will then travel to Medjugoric, Yugoslavia, on a pilgrimage to that shrine. Father Shamon continues his weekly column and also has a weekly radio broadcast which is carried by four radio stations in his area.

On behalf of my colleage from neighboring Syracuse and our many constituents whose lives have been touched by Father Shamon, I want to congratulate him on 50 years of distinguished service to his fellow man.

## TRIBUTE TO ALLEN H. MORGAN

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. ATKINS. Mr. Speaker, I rise to pay tribute to Allen H. Morgan, a lifelong outdoor enthusiast and environmental advocate, who passed away this week at the age of 64.

As early as 1953, Allen's dismay about the loss of open space to development led him to found the Sudbury Valley Trustees. Under his skillful stewardship, the Trustees grew to its current membership of nearly 2,400, and acquired, through gifts and purchase, nearly 1,200 acres in eight Massachusetts towns. SVT has also been instrumental in preserving several thousand additional acres now protected by public agencies.

Under Allen Morgan's guidance, the Massachusetts Audubon Society, where he was executive vice president from 1957 to 1980, grew from a membership of 2,500 to over 30,000, becoming the region's largest environmental organization. Allen was instrumental in passage of Massachusetts' Wetlands Protection Act and was a leader in energy conservation.

Words like "farsighted," "tenacious," and "imaginative" come to mind when remembering Allen. He was a conservationist long before it was fashionable, and an inspiring public speaker who could galvanize his audience into action. His untiring spirit, unwavering beliefs, and powers of persuasion brought him success time and time again as he rescued thousands of acres of open space from the threat of development.

Allen's extensive community involvement and list of honors garnered during his long career are too numerous to list here. Suffice to say he was a leader in local government and lent his expertise on the boards of several other conservation organizations. He was awarded several honorary degrees, and was recently named an "environmental master," by the EPA. He was awarded the Thoreau-Muir Wilderness Prize from the Walden Earthcare Congress.

I join Allen's numerous friends, admirers, and colleagues in mourning the loss of an extraordinary and talented man. Cognizant of the importance of preserving the delicate balance between the needs of man and those of nature, Allen Morgan was, as one local paper commented, "an environmentalist who was not an elitist, a progressive who saw the need for development. He could embrace it within the balanced framework he brought to life, without compromising the essential birthright of river, stream, and field that a civilized society had to perserve."

Although Allen had a healthy Yankee skepticism toward elected officials, he was willing to work with me to protect three beautiful and historic rivers flowing through the Fifth Congressional District. Like other projects he initiated, this one has taken on a life of its own, and his energy has given the effort the spirit and momentum needed to succeed. The passage of the wild and scenic study bill for the Sudbury, Assabet, and Concord Rivers, S. 2262 and H.R. 4227, will be our lasting memorial to an environmental hero who will be sorely missed.

## ARIF MARDIN IS TURKISH-AMERICAN MAN OF THE YEAR

### HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BURTON of Indiana. Mr. Speaker, on April 12, 1990, I had the opportunity to hear a truly inspirational speech delivered by Arif Mardin before the Assembly of Turkish American Associations. Born in Istanbul, Turkey, Mr. Mardin achieved his fame as a record producer in our country. Arif Mardin has demonstrated that with a lot of hard work, dreams can come true. For Members of Congress who believe the "American Dream" is dead, the Arif Mardin story is a must.

SPEECH GIVEN BY ARIF MARDIN ON MAY 12, 1990, AT THE WASHINGTON HILTON HOTEL AFTER RECEIVING THE TURKISH-AMERICAN MAN OF THE YEAR AWARD

Ambassador and Mrs. Kandemir, Minister Imren Aykut, Senator and Mrs. Byrd, Congressman Burton, Congressman Moody, President and Mrs. Tunca Iskir, President-Elect and Mrs. Ali Sevin, distinguished guests.

First of all, I would like to express my gratitude to the members of the Board of the Assembly of Turkish American Associations for bestowing such a distinction on me. I would like to thank Mr. Ali Sevin and Mr. Tunca Iskir for presenting this award. My family and I are indeed thrilled and honored on this day.

It is impossible for me not to think of the past on such an occasion, not to remember how it all started and I would like to tell my listeners a little about it.

I was born in Istanbul, Turkey. In my family there are many people who chose the Government, the Army, law, religion, banking, teaching and business as a profession. In my family, especially in those days, music was considered as a hobby, a pastime, something to be enjoyed in one's spare time, but not as a way to earn one's living.

Yet how is it that I am now in this country, the producer and winner of this year's Grammy Award for the "Record of the Year"? Some of you may even wonder what a record producer is, what he does.

Well, a record producer is a music man, in total charge of all aspects and stages of the recording and completion of a phonograph record. His role in the making of a record can be likened to that of a director making a movie. He directs, guides and orchestrates the project to a successful finish.

How did I get to be a record producer? I must say that it was a long and difficult road and it all started with the records that my sisters used to listen to in our house in Istanbul. I must have been about five years old when the strains of American big bands, the Andrews Sisters, Bing Crosby and other performers entered my consciousness as I played with my toys. I did not begin to appreciate Turkish music until much later in my life. When I was ten years old I purchased my first Duke Ellington record. My astute and observant mother sensing some talent in me insisted on my taking piano lessons. Slowly, my ambition crystallized. I wanted to become a jazz composer and arranger. What attracted me to jazz music was its being built on individual expression. This trait is typical of America and is like a magnet to young people all over the world.

By the time I had reached sixteen years of age I had become a wide-eyed junior member of a clique of fanatical jazz enthusiasts in Istanbul. This group which included Cuneyt Sermet, the notable jazz connoisseur (an important musical influence on my life at that time) and the wellknown saxophonist and band leader the late Ismet Siral used to hold jam sessions whenever it could. Our heroes were Charlie Parker and Dizzy Gillespie. It was then that I started to try my hand at composing.

Later, when I joined the Arto Hacaduryan Big Band I started to write orchestrations on a strictly trial and error basis. While all this musical activity was dominating a part of my life, my education progressed in a somewhat different, more conservative direction. I attended the English High School for Boys and graduated from the Economics and Commerce Faculty of Istanbul University. It was understood within the family that after I completed a postgraduate course in Business Administration at the London School of Economics I would join the firm Turkpetrol where my father was Chairman of the Board. All went according to the master plan until Dizzy Gillespie came to Istanbul with his big band. Dizzy and Quincy Jones (now a giant in the music industry) encouraged me and helped me. The fire that had been smouldering in my heart, my desire for a career in music was rekindled.

Looking back after so many years, it is not difficult to realize why my father was not very enthusiastic about my ambitions. When he asked me what a jazz arranger would do, how he would earn his living, the job description I gave him was so nebulous that I can well understand why he started to worry about my future. But I still felt that I had to try. The decision was not easy. It entailed leaving behind a very comfortable life, a loving family, friends and a secure job and embark on what even our friends called an adventure.

At that time, my wife Latife and I had been married for less than a year. It was only because of her fierce courage, her belief in me and her many sacrifices that we were able to start our joint venture. The dreams we dreamt and the plans we made came true because she was there by my side, always.

In 1958, my compositions earned me a scholarship at the Berklee College of Music in Boston, Massachusetts. I travelled first, Latife joined me later. America—ah, yes, the United States at last—I was elated and yet to the same time I felt very tentative and very scared. Learning new customs, adapting to a new way of life while trying to prove myself to the folks back home was not easy. What truly helped me in those difficult days was the warmth, the friendship and generosity shown by the people in Boston and the Berklee College of Music. I thank them all, especially Mr. and Mrs. Lawrence Berk and Herb Pomeroy.

I think this help was typical of the kind of support and opportunity the American people give anyone regardless of what part of the world he or she came from.

I have to say that America has been good to me. I have been given many breaks and my talents have been appreciated. It is true that my native country, Turkey, provides a wonderful and unique blend of history, tradition, culture and strong work ethic to her people. These qualities mixed with the typical American dynamism provided here, made it possible for me to join the mosaic of people that makes this country so great.

Now, let me go back to the past once more. After graduating in 1960 and teaching for two years, we moved to New York where my wife took a job at the United Nations. I played the role of the struggling musician for a year. When the late and sadly missed Nesuhi Ertegun offered me a job at the Atlantic Records Studio, I accepted on the spot. Thus I entered the world of the recording studio, artists, musicians, studio engineering techniques, etc. I tried to learn by watching Nesuhi and his brother Ahmet Ertegun, the founder of Atlantic Records. In 1965, Ahmet entrusted me with a recording project. That first record shot up to number one in the charts. From that point on, I knew that I was bitten by the "pop music" bug and continued in that direction.

This led me to work with such artists like the Bee Gees, Aretha Franklin, Phil Collins and Bette Midler with whom I made my last number one record. Thank you Ahmet for your friendship and your constant support for twenty-seven years at Atlantic Records.

The Turks, although comparatively small in number, have proved themselves successful in this country. They are believers in the work ethic and like others before them, they have discovered that hard work in America is rewarded. Although this is their home and the home of their children, they still feel close ties to their roots.

The Assembly of the Turkish American Associations is like a bridge between the two countries. This bridge has its foundation in the traditional and strong friendship between Turkey and the United States. May the good work continue.

I cannot end without thanking my mother and father whose love and upbringing made me what I am today. I know my mother is feeling very proud of me and I am happy that my father lived long enough to see me successful at my chosen profession.

I would also like to acknowledge some of the guests who are seated at our table, my dear sister Betul Mardin came all the way from Istanbul to join us, my brother-in-law and old friend Baki Onis and his wife Tulin flew from London just to be here tonight, my love and gratitude to you. Much love to son-in-law Hugues Joffre and daughter Nazan who flew in from London also. I would also like to thank our cousin Birtan and her husband Ralph Collier for their constant support.

My son Yusuf and my daughter Julide—a proud and hardworking second generation—my endless love and gratitude for putting up with dad. This award is yours, too. And finally, I turn to my wife Latife, my love and better half, partner in this joint venture called life, the true support beneath my wings—I accept this award for both of us.

## A TRIBUTE TO REV. CANON JOHN T. MOORE

### HON. BEN GARRIDO BLAZ

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. BLAZ. Mr. Speaker, I rise to pay tribute to an outstanding Guam educator, the Reverend Canon John T. Moore, who is retiring as headmaster of St. John's Episcopal School in Guam.

Reverend Moore has served more than 19 years as headmaster of St. John's Episcopal School. Dramatic changes have taken place at the school during his tenure. He provided the vision, direction, and leadership that has made St. John's the most prestigious educational institution in Guam today. He did this not only zealousness in keeping abreast of modern educational practices, concepts, and techniques. He was solely responsible for upgrading the quality of teachers; increasing their salaries and benefits; and throughout the years encouraging faculty and staff to develop their own personal growth and vision. He is also responsible for instituting scholarship programs for students on the basis of need and academic performance.

A native of Mobile, AL, Father Moore attended Marion Institute and graduated from West Point in 1944. He served as a fighter pilot and flew combat missions for the Air Corps in World War II, and the Air Force during the Korean and Vietnam wars. In 1973, he was ordained to the priesthood and in

1983, was pointed Canon to the Bishop-in-Charge of the Episcopal Church in Micronesia.

Father Moore has been very active in community affairs. He is a member of the Guam Rotary Club, the Guam Chamber of Commerce and former member of the Guam Board of Education. As a member of the latter, he fought for and won equitable treatment for private schools with regards to school textbooks.

His steady guidance at St. John's Episcopal School has proved critical to the school's growth and vitality, going hand-in-hand territory. That concern bears fruit this year with the establishment of St. John's as a primary and secondary educational institution with its first high school graduation taking place later this month.

The American Territory of Guam has benefited enormously from the pioneering spirit and vision of this outstanding education missionary, whose devotion to his church and his total commitment to excellence in education have won him great admiration and respect.

Mr. Speaker, one of the yardsticks by which we in leadership positions are measured is the impact we have on those whom we serve. I know I am speaking or those who know and have been associated with Father Moore when I say that we are all better for having known him.

On behalf of a grateful community I bid him adios and Si Yu'os Masse.

## THE FINANCIAL INSTITUTIONS OVERSIGHT REFORM ACT

### HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GRADISON. Mr. Speaker, over the course of the last 3 years, I have risen on numerous occasions to state my views on the savings and loan crisis. I have long been concerned that without appropriate regulatory and systemic reform, and a commitment on the part of both the Congress and the President to commit the necessary resources to do the job, resolution of this problem will be delayed at an enormous extra cost to the taxpayer.

Congress passed the first S&L bailout bill in 1987. I argued then that the funding provided by that legislation was woefully inadequate, and that its budgetary treatment was wrong. This first attempt at addressing the problem set the wrong precedents for the larger effort last year.

For many of the same reasons, I opposed the Financial Institutions Reform, Recovery, and Enforcement Act [FIRREA]. The funding provided was again inadequate, the budget accounting was again wrong, and the policy reforms required the creation of an unnecessarily complex organizational structure, with competing and overlapping lines of authority, that would make implementation of FIRREA extremely difficult.

In the 9 months since FIRREA was enacted, serious and predictable difficulties have arisen. The auctions held to date for bonds issued by the Resolution Funding Corporation [REFCORP] have demonstrated that the House position favoring on-budget treatment for financing the Resolution Trust Corporation [RTC] was the correct one. Off-budget financing is simply slower and more expensive.

The pace of resolutions has been slowed because of the absurdly complex administrative structure of FIRREA, which has made an artform out of "government by kibbutzing."

The lines of authority created under FIRREA are obscure at best. Responsibility is hard to pinpoint, and too many people are involved in the decisionmaking process. The administrative chaos has already compelled one highly regarded RTC head to leave, and the exceptionally well qualified Chairman of the Federal Deposit Insurance Corporation, is under increasing pressure to resign. More than one proposal has surfaced to abolish the Office of Thrift Supervision [OTS] and transfer its responsibilities to other existing arms of Government. In the meantime, estimates of the ultimate cost of the bailout continue to escalate.

Under these conditions, I believe the cleanup under FIRREA has the potential to become an even bigger problem than the thrift crisis itself.

In view of these difficulties and my longstanding concerns, I am introducing today comprehensive legislation to reform FIRREA. My bill, the Financial Institutions Oversight Reform Act of 1990 [FIORA], proceeds from three general objectives and purposes:

First, the bill ensures that the budgetary treatment of the resources required for the bailout will not add to the ultimate cost. This would be accomplished by putting the bailout on-budget and off-GRH. That was the House position on FIRREA, and is supported by studies and testimony of CRS, CBO, GAO, and numerous outside experts.

Second, a permanent and indefinite appropriation would assure adequate resources for the bailout.

Third, the bill would ensure clear and unambiguous authority over, and responsibility for, the bailout.

#### STRUCTURE OF FIORA

Under FIORA, authority would reside, clearly and unambiguously, with the Secretary of the Treasury. The bill establishes the position of Deputy Secretary for Financial Institutions, who would be the officer of the Government with primary responsibility for oversight, policy development, and implementation.

FIORA establishes the Office of Financial Institutions Data Analysis, a small office staffed by professional civil servants, to assist the new Deputy Secretary in determining when an institution is likely to require a conservator.

FIORA would eliminate the OTS and reassign its responsibilities. Under the bill, the Office of the Comptroller of the Currency [OCC] would regulate federally chartered S&L's and the FDIC would regulate State chartered S&L's which are not part of the Federal Reserve System.

The bill would move the OCC and FDIC under the new Deputy Secretary. A single administrator would replace the FDIC's current board of directors. FIORA would also disband the RTC Oversight Board and transfer the RTC's responsibilities to a newly established Thrift Resolution Agency [TRA].

Nothing in my proposal would affect the contributions FIRREA requires from the thrift industry, nor would it alter the management of the Federal deposit insurance funds currently under the FDIC.

REFCORP and FICO would continue to exist, but only to service bonds already issued.

#### FINANCING OF FIORA

In an effort to facilitate off-budget financing, and partly to promote the fiction that meaningful repayments would follow the borrowing undertaken to finance the bailout, FIRREA established a convoluted financial structure. For example, RTC's funding of $50 billion emanates from three separate sources: $18.2 billion from appropriated funds, a $1.2 billion assessment from the FHL Banks, and $30 billion from REFCORP, which raises its capital in the financial markets. In addition, REFCORP, at last count, has five distinct lines of credit at the Treasury.

FIORA would replace FIRREA's bizarre financing structure with a single budget account financed by a permanent and indefinite appropriation. Proceeds from the liquidation of assets would be recorded as offsets in the account. This reform would eliminate the need for separate financing for working capital—funds needed to carry acquired assets until they are sold—and "loss" capital—funds to make depositors whole. Transactions involving working capital, necessary for so-called clean bank resolutions, would be treated as routine asset sales under Gramm-Rudman and, therefore, would have no effect on the GRH budget baseline.

As mentioned before, this account would be on-budget and off-GRH. The interest cost of financing the account, through normal Treasury borrowing, would be recorded in budget function 900—Net Interest—and be on-budget and on-GRH. Likewise, administrative and personnel costs, and any interest paid on notes issued by the TRA would be on-budget and on-GRH.

The Thrift Resolution Agency would cease to take on new resolution cases after August 8, 1994, when the new thrift capital requirements become effective. This is 2 years after the transfer date specified in FIRREA and is intended to provide a more realistic timeframe. This is desirable because cases are presently being withheld from the RTC because it cannot, at present, handle more. Thrifts requiring conservators after August 8, 1994, would be handled by the new thrift deposit insurance fund [SAIF] established by FIRREA.

An approach relying on appropriations, rather than on borrowing, is not only simpler, but makes more sense. The basic job is to fill a very large hole; namely, a huge deficiency in the old FSLIC deposit insurance fund for thrifts. This hole represents liabilities that have never been recognized in the budget. The most straightforward and honest way to fill the hole is by an appropriation because Treasury funds are the cheapest and fastest way to finance TRA spending and pay off depositors.

Not capping the appropriation may seem like dumb politics, but this approach is sound public policy. The simplified organization of FIORA, which clearly places the responsibility and authority close to the President and right

in the lap of the Secretary of the Treasury, would provide the best hope to get the job done quickly, efficiently, and in the least costly manner.

The political reality, confirmed by recent history, is that a fixed appropriation is likely to be insufficent and that the administration—or any administration for that matter—will be reluctant to request, and the Congress most unlikely to provide in a timely fashion, additional budgetary resources for the S&L bailout, especially before an election. By the time additional resources are provided, the costs will have escalated. That is precisely what happened before FIRREA and is exactly what will happen given the limited and insufficient resources of FIRREA.

Enactment of FIRREA was supposed to install confidence in the public that the Federal Government would not only stand behind thrift depositors, but that it also would take the necessary actions to ensure that the cleanup would be completed as soon as possible and that tighter oversight and more meaningful capital requirements would prevent a recurrence. If editorial comment from across the country and letters from my constituents are any indication, FIRREA has failed to instill such confidence.

My point is simple. FIORA provides a cleaner, cheaper, and more efficient structure than FIRREA.

## TRIBUTE TO SAMMY DAVIS, JR.

### HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. PAYNE of New Jersey. Mr. Speaker, I join many millions of Americans who mourn today the death of the great entertainer and humanitarian, Sammy Davis, Jr. He will be remembered and heralded for beating the odds, and achieving great success as an entertainer despite tremendous obstacles. He will be remembered for overcoming personal tragedies and coming back to the top of his chosen profession after debilitating accidents and illnesses.

He will be remembered for having the courage to venture into national politics at the highest level as his own man and on his own terms. The great legacies of Sammy Davis, Jr., will be chronicled in the media and in our hearts and minds during this brief time of national mourning for a great native son. I want to focus my tribute to the thousands of small things that Sammy Davis, Jr., did to help others in hope that they will not be forgotten or overlooked. He fought a constant battle against petty housing and employment discrimination throughout his life.

He opened the doors for blacks to work and obtain accommodations at leading hotels and theaters throughout the country. He performed free for charities many thousands of times. He beat alcohol and drug abuse problems and devoted untold hours rapping to young people. He was never too big to come into the neighborhood and try to help others. In my district, in 1985 he established the Sammy Davis, Jr., National Liver Institute to help develop a liver disease treatment and research center. To his great credit he did more than just put his name on the door.

He was actively engaged in the work of the institute and gave benefit performances that helped raise thousands of dollars. He visited the medical school campus at Newark, and became an active booster of school activities. Sammy Davis, Jr., had unequaled God-given talent as an entertainer. His legend of song and dance will live with us forever in tape and film. His contribution as a humanitarian and as a symbol of hope for Americans regardless of race, creed, color, or religion is just as legendary and just as important as his contributions as an entertainer.

As Davis said in Newark when he established the National Liver Institute, "I was put here to do more than sing 'Candyman' and 'Bojangles'." We have lost another great American folk hero. God bless his soul. May he rest in peace.

## MANUEL PRADO RETIRES AFTER MORE THAN 17 YEARS' SERVICE

### HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. STARK. Mr. Speaker, I rise today to pay tribute to Mr. Manuel Prado for more than 17 years of dedicated service as a member of the Livermore School Board in California's Ninth Congressional District.

Throughout his tenure as a school board member, Mr. Prado held a variety of positions. From 1973 to 1990, he served as a member of the Livermore Valley Joint Unified School District board of trustees. From 1980 to 1981, he was the Chair of the Alameda County Special Education Service Region Board. From 1982 to 1989, he was a member of the Tri-Valley Special Education Local Plan Area [TVSELPA] Joint Powers Board and in both 1986 and 1987, he served as the Chair of this organization.

From 1977 to 1985, Mr. Prado was a member of the Regional Occupation Board [ROB] Joint Powers Board and from 1980 to 1981 and from 1984 to 1985, he chaired this committee. He was also a member of the Alameda County School Boards Association [ACSBA] from 1975 to 1976 and from 1988 to 1990 and chaired this organization in 1988 and 1989.

Mr. Prado also held the office of president of the board of education in 1976, 1981, and 1987. In 1975 and 1980, he was the clerk of the board of education.

Mr. Speaker, Manuel Prado has helped to shape the success of the Livermore School District. I commend him for his years of dedicated service to our community and I wish him well in his retirement.

## FIFTH ANNIVERSARY OF RADIO MARTI

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. FASCELL. Mr. Speaker, today is the 88th anniversary of Cuba's independence from Spain. It is a day of special importance not only to Cubans and Cuban-Americans, but to citizens of every nation that has triumphed over colonialism.

Sadly, the free and independent Cuba which was Jose Marti's dream fell prey to the new colonialism of recent times, communism. This modern brand of colonialism sought not merely to physically conquer territories and people but, more importantly, to dominate their minds and spirits.

We fought the wars of independence with arms, meeting force with force. The struggle for freedom from communism has called for additional and more subtle weapons, suited for a war of the mind and spirit. This has been a conflict which pits the great truth against the big lie, information against propaganda. The welcome unraveling of communism in Eastern Europe is, in no small measure, due to our determination to insure the free flow of information and ideas into countries whose governments denied their people that right.

Like the great power colonialism which preceded it, the spiritual colonialism of communism is now in universal discredit and decline, although some anachronistic and embattled enclaves like Castro's Cuba still remain.

In Europe, we moved quickly to counter Communist censorship, propaganda, and disinformation by means of Radio Liberty and Radio Free Europe. The vital contribution they made to the cause of liberty is now plain for all to see. In our own hemisphere, we reacted more slowly. Efforts to provide for similar broadcasts to Cuba met with a curious mixture of resistance and indifference. Some, alarmed by Castro's threats, predicted catastrophe; others prophesied futility. Ignoring these extremes, supporters of the project pushed on, and 5 years ago today, Radio Marti made its first broadcast.

It is a pleasure to extend my warmest "felicidades" to Radio Marti on this happy occasion. In these past 5 years, Radio Marti has become a fixture in many Cuban homes, providing music and entertainment which is enjoyed by all. In addition, it provides an independent source of news of events in Cuba which would otherwise be unavailable on the government controlled radio. Radio Marti has given Cuban citizens a window not only on the world, but also on their own land. I am confident that, in time, it will also help to open a door for them to the free and independent Cuba of Jose Marti's dreams.

## 1991—THE YEAR OF THE LIFETIME READER

### HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Ms. OAKAR. Mr. Speaker, today I am introducing a joint resolution designating 1991 as "The Year of the Lifetime Reader," and I am pleased that so many of our colleagues have joined me as original cosponsors.

Literacy and reading are vital ingredients of our nation's history and must become part of the national agenda. The Library of Congress, our library, has initiated the "1991—The Year of the Lifetime Reader" campaign, which through local projects will strengthen connections among libraries, literacy, and lifelong learning. The resolution will call on the President to declare 1991 as the Year of the Lifetime Reader, and will encourage parents, educators, librarians, government officials, corporations, labor unions, and associations to observe the year with appropriate programs, ceremonies, and activities aimed at giving our citizens at every age and in every walk of life the gift, the joy, and the promise of reading. First Lady Barbara Bush has agreed to serve as honorary chair of the Year of the Lifetime Reader campaign.

This campaign reinforces the hundreds of community partnerships established during the successful "1989—The Year of the Young Reader" initiative. This resolution extends the campaign to include, in addition to family literacy, projects related to adult literacy and to the needs of blind and physically handicapped readers.

Advancement of "1991—The Year of the Lifetime Reader," is a joint effort of the Center for the Book in the Library of Congress and the Library's National Library Service for the Blind and Physically Handicapped. Libraries across the Nation are being encouraged to participate, including the 150 regional and local partners of the National Library Service for the Blind and Physically Handicapped and the 20 State centers for the book that are affiliated with the Library's Center for the Book. This list includes the States of Arizona, California, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Texas, Virginia, Washington, and Wisconsin. This campaign is not limited to these particular States, however. It is a national effort that involves individuals and groups at all levels.

Many corporations and over 30 national organizations already have agreed to participate in the "1991—The Year of the Lifetime Reader," effort including the American Library Association, the Association of American Publishers, the Business Council for Effective Literacy, Lions Club International, the National Alliance of Black School Educators, the National Association of Colored Women's Clubs, and Reading is Fundamental, Inc.

Hundreds of reading and literacy projects were developed last year in the Year of the Young Reader campaign. The Center for the Book has prepared a 12-page summary, organized by State, which it will be pleased to furnish to your office to help inspire future reading promotion efforts. "1991—The Year of the Lifetime Reader" will help us continue the enthusiasm and alliances that we all hope will once again make us into a nation of readers.

## SUPPORT OF WIPP LAND WITHDRAWAL LEGISLATION

### HON. JON L. KYL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. KYL. Mr. Speaker, Mr. Spratt introduced, by request, on May 15, 1990, a bill to withdraw land from public use in Eddy County, NM. This withdrawal will allow the Department of Energy to initiate certain important test programs, using radioactive defense waste, at the waste isolation pilot plant [WIPP], located near the city of Carlsbad in Eddy County. I strongly urge the House to enact this legislation as soon as possible. Its early enactment would avoid the need for extension and modification of the current administrative land withdrawal and permit timely assessment of the facility's safe and environmentally acceptable performance.

The WIPP project was originally authorized in 1980 to demonstrate the safe disposal of radioactive waste from the Department of Energy's defense activities. The project has proceeded from site characterization and validation to the construction of an underground facility located 2,000 feet underground in an ancient salt deposit in public lands in southern New Mexico. The next step is a test phase during which the Department would conduct tests with radioactive materials to assure the protection of the health and safety of the public if the facility is used subsequently as a waste repository. It is necessary to withdraw these lands from public use in order to conduct these test operations safely.

The facility is physically ready to accept waste in a test phase. However, the proposed legislation contains certain specific provisions that must be satisfied before any waste can be placed in the repository. These provisions are the completion of a final safety analysis report, the completion of a record of decision on a supplemental environmental impact statement that applies to the test phase activities, and the issuance of a "No-Migration Variance" by the Environmental Protection Agency [EPA]. The legislation also requires compliance with EPA standards for the management, storage, and disposal of transuranic waste. In addition, the Secretary of Energy has pledged, in testimony to Congress, that he will not permit the WIPP to open for testing until all the requirements in the Department's WIPP decision plan have been met and he is personally satisfied that it is safe.

In recent years the accumulation of radioactive waste at certain DOE defense sites has become intolerable to the Department and to certain State governments, to the point that some States have placed limits on the amount of waste that can be stored, or transported to, sites in their States. This is leading to the possibility that some DOE sites may not be able to continue to operate in the near future. This is particularly true at the Rocky Flats plant in Colorado, a facility vital to the modernization and improved safety of our nuclear stockpile. The opening of this demonstration facility will allow the Department to proceed in an orderly fashion to the eventual disposal of 40 years of accumulated defense wastes, reducing the threat to our environment and allowing the Department to fulfill its commitment to clean up its nationwide facilities.

In addition, this demonstration will be a significant step on the way to the construction of a separate repository for high-level waste, allowing the disposal of radioactive wastes from both civilian reactors and defense activities. I strongly urge you to pass this land withdrawal legislation in the interest of both an environmentally clean and a strong America.

## TRIBUTE TO ALLEN W. FOSTER

### HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GRAY. Mr. Speaker, I rise today to pay tribute to Allen W. Foster, minister of music at the Pinn Memorial Baptist Church, in Philadelphia, PA, who is being honored on the occasion of his 30th anniversary at the church.

Allen Foster is a native of Camden, NJ, and attended the public school system there. He subsequently and respectively received undergraduate and graduate degrees from Temple University and Rutgers University.

Having been introduced to formal piano instruction as a young child, Allen later developed an interest in the organ and church music. He furthered his piano studies at the Philadelphia Conservatory of Music and began organ instruction with Dr. W. Franklin Hoxter, a noted organ recitalist/instructor.

He currently serves as minister of music at the Pinn Memorial Baptist Church and organist at the Ebenezer Seventh Day Adventist Church, both in Philadelphia. He is employed by the School District of Philadelphia as the coordinator of social services for the Early Childhood Division.

Allen Foster's music activities include composing, arranging, consulting, and concertizing. He is well known in the recording industry for his sacred compositions. He has recorded with the Pine Forge Academy Choir which he presently accompanies under his wife Gwendolyn's directorship. Since 1987, Allen Foster has been associated with Lincoln University as accompanist for the University Concert Choir, also under the direction of his wife, Gwendolyn.

Please join me in paying tribute to a man who has taught and entertained others with his many gifts.

## TRIBUTE TO THE PHELPS DODGE COPPER PRODUCTS CO./NORWICH ROD PLANT DIVISION

### HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. GEJDENSON. Mr. Speaker, I rise today to pay tribute to the Phelps Dodge Copper Products Co./Norwich Rod Plant Division as the recipient of the 1989 Chairman's National Safety Award for most improved safety performance.

All the hard-working men and women at Phelps Dodge should be proud of their extraordinary safety performance. This award exemplifies the workplace philosophy that safety is an ongoing concern. Clearly, this dedicated effort has paid off by the award of this honor.

Mr. Speaker, Phelps Dodge Corp. is the second largest copper producer in the free world. And as a corporation founded in the Constitution State, I am extremely proud to inform all of my colleagues of the safety record at the Norwich facility. All of us in the U.S. Congress, send our congratulations to Phelps Dodge management and employees for their outstanding commitment to safety.

## INTRODUCTION OF ADMINISTRATION'S WATER RESOURCES DEVELOPMENT ACT OF 1990

### HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. STANGELAND. Mr. Speaker, I'm introducing, by request, the administration's omnibus Corps of Engineers bill, the Water Resources Development Act of 1990.

This legislation, like its counterpart in the Senate, S. 2469 and S. 2470, will help provide House and Senate Public Works Committees with a framework to enact into law an omnibus bill by year's end. So far this year, the House Public Works Water Resources Subcommittee has held four hearings on corps' projects and programs. Members and public and private witnesses have testified about dozens of project proposals and program changes. Several are already included in the administration's package of legislative proposals.

This bill contains 18 proposals. Four are new projects that have made their way through the entire planning process and received the Secretary of the Army's approval and another is a project modification. The remaining proposals involve programmatic initiatives that range from increased cost sharing and user fees to expanded research and development opportunities to personnel matters and emergency response authorities.

Personally, I have concerns about some of the provisions, such as the suggested changes to the successful—section 22—planning assistance to States and—section 206—floodplain management services programs, as well as the proposal to more than triple the harbor maintenance trust fund fee. But the bill as a whole has some important initiatives, such as provisions on magnetic levitation transportation, and the corps existing—section 1135—environmental demonstration program. These need to be part of the congressional debate.

Therefore, I'm pleased to introduce the Water Resources Development Act of 1990. I commend Assistant Secretary of the Army, Civil Works, Robert W. Page, and others within the corps and OMB for their leadership. Committee Chairman GLENN ANDERSON, ranking Republican JOHN PAUL HAMMERSCHMIDT, and Subcommittee Chairman HENRY NOWAK are also to be commended for their bipartisan longstanding support of the corps' program and their commitment to a 2-year reauthorization cycle.

Like me, they look forward to working with the administration and the Senate. I know all my colleagues on the Public Works Committee are eager to begin drafting comprehensive legislation. With continued guidance from the administration, I am hopeful we can enact a bill in the coming months that is environmentally sound, fiscally responsible, and responsive to the Nation's water resources needs.

## A TRIBUTE TO SAMMY DAVIS, JR.

### HON. JOSÉ E. SERRANO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. SERRANO. Mr. Speaker, I rise today to express my deepest sympathy to the widow and family of Sammy Davis, Jr., a rare and gifted entertainer, an uncommonly generous man, and a patriotic American in whom all of us took great pride, from whom all of us recieved great pleasure; and upon whose untimely passing, all of us now feel a great sense of loss.

The Nation and indeed the world join us in deep mourning.

His legion of friends and show business colleagues who were privileged to know him personally—and to work with this talented man in a long career that spanned the full spectrum from humor to music to drama—will know a special sense of loss.

But none will miss him more profoundly than his black brothers and sisters for whom he was both a source of pride and an inspirational role model.

To them I proffer a very special note of condolence because with them I share—along with all my Puerto Rican brothers and sisters—that special ethnic pride in one's own.

It is perhaps not broadly known that Mr. Davis' mother was a native of the island of Puerto Rico and therefore, for myself and for all Puerto Rican people, we bid him a sad farewell and offer a prayer for Sammy: Vaya Con Dios, dear brother. Rest in peace.

## NATIONAL POLICE WEEK

### HON. SUSAN MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Ms. MOLINARI. Mr. Speaker, I would like to take this opportunity today to pay tribute to our local police officers and recognize this week, May 13–19, as "National Police Week."

On Tuesday, May 15 the ninth annual National Peace Officers Memorial Day Service was held. This was a day to pay tribute to the 161 officers who were killed in the line of duty during 1989. These extraordinary individuals dedicated their lives to protect your family, my family, and the citizens of our Nation. In New York City alone, there were six police officers who were killed in the line of duty in 1989. One of them, Jeff B. Herman was from my district in Brooklyn. The other New York City police officers who were killed were: Gary Coe, Anthony Dwyer, Richard J. Guerzon, Robert Edward Machate, Jr., and Keith L. Williams. I am sad to report that already we have a name to add for 1990, Joseph Aversa, who was killed while participating in a drug raid in New York City in March.

I believe Congress must continue to introduce legislation that would protect those individuals that put their lives in jeopardy everyday in the line of duty. I strongly support any legislation that proposes to enforce the death penalty on those individuals convicted of drug crimes who kill a police officer.

Currently, the National Law Enforcement Officers' Memorial is being built here in Washington, DC's Judiciary Square. This memorial was authorized by a unanimous act of Congress in 1984 and more than 500,000 Americans have donated funds for it. The memorial is scheduled to be completed and dedicated during National Police Week of May 12–18, 1991. The National Law Enforcement Officers Memorial will honor all officers who have served, and will have the names of all officers who have died in the line of duty.

I urge all of my colleagues to pay tribute to their local police officers this week. We must acknowledge their extraordinary service and sacrifice to our communities.

## MARYLAND HALL'S 10TH ANNIVERSARY

### HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 17, 1990*

Mr. McMILLEN of Maryland. Mr. Speaker, I rise today to call the attention of my colleagues to the occasion of the 10th anniversary of the Maryland Hall for the Creative Arts, which will be celebrated on May 18, 1990. Founded by a group of visionary residents of Anne Arundel County, the Maryland Hall is dedicated to promoting, supporting, and celebrating all of the creative arts. Over 40,000 people a year participate in Maryland Hall educational programs, attend exhibitions, or

experience performances by world class actors and musicians.

The Maryland Hall is home to 10 artists in residence, as well as the Annapolis Symphony Orchestra, the Ballet Theater of Annapolis, the Annapolis Chorale and Pamoja. Maryland Hall's many outreach programs take artistic experiences to schoolchildren, the elderly and minorities of the region who might not otherwise have an opportunity to enjoy these programs. Maryland Hall is the center which affords opportunities for artists and audiences of all ages, talents, and experience to learn and thrive.

I hope that my colleagues will join in wishing them a happy anniversary and wishing them many more years of bringing quality arts programs to Annapolis, Anne Arundel County, and the State of Maryland.

# SENATE—*Friday, May 18, 1990*

*(Legislative day of Wednesday, April 18, 1990)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable HARRY REID, a Senator from the State of Nevada.

## PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*Blessed be God, even the Father of our Lord Jesus Christ, the Father of mercies, and the God of all comfort; Who comforteth us in all our tribulation, that we may be able to comfort them which are in any trouble, by the comfort wherewith we ourselves are comforted of God.*—II Corinthians 1:3, 4.

God of all comfort, we commend to Thee today those whom we love and who need the comfort of God. We ask Your special blessing upon Dr. Narva as he undergoes bypass surgery, and we pray for Mary Jackson of the Service Department, recovering from surgery; and any others, Lord, about whom we do not know, who are hurting. Grant Thy healing to all.

We pray for our families that this weekend may be an opportunity for drawing near to each other, restoring relationships and healing. We pray for those who travel, that Thou wilt protect them in their journey, prosper them in their labors, and return them safely home. We pray for those who campaign. Give them wisdom, clarity, winsomeness. Guard them against any attitude or action which would bring reproach upon our political system.

The Lord bless you, and keep you: The Lord make His face to shine upon you, and be gracious unto you: The Lord lift up His countenance upon you, and give you peace. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, DC, May 18, 1990.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HARRY REID, a Senator from the State of Nevada, to perform the duties of the Chair.

ROBERT C. BYRD,
*President pro tempore.*

Mr. REID thereupon assumed the chair as Acting President pro tempore.

## RESERVATION OF LEADERSHIP TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

In my capacity as a Senator from the State of Nevada, I suggest the absence of a quorum.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## MORNING BUSINESS

### ORDER OF PROCEDURE

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Pennsylvania [Mr. SPECTER] is recognized to speak for 30 minutes in morning business.

## FEDERAL HABEAS CORPUS REFORM ACT OF 1990

Mr. SPECTER. I thank the Chair and I thank the distinguished majority leader and the distinguished Republican leader and the schedulers for arranging for this unusual block of time so that I may address a problem of great seriousness, the problem of crime in America, and there is no more important problem in our country, a country which faces many serious problems, but there is no more important problem in our country than crime in America.

In the criminal justice system, Mr. President, there is no more important issue than the lengthy delay in the imposition of the death penalty in capital cases and the effect that this delay has on the administration of justice and the deterrent effect in the criminal justice system.

I am introducing legislation today, Mr. President, captioned the Federal Habeas Corpus Reform Act of 1990. I do this today in advance of consideration by the Senate on Monday of the crime package because I intend to add this legislation as an amendment to that bill.

This bill will establish a timeframe for the imposition of the death penalty in State criminal proceedings that will again make that penalty meaningful. The scope of this problem is demonstrated by the fact that as of May 1, 1990, there were 2,327 people on death row with 125 executions having been carried out since the reinstatement of capital punishment in 1976. Those statistics demonstrate that, as a realistic matter, there is no capital punishment in the United States because the probabilities are higher that no matter what the offense, no matter what the circumnstances, the death penalty will not be carried out.

When Chief Justice Rehnquist said on Tuesday of this week that the current system for handling the death penalty in the Federal courts "verges on the chaotic," the Chief Justice was being charitable. The existing process makes a farce of the death penalty. Chief Justice Rehnquist was correct in calling for remedial legislation; but his proposal and the other pending measures do not go far enough in dealing with the core of the problem.

Today, the death penalty is the laughingstock of the criminal justice system because endless delays in Federal habeas corpus proceedings have rendered that punishment meaningless. Cases involving capital punishment are dragged through the courts for as long as 17 years.

Before a case finds its way through the court system, there are intervening decisions by the Supreme Court of the United States or other courts which grant defendants new rights. And then, before the death penalty can be imposed, there has to be a consideration of those new rights. I believe that is entirely appropriate, Mr. President, because the death penalty, after all, is the ultimate penalty and it has to be imposed with extreme and scrupulous care.

I believe that the death penalty has to be reserved for the most egregious cases as a matter of basic justice and, beyond that, as a matter of practical course. If we do not reserve the death penalty for limited use in the most egregious cases, then I believe as a society we will lose it.

The legislation which I am proposing today, Mr. President, is based on the experience I had as an assistant district attorney in the criminal courts of Philadelphia and later as the chief of the appeals division in the district attorney's office, where I handled

many State habeas corpus cases and Federal habeas corpus cases, and later my experience as the district attorney, where I supervised hundreds of such cases.

Mr. President, this legislation establishes a practical and just timetable for the handling of appeals after a jury has imposed the death penalty and after a State appellate court has reviewed the matter and a petition for a writ of certiorari has been submitted to the Supreme Court of the United States. It is at that stage, Mr. President, that the final judgment has been rendered in the State criminal proceeding imposing the death penalty.

My timetable for completion of all Federal habeas corpus appeals within a 1-year period. That would make the death penalty a meaningful penalty in this country once again.

First, my proposal would eliminate State habeas corpus proceedings. What is a habeas corpus proceeding? It is a term which is frequently used and virtually never understood.

Habeas corpus is a Latin expression which means produce the body. From our reliance on English common law, the great writ of habeas corpus is always available to demand the production of the body of the defendant to make a determination if his or her detention is lawful.

After a person is convicted of murder in the first degree and given the death penalty, that person has a right to go into court on a petition for a writ of habeas corpus on a contention that the detention is unlawful because there was error on the criminal proceeding.

Under existing practice, before a Federal court can take jurisdiction of an appeal in a death case, there must be an exhaustion of State remedies, and that means there must be a petition for habeas corpus filed in the State court. That petition goes back to the same court which heard the case in the first instance and imposed the death penalty. The proceedings there are virtually always pro forma, because the judge is looking at a case which either he tried before, in a small county where there is only a single judge, or where another judge in his own court tried the case; where the issues virtually always are the same as those raised before the State supreme court; and where the State supreme court has upheld the judgment of sentence of death, and has stated the case was fairly tried. So, in the common pleas court, the habeas corpus proceeding is really pro forma.

The case then, in Pennsylvania, for example, goes to the Supreme Court of Pennsylvania and the supreme court is now reviewing a case which it already decided. Here again, virtually all of the time, the same issues are raised which were raised before or could have been raised before and there is very seldom anything new in the process. The case is affirmed virtually all the time.

Then there is another petition to the Supreme Court of the United States to grant a writ of certiorari, which is very, very rarely done. Only at that stage, may the defendant go into the Federal court to seek Federal review of what had happened in the State court.

Mr. President, I suggest the lengthy processes on State habeas corpus proceedings have very little, if any, merit in our criminal justice system because they are pro forma and because there is a later opportunity for a meaningful review in the Federal system, which is a different court system, and a fresh look at the case. Then they begin the habeas corpus proceeding in what is a meaningful way.

Some would seek to deny Federal court review of any State criminal proceeding, and I believe it is important to retain the jurisdiction of the Federal courts to review what happens in State court criminal cases, especially where the death penalty is imposed.

At that stage the habeas corpus proceeding begins anew, with the United States District Court conducting an evidentiary hearing if there is a disputed question of fact. The case then goes on appeal to the Court of Appeals. By the time these two habeas corpus proceedings have run their course, years have passed under existing practices, and by this time there is very often an intervening decision by the Supreme Court of the United States which establishes a new constitutional right. As, for example, the case of Miranda versus Arizona, where the Court said that a conviction was improper unless specific warnings were given to a defendant, warnings which could not have been anticipated at the time the arrest was made so a new right is created. Or a new right may be created in terms of what protections are necessary at a lineup, where a defendant is identified.

When a new right has been created, the process must begin all over again. It cannot be brought in the Federal courts until there is an exhaustion of State proceedings, back to State habeas corpus, and all this is not only an exhaustion of State remedies but there is an exhaustion of the entire system.

Mr. President, the proceedings with State habeas corpus ought to be abolished. Then there should be a strict timetable established for what will happen in the Federal courts. An indispensable ingredient for the carrying out of this strict timetable is that any State which wishes to benefit from the new rules will have to provide competent counsel to the defendant without charge at every stage of the proceeding.

The Congress of the United States does not mandate that States do so because of our concern for federalism. But we do approach the same objective by providing that if a State wishes to have these expedited procedures the State must provide for counsel.

Under my legislation, Mr. President, the petition for a writ of habeas corpus would have to be filed in the Federal court within 30 days from the final adjudication in the State court proceeding. That is sufficient time because there is no question, as that case is going through the State criminal court system, that there will be an application for Federal review where the death penalty is handed out. And, where counsel has been provided, counsel need not wait until the final judgment in the State case to begin the preparation. But, even if counsel does so, there is ample time to prepare that petition for a writ of habeas corpus within 30 days.

Most of the issues are known. Most of the issues have been argued in the State court proceeding. If there are new issues, there are not so many that it is unwieldy to accommodate a requirement that that petition be filed within 30 days. Other pending proposals would allow up to 1 year, and there is no reason to have that kind of a timeframe.

Once the petition for a writ of habeas corpus is filed in the Federal courts, my legislation would require disposition in the U.S. district court in 110 days; 20 days for the State's attorney to file a responsive pleading, which is customary in court cases, 20 days for an answer, and then 90 days for a hearing, for briefing, and for a decision in the case.

That time is sufficient, Mr. President, so long as it is not business as usual. These cases must be given the top priority in the Federal system. These cases are sufficiently important for many reasons so that high priority ought to be accorded to these cases. It is our obligation in the Congress, Mr. President, to see to it that there are ample Federal judges to hear these cases.

Last night, there was a bill introduced to provide 77 additional Federal judges to handle the workload in the Federal courts. Whatever it takes, we have to provide, because there is no case of higher priority than this type of case.

Mr. President, after the district court concludes the case, my bill provides for 110 days for judgment in the court of appeals. That is about the same timespan which is currently provided. I expedite the docketing time from 30 days to 20 days, and then there is 90 days for briefing, argument, and a decision by the court of appeals.

The same 110-day timeframe would apply for decision by the Supreme Court of the United States. You have 30 days to file the petition, 110 days in the district court, 110 days in the circuit court, and 110 days in the Supreme Court for a total of 360 days. By giving these cases that kind of careful treatment, that kind of expedited treatment, the appropriate care can be given within that timeframe. I say that based upon my experience in having handled cases at all stages of these proceedings.

It will not be business as usual. The lawyers will have to give priority attention, just as lawyers do when a case is on trial. When a lawyer has a case on trial, he starts early, he prepares witnesses in advance of the court day. It is a strenuous day in court. After hours, there may be the preparation of legal memoranda. The judges will have to move these cases along, but it can be done and should be done.

My bill, Mr. President, does make an allowance for continuance on a showing of good cause—that is the phrase used in the law—which ought to be tightly enforced, cause ought to be allowed for a continuance only when there is very, very good reason. Then my bill would require a detailed specification by the court for the granting of such continuance.

A complex issue then arises, Mr. President, as to what happens on a subsequent petition for a writ of habeas corpus in the Federal courts, because it is not possible to lock the door with finality. This issue was discussed extensively in hearings before the Judiciary Committee.

My proposal has an unusual procedure which would prohibit the filing of a second petition for a writ of habeas corpus unless leave was first obtained by a three-judge panel of the court of appeals. If the case had been fully adjudicated through this Federal habeas corpus route, then the petitioner, the defendant, and his lawyer can get leave to file a second petition if they go before an appellate panel and show justification for doing so.

Mr. President, there is a controversy as to whether the grounds for a second petition ought to be only on the showing of innocence or ought to be broader to show some impropriety in the sentencing. My view is the broader standard has to be applied, because I think it is necessary to be very, very careful in the application of the death penalty—careful but not frivolous.

There is also controversy over whether the intervening decisions ought to be available to a defendant, a convict under the death penalty. The Chief Justice has taken the position that those intervening decisions ought not to be used by a defendant to try to escape the death penalty and I, frankly, disagree with that, because here again, we have to exercise extreme care in the application of the death penalty.

But under this restricted timeframe where, in almost all cases, the habeas corpus proceeding would be concluded within 1 year, the problem of intervening decisions will no longer be what it is today when cases stretch out for 6, 8, 10, up to 17 years.

Mr. President, there has always been debate on the deterrent effect of capital punishment. That issue really ought not to be before the Congress as we try to move through an appropriate procedure for Federal habeas corpus because 37 States in the United States have capital punishment. Their judgment of the propriety of capital punishment ought to be respected, and Congress should fashion a procedure through Federal habeas corpus proceedings which protects the rights of the defendants but does not render the State capital punishment meaningless as it works through this procedural route.

In the course of my statement, Mr. President, I have detailed my own thinking that capital punishment is an effective deterrent. The statistics go both ways on the subject. Statistics can be amassed for virtually any proposition, as we know. Ultimately, it is a judgment call.

I have seen many cases where professional robbers and burglars will not carry a weapon because they are apprehensive that a death may result and they may face capital punishment. A very interesting series of cases were collected in an opinion filed in dissent in a California case, which is set forth in detail in my prepared statement.

I do not have time to go through the entire statement now. At the conclusion of my comments, I will ask that it be printed after the comments which I am making on the floor today.

But a few of these cases are illustrative. Margaret Daly was arrested for assaulting Pete Gibbons with a knife. She stated to investigating officers: "Yeh, I cut him, and I should have done a better job. I would have killed him, but I didn't want to go to the gas chamber."

Robert Thomas was arrested for robbery with a toy pistol. When questioned by investigating officers as to the reason for using toy guns, he said real guns were too dangerous because if someone was killed in the commission of the robbery, he would get the death penalty.

Louis Turek was arrested for robbery. Again, a simulated gun. Why? He said, "I knew that if I used a real gun and that if I shot someone of the robbery, I might get the death penalty and go to the gas chamber."

As a matter of judgment, I am convinced from the experience that I have had that the penalty of death is an effective deterrent.

There is no doubt, with the death penalty being on the books in some 37 States, that the overwhelming majority of legislatures in our State system have concluded that the death penalty is an appropriate penalty and it is in society's interest, including the State of Pennsylvania's.

One case that I handled as an assistant district attorney is illustrative again of the deterrent effect of the death penalty. There were three young hoodlums named Williams, Caters, and Rivers, aged 19, 18, and 17. Williams was the ringleader and had planned the robbery of a grocery store in North Philadelphia. He picked Rivers, who was 17, because Rivers had no criminal record, so that when Rivers opened the door and left his fingerprints on the door, he would not be detected. His identity could not be determined through fingerprints because he had none on file.

Williams had a gun, and when the two younger men saw the gun, they refused to go along on the robbery because they were fearful the gun would be used and death might result and they could face death in the electric chair.

Williams said, "OK, I will not take the gun." He put it in the drawer and slammed it shut. They all got up to leave. Williams reached in, picked up the gun, unbeknownst to the two younger men, and, as you might suspect, Williams used the gun. When the storekeeper resisted, the gun was used. The storekeeper was murdered.

All three entered guilty pleas and made statements. There was no doubt about the facts, and all three were sentenced to death in the electric chair. Williams was ultimately executed in 1962, the next-to-the-last man executed in the State of Pennsylvania. The two younger men, Rivers and Caters, ultimately received life sentences, because the evidence showed that they did not have the malicious intent and were not coconspirators, although technically liable for the same penalty, and their lives were spared.

But the lesson from the case is that these two young hoodlums, 18 and 17, were smart enough to know they did not want to go along on a robbery with a gun because the gun might be used, death might result, and they might face capital punishment.

There are many, many cases like that. There is very strong authority in this country that the death penalty is an effective deterrent.

What has happened today, Mr. President, with 2,300 people on death row, the death penalty has become a joke. It is a laughing stock. With only 120-some executions since 1976, the odds are vastly in favor of someone who commits murder in the first degree in a calculated, malicious way. The odds are against being apprehend-

ed, the odds are against being convicted, the odds are against being sentenced, and even if sentenced, 2,300 people have not been executed and the delays are interminable.

This legislation will provide a realistic, practical, and just remedy by establishing a timetable which can be met. When the year has expired and the matter is still fresh, the death penalty will be a meaningful deterrent and the Federal criminal justice system will have responded to a very important problem in this country.

I see my time has expired.

Mr. President, I ask unanimous consent that the full text of my statement be printed in the RECORD. I have quoted from parts of the statement, but the remainder, the principal part of what I have had to say, has not followed the text.

So I ask unanimous consent the full text be printed in the CONGRESSIONAL RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR ARLEN SPECTER ON THE FEDERAL HABEAS CORPUS REFORM ACT OF 1990

This proposed legislation, "The Federal Habeas Corpus Reform Act of 1990," which I intend to add as an amendment to the crime package, establishes a timeframe for imposition of the death penalty in state criminal cases that will again make that penalty meaningful. The scope of the problem is demonstrated by the fact that as of May 1, 1990, there were 2,327 people on death row with 125 executions since the reinstatement of capital punishment in 1976.

When Chief Justice William H. Rehnquist said on Tuesday of this week that the current system for handling death penalty in the Federal courts "verges on the chaotic," he was being charitable. The existing process makes a farce of the death penalty. Chief Justice Rehnquist was correct in calling for remedial legislation; but his proposal and the other pending measures do not go far enough in dealing with the core of the problem.

Today the death penalty is the laughingstock of the criminal justice system because endless delays in Federal court habeas corpus proceedings have rendered it meaningless. Cases involving capital punishment are dragged through the courts for as long as 17 years.

Before a case finds its way through the court system, intervening decisions by the Supreme Court of the United States frequently establish new Constitutional rights which, in turn, causes the litigation process to begin anew. The great writ of habeas corpus is always available, so stays of proceedings repeatedly delay the imposition of the death penalty resulting in public scorn and criminals' contempt for a penalty which all know will probably never be imposed.

This legislative proposal is based on my experience in personally handling numerous state and Federal court habeas corpus proceedings as an Assistant District Attorney and Chief of the Appeals Division in the District Attorney's office and later supervising hundreds of such cases as District Attorney of Philadelphia.

A PRACTICAL, JUST TIMETABLE

This proposed legislation establishes a timetable for imposition of the death penalty in almost all cases within one year from the time the state courts impose the death penalty. The essential provisions are:

1. Elimination of state habeas corpus proceedings which involve enormous delays by providing for collateral attack on the judgment of sentence of death.

2. A single Federal court review, through habeas corpus proceedings, where almost all cases will be decided within one year on this schedule:

(a) Federal habeas corpus petitions must be filed within 30 days from the final action in the state court proceeding resulting in the death penalty.

(b) A final decision must be made by the United States District Court within 110 days from the filing of the habeas corpus petition.

(c) A final decision must be made by the United States Court of Appeals within 110 days after, the final judgment of the U.S. District Court.

(d) Final action on a grant or denial of certiorari by the Supreme Court of the United States must be made within 110 days from final judgment of the Court of Appeals.

3. The statutes would prohibit continuances except on the showing of good cause with a detailed specification of reasons by any court granting such continuance.

4. No subsequent Federal court habeas corpus petition shall be entertained unless specific leave for such filing is granted by the Court of Appeals for the circuit with jurisdiction.

5. The proposed expedited treatment of Federal habeas corpus proceedings would apply only in states which agree to provide free, competent legal counsel for defendants throughout the legal process in capital cases.

This compressed timeframe is both just and practical because it eliminates the long delays occasioned by state habeas corpus proceedings and establishes Federal habeas corpus death penalty proceedings as the highest priority in the Federal judicial system.

For reasons discussed in this floor statement, the death penalty is sufficiently important to be accorded this priority on the Federal court calendar with the addition of such Federal judges as may be necessary to accomplish the stipulated timetable.

The essence of effectiveness of any criminal sentence is swiftness and certainty. Today the death penalty is exactly the opposite: lengthy delays and great uncertainty. Its deterrent effect is virtually totally vitiated. Society is unprotected. The inmates on death row are unfairly held in limbo in a system which exacts a high price from them even though obviously preferable to the ultimate imposition of the death penalty.

RETROACTIVE EFFECT TO NEWLY CREATED RIGHTS

My bill accommodates two vexing issues posed by other pending legislative proposals. Sharp disagreement has arisen as to whether rights created by intervening court rulings should be given retroactive effect to prisoners whose convictions were already final and who were in the process of seeking habeas corpus relief. Under existing law where the habeas corpus proceedings have taken years to complete, it has been a frequent occurrence for the courts to interpret new Constitutional rights in the interim. On this proposed timetable for completion of Federal court habeas corpus actions within one year, that problem will be greatly reduced.

In my judgment it is neither conscionable nor realistic to carry out the death penalty where that result might be altered by a Constitutional right created by an intervening judicial opinion. My proposed legislation would allow the defendant to benefit from any newly created rights, but would greatly minimize this problem by compressing the timetable.

STANDARD FOR NEW PETITION

My proposal would eliminate much of the controversy between the recommendation of the committee chaired by former Supreme Court Justice Lewis F. Powell, Jr. which had proposed permitting successive petitions only if there was reason to doubt the defendant's guilt contrasted with the approach of the Judicial Conference which would allow a subsequent petition if the Federal judge doubted the appropriateness of the sentence of death. By establishing the Court of Appeals as the gatekeeper before leave is granted to file a subsequent petition, there would be a much tighter rein on such repetitions provisions.

Here again, it is unwise, if not unconscionable, to impose a more restrictive provision where the death penalty will be carried out. Sincew the death sentence carries with it conclusions of both guilt and sufficient aggravated circumstances to warrant that penalty, it is my judgment that the standards for allowing a subsequent petition should be broad enough to consider the appropriateness of the death sentence. Requiring leave by the circuit court before the subsequent petition may be filed provides a strong check against unmeritorious repetitive petitions.

STATE HABEAS CORPUS PROCEEDINGS SHOULD BE ELIMINATED

State habeas corpus proceedings, which provide for collateral attack on state court death penalty cases, involve lengthy delays and accomplish virtually nothing in the administration of justice. Such state habeas corpus proceedings involve a petition for a writ of habeas corpus which means in Latin to produce the body of the defendant on a showing that some error has been committed in the preceding state trial.

For example, in Pennsylvania a defendant is indicted on the charge of murder in the first degree, which is then tried before a jury in the Court of Common Pleas. If convicted of murder in the first degree, the jury then considers aggravating and mitigating circumstances to determine whether the appropriate penalty is life imprisonment or death in the electric chair. Where the jury imposes the death penalty, there is an appeal to the Supreme Court of the Commonwealth of Pennsylvania. If the conviction and death penalty are upheld by the Pennsylvania Supreme Court, the defendant may then petition the Supreme Court of the United States for a writ of certiorari which means that the United States Supreme Court then may, at its discretion, issue a writ to review the case. As a matter of practice, review by the U.S. Supreme Court occurs very, very infrequently.

After a denial by the Supreme Court of the United States of a petition for a writ of certiorari, Federal law requries the defendant to file a state habeas corpus proceeding in order to exhaust all state administrative remedies before the Federal court would have jurisdiction to review the case in a Federal habeas corpus action.

In the state court habeas corpus proceeding, the defendant then asks the Court of Common Pleas in the same county where the defendant was convicted to review the trial record on a claim that the defendant's Constitutional rights were violated in that trial. While the state habeas corpus proceeding is in the Court of Commmon Pleas of the same county, it is customary before a different judge to handle the second proceeding. Although in some lesser-populated counties where there is only one common pleas judge, the habeas corpus action comes before the same jurist.

Where questions of fact are raised in the petition, the Court will then hold an evidentiary hearing. Such hearings are virtually always perfunctory since the courts, realistically viewed, go through the motions on cases which have previoulsy been argued and adjudicated. In virtually all cases, the petitions for a writ of habeas corpus are denied because most, if not all, of the issues have already been decided against the defendant by the state Supreme Court.

After the Court of Common Pleas denies the petition for writ of habeas corpus, an appeal is then taken to the state Supreme Court which customarily affirms the lower court's denial of the petition because, here again, the state Supreme Court is reviewing a case and a defendant on which the court has already ruled. After the Supreme Court of the United States denies a petition for a writ of certiorari, the defendant then has standing to file a habeas corpus proceeding in the Federal courts.

This state habeas corpus proceeding frequently takes years because no one is in a hurry, the courts are clogged with other cases and it has become the common practice for such matters to languish since the defendant is in jail and other matters take precedence. At this juncture, the defendant may file a petition for a writ of habeas corpus in the United States District Court and the habeas corpus process is repeated. Where issues of fact arise, a hearing is held. After an adjudication by the District Court, an appeal is then taken to the United States Court of Appeals. After the decision by the Court of Appeals, a petition is filed for writ of certiorari with the Supreme Court of the United States. This Federal court process may again take years.

By the time the state and Federal court habeas corpus proceedings have been concluded, it frequently occurs that an intervening decision by the Supreme Court of the United States or other court has created (or at least the defendant may colorably argue) new defendants' rights which provides some basis for a new attack on the conviction and death sentence. Then the whole habeas corpus starts anew in the state courts to be followed by the Federal courts. At the end of that process, it again frequently occurs that some intervening decision has or appears to have established some new defendants' rights and the process can then be repeated virtually interminably.

This proposed legislation would eliminate the state habeas corpus proceeding as a precondition to the Federal habeas corpus proceeding because the state process is usually a formality; and, in any event, is unnecessary to determine any denial of Constitutional rights at trial. Any such legal issues can be adequately litigated in the Federal habeas corpus proceeding.

IMPORTANCE OF THE DEATH PENALTY—DETERRENCE

This proposed legislation would give the highest priority in the Federal courts to state capital cases because of their importance in our criminal justice system. It should really be unnecessary to prove that capital punishment is a deterrent in order to justify priority treatment in the Federal courts since 37 states impose the death penalty on their legislative judgments of its importance.

Beyond that strong statement of importance, it is my firm conclusion that the death penalty is a deterrent. My experience in this field started in 1959 when I was an assistant district attorney in the city of Philadelphia. From experience in the magistrates' courts, where I saw the full range of criminal conduct—robberies and burglaries and rapes and assaults and murders—I became convinced that the death penalty was an effective deterrent.

My later experience as district attorney further supported my judgment that the death penalty was a deterrent. Robbers, burglars and other professional criminals customarily do not carry weapons because of their concern that they use those weapons and face possible imposition of the death penalty. They reconsider the use of weapons in the course of a robbery or burglary because they do not want to face the possibility of the death penalty.

One illustrative case from the Philadelphia Criminal Courts some 30 years ago involved three young hoodlums named Williams, Caters, and Rivers. Williams was 19, Caters was 18, and Rivers was 17. Williams chose Rivers, the 17-year-old, because he did not have a criminal record and, therefore, could open the door of the grocery store they planned to rob without leaving fingerprints.

As the statements of Williams and Rivers and Caters disclosed—and they were all in agreement on the underlying planning of the robbery which resulted in murder—Williams importuned the two younger men to join him. Williams had a gun. When Williams brandished his gun, Caters and Rivers said they would not go along on the robbery if he took the gun, because they were afraid that there might be a killing and they would face the possibility of the death penalty."

So Williams put the revolver in a drawer and slammed it shut. Caters and Rivers got up and walked out of the room. Then, unbeknownst to Caters and Rivers, Williams pulled the gun out of the drawer, put it in his pocket, and, as you have suspect, Williams used the revolver on a storekeeper in north Philadelphia, and a murder resulted.

I argued the case on appeal in the Supreme Court of Pennsylvania, as an assistant district attorney in the early 1960s. Williams received the death penalty because of his calculated, malicious decision to carry the weapon in the course of a robbery which resulted in death and first-degree murder.

Caters and Rivers ultimately received life imprisonment because the facts showed that they did not have the degree of malice that Williams possessed, although technically, as a matter of law, any co-conspirator can be held to the same level of complicity.

The significant fact of this case is that a 17-year-old Rivers and and 18-year-old Caters, with marginal IQs, knew that the death penalty was a potential result of their robbery if a gun was carried. The prospect of the death penalty directly affected the conduct of Caters and Rivers.

An experienced ex-New York City police officer who serves on my staff, Tom Madine, commented about the increases in murder in New York State as a result of the death penalty having been eliminated there.

ILLUSTRATIVE CASES ON DETERRENCE

A dissenting opinion in a 1961 California case captioned *People* v. *Love* contains a summary of many cases which show the deterrent effect of capital punishment. These cases are worth citing here because the specific facts and the defendants' statements demonstrate human nature on deterrence much more vividly than dry statistics. Mr. Justice McComb wrote: "Any prosecuting attorney or criminal defense attorney or any trial judge who has sat for a substantial period in a department of the superior court devoted to the trial of felony cases knows that many felons are careful to refrain from arming themselves with a deadly weapon because they do not want to take the chance of killing anyone and suffering death as a penalty.

"A few recent examples of the accuracy of this view are to be found in the following cases involving persons arrested by officers of the Los Angeles Police Department:[1]

"(i) Margaret Elizabeth Daly, of San Pedro, was arrested August 28, 1961, for assaulting Pete Gibbons with a knife. She stated to investigating officers: 'Yeh, I cut him and I should have done a better job. I would have killed him but I didn't want to go to the gas chamber.'

"(ii) Robert D. Thomas, alias Robert Hall, an ex-convict from Kentucky; Melvin Eugene Young, alias Gene Wilson, a petty criminal from Iowa and Illinois; and Shirley R. Cofee, alias Elizabeth Salquist, of California, were arrested April 25, 1961, for robbery. They had used toy pistols to force their victims into rear rooms, where the victims were bound. When questioned by the investigating officers as to the reason for using toy guns instead of genuine guns, all three agreed that real guns were too dangerous, as if someone were killed in the commission of the robberies, they could all receive the death penalty.

"(iii) Louis Joseph Turek; alias Luigi Furchiano, alias Joseph Farino, alias Glenn Hooper, alias Jose Moreno, an ex-convict with a felony record dating from 1941, was arrested May 20, 1961, for robbery. He had used guns in prior robberies in other states but simulated a gun in the robbery here. He told investigating officers that he was aware of the California death penalty although he had been in this state for only one month, and said, when asked why he had only simulated a gun, 'I knew that if I used a real gun and that if I shot someone in a robbery I might get the death penalty and go to the gas chamber'.

"(iv) Ramon Jesse Velarde was arrested September 26, 1960, while attempting to rob a supermarket. At that time, armed with a loaded .38 caliber revolver, he was holding several employees of the market as hostages. He subsequently escaped from jail and was apprehended at the Mexican border. While being returned to Los Angeles for prosecution, he made the following statement of the transporting officers: 'I think I might have escaped at the market if I had shot one or more of them. I probably would have done it if it wasn't for the gas

[1] The cases cited are taken from the records on file in the Los Angeles Police Department.

chamber. I'll only do 7 or 10 years for this. I don't want to die no matter what happens, you want to live another day.'

"(v) Orelius Mathew Stewart, an ex-convict with a long felony record, was arrested March 3, 1960, for attempted bank robbery. He was subsequently convicted and sentenced to the state prison. While discussing the matter with this probation officer, he stated: 'The officer who arrested me was by himself, and if I had wanted, I could have blasted him. I thought about it at the time, but I changed my mind when I thought of the gas chamber.'

"(vi) Paul Anthony Brusseau, with a criminal record in six other states, was arrested February 6, 1960, for robbery. He readily admitted five holdups of candy stores in Los Angeles. In this series of robberies he had only simulated a gun. When questioned by investigators as to the reason for his simulating a gun rather than using a real one, he replied that he did not want to get the gas chamber.

"(vii) Salvador A. Estrada, a 19-year-old youth with a four-year criminal record, was arrested February 2, 1960, just after he had stolen an automobile from a parking lot by wiring around the ignition switch. As he was being booked at the station, he stated to the arresting officers: 'I want to ask you one question, do you think they will repeal the capital punishment law. If they do, we can kill all you cops and judges without worrying about it.'

"(viii) Jack Colevris, a habitual criminal with a record dating back to 1945, committed an armed robbery at a supermarket on April 25, 1960, about a week after escaping from San Quentin Prison. Shortly thereafter he was stopped by a motorcycle officer. Colervris, who had twice been sentenced to the state prison for armed robbery, knew that if brought to trial, he would again be sent to prison for a long term. The loaded revolver was on the seat of the automobile beside him and he could easily have shot and killed the arresting officer. By his own statements to interrogating officers, however, he was deterred from this action because he preferred a possible life sentence to death in the gas chamber.

"(ix) Edward Joseph Lapienski, who had a criminal record dating back to 1948, was arrested in December 1959 for a holdup committed with a toy automatic type pistol. When questioned by investigators as to why he had threatened his victim with death and had not provided himself with the means of carrying out the threat, he stated, 'I know that if I had a real gun and killed someone, I would get the gas chamber.'

"(x) George Hewlitt Dixon, an ex-convict with a long felony record in the East, was arrested for robbery and kidnapping committed on November 27, 1959. Using a screwdriver in his jacket pocket to simulate a gun, he had held up and kidnaped the attendant of a service station, later releasing him unharmed. When questioned about his using a screwdriver to simulate a gun, this man, a hardened criminal with many felony arrests and at least two known escapes from custody, indicated his fear and respect for the California death penalty and stated, 'I did not want to get the gas.'

"(xi) Eugene Freeland Fitzgerald, alias Edward Finley, an ex-convict with a felony record dating back to 1951, was arrested February 2, 1960, for the robbery of a chain of candy stores. He used a toy gun in committing the robberies, and when questioned by the investigating officers as to his reasons for doing so, he stated: "I know I'm going to the joint and probably for life. If I had a real gun and killed someone, I would get the gas. I would rather have it this way."

"(xii) Quentin Lawson, an ex-convict on parole, was arrested January 24, 1959, for committing two robberies, in which he had simulated a gun in his coat pocket. When questioned on his reason for simulating a gun and not using a real one, he replied that he did not want to kill someone and get the death penalty.

"(xiii) Theodore Roosevelt Cornell, with many aliases, an ex-convict from Michigan with a criminal record of 26 years, was arrested December 31, 1958, while attempting to hold up the box office of a theater. He had simulated a gun in his coat pocket, and when asked by investigating officers why an ex-convict with everything to lose would not use a real gun, he replied, 'If I used a real gun and shot someone, I could lose my life.'

"(xiv) Robert Ellis Blood, Daniel B. Gridley, and Richard R. Hurst were arrested December 3, 1958, for attempted robbery. They were equipped with a roll of cord and a toy pistol. When questioned, all of them stated that they used the toy pistol because they did not want to kill anyone, as they were aware that the penalty for killing a person in a robbery was death in the gas chamber."

REALISTIC TIMETABLE

It is realistic to establish a timetable for the full range of Federal habeas corpus proceedings within one year. A key factor is the requirement that the states must proivde competent free counsel to defendants in capital cases through all legal proceedings. It may be that the trial counsel would handle all stages of these unless there is a allegation of incompetency of counsel in which event new counsel would obviously have to be provided to press that claim.

It is practical to require the Federal habeas corpus petition to be filed within 30 days from the final judicial action upholding the death penalty in a state criminal proceeding. It would not be "business as usual"; but I know from my own experience in the criminal justice system that a lawyer can prepare the petition in that timeframe although it may require long hours, overtime effort or putting aside other legal matters.

If there are unusual circumstances, and it must be conceded that it is not possible in a statutory setting to anticipate every conceivable situation, the court may allow extra time on a showing of good cause with the specifications of the reasons.

Similarly, it is practical for the United States District Court to render a final decision within 110 days from the filing of the habeas corpus petition. That timeframe would allow 20 days for a responsive pleading by the public prosecutor and 90 days for hearings, briefings, argument and a decision by the district court. Again, from my own experience in the field, I know that this timetable can be observed although it would require a Federal judge to give priority to such matters and the lawyers to be diligent in processing the case. It is customary when cases go to trial that lawyers are heavily engaged not only during the hours of trial in court, but in advance of the trial day in preparing witnesses, and after court hours on legal research and the preparation of legal memoranda.

It is further practical to require a decision by the Court of Appeals within 110 days after the final judgment of the district court. This is only slightly faster than existing rules on docketing and briefing. This timetable will give the appellate court an adequate opportunity for review, reflection and decision. In the British courts, judges render immediate decision and opinions after hearing appellate argument. As a practical matter, most decisions are made by an appellate judge within a relatively brief period of time after oral arguments or submission of briefs.

It is again realistic to require final action by the Supreme Court of the United States within 110 days. This would allow 20 days for the preparation of the petition for certiorari and 90 days for decision by the court. It is currently a common practice for the Supreme Court to deny certiorari in a much shorter period of time. Here again, our nation's highest court would have to accord priority treatment to capital cases, but that is a fair requirement in the face of the urgency of the issue as articulated by Chief Justice Rehnquist.

It is inevitable that some cases will not be completed within a one-year timeframe. Some trials may be so long and so complex that this timetable will be too short. It should be noted, however, that this abbreviated timetable does not take effect until after the case has been tried in the state courts where no limitation is applied to the length of trial, time for post-trial motions or appellate review. During that process, most, if not customarily all, of the complex factual and legal issues will be organized, analyzed, and resolved.

Where this proposed timetable cannot be observed, extensions may be granted on a showing of good cause where the court will be obligated to specify the reasons for any delays. If delays are granted, the court will be under an obligation to monitor the proceeding and see to it that delays are held to a minimum.

CONCLUSION

No one can deny the seriousness of the problem of crime in America. Similarly, no one can deny the inadequacy of our criminal justice system.

At a minimum, powerful arguments support the conclusion that the death penalty is a deterrent. Even those who doubt the deterrent effect of capital punishment cannot deny the legitimacy of appropriate execution of the laws of 37 states which provide for the dealth penalty.

Currently, the federal courts are "chaotic" in dealing with such cases and the death penalty in America has become a "farce."

This legislation, establishing a timetable of one year for the disposition of almost all federal habeas corpus cases, would effectively reinstate the death penalty in America.

(Mr. KOHL assumed the chair.)

## UNITED STATES-SOVIET RELATIONS AND ARMS CONTROL

Mr. DOLE. Mr. President, this week, Secretary Baker is leading the United States in ministerial discussions with the Soviet Union. High on the agenda will be discussions on arms control in preparation for the upcoming summit.

The summit is only 2 weeks away. Earlier this year, the conventional wisdom was that the summit would, among other things, wrap up the major points of a START Treaty, or even a CFE Treaty.

Now, that may or may not happen. I have no predictions to make, but I do

think it would be useful to take some time to think about United States-Soviet relations and to put arms control into perspective within that relationship.

It seems to me that we must first recognize that arms control is not the foundation of our relationship with the Soviets. Rather, it is a means to improve our security. Moreover, improved relations with the Soviets are not dependent upon arms control, but are possible only on the basis of a broad agenda that includes, among other things, human rights.

I also believe that we should not view arms control as a tool for helping President Gorbachev. While we want his reforms to succeed, we cannot afford, nor should we make concessions against our security interests for political motives.

If we recognize arms control as a means to security, not an end, and if we recognize that arms control does not constitute the basis of our relationship with the Soviet Union, we will have more realistic expectations of what the arms control process can accomplish.

It is clear that the START negotiations, in particular, have not progressed at the same pace as earlier this year. In fact, the Soviets walked back packages agreed to in February, and they have been dragging their feet ever since then.

It is hard to know what is behind the foot dragging. Maybe it is a negotiating tactic designed to win more concessions from the United States prior to the summit. If that is the case, I do not believe that President Bush is going to fall for that type of maneuvering.

After all, the U.S. objective in START is not just to make a deal, but to enhance stability and security.

One way a START Treaty can enhance stability is by reducing the number of heavy land-based ICMB's, such as the SS-18, which the Soviets, even under Gorbachev, have continued to modernize.

Mr. President, the bottom line is that we need to be careful and keep our objectives in mind. In the case of START, a conventional arms control treaty or any other arms control agreement, the goal must be stability and security. I am confident that the President and Secretary Baker will keep these objectives in mind while working for progress in arms control.

## SPENDING IN AGRICULTURE

Mr. DOLE. Mr. President, I was struck by a couple of editorials today in the Washington Post. I am not certain the Washington Post is an expert on agriculture. I thought their editorial was pretty much on mark. It is called, "The Senate Hayride."

In the Senate Agriculture Committee we now see a political effort to increase spending in agriculture when we know that we are going to have to reduce spending across the board this year $60 billion.

I come from a farm State, and farmers are like other people; if you want to give them more money, they will take it. But I do not see any great demand because farmers understand that their worst enemy is inflation, high interest rates, and the Federal deficit.

So I hope that my Democratic colleagues read the editorial in the Washington Post this morning; it makes a great deal of sense. And also to take a look at what the House Agriculture Committee did yesterday, again controlled by the Democratic party. The subcommittee increased spending in agriculture by over $10 billion—$10 billion. When we have a budget crisis, here is a subcommittee, totally irresponsible in its actions, increasing spending for the farm bill by $10 billion.

Fortunately, the chairman of the committee, Congressman DE LA GARZA, said yesterday that you cannot do that. So under the chairman's leadership, yesterday in the House Agriculture Committee, they passed a 5-year program with a 5-year freeze, with a freeze on target prices, no increases. To me, that is probably the direction we will finally go. But even then those in agriculture should be aware that when this summit meeting on the budget ends, if it ends successfully, we are going to have to revisit the farm bill, whether we pass it or not, and we are going to have to accept some cuts. That is the way it works. You cannot not exempt agriculture, education, Congress, the White House, whatever, if we are going to have an effective resolution of the deficit.

Mr. President, I ask unanimous consent that the articles of which I referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 18, 1990]

SENATE HAYRIDE

It is well understood that there won't be room in the budget for farm price and income supports to go up next year. The budget negotiations between the president and Congress are much more likely to force them down. The Democrats on the Senate Agriculture Committee are nonetheless proposing increases.

That's bad farm policy and fiscal policy alike. The Democrats recognize the fiscal pitfall. What they give with one hand they are careful to take back in part with the other. Their proposal delivers less than it sounds; it is as if they believe the constituents they are trying to please can't read very well.

The target prices on which supports depend were gradually reduced in the last farm bill, which expires this year. The Democrats would reverse that steady removal of the government from the market by indexing the targets—tying them to consumer prices. But the first four percentage points of inflation would not be counted, and the cost of the increase in supports would be offset in part by an increase (though in the proposal only a very small one) in the acreage that farmers would have to set aside.

The proposal might thus have only a marginal effect. But the combination of higher supports on reduced production would take farm policy in the wrong direction, deepening the federal role. The committee Republicans meanwhile think they are being set up, as they are. Nine of the 19 committee members, including five of the 10 Democrats, are up for reelection. If, as expected, the higher supports have to be dropped later in the budget process, the Democrats will still be able to say it was they who tried.

The same tired script has been allowed in the House, only there it has been bipartisan—and it seems to be over. The agriculture subcommittees voted for higher supports; now the full committee seems to be in the procss of rescinding them. Good for it. The Senators should step up to their responsibilities and do the same.

## PALESTINIAN CHILDREN

Mr. DOLE. Mr. President, there was another article in the Washington Post editorial called, "Save the Palestinian Children." I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 18, 1990]

SAVE THE PALESTINIAN CHILDREN

A Swedish child-advocacy organization called Save the Children, having conducted two years of interviews among Palestinians, reports that Israeli soldiers trying to quell the West Bank-Gaza uprising have inflicted on the children more than 150 deaths, thousands of beatings and gunfire wounds, and tens of thousands of other injuries. Israeli officials respond that the organization is biased, its perception of context skewed, its sources limited and its numbers exaggerated. But even if some part of this defense is true, you are still left with the deaths, the beatings, the wounds, the tear-gas and the rest of the carnage that has taken place since the intifada began in December 1987.

The question that arises from this latest stomach-turning account of Palestinian-Israeli confrontation is whether any halt to it is possible. The Israelis find some slackening of the intifada as their military and intelligence forces grind away to assert control. But struggle continues among a well-organized and increasingly radicalized Palestinian population seemingly little interested in diplomatic initiatives launched at the PLO leadership level. The evidence is that the West Bank popular resistance has settled down for the long haul in its home villages, schools and streets. The Israeli occupation has become routine too.

Meanwhile, both demonstrating Palestinians and defending Israelis continue to use tactics that put children at risk. The Palestinian organizers of the intifada are reluctant to weaken the central community-based character of their resistance by making the tactical changes that would help keep children out of harm's way. The Israeli

army similarly hestitates to yield its prerogatives as an occupation force, and it is often unable to enforce the military discipline that is intended to minimize casualties against a civilian population that itself has become an experienced practitioner of violence without guns.

The bottom line remains that Palestinian children are being shot and beaten by Israeli soldiers. Everyone knows that to this aspect of Israeli-Palestinian rivalry as to other aspects, there is no answer in the streets, only at the negotiating table. The Palestinians' leadership is ready for a process to begin. The Israelis still cannot bring themselves to form a government that would respond. This is finally what has to be done to save the Palestinian children.

Mr. DOLE. I hear a lot of pontificating about the tragedy in El Salvador and about the death of the Jesuit priests, and I condemn those deaths. I want justice just as much as anyone else. But I would ask the question, Is there a double standard? What about the children being killed in the intifada?

I do not see any of the liberals, who wring their hands about El Salvador, taking time on the Senate floor or the House floor or in newspaper interviews, to cry any tears for the over 150 children—children—who have been killed in the intifada. It seems to me as difficult as that situation is, the intifada, in some ways, is not much different than El Salvador.

If we are going to apply one standard to the El Salvador Government, then we ought to take a look at what we are doing with reference to the intifada. I have not heard many voices raised, not many people crying for the children, except their parents and relatives in that part of the world.

So to those who say we ought to reduce our aid, we ought to cut our aid in half in El Salvador, I ask the very fair question, is there a double standard?

## THE CAPITOL GUIDE SERVICE

Mr. DOLE. Mr. President, this week marks the celebration of National Tourism Week, and on this occasion it is a pleasure to recognize the efforts of the dedicated staff of the U.S. Capitol Guide Service.

Under the direction of Tom Nottingham, chief guide, the 33 full-time tour guides, assisted by 10 college students during the summer, bring this magnificent building to life for the approximately 1.5 million visitors who come to the Capitol annually.

Citizens of the United States and visitors from throughout the world who tour the U.S. Capitol learn of its history and hear colorful accounts of the people who have walked its halls for the past 190 years. They are told a story about a Union soldier during the Civil War who allegedly tried to chop up a Senate desk for firewood. They are shown the beautiful crystal chandelier, possibly one of the best bargains ever struck by Congress when it was purchased for $1,500, which is hanging in the well section of the original building.

Visitors have the chance to see Congress in action. By observing the Senate and the House of Representatives at work, they may come away with a better understanding of the process through which needs and ideas meet to form laws.

### THANKS TO THE COOPERATION OF MANY

Mr. Nottingham is ably assisted by Frances Rademaekers, deputy chief guide, Sharon Nevitt, assistant chief guide, and Ted Daniel, relief supervisor. A special thanks goes to Dee Ledlow, secretary for the Congressional Tour Office, for giving her personal attention to our constituents. Her competent assistance and spirit of cooperation are appreciated all year—and particularly during the busy summer months.

Mr. President, I invite my colleagues to join me in honoring the U.S. Capitol Guide Service and in expressing our thanks and deep appreciation during National Tourism Week.

Mr. President, I reserve the remainder of my time.

## SENATORIAL ELECTION CAMPAIGN ACT

The PRESIDING OFFICER. The Senate will now proceed to the consideration of S. 137, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 137) to amend the Federal Election Campaign Act of 1971 to provide for a voluntary system of spending limits and partial public financing of Senate general election campaigns, to limit contributions by multicandidate political committees, and for other purposes.

The Senate resumed consideration of the bill.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, time for debate has been reserved to the subject of campaign reform. I am pleased to use this opportunity to express briefly my views on this subject, a matter on which I have spoken before, and a matter which has occupied a great deal of the Senate's attention in the last several years.

I believe, Mr. President, that campaign reform is necessary. Campaign reform is necessary because spending has gotten out of hand. It is enormously costly to run election campaigns in the U.S. Congress, in the Senate and the House of Representatives, because there is widespread public concern about the termination of special interest influence as bills come through the Congress.

I believe that political action committees ought to be eliminated because of that concern. When you take a look, Mr. President, at what political action committees do, I do not believe they buy votes in the Senate or in the House of Representatives. A maximum campaign contribution of $10,000 in my last Senate campaign accounted for .0012 of the total contributions made to my campaign. While it is not insignificant, it is not a dominant factor in the fundraising apparatus.

But there has grown a public concern that political action committees have extra influence beyond what they ought to have in our system. That is a deeply ingrained view. I believe that the perception is so strong and has a tendency to undermine public confidence in the Congress of the United States that we ought to take a stand once and for all and eliminate political action committees categorically—just have them gone.

The issue of spending limits is a very complicated one. I believe that it is necessary to address that subject with a constitutional amendment because as long as the decision in Buckley versus Valeo stands that any individual may spend as much of his or her money as he or she chooses in an election campaign, there is no realistic, effective way to legislate campaign limits.

The tack which has been undertaken is to condition public spending on an agreement by a candidate that the candidate will abide, on a voluntary basis, by a spending limit. But that is not effective, Mr. President. If any candidate chooses to come into the field and declines to abide by such a voluntary spending limit, then that candidate may exercise his or her constitutional right to spend as much money as he or she may choose.

So the only effective way to deal with that issue is by a constitutional amendment. I have joined Senator HOLLINGS in a proposal for such a constitutional amendment, both in the 100th Congress and now in the 101st Congress, which would say that, as to campaign financing, the Congress of the United States, and State legislatures for that matter, would have the authority to establish spending limits. It is with reluctance that I personally moved toward a constitutional amendment in the first amendment area, but that is the only way to deal with that issue directly.

My own legal judgment is that Buckley versus Valeo was incorrectly decided, but once the Supreme Court of the United States speaks on a case, that is

that. We have razorthin margins; under the nine Justices, five may have one opinion, four another, but when five have spoken, that is the law of the land.

I recall the Buckley decision with special impact because I was a candidate for the U.S. Senate when Buckley versus Valeo was handed down. That decision came down in January 1975; January 29, I believe. I had declared my candidacy a few months earlier for the U.S. Senate in the context of the election law of 1974, which limited individual expenditures, which prescribed the amount depending on the population of the State. With a State the size of Pennsylvania, an individual was permitted to spend $35,000.

I had been in private practice for a relatively short time after being district attorney of Philadelphia. That is about as much money as I had. I decided I would get into the race.

Then in the middle of an April primary in Pennsylvania—I declared in November 1975—in the middle of the campaign the Supreme Court of the United States handed down Buckley versus Valeo that said that aspect of the limitation on what a candidate could spend was unconstitutional.

It upheld the $1,000 limit on other individual contributions so that my brother, who had substantially more money than I did, was limited to $1,000 for the primary campaign. I did not get past the primary.

I felt serious enough about that case to file a petition for leave to intervene after the judgment. I am always reluctant to say what I did some 15 years ago, but I have a pretty clear recollection of having done that although I have not reviewed the legal papers lately. My petition for leave to intervene was turned down. That was that.

I now have the pleasure of serving with my opponent in that campaign. Senator HEINZ and I were contestants there, and now we serve together. But I had gone inito the decision of the Buckley case in some great detail. I believe if we are to address the issue of spending limits, we are going to have to do so in the context of the constitutional amendment. I have pressed that amendment on the Constitutional Law Subcommittee of the Judiciary Committee, on which I serve. The distinguished Presiding Officer and I serve on the Judiciary Committee together.

Mr. President, I am strongly opposed to public financing. I do not believe, given the very heavy deficits which we have in this country today, that it is an appropriate expenditure of public money to finance congressional races, Senate races and House races. S. 2, which was introduced in the 100th Congress, had a schedule which would have called for the expenditure of public moneys of $3.8 million for each candidate, $7.6 million for a Senate race for the State of Pennsylvania, and I think that kind of funding is unwarranted.

I am informed that the checkoff on the Federal tax returns is down to 20 percent now.

People want to make a voluntary contribution for the taxes they have to pay anyway, so it is not an extra dollar, it is a dollar which is being paid, and it had been considerably higher. So it is not a matter of indifference, it is a matter of a public concern of not wanting to finance Presidential campaigns. But I do not believe it wise, Mr. President, to spend the public's money on the election of Members of the House or the Senate. So I am opposed to the use of that as a coercive mechanism to achieve consent by the candidates.

As I say, the consent is really meaningless in any event as long as anyone can come in and exercise their constitutional right under Buckley versus Valeo to spend as much of his or her money as he or she may choose.

The issue of soft money Mr. President, I think is a very, very important issue because there are wide varieties of ways of making contributions to a campaign without dollars: In-kind services, the use of mail, the use of office space, the use of telephones, the use of paid personnel who will volunteer for a campaign under circumstances where there is very direct calculation and the soft money which is directed to someone's campaign is paid for in hard dollars. So that as we take a look at campaign reform, it seems to me that we have to address this issue of soft money in a head-on, direct way and get it out of the system.

Mr. President, I believe that there are material improvements which must be made in the campaign laws. I am pleased to see this matter on our agenda. There has been very considerable thought and attention given to this issue on both sides of the aisle. This is one issue where the 100 U.S. Senators all regrettably have considerable experience in this field.

It would be much better if we did not have so much experience in campaign financing. But campaigns are enormously expensive to run. They have gotten more expensive to run. They have become more expensive not only because of inflation but because of negative campaigning. Today, someone can conjure up a 30-second commercial and need not be too concerned with the fact they can have a 30-minute commercial, too, but nobody would want it. In a 30-second commercial, people have to watch because it is squeezed between something else they want to watch.

I recall, in my first campaign in 1965, where we had a 30-minute show. And it was on at 7:30 on a Philadelphia TV station and it cost $1,500. And a 30-second commercial cost $3,000. I wondered why you could buy 30 minutes at 7 o'clock—this, again, is my recollection; it has been a long time ago. There is always some hesitancy to cite facts from bygone days because someone will look at the record to see that everything we say is exactly right. But my recollection is it was $1,500 for a 30-minute commercial.

I see my distinguished colleague, Senator MCCONNELL, smiling at this.

Then I found out that it was so inexpensive because nobody watched it. Because if you are on for 30 minutes and they see ARLEN SPECTER on campaigning, who cares, go to the next channel. But when you grab 30 seconds in between two favorite shows—I would cite some, except I do not know any—it is a very expensive proposition.

But it is enormously costly. Then the 30-second negative commercial comes on. It takes a quantum of television time to go back over the record. And there is no way—having cast 3,500 votes, many of the votes are subject to gross distortion.

I remember a vote on an important good Government issue which came up in 1984 on the continuing resolution. An entire bill was added, I think it was the Superfund bill, on the 1984 continuing resolution. And if that bill had not been tabled, we never would have passed a budget. We would have just tied up the Congress and the country interminably. It was very hard to find 51 Senators who would vote to table that Superfund bill because it was a matter of vital necessity.

Now when you try to explain why you vote against Superfund on a continuing resolution, on a motion to table, on the Government being tied up, it takes a lot of explaining.

Mr. MCCONNELL. Will the Senator from Pennsylvania yield?

Mr. SPECTER. Yes.

Mr. MCCONNELL. The Senator from Pennsylvania is right on the mark when he talks about the airwaves and the importance of that in the modern competitive campaign.

I have often said that I do not favor piecemeal campaign finance reform, that it is a better to do it on a comprehensive basis. But if somebody said there is just one thing we are going to let Congress do this year to improve the system, it would be a meaningful, significant, reduction in the broadcast discount rate to allow candidates to purchase time to reach voters. And so when the Senator talks about the cost of television, he is certainly hitting on what I think is one of the most, if not the most, significant part of this overall discussion.

Mr. SPECTER. I am delighted to yield to my distinguished colleague from Kentucky for that comment. When a Senator takes the floor and makes a statement in this Chamber, it is like a sound chamber where nobody else is present. We have our captive

audience of the staff here, the reporter. It is refreshing to see some other Senator come to the floor so there could be a dialog and have some human qualities about our discussion here. We speak in the sound chamber—and there are a few people in the galleries—wondering who is watching on C-SPAN II, or if anybody will read what appears in the CONGRESSIONAL RECORD.

But to deal with the content of what Senator MCCONNELL has had to say, I have some concern, I must say, about compelling TV stations to take a lesser rate. And I have a concern because the TV channels are private property. They have established the rates. And I wonder about the propriety of the Congress—and we do have enormous power. We can do practically anything we choose to do subject only to the constitutional limitation and there may be a violation of property, and the 14th amendment which prohibits, the due process clause—the 5th amendment, pardon me; the 14th applies to the States, the 5th amendment applies to the United States, prohibiting taking property without due process of law. Stations do have an obligation to give the lowest rates. And I have had some considerable problem, in my own experience, in having those rates apply because it is impossible to figure out what is lowest rate, when it is applied, when it is preemptable, who had it first, who came in second, and who is on third.

In the middle of a campaign you cannot begin to litigate with a TV station over whether you are getting an appropriate rate or whether your opponent is getting an appropriate rate. But even if we do reduce the rates in television and if we cut down the costs, it is still going to be enormously expensive. We are still going to have to buy a lot of it, and it is a very, very expensive proposition.

There are 100 different ways the Senators got here. My own route was to run in three tough primaries in Pennsylvania, a State of 12 million people, to establish a record and establish recognition as district attorney of the city of Philadelphia. That media market was 38 percent of the State. The district attorney gets a lot more attention in the Philadelphia media than a U.S. Senator does, especially a Republican district attorney in a Democratic city where there is a lot of crime and corruption. It is like shooting fish in a barrel. There is a lot of potential. But for the balance of the State it is not an easy matter to become known. It takes a lot of speeches in a lot of cities and a lot of Rotary Clubs.

Then we have television, which is a very, very expensive item. As long as those of us here have 3,500 votes on record, and by 1992 perhaps close to 5,000 votes on record, maybe 4,200 or 4,300, it is necessary to make a lot of comments and perhaps to do some explaining. We all know that when we have to start explaining we are already in trouble. If we want to do it on television it is a very expensive operation.

So we all in this body are experts at fundraising. It would be very good if we could find a way to provide some rationality to the system so we do not have to spend so much time raising money. I believe my distinguished colleague from Kentucky has a difference with this Senator on the desirability of a constitutional amendment to provide the basis to change Buckley versus Valeo, and provide for limits.

My colleague has been on the floor now for about 10 minutes. I will not take up further time because Senator MCCONNELL has been a leader in the field, and I am sure when he addresses the Chair today he will have something new to say. That will be quite a challenge because he has made many, many, many speeches on this subject.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Oklahoma [Mr. NICKLES].

Mr. NICKLES. Mr. President, I congratulate my friend and colleague from Kentucky for the outstanding work he has done on the campaign reform bill. I think it is important to delineate the major differences between the so-called Republican bill and the Democratic bill.

The Republican bill is very significant campaign reform. The Republican bill limits outside special interest money. It bans PAC's. The Democratic bill does not do that. It says it bans PAC's from contributing to individuals, but it does not ban PAC's So PAC's can contribute to national parties, they can contribute to State parties, and then the State parties and/or the national parties can give the money to candidates.

So the Democrats' bill is a laundering bill. It launders the money, it hides the money. People really do not know where it comes from. That is worse than the present situation. At least in the present situation when PAC's contribute to individuals that money is readily identified. It is reported. That would not be the case under the so-called Democrat bill.

The Republican bill, on the other hand, bans PAC's. Period. PAC's cannot give to individuals. They cannot give to party organizations. They cannot give to any of these groups. So I think there is a significant difference in the PAC situation. Also, if it is determined to be unconstitutional to ban PAC's, under the Republican provision, we reduce PAC's from $5,000 to $1,000, the same amounts individuals can give, a significant reduction of money that PAC's or special interests can give. Again, that is in the Republican provision. It is not in the Democrats' provision.

So I think it is a very significant difference between the bills.

What else do we have? Well, the Republicans limit what money can be raised out of State by saying that out of State contributors can only give $500 instead of $1,000. So we would significantly reduce the amount of input people would have by having special interest fundraisers outside their State. That is an advantage incumbents have that challengers many times do not. So that is a big change. Republicans take big steps for eliminating or limiting soft money. Unfortunately the Democrats do not do that. We limit soft money or eliminate soft money in corporations, in unions, the Democrats do not do it. They will limit party soft money. I find that really not to make a lot of sense.

Third, and possibly last, the Democrats have public financing of campaigns. Ninety percent of their money for a general election would be paid for by the taxpayers. I find that to be outrageous. In my State of Oklahoma, if a candidate is running, if they raise $110,000 they get $1 million from Uncle Sam to run for the general election. I think that is outrageous. I do not think taxpayers across the country are saying we want to pay for general elections, we want to pay for Senate races, we want to pay for House races. I do not think they are saying that. As a matter of fact, I think they would be outraged if they knew a person who raises $110,000 would qualify for $1 million of public financing. I think that is an outrage.

The Democrats also have a bill that would allow candidates to be able to mail at one-fourth the cost to normal taxpayers. That is another outrage. Mail costs are enormous. Why should the taxpayers of this country subsidize the mail costs of campaigns? In the Republican package we ban unsolicited mass mail costs for incumbents during campaign years. I think that is a very significant reform.

The Senate has already made some reforms in mass mail costs. The House has not gone along. As a matter of fact now we find the House is going to exceed its budget by almost double. The Senate is going to be within its budget on mail costs. But we have a very good provision, a real provision, one that is significant reform, in that we ban the use of franked, unsolicited mass mail by incumbents—Senators and House Members—in an election year. That is not in the Democrats' proposal.

So there are significant differences between the Democrats' and the Republicans' proposal. I happen to think the Republican proposal is a very good one. It may be improved.

I see my colleague from Oklahoma. I am hopeful maybe we can work out some differences and we can come up with a bipartisan bill, one which will have significant, real reform for the system; that it will work better; that it will reduce special interests; that it will reduce the advantage that incumbents have through the use of the frank.

Mr. President, I think that can happen. I am not necessarily so optimistic, but I look forward to the negotiations. Hopefully, they will be fruitful negotiations and we will see a workable, bipartisan campaign reform bill passed this year.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BURNS. I thank the Chair.

(The remarks of Mr. BURNS and Mr. BOREN pertaining to the introduction of S. 2653 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. McCONNELL. Mr. President, we resume the floor discussion of campaign finance reform this morning. This past week the majority leader and the Republican leader have appointed the negotiating team. We will be looking forward to meeting in the near future to see if we can work out our differences. I do think it is important to continue to discuss the bill. I am glad the leader has scheduled some floor time for us to consider various aspects of this enormously complicated problem which we are hoping to legislate this year.

It is certainly the view of the Senator from Kentucky as the lead negotiator on this side that it would be far better to have a bill than to not have a bill. I do not think there are very many people in this body who do not think we ought to change the current system. It certainly has its failings.

I do think, however, it is important for us as lawmakers not to proceed to pass legislation that is blatantly unconstitutional. It is the view of the Senator from Kentucky that S. 137, and the substitute thereto, which has been suggested on the other side of the aisle, clearly does not pass constitutional muster.

Mr. President, I would like to confine my remarks, at least at the outset this morning, to the issue of the constitutionality of S. 137 and the proposed substitute which has been suggested by the other side.

Mr. President, under S. 137 and similiar proposals, senatorial candidates who agree to accept expenditure limits qualify for public funding, reduced-rate television and radio time, and special mailing rates. A senatorial candidate who does not accept the spending limits receives no public money and is not eligible for reduced-rate broadcasting time and mailing privileges. His troubles, however, do not end there.

Rather, S. 137, and similiar proposals, would give increased Federal grant money to participating candidates when expenditures made by a nonparticipating opponent exceed certain limits. Thus, if a nonparticipating senatorial candidate spends even $1 over the spending limit, S. 137 would give a participating major party opponent an additional Federal grant in an amount equal to two-thirds of the general election spending limit, an amount up to $3,666,667. The participating candidate would be free to spend this additional grant to defray expenditures in the general election without regard to the general election spending limits.

If the nonparticipating senatorial candidate presses on and goes more than one-third over the spending limit, the bill would provide an additional grant equal to one-third of the spending limit, up to $1,833,333 under S. 137. Furthermore, once an opposing candidate has gone more than one-third over the spending limit, the spending limits applicable to the participating candidate are lifted altogether. In addition, S. 137 provides that participating candidates would receive an additional grant, not subject to the aggregate spending limits, in an amount equal to the total amount of independent expenditures over $10,000 made in opposition to that candidate or on behalf of his opponent.

So, Mr. President, as a practical matter, S. 137 would force nonparticipating challengers to choose between observing the spending limits applicable to participants or facing a participating incumbent who has as much as $5,500,000—possibly even more—in Federal funds with no aggregate expenditure limitation. The bill, and others like it, thus attaches a severe penalty to the decision not to abide by Federal spending limits.

Let me just for a moment contrast that to the Presidential system, which I certainly do not support and do not think it has been good for the country. But nevertheless, we have had one Presidential candidate say over the years, "I choose not to accept the public subsidy." That candidate was John Connally, who ran back in 1980. When John Connally decided not to accept Federal money, nothing happened to him and nothing happened to any of his opponents. He was not punished, and they were not rewarded. So there was no punishment, no penalty for exercising his first amendment right to go out and participate in the process without the encumbrance of either spending limits or public finance; totally contrary to the bill that we have suggested by the other side.

This is clearly unconstitutional. The Supreme Court held in Buckley versus Valeo, that the first amendment forbids Congress from directly imposing spending limits. Political spending is pure political speech and therefore receives the strongest first-amendment protection. Under Buckley, Congress can, to a limited extent, regulate political contributions, but it cannot impose limits on spending. Even contributions can be limited only in order to avoid corruption or the appearance of corruption.

Proposals like S. 137 attach a penalty to the refusal to limit campaign spending. In this respect they are exactly like a spending limit that is enforced through criminal prosecution. The only difference is that the penalty takes the form, not of a fine, but of one-sided Federal assistance to the candidate's opponent.

It is difficult to imagine any constitutionally acceptable regulation of political speech. The interest in eliminating corruption remains the only governmental interest that the Supreme Court has recognized as sufficiently compelling to justify burdens on political speech. Expenditure limits, however, have nothing to do with corruption: a candidate may be corrupted, or may appear to be corrupted, by the source of his funds. Once money has been received, however, spending it is not corrupting.

The interest that actually underlies proposals such as S. 137 is that of equalizing political speech between candidates. That interest, however, is affirmatively forbidden by the Constitution: under the first amendment, Congress may not adopt policies designed to ensure that the contending sides in an election have equal resources. The Supreme Court said in Buckley versus Valeo that a governmental policy of limiting the political speech of some Americans "in order to enhance the relative voice of others is wholly foreign to the first amendment."

As the Court noted in Buckley, attempts to equalize political speech are especially insidious because equalization of the amount spent may not in fact equalize electoral opportunities; on the contrary, it almost certainly aids incumbents. The Court recognized that, because incumbents generally are well known going into an election, equalization will harm a challenger who lacks substantial name recognition or exposure of his views before the start of the campaign.

Mr. President, protecting incumbents is not, of course, an acceptable reason for abridging political speech.

Congress may not penalize candidates who refuse to abide by expenditure limits, Coercive, so-called voluntary schemes such as S. 137 are quite different from the system of genuinely voluntary partial public funding used in Presidential elections. Under that system, a candidate's decision whether to accept spending limits is affected

only by the inducement of public funding. If he declines to limit spending, his only cost consists in forgoing public support. The Supreme Court has made clear that the Government's offering an inducement in order to influence consitutionally protected speech is assessed under a more lenient standard than the Government's imposition of a penalty on the exercise of such choices. The imposition of a penalty will usually be plainly unconstitutional.

These proposals also penalize noncandidates who wish to make independent expenditures. Such expenditures are pure political speech and enjoy the strongest first amendment protection. It is highly doubtful whether the Government may seek to deter them by imposing the cost of additional public support for the speaker's opponent. Indeed, because equalization of resources is not a permissible governmental interest, payments designed to enable a candidate to respond to independent expenditures are probably unconstitutional for that reason alone, without regard to their inhibiting effect on independent spending.

This aspect of the spending plan may also violate the doctrine of cases such as Miami Herald Publishing Company versus Tornillo, under which the Government may not compel a speaker to subsidize the speech of his opponent. In Tornillo, the court struck down a Florida law which required newspapers to offer free space for a reply by candidates whom the newspaper had ciriticized. Under these proposals, independent spenders and contributors may trigger additional Government support for their opponents by speaking themselves. This content-based rule deters free speech and thereby raises very serious questions under the first amendment.

Thus, Mr. President, the spending limitations proposed by S. 137 would present such a host of constitutional problems that it is more suitable for an issue spotter on a law school exam than for serious consideration by this body. Moreover, such spending limitations do nothing to correct the real problems with our system of campaign finance: the power of special interest money provided by PAC's, and nonparty soft money.

Mr. President, I want to continue my remarks with some observations about soft money. There has been a lot of discussion over the last couple of years about what is now being called sewer money, and I think it important that we begin to define that and to have some facts in the RECORD upon which Senators can begin to focus as we lead toward hopefully passing new campaign finance legislation.

I want to focus for the balance of my remarks this morning on the particularly corrupting form of sewer money gushing beneath the surface of our electoral system. This sewer money poses an extreme threat to health of our democracy.

There are no limits on this sewer money. The polluters are not required to disclose to the public how much of this sewer money they are dumping into the electoral system.

I am referring, of course, to big labor's massive, unreported soft money expenditures in Federal elections. This money comes from compulsory union dues and it is spent over the objections of many union members who do not like seeing their hard-earned dollars turned into sewer money.

The scope of this sewer money is hard to pinpoint because the reporting and disclosure requirements are virtually nonexistent.

The National Right to Work Committee estimates that unions collect $5 billion annually in union dues. The U.S. Department of Labor says unions covered by Federal reporting requirements collected $3.3 billion in annual dues. Precisely how much of these billions in union dues are pouring into Federal elections is, frankly, unclear, but reports compiled by the press and a host of campaign finance experts indicate that it is at least in the tens of millions of dollars per election cycle.

This compulsory union soft money, unlike union PAC contributions, does not go directly to candidates in the form of cash contributions. Rather, this soft money comes from union treasury funds and pays for indirect, but extremely valuable assistance to political parties and campaigns.

The most obvious way in which this sewer money taints Federal elections is through contributions made directly from union treasury funds to Federal party building accounts. This type of sewer money has received a lot of attention from the press.

Brooks Jackson, in his book "Honest Graft," described how union soft money subsidized one such party-building activity of the Democratic Congressional Campaign Committee in the 1986 election cycle:

> Coelho went to the annual winter meeting of the AFL-CIO in Bal Harbour, Florida. He met with the presidents of one union after another, over breakfast, lunch, and dinner. He asked each one to pledge $100,000 to his committee during the year.
>
> The Capital Trust project represented only part of the soft money that fueled Coelho's campaign committee, but it was especially important. Indirectly, the funds subsidized the campaigns of Democratic candidates who used the party's television studio.

Brooks listed several major contributions to this party account, including $25,000 from the Carpenters Union, $25,000 from the Steelworkers Union, and $50,000 from the International Ladies Garment Workers Union.

Regulating or disclosing these direct, external contributions of union soft money has been widely discussed by Senators. However, these huge sums of sewer money pale in comparison to what is spent internally by unions on behalf of Federal candidates. These internal expenditures, comprising the vast bulk of union soft money, seem to be the least understood by many Members of Congress. There are three major categories of internal union sewer money now allowed by loopholes in the Federal Election Campaign Act.

First, a union can spend its treasury funds to pay the overhead cost of operating its political action committee. These costs include staff salaries, rent, utilities, computer expenses, postage, and mailing list maintenance. There is no limit on PAC subsidization, and no reporting and disclosure.

According to Federal Election Commission reports, labor PAC's gave nearly $36 million to Federal candidates during the last election cycle. Congressional Quarterly says that experts estimate that a company or a union spends a minimum of 50 cents for every $1 the PAC raises in contributions. This figure gives us an estimated $18 million in compulsory union soft money that subsidizes the big labor PAC's.

A second category of internal compulsory union sewer money is comprised of union communications to union members and their families. These communications can expressly advocate the election or defeat of Federal candidates. These expenditures come in the form of mailings, newsletters, phone banks, political surveys, and such. All of these epxenditures repeatedly drive home to union members and their families negative or positive messages on targeted Federal candidates.

This is the only kind of compulsory union soft money that must be disclosed to the Federal Election Commission. However, huge gaps in the reporting requirements prevent us from getting a clear picture of the magnitude of these internal advocacy messages

A National Journal article listed some of the gaps in reporting requirements on internal union advocacy mailings:

> Only communications in which more than half of the message is devoted to expressly advocating the election or defeat of a particular candidate must be reported.

So a union can slap an endorsement on the front cover of a four-page newsletter, list coming events on the next three pages and report nothing to the FEC. Nor must it report nonpartisan voter registration or get-out-the-vote efforts. Any union organization, such as a local, that spends less than $2,000 in an election does not have to report any of its spending to the FEC. And

the investments that unions make in the infrastructure needed for these communications—computer capacity, telephones, staff—need not be reported either.

Congressional Quarterly said that the $4 million in internal union communications reported to the FEC in the 1988 election cycle is "a figure that does not begin to reflect labor's value to the Democratic Party."

The third type of internal union sewer money allowed by the FECA is any money spent for supposedly nonpartisan voter education, registration, and turnout programs targeting union members and their families.

Paul Jensen, the labor liaison between the AFL-CIO and the Dukakis Presidential campaign, estimates that the value of the union's supposedly non-partisan get-out-the-vote drive to Dukakis was $20 million. Jensen told Congressional Quarterly that this money never shows up on FEC reports because a good program targets mostly Democratic votes without triggering the reporting requirements that cover internal union communications expressly advocating the election or defeat of Federal candidates.

Here are some examples of supposedly nonpartisan union phone bank operations:

The October 11, 1988, Washington Post reports:

For organized labor, the past five weeks have been a warm up. * * * Armed with nearly $40 million in cash, an army of volunteers * * * labor is moving into the critical get-out-the-vote phase of its campaign to elect Democratic Presidential nominee Michael Dukakis. Union officials said they have assembled the most sophisticated election operation in memory. * * * The CWA * * * has ordered everyone on its 200-member field staff not actively involved in contract negotiations to spend full time on the election.

And from the September 20, 1988, Wall Street Journal:

The AFL-CIO plasters its newspapers with the Dukakis message and follows with videos and millions of flyers. It expects to field 500,000 volunteers. The American Federation of Teachers sends 16-minute videos to 100 locals.

The United Auto Workers taps union publications and the mails. The Communications Workers turns to phone banks to get out Democratic votes.

From a Los Angeles Times report on the 1984 elections we learn that the volunteers referred to in these reports are often paid with compulsory dues sewer money:

A Mondale campaign official said:

The AFL-CIO in Ohio has set up 80 telephone banks with a total of 400 telephones that will be used to call every union member in the state several times before the November 6 election. At the state's biggest phone bank in Cleveland, retired and unemployed unionists are paid $4 an hour to make a total of 10,000 calls a day "They run it like a military camp up there—you have to raise your hand if you want to go get a Coke."

The results of these supposedly nonpartisan registration and get-out-the-vote drives are predictable.

Union members targeted for these drives are constantly barraged with internal union communications prior to the election.

According to Congressional Quarterly:

They will hear local union officials promote certain candidates. They will be polled about their intentions. The undecided will get literature. Many will go to the polls with union slate cards in hand.

(Mr. KERREY assumed the chair.)

Mr. McCONNELL. The problem, then, with union sewer money does not lie solely in the massive contributions made directly to Democratic Party accounts out of union treasuries. Nor is it fully addressed by an examination of the tens of millions of dollars in special interest money that goes directly to candidates from Big Labor political action committees.

To fully address the corrupting influence of this union sewer money, we must take into account the massive internal union expenditures that pay for PAC overhead, internal membership communications advocating the election or defeat of candidates, and for supposedly nonpartisan get-out-the-vote drives that have a decidedly partisan outcome.

Again, we do not know how much sewer money is involved here. The National Right to Work Committee estimates that the total value of internal union soft money is $300 million per election cycle. It could be higher. Herb Alexander, director of the Citizens Research Center, says unions spent at least $45 million on these activities in the 1988 election cycle.

The size of these expenditures is more than enough reason for the Senate to enact tougher regulation and more meaningful disclosure of this sewer money.

But the need for reform is made even more urgent by the coercive nature of these contributions, and the fundamental trampling of union members' first amendment rights that is going on in unions across the country.

I want to stress that this Senator is determined to do everything he can to rid our system of all sewer money.

However, Big Labor soft money has an even greater stigma attached to it. This is the only money collected for Federal elections over the specific and vocal objections of many of the people forced to contribute it.

Only labor unions—and the politicians who bask in Big Labor's largesse—benefit from State and Federal laws designed to automatically—with no accountability—pump money into the union's treasury.

I am sure that every other political entity in this country would like to be relieved of the burden of vigorously searching at great cost, for voluntary contributions.

The National Labor Relations Act, the Railway Labor Act and collective bargaining laws for public employees in 20 States contain provisions allowing union dues to be required as a condition of employment.

As I stated earlier, billions of dollars in annual dues are collected under this system of compulsory unionism.

This money pours into Federal elections through the three loopholes in the FECA that allow union treasury funds to be spent in limitless and undisclosed amounts of PAC subsidization, membership communications, and get-out-the-vote drives. These are the three types of internal union sewer money that I have described.

Corporations have the same three loopholes as do unions for the use of these treasury funds. However, there is an important distinction to be made between corporate treasury funds and the distinctly coercive nature of union treasury funds.

A few years ago, the Machinists Union sued the FEC to stop expenditures of corporate treasury funds in connection with Federal elections. The union argued that the use of corporate treasury funds to support a PAC's administrative expenses violates the first amendment rights of dissenting shareholders. The U.S. Court of Appeals for the District of Columbia Circuit ruled that the machinists "reach too far in equating the situation of a worker who is compelled to join a union, or to pay union dues on pain of losing his employment, with that of a shareholder in a publicly held company whose livelihood does not depend on retaining stock in a corporation involved in political activity he opposes and whose investment is tenuously linked to the establishment and operation of the corporation's PAC." While a corporation's use of soft money may be just as irresponsible and odious to its shareholders as the union's expenditures are to dissenting members, shareholders at least are free to invest their money elsewhere. They can invest in some other company.

Compulsory union members do not have this luxury. They must pay the dues that support political causes they oppose or be fired. Mr. President, losing your livelihood because of your political beliefs is too steep a price to pay for freedom, especially in a nation like ours that prides itself in protecting the freedoms of association and political expression.

While the Members of this body may have widely divergent views on taxpayers financing of elections, spending limits, broadcast rates and other campaign reform issues, I believe there is one basic issue on which we all can agree:

No one should be required to support political causes to which one is opposed. An employee should not have to contribute to the company PAC in order to keep his or her job. Nor should an employer be able to deduct a portion of the worker's salary to support political candidates of the employer's own choosing. That would be a fundamental and unconstitutional deprivation of the worker's political rights.

Similarly, a worker should not be forced to subsidize the political activities of a union if he or she objects for whatever reason. This principle of workplace freedom was embraced by the Supreme Court in the 1988 case, Communications Workers of America versus Beck. Harry Beck, a union member, did not like the fact that an untold portion of his compulsory dues were being used to pay for the union's extensive political operations. He brought suit and the Supreme Court agreed that he had a right to a refund from the union for the portion of his dues being used for political purposes.

Harry Beck and a relative handful of workers have gotten their money back—or at least some of it. But the union leadership has resisted all efforts to extend the right of political freedom in the workplace to all workers. It has stonewalled on disclosure of how much is actually spent on political activities, and it continues to refuse to inform the rank and file about the political rights to which they are entitled by law. Furthermore, the legal system requires underfinanced workers to battle an army of union attorneys through long and costly litigation. And, because most of the compulsory union dues are spent on unreported and undisclosed in-kind contributions to political candidates, the abuse of the worker's constitutional rights is often hard to track. Thus, despite the Supreme Court's clear pronouncement on this issue, workers continue to be deprived of political rights because of an intransigent and insensitive leadership.

There are many examples of this abuse of union members' political rights.

Unions spent millions of soft dollars opposing George Bush, despite the fact that large blocks of union members favored the President. One poll showed that 33 percent of union members had their vote for the President canceled by the expenditure of their forced dues to pay for soft money expenditures on behalf of Michael Dukakis.

Big Labor PAC contributions, subsidized by compulsory union sewer money, also do not always reflect the views of union members. Surveys show that 30 percent of NEA members are Republicans, yet NEA officials gave PAC money to Democrats by a ratio of 16 to 1.

According to columnist Warren Brooks, polls show that union members consistently support a balanced budget amendment by a margin of 60 to 70 percent. However, Big Labor PAC giving went to the National Taxpayers Union's 20 worst-rated Congressmen by a ratio of 70 to 1 over the National Taxpayers Union's 20 best-rated Congressmen.

And despite the legal hurdles and institutional intransigence by unions that face dissenting members, thousands of workers are suing in court to get their money back. The National Right to Work Legal Defense Foundation is litigating in 350 such cases across the country. Clearly, Mr. President, we have a serious problem in our Federal electoral system with compulsory union sewer money being spent in contradiction to the beliefs of forced dues payers.

No campaign reform proposals can be complete without addressing this outrageous abuse of union members' compulsory dues. In fact, ignoring the compulsory dues problem, while placing restrictions on other types of money in Federal elections, will reward the perpetrators of this corruption by enhancing the impact of their sewer money relative to all other participants in the Federal election system.

For this reason, the Republican campaign reform initiative contains legislation that would put a condition on the use of union membership dues for political activities such as get-out-the-vote drives, political communications to members, and the expenses of PAC fundraising.

If a union wanted to dip into the dues treasury for these purposes, it would have to inform its members of their constitutional right not to pay for such political activities. Workers would have the right to know how much of their dues were being spent for political activities, and they would have a right to a partial refund of those dues if they objected to the union's political use of their money.

Workers presently cannot be compelled to fund the political activities of their employers; they should not be forced to fund the political activities of their union if they choose not to do so. The Republican campaign reform initiative gives workers the right to decide how their union dues are spent, at least when it comes to political activity. We are not interfering here with the current labor laws authorizing unions to demand payment to cover the direct costs of collective bargaining.

The desirability of these coerced payments for collective bargaining would be the proper subject of a debate on labor laws.

This is a debate on whether or not our election laws sufficiently guard against corruption of individual liberties. We are specifically dealing with that portion of compulsory dues being spent for political candidates and causes opposed by union members. The workers must have some say in where that money goes.

The right of free speech protected by the first amendment of our Constitution assures not only the right to say whatever one wishes, but also the right to refuse to speak if one disagrees with the content of the required message. That was the principle underlying the Supreme Court's decision in Beck, and that is the principle which I ask my colleagues to uphold in supporting the Republican campaign reform initiative. We in Congress cannot rest as long as there are Americans who are forced to support political views that are not their own. That is political slavery, and we should not tolerate it anywhere in the world, and certainly not here.

Mr. President, I ask unanimous consent that several news articles referred to in my remarks be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Congressional Quarterly, Mar. 31, 1990]

REPUBLICANS SEEK TO REDUCE LABOR'S CLOUT AT THE POLLS

(By Chuck Alston)

Who is Harry Beck? The Portland, Ore., telephone company technician is a bit player in what is fast becoming a central drama in the partisan struggle over campaign-finance laws: the role Big Labor plays on Election Day.

Beck in 1988 won a 12-year legal struggle to force the Communications Workers of America to rebate dues it spent on activities, including electioneering, unrelated to bargaining labor contracts. His cause is now embraced within a broader GOP effort to restrict union involvement in federal elections.

Republicans want to write election laws that would make it easier for other workers to follow Beck. "We see this as a threshold issue: You can't have real campaign-finance reform unless you protect the rights of the working man," says Rep. Tom DeLay, R-Texas, sponsor of a House measure (HR 2589) he calls the "Worker's Political Rights Act."

Writing the Supreme Court's 1988 Beck decision and enforcement provisions into federal statutes would cost unions a small part of the more than $3 billion they collect annually in dues. A second GOP thrust would hit far harder. Senate Republicans plan to introduce legislation soon that would restrict unions' spending of treasury funds to register their members to vote and then turn them out on Election Day—activities long protected by federal law that are worth millions to Democrats.

These labor issues, certain to surface when the Senate considers campaign-finance legislation this spring, are at the core of the debate over what has become known as "soft money"—money raised and spent for elections that is not reported to the Federal Election Commission.

Federal law permits corporations, trade associations and unions to spend treasury funds freely, without disclosure, for nonpartisan voter education, registration and turnout programs. They can also advocate specific candidates to their members, stockholders or employees, although they have to disclose much of this spending.

"Republicans are absolutely convinced that this money, all raised off the books, does them in, and they feel it's one reason they have to raise more money on the books," says Larry Sabato, a University of Virginia political scientist who recently addressed Senate Republicans on campaign finance issues.

In the 1988 presidential primaries and general election, unions spent at least $45 million on these activities, $30 million of it in the general election and all but $5 million on activities that favored Democrats, according to Herbert Alexander, a University of Southern California political scientist who directs the Citizens' Research Foundation, an organization that studies election finances. "There is undoubtedly more money there," Alexander says.

Republicans from President Bush down have called for wider disclosure of unions' soft money since the 1988 election. Now they have stepped up the rhetoric.

"We want to regulate and restrict it, not just disclose it," says Sen. Mitch McConnell, R-Ky., head of a Senate Republican task force on campaign finance. "It's undisclosed and unlimited, and the rumors are it's out there in huge amounts, but nobody can verify that."

His Democratic counterpart, David L. Boren of Oklahoma, has indicated that Democrats will negotiate disclosure but no more.

Little wonder. Corporations and trade associations—more likely to split their efforts evenly among Democrats and Republicans—have never spent soft money to the extent that unions have.

And with the exception of the Teamsters union, most labor organizations back Democrats. What's more, unions are vigorously resisting the GOP onslaught.

"It's just a way of crippling unions," says George Gould, assistant to the president for legislative and political affairs of the National Association of Letter Carriers. "We're adversaries in the system, and if you cripple our ability to communicate with our people, you cripple our ability to play the game."

BECK SEEKS A REBATE

Beck, 48, has spent most of his adult life as an employee of what was once known as the Bell System. He now works for U.S. West, a regional Bell operating company.

Beck and 19 other workers sued the Bell system's chief union, the CWA, in 1976 with backing from the National Right to Work Legal Defense Foundation, an organization that opposes compulsory unions. The foundation now has more than 350 cases pending against unions, about half of them involving issues similar to Beck's.

Beck was not a member of the union. In lieu of dues, he was required to pay "agency fees" to the union under the labor contract it negotiated with American Telephone & Telegraph Co. Federal law permits such requirements to prevent employees from getting a free ride from union efforts, although 21 states with "right-to-work" laws ban such contractural agreements.

Beck objected to part of his fees going for politics and other non-bargaining purposes, and he sought a refund. Lower federal courts agreed with Beck, and as he awaited a Supreme Court decision, conservatives led by Jesse Helms, R-N.C., took up his cause as the Senate considered campaign-finance laws in the 100th Congress.

Eventually, the Supreme Court agreed with Beck in a 5-3 decision, holding that he couldn't be required to pay more than what the union needed to cover labor-management matters.

Bush joined in last June. "No American, not one, should be compelled to give money to a candidate against his or her will," Bush said in announcing his campaign-finance proposals.

It is unclear how much money is at stake. The Labor Department says unions covered by federal reporting requirements collect $3.3 billion in annual dues. In the Beck case, the district court found that 79 percent of assessed dues went for non-bargaining activities. That formula was later set aside, however.

The CWA says only 15 percent goes for activities beyond what it calls "representation." The union says it notifies members once a year that they are entitled to a refund.

Republican at the least want to write the court's Beck decision into a law stating compliance procedures. They also want to make the refund automatic, rather than subject to a request. Bush's campaign-finance bill (S 1727) would further allow workers' who actually join the union to also withhold a portion of their dues.

Unions, including the AFL-CIO, oppose codifying the Beck decision, even with language that goes no further than what the court already said. "We don't think it's necessary," says AFL-CIO spokesman Michael Byrne.

The postal workers Gould is more blunt: "We don't like what the court said."

Democrats might agree to write the Beck decision into law as part of a comprehensive package, says Greg Kubiak, a legislative aide to Boren. "But the Republicans always want to go beyond the Beck decision." he says.

SOFT MONEY FOR DEMOCRATS

The money Harry Beck objected to paying CWA is money many Republicans would just as soon bar from elections even if worker's didn't object to it.

Union treasury money enters elections in several ways. First, unions contribute heavily to party operations. Second, like companies, they are entitled to spend funds from their treasuries to underwrite the costs of running a political action committee (PAC). The PAC collects money from members to make donations to candidates. Experts estimate that a union or company spends a minimum of 50 cents for every $1 the PAC raises. Labor union PACs gave nearly $36 million to federal candidates during the 1988 election cycle. Democrats got $12 for every $1 given to a Republican. PAC contributions are limited to $5,000 per candidate per election.

By contrast, unions, corporations and trade associations can spend freely on soft-money activities such as voter registration, education and turnout. Because disclosure is spotty, soft money estimates vary wildly, beginning near $45 million per presidential election.

The only soft money that must be disclosed to the Federal Election Commission (FEC) is that which expressly advocates a candidate in "internal communications" to members, stockholders, employees or their families—and then only if it exceeds $2,000 in an election. There is no specific penalty for failing to disclose.

Nearly $4 million in internal union communications were reported to the FEC for the 1988 elections—a figure that does not begin to reflect labor's value to the Democratic Party.

"What unions bring to the table that really is a remarkable advantage is their membership contact program," says Paul Jensen, a Washington lawyer who in 1984 and 1988 served as the liason between the AFL-CIO and Democratic presidential contenders.

Jensen says a "valid estimate" of the value to a presidential campaign is $20 million. The money never shows up at the FEC because a good voter identification program can target mostly Democratic votes without violating the "express advocacy" provisions that force disclosure.

The efficiency is clearest in blue-collar cities such as Pittsburgh, where registering union members to vote is an election-year rite of spring. The umbrella organization for Pittsburgh's 156 AFL-CIO union locals, the Allegheny County Labor Council, contacts the unregistered among its 100,000 members. Later in the year, they will hear local officers talk up certain candidates. They will be polled about their intentions. The undecided will get literature. Many will go to the polls with slate cards in hand.

"Allegheny County is a good labor county," says Paul Stackhouse, the chairman of the council's political committee. The county, home to the headquarters of the United Steelworkers of America, went 60-40 for the Democratic presidential nominee, Massachusetts Gov. Michael S. Dukakis, over Bush.

Members of the International Association of Machinists and Aerospace Workers, a union strong in Washington state, vote 70 percent Democratic, according to William J. Holayter, the union's director of legislative and political action. Only Democrats who are "Common Cause nervous" would vote the union's turnout operation out of business, he says, referring to the public affairs lobby that has called for disclosure, but not limits, on labor and corporate soft money.

"Even Mondale got 68 percent of our vote,' Holayter says. "I go on a crusade every now and then telling [Democrats] you guys are absolutely stupid and out of your minds if you fool with this."

GOP GIRDS FOR SENATE FLOOR BATTLES

To hear Sen. Mitch McConnell, (R-Ky.) tell it, Senate Republicans left their weekend retreat March 24-25 like a football team breaking huddle—fired up, unified and ready for the Democrats on campaign-finance reform.

"I think it's safe to say we are coming behind a measure," McConnell said. "If you were summing up Republicans at the moment, there is a growing sense of unity to ax PACs and do something about non-party soft money."

So-called soft money is raised and spent outside the federal campaign-reporting system. McConnell was referring in particular to money spent by corporations, trade associations and unions for election activities as well as by tax-exempt organizations for voter-registration drives. The vast majority of money that has become the subject of controversy in the "Keating Five" scandal involves efforts by Sen. Alan Cranston, D-Calif., to raise money for tax-exempt voter-registration programs.

One of the chief concerns senators expressed at their West Virginia retreat was the way the public views the GOP on the issue. They complained that Republicans often come off as the impediment to reform because they oppose Democratic initiatives that they believe will tilt the playing field. "We need to stand on the positive side rather than just be against what the Democrats do," said Ted Stevens, R-Alaska. Even so, the size of the Democrats' majority could again put the GOP on the defensive.

McConnell said that the Republican measure would be introduced within weeks and that he hopes it will help put them back on offense by the time Senate Majority Leader George J. Mitchell of Maine brings Democratic campaign-finance legislation to the floor. Mitchell has said he will do so within weeks.

The Senate Rules and Administration Committee March 8 approved, on a 7-3 party-line vote, a Democratic measure (S. 137) that includes state-by-state spending limits for Senate campaigns and a cap on aggregate political action committees (PACs) contributions. *(Democratic bill, Weekly Report p. 725)*

President Bush has proposed eliminating all business and labor PACs. McConnell indicated that the Senate GOP conference was unwilling to go that far. He said the bill likely would seek a limit of $1,000.

Outsiders invited to address Senate Republicans on the issues showered criticism on spending limits. GOP consultants Eddie Mahe and Charlie Black both advised against them. Black said he heard little dissent for the package McConnell proposes.

Mahe said there was considerable debate on the "flexible spending limits" proposed to the Senate by a panel of outside advisers chosen by Mitchell and the Republican leader, Bob Dole of Kansas. The advisers said that money raised from people living outside a senator's home state or from PACs should be subject to spending limits but that money raised from individuals within a state should not. *(Weekly Report p. 725)*

"There was hardly any support for something like that," Mahe said.

White House Chief of Staff John H. Sununu reiterated Bush's pledge to veto a bill that includes spending limits or that otherwise appears harmful to the GOP.

McConnell offered a partisan pep talk of his own during his talk on Sunday. "What I told the caucus was that this is not an ethics bill. We passed the ethics bill last year. This is a bill about partisan advantage, and it's safe to say Republicans are not going to get rolled and let the Democrats write the rules for our democracy."

---

COURT: BUSINESS LIMIT OK

The Supreme Court's March 27 ruling that states can bar corporations from running independent political campaigns left unanswered where the court eventually will draw the line for non-profit corporations.

The court said in its 6-3 decision in *Austin* v. *Michigan State Chamber of Commerce* that a Michigan law requiring corporations to make their political expenditures through separate political action committees does not violate the First Amendment's protection of free speech. The case grew out of a newspaper advertisement, purchased by the chamber with treasury funds, that endorsed a candidate.

The court said corporations enjoy special legal status allowing them to accumulate vast wealth. This entitles a state to restrict their speech.

The court had said in the 1986 *Federal Election Commission* v. *Massachusetts Citizens for Life Inc.* certain small non-profit corporations could spend directly from their treasuries because they would have difficulty establishing separate funds, creating a disincentive to political speech.

The court in *Massachusetts* established a three-part test for non-profit corporations that it said the Michigan chamber failed to meet. One of these tests was its independence from the influence of business corporations.

"This is nothing more than the same decision in *Massachusetts* approached from the flip side," said Kenneth A. Gross, a Washington attorney who is a former associate general counsel at the Federal Election Commission.

[From the Bureau of National Affairs, Inc.]

APPEALS COURT REJECTS MACHINISTS' CHALLENGE TO COMPANY SOLICITATION OF EMPLOYEES FOR PAC'S

The right of corporations to solicit contributions for their political action committees from executive and senior employees is upheld by a federal appeals court, which unanimously rejects the argument of the International Association of Machinists that such contributions give corporate PACs more power than labor PACs.

In an *en banc* ruling, the U.S. Court of Appeals for the District of Columbia Circuit finds no fault with a 1976 amendment to the Federal Election Campaign Act (FECA) that broadened corporations' rights to solicit PAC contributions. An eight-judge panel, in a *per curiam* opinion, finds unpersuasive the Machinists' contention that the amendment created an "explosive" growth both in the number of corporate PACs and in their spending power, resulting in an unconstitutional imbalance in the influence of corporate and labor PACs.

The challenge was brought by the union and six individual plaintiffs, including Machinists President William Winpisinger, whose participation was based on their right as voters to challenge election law. The case went to court under special provisions for expedited review of election law questions after the Federal Election Commission rejected the union's administrative complaint on the PAC contribution and solicitation practices of 11 corporations.

Until amendments were made in 1976, federal election law permitted companies to solicit funds for PACs only from shareholders, while unions could seek contributions from members. In a 1975 advisory opinion, however, the commission said a company could solicit all its employees, as well as shareholders, for PAC funds. Congress reacted to the sweeping commission interpretation by amending the Act in 1976 to limit corporate PAC contributions to executive and administrative, or career, employees as well as shareholders.

The Machinists contended that although Congress did not intend to create an imbalance between corporate and labor PACs, the amendments had that effect. The union argued that between 1975 and 1980 corporate PACs grew in number from 139 to 1,204, and their funds from $5.8 to $34 million; in the same span labor PACs increased only from 226 to 297, and their funds from $18.5 to $26 million. The union also charged that 90 percent of corporate PAC funds are contributed by executive and administrative employees.

But the court finds that the alleged disparity "is not purely one of dollars and cents" and is not caused solely by the amendments. The panel says it is unclear how many of the career personnel were permitted to make contributions earlier as shareholders.

"Nor, taking into account that labor union PACs just a few years ago were more prevalent, wealthier, and more powerful than corporate PACs, do [the Machinists] entertain the possibility that the relative strength of corporate and labor PACs may swing pendulum-like in step with the political fortunes of the day," the courts says.

In examining the legislative history, the court finds that there was a general consensus in Congress that the amendments restored the balance between corporate and labor PACs' strength that was upset by the commission's 1975 ruling. Further, the court finds that Congress had good reason to add career employees as permissible contributors, because they "share with stockholders a stake in the corporation's well-being."

"It is unlikely Congress will ever be able to achieve a perfect balance between the relative influence of corporations and labor unions in federal elections," the court says. "In any event, the Constitution, as historically and currently interpreted, does not afford any guarantee against one person's or group's ability to fund more speech than can another." The court concludes that Congress "attempted to treat corporations and labor unions in a relatively comparable manner."

CAREER EMPLOYEES' FIRST AMENDMENT RIGHTS NOT IMPAIRED

The Machinists' second challenge—that the solicitation of funds under "inherently coercive" circumstances impairs a career employee's constitutional right to abstain from political acitvity—also is rejected by the court. "We cannot conclude that such solicitation inevitably forces career employees to compromise their political beliefs in order to avoid jeopardizing their corporate positions," the court says.

Union statistics that 90 percent of corporate PAC funds are derived from career employees do not necessarily imply coercion, the court states. "From the very same figures one could argue with equal force that career employees contribute to their corporate PACs out of a desire to further what they perceive to be their own best interests or the best interest of the corporation, and because they have the wherewithal to do so, not becuase they are coerced or intimidated," the panel says. Furthermore, Congress was aware of the possibility of employer coercion but enacted safeguards in the amendments to prevent it, the court adds.

Finally, the court rejects the union's third challenge—that the use of corporate funds to support a PAC's administrative expenses violates the First Amendment rights of dissenting shareholders. The panel finds that the union's claim "stretches beyond reasonable proportion" earlier rulings prohibiting unions from requiring members to support the union's ideological views as a condition of employment. The Machinists "reach too far in equating the situation of a worker who is compelled to join a union, or to pay union dues on pain of losing his employment, with that of a shareholder in a publicly-held company whose livelihood does not depend on retaining stock in a corporation involved in political activity he opposes and whose investment is tenuously linked to the establishment and operation of the corporation's PAC."

The opinon was signed by Chief Judge Robinson and Judges Tamm, Robb, Wilkey, Wald, Mikva, and Ginsburg.

CONCURRING OPINION FILED BY JUDGE EDWARDS

Although disagreeing with the court's rationale in rejecting the Machinists' third challenge, Judge Edwards concurs in the finding that the use of corporate funds to support PACs is not a violation of dissenting shareholders' First Amendemnt rights. However, he reasons that it is not a violation because there is no governmental requirement that the funds be spent.

By the majority's rationals, Judge Edward says, a stockholder has less right to control the political use of his investment than a union member has to control the use of his dues. "One simply cannot conclude that corporate stockholders are never coerced when the money they have invested in the hope of pecuniary return is spent for political purposes," he says. While stockholders may have a "ready market" for their corporate shares, the same may not be true for a minority stockholder in a closely held corporation, Judge Edwards contends. He continues that if the stockholder relies on dividends as a source of income, "who is to say that he is not coerced if the corporation establishes and finances a PAC that supports candidates who are antithetical to his political views?"

SUPREME COURT REVIEWING SIMILAR CASE

Joseph L. Rauh, Jr., one of the attorneys who represented the Machinists, declined comment on the court's ruling and said no decision had been made on a U.S. Supreme Court appeal, but added "the Machinists don't give up lightly."

The Court on April 15 granted review of another ruling on the same FECA provisions by the District of Columbia Circuit. In that case, the appeals court upheld the solicitation of PAC funds by the National Right to Work Committee from persons who it considered "members" by virtue of their having contributed to NRWC (1982 DLR 65:A-6).

Rauh declined to speculate whether the Machinists would seek Supreme Court review as part of the right-to-work case, stating that although the cases deal with the same provision of the election law, the applications are widely different.

(*International Association of Machinists* v. *Federal Election Commission;* CA DC, No. 81-1664, April 6, 1982).

(Decision appears in Text Section D).

LABOR LEADERS WEIGH OUTCOME

AFL-CIO President Lane Kirkland congratulated Bush in a telegram, and said the AFL-CIO "stands ready to assist you in constructive efforts to build a better nation and better lives for all Americans."

In a subsequent statement, the federation leader cited a poll conducted for the AFL-CIO by the Wilson Center of Alexandria, Va. showing that 69 percent of AFL-CIO members and 68 percent of those living in AFL-CIO union households voted for Dukakis. These results, which he noted are similar to ABC News exit polling data showing that 67 percent of the members of union households voted for Dukakis, "means that AFL-CIO support for the Dukakis-Bentsen ticket ran more than 20 percentage points ahead of the national vote.

Jack Sheinkman, president of Amalgamated Clothing and Textile Workers Union, said he was "naturally disappointed" that Dukakis did not capture the White House, but he said he was "heartened" by the results in House and Senate races.

[From the Washington Times, Mar. 22, 1990]

(By Warren Brookes)

TOUGH ON THE DEFICIT OR THE WORKER?

The willingness of workers to ignore union sanctions and cross picket lines may stem from the continued rift between big labor's politics and rank-and-file interests.

Last week, one of big labor's best friends, House Ways and Means Chairman Dan Rostenkowski, Illinois Democrat, proposed a "deficit reduction" plan that calls for $195 billion in higher taxes over the next five years. Not only do 77 percent of those higher taxes come directly from the working class (including a 20-cent per gallon gasoline tax), but they come on top of the $1,076 billion to be produced by higher revenues from economic growth from 1991 to 1995.

This means instead of being a "tough" plan to slash the deficit, the Rostenkowski plan would in fact support a spending spiral in everything by defense and Social Security.

That's because spending interests, especially big labor, still set the Capital Hill agenda. As Barron's editor Robert Bleiberg wrote last September, "Even as organized labor loses economic ground, its political clout perversely continues to mount."

At the very moment that Mr. Rostenkowski was floating his $39-billion-a-year, new-revenue honey pot, Sen. Jay Rockefeller, West Virginia Democrat, was promoting his Pepper Commission report, which calls for the eventual new spending of as much as $70 billion a year to fill the health-insurance gaps in our nation's medical-care system.

The main push for such new spending is coming from big labor and big business facing tough competition from non-union smaller companies and entrepreneurs who have either elected to go uninsured or provide less-costly coverage with larger deductibles.

Another example is child care. Last November, the House and Senate came close to passing out a program whose initial $2 billion to $4 billion price tag is only a down payment on the creation of a massive new child-care bureacracy with costs of $70 billion to $100 billion.

The main beneficiaries of that explosion would be the unions of state and county employees, human services providers and education, along with big business, which is under growing pressure from big labor to provide child care as a fringe benefit.

There are a host of other such common goals: protection of entrenched management and unions against hostile takovers and leveraged buyouts; re-regulation of some parts of the transportation industry; subsidies and quotas for the semiconductor, steel and textile industries; the gradual replacement of private health insurance with a national system.

The outcome of this mutual wish list will be higher prices and higher taxes for the American consumer, because big labor's agenda is increasingly set by the government unions, especially the National Education Association and the American Federation of State, County and Municipal Employees.

One of the very fairest congressional rating services is the National Taxpayers Union, which rates senators and representatives on how often they stand up against added spending, whether that spending be for social programs or for defense.

As such, National Taxpayers Union ratings punish conservatives for their pro-defense votes and reward liberals for their anti-defense votes. The only common interest is is how well politicians oppose the overall rise in government spending and taxes.

In 1988, the 20 congressman with the best (highest) National Taxpayers Union ratings for holding the fiscal line (an average of 63 percent of the time) received a grand total of only $23,250 from the political action committees of organized labor, only $1,163 per politician, according to an analysis by the National Right To Work Foundation. (See Table.)

By contrast, in 1988, the 20 congressman with the worst spending records—the biggest spenders, who defended taxpayers less than 11 percent of the time—received a grand total of $1,616,501, an average of $80,825 each, from the same big labor political-action committees.

In short, big labor rewarded the biggest spenders by nearly 70-to-1 over the taxpayers' best friends. Year after year, polls of union members show they support a balanced budget amendment by margins of 60 percent to 70 percent. Yet, it was big labor that killed this amendment in 1982 in the House after the Senate passed it easily.

Surveys of the membership of the NEA show 40 percent Democrat and 30 percent Republican registration. Yet the NEA gives money to Democrats at a 16-to-1 ratio over Republicans and to liberal big spenders by even larger margins.

That kind of aggressive union monetary manipulation is behind Congress' low turnover rate and its unwillingness to put taxpayers' interess first. Until the administration's embrace of Mr. Rostenkowski's proposal, taxpayers' only hope lay in President Bush's willingness to stand up against those interests. Is that hope now fading?

HOW BIG LABOR SUPPORTS BIG SPENDING

[Ratings by National Taxpayers Union]

| | NTU rating (average) | Labor PAC dollars 1988 (average) |
|---|---|---|
| 20 "Taxpayers Best Friends" | 62.6 | $1,163 |
| 20 "Biggest Spenders" | 10.6 | $80,825 |
| Ratios (rounded) | 6:1 | 1:70 |

NEA BACKS DUKAKIS, 4 FOR NO. 2 SPOT

[By Carol Innerst]

NEW ORLEANS.—National Education Association President Mary Hatwood Futrell said yesterday the NEA has recommended four likely running mates to Massachusetts Gov. Michael Dukakis, including the Rev. Jesse Jackson.

The others listed in a letter she wrote to the likely Democratic nomninee for president are Tennessee Sen. Albert Gore Jr., Ohio Sen. John Glenn and Florida Sen. and former Gov. Robert Graham.

The NEA also endorsed overwhelmingly a proposal that each state name at least one school district a "learning laboratory" where teachers could experiment and take the lead in improving schools.

"Hot dog! You did it!" Mrs. Futrell said, after the delegates gathered for their annual convention passed her pet proposal by voice vote.

In a 45-minute keynote address before 8,227 delegates had urged teachers to estab-

lish "a national network of innovative school districts."

Such districts, she said, might do away with academic tracking, finance schools by means other than property taxes, experiment with more flexible scheduling, or anything else it wanted to try in the name of reform.

Mrs. Futrell also told the union's 8,227 convention delegates to throw their clout behind Mr. Dukakis as "the most electable and desirable candiate" going into the Democratic National Convention.

While the NEA has not traditionally endorsed for the vice presidency, the possibility exists this year, Mrs. Futrell indicated. The endorsement decisions left the NEA's black caucus unhappy over the treatment Mr. Jackson received from the NEA and the caucus could make an endorsement motion from the floor, she said.

Mr. Dukakis "is spending the holiday weekend with the Jacksons," she said. He is not at the convention because his legislature is in session, but is scheduled to address the NEA via satellite at 5 p.m. today.

There are 1,782 ethnic minorities among the 8,227 delegates to the NEA's Representative Assembly, and 1,343 of them are black teachers, according to NEA spokesman Kenneth Butler. About 12 percent of the 1.9 million membership is minority, he said.

The NEA's endorsement of Mr. Dukakis was made by the Political Action Council June 30 and approved by the Board of Directors. It does not necessarily signal the wishes of the membership.

Whom the union will endorse in the general election will be determined by a mail ballot in August. Vice President George Bush will be on that ballot although he has refused to sit down one-on-one and talk to the NEA, Mrs. Futrell said.

"We should give our members an option—it's a democratic process," she said."No party has the majority among NEA members."

The NEA's 1.9 million members are 30 percent Republican, 40 percent Democrats and 30 percent independent, she said. About 30 teachers and alternates will attend the GOP National Convention in New Orleans in August and about 400 delegates will go to the Democratic National Convention in Atlanta. She will attend both, she said.

In her keynote speech to the convention delegates, Mrs. Futrell portrayed the Reagan administration as "reactionary" and "uncaring" about children. Mr. Dukakis, she said, would be a "pro-education president."

In an interview with The Washington Times, Mrs. Futrell said the NEA would seek a meeting to discuss educational concerns with whoever wins the Oval Office.

If the victor is Mr. Bush, she said she hoped he would reflect upon the wrangling between the NEA and the Reagan administration "and take a lesson from those eight years."

Although Mr. Bush refused to submit his candidacy to the NEA's screening process, Mrs. Futrell said she was among 30 civil rights leaders invited to Mr. Bush's home recently to hear his views on various policy issues. The topic he mentioned most was education, shea said.

"I believe he would be willing to work with the education community as a whole," she said. "I think we probably will agree on more issues than people believe."

Mrs. Futrell said the vice president has talked abut learning laboratories—a proposal very similar to the one passed yesterday.

"So at least he is thinking conceptually along the same lines as the NEA. But I don't know how he would implement his learning labs. I would like the opportunity to chat with him about that, because we believe we have to expand that concept to involve teachers and to be site-based."

LABOR'S EFFORT FOR MONDALE MAY BACKFIRE

(By Sara Fritz)

COLUMBUS, OH.—Like other union leaders in these closing days of the 1984 presidential campaign, Rex Hamlett of the Communications Workers of America is working hard to turn out the labor vote for Walter F. Mondale. And like many of his fellow workers, Hamlett is haunted by the thought that the better he does, the worse it may be for labor's chosen candidate.

"We've learned some awful hard lessons that labor can't force their membership to vote a certain way," Hamlett said recently. "How they are going to vote this year is kind of up in the air," he added, conceding that President Reagan drew half of his union members' votes in 1980—and that Reagan remains popular with the rank and file today.

So it goes all across the nation's industrial heartland. Although Mondale is depending on labor to deliver the blue-collar vote, Democratic strategists admit that labor's effort could ultimately hurt their candidate by turning out more union members favorable to Reagan than to Mondale.

"I admit I have been prepared, if we see that we were not doing too well with the labor guys, to tear down the labor effort," said Don Sweitzer, Ohio coordinator of the Mondale campaign.

By all accounts, union leaders are working harder and more enthusiastically for Mondale than they did for Jimmy Carter four years ago, or for any Democratic candidate since Hubert H. Humphrey in 1968. They are registering new voters, operating telephone banks, raising funds, printing anti-Reagan literature and bringing their members to rallies when Mondale or his running mate, Geraldine A. Ferraro, comes to town.

Nationally, organized labor is expected to spend a record amount of money to help Mondale, although the exact sum is impossible to calculate. The American Federation of State, County and Municipal Employees, for example, will spend $3.5 million this year, compared with $2 million in 1980.

Meanwhile, AFL-CIO President Lane Kirkland is touring the industrial belt on Mondale's behalf and another top AFL-CIO official, Jim Kennedy, has been deployed to work part time at Mondale headquarters in Washington.

"The labor guys are our biggest cheerleaders," said Sweitzer, who describes the labor effort as "the best I've ever seen."

MILLIONS NOT REGISTERED

Still, millions of union men and women remain unregistered. Barely more than half of the Ohio AFL-CIO's 800,000 members are registered to vote. And while they tried to register only Mondale supporters, union leaders fear that they signed up a good many Reagan supporters as well.

Without the labor vote, Mondale cannot carry the industrial states that are considered his indispensable base of support. At present, he appears to be trailing in all of those states, and a Los Angeles Times Poll completed on Oct. 15 shows the blue-collar vote almost evenly split, with 48 percent for Reagan and 46 percent for Mondale.

If the labor vote is to begin to affect the outcome, said John Thomas, spokesman for the Ohio AFL-CIO, 70 percent of union voters must cast ballots for the Democratic candidate—five points above the historic norm and 10 points more than turned out for Carter in 1980.

"You go in with 60 percent in your pocket and the battle is over the additional 10 percent," he said. "If we don't get 70 percent among trade unionists, we lose."

UNEMPLOYMENT HURTS EFFORT

Unfortunately for Mondale, the unions that appear to be doing the most to turn out their members are the growing non-industrial unions with the highest percentages of Republican members—the Communications Workers, United Food and Commercial Workers, National Education Assn. and the American Federation of State, County and Municipal Employees.

High unemployment in the smokestack industries has limited the political efforts of such staunchly Democratic industrial unions as the United Steel Workers and the United Auto Workers.

"We used to be able to call steelworkers' headquarters in Pittsburgh and they'd ship money over here by the carload," said a labor official who declined to be identified. "We can't do that anymore. The auto workers continue to talk a good game, but they don't do much either."

Although the building trades are known to be the most conservative unions in the labor movement, their leaders insist that high unemployment in construction has converted the membership into Mondale supporters. Larry Sowers, president of Carpenters Local 200, insisted that 85% of his members will vote Democratic, and Bob Merideth of Pipefitters Local 189 claimed 90% in his local will.

Four years ago, labor split during the Democratic primaries between Carter and Sen. Edward M. Kennedy (D-Mass.). "We turned off a lot of our membership on Carter when we campaigned against him in the primaries," admitted Norman Wernet, executive director of the American Federation of State, County and Municipal Employees.

This year, labor took the unprecedented step of uniting behind Mondale even before the primary season, and that effort appears to have paid off, at least in labor's campaign effort. "I see a great deal of difference from 1980 in terms of our enthusiasm and the willingness to get out and work," said Milan Marsch, Ohio, president of the AFL-CIO. "No one has been negative like in 1980."

National union registration figures are not yet available, but during the initial phase of labor's effort, which ended in early October, the unions claim to have registered an estimated 50,000 additional union members to vote in Ohio.

"We registered them until we were blue in the face," said Hamlett, whose local is made up of telephone installers and repairers. "We registered people in the cafeteria. We registered them at monthly meetings. We registered them everywhere we could find them."

MEMBERS CALLED

The AFL-CIO in Ohio has also set up 80 telephone banks with a total of 400 telephones that will be used to call every union member in the state several times before the Nov. 6 election. At the state's biggest phone bank, in Cleveland, retired and unemployed unionists are paid $4 an hour to make a total of 10,000 calls a day.

"They run it like a military camp up there—you have to raise your hand if you want to go get a Coke," said Sweitzer.

AFL-CIO officials in Washington are also stressing the need for shop stewards to talk one-on-one about Monday with union members though the million-member United Food and Commercial Workers warned its officers to avoid any arm-twisting that might spark a backlash against Mondale.

"One of the most personal things people do is vote for (a) President," said William Olwell, the union's public affairs director in Washington. "Our members tell us that they would resent any heavy-handed stuff."

But Ralph Lorenzetti, president of a Food and Commercial Workers local is ignoring the advice from Washington. He tells his members as bluntly as possible: "Look, we know a majority of you voted for Reagan last time. Vote for him again and you won't be here three years from now. If Reagan is reelected, employers are going to try to do the union in."

LABOR TRIES TO SPARK ENTHUSIASM FOR DUKAKIS

(By Frank Swoboda)

For organized labor, the past five weeks have been a warmup. This week marks the start of the presidential election campaign.

Armed with nearly $40 million in cash, an army of volunteers and perhaps more hope of winning than at any time this decade, labor is moving into the critical "get-out-the-vote" phase of its campaign to elect Democratic presidential nominee Michael S. Dukakis.

The goal is to get 65 percent of the union members in at least 10 key states to vote for Dukakis in the Nov. 8 election.

But there is a level of frustration among many union officials, who suggest that the labor effort for Dukakis is far more organized and efficient than the national Democratic campaign.

Labor is concentrating on the states with the heaviest union membership: New York, California, Pennsylvania, Illinois, Ohio, New Jersey, Michigan, Massachusetts, Texas and Florida. At this point, however, key labor officials see Florida as a lost cause—Dukakis is running behind Republican nominee George Bush by as much as 20 points in their polls.

Labor's effort is not confined to these states, however. Union political operatives point to Washington and Oregon as states where they expect labor's efforts and organization to make a difference. In terms of organization and volunteers, said Joan Baggett, labor coordinator for the Dukakis campaign, "our campaign has an edge in the field."

Labor brings more than people and tactics. AFL-CIO spokesman Rex Hardesty said union political action funds total between $36 million and $41 million, 300 percent more than in 1984. "This election's going to be close because Dukakis can compete," he said.

Union officials said they have assembled the most sophisticated election operation in memory, to try to overcome what they see as a lackluster national campaign by Dukakis. Their concern is that it will be hard for the unions to do well in the next 30 days unless the Dukakis campaign generates more enthusiasm among the voters.

Officials from nearly all of the politically active unions contacted in recent days said a major difference between this campaign and those in 1980 and 1984 is the active involvement of local union leaders. At this stage of the campaign in both the 1980 reelection campaign of President Jimmy Carter and the 1984 campaign of former vice president Walter F. Mondale, key union officers were giving only lip service to the candidate, these officials said.

"I think there's a lot more participation as far as the [union] leadership and political people are concerned," said the political director of one union. "There's almost a sense of desperation. Labor is much more organized and focused than the [Dukakis] campaign."

Until now, said Loretta Bowen, political director of the Communications Workers of America (CWA), many union people have been "searching desperately for a spark" to help ignite rank-and-file enthusiasm about Dukakis. Now, she said, "people realize there may not be that spark."

As a result, the CWA, one of a handful of politically active unions, has ordered everyone on its 200-member field staff not actively involved in contract negotiations to spend full time on the election.

Bowen said the union was concentrating its efforts on two tiers of states where it has large membership. The top tier, where CWA membership is the largest, includes New Jersey, Ohio, Texas and Tennessee. The second tier of important states where there also is sizable membership includes California, Georgia, Michigan, North Carolina, Pennsylvania and New York.

The United Auto Workers (UAW) union, whose efforts could spell the difference for Dukakis in Michigan and other key industrial states, this week will mail more than 1 million personalized, pro-Dukakis letters to UAW members. Each letter also identifies the individuals by their employer.

The UAW is distributing anit-Bush material at plant gates in the hope that members will use the material to argue against Bush during what research shows is a general willingness to discuss politics on the job.

Political research within the union shows the membership responds to that UAW spokesman Peter Laarman calls the "squeeze issues," such as concerns that the next generation will not be able to do as well economically.

Laarman said that so far Dukakis hasn't automatically appealed to union workers who may be ready to return to the Democratic Party. But he said he senses the campaign is beginning to coalesce among UAW members. "We're building," he said. "I don't think anyone is running away from the fact that this is a real tough battle."

Sam Dawson, political director of the United Steelworkers of America, said labor's campaign effort to date was "more organized than any I've seen since 1960." Key labor officials credit Democratic National Chairman Paul G. Kirk Jr. for building up the party's state operations since 1984. They said much of the campaign organization and coordination is being handled by the state party organizations rather than the Dukakis campaign.

Dawson said that until recently few workers seemed to focus on the election and there was little enthusiasm for either Dukakis or Bush. Now there are indications the membership is beginning to turn toward Dukakis, he said. "Our people sense that it can be won. We are close enough in the states that we have to win that we think we can do it."

This year, for the first time on any scale, key unions have been using focus groups to try to determine the message their members want to hear from candidates. The results have been surprising, union leaders said. In general, the research showed that the membership wanted facts—to help them make up their minds—not the traditional party or union political rhetoric.

Perhaps the best example of this was the National Education Association which, after endorsing Dukakis, put the pictures of both Bush and Dukakis on the front of its monthly newspaper. NEA's Ken Melley said the union attempted to present a balanced assessment of the two candidates and explain why the union picked Dukakis.

LABOR LETTER: A SPECIAL NEWS REPORT ON PEOPLE AND THEIR JOBS IN OFFICES, FIELDS AND FACTORIES

(By Selwyn Feinstein)

Unions gear up for big election push for Dukakis.

With more money and enthusiasm than four years ago, the AFL-CIO launches a massive effort to get 13 million unionized workers to register and vote for Democratic nominee Michael Dukakis. "We sense this time we have a real chance," compared to 1984's futility when unions based Walter Mondale, observes Jerry Clark, political director of the American Federation of State, County and Municipal Employees.

The AFL-CIO plasters its newspaper with the Dukakis message and follows with videos and millions of fliers. It expects to field 500,000 volunteers. The American Federation of Teachers sends 16-minute videos to 100 locals. The United Auto Workers taps union publications and the mails. The Communications Workers turns to phone banks to get out Democratic votes.

But a few union officials complain their efforts are being hampered by confusion in the Dukakis camp.

MONEY IN THE SHADOWS

(By Ronald Brownstein and Maxwell Glen)

No one knows how much America spends on politics.

"We know how much we spend on deodorant," said Arizona State University political scientist Ruth S. Jones, who studies campaign finance, "but we don't know how much we spend on elections."

The only thing certain about campaign spending is that the total spent on federal elections is at least tens of millions of dollars—and in all likelihood more than $100 million—greater than the amount reported to the Federal Election Commission (FEC).

FEC data provide only a base line figure on the resources devoted to federal elections. According to the commission's final reports on the 1984 elections—after netting out transfers between political action committees (PACs), the parties, and candidates—political activities in that cycle cost $1.155 billion (*See table.*) That figure represents the total of hard money—funds subject to commission contribution limits and reporting requirements—contributed to federal elections, as well as public financing for the presidential race.

But millions of dollars of additional spending exists in the shadows of the federal election law. Many kinds of political spending—usually grouped under the heading "soft money" but encompassing a wide range of disparate activities from voter registration efforts by nonprofit organizations

to centrally organized fund-raising drives by the presidential campaigns—don't fall under the legal reporting requirements.

"One of the false premises of election law," said Republican election lawyer Jan W. Baran, "is that it will enable you to account for all of the money being spent in politics."

For years, political scientist Herbert E. Alexander of the University of Southern California, who is also the director of the Citizen's Research Foundation, has made the most thorough effort to map the unknown terrain of off-book election spending. Alexander, who produces an estimate every four years of total political spending, calculates that spending on federal races in 1984 came in at $1.24 billion and that spending on races at all levels reached $1.8 billion, a 50 per cent increase from 1980.

These figures are necessarily rough approximations, as Alexander quickly concedes. "I've got to admit it is an art more than a science," he said. "We try to be as complete as possible, but it is not perfect."

When all kinds of soft money expenditures are considered, federal election spending may well exceed even Alexander's $1.24 billion estimate. The most well-known kind of soft money, which is usually defined to mean funds not subject to FEC reporting and contribution limits, is collected by the presidential campaigns to finance voter registration and turnout programs in the States.

Those funds are substantial. In the last election, the Democrats' Victory Alliance, which funneled money to state parties, raised $6 million in soft money. (The alliance also raised $16 million in hard money, most of which it transferred to the state parties, which deposited the money in their federal election accounts; the election law requires the state parties to use that money to pay for activities directly affecting federal elections.) According to figures collected by Alexander, Republicans centrally collected and disbursed about $5.6 million in soft money to the state parties for activities related to the presidential campaign.

State parties also raised funds for their own state election accounts—the activities of which are legally not supposed to, but almost inevitably do, affect federal races. (The GOP in particular focused on helping state parties raise money themselves.) How much those parties raised is unknown because state reporting requirements vary widely.

But a look at a few states with thorough reporting requirements indicates that state parties collected significant sums for their state accounts, in addition to the $61 million that they raised for their federal election accounts and that are reported to the FEC. In Georgia, New York, Ohio, Oregon and Wisconsin, the federal election account represented 20-40 per cent of total state party spending. That range suggests that state parties raised tens of millions of dollars beyond the figures they were required to report to the FEC. And that is only the start of the spending in the shadows.

UNION DOLLARS

One of the great mysteries of American politics is how much money labor spends on elections.

Union PACs collected more than $51.1 million in 1983-84 and spent more than $47.5 million, but that represents only a part of their effort. Organized labor also makes extensive contributions to nonfederal candidates that are not reported to the FEC.

Labor's real importance to candidates, though, is not so much the PAC dollars unions contribute directly to campaigns as the expenditures they make from their treauries to lobby among their members. In each election, labor spends millions of dollars in advocating its preferred candidates before the union rank and file, but how many millions is unknown, and estimates vary widely.

The National Right to Work Committee says that organized labor spent about $200 million in union treasury funds on campaign activities in the last election cycle. "It is almost impossible to put a dollar figure on it," said Clayton Roberts, the committee's vice president for public relations. But "if you wanted to build an ideal campaign organization and you started from scratch, it would be close to what the AFL-CIO has in place."

Murray Seeger, the AFL-CIO's information director, said the Right to Work Committee's $200 million figure comes "right off the moon." But the labor federation has no estimate of its own. In fact, Seeger argues that the nature of labor's activities, which depend so heavily on volunteers, makes it impossible even to guess how much it spends. "If you have a telephone bank, all done by volunteers, say, 25 people calling for four hours, how much is it worth? Is it the minimum wage, is it what they would be earning if they were stringing electrical cable somewhere . . . ? There is no way to value it."

The FEC requires unions (and businesses) to report some information on what they spend communicating with their members. According to FEC figures, unions spent $4.5 million contacing their members for Democratic presidential nominee Walter F. Mondale or against President Reagan and $600,000 supporting House and Senate candidates.

But the huge holes in the reporting requirements make those members meaningless. Only communications in which more than half of the message is devoted to expressly advocating the election or defeat of a particular candidate must be reported. So a union can slap an endorsement on the front cover of a four-page newsletter, list coming events on the next three pages and report nothing to the FEC. Nor must it report "nonpartisan" voter registration or get-out-the-vote efforts. Any union arm, such as a local, that spends less than $2,000 in an election doesn't have to report any of its spending to the FEC. And the investments that unions make in the infrastructure needed for these communications—computer capacity, telephones, staff—need not be reported either.

"The most important things unions do—phone banks, surveys which they do for their own internal targeting, these kinds of things—have never been reported," said Michael J. Malbin, a resident fellow at the American Enterprise Institute for Public Policy Research.

The result is huge gaps in the information filed with the FEC. Only 18 international unions (there are 94 in the AFL-CIO reported partisan communications with their members in the last election; among those that didn't were two of the most politically active unions, the United Auto Workers and the United Food and Commercial Workers, although the latter spent $68,000 independently on behalf of Mondale. Of the more than 53,000 local union branches, only five reported any political communications (though some internationals reported expenditures by locals crossing the $2,000 threshold as part of their own filings.)

More information, at least for public employee unions in certain states, will become available soon because of the Supreme Court's March 4 decision on *Chicago Teachers Union* v. *Hudson*. The Court ruled that public employee unions that are allowed to assess dues on nonmembers—who benefit from the union's collective bargaining activity—must establish added safeguards to prevent that money from being spent on political activities or lobbying. The Court required the unions to account strictly for all money spent on such activities, allow nonmembers a chance to challenge their calculations and reduce nonmembers' dues by the appropriate percentage. Nowhere do reliable estimates of political spending prove more elusive than at the state and local levels.

There are, to begin with, an enormous number of elected offices: Nearly 500,000 are contested every four years, according to the Census Bureau. But the biggest obstacle lies in the varying nature of state election laws. While most states require candidates, parties and other political entities to report their financial activities, they do so with different degrees of legal stringency and regulatory enforcement.

Because of the numerous obstacles involved in calculating the sums spent on state and local politics, most observers of campaign finance have focused only on pieces of the puzzle—governorships, the legislatures and ballot issues. Only one expert, Herbert E. Alexander, director of the Citizens' Research Foundation and a political science professor at the University of Southern California, has ventured a comprehensive estimate of the dollars consumed at the state and local levels, and he concedes that his figures may have a margin of error of as much as 20 per cent.

"There's some element of magic here," Alexander said, "But the point is that nobody else has done it, and so nobody can dispute our numbers."

Alexander estimates that approximately $550 million was spent on state and local politics in the 1983-84 election cycle. His figure includes an estimate of $280 million related to statewide and legislative elections, $200 million for local races and about $70 million that he believes was spent to promote or defeat initiatives, referenda and other ballot issues during the period.

It was, of course, a cycle in which only 15 states—and not such major jurisdictions as California, New York and Texas—held gubernatorial elections. Nor were the mayors' jobs at stake in Los Angeles and New York (although Chicago Mayor Harold Washington was elected in 1983).

Yet about 5,700 state legislative seats were contested in 1984, and 23 states put major ballot issues to the vote. Nationally, Alexander estimates, spending for legislative and statewide candidates rose 6 per cent from 1980-84 and virtually doubled for ballot issues. He estimates that the amounts spent on local races were about the same in both years.

Alexander's quadrennial effort to come up with a reliable figure is, in effect, a story of campaign regulation in America. As he has found, reporting requirements for receipts and expenditures are often defined differently from one state to another. And some states require candidates to report only their spending activity related to primary elections or their receipts from special-interest groups.

But differences in legal language aren't the major hazard. "In fewer than a third of the states are the data systematically and reliably compiled," Alexander complained.

He pointed out that few state governments are willing to allocate the resources needed to gather the information in some reportable form. Another problem is that in many states, only campaign financing activity related to statewide offices is reportable to the state election authorities; even in Wisconsin, which has one of the nation's most regulated and carefully monitored political industries, legislative candidates file with the county governments.

In fact, it is the major disclosure role played by county clerks and probate judges, among other local officials, that helps to make comprehensive analysis so risky. "Even in states with disclosure requirements, the farther down on the totem pole you go, the less disclosure that's likely to take place," Alexander said.

In their efforts to compile disclosure information, a few states have made Alexander's task somewhat easier than it would be otherwise. Washington, for example, reported that almost $30.2 million was spent in the state in 1984 on nonfederal elections. California has published figures showing that legislative candidates in the 1983-84 election cycle spent $45 million, and Wisconsin's published data show that $4.4 million was spent in that period. New Jersey, which held legislative elections in 1983, said that candidates for the state Senate and General Assembly spent $3.4 million that year.

For the most part, however, the political accountant must rely on a variety of governmental and nongovernmental sources to come up with a reasonable estimate. Assorted Common Cause affiliates and such news organizations as Gannett News Service, which estimated that $8.1 million was spent on legislative races in New York in 1984, become important information purveyors. From their tallies one can begin to extrapolate, as Alexander does, and estimate for all 50 states, although even he said that "you pray, you gaze at the stars" in the process.

Based on reports filed with the states and on the estimates of political professionals, it is evident that the amounts raised and spent vary from state to state, county to county and that the levels are increasing, even if not precipitously.

Gubernatorial campaign spending reflects both trends. In 1982, for example, candidates for governor in California, New York and Texas alone spent about $67 million, according to Common Cause. Although Republican Lewis E. Lehrman's personal contribution of $8 million accounted for more than a third of the $23 million he and other candidates spent on the New York race, the $22 million raised and spent by gubernatorial candidates in California nearly tripled the amount spent by both nominees four years earlier.

But the governorship doesn't carry a high price tag in every state. In *Money and Politics in the United States* (American Enterprise Institute for Public Policy Research, 1984), Ruth S. Jones, a political scientist and state election specialist at Arizona State University, said Democrat Ted Schwinden in Montana and Republican Frank White in Arkansas each spent roughly $500,000 to win the governership in 1980; and in 1982, it cost Republican Gov. William J. Janklow of South Dakota only $116,000 to win.

Jones added that gubernatorial races cost much more than contests for other statewide offices. She cited the example of Arizona in 1982, when the state treasury spent only 15 cents per vote to win 51 per cent of the vote in the same election that saw the incumbent governor, Democrat Bruce E. Babbit, spend $3 per vote to win 62 per cent of the vote.

"Such variations in campaign expenditures within and between states," Jones wrote, "Virtually precludes any useful summary statements about campaign financing for statewide offices other than the obvious conclusions that in any given year in any particular case for any specific office, the cost of a statewide campaign is highly dependent on the immediate electoral context of that election."

Michele M. Davis, executive director of the Republican Governor's Association, speculated that the costs of gubernatorial campaigns are going up, though not as much as those for U.S. Senate seats. "When you are talking to pros in the governor's races," she said, "you are hearing enough of them saying, 'Last time we were able to run for a million [dollars], now it's two.' "

But any attempt to base 1986 projections on 1982 or 1984 results would be risky because so much depends on the match-ups. "It's like trying to speculate what your budget is going to be for snow removal," said Charles H. Dolan, Jr., Davis's counterpart at the Democratic Governors' Association.

Projections for the cost of state legislative campaigns involve similarly frustrating variables. But, as with gubernatorial races, the costs seem to be rising.

According to an unfinished survey of state leaders by the Democratic State Legislative Leaders Caucus, the average cost of a campaign for the lower chamber is expected to range this year from as little as $300 in New Hampshire to as much as $75,000 in Michigan.

But Carter Hendron, executive director of GOPAC, a political action committee (PAC) that gives campaign funds to Repubican state legislative candidates, points out that some seats in the California Assembly will cost the winning candidates as much as $750,000. Indeed, social activist Tom Hayden spent more than $1 million in 1982 to win his Assembly seat. That year, Common Cause estimates, the average California Assembly seat cost almost $500,000, or more than double the cost in 1980. A Florida House seat, the group said, ran $38,000 on the average in 1980, or 58 percent higher than in 1982.

Legislative campaign costs vary with the nature of the jurisdiction and the sophistication of campaigns waged. Jeffrey M. Wice, who is overseeing the survey of state legislative leaders, says that more candidates are turning to the electronic news media and to pollsters. "The more you try to do those things you haven't done before, the more it is going to cost," Wice said. Similarly, Jeanette Wessel, executive director of the Maryland Republican Party, said that candidates for the state's lower chamber from metropolitan Baltimore would spend nearly twice as much as those from rural counties, in large part because of the increasingly sophisticated character of legislative campaigns.

"One of our delegates pointed out that when he first ran [in 1974] he spent $2,500," Wessel said. "Now he expects his race to cost him $25,000."

Yet William P. Roesing, a GOPAC consultant, contends that the use of electronic media remains extremely rare. The degree to which big dollars are spent at this level, Roesing argues, depends in large part of the willingness of the state party organizations to commit the money for lists, polls and other sophisticated political tools.

"The budgets [for two candidates] may be the same, but a candidate who is working from the same resources can make them go a lot further based on information provided" by the state party, Roesing said.

In any event, the amount spent on state legislative races this year is likely to break records. Wice said the average budget for Democratic state legislative candidates appears to be $10,000-15,000. Similarly, Michael H. Steinmetz, president of the American Legislative Exchange Council PAC, which aids probusiness candidates, estimates that for the 6,400 seats up this year, the average Republican candidate will need $20,000 through the general election, a figure that when added to expected gubernatorial campaign costs, would guarantee a huge increase in statewide and legislative election spending over Alexander's estimate for 1984.

PAC spending in states also may surge. "We are playing catch-up" in the creation of PAC's at the state level, said Jones. "So you are seeing the growth in [the number and spending] of state PACs that you saw in 1979-81 at the federal level." In fact, said the New Jersey Election Law Enforcement Commission, the level of PAC contributions to legislative candidates in the 1983 general election was 50 per cent higher than in 1981.

In most states, candidates are permitted to receive direct contributions from the treasuries of corporations, unions or both, suggesting that further PAC growth at the state level could be contingent on changes in state election law. In a survey published in 1984, the Federal Election Commission found that 18 states permitted unlimited corporate and union contributions; 11 sanctioned unlimited contributions from unions but prohibited corporate contributions; 12 allowed unions and corporations to make limited contributions; 1 permitted unlimited gifts but limited corporate gifts; and 8 plus the District of Columbia forbade direct donations from either unions or corporations.

But it is at the local level that political spending is the hardest to count. The individually small but, in the aggregate, immense expenditures for city council members, district attorneys, mosquito abatement commissioners, county coroners and thousands of other obscure local officials virtually defy systematic calculation. As Alexander conceded, "When we get down to this level, we just wet our fingers and stick them in the air."

As they are revealed, those numbers will bring the unions' political efforts into better focus. The Communications Workers of America, under a similar court requirement in a separate case, calculated that it spent about 11 per cent of its $50 million national budget in 1984 on non-collective bargaining activities; James B. Bowie, the union's secretary-treasurer, estimates that about $2.5 million was devoted to political activities. That figure dwarfs the amount that FEC reporting requirements cover; the union in 1984 reported $121,084 is partisan communications.

For now, all that's firmly available is a question: How much did unions really spend influencing their own members? No one knows for sure, but clearly it was considerable more than the $5.1 million reported to the FEC. Before the Democratic presidential primaries, aides to Sen. John Glenn of Ohio predicted that the AFL-CIO's presi-

dential endorsement would be worth $20 million. That turned out to be about right, said Paul Jensen, who served as the Mondale campaign's liasion to organize labor.

"We scoffed at the $20 million, but what they spent on contacting members and in soft money [contributions] . . . much to my surprise was worth about $20 million" in the primaries and general election combined, said Jensen, who drew up a memo after the campaign estimating labor's contribution.

The figure may even be higher. From interviews at the time, *National Journal*, in an article by Malbin, estimated that unions spent about $11 million in the 1976 presidential race—roughly 10 times the reported communications costs. Alexander estimates that labor spent about $15 million in 1980, also roughly 10 times the reported costs. That same ratio would put the 1984 expenditure at about $45 million, but that is probably high. Alexander estimates labor's 1984 effort on behalf of the Democratic ticket at about $14 million in the general election.

Complicating the calculations is the role of union locals. In many unions, the bulk of political work is done by locals.

Very large locals, such as the food workers' Local 400 in the Washington (D.C.) area, have sophisticated political operations, complete wth their own polls, PACs and full-time political staff. Very small locals may make contributions to statewide or regional union councils that do the work. It is not unusual for union endorsement to be signed by the local president, not the international union president. "There are probably very few unions where the international president is even known by the membership," said union political consultant Victor S. Kamber. "If you're going to impact the voter, it has got to come from someone he knows, respects, trusts."

The food workers union, for example, typically will send a sample endorsement letter to a local, which will personalize it, attach the local president's name at the bottom, send it out and absorb the cost. "Most of the communications we pay for ourselves," said Local 400 president Thomas R. McNutt.

The internationals have no idea what their locals spend on politics. "No one has ever figured it out," said Rachelle Horowitz, political director of the American Federation of Teachers, which has 2,000 locals. "It is mind-boggling."

Even assuming that none of the locals spend more than $2,000 and fail to report it to the FEC or their internationals—neither of which audit the figures—it is likely that locals alone spend several times more than the amounts reported to the FEC as expenditures by all unions. As a rule of thumb, some union officials said about a third of their locals were politically active. If those locals spent an average of only $500 a year on politics, that would add up to about $18 million per election cycle above whatever the international unions spend.

Even if the over-all level of union spending is not clear, the trend is. Spending will continue to rise, as unions adopt more of the sophisticated political technology that many first seriously employed in 1984—polling, direct mail and media tools such as teleconferences for communicating with their members.

What business spends on influencing its managerial employees is also a mystery, although the effort is not anywhere as elaborate as labor's. Only six business and trade associations reported any partisan communications (to the tune of almost $94,000) during the 1983-84 election cycle.

Independent interest groups, such as environmentalists and nuclear freeze advocates, reported spending $1.1 million lobbying their members, with about $1 million of that coming from the National Rifle Association.

NONPROFIT POLITICOS

Like unions, nonprofit organizations on both sides of the ideological spectrum significantly increased their political role in the 1984 elections. That role is certain to continue growing, as party and interest-group tacticians devise new ways to employ the nonprofit status for political and quasi-political purposes. But exactly how large their role has or will become is unknown, because the groups are not required to disclose expenditures that may have political ramifications.

In the 1984 elections, the main focus of political activity by nonprofit organizations was voter registration. From the start of the presidential campaign, Democrats and liberal organizations had banked their hopes for an upset of Reagan on registering millions of dispossessed low-income, minority and women voters who presumably opposed the President and his policies.

With the Democratic Party strapped for funds, much of the voter registration work on the liberal side was undertaken by private groups financed by nonprofit foundations. In the summer of 1983, a group of traditionally left-of-center foundations set up the Ad Hoc Funders' Committee for Voter Registration and Education to funnel money to groups that were seeking to register the "underrepresented." According to the committee's own final tabulation, it distributed $6.6 million to 125 groups that were conducting voter registration drives over the two-year election cycle.

That represented the bulk of the money spent on voter registration by liberal groups, according to a source familiar with the activity. The source said three other organizations provided about $2.1 million for voter registration, bringing total private expenditures on voter registration near $9 million.

The Republican voter registration drive was the reverse of the Democatic one. Most of the effort was run directly by the party organization. The GOP organized a sophisticated $10 million voter program, financed by $4 million contributions each from the Reagan reelection campaign and the Republican National committee and $2 million raised from private sources by Leadership '84, a fund-raising company established by Joe Rodgers, who chaired the Reagan-Bush '84 primary fund-raising committee.

Rodgers also established Americans for Responsibile Government, which gave about $2 million to registration programs, aimed at groups sympathetic to the President. The two major grant recipients, and the two major conservative groups signing up new voters, were the American Coalition for Traditional Values, a coalition of conservative evangelical organizations that was financed with slightly more than $1 million from Rodgers's group, and the American Defense Foundation, which sought to sign up men and women in the armed services.

Another group Rodgers established, the Responsible Government for America Foundation, trained trade associations to conduct their own voter registration programs. Business voter registration activity was greater than is commonly assumed, said a Washington attorney familiar with the efforts, but exactly how big is another mystery. A trade association executive said their group spent more than $300,000 in registering its members and urging them to support Reagan in the 1984 election. Among the companies and groups that undertook major voter registration programs, were PepsiCo Inc., the National Federation of Independent Business and the National Association of Wholesaler-Distributors.

Sources on both sides of the spectrum say the level of nonprofit voter registration activitiy in 1986 won't be anything near that of 1984, when the presidential race attracted large donors. But conservative and liberal nonprofit groups appear committed to long-term iuvolvment in voter registration activities, and another major push is certain in 1988.

In the meantime, the use of nonprofit status for political purposes is continuing to expand in new directions. An increasing number of politicians have established nonprofit foundations to develop and promote their ideas. Critics complain that the new foundations also promote the politicians themselves.

"Political foundations are the new game," said Ellen S. Miller, executive director of the Center for Responsive Politics, which is studying the role of nonprofit groups in politics. "Current and former Members of Congress who are still operating in the political arena are using these organizations to keep their names associated with issues. Whether they are used as funnels for political funds, ways to curry favor with Members, remains to be seen. At this time, we don't know what the full roster is. I was told by one source [involved in setting them up] that there are over 200 of them."

Several likely 1988 presidential candidates have established foundations with budgets reaching into the hundreds of thousands annually. The group's activities tend to showcase their principal. The Fund for an American Renaissance, established by Rep. Jack J. Kemp, R-N.Y., paid for his recent European trip, a tour through Asia last fall and a series of Capitol Hill seminars. The Center for a New Democracy, set up by Sen. Gary Hart, D-Colo., has sponsored a series of Hart-chaired seminars around the country. American Horizons, a group associated with Arizona Democratic Gov. Bruce E. Babbitt, has done research for major Babbitt speeches on immigration, international debt and other issues. Such foundations are rapidly becoming a fixture of the extended pre-primary presidential campaign, an alternative or supplement to establishing a PAC associated with the potential candidate.

PAC COSTS

One of the clearest trends in political spending is the continued growth of PACs. As recently as the 1979-80 cycle, PACs collected about $138 million; in the 1983-84 cycle, they collected $288.7 million.

But that number doesn't represent the full spending on PACs. PACs connected to parent organizations—such as a business, union or trade associations—are not required to report the money they spend raising their funds. Those expenditures are made directly from union or corporate treasuries, and interviews indicate that they represent substantial additional hidden political spending.

PACs not connected with an organization—such as independent ideological PACs—cannot pass off their administrative and fund-raising costs to a parent body, and so much report them. Because those groups typically rely on direct mail, generally the most expensive way of raising PAC money,

their administrative costs are substantial. Some of the largest conservative PACs, for example, spend more than 80 per cent of their funds on overhead. (See NJ, 6/29/85. p. 1504.)

By and large, practitioners say, business, labor and trade associations do not spend nearly as much on administrative costs. But for some organizations, administrative expenses can approach that level.

Peter Kennerdell, director of program development at the Public Affairs Council, a business group, said a company establishing a PAC can expect to spend two or three times as much as it collects in the first year. Fixed administrative costs can also be high for smaller PACs, those in the $40,000-$50,000 range. Trade associations that use direct mail—which most unions and businesses don't—also devote significant sums to fund raising. Moreover, he said, administrative costs are large in companies that create program to involve workers in the PAC activities, such as holding advisory meetings. "As we see corporate PACs becoming more democratized," he said, "the more it is going to cost."

But for most labor and business organizations, the costs are not that large. Many unions, and some businesses, have been able to establish payroll checkoffs for their PAC contributions, which substantially reduces fund-raising costs. Other companies might produce relatively unsophisticated solicitations internally, distribute them through in-house mail and require only a clerical aide to keep the books, all at relatively low cost. And the fixed costs for staff and space are less burdensome to larger PACs.

"There's really no rule, given the undefined territory, to get any particular number (being spent) to raise PAC dollars," said Michael Colopy, manager of congressional communications for the Blue Cross & Blue Shield Association in Washington. Many organizations don't even know exactly what they spend raising PAC money.

But several PAC executives and election lawyers said a conservative estimate for the administrative costs of most PACs would be 10-20 per cent. If the unions, trade associations and businesses that raised $186 million for PACs during the past election spent an average of 15 cents on the dollar to collect the money, that would represent another $28 million in unreported political spending.

COUNTING HARD DOLLARS

How much does America spend on politics? A partial answer is the amount of money that federal candidates, political action committees and political parties absorb in contributions from the rest of society. When added to the public financing of presidential races, those numbers measure the hard dollars—money subject to Federal Election Commission (FEC) reporting requirements and contribution limits—spent on federal elections. When transfer between the committees, PACs and candidates are accounted for (an exercise not performed by the FEC), the total for the 1983-84 election cycle was $1.155 billion. All figures are in millions.

| | |
|---|---|
| Congressional candidates: | |
| 1984 House and Senate candidates | $397.2 |
| 1986 Senate candidates | 7.6 |
| Total congressional | 404.8 |
| Party activity: | |
| Democratic committees | 98.6 |
| Net transfers to state parties | −3.3 |
| Total Democratic Party | 95.3 |
| Republican committees | 297.9 |
| Net transfers to state parties | −4.3 |
| Total Republican Party | 293.6 |
| Total parties | 388.9 |
| Political action committees | 288.7 |
| Independent expenditures | 23.4 |
| Presidential primary expenditures | 106.0 |
| Presidential general election | 80.8 |
| Partisan communications by labor, business and groups | 6.4 |
| Net PAC contributions to House and Senate candidates | −105.3 |
| Net PAC contributions to parties | −8.2 |
| Net PAC contributions to presidential candidates | −1.3 |
| Net PAC independent expenditures | −22.2 |
| Net party contributions to House and Senate candidates | −6.6 |
| Total hard money expenditures on federal elections | 1,155.4 |

HONEST GRAFT

(By Brooks Jackson)

[Excerpts]

The full extent of Coelho's soft-money dependence remained secret as well. He disclosed much of his soft-money income during 1986. But much remained hidden, and he refused a request to make a full public accounting. Nevertheless, a series of memoranda from Martin Franks gave some revealing views of what was going on during the 1986 campaigns.

Franks described soft-money collections for the Capital Trust, a project begun in February 1986. Coelho went to the annual winter meeting of the AFL-CIO in Bal Harbor, Florida. He met with the presidents of one union after another, over breakfasts, lunches, and dinners. He asked each one to pledge $100,000 to his committee during the year. He called it the Florida Project at first.

The Capital Trust project represented only part of the soft money that fueled Coelho's campaign committee, but it was especially important. Indirectly, the funds subsidized the campaigns of Democratic candidates who used the party's television studio.

Coelho wanted a studio because the Republicans had one. But he couldn't pay for it the way the National Republican Congressional Committee financed its own much smaller facility years earlier. The NRCC spent only hard money to buy its electronic equipment. At the time it didn't need soft money. Besides, GOP attorneys said it would be hard to defend using "nonfederal" money to finance a studio employed solely to make television and radio commercials for use in House campaigns.

Republican lawyers weren't nearly so venturesome as Coelho. He paid for studio equipment with soft-money donations, in this case using a loophole for "building funds." Republicans has argued successfully to the FEC that money spent to renovate new office quarters for the party had no connection with any specific federal election and so didn't qualify as a campaign expenditure subject to federal limits. The GOP raised $7 million for a new headquarters building in 1977, all fully disclosed, with no donation larger than $10,000.

Mr. McCONNELL. Mr. President, I just wish to say, in conclusion, that I remain optimistic, as the discussions begin, that in the near future we will be able to craft a bipartisan campaign finance reform bill. I think everybody is going into the discussions in the spirit of cooperation. I look forward to participating on that team and reaching, hopefully, a happy conclusion sometimes in the weeks ahead.

I yield the floor.

Mr. BOREN. Mr. President, I have listened with interest as my colleagues on the other side have commented this morning. I am glad that they have come to the floor to comment, so we can have further discussion of the legislation that is pending before us. It is landmark legislation and, as one who has worked on this proposal for a number of years, I am encouraged that we now have the issue on the national agenda.

We first began this discussion several years ago, I believe it is 9 years ago now, when the distinguished senior Senator from the State of Arizona at that time, Senator Goldwater, and I made a proposal to change the way that we finance elections. We were alarmed at that time about the growing movement away from the grassroots, of the way campaign funds were raised. We were alarmed at the rapid increase in campaign spending. We were alarmed about the increase of special interest influence. We felt it was eroding the political system, the very strength of our system. We felt it was causing increased cynicism among the voters. I certainly think we have found indication after indication that that cynicism is present.

The election turnouts is congressional elections are below the 30-percent mark. We barely reach 50 percent in the Presidential election process of registered voters turning out in our country, at a time in which other nations, new democracies emerging democracies around the world, those places where there has been very little experience with democracy—we have had turnouts in places like Poland and places like Nicaragua, East Germany, in the 90, to 95 percent range of registered voters. We have had turnouts in elections, even in areas of the world which are still experiencing upheaval and violence, in El Salvador, for example, two different elections carried out under threat and intimidation of violence, loss of life, where approximately 80 percent of the registered voters, those eligible to vote, have bravely gone to the polls, even at risk of their very lives, to cast their ballots. While we here in the United States, in increasing numbers, are staying away from the polls, not participating in the political process. Many of us have been very concerned about it.

The legitimacy of our Government, the mandate for the leaders of our Government to operate, of course, rests completely on the consent of the governed and the participation of the people themselves in the political process.

What a great system of Government we have. It is a model and a beacon for the rest of the world. When the students and others who gathered in Tiananmen Square wanted to find an example, an example to hold up, a symbolic expression of what it was they were fighting for, they chose our symbol, they chose the Goddess of Liberty.

Lech Walesa, as he struggled to explain to the rest of the world the basis of the political system that they were struggling to set up in Poland, used our words, "We the people."

We want a Government where the people can govern themselves. Sadly, as I have said over the last few years, we have seen fewer and fewer people participating in their own process.

Why have fewer and fewer people chosen to participate? The nature of the election process, Mr. President, has a lot to do with that. People see the influence of money. They see that elections are more and more being determined by the amount of money that the candidates on each side can raise, rather than their position on issues, substantive proposals to solve the Nation's problems, experience, qualifications and character of the candidates. More and more those major items, those items which should be deciding elections, discussions of the issues of the day, taking positions on the issues of the day, charting a course with a vision for the future of their country, for State and local government, those matters take a back seat in the election.

Elections more and more are decided upon the basis of which candidate is able to raise the most money to finance a campaign, instead of upon the basis of which candidate has the best ideas to help this country and the best capabilities and qualifications for putting those ideas into action.

So, Mr. President, people become discouraged. They notice, for example, that in election after election well over 90 percent of those elected to office are those candidates that are able to raise the most money to do so.

They look at our system and they see the challengers are being frozen out of the process, people with new ideas, people that want to come forward and make a contribution. Why are they being frozen out of the process? Why do we have a 98 percent reelection rate in the House of Representatives in the last election cycle, and 99 percent the cycle before that?

It is because incumbents are able to raise so much more money than challengers. The facts speak for themselves. $2.05 raised by every incumbent running for reelection in Congress in the last election cycle for every $1 the challenger was able to raise.

Why is that, Mr. President? Well, it is very obvious to those who study the political system. Those Members of Congress who are incumbents, who are here already serving on the key committees, already chairing the key subcommittees, serving as ranking members of the key subcommittees and committees of the Congress, people need access to them, people need a listening ear. People need to have a sympathetic reaction from those that are already here. So those who have economic interest in legislation, for example, have the need to communicate with and have access to those that are already here, and therefore they contribute to those that are already here, occupying these positions in the Government.

There is always an opportunity for them, if the challenger happens to pull an upset and defeat an incumbent Member of Congress, to contribute to that new, winning candidate after the election, because challengers invariably have deficits when they become successful in the races to become Members of the House or the Senate.

Mr. President, to use an old-fashioned term, that is flat wrong. It is a distortion of the political system. We should not allow it to continue. This should be a system in which people have an opportunity to compete and people, new people, wanting to come into the process, with new ideas that our country needs, should he be able to have an equal chance.

They do not have an equal chance now. As long as we do not put a limit on the amount of money that can be spent in campaigns, as long as we do not stop this runaway race for money, the spending spiral ever upward, like a never ending arms race, we are never going to have a system in which challengers have a fair chance to come to the Congress of the United States or to this body, which has been called the greatest deliberative body in the history of the world.

Mr. President, we are trustees of this institution. You can look around this floor and we see guides bring tourists into this Capitol. We bring young people ourselves down on to the floor of the Senate. We look around and we point out the desks where the giants of the past have served on this floor. We point out where the Clays and the Calhouns and the Websters and the Jefferson Davises and the Tafts and the Humphreys, those who have served with distinction, and loved this country, and kept this institution strong, have served.

We are here now. We are the trustees. We have a responsibility to keep this institution strong. We cannot allow it to drift into mediocrity. We cannot allow it to drift into becoming an institution where the schedule even of the institution is set not on the basis of solving the people's problems, but on the basis of the need to raise money to run for reelection.

We are not taking votes on Friday, Mr. President. We do not take votes, usually, on Monday, not until late in the day. And, we do not have evening sessions on Monday nights. I wonder how many of the American people know why. I wonder if they know it has nothing to do with the fact that we have pressing problems facing this Nation. We have a budget deficit that is destroying this country, eating away at the heart of this country and everyone knows it.

We have the congressional leaders and the Preisdent meeting together and hopefully they will have the courage to do what is right. I hope we will have the courage to quit playing politics with it and respond, if they have the courage to come forward with a proposal that calls on all of us, all Americans, all of our constituents, to share in some fair and equitable bill to get it under control. Because we know what we are doing. We are living beyond our means, we are selling off the assets of our country and our children and grandchildren will have the privilege of working for people from other countries, who are going to own the basic industrial base of this country one of these days if we do not wake up and do something about it.

We do not meet on Mondays for votes, and we do not meet on Fridays for votes, and Monday evening to work on that problem. No, Mr. President. Why? We have to schedule fundraisers on those evenings and on those days. Because as we all know with this campaign spending, with it taking an average of $4.5 million from a small State—not a major State like New York or California, from a small State—to run successfully for the U.S. Senate, that means that a sitting U.S. Senator or a challenger has to raise an average of $15,000 in campaign contributions every single week without exception for 6 long years to raise the average amount of money that it takes to run for the U.S. Senate.

I guess, Mr. President, if we could run a tracer right now where most of our colleagues are, as we discuss this matter in this Chamber right now, we would find out quite a few of them are out trying to figure out a way to raise the $15,000 they need to raise this week in order to get ready to successfully run for reelection.

Mr. President, we are trustees of this institution. We were sent here by our people to solve the Nation's problems, not to perpetuate ourselves in office, not to raise campaign funds, but to do the people's business. We will be derelict in our duty to the Constitution we

are sworn to uphold and our duty as trustees of this institution if we fail to act this year to do something to halt the cancer that is eating away at the heart and vitality of our political system.

Yes, it is hard for challengers when incumbents can raise $2.05 for every dollar they can raise. It is very hard for them.

It is also hard when we look at the fact that 82 percent of the money from political action committees last time went to incumbents as opposed to challengers; that over half the Members of Congress elected last time received more than half of their funds from interest groups, political action committees located outside their home States, rather than from the people back home.

So the electorate looks at the facts. They look at the fact that people who raise more money invariably tend to win elections. That is what the statistics show. They look at the fact that more and more of the money is coming not from the people back home from people outside the States and the districts. They look at the fact that more and more of the money is coming from special interest groups, and they become disillusioned about the process.

Then that massive amount of money as it is spent in many campaigns is spent more and more not on a discussion of the issues, Mr. President, but to purchase 30-second negative spots in the broadcast media with actors—not the candidates themselves—with actors, and usually voices of professional actors that can be filled with indignation as they report some accusation against the other candidate that usually borders on character assassination, as one negative ad piles on another negative ad for 30-second spots during which short time you cannot possibly have a fundamental discussion of the issues facing the country.

And we are surprised that 30 percent of the people turn out in congressional elections and half the number turn out in Presidential elections in our country as turned out in countries like Nicaragua and East Germany. People in Eastern Europe have looked up to the United States and described us as a beacon of inspiration.

Mr. President, we should be. Our system deserves to be an inspiration for others. We can only be grateful for all it has provided for every American citizen, the opportunity it has given us to express ourselves, to chart our own course as a people, to determine our own destiny, to have unlimited opportunities as individuals to make choices about our own lives. Other people do not have those opportunities. We do because we have had a system that has worked, a system that has been true to the democratic process. We must not let that system atrophy and decay.

We must not allow the vitality to be drained out of a great institution like the Senate of the United States, the Congress of the United States. We owe it to the next generation. We have had parents and grandparents who cared enough about us that they made great sacrifices for us and gave us a great opportunity. We have had those who served, the giants who served in this Chamber in the past. We owe it to them, what they provided for us, to do for the next generation. We must meet our responsibilities. We must have true reform.

I am not talking about passing the bill with the title on it that says "campaign finance reform." I am not talking about the sham. I am not talking about going back to the people and say, "Well, we have passed the bill that is campaign reform this year. We can forget all about it."

Mr. President, I say it not unkindly, because I hope more than anyone we can reach a bipartisan agreement on this issue before our discussions are completed, because it is not a Democrat or Republican problem, it is an American problem. We should be ashamed of ourselves if any of us on either side of the aisle tries to write the bill the purpose of which would be to aid the Democratic Party or aid the Republican Party.

We need to pass a bill that aids this country, that saves this political process, Mr. President. That is what we need to do. That is what we must do. That is why we must not allow ourselves just for the sake of being able to go home and put out the press release and stand before audiences and say well, we passed something and it had "campaign reform" written on the title of the bill.

It will not be true campaign reform, Mr. President, unless it gets at the heart of what needs to be done to change this system. And the heart and soul of campaign reform is to get the runaway spending under control. It is to stop the money chase. It is to stop the upward spiral of spending. It is to enable us to change the Senate schedule back to conducting the people's business instead of having the schedule set by the need to raise millions and millions of dollars of campaign funds in order to get reelected.

It is the changing of the perception of this institution. Mr. President, as long as Members of the Senate have to go out and raise $3, $4, $5, $10, $20 million, there is always going to be the perception on the part of the people that they were so desperate, those candidates, to get the money, they would get it wherever they could, from people who were honest and people who were dishonest, from people they do not even know about.

There is not a Senator who is a Member of this body, Mr. President, who has not in the course of raising campaign funds, when we have to raise so many millions of dollars, had to accept contributions from people we do not know very well, personally, at all. We do not have the FBI or CIA at our disposal to go out and check the background of every person offering us a campaign contribution.

Most of us, because of economic conditions in our home States, cannot raise the amount of money needed in our home States. We have to go to other States where we do not know people very well. Members can be embarrassed when later it turns out some of the people making contributions might not be very wholesome, might have a special interest, might have an ax to grind about legislation and then it is all over the media and the front pages of the paper, and questions are raised about the integrity not only of the person making the contribution but the integrity of the public official involved because he had to accept money in order to raise those huge amounts of money needed for campaigns that he could not possibly know the identities or very much about all the people from whom the money was being accepted.

Mr. President, the people read that and they say I wonder what kind of people are serving in public office today. What kind of people are serving in Congress? Are they all corrupt? Are all the people who run for office today corrupt? And, if so, why even bother to go and vote? And that is what is happening today, Mr. President.

So we have to cleanse this system. We have to do something about it. We have to produce the bill.

We have heard the voice of the people about this. We have heard them speak by staying at home during elections. We have heard them speak through letters saying do something about it. We have heard them speak through petitions which they have signed. We have read the public opinion polls in which 80 percent of the American people say: Do something about runaway campaign spending. Stop the money chase.

Mr. President, we are ready to do that, and we have introduced the bill to do it. We have 46 Senators signed on to the substitute for S. 137. Others have verbally told me they would help us. The majority of the Senate is ready to act. Let us not stop this year the work of the Senate until we have acted, until we have passed the bill to limit the runaway spending. That is the heart of the issue.

If we try to pass a bill that says you just cannot get money from this source or this other source but you can still get it otherwise, and there is no limit on the spending. All in the

world we will do is just change where the money chase is located.

If we say only you cannot get money from political action committees or you cannot get money from certain individuals but there is no limit on how much you can get, then we will just change it. Then it will be the money race for soft money or it will be the money race to use the State party committee or someplace else. It will be like the little child who steps on that tarpaulin under which there are a lot of golf balls and jumps up and down. When they jump on this corner the other corner pops up.

We do not need the sham. We need real reform. We must do it, and the only way to get real reform is to put total spending under control. That is the only way to get us back working on the Nation's business. It is the only way to stop the perception with all the money the Members have to raise they will raise it wherever they can. It is the only way to stop the problem of challengers not having a chance. It is the only way to make sure that special interests do not give undue advantage to incumbents. That is the only way to do it. We have to get the total spending under control and do something to get it limited and we have introduced a bill to do that.

We need to change the nature of campaigns themselves. We need to encourage candidates to not just buy 30-second spots to use for character assassination of their opponents. We need to encourage them to buy longer time slots to have substantial discussion of the issues.

We have done that in our substitute for S. 137 by providing vouchers for candidates to buy longer blocks of time. We also provide, and this has been the suggestion of the Senator from Missouri [Mr. DANFORTH] from the other side of the aisle—it is the gesture of our willingness to consider and include good ideas from the other sides of the aisle—the suggestion that at the end of any spot that the candidate must asume responsibility for that particular advertisement by coming on to it and saying: I, or my campaign committee, have authorized this particular ad.

So if you have some impersonal actor assassinating the character of and slandering another candidate, at least the candidate who is paying for it, and he is responsible for it, has to come forward and he or she has to own up to it and assume responsibility for it. Maybe they would not run some of those ads if they knew they had to be proud enough of them to assume responsibility themselves. So we need to clean up the process, and we have done that.

Under our proposal we have also stopped, in terms of contributions to candidates, contributions by political action committees. Some balance has to be put back into the process. We have suggested earlier that we limit the proportion that can come from political action committees so you could not have people elected here that got 80 or 90 percent of their funds from political action committees. The most important part of it is to get some balance back into it.

I do not happen to accept political action committee contributions at all. I never have. I followed that policy all of my career. Others of my colleagues and especially if they get into close races really do not have much choice about it. I have to say, if I got into a close race, or someone filed against me who had $10 million of their own money to spend, in self-defense I probably would have to accept the PAC money, too. And there are different kinds of political action committees too. There are some, where the Members really do make the decisions, where hundreds of employees in a person's home State get together and really form this association. They really hear the candidates and they sit down and they deliberate.

Then there are other political action committees that are not so wholesome where maybe just the lobbyist in Washington decides to whom to hand the money based strictly on how they vote on the issues and their need for access to that Member of Congress.

The important thing is we shift the balance, we get more influence to the people back home, the individual contributor at the grassroots. We do that. We do not allow under our bill political action committees to continue to contribute to Federal campaigns for candidates. We also encourage, through the flexible spending limit proposal, that over and above the amount of money normally allowed to be raised and spent in campaigns, additional funds are allowed to be raised from individuals in contributions of $100 or less in the home State of that particular candidate.

So we encourage renewal of the system, participation by the small contributors to grassroots, that person who is participating by giving contributions but not by giving contributions so large that they have been an undue influence.

So, Mr. President, we do something about the incumbent challenger's problem by the spending limits; we do something abut the special interest influence; we do something about the overall spending; we do something about the nature of the campaigns to get us back on the issues. We need the help of the American people.

All 100 Members of the U.S. Senate are incumbents. It is very natural that a group of people already in office would be reluctant in terms of their own self-interest to change a system that benefits them so clearly as the present system benefits incumbents. As long as the race is on the basis of money, the ability of incumbents is always much greater. It does not matter whether they are Democrats or Republicans.

So we need to hear from the American people. We need to hear from the American people that they want change. Unless we hear from the American people, we are never going to get those who are already entrenched in office to agree to give up some of the privileges they now have in order to make the process more competitive. Forty-six of us who have introduced this substitute, S. 137, said to the American people we have heard you, we have heard your pleas to clean up this election system. We have heard your pleas to end this rotten mess. We have heard your pleas to stop the money chase, to try to squeeze some of this money out of politics and get competition back on to issues. Now we need your help. We need your help in order to pass real campaign reform through the U.S. Senate this year.

Mr. President, I have heard some of my colleagues speak this morning, and I think in many ways they have an honest misunderstanding about what is in the substitute to S. 137. The Senator from Kentucky indicated that he believed that the bill might be unconstitutional. I listened to his argument. I have to say that I do not agree with the argument. I do not believe that this bill is unconstitutional.

The Supreme Court in Buckley versus Valeo says there could not be a direct prohibition on spending above a certain level; that you could not pass a law saying no candidate for the Senate can spend over $x$ dollars directly. It did not say you cannot give inducements to candidates to voluntarily accept spending limits. That is exactly what the Presidential system does, as the Senator from Kentucky indicated.

The Presidential system has not been overturned by the judiciary. Candidates running for President of the United States do not get the voluntary money from the checkoff system unless they abide by certain rules about private fundraising and spending. Therefore, Mr. President, I think that the court has allowed such a system of voluntry inducements and voluntary incentives to stand. I do not think we have a constitutional problem with this bill.

I heard my good friend, the Senator from Pennsylvania [Mr. SPECTER] here on the floor. I was very encouraged because he indicated he understood that too much spending is the heart of the problem, too much raising of too much money is the heart of the problem. He said he was not sure S. 137 was the way to go, but he himself supported a constitutional amendment to overturn the Buckley decision and to allow by

constitutional amendment the Congress to put on direct spending limits.

Mr. President, I do not disagree with the approach of a constitutional amendment. I myself have cosponsored a constitutional amendment from time to time to allow us to overturn the Buckley case and to impose direct limits.

I point out to my good friend, the Senator from Pennsylvania, as he reads my remarks in the RECORD, that even if a constitutional amendment were to be adopted by the people, the Congress would then have to come together and meet and vote as to what those limits would be and how those rules would be carried out. In other words, we would have to come right back together and it would probably take 6 or 7 or 10 years to get a constitutional amendment ratified by the States. And then after that, we would have to go back and do it all over again in the Congress. We would have to pass a bill patterned on something like S. 137 because we would then have to legislate what the limits would be and what the rules would be.

Mr. President, let us not delay. Let us do that job now. Let us go ahead, as we have in this bill, and establish what the limits will be and establish what the rules will be. Then, as the Senator from Pennsylvania has indicated, if he and others—and I would be happy to be a part of that effort—can get a constitutional amendment passed also, we will already have the implementing legislation. We will already have the rules set. We will already have the limits set, but we cannot wait another 10 years, Mr. President.

When I came to this Chamber 12 years ago, the average amount of money spent by a successful candidate for the U.S. Senate in an average size State was $600,000. That was 12 years ago—$600,000. Now it is $4.5 million, in the last election cycle 10 years later. In 10 years, we went from $600,000 to $4.5 million, a 400-percent increase over and above inflation.

We hear about cost of broadcasting and the rest. We are talking about a 400-percent increase over and above the costs of campaigns. That is how much they have gone up. We are talking about a sevenfold increase.

How long are we going to wait, Mr. President? Are we going to wait until it takes an average of $10 million to run for the Senate or $20 million to run for the Senate? We cannot afford to wait.

We are trustees, as I said in the beginning. We cannot afford to wait any longer. We owe it to the American people not to wait. If we do not get this enacted this year, we should go home and hang our heads in shame, and we ought to let the American people know exactly what is happening to their Congress and their Senate. It is not ours. It does not belong to incumbents.

The rules for the political system should not be written to benefit temporary occupants of these offices. These offices belong to the people, not to us. We owe them better than they have gotten from us over the last several years in terms of the rules under which campaigns are operating.

I heard my good friend and colleague, and he is my good friend, and we have worked together constructively on many, many matters, and I value that relationship. My colleague from Oklahoma said he understood our bill to be one which provides taxpayer financing, Government funds financing for candidates.

I should clear that up in this particular bill. That is under the jurisdiction of the House Ways and Means Committee and the Senate Finance Committee. They will have to set up the mechanism to provide these inducements. For example, the additional television time, lower mailing rates and other inducements would be funded. We have indicated it is our intention to fund it under a voluntary checkoff which the taxpayer would check on the tax return which would be an additional amount over and above what they already owe in taxes. That is my assumption. That is what I personally support.

If my view of it were carried out when this bill would be marked up, if we pass this legislation, it would then be the responsibility of the Finance Committee, the Ways and Means Committee and others to set the actual checkoff mechanism. If my ways of thinking was to prevail, we would not be coercing taxpayers to give the money. It would be a voluntary, additional contribution, if you want to call it that, by the American people. They can check it off and pay an additional $6 in taxes or check it and not pay.

We provide in this bill, if not enough money came in through the voluntary process, that the amount of money to help with mailing rates, television time, the rest of it going to candidates would be proportionately reduced. So it is not mandatory, appropriated Government funds that we are talking about. It is a voluntary system.

I believe, Mr. President, the American people love this system enough that they would check it off in substantial numbers. I think they would say $6 is not too much to pay for cleaning up the mess that we now have in the political process for having our Senators on the floor voting on Fridays and Mondays and maybe even being in session on Monday evening doing the peoples' work, getting rid of this appearance of special interest influence.

So it is not fair to say we are talking about mandatory appropriated tax dollars that taxpayers do not have any choice about whether to give or not. We are not talking about that. The bill makes it very clear there will be a proportional reduction in the amount going to candidates if the voluntary checkoff does not bring in sufficient funds to cover it.

Mr. President, there was also an indication from several of the speakers today—and it shows a clear misunderstanding of what our bill provides—that we have opened up some sort of a loophole for political action committees, particularly, as has been said on the other side of the aisle for labor unions—but the same would apply to corporations—to provide funds to State parties.

Mr. President, let us look at the record. Under the current law, labor unions and corporations can directly give money to State parties unless it is prohibited by State law, and in most States it is not, in unlimited amounts. It is called soft money to State party committees.

Let us say you have an election where someone is running for Governor, the legislature or State office. You have 20 State candidates in the ballot and you have Federal and State candidates. It is called mixed activity. When the State party sets up the phone bank or buys ads saying vote Republican or Democratic, that is going to benefit both the State candidates running for State office and the Federal candidates.

Under current law, corporations, labor unions, and individuals can give any amount of money to that process that they want to in terms of soft money to these State party contributions and millions of dollars have been flooding in, some say as much as $45 million to $60 million undisclosed, unreported. Some can come directly from labor unions and corporations.

Mr. President, under the proposal that has come from the other side of the aisle, they still allow it. It is so ironic. They have indicated that they think S. 137 has some sort of a loophole because we allow a labor union, a political action committee to give not more than $15,000 to a State party for mixed activity. Notice that is what we do. We limit. They can only give $15,000. They could not—a labor union or a corporation—give directly like they can now give any amount of money they want.

We say we are going to clean that up. If a labor union or corporation wants to give to a State party for mixed activity $15,000, they have to do it through their political action committee and disclose it. They cannot give it directly out of the union treasury or corporate treasury. That limits it. Yet those on the other side of the aisle have said that is some kind of a loophole. It is not a loophole. It closes a loophole. Their bill allows a labor

union to directly give money, any amount they want, to a State party organization.

I would be happy to give them technical advice on how to close that loophole. I am sure they will be astonished to know what their own bill does. They allow unions and corporations to give unlimited amount of money to State organizations. We stop it for both. I said we should not be writing a bill to help one party over another. We should not be writing a bill to help labor unions over corporations, and vice versa. We close the loophole for both.

What about sewer money? They are right. I would call it sewer money as well. There is no limitation whatsoever. What about it? We stop it. As I say, we stop it with labor unions and corporations. We put a limit on how much the individual can give to all the State party organizations in the country, and they say they cannot spend more than 30-cents-per-voter total on these kinds of mixed activities.

What do they provide on the other side? No limit. The sky is the limit. They can spend as much of the sewer money as they want on these mixed activities.

They only restate current law, which all of us know has not worked. When soft money pours into the State committee, they are supposed to allocate how much was sent to help candidates for Governor, State legislature, State auditor, and all of the other offices. If there are 25 State candidates on the ballot, one Federal, they say 25 times as much went to help the State candidate and we let the millions of dollars pour in. It is unlimited soft money under their bill, and it comes directly from labor unions and corporations. We disclose it. We put a limit on it. We put a 30-percent limit on it. We put a limit of how much an individual can give. We put a limit of how much any labor union or corporation can give and make them do it through their committees and not directly out of corporate funds.

Here is something else, Mr. President. This is very alarming. I have to hope that there are those on the other side of the aisle who have not understood what they have been doing, but they have created a situation that is far worse than current law. We have been talking about what has been going on with current law. Mr. President, they have created a situation here that is far, far worse than current law in terms of how much money wealthy individuals can give to influence the political process.

This is a reform that goes all the way back to the Watergate period. They are undoing reforms that were made in the aftermath of the Watergate period. Surely, they do not know what they have done.

Mr. President, I hope they will read, and I certainly hope that the American people will read, and I hope that the media will inform the American people, because I have not seen it anywhere, page 24 of the bill that they have introduced, S. 2595, section 122. At the current time, an individual can give only $25,000 total to a national party committee, State party committees, or to Federal candidates. So if I want to give some money to the Oklahoma Democratic or Republican Party, I want to give some money to the Democratic or Republican Senate campaign committee or the Democratic National Committee or the Republican National Committee, and I want to give some money to eight different candidates running for the Senate nationwide, I can give $25,000 a year total to all of those people, all of them combined, $25,000.

They amend the current law and they say, no, no, no longer will there be a $25,000 limitation on how much that wealthy individual can give. We will repeal current law limits and we will say you can give $20,000 to any national party committee. There are three of those. The House campaign committee, in essence, the Senate campaign committee and the national committee, Democratic and Republican. That is $60,000. Then you can give $5,000 to every single State party in addition each year. That is $5,000 times 51. You add that up. And then you can give another $25,000 to individual candidates.

So what they have done, I hope inadvertently, is taken the current law that an individual, to all these entities, can only give a total of $25,000 this year, and they have changed that to $340,000 per individual per year. That means in a 2-year election cycle a wealthy individual could give $680,000 instead of the current $25,000. It means, if his spouse will join him, the spouse and the individual together, this very wealthy couple, who can now give a maximum of only $50,000 to all these entities, under their bill, masquerading as a reform, can give $1,360,000.

That is a reform, Mr. President? That is a reform? It is not a reform. It is a loophole, one of the biggest loopholes I have ever seen in my legislative career.

When I first went to the State legislature in Oklahoma, we had an elderly Member of the legislature who read every word of every bill—probably the only member of any legislative body in history who has ever done that. We all should. He had an expression when he did find something like that—and if there was something in a bill, he would find it—he would get up and say, "I found another wooleybooger."

That is exactly what we have here, one of the worst I have ever seen. You talk about a loophole. It has to be closed.

So, Mr. President, there are problems. I think there are those on the other side who honestly misunderstood what we have talked about, the voluntary nature of inducements provided to candidates. We have not talked about mandatory appropriations of taxpayers' dollars.

I think they have understood what we have talked about in terms of soft money because we have closed the loophole. On the other hand, they have opened the loophole. If they are concerned about labor unions—and we heard them talk about labor unions for most of the time this morning—it is not our bill that allows labor unions to give unlimited amounts of money into campaigns directly out of the union treasury. No. It is theirs. They allow unlimited amounts to go just as they do from corporations. We do not. We put a $15,000 limitation on it. It is fully disclosed. We put a limitation on how much that State party can spend on mixed activities.

Mr. President, we have to hope that there have been some misunderstandings that can be cleared up. We have to hope that they did not really intend to allow that wealthy couple that is now limited to $50,000 in campaign contributions to give $1,360,000 per election cycle. We have to hope that they did not really intend that.

They have talked about constitutionality. I know they understand that the courts have at least given rulings that could be interpreted, I believe, in saying it is very difficult to limit the right of voluntarism to exist. You cannot say, for example, that the League of Women Voters or some other organization cannot exist and that they cannot communicate with their own members. It is one thing to say groups cannot spend money to influence external activities, campaigns; it is another thing to say they cannot spend money to communicate with their own members.

If you started limiting either corporations from communicating with their own employees ca or labor unions from communicating with their own members, if there is any question about the constitutionality of S. 137, the substitute for it, which I really think will pass muster, there certainly would be grave questions about the constitutionality. I do not even think a question. I think with certainty it would be unconstitutional to go in and tell a voluntary organization they could not form in this society.

I looked at the statistics since Mr. Gorbachev has allowed political organizations in the Soviet Union and since the Communist Party no longer has a monopoly on political power in this country. Approximately 20,000 new organizations have been formed

in the Soviet Union. That is remarkable.

Well, it is part of the process here that you have a right to form an organization communicating with your own members and organize for purposes you want to organize for. It is also I think our right to define ways within the bounds of the court decision to limit how much money can be used to influence an election process. But I am not sure you can put very much of a limitation on what organizations can do in terms of holding meetings and communicating with their own members to keep them informed for their purposes. I think that would be very difficult, indeed, from a constitutional point of view.

So, Mr. President, yes, we do have some differences between the bills proposed by the two sides of the aisle. Ours has spending limits. Ours does something to get spending under control. Theirs does not.

By getting spending under control, ours does something to level the playing field so that challengers will have a chance. Theirs does not. It still allows a system under which incumbents have been able to raise twice as much money as challengers.

Our proposal does something to change the nature of campaigns by encouraging longer programs, for example, broadcast programs to discuss issues, by requiring candidates to assume responsibility for negative 30-second spots, for example. Theirs does not. We both try to work on the lowest unit rate on advertising. That is a common ground. We both try to work on doing something to reduce the influence of special interest and political action committees. That is common ground.

We have an effective provision on soft money. They do not. In fact, they raise the $25,000 limit even on direct contributions to $1.36 million for wealthy couples, going in the wrong direction. They still allow soft money contributions by unions directly to State parties and directly by corporations without limit on either the spending or the amount given. We do not. We shut that off. So there are some differences.

Mr. President, there is common ground in perhaps the most important area of all. Both sides of the aisle have now recognized we have a problem. There has not been a Senator I have heard today or that I have heard in the course of this debate who has said the present campaign system is working.

Mr. President, when we first started discussing this matter, we had people coming in saying if it is not broke, do not fix it. The present system is better than anything you could think of in its place. We are not concerned; we do not want change. When we tried to pass S. 2 a couple of years ago, we had eight cloture votes, a record. The majority of the Senate, 56, 57 Members of the Senate, indicated they wanted to pass campaign reform. The other side of the aisle would not let us do it. They conducted a filibuster and they would not let us move.

Mr. President, that has changed. They have indicated they do not intend to conduct a filibuster, and I am sure that if our negotiations do not succeed in producing agreement behind closed doors; we will be out here; we will be moving forward; we will start to vote; and I assume that they do not intend to block us. I assume they intend to let us vote on the bill. I assume they will let us vote on the amendments. Win, lose, or draw, we will vote. I assume that is what will happen.

That is what the Senator wants to do, to start moving on this kind of bill, if we do not get some kind of agreement on negotiations that are ongoing. We owe it to the American people. Let the Members of the Senate come foward and vote on it. Let them say whether they want to have limits on campaign spending or not. Let the Members of this body indicate to the 80 percent of the American people plus, who according to the polls want limits on spending, want us to pass a real campaign reform bill that does something about the runaway spending, let the American people know where we stand. They have a right to know whether we are trustees of this political system in the way we should be or not.

Mr. President, it is substantial progress, however, that every Member who has spoken, every Member who has expressed himself or herself on or off the floor about the present campaign financing mechanism, has said it needs to be changed. That was not the situation 10 years ago. That was not the situation 5 years ago. It was not the situation 2 years ago. So it makes me optimistic we can get together and do something.

I believe there are many individuals on the other side of the aisle who I know every bit as well as I know Members on this side of the aisle, who I count as personal friends with a depth of attachment just as strong on that side of the aisle as this side of the aisle, who care about this institution, who care deeply.

The vast majority of Members on both sides of the aisle came here because they wanted to render a public service and because they cared about this country. Knowing the talents and abilities of many Members on both sides of the aisle, I happen to know that they could have made far more money in other professions if they had decided to do so.

I cannot help but believe—and I see the distinguished minority leader has just come to the floor, a good friend of mine—that the minority leader shares the same depth of commitment to this institution and to this country that would be felt by any person on this side of the aisle.

So, Mr. President, we have a chance to get together this year. We are going to begin negotiations next Tuesday afternoon. Negotiating teams have been appointed by both leaders to try to find a bipartisan compromise that will bring us to true campaign reform.

We will start that process next Tuesday afternoon. We will work in earnest on it. We will try as hard as we can to reach an agreement. I hope we will.

If we do not, we will have to come out on the floor and start voting up and down and see where the majority is on individual issues relating to this bill. We must move forward, but we must not fail. We must not fail this institution, and more importantly, we must not fail the American people.

We must get together and do something about it. We must put items on the table. We certainly are willing on our side to put items on the table. We are still willing to discuss, for example, just exactly what the inducement should be, what the package of benefits should be to accept voluntary spending limits, and the source of funds to provide those inducements. We are willing to talk about those things.

As I say, we have intended to close this soft money loophole. I have uncovered a huge loophole in the bill offered by the other side of the aisle, a $1.36 million loophole that has been opened. I have to think they must not have known it.

If they find provisions in our bill that have unintended consequences, we want to sit down and make it better. We want to come forward with a better proposal. We are willing to do that.

So, Mr. President, it is a time of challenge to our system that is a challenge also of opportunity, for us to sit down together and work toward an American solution.

We have in our bill a proposal that was suggested by the panel of bipartisan experts appointed by the distinguished majority leader and the distinguished minority leader, the Senators from Maine and Kansas. They appointed a panel of bipartisan experts.

In the past, we have always been hung up on this difference of opinion about spending limitations. We have always held and continue to hold that you cannot have reform without some limitation on overall spending, without stopping the money chase, and the vast majority of the American people see that as the essence of reform.

We know there are those on the other side that are concerned about overly restricting limits, about the right of people, particularly in the

home State or district, to participate in the political process by making the contribution.

This panel of experts came up with a suggestion. They called it flexible spending limits over and above any limit being set, and allowing small in-State contributions from individuals to be raised on top of any spending limit. We have put that in our proposal.

We put it in, Mr. President, as a signal to the other side of the aisle, many of whom had embraced that report when it came out, The Senator from Kentucky included. He said he thought the flexible spending limits was a promising way to get away from the roadblock and the differences of opinion we have had in the past.

We put that in our proposal, Mr. President, the proposal now offered by 46 Senators as a sign to the other side of the aisle, as a signal we want a bipartisan solution. We wanted an American solution. We are including it in the proposal the way the bipartisan panel of experts have suggested to avoid us getting into a deadlock like we have in the past.

So, Mr. President, I can only hope for the sake of the good of this political system that we will make these changes. This Chamber has been a Chamber occupied in the past by intellectual giants, by people of moral courage, by people who have made an immense contribution to this country.

We are a great nation today in part because of the caliber of the people that have served here and the ideals which they have held, and the participation above all of the people back home in going out in large numbers to participate in the election process to select those people to represent them here.

Mr. President, we are not going to have a Senate of intellectual giants in terms of moral courage, ideals, or ability in the future if we have a system that requires people to spend inordinate amounts of time raising money. I did not come to this Chamber to raise money. I did not come here to be a part-time Senator and a full-time fundraiser. I came here to be a full-time Senator, to try to do something good to help this country.

Mr. President, I feel the other 99 men and women who serve here with me had the same kind of motivation when they came. One of these days, and over a period of time—we have seen some leave already.

I remember the Senator from Maryland, the distinguished Republican Member, Senator Mathias, when he said why he was not going to run for reelection, a very distinguished Member of the Senate. He said:

> I did not want to be a full-time fundraiser and a part-time Senator. I could not face up to the fact that I would have to give months, literally years of my time raising the amount of money that it would take to run for reelection.

He decided to quit.

Mr. President, we cannot allow that continued erosion to go on any longer. We must act. We have a window of opportunity to act. We have leaders of good will on both sides of the aisle. Our negotiation teams will do our best to reach an agreement. If we cannot, we will ask our two leaders to try to sit down and reach an agreement together. If they cannot reach an agreement, which I hope and pray they can, then we will be ready to go to the floor of the Senate and see where the votes are and do our best to enact meaningful reform.

Mr. President, I thank my colleagues for their time. I express my appreciation to the majority leader for scheduling some additional time so that we might discuss these important issues this morning.

I would say to my distinguished majority leader, and to the distinguished minority leader as well, this Senator will do everything in his power to try to move the process forward, to reach a genuine bipartisan agreement on what is true campaign reform this year.

We look forward to working with all of those that are involved in the process, and we will do our very best not to let the American people down, but to meet our responsibility to be trustees of our constitutional form of Government, trustees of this institution, and pass true campaign reform this year.

Mr. President, I yield the floor.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, I thank my colleague, the distinguished Senator from Oklahoma, and I am pleased to say that he has continued to demonstrate leadership in the area of campaign finance reform. It was my pleasure to appoint him as chairman of the group of Democratic Senators which will meet beginning next week with a group of appointed Republican Senators, appointed by the distinguished Republican leader. It is my hope that as a result of these discussions, and the discussions beginning next week, that we will have meaningful bipartisan campaign finance reform soon in the Senate.

## UNITED STATES-CHINA RELATIONS

Mr. MITCHELL. I now wish, Mr. President, to address a subject, one that is relevant and very important, and one with respect to which both the President and the Senate will soon have to make an extremely important decision. That subject is United States-China relations.

Mr. President, rarely has a policy been as obvious or as complete a failure as has President Bush's policy toward China. By June 3, the President will decide whether to urge retention of most-favored-nation trading status for China.

In an ironic coincidence, June 3 will also be the first anniversary of the massacre of Tiananmen Square.

Failure is now bringing in its wake the inevitable hard choices that arise from bad policy.

A month ago, President Bush was forced to finally make good on his promise to issue an Executive order protecting the Chinese students in this country against the threat of deportation—although we were told such an order was being issued last year, when he vetoed the bill protecting Chinese students.

Four months before that, President Bush had to justify to America and the free world the presence in Beijing of high American Government officials, toasting the future of the Government of China—the same Government that sent tanks against unarmed people and crushed them, both literally and figuratively.

Then the administration had to acknowledge that contrary to its publicly announced policy, a secret Government mission had been sent to the Government of China barely a month after the massacre in Tiananmen Square.

The President's China policy has been based on secrecy, it has been inconsistent, and its outcome has been dismal failure.

I urge the President not to compound that failure by now proposing the renewal of most-favored-nation trading status for China.

Despite the recent release of 200 political prisoners, the Chinese Government itself acknowledges that another 400 remain in custody. Unofficial counts put the total much higher.

The recent revelation by a defecting Chinese official, that the Chinese Embassy here has been actively involved in a campaign of intimidation directed against Chinese students, underscores the intransigence of that Government.

The hope for freedom in China is as remote today as it was 10 months ago. And, what is worse, the administration has signalled to the Chinese leadership and to the watching world that it views their actions with complacency.

That is the wrong signal to send. It is unwise, it is profoundly inconsistent with American ideals, and it is a demonstrable failure.

To extend MFN trading status now would be to compound that failure.

I am aware of and sensitive to the interests of Hong Kong, whose trade with China comprises 30 percent of its total trade and whose entire future is tied to that of China.

But is the long-term outlook for Hong Kong going to be brighter if the Chinese leadership feels it can repress its own people with impunity?

How are Hong Kong's economic system and her people's individual liberties buttressed if its future government knows that the world's democracies will ignore repression?

National ideals must sometimes be compromised to serve national interests. Indeed, our national ideals were compromised in the interests of maintaining a relationship with China. Chinese standards of human rights and respect for political freedom were not compatible with ours.

But in the larger interests of the relationship, we accepted those differences and hoped and worked for improvement in the future.

But by its own actions, the Chinese leadership has decisively demonstrated that future improvements are an illusion to be used as a negotiating tool, not a genuine path to the future.

To suggest now that our national ideals must be so far compromised that we not only maintain a failed relationship—as the administration is already doing—but that we reward, economically and politically, the authors of brutality, goes beyond acceptance of political reality.

It becomes a betrayal of American ideals.

The administration has tried to justify its policy of placating Chinese leaders as an exercise in quiet diplomacy which will produce a relaxation in repression against the Chinese people.

A policy may initially be measured by its intentions. But it must ultimately be judged by its outcome. And the outcome of the administration's China policy is a failure, a failure that is clear and complete.

Contrary to the administration's claims of December and January, that a signal would shortly be forthcoming which would substantiate the success of its policy, the Chinese Government has sent no such signal and has not moderated its course.

To the contrary, its intransigence has intensified.

When the President sought to justify that secret mission to China by his top advisors, the only achievement he could cite was the Chinese pledge that no missile sales to the Middle East were planned.

But news stories now report that China is selling ballistic missiles to Iraq. If such sales are occurring, such exports flatly contradict the assurances that we were told had been given to President Bush's emissaries in December.

This does not reflect a "relationship that is so very important to both countries," as the President termed it last December. Instead, it reflects Chinese disdain for American concerns.

When National Security Adviser Scowcroft toasted the Chinese leaders in Beijing, he said, "* * * we come to reduce the negative influence of irritants in the relationship."

But the negative influences in the relationship are the actions of the Chinese Government. Recent months have seen no reduction in these irritants.

Instead, the Government intensified its harshness against dissidents; it cut short a $500 million program with Grumman Aviation; and it has introduced strict new controls on foreign travel in Tibet, including travel by journalists who could bring the outside world credible news of conditions there.

Despite direct requests by the President's special envoys that the Beijing government curtail military support for the Khmer Rouge, no such response has been forthcoming. Indeed, according to one recent report it may have increased its arms aid to the Khmer Rouge—the same murderous Khmer Rouge who slaughtered more than a million Cambodians just a decade ago.

Indeed, an administration official admitted on May 1 that the Chinese Government appeared to be "thumbing its nose" at the United States on Cambodia.

The conclusion of administration officials, that there is "no pattern of cooperation" forthcoming from China, is well-founded. It is time for the President to recognize what officials in his Government have already conceded.

There have been no signals of lessened intransigence.

The increased surveillance of dissidents, the mandatory expanded political indoctrination classes for students, the restrictions on overseas study, the persecution of the Roman Catholic Church and other religious groups—all these actions have been well and fully reported in our country.

The Chinese Foreign Minister, in his press conference on March 28, reiterated that it is up to the United States, not his Government, to take the initiative in improving relations between the countries.

"We * * * appreciate President Bush's remarks about putting relations back on course." he said. He rejected the idea that the administration might be disappointed at the lack of his Government's response to American overtures. He said he believed the President did not share that disappointment.

When he was asked about the fate of Fang Lizhi, who remains in hiding in our Embassy, the Foreign Minister said the "only way out for [him] is to mend his ways and plead guilty."

But the Foreign Minister was not telling the whole truth. Not only is a written confession of guilt by Fang being demanded, but other conditions have been set for our nation to meet. And, to its everlasting shame, the Bush administration met the first condition.

But when that first demand was met—American approval of some World Bank loans—the result was not Fang's release.

Instead, as so often happens, the demands escalated. The Chinese Government next demanded a resumption of United States exports of military goods and high-technology products to China.

Now the issue is most-favored-nation trading status.

The Chinese Foreign Minister has warned that a failure to renew most-favored-nation trading treatment for China could cause "major retrogression" in relations between our countries.

It is hard to see how.

Those who argue in favor of this further concession would do well to review the history of past concessions which have gained nothing but new and escalating demands.

It is time to abandon this failed policy, not to embellish it with new concessions.

President Bush says his principal concern is not to isolate China. He said last December, "I don't want to take any further steps that are going to hurt the Chinese people."

But nothing America has done has hurt the Chinese people. It is what the Chinese Government has done that is hurting the Chinese people. The President continues to ignore that distinction.

It is a fundamental confusion of responsibility to assert that when we stand up for democracy and freedom, we are more responsible for harming the people than the actions of those who are directly causing harm to the people.

Indeed, this is precisely the false assertion the Chinese leaders want us to accept. They claim that objections to butchery are interference in their country.

A year ago, Americans and people all over the world cheered the students in Tiananmen Square as they raised the statue of Goddess of Liberty.

We all hoped we were seeing the dawn of a new era in the world's most populous country. We hoped the students and workers in the square could overcome decades of sterile political dogma, that a new age of freedom would dawn for the long-suffering Chinese people.

Those hopes were dashed by the tanks the Government sent into Tiananmen Square. Armored tanks drove into students and workers. Naked, unaccountable force was unleashed against the defenseless human beings in the Square.

Force can crush unarmed people. That lesson is one we know well. But force cannot crush an idea. Force cannot dam a desire. Force cannot quell a hope.

What can crush hope is the lack of moral support.

Ours is a nation that gained strength and legitimacy from moral support.

Two hundred years ago, long before America was a world power, when American hopes and desires were a footnote in international considerations, the moral support of one of the world's leading powers, France, was an anchor to which our people clung; it was a source of strength to our forefathers.

It helped give them the confidence to confront the world's leading power of the time, Great Britain.

For the past century, America has in turn given moral support to freedom. For half a century, we supported the aspirations of Eastern Europe to be free. Beginning with President Carter and continuing under President Reagan, we have championed human rights and human freedoms as a policy goal of the United States of America.

Yet faced with the most blatant use of government force against defenseless citizens, our moral stance has been compromised by our own administration.

It is a grave error to believe that our Nation can be neutral as between freedom and oppression. It is a mistake to believe that we can as easily support the one as the other.

We cannot. It is not in our history. It is not in our people. Our choice is and must be freedom.

If we continue on our present course with respect to China, we will be compounding a mistake, for neither the oppressors nor those they seek to crush will believe us.

We will have traded our principles for the doubtful friendship of dictators. And we will betray the trust of those who seek our support in their fight for freedom.

That has never been the American way. It ought not be our way now.

Mr. CHAFEE. Mr. President, I would like to make a couple of comments, if I might, on the distinguished majority leader's remarks.

It seems to me unfortunate in this Senate that we spend so much time as we do, hectoring the administration on how to run their side of the ledger. Yet we cannot even pass aid to Panama, we cannot even pass aid to Nicaragua. Nothing happens.

We hope, and work assiduously, to have democracy in those nations; we get it, it arrives, we say we are going to help but where is the Congress of the United States on doing anything about that help?

It seems to me, we have a pretty full platter before us right here in this Congress of the United States, Mr. President, spending as much time as we do, lecturing the President on how to run the affairs of the Nation.

For example, the thing that most deeply disturbs me is that we do not tackle this competitiveness more. I know the distinguished majority leader has worked hard on these matters, but since I have his attention I would like to see something happen in the following areas. I wish we could do something about product liability. That has been kicked around. It is recognized it is a drag on our industries. We ought to do something about it, and nothing happens.

We ought to do something about those Bell Telephone companies. We have a situation where seven of the largest corporations in the United States are being run by a Federal judge, a Federal judge whose platter is full dealing with all kinds of cases. I do not think that is right.

I wish we would do something about the competitiveness of our banks. Once upon a time the U.S. banks were leaders in the world. Now we look at the list of the 15 largest banks in the world and not one of them is an American bank. We had legislation before this body 3 years ago that helped improve the competitiveness of our banks. That legislation has not emerged.

So, I appreciate the concern of the majority leader for what is taking place in China, or this part of the world, or that part of the world, but I think, Mr. President, we have a pretty full platter ourselves. I wish we could get on with some of these matters.

I would like to make one specific comment. As I understand the majority leader's points, he would not grant the most-favored-nation status to the Peoples Republic of China.

That may be. I did notice that our former Ambassador to China, Mr. Winston Lord, who opposed the President on the position that he took and favored the overriding of the veto on the Chinese students legislation said we should grant most-favored-nation status. So this is hardly a case where there is unanimity.

The PRESIDING OFFICER (Mr. BURDICK). The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, are we in morning business?

The PRESIDING OFFICER. We are not.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Kansas is recognized.

Mrs. KASSEBAUM. I thank the Chair.

(The remarks of Mrs. KASSEBAUM and Mr. CHAFEE pertaining to the submission of Senate Resolution 288 are located in today's RECORD under "Submission of Concurrent and Senate Resolutions.")

## MORNING BUSINESS

Mr. WIRTH. Mr. President, I ask unanimous consent there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

## GLOBAL CLIMATE CHANGE

Mr. WIRTH. Mr. President, the issue of global climate change and global warming has been much in front of the American people and the people of the world for now almost a decade. The question is, when are we going to focus on it and start to act and start to move?

The distinguished Senator from Rhode Island was just asking, when is the Senate going to get on with its business? I am pleased to report, Mr. President, the Committee on Energy and Natural Resources has begun to move on this very important issue of global climate change.

Remarkably—and I say remarkably, Mr. President—on Wednesday a very ambitious piece of legislation on energy and global warming was reported out of the committee by a 19 to 0 vote. This, from the Energy Committee that spans the ideological, geographic, and probably just about every spectrum you can find in the U.S. Senate. This bill was reported out 19 to 0.

Initially it was sponsored by more than 33 Members of the Senate. The legislation is now picking up a number of other cosponsors, Mr. President, and we hope this legislation will be on the floor in the not too distant future.

I will be sending out to all Members of the Senate, both those who have sponsored the bill in the past and those who ought to be sponsors of the legislation now, a letter describing the legislation, where we are going, and asking for their support.

Very briefly, Mr. President, the legislation reported out is, I think, a major statement and the first one laid out anywhere in our Government about the issues of global climate change and what we can do about them, particularly in the energy area.

The goal of the legislation is virtually identical to the Nordvik Declaration on Atomospheric Pollution and Climate Change, which essentially called for the United States to become involved in the adoption of a 20-percent goal for the reduction of carbon dioxide emissions by the year 2005.

How do we achieve a goal like that? We achieve a goal like that essentially with a restatement and recommitment to energy policies which we had in this

country during the 1970's and largely abandoned during the 1980's.

The Wirth-Johnston-McClure bill reported out of the Energy Committee last Wednesday developes a mix of policies that can stabilize the generation of carbon dioxide and other greenhouse gases in the United States, investigates the feasibility and the economics of this, Mr. President, and, very important, this is a piece of legislation that has an economic rather than a regulatory base.

We direct the Secretary of Energy to submit to the Congress a least-cost national energy strategy assessing what is available to us and what makes the most sense in terms of changes for us to be making; what in production; what in conservation; what in transportation; what in building standards; where are these targets going to be most likely to be met; and what emphasis should we be pursuing?

We set up a director of an Office of Climate Protection for the first time in the Department of Energy. We develop a major National Academy of Sciences review of the causes of climate change, the trends in greenhouse gases, and we hope to put to rest that little bit of remaining controversy that is out there by some of what I would call the scientific revisionists reviewing this important issue.

The legislation, Mr. President, has an extremely important section on energy efficiency, probably the guts of the bill, moving all the way from focusing on policies that we ought to be pursuing nationally and internationally through a series of joint ventures and the establishment of five centers for demonstrating technologies around the country on energy efficiency, focusing in that title, Mr. President, on Federal facilities.

We have right in our own back yard enormously consumptive and, in many ways, wasteful energy programs within the Federal establishment. We call for shared cost savings contracts and really urge our own Federal facilities to meet the goals which we are establishing for the country overall.

The Department of Energy is called upon for developing a system of home energy ratings so that when people buy a home or are selling a home they can know how efficient that is and know what the costs of energy are going to be; to develop a program for labeling of windows and other areas for energy efficiency and develop certainly greater incentives for the energy information area.

We have provisions related to PURPA, provisions related to energy and vehicle research and some added to the bill by Senator ROCKEFELLER on the solar-powered vehicles; hydrogen, a major provision authored by our good and late friend Senator Matsunaga and added by Senator AKAKA, a new member of the committee. There is focus on fusion, coal, natural gas, and other alternative fuels.

This is a major piece of legislation, Mr. President. We should be proud of the fact that on energy conservation and energy production, methane included coal opportunities, we have for the first time a template for the rest of this country and for the 21st century and, in addition, a template for the world.

Senator DOMENICI added a number of major provisions, very important ones, related to technology transfer and our role around the world, ones which we are increasingly understanding of.

Mr. President, I am very proud of the committee. I am thankful to Senator JOHNSTON and Senator MCCLURE who took this very controversial, very ambitious piece of legislation and worked it through the thickets of the legislative process, had many, many hearings, consulting with all kinds of outside groups and reporting out, Mr. President, a global warming bill with a vote of 19 to 0.

Again, I will be sending out to all Senators who sponsored the bill in the past, and who should be sponsoring the legislation now, a summary of where we are, where we are going, and ask for their cosponsorships at this point. This has a very, very broad base of support, something we all should and must subscribe to. I hope we find our way moving through the Senate with this legislation very rapidly.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SENATORIAL ELECTION CAMPAIGN ACT

The Senate continued with the consideration of the bill.

Mr. DOLE. Mr. President, a number of my colleagues on both sides of the aisle have talked about campaign finance reform this morning. I hope, as others have said, we are now on the right track, and we are moving toward some way to clean up the campaign finance mess.

Last week, both parties, Democrats and Republicans, introduced their own reform proposals. Both the majority leader and myself have appointed negotiating teams. I understand maybe sometime early next week they will have their first meeting. It is not going to be easy, and is not going to be settled in a week or 2 weeks, or maybe even longer.

Also, I think it is fair just to set the record straight. I have had an opportunity to review the majority leader's remarks when he introduced the Democratic campaign finance proposal. I think I should correct some of the statements that I believe are inaccurate and unfair.

One is that the majority leader said: "The Republican reaction to the Democratic substitute is no surprise. They offer no reform proposals so must depend on an attack of the Democratic approach."

Mr. President, the Republican bill offers reform. I think it is significant reform. I think it is just plain wrong that we say that our bill was totally barren of any reform. That is sort of the attitude we have had and why we cannot get together on campaign finance reform.

I just say we ban soft money; we ban PAC's; we restrict the practice of bundling; we reduce the contribution limits for-of-State residents, $1,000 in State to $500 out of State. We take a big whack at special interests by removing political action committees altogether. I can go through, and will in the statement, and point out what our bill does as compared to the Democratic bill, but I think there is a significant difference.

I know the Democrats have a fixation on spending limits. I think my own view on spending limits is one way to ensure all of us are protected, all the incumbents, but it is pretty hard on challengers.

I ask unanimous consent to print in the RECORD an article written by Roy Schotland who is a professor at Georgetown University Law Center, Washington, DC.

It is entitled "The Perversity of Campaign Reform."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE PERVERSITY OF CAMPAIGN REFORM

(By Roy A. Schotland)

Campaign reform is on the floor of Congress this week. The Senate majority leadership is proposing a package deal: limits on the amount of money candidates for Congress may spend, and public financing of the expenditures candidates are permitted.

It all sounds very fair, but in fact, the legislation grossly favors incumbents—even more so since Sens. Tim Wirth (D., Colo.), Tom Daschle (D., S.D.) and Max Baucus (D., Mont.), among others, pressured the leadership into fiddling with the reform's rules over the past few weeks. As well as the unfortunate intended effects, the bill will have unfortunate unintended effects—effects that are bound to hurt almost every state, in one election or another.

Spending ceilings are among the most enduring popular of campaign reform proposals. In 1974, Congress enacted ceilings for both presidential and congressional campaigns. The constitutionality of the statute was challenged, and the Supreme Court held, in a 1976 case, Buckely v. Valeo, that while statutory limits on individual contri-

butions to campaigns are consitutional, limits on spending are not. The court did, however, permit Congress to require candidates to comply with spending limits as a condition of public funding for their campaigns. As a result, presidential candidates—who are eligible for public funding—are generally subject to spending limits, but congressional candidates are not.

Whatever the consequence of spending limits for presidential races, congressional elections would become not more competitive, but less. The more competitive the race, the more likely it will involve high spending.

Between 1982 and 1988, there were 30 highly competitive (6% margin or closer) Senate races and 65 landslides (20% margin or greater). In the 30 highly competitive races, more than 60% of the candidates spent more than the various proposals for campaign reform now before Congress would permit—even before adjusting for inflation. But in the landslides, only 15% of the candidates involved spent more than the proposals before Congress would permit. The proposed limits—which would come into effect in time for the 1992 elections—would therefore have made little or no difference in the uncompetitive races, but would have had a substantial impact on the others.

Spending limits would alter the balance of power in the Senate between those states that happened to have competitive elections in any particular year and states that didn't. Incumbents in competitive states would be held back from taking advantage of their great fund-raising edge, while their challengers would have sufficient public funds to mount strong races. Those states would probably see unprecedentedly high turnover of senators, who would accordingly build little seniority. This would cost their states bargaining power in Congress. In contrast, uncompetitive states' incumbents, with their spending untouched by the law would continue to drown challengers.

Does anyone want to increase the rewards to one-party states? Does anyone want another manipulable tool in incumbents' hands to foil challengers, in the House as well as the Senate? Of the 12 challengers who beat incumbent senators between 1982 and 1988, 10 spent more than now-proposed limits, often between two and six times as much.

Spending limits would have another perverse impact: They would ensure that state population size would, for the first time as a matter of law, affect the outcome of Senate races. So far, every formula proposed for setting spending limits state by state has treated population as the only variable differentiating the cost of politics in one state from another. But some states have lively general elections, others only lively primaries; some have expensive media, others not; and so on. The spending ceilings proposed in 1977, the first time Congress tried seriously to enact them, were so high in the biggest states that Senate races there would have been untouched by the law. In contrast, in the 26 smaller states, severe reductions in spending would have been required.

This is not to say flatly that spending ceilings cannot work: the—now discarded—March report by the advisory panel on campaign finance named by Senate Majority Leader George Mitchell and Minority Leader Robert Dole, called for "flexible" ceilings. That report is the first even quasi-official recognition that by imposing ceilings we raise "valid practical considerations of whether certain categories of candidates (challengers v. incumbents), parties (Republican v. Democratic) or campaigns (large state v. small state) would be advantaged or disadvantaged"; further, that the formula for ceilings "need[s] to reflect the disproportionate costs of running in less populated state and in those states which require advertising in adjacent state's media markets."

But I do say that Buckley was right in putting red flags in front of spending ceilings. First, they're horrendously hard to set fairly and flexibly enough, as indicated above. Second, given that difficulty, it is especially significant that if we have ceilings, they will be set not by a troop of Eagle Scouts, but by incumbents who will pick the formula and the level of the limits, and render themselves even more invulnerable at the same time they claim applause for "reform." As Sen. Joe Biden (D., Del.), a backer of campaign reform, says, this "appears very hypocritical."

Mr. DOLE. Mr. President, Roy Schotland talks about spending limits.

Finally, I will just say we are prepared to negotiate in good faith. We do reject public financing. We reject it without apology. I do not believe the taxpayers want to start paying the costs of my campaign or anyone else's campaign. They have enough problems with the deficit crisis and problems of their own without taking some of their hard-earned tax money to pay for everybody's campaign in the Senate, in the Congress, and who knows what next, and who knows how much.

That is a nonstarter. Public financing is not going anywhere. It could not pass on the Democratic side.

I will just say, despite any remarks made, that our initiative is straightforward, it is serious, it is comprehensive; I think it will go a long way toward cleaning up the campaign finance mess.

So having said that, I say again, we are prepared to negotiate. We believe we have a good negotiating team. We believe the majority leader appointed a good negotiating team, and we are prepared to start next week in earnest to see if we can reach some satisfactory conclusion.

Mr. President, the Senate is moving along on the right track when it comes to cleaning up the campaign finance mess.

Last week, Republicans and Democrats introduced their own reform proposals. Both the majority leader and myself have appointed negotiating teams. And formal negotations should begin sometime early next week.

Obviously, much more work needs to be done, but at least the Senate is in a good position to develop a serious and comprehensive reform package.

THE MAJORITY LEADER'S REMARKS

I have had the opportunity to review the distinguished majority leader's remarks when he formally introduced the Democrat campaign finance proposal last week. At the risk of sounding a bit partisan when bipartisanship is the order of the day, I would like to take a few moments to correct—what I believe—are several inaccurate—and unfair—statements that appeared in these remarks.

NO REFORM PROPOSALS?

First. The majority leader made the blanket charge that "the Republican reaction to the Democratic substitute is no surprise. They offer no reform proposals so must depend on an attack of the Democratic approach."

The Republican bill offers no reform proposals? None whatsoever?

That is just plain wrong. And I simply can't believe that the majority leader really considers the Republican bill to be totally barren of a single reform idea.

Mr. President, the Republican bill adopts the reform approach hook, line, and sinker by banning soft money, by restricting the practice of bundling, and by reducing the contribution limits for out-of-State residents by a full 50 percent—from $1,000 to $500.

The Republican bill also takes a big whack at the special interests by removing Political Action Committees from the Federal election process altogether.

No exceptions. No loopholes.

And lo and behold, the Democrat bill follows the Republican lead by banning PAC contributions to at least one group—Senate candidates.

So I am quite positive about the Republican bill. I am quite positive that the Republican is, in fact, a reform proposal. And I am quite positive that the Republican bill can hold its own when compared to the so-called Democrat reform proposal.

DE FACTO SPENDING LIMITS

Second. The majority leader states that:

> The Republican alternative does not contain the essential element of campaign finance reform—spending limits on Senate campaigns. Therefore it does nothing to limit the unending pursuit of money by Senate candidates.

The majority leader is right in one respect. The Republican bill does not contain spending limits, if he is talking about the inflexible and arbitrarily determined spending limits that reduce competition in politics, that put a cap on public participation, and that make election lawyers water at the mouth at the prospect of reaping lucrative legal fees.

This is not just my view. It is the view of just about every academic who has studied the issue. And it happens to be the view expressed in a very good op-ed piece that appeared in the Wall Street Journal earlier this week.

According to the author of the piece—Prof. Roy Schotland of the Georgetown University Law School—the spending limit proposal contained

in the Democrat bill "sounds very fair, but grossly favors incumbents." I could not agree more.

The truth is that the Republican initiative will, in fact, limit campaign spending—and limit it substantially. By banning PAC's—by reducing the contribution limits for individuals residing outside of a candidate's State—and by restricting the practice of bundling—the Republican bill imposes de facto limits on the amount of money that can be spent in a campaign. If the Republican were ever signed into law, there would be less special-interest money flowing in the campaign finance pipeline and campaign spending would—inevitably—decrease. That's a given.

BIPARTISAN PANEL RECOMMENDATION

Third. The majority leader criticizes the Republican bill for exempting contributions to the party committees from the $25,000-a-year limit on contributions to influence Federal elections.

This exemption for party contributions is not a Republican idea. It is not a partisan idea. It is a bipartisan idea. It is an idea proposed by the Mitchell-Dole bipartisan campaign finance reform panel.

The bipartisan panel understood the importance of expanding the roles of the political parties. And it understood that more party participation means less special interest influence and more participation by the people who ought to count—our constituents.

So the bipartisan panel proposed an exemption from the $25,00 annual limit for contributions to the political parties. And Senate Republicans accepted this proposal because it makes sense.

TIME TO BE SERIOUS ABOUT SOFT MONEY

Fourth. The majority leader stated that—

Soft money is often used to circumvent election law limitations.

He stated that:

These unregulated funds from corporations, unions, and wealthy individuals are spent for voter registration drives, get-out-the-vote efforts, and generic advertising often designed specifically to benefit Federal candidates.

This is all well and good, and the majority leader is right on target. But it would be helpful if the Democrat bill took the truth-in-advertising test seriously and did something—finally—about labor union soft money.

Unlike the Republican initiative, the Democrat bill does not prohibit labor unions and corporations from using Treasury funds to finance get-out-the-vote and voter registration efforts. It does not codify the Supreme Court's Beck decision, and it would allow labor unions to continue to finance the administrative expense of the party committees.

PUBLIC FINANCING

The majority leader is correct when he says that Republicans are critical of the Democrat approach.

The Republican bill rejects—outright and without apology—the idea of taxpayer-financing of politicians.

We are in the midst of a budget deficit crisis, and the last thing we need is a congressional scheme to transfer the hard-earned money of the taxpayers to the campaign coffers of congressional candidates.

When it comes to the issue of public financing, Senate Republicans simply will not budge.

CONCLUSION

Mr. President, despite the majority leader's remarks, the Republican initiative is straightforward. It is comprehensive. It is serious. And if enacted, it will go a long way toward cleaning up the campaign finance mess.

I have no doubts about that.

## MFN AND CHINA

Mr. DOLE. Mr. President, I do not want to take issue with the majority leader or debate the MFN for China issue now. First of all, the President has not made up his mind whether he would request the extension on the MFN, and I have not made up my mind, but I will if the President makes that request.

The majority leader made some good points. I do think, however, we ought to keep several considerations in mind. The majority leader did mention Hong Kong, and this is an important and complex consideration. It would be a shame if we undermine Hong Kong's economy, seriously undermining it at the same time its ability to survive as a democratic capital enclave inside China after 1997. MFN is a status quo. Renewing it is keeping the status quo. We are not giving the Chinese some new benefit. Some may think this is a new benefit we are going to restore to the People's Republic of China. It is not a new benefit.

Are we hurting the Chinese hardliners? That is the tone of the majority leader's statement. There are 1.1 billion Chinese people. It seems to me they are rather important strategically, militarily, politically, and economically. However you look at it, it is a country we should not drive back into isolation.

Are we standing on the side of the Chinese reformers? Are we going to isolate them even further if we cut off ties like trade ties? And how badly will it hurt the Chinese anyway, or will it just hurt American business?

I just say I think the majority leader made some good points. I hope people do not become mixed up because they see it maybe as a partisan advantage or a way to take on President Bush who happens to know quite a bit about China and does have a good policy in China.

I think we do need some strong action and some positive action from China. The clock is ticking and time has almost run out. I would say to the leaders in the People's Republic of China, even though you release some dissidents and even though there have been other minor gestures made, the American people and the American Congress I think need to see more. We say that in an effort to bring about change in the right direction.

So I hope that before we make any final determination in the debate over the MFN with reference to the People's Republic of China, we have an opportunity for not only a full debate but hopefully there will be some appropriate response from the People's Republic of China.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Chair recognizes the Senator from Alaska [Mr. MURKOWSKI].

Mr. MURKOWSKI. I thank the Chair.

## UNITED STATES-VIETNAMESE RELATIONS

Mr. MURKOWSKI. Mr. President, as we are in the process of noting the 15th anniversary of the fall of Saigon to the Vietnamese Communist forces, it is the opinion of the Senator from Alaska it is time to review our policy toward the Socialist Republic of Vietnam—a policy that remains one of diplomatic nonrecognition and an embargo on public and private dealings with the Hanoi regime.

It is quite evident to us all that Vietnam responded to some of the concerns that led to this policy. The bulk, if not all, of the Vietnam forces that occupied Cambodia in 1979, have been withdrawn. Though results are still unacceptably slow, Hanoi has gradually become more cooperative on the painful POW-MIA issue. And there are other new realities in the region—reduction in the Soviet threat, the deterioration of United States-China relations—that must be taken into account.

In my judgment, it is not yet appropriate for the United States to normalize relations with Vietnam. The Cambodian conflict remains unresolved and I am not convinced that Vietnam has done all it can to provide the fullest possible accounting of Americans missing in action.

We should, however, be willing to consider whether a more positive approach to Vietnam might be more effective in promoting the changes that we want to see in Vietnam's foreign and domestic policy.

In particular, the steps that we can take regarding the economic aspects of

our relationship with Vietnam are what I want to talk about because they will benefit our own citizens while acknowledging that some progress has been made forward building a foundation for a future relationship between our two countries.

I am pleased to join with the senior Senator from California in introducing legislation to compensate Americans who lost property in Vietnam in 1975. It is tragic that issues relating to Vietnam remain with us to this date. But I believe it is important we deal with these issues in fairness to all concerned, and this is such an issue.

In 1975, hundreds of United States citizens and businesses remained in Vietnam, many at the urging of our Government, long after it was prudent to do so. With the fall of the Saigon government, these people lost millions of dollars' worth of property which was confiscated by the new Vietnam Government. There has never been any compensation for this loss of property.

In 1980, Congress directed the Foreign Claims Settlement Commission, an agency of the Justice Department, to adjudicate the claims of those who claimed losses. After considering each case individually in detail, the Commission declared that 192 of the claims had merit, and they stated the amounts that were due each claimant. The claims and the amount of the claims are not in controversy at this time.

At the same time that the former South Vietnamese Government fell, the United States Government blocked South Vietnam's assets in this country, mostly in the form of central bank funds and deposits in United States banks. Those funds have remained blocked to this date.

This legislation which we introduced would, in effect, permit the President to vest blocked funds and to distribute them as may be necessary to satisfy the adjudicated claims.

There is a precedent for this action, Mr. President, the Congress having vested blocked assets in several previous situations.

There is an important equity question involved. U.S. citizens have lost property, the Congress and the agencies of the U.S. Government have recognized those losses, and appropriate funds are available to satisfy them. The Congress has an opportunity to make those funds available in a way that is consistent with past practice and with established legal procedures. The claimants have already waited 15 years and the value of their claims is decreasing with each succeeding year since the law permits these claims to earn only 6 percent simple interest per annum.

As important as this issue is, I think there are legitimate concerns on the impact this legislation might have on our contacts with Vietnam. An overriding concern I have is that they not interfere with efforts under way between our Government and the Socialist Republic of Vietnam to obtain fullest possible accounting of American servicemen missing in action and resolve other humanitarian issues that are outstanding. I would not support this legislation if I thought it would interfere in any way with a full accounting of our POW's and MIA's.

I believe the legislation has been carefully drafted with that consideration in mind. It contains a provision which in effect gives the Vietnamese credit for any invested funds in any future bilateral negotiations with the United States leading up to normalization where all outstanding claims can be resolved.

In addition, I am pleased that Senator CRANSTON has agreed to my request to include a provision which gives the President the authority to delay the vesting for 1 year at a time, for the full extent of this term if, in his judgment, vesting should in any way threaten progress on humanitarian issues that are being discussed by our two countries.

This provision is designed also to address similar issues raised by the State Department. In short this legislation, has been drafted to meet a number of different legitimate concerns in a balanced and fair manner.

We need to see if we can do something for these claimants who have waited 15 years for the compensation which everyone agrees is due them. In that spirit, Mr. President, I join Senator CRANSTON in this legislation.

In addition to the legislation, I urge the administration to review the existing prohibition on trade and investment in Vietnam by private United States firms. When I say review, I mean that. I do not mean open it up. But let us take a look at it. Trade and investment in Vietnam by private firms is taking place. American businesses are complaining with increasing urgency of their inability to compete with the Thais and the Japanese, the Singaporeans, Taiwanese, the French, and other businessmen who are actively pursuing commercial ventures in Vietnam.

I believe it may be time to examine the merits of changing the procedures of allowing American businessmen to join in evaluating the opportunities in that country. Such a step will still leave in place the barriers on Government bilateral-multilateral assistance to Vietnam. Large-scale infrastructure lending can only come from public sources, so the United States will retain ample leverage over policy, particularly toward achieving an accepting able settlement to the tragic situation in Cambodia. It is time we stop requiring that American businesses bear the burden of that leverage almost entirely.

We need to take a hard constructive look at our policy toward Vietnam. I hope that the introduction of this legislation and my proposal to relax some of the constraints on U.S. businesses will provide the impetus to the Congress and the administration to conduct an appropriate review.

Mr. President, I thank the Chair. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FOWLER). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RETIREMENT OF COL. LAWRENCE WILLIAM DUGGAN, U.S. ARMY

Mr. PACKWOOD. Mr. President, most of us reach a crossroads in our lives where we know the decisions made will forever alter our destiny and determine our fate. Lawrence William Duggan of Portland, OR, reached that point at the University of Oregon in 1960 when he was commissioned a second lieutenant of infantry in the U.S. Army.

On May 1, Col. Lawrence William Duggan reached a second crossroads when he retired after 30 years of distinguished service. I am proud to take this opportunity today to commend his accomplishments and proud service to our country.

A native Oregonian, Colonel Duggan began his military career as a platoon leader and company commander at the U.S. Army Training Center in Fort Ord, CA. Since then, his service has included two tours in Vietnam and stints in Germany, Thailand, and at the Pentagon. The shining moment in this stellar career, however, came in 1985 when Colonel Duggan was named commander of the 5th Special Forces Group.

Colonel Duggan epitomizes the strength and dedication of the Special Forces soldier. Created in 1952, Special Forces troops were trained to conduct unconventional warfare that only the tenacious and dedicated could endure. Special guerrilla warfare tactics, sabotage, and escape and evasion offered a glimpse at an alternative to massive conventional intervention. Their use of the now-famous green beret symbolized their special standard of excellence and distinction, worn as a badge of courage.

In 1964, Colonel Duggan set out to become one of the elite—the toughest, most dedicated, and highly trained soldiers prepared to conduct the full range of special operations missions

worldwide. His unfailing dedication, combined with a willingness to do without some of the monetary gain, notoriety and laurels that come with other military service, enabled Colonel Duggan to meet and conquer the challenge of the Special Forces. He achieved 30 years of distinction with pride and with professionalism.

Colonel Duggan has earned an extraordinary number of physical honors and medals over his career. It is his reputation of perseverance and loyalty, however, that has earned the invaluable respect of colleagues and superiors in all branches of service.

Mr. President, Col. Lawrence William Duggan now stands at the second crossroads. It is a bittersweet juncture. A career of exemplary military service has come to an end. But the service of a great American can never be retired. As a nation, we owe him our thanks and gratitude, and offer him our congratulations for a job well done.

## TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,889th day that Terry Anderson has been held in captivity in Beirut.

## NATIONAL RADON ACTION WEEK

Mr. LAUTENBERG. Mr. President, on Wednesday Senator WARNER, together with 21 other Senators, joined me in introducing a Senate Joint Resolution 317 which would designate the week of October 14, 1990, as National Radon Action Week.

Radon exposure poses a serious health risk to the people of our Nation. The EPA estimates that the number of deaths per year due to radon exposure is approximately 20,000. Fortunately, elevated radon levels can be reduced successfully at relatively low cost.

Testing in homes and schools and educating people about the risks associated with radon exposure are the first steps we can take to protect ourselves and our children from the harmful effects of radon. Our resolution calls for the establishment of a National Radon Action Week to encourage these activities.

This resolution has been endorsed by a broad range of groups and associations including: the American Lung Association, the American Cancer Society, the American Academy of Pediatrics, the National Congress of Parent Teachers Associations, the National Education Association, the Consumer Federation of America, the State and Territorial Air Pollution Control Administrators, and the North American Radon Association.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

I encourage my colleagues to consponsor this resolution and I ask unanimous consent that a copy of the Senate Joint Resolution 317 be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 317

Whereas exposure to radon poses a serious threat to the health of the people of this Nation;

Whereas the Environmental Protection Agency estimates that lung cancer attributable to radon exposure causes approximately 20,000 deaths a year in the United States;

Whereas the United States has set a long-term national goal of making the air inside buildings as free of radon as the ambient air;

Whereas excessively high levels of radon in homes and schools can be reduced successfully and economically with appropriate treatment;

Whereas only about 2 percent of the homes in this Nation have been tested for radon levels;

Whereas the people of this Nation should be educated about the dangers of exposure to radon; and

Whereas people should be encouraged to conduct tests for radon in their homes and schools and to make the repairs required to reduce excessive radon levels: Now, therefore be it

*Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled,* That the week of October 14, 1990, through October 20, 1990, is designated as "National Radon Action Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

## JUST SAY NO TO DRUGS

Mr. WARNER. Mr. President, I rise to share with my colleagues an experience I had just moments ago on the steps that lead to this Chamber. There, on this beautiful spring day, I met with 150 fifth graders from the Little Creek Elementary School in Norfolk, VA, who are members of the Just Say No Club at that school. These fine young boys and girls brought me a message: A message of hope and commitment to keep drugs and alcohol out of their lives. So impressed was I with their earnest desire, and that of their teachers, to spread the message of leading drug-free lives that I came directly to the Senate floor to share with you this memorable visit. We all meet many students on the famous Senate steps, but this group will always be remembered.

I told them that we have witnessed historic changes throughout the world, especially in Europe. At no other time in the past 40 years has the possiblity of an armed conflict between our own Nation and the forces of communism been less likely than it is today. But there is another war taking place right now within our own borders. The war on drugs is as nasty and brutish a conflict as our Nation has ever experienced. The effects of drug abuse are devastating to individual, families and entire communities, particularly our young people. Perhaps the greatest hope we have to combat this scourge rests with our young people. The age of my visitors 10 to 12 is the perfect time to start.

I have seldom been more moved, nor seldom spent a more worthwhile moment as a U.S. Senator than the few minutes I spent with the children from Little Creek Elementary School. I respectfully request that their letter to me—and for all Senators—together with their pledge, stated by all of them on the Senate steps, be made a part of the official proceedings of the Congress of the United States on this day.

It serves as a call to action for their friends, teachers, and parents all across our beautiful United States of America.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LITTLE CREEK ELEMENTARY SCHOOL,
*Norfolk, VA, May 10, 1990.*

Senator JOHN W. WARNER,
*U.S. Senate, Washington, DC.*

DEAR SENATOR WARNER: We are members of the fifth grade Just Say No Club at Little Creek Elementary in Norfolk, Virginia. We are pleased to have this opportunity to meet you and thank you for all you have done in the fight against drugs.

We were very excited to hear your announcement that Virginia law enforcement agencies will receive a $9.2 million grant from the U.S. Department of Justice to continue and expand anti-drug efforts. This is a $6.2 million increase over last year. It will be used not only in our cities but in our rural communities as well. You said that the illicit drug trade is a very serious challenge to our sheriffs, police officers, and courts, and that this grant will help alleviate the financial strain on existing programs.

We were also very interested in your recent visit to the Little Creek Naval Amphibious Base where you spoke with local, State, and Federal narcotics officers. You told them that the international drug war is as serious as any threat of a shooting war from an enemy, and that they were fighting to rid the nation of its worst problem.

Your actions are proving that you feel the war on drugs is the Number 1 issue facing America. this country needs congressmen like you who will work toward ridding America of all drug crimes.

Sincerely,

FIFTH GRADE JUST SAY NO CLUB.

"WE SAY NO TO DRUGS" PLEDGE

I know who I am and I know that I want to stay healthy and happy.

I can stand up for myself and stick to my decision to live a drug-free life.

I can ask for support from my friends and my family.

I pledge to say "No" to drugs and alcohol.

I can help others say "No" to drugs and alcohol.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 11:12 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 1028. An act to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the Golden Anniversary of the Mount Rushmore National Memorial;

H.R. 2761. An act to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the United Services Organization;

H.R. 4612. An act to amend title 11 of the United States Code regarding swap agreements and forward contracts; and

H.J. Res. 508. Joint resolution designating May 1990 as "Take Pride in America Month."

## MEASURES REFERRED

The following bills and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1028. An act to require the Secretary of the Treasury to mint coins in commemoration of the Golden Anniversary of the Mount Rushmore National Memorial to the Committee on Banking, Housing, and Urban Affairs;

H.R. 2761. An act to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the United Services Organization; to the Committee on Banking, Housing, and Urban Affairs; and

H.J. Res. 508. Joint resolution designating May 1990 as "Take Pride in America Month"; to the Committee on the Judiciary.

## MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 4612. An act to amend title 11 of the United States Code regarding swap agreements and forward contracts.

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports and documents, which were referred as indicated:

EC-3004. A communication from the Secretary of Agriculture, transmitting drafts of proposed legislation entitled the "Plant Protection Act" and the "Animal Health Protection Act"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3005. A communication from the chief of the Forest Service, U.S. Department of Agriculture, transmitting, pursuant to law, the final 1989 report of the Forest Service; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3006. A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, the cumulative report of the Office on rescissions and deferrals; pursuant to the order of January 30, 1975, as modified by the order of April 26, 1986 referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC-3007. A communication from the Director of the Defense Security Assistance Agency, Department of Defense, transmitting, pursuant to law, a report on the Department of the Air Force's proposed letters of Offer and Acceptance to Norway for defense articles estimated to cost $50 million or more; to the Committee on Armed Services.

EC-3008. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on section 3 of the Housing and Urban Development Act of 1968; to the Committee on Banking, Housing, and Urban Affairs.

EC-3009. A communication from the general counsel of the Department of Transportation, transmitting, pursuant to law, the fiscal year 1991 budget requests of the Federal Aviation Administration to the Department; to the Committee on Commerce, Science, and Transportation.

EC-3010. A communication from the Secretary of Transportation, transmitting, pursuant to law, the eighth annual report of accomplishments under the Airport Improvement Program; to the Committee on Commerce, Science, and Transportation.

EC-3011. A communication from the chairman of the Federal Election Commission, transmitting pursuant to law, the semiannual report of the Commission's Inspector General; to the Committee on Governmental Affairs.

EC-3012. A communication from the chairman of the U.S. International Cultural and Trade Center Commission, transmitting, pursuant to law, the Commission's first annual report in compliance with the Inspector General Act Amendments of 1988; to the Committee on Governmental Affairs.

EC-3013. A communication from the Attorney General of the United States, transmitting a draft of proposed legislation entitled the "Cooperative Production Act of 1990"; to the Committee on the Judiciary.

EC-3014. A communication from the chairman of the U.S. Railroad Retirement Board, transmitting an informational report on the functions of the Board; to the Committee on Labor and Human Resources.

EC-3015. A communication from the Secretary of Transportation, transmitting, pursuant to law, the Airport Noise Compatibility Planning Program report; to the Committee on Commerce, Science, and Transportation.

EC-3016. A communication from the Director of the Office of National Drug Control Policy, Executive Office of the President, transmitting a draft of proposed legislation entitled the "National Drug Control Strategy Implementation Act of 1990"; to the Committee on the Judicary.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute and an amendment to the title:

S. 1719: A bill to designate a segment of the Colorado River in the Westwater Canyon, Utah as a component of the National Wild and Scenic Rivers System (Rept. No. 101-296).

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

S. 666: A bill to enroll twenty individuals under the Alaska Native Claims Settlement Act (Rept. No. 101-297).

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolution were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DOLE (by request):

S. 2652. A bill to implement the National Drug Control Strategy; to the Committee on the Judiciary.

By Mr. BURNS (for himself, Mr. GRASSLEY, Mr. SYMMS, Mr. BURDICK, Mr. BOREN, Mr. PRESSLER, Mr. NICKLES, and Mr. DOLE):

S. 2653. A bill to permit States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to vehicles used to transport farm supplies from retail dealers to or from a farm, and to vehicles used for custom harvesting, whether or not such vehicles are controlled and operated by a farmer; to the Committee on Commerce, Science, and Transportation.

By Mr. HARKIN (for himself, Mr. HATFIELD, Mr. SASSER, Mr. METZENBAUM, and Mr. PELL):

S. 2654. A bill to provide for an intensified national effort to improve the health and enhance the independence of older Americans through research, training, treatment, and other means, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. STEVENS:

S. 2655. A bill to authorize a certificate of documentation for the vessel *Artic Fisher*; to the Committee on Commerce, Science, and Transportation.

S. 2656. A bill to authorize a certificate of documentation for the vessel *Pumpkin*; to the Committee on Commerce, Science, and Transportation.

By Mr. BRADLEY:

S. 2657. A bill to direct the Secretary of the Interior, acting pursuant to the Reclamation Act of 1902 (Act of June 17, 1902, 32 Stat. 388) and Acts amendatory thereof and supplementary thereto, to undertake certain studies to investigate opportunities for wastewater reclamation and reuse, to conduct studies of groundwater, and for other

purposes; to the Committee on Energy and Natural Resources.

S. 2658. A bill to establish conditions for the sale and delivery of water from the Central Valley Project, CA, a Bureau of Reclamation facility, and for other purposes; to the Committee on Energy and Natural Resoures.

S. 2659. A bill to amend and supplement Federal reclamation law to eliminate abuses of the Reclamation program, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BREAUX:

S. 2660. A bill to authorize a certificate of documentation for the vessel *Bounty*; to the Committee on Commerce, Science, and Transportation.

By Mr. LAUTENBERG:

S.J. Res. 320. A joint resolution designating July 2, 1990, as "National Literacy Day"; to the Committee on the Judiciary.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. KASSEBAUM (for herself, Mr. CHAFEE, Mr. INOUYE, and Mr. DOLE):

S. Res. 288. A resolution expressing the sense of the Senate regarding the reopening of universities in the West Bank and Gaza without delay; to the Committee on Foreign Relations.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOLE (by request):

S. 2652. A bill to implement the national drug control strategy; to the Committee on the Judiciary.

NATIONAL DRUG CONTROL STRATEGY IMPLEMENTATION ACT

Mr. DOLE. Mr. President, today I am introducing the National Drug Control Strategy Implementation Act of 1990.

This bill was sent to the Congress by the Director of the Office of National Drug Control Policy, William Bennett, after consulting with the executive branch departments and agencies with direct authority over illicit drug supply and demand reductions.

Over the past several years, the Congress has greatly expanded the authority and funding for these agencies. At the same time, we directed Director Bennett to undertake a review of these programs and inform us of failures and successes, as well as recommending changes to existing law which would aid in the effort to eliminate drug abuse in the United States.

The bill I am introducing on behalf of the administration will add several essential tools to both supply and demand reduction.

MAJOR PROVISIONS

Mr. President, there are many important provisions in this bill, but I will highlight only a few. First, it includes a revised version of an initiative which was included in the first national drug control strategy, but which was never approved by the Congress. It requires States, as a condition on receiving Federal justice assistance funds, to conduct drug tests on a number of individuals arrested, incarcerated, or on probation or parole. As I said, this proposal has been revised to eliminate previous objections, and is necessary to define the successes and failures of our overall antidrug program. To complement State testing regimes, it imposes a similar testing requirement on the Federal criminal justice system.

Second, the bill includes another recommendation of the first national drug control strategy that the Congress has also failed to send to the President. It requires States, as a condition on receiving funds from the Alcohol, Drug Abuse and Mental Health Administration [ADAMHA], to implement statewide treatment plans to expand capacity, assess need, improve referrals, provide training and coordination. With calls for even more funds for treatment, this additional accountability for treatment providers is the least we should demand in return for the huge increases we have agreed to provide in treatment funding.

With respect to ADAMHA funding, it also prohibits States from reducing their share of drug treatment money. Historically, this has been a program of cooperation in both technical and financial resources, this bill would ensure that cooperation continues.

To more fully address the heinous nature of crimes committed by drug traffickers, the bill includes a death penalty for major drug kingpins who attempt a killing to obstruct an invesigation or prosecution of a drug offense, and those who commit a drug felony which results in a death. This provision will expand the existing Federal death penalty for drug kingpins who commit murder.

It enhances our ability to combat drugs internationally by extending certain waivers for the Andean initiative, which seeks to reduce the production of coca and coca paste in Peru and Bolivia and its refining into cocaine in Colombia and other South American countries. In addition, it would allow for the extradition from the United States drug suspects wanted by foreign countries, even if we are not obligated to extradite by treaty. As we continue to seek extradition of foreign drug lords for prosecution by U.S. courts, we shuld be willing to assist other nations in similar efforts.

Finally, a number of improvements for law enforcement and the criminal justice system are included. The Immigration and Naturalization Service would be given expedited procedures for deportation of criminal aliens and be given arrest authority, additional protection for judges, jurors, and witnesses is expanded, new sanctions for public corruption and sale of drug paraphernalia are included and new penalties added for those who fail to land aircraft and water-going vessels upon the order of law enforcement officials.

Mr. President, I ask unanimous consent that a copy of the bill and a section-by-secton analysis of the bill, and Mr. Bennett's letter of transmittal be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2652

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Drug Control Strategy Implementation Act of 1990".

SECTION 21. TABLE OF TITLES.

Title I—Drug Testing, Funding Programs, and Treatment.
Subtitle A—Funding Programs and Treatment.
Subtitle B—Drug-Testing of Defendants on Post-Conviction Release.
Title II—Sanctions for Failure to Land or to Bring To.
Title III—Drug Paraphernalia.
Title IV—International Narcotics Control.
Title V—Death Penalty for Drug Kingpins and other Crime Control Provisions.
Subtitle A—Capital Punishment for Drug Kingpins and Related Offenders.
Subtitle B—Protection of Witnesses, Jurors, and Court Officers.
Title VI—Justice System Improvements.
Subtitle A—INS System Improvements.
Subtitle B—Protection of Witnesses, Jurors, and Court Officers.
Title VII—Amendments Related to Asset Forfeiture and Money Laundering.
Subtitle A—Special Forfeiture Fund.
Subtitle B—Forfeiture Amendments.
Subtitle C—Money Laundering Amendments.
Title VIII—Miscellaneous and Technical Amendments.

TITLE I—DRUG TESTING, FUNDING PROGRAMS, AND TREATMENT

Sec. 1001. Table of Contents.
Subtitle A—Funding Programs and Treatment.
Sec. 1101. Drug testing in the criminal justice system as a condition of receipt of Justice Drug Grants.
Sec. 1102. Maintenance of effort in ADMS block grants.
Sec. 1103. Establishment of statewide drug treatment plans; amendment to chapter 6A of title 42 (Public Health Service Act).
Sec. 1104. Raising the Cap on Discretionary Grants for Justice Drug Grants.
Subtitle B—Drug-Testing of Defendants on Post Conviction Release
Sec. 1201. Drug testing program.
Sec. 1202. Drug testing condition.
Sec. 1203. Revocation of release.

Subtitle A—Drug Testing and Treatment

SEC. 1101. DRUG TESTING IN THE CRIMINAL JUSTICE SYSTEM AS A CONDITION OF RECEIPT OF JUSTICE DRUG GRANTS.

(a) IN GENERAL—Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711 et seq.) is amended by adding at the end of part E (42 U.S.C. 3750-3766b) the following:

"DRUG TESTING PROGRAMS

"SEC. 523. (a) PROGRAM REQUIRED.—No funding shall be provided under this part, whether by direct grant, cooperative agreement, or assistance in any form, to any State or to any political subdivision or instrumentality of a State that has not formulated and implemented a drug testing program, subject to periodic review by the Attorney General, as specified in the regulations described in subsection (b), for targeted classes of arrestees, individuals in jails, prisons, and other correctional facilities, and persons on conditional or supervised release before or after conviction, including probationers, parolees, and persons released on bail.

"(b) REGULATIONS.—The Attorney General shall, not later than six months after the enactment of this section, promulgate regulations for drug testing programs under this section, which shall be based in part on scientific and technical standards determined by the Secretary of Health and Human Services to ensure reliability and accuracy of drug test results. In addition to specifying acceptable methods and procedures for carrying out drug testing, the regulations may include guidelines or specifications concerning—

"(1) the classes of persons to be targeted for testing;

"(2) the drugs to be tested for;

"(3) the frequency and duration of testing; and

"(4) the effect of test results in decisions concerning the sentence, the conditions to be imposed on release before or after conviction, and the granting, continuation, or termination of such release.

"(c) EFFECTIVE DATE.—This section shall take effect with respect to any State, subdivisions, or instrumentality receiving or seeking funding under this subchapter at a time specified by the Attorney General, but no earlier than the promulgation of the regulations required under subsection (b).".

"(b) AMENDMENT TO TABLE OF CONTENTS.—The table of contents of Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711 et seq.) is amended by inserting at the end of the item relating to part E the following:

"Sec. 523. Drug Testing Programs.".

SEC. 1102. MAINTENANCE OF EFFORT IN ADMS BLOCK GRANTS.

Amends section 1916(c)(11) of the Public Health Service Act to read as follows:

"(11)(A)(i) The State agrees to maintain State expenditures for alcohol, drug abuse, and community mental health services at a level equal to not less than the average level of such expenditures maintained by the State for the 2-year period preceding the fiscal year for which the State is applying to receive payments under section 1914; (ii) provided however that the State shall maintain State expenditures for drug abuse related services provided pursuant to this subpart at a level equal to not less than the average amount of such expenditures for the preceding two years.

"(B) The Secretary may, upon the request of a State, waive the requirement established in subparagraph (A) if the Secretary determines that extraordinary economic conditions in the State justify the waiver of the provisions contained in subsection (i) or if the Secretary determines that other extraordinary conditions in the State justify the waiver of the provisions contained in subsection (ii).

"(C) The Secretary shall promulgate regulations implementing this subsection of law which shall include, but not be limited to, the procedures by which a full or partial waiver may be granted.".

SEC. 1103. ESTABLISHMENT OF STATEWIDE DRUG TREATMENT PLANS: AMENDMENT TO CHAPTER 6A OF TITLE 42 (PUBLIC HEALTH SERVICE ACT).

Title XIX of the Public Health Service Act is amended by inserting after section 1916A the following:

"STATEWIDE DRUG TREATMENT PLAN

"SEC. 1916B. (a) NATURE OF PLAN.—In order to receive the drug abuse portion of its allotment for a fiscal year under section 1912A, a State shall develop, implement and submit as part of the application required by section 1916(a) an approved Statewide Drug Treatment Plan, prepared according to regulations promulgated by the Secretary, which shall contain the following:

"(1) the single, designated State agency for formulating and implementing the Statewide Drug Treatment Plan,

"(2) a description of the mechanism that shall be used to assess the needs for drug treatment in localities throughout the State including the presentation of relevant data,

"(3) a description of a Statewide plan that shall be implemented to expand treatment capacity and overcome obstacles that restrict the expansion of treatment capacity (such as zoning ordinances), or an explanation of why such a plan is unnecessary,

"(4) a description of performance-based criteria that shall be used to allocate funds to drug treatment facilities receiving funding under this subpart,

"(5) a description of the drug-free patient and workplace programs (all of which must include drug testing) to be utilized in drug treatment facilities and progras,

"(6) a description of the mechanism that shall be used to make funding allocations under this subpart,

"(7) a description of the actions that shall be taken to improve the referral of drug users to treatment facilities that offer the most appropriate treatment modality,

"(8) a description of the program of in-service training that shall be implemented for employees of treatment facilities receiving Federal funds, designed to permit such employees to stay abreast of the latest and most effective treatment techniques,

"(9) a description of the plan that shall be implemented to coordiante drug treatment facilities with other social, health, correctional and vocational services in order to assist or refer those patients in need of such additional services, and

"(10) a description of the plan that will be implemented to expand and improve efforts to contact and treat expectant women who use drugs and to provide appropriate follow-up care to their affected newborns.

"(b) SUBMISSION OF PLAN.—The plan required by subsection (a) shall be submitted to the Secretary annually for review and approval. The Secretary shall have the authority to review and approve or disapprove State plans, and to propose changes to them.

"(c) SUBMISSION OF PROGRESS REPORTS.—Each State shall submit such reports, in such form, and containing such information as the Secretary may, from time to time, require, and will comply with such additional provisions as the Secretary may from time to time find necessary to verify the accuracy of such reports.

"(d) WAIVER OF PLAN REQUIREMENT.—At his discretion, the Secretary may waive any or all of the requirements of this subsection upon the written request of a State, provided the State implements an alternative treatment plan that fulfills the objectives of this subsection.

"(e) DEFINITION.—For purposes of this section, the term "drug abuse portion" means the amount of a State's allotment under section 1912A that is required by this subpart, or by any other provision of law, to be used for programs or activities relating to drug abuse.".

(b) REGULATIONS AND EFFECTIVE DATE.—

(1) The Secretary shall promulgate regulations to carry out section 1916B of the Public Health Service Act no later than six months following the date of this Act.

(2)(A) Sections 1916B(a)(4) and (a)(5) of that Act are effective beginning with the second fiscal year beginning after the date final regulations are published in the Federal Register.

(B) The remainder of that section is effective beginning with the first fiscal year beginning after the date final regulations are published in the Federal Register.

SEC. 1104. RAISING THE CAP ON DISCRETIONARY GRANTS FOR JUSTICE DRUG GRANTS.

In section 511 of the Omnibus Crime Control and Safe Streets Act of 1968 (P.L. 90-351), as amended by the Anti-Drug Abuse Act of 1988 (P.L. 100-690), strike the term "$50,000,000" and insert in lieu thereof the term "$100,000,000".

Subtitle B—Drug-Testing of Defendants on Post-Conviction Release

SEC. 1201. DRUG TESTING PROGRAM.

(a) Chapter 229 of title 18, United States Code, is amended by adding at the end thereof the following new section:

**§ 3608. Drug testing of defendants on post-conviction release.**

"The Director of the Administrative Office of the United States Courts shall, as soon as is practicable after the effective date of this section, establish a program of drug testing of criminal defendants on post-conviction release. In each district where it is feasible to do so, the chief probation officer shall arrange for the drug testing of defendants on post-conviction release pursuant to a conviction for a felony or other offense described in section 3563(a)(4) of this title.".

(b) The section analysis for chapter 229 of title 18, United States Code, is amended by adding at the end thereof the following: "3608. Drug testing of defendants on post-conviction release."

SEC. 1202. DRUG TESTING CONDITION

(a) Section 3563(a) of title 18, United States Code, is amended—

(1) in paragraph (2), by striking out "and";

(2) in paragraph (3), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding a new paragraph (4), as follows:

"(4) for a felony, an offense involving a firearm as defined in section 921 of this title, a drug or narcotic offense as defined in section 404(c) of the Controlled Substances Act (21 U.S.C. 844(c)), or a crime of violence

as defined in section 16 of this title, that the defendant refrain from any unlawful use of a controlled substance and submit to periodic drug tests (as determined by the court) for use of a controlled substance. This latter condition may be suspended or ameliorated upon request of the Director of the Administrative Office of the United States Courts, or the Director's designee. No action may be taken against a defendant pursuant to a drug test administered in accordance with this paragraph or sections 3583(d) or 4209(a) of this title, unless the drug test confirmation is a urine drug test confirmed using gas chromatography/mass spectrometry techniques or such test as the Director of the Administrative Office of the United States Court after consultation with the Secretary of Health and Human Services may determine to be of equivalent accuracy.".

(b) Section 3583(d) of title 18, United States Code, is amended by inserting after the first sentence the following: "For a defendant convicted of a felony or other offense described in section 3563(a)(4) of this title, the court shall also order, as an explicit condition of supervised release, that the defendant refrain from any unlawful use of a controlled substance and submit to periodic drug tests (as determined by the court) for use of a controlled substance. This latter condition may be suspended or ameliorated as provided in section 3563(a)(4) of this title.".

(c) Section 4209(a) of title 18, United States Code, is amended by inserting after the first sentence the following: "If the parolee has been convicted of a felony or other offense described in section 3563(a)(4) of this title, the Commission shall also impose as a condition of parole that the parolee refrain from any unlawful use of a controlled substance and submit to periodic drug tests (as determined by the Commission) for use of a controlled substance. This latter condition may be suspended or ameliorated as provided in section 3563(a)(4) of this title."

SEC. 1203. REVOCATION OF RELEASE

(a) Section 3565(a) of title 18, United States Code, is amended by inserting in the final sentence after "3563(a)(3)," the following: "or unlawfully uses a controlled substance or refuses to cooperate in drug testing, thereby violating the condition imposed by section 3563(a)(4),".

(b) Section 3583(g) of title 18, United States Code, is amended by inserting after "substance" the following: "or unlawfully uses a controlled substance or refuses to cooperate in drug testing imposed as a condition of supervised release,".

(c) Section 4214(f) of title 18, United States Code, is amended by inserting after "substance" the following: ", or who unlawfully uses a controlled substance or refuses to cooperate in drug testing imposed as a condition of parole,".

## TITLE II—SANCTIONS FOR FAILURE TO LAND OR TO BRING TO

Sec. 2001. Table of Contents.
Sec. 2101. Sanctions for failure to land or bring to.
Sec. 2102. FAA summary revocation authority.
Sec. 2103. Coast Guard air interdiction authority.
Sec. 2104. Coast Guard civil penalty provisions.
Sec. 2105. Customs orders.
Sec. 2106. Customs civil penalty provisions.

SEC. 2101. SANCTIONS FOR FAILURE TO LAND OR TO BRING TO.

(a) Chapter 109 of title 18 of the United States Code, is amended by adding at the end thereof the following new section:

"SEC. 2237. ORDER TO LAND OR BRING TO.

"(a)(1) In the enforcement of the laws of the United States relating to controlled substances as that term is defined in 21 U.S.C. 802(6) of money laundering (18 U.S.C. 1956-57), it shall be unlawful for the pilot, operator, or person in charge of any aircraft which has crossed the border of the United States, or any aircrat subject to the jurisdiction of the United States operating outside the United States to refuse to obey the order of an authorized Federal law enforcement officer to land.

"(a)(2) The Administrator of the Federal Aviation Administration and the Commissioner of Customs, upon consultation with the Attorney General, shall promulgate regulations governing the means by which an order to land may be communicated to the pilot, operator, or person in charge of an aircraft by Federal law enforcement officers.

"(a)(3) The enactment of this section shall not be construed to limit in any way the pre-existing authority of a customs officer under 19 U.S.C. 1581(d) or any other provision of law enforced or administered by the Customs Service, or the preexisting authority of any Federal law enforcement officer under any law of the United States to order an aircraft to land or a vessel to bring to.

"(b) It is unlawful for any master, operator, or person in charge of a vessel of the United States or a vessel subject to the jurisdiction of the United States to fail to bring to that vessel on being ordered to do so by a Federal law enforcement officer authorized to issue such an order.

"(c) Consent or waiver of objection by a foreign nation to the enforcement of United States law by the United States under this section may be obtained by radio, telephone, or similar oral or electronic means, and may be proved by certification of the Secretary of State or the Secretary's designee.

"(d) For purposes of this section:

"(1) a "vessel of the United States" or a "vessel subject to the jurisdiction of the United States" has the meaning set forth in the Maritime Drug Enforcement Act (46 U.S.C. App. 1901 et seq.).

"(2) an aircraft "subject to the jurisdiction of the United States" includes—

"(A) an aircraft located over the United States or the customs waters of the United States;

"(B) an aircraft located in the airspace of a foreign nation, where that nation consents to the enforcement of United States law by the United States; and

"(C) over the high seas, an aircraft without nationality, an aircraft of United States registry, or an aircraft registered in a foreign nation where the nation of registry has consented or waived objection to the enforcement of United States law by the United States.

"(3) "bring to" means to cause a vessel to slow or come to a stop to facilitate a law enforcement boarding by adjusting the course and speed of the vessel to account for the weather conditions and sea state.

"(4) "Federal law enforcement officer" has the meaning set forth in section 115 of this title.

"(e) A person who intentionally violates the provisions of this section shall be subject to—

"(1) imprisonment for not more than two years; and

"(2) a fine as provided in this title.

"(f) Any vessel or aircraft that is used in a violation of this section may be seized and forfeited. The provisions of law relating to the seizure, summary and judicial forfeiture, and condemnation of property for violation of the customs laws, the disposition of such property or the proceeds from the sale thereof, the remission or mitigation of such forfeitures, and the compromise of claims, shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under any of the provisions of this section; except that such duties as are imposed upon the customs officer or any other person with respect to the seizure and forfeiture of property under the customs laws shall be performed with respect to seizures and forfeitures of property under this section by such officers, agents, or other persons as may be authorized or designated for that purpose. Any vessel or aircraft that is used in a violation of this section is also liable in rem for any fine imposed under this section.".

(b) The analysis for chapter 109 of title 18, United States Code, is amended by adding at the end the following:

"2237. Order to land or to bring to.".

SEC. 2102. FAA SUMMARY REVOCATION AUTHORITY.

Title V of the Federal Aviation Act of 1958, as amended (49 U.S.C. App. 1401), is amended by adding a new section 501(e)(3) to read as follows:

"(e)(3)(A) The registration of an aircraft shall be immediately revoked upon the failure of the operator of an aircraft to follow the order of a law enforcement officer to land an aircraft, as provided in section 2237 of title 18 of the United States Code. The Administrator shall notify forthwith the owner of the aircraft that the owner of the aircraft no longer holds United States registration for that aircraft.

"(B) The Administrator shall establish procedures for the owner of the aircraft to show cause why (i) the registration was not revoked, as a matter of law, by operation of paragraph (A) of this subsection; or (ii) cricumstances existed pursuant to which the Administrator should determine that, notwithstanding paragraph (A) of this subsection, it would be in the public interest to issue a new certificate of registration to the owner to be effective concurrent with the revocation occasioned by paragraph (A) of this subsection.".

SEC. 2103. COAST GUARD AIR INTERDICTION AUTHORITY.

(a) Title 14 of the United States Code is amended by adding a new Section 152 to read as follows:

"§ 152. Air interdiction authority

"The Coast Guard may issue orders and make inquiries, searches, seizures, and arrests with respect to violations of laws of the United States occurring aboard any aircraft over the high seas and waters over which the United States has jurisdiction. Orders to land an aircraft must be communicated pursuant to regulations promulgated pursuant to section 2237 of title 18, United States Code.".

(b) The analysis of title 14, United States Code, is amended by adding, immediately after item 151,

"152. Air interdiction authority."

SEC. 2104. COAST GUARD CIVIL PENALTY PROVISIONS.

(a) Title 14 of the United States Code is amended by adding a new section 640 to read as follows:

**"§ 640. Civil penalty for failure to comply with a lawful boarding or order to land**

"(a) The master, operator or person in charge of a vessel or the pilot or operator of an aircraft who intentionally fails to comply with an order of a Coast Guard commissioned officer, warrant officer, or petty officer relating to the boarding of a vessel or landing of an aircraft in violation of section 2237 of title 18, United States Code, is liable to the United States Government for a civil penalty of not more than $25,000, which may be assessed by the Secretary after notice and opportunity to be heard.

"(b) The master, operator or person in charge of a vessel or the pilot or operator of an aircraft who negligently fails to comply with an order of a Coast Guard commissioned officer, warrant officer, or petty officer relating to the boarding of a vessel or landing of an aircraft in violation of section 2237 of title 18, United States Code, is liable to the United States Government for a civil penalty of not more than $5,000, which may be assessed by the Secretary after notice and opportunity to be heard.

"(c) Any vessel or aircraft used in violation of section 2237 of title 18, United States Code, is also liable in rem for the penalty assessed under this section.".

(b) The analysis of title 14, United States Code, is amended by adding, immediately after item 639,

"640. Civil penalty for failure to comply with a lawful boarding or order to land.".

SEC. 2105. CUSTOMS ORDERS

(a) Section 581 of the Tariff Act of 1930, as amended (19 U.S.C. 1581) is further amended by adding a paragraph (i) to read as follows:

"(i) As used in this section, the term "authorized place" includes—

"(1) with respect to a vehicle, any location in a foreign country at which United States Customs Officers are permitted to conduct inspections, examinations or searches;

"(2) with respect to aircraft to which this section applies by virtue of section 644 of this Act (19 U.S.C. 1644), or regulations issued thereunder, or section 2237 of title 18 of the United State Code, any location outside of the United States, including a foreign country at which United States Customs Officers are permitted to conduct inspections, examinations, or searches."

SEC. 2106. CUSTOMS CIVIL PENALTY PROVISIONS.

(a) The Tariff Act of 1930, as amended, is further amended by adding a new section 591 (19 U.S.C. 1591) as follows:

SEC. 1591. CIVIL PENALTY FOR FAILURE TO OBEY AN ORDER.

"(a) The pilot or operator of an aircraft who intentionally fails to comply with an order of an officer of the customs relating to the landing of an aircraft in violation of section 1581 of this title, or of section 2237 of title 18 of the United State Code, is subject to a civil penatly of not more than $25,000 which may be assessed by the appropriate customs officer.

"(b) The pilot or operator of an aircraft who negligently fails to comply with an order of an officer of the customs relating to the landing of an aircraft in violation of section 1581 of this title, or of section 2237 of title 18 of the United State Code, is subject to a civil penatly of not more than $5,000 which may be assessed by the appropriate customs officer.

## TITLE III—DRUG PARAPHERNALIA AMENDMENT.

SEC. 3001. DRUG PARAPHERNALIA AMENDMENT.

(a) CIVIL FORFEITURE AND CIVIL ENFORCEMENT.—Section 1822 of the Anti-Drug Abuse Act of 1986 (P.L. 99-570; 21 U.S.C. 857) is amended—

(1) in subsection (c), by inserting "pursuant to section 413 of the Controlled Substances Act (21 U.S.C. 853)" after "subject to seizure and forfeiture";

(2) in subsection (b), by striking "not more than $100,000" and inserting "under title 18, United States Code;" and

(3) by adding the following new subsection:

"(g) CIVIL ENFORCEMENT.—The Attorney General may bring a civil action against any person who violates the provisions of this section. The action may be brought in any district court of the United States or the United States courts of any territory in which the violation is taking or has taken place. The court in which such action is brought shall determine the existence of any violation by a preponderance of the evidence, and shall have the power to assess a civil penalty of up to $100,000 and to grant such other relief including injunctions as may be appropriate. Such remedies shall be in addition to any other remedy available under statutory or common law.".

(b) CIVIL FORFEITURE FOR DRUG PARAPHERNALIA.—Section 1822 of the Anti-Drug Abuse of 1986. (P.L. 99-570; 21 U.S.C. 857) is amended by inserting the following as a new subsection (h):

"(h) CIVIL FORFEITURE; APPLICABILITY OF THE CUSTOMS LAWS.—Any drug paraphernalia and other property, real or personal, involved in any violation of subsection (a) of this section, and any property traceable to such property, shall be subject to seizure and forfeiture. All provisions of law relating to seizure, summary and judicial forfeiture and condemnation for violation of the Customs laws, the disposition of the property forfeited or condemned or the proceeds from the sale thereof, the remission or mitigation of such forfeitures, and the compromise of claims and award of compensation to informers in respect to such forfeitures shall apply to seizures and forfeitures incurred under the provisions of this section, insofar as applicable and not inconsistent with the provisions hereof.".

## TITLE IV—INTERNATIONAL NARCOTICS CONTROL

Sec. 4001. Table of Contents.
Sec. 4101. Economic assistance for Andean countries.
Sec. 4102. Support for law enforcement.
Sec. 4103. Waiver of Brooke-Alexander amendment.
Sec. 4104. Assistance for agricultural and industrial alternatives to narcotics production.
Sec. 4105. Revisions of certain narcotics related provisions of the Foreign Assistance Act.
Sec. 4106. Size of the military assistance group in Bolivia and Peru.
Sec. 4107. Nonapplicability of certification procedures to certain major drug-transit countries.
Sec. 4108. Extradition of U.S. citizens.
Sec. 4109. Export-Import Bank financing for sales of defense articles and services for anti-narcotics purposes.

SEC. 4101. ECONOMIC ASSISTANCE FOR ANDEAN COUNTRIES

The Foreign Assistance Act of 1961, as amended, is amended by adding a new section as follows:

"SEC. 536. ECONOMIC ASSISTANCE FOR ANDEAN COUNTRIES.—The President may provide narcotics-related assistance under this chapter and chapter 1 of part I of this Act to Bolivia, Colombia, and Peru, notwithstanding any other provision of law, except that such assistance shall be subject to sections 116, 481, 502B, and 620A of the Act.".

SEC. 4102. SUPPORT FOR LAW ENFORCEMENT

Section 660 of the Foreign Assistance Act of 1961 (22 U.S.C. 2292) is amended by adding a new subsection (e):

"(e) Notwithstanding the prohibition contained in Subsection (a), funds made available under this Act and the Arms Export Control Act may be provided for training and equipment for law enforcement agencies or other units in Colombia, Bolivia, and Peru that are organized for the specific purpose of narcotics enforcement.".

SEC. 4103. WAIVER OF BROOKE-ALEXANDER AMENDMENT.

During fiscal year 1991, section 620(q) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370(q)) and similar provisions relating to limitations on assistance to countries in default on obligations owed to the Unites States contained in an Act making appropriations for foreign operations, export financing, and related programs, shall not apply with respect to narcotics-related assistance for a country which is a major illicit drug producing country (as defined in section 418(i)(2) of the Foreign Assistance Act of 1961) because of its coca production.

SEC. 4104. ASSISTANCE FOR AGRICULTURAL AND INDUSTRIAL ALTERNATIVES TO NARCOTICS PRODUCTION

For the purpose of reducing dependence upon the production of crops from which narcotic and psychotropic drugs are derived, the President may provide assistance under chapter 1 of part I and chapter 4 of part II of the Foreign Assistance Act of 1961 to promote the production, processing, or the marketing of products which can be economically produced in those countries, notwithstanding any other provision of law.

SEC. 4105. REVISIONS OF CERTAIN NARCOTICS-RELATED PROVISIONS OF THE FORIEGN ASSISTANCE ACT.

(a) 482(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2292(b)) is amended by adding at the end thereof "except that these funds may be used to procure weapons or ammunition to arm, for defensive purposes, United States-title aircraft used in narcotics control eradication efforts, as well as personnel and agents participating in such efforts".

(b) Section 481 (h)(1)(A) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291(h)(1)(A)) is amended by adding at the end thereof "except that this provision shall not apply if the President determines that its application to a particular country is contrary to the national interest".

(c) Section 484 of the Foreign Assistance Act of 1961 is amended to read as follows:

"Sec. 484. LEASE OR LOAN OF AIRCRAFT.—(a) Any aircraft that is procured with funds authorized to be appropriated by this chapter may be made available to a foreign country only on a lease or loan basis.

"(b) The President may provide aircraft under this chapter on a sale or grant basis notwithstanding subsection (a) when he determines that doing so is in the national in-

terest of the United States and so reports to the Congress."

SEC. 4106. SIZE OF THE MILITARY ASSISTANCE GROUP IN BOLIVIA AND PERU.

The third sentence of section 515(c)(1) of the Foreign Assistance Act of 1961 (relating to countries authorized to have more than 6 members of the Armed Forces assigned to carry out international security assistance programs) is amended by inserting "Bolivia, Peru," after "Colombia,".

SEC. 4107. NONAPPLICABILITY OF CERTIFICATION PROCEDURES TO CERTAIN MAJOR DRUG-TRANSIT COUNTRIES

Section 481(h) of the Foreign Assistance Act of 1961 shall not apply with respect to a major drug-transit country for fiscal year 1991 if the President certifies to the Congress, during that fiscal year, that—

(1) subparagraph (C) of section 481(i)(5) of that Act, related to money laundering, does not apply to that country;

(2) the country previously was a major illicit drug producing country but, during each of the preceding two years, has effectively eliminated illicit drug production; and

(3) the country is cooperating fully with the United States or has taken adequate steps on its own—

(A) in satisfying the goals agreed to in an applicable bilateral narcotics agreement with the United States (as described in section 481(h)(2)(B) of that Act) or a multilateral agreement which achieves the objectives of that section;

(B) in preventing narcotic and psychotropic drugs and other controlled substances transported through such country from being sold illegally within the jurisdiction of such country to United States Government personnel or their dependents or from being transported, directly or indirectly, into the United States; and

(C) in preventing and punishing bribery and other forms of public corruption which facilitates the production, processing or shipment of narcotic and psychotropic drugs and other controlled substances, or which discourage the investigation and prosecution of such acts.

SEC. 4108. EXTRADITION OF U.S. CITIZENS.

(a) IN GENERAL.—Chapter 209 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"SEC. 3196. EXTRADITION OF UNITED STATES CITIZENS.

"The Secretary of State shall have the discretion to order the surrender to a foreign country of a United States citizen whose extradition has been requested by the foreign country, even if the terms of the applicable treaty or convention do not obligate the United States to extradite its citizens, if the other requirements of the applicable treaty or convention are met.".

(b) SECTION ANALYSIS.—The section analysis for chapter 209 of title 18, United States Code, is amended by adding at the end the following:

"3196. Extradition of United States citizens.".

SEC. 4109. EXPORT-IMPORT BANK FINANCING FOR SALES OF DEFENSE ARTICLES AND SERVICES FOR ANTI-NARCOTICS PURPOSES.

Section 2(b)(6)(B)(vi) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(6)) is amended by striking out "1990" and inserting "1992" in lieu thereof.

Section 2(b)(6)(G) of the Export-Import Bank Act of 1945 is amended to read as follows:

"As used in this paragraph, the term 'defense articles and services' shall have the same meaning as under the Arms Export Control Act.".

TITLE V—DEATH PENALTY FOR DRUG KINGPINS AND OTHER CRIME CONTROL PROVISIONS.

Sec. 5001. Table of Contents.

Subtitle A—Capital Punishment for Drug Kingpins and Related Offenders.

Sec. 5101. Short title for Subtitle A.

Sec. 5102. Death Penalty Authorizations and Procedures.

Subtitle B—Protection of Witnesses, Jurors, and Court Officers.

Sec. 5201. Protection of court officers and jurors.

Sec. 5202. Prohibition of retaliatory killings of witnesses, victims, and informants.

SUBTITLE A—CAPITAL PUNISHMENT FOR DRUG KINGPINS AND RELATED OFFENDERS

SEC. 5101. SHORT TITLE FOR SUBTITLE A.

This subtitle may be cited as the "Drug Kingpin Death Penalty Act of 1990."

SEC. 5102. DEATH PENALTY AUTHORIZATIONS AND PROCEDURES.

Title 18 of the United States Code is amended—

(a) by adding the following new chapter after chapter 227:

"CHAPTER 228—DEATH PENALTY

"Sec.
"3591. Sentence of death.
"3592. Factors to be considered in determining whether a sentence of death is justified.
"3593. Special hearing to determine whether a sentence of death is justified.
"3594. Imposition of a sentence of death.
"3595. Review of a sentence of death.
"3596. Implementation of a sentence of death.
"3597. Use of State facilities.
"3598. Appointment of counsel.
"3599. Collateral Attack on Judgment Imposing Sentence of Death.

"§ 3591. Sentence of death

"A defendant who has been found guilty of—

"(a) an offense referred to in section 408(c)(1) of the Controlled Substances Act (21 U.S.C. 848(c)(1)), committed as part of a continuing criminal enterprise offense under the conditions described in subsection (b) of that section;

"(b) an offense referred to in section 408(c)(1) of the Controlled Substances Act (21 U.S.C. 848(c)(1)), committed as part of a continuing criminal enterprise offense under that section, where the defendant is a principal administrator, organizer or leader of such an enterprise, and the defendant, in order to obstruct the investigation or prosecution of the enterprise or an offense involved in the enterprise, attempts to kill or knowingly directs, advises, authorizes, or assists another to attempt to kill any public officer, juror, witness, or member of the family or household of such a person; or

"(c) an offense constituting a felony violation of the Controlled Substances Act (21 U.S.C. 801 et seq.), the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.), or the Maritime Drug Law Enforcement Act (46 U.S.C. App. 1901 et seq.), where the defendant, intending to cause death or acting with reckless disregard for human life, engages in such a violation, and the death of another person results in the course of the violation or from the use of the controlled substance involved in the violation;

shall be sentenced to death if, after consideration of the factors set fourth in section 3592 in the course of a hearing held pursuant to section 3593, it is determined that imposition of a sentence of death is justified: Provided, That no person may be sentenced to death who was less than eighteen years of age at the time of the offense.

"§ 3592. Factors to be considered in determining whether a sentence of death is justified.

"(a) MITIGATING FACTORS.—In determining whether a sentence of death is justified for an offense described in section 3591, the jury, or if there is no jury, the court, shall consider each of the following mitigating factors and determine which, if any, exist:

"(1) MENTAL CAPACITY.—The defendant's mental capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, regardless of whether the capacity was so impaired as to constitute a defense to the charge.

"(2) DURESS.—The defendant was under unusual and substantial duress, regardless of whether the duress was of such a degree as to constitute a defense to the charge.

"(3) PARTICIPATION IN OFFENSE MINOR.—The defendant is punishable as a principal (as defined in section 2 of title 18 of the United States Code) in the offense, which was committed by another, but the defendant's participation was relatively minor, regardless of whether the participation was so minor as to constitute a defense to the charge.

The jury, or if there is no jury, the court, shall consider whether any other aspect of the defendant's character or record or any other circumstance of the offense that the defendant may proffer as a mitigating factor exists.

"(b) AGGRAVATING FACTORS.—In determining whether a sentence of death is justified for an offense described in section 3591, the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist—

"(1) PREVIOUS CONVICTION OF OFFENSE FOR WHICH A SENTENCE OF DEATH OR LIFE IMPRISONMENT WAS AUTHORIZED.—The defendant has previously been convicted of another Federal or State offense resulting in the death of a person, for which a sentence of life imprisonment or death was authorized by statute.

"(2) PREVIOUS CONVICTIONS OF VIOLENT OFFENSES.—The defendant has previously been convicted of two or more Federal or State offense, each punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury or death upon another person.

"(3) PREVIOUS CONVICTIONS OF DRUG OFFENSES.—The defendant has previously been convicted of two or more Federal or State offenses, each punishable by a term of imprisonment of more than one year, committed on different occasions, involving the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)).

"(4) PREVIOUS CONVICTIONS OF VIOLENT AND DRUG OFFENSES.—The defendant has previously been convicted of a Federal or State offense, punishable by a term of imprison-

ment of more than one year, involving the infliction of, or attempted infliction of, serious bodily injury or death upon another person, and has previously been convicted of a Federal or State offense, committed on a different occasion and punishable by a term of imprisonment of more than one year, involving the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)).

"(5) SERIOUS DRUG FELONY CONVICTION.—The defendant has previously been convicted of another Federal or State offense involving the manufacture, distribution, importation, or possession of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)) for which a sentence of five or more years of imprisonment was authorized by statute.

"(6) USE OF FIREARM.—In committing the offense, or in furtherance of a continuing criminal enterprise of which the offense was a part, the defendant used a firearm or knowingly directed, advised, authorized, or assisted another to use a firearm, as defined in section 921 of this title, to threaten, intimidate, assault, or injure a person.

"(7) DISTRIBUTION TO PERSONS UNDER TWENTY-ONE.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405 of the Controlled Substances Act (21 U.S.C. 845) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(8) DISTRIBUTION NEAR SCHOOLS.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405A of the Controlled Substances Act (21 U.S.C. 845a) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(9) USING MINORS IN TRAFFICKING.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405B of the Controlled Substances Act (21 U.S.C. 845b) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(10) LETHAL ADULTERANT.—The offense involved the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)) mixed with a potentially lethal adulterant, and the defendant was aware of the presence of the adulterant.

The jury, or if there is no jury, the court, may consider whether any other aggravating factors exist.

**"§ 3593. Special hearing to determine whether a sentence of death is justified.**

"(a) NOTICE BY THE GOVERNMENT.—Whenever the Government intends to seek the death penalty for an offense described in section 3591, the attorney for the government, a reasonable time before the trial, or before acceptance by the court of a plea of guilty, or at such time thereafter as the court may permit upon a showing of good cause, shall sign and file with the court, and serve on the defendant, a notice—

"(1) that the Government in the event of conviction will seek the sentence of death; and

"(2) setting forth the aggravating factor or factors enumerated in section 3592 and any other aggravating factor not specifically enumerated in section 3592, that the Government, if the defendant is convicted, will seek to prove as the basis for the death penalty.

The court may permit the attorney for the government to amend the notice upon a showing of good cause.

"(b) HEARING BEFORE A COURT OR JURY.—When the attorney for the government has filed a notice as required under subsection (a) and the defendant is found guilty of an offense described in section 3591, the judge who presided at the trial or before whom the guilty plea was entered, or another judge if that judge is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. Prior to such a hearing, no presentence report shall be prepared by the United States Probation Service, nothwithstanding the provisions of the Federal Rules of Criminal Procedure. The hearing shall be conducted—

"(1) before the jury that determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury that determined the defendant's guilt was discharged for good cause; or

"(D) after initial imposition of a sentence under this section, reconsideration of the sentence under the section is necessary; or

"(3) before the court alone, upon motion of the defendant and with the approval of the attorney for the government.

A jury impaneled pursuant to paragraph (2) shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate, with the approval of the court, that it shall consist of a lesser number.

"(c) PROOF OF MITIGATING AND AGGRAVATING FACTORS.—At the hearing, information may be presented as to—

"(1) any matter relating to any mitigating factor listed in section 3592 and any other mitigating factor; and

"(2) any matter relating to any aggravating factor listed in section 3592 for which notice has been provided under subsection (a)(2) and (if information is presented relating to such a listed factor) any other aggravating factor for which notice has been so provided.

Information presented may include the trial transcript and exhibits. Any other information relevant to such mitigating or aggravating factors may be presented by either the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is outweighed by the danger of creating unfair prejudice, confusing the issues, or misleading the jury. The attorney for the government and for the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any aggravating or mitigating factor, and as to the appropriateness in that case of imposing a sentence of death. The attorney for the government shall open the argument. The defendant shall be permitted to reply. The government shall then be permitted to reply in rebuttal. The burden of establishing the existence of an aggravating factor is on the government, and is not satisfied unless the existence of such a factor is established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless the existence of such a factor is established by a preponderance of the evidence.

"(d) RETURN OF SPECIAL FINDINGS.—The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return special findings identifying any aggravating factor or factors set forth in section 3592 found to exist and any other aggravating factor for which notice has been provided under subsection (a) found to exist. A finding with respect to a mitigating factor may be made by one or more members of the jury, and any member of the jury who finds the existence of a mitigating factor may consider such factor established for purposes of this section regardless of the number of jurors who concurs that the factor has been established. A finding with respect to any aggravating factor must be unanimous. If no aggravating factor set forth in section 3592 is found to exist, the court shall impose a sentence other than death authorized by law.

"(e) RETURN OF A FINDING CONCERNING A SENTENCE OF DEATH.—If an aggravating factor required to be considered under section 592(b) is found to exist, the jury, or if there is no jury, the court, shall then consider whether the aggravating factor or factors found to exist outweigh any mitigating factor or factors. The jury, or if there is no jury, the court, shall recommend a sentence of death if it unanimously finds at least one aggravating factor and no mitigating factor or if it finds one or more aggravating factors which outweigh any mitigating factors. In any other case, it shall not recommend a sentence of death. The jury shall be instructed that it must avoid any influence of sympathy, sentiment, passion, prejudice, or other arbitrary factors in its decision, and should make such a recommendation as the information warrants.

"(f) SPECIAL PRECAUTION TO ASSURE AGAINST DISCRIMINATION.—In a hearing held before a jury, the court, prior to the return of a finding under subsection (e), shall instruct the jury that, in considering whether a sentence of death is justified, it shall not consider the race, color, religious beliefs, national origin, or sex of the defendant or of any victim and that the jury is not to recommend a sentence of death unless it has concluded that it would recommend a sentence of death for the crime in question no matter what the race, color, religious beliefs, national origin, or sex of the defendant or of any victim may be. The jury, upon return of a finding under subsection (e), shall also return to the court a certificate, signed by each juror, that consideration of the race, color, religious beliefs, national origin, or sex of the defendant or any victim was not involved in reaching his or her individual decision and that the individual juror would have made the same recommendation regarding a sentence for the crime in question no matter what the race, color, religious beliefs, national origin, or sex of the defendant or any victim may be.

**"§ 3594. Imposition of a sentence of death**

"Upon the recommendation under section 3593(e) that a sentence of death be imposed, the court shall sentence the defendant to death. Otherwise the court shall impose a sentence, other than death, authorized by law. Notwithstanding any other provision of law, if the maximum term of imprisonment for the offense is life imprisonment, the court may impose a sentence of life impris-

onment without the possibility of release or furlough.

"§ 3595. Review of a sentence of death

"(a) APPEAL.—In a case in which a sentence of death is imposed, the sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal of the sentence must be filed within the time specified for the filing of a notice of appeal of the judgment of conviction. An appeal of the sentence under this section may be consolidated with an appeal of the judgment of conviction and shall have priority over all other cases.

"(b) REVIEW.—The court of appeals shall review the entire record in the case, including—

"(1) the evidence submitted during the trial;

"(2) the information submitted during the sentencing hearing;

"(3) the procedures employed in the sentencing hearing; and

"(4) the special findings returned under section 3593(d).

"(c) DECISION AND DISPOSITION.—

"(1) If the court of appeals determines that—

"(A) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; and

(B) the evidence and information support the special findings of the existence of an aggravating factor or factors;

it shall affirm the sentence.

"(2) In any other case, the court of appeals shall remand the case the reconsideration under section 3593 or for imposition of another authorized sentence as appropriate.

"(3) The court of appeals shall state in writing the reasons for its disposition of an appeal of sentence of death under this section.

"§ 3596. Implementation of sentence of death

"(a) A person who has been sentenced to death pursuant to the provisions of this chapter shall be committed to the custody of the Attorney General until exhaustion of the procedures for appeal of the judgment of conviction and for review of the sentence. When the sentence is to be implemented, the Attorney General shall release the person sentenced to death to the custody of a United States Marshal, who shall supervise implementation of the sentence in the manner prescribed by the law of the State in which the sentence is imposed. If the law of such State does not provide for implementation of a sentence of death, the court shall designate another State, the law of which does so provide, and the sentence shall be implemented in the manner prescribed by such law.

"(b) A sentence of death shall not be carried out upon a person who lacks the mental capacity to understand the death penalty and why it was imposed on that person, or upon a woman while she is pregnant.

"(c) No employee of any State department of corrections or the Federal Bureau of Prisons and no employee providing services to that department or bureau under contract shall be required, as a condition of that employment or contractual obligation, to be in attendance at or to participate in any execution carried out under this section if such participation is contrary to the moral or religious convictions of the employee. For purposes of this subsection, the term 'participate in any execution' includes personal preparation of the condemned individual and the apparatus used for the execution, and supervision of the activities of other personnel in carrying out such activities.

§ 3597. Use of State facilities

"A United States Marshal charged with supervising the implementation of a sentence of death may use appropriate State or local facilities for the purpose, may use the services of an appropriate State or local official or of a person such as an official employed for the purpose, and shall pay the costs thereof in an amount approved by the Attorney General.

"§ 3598. Appointment of counsel

"(a) FEDERAL CAPITAL CASES.—

"(1) REPRESENTATION OF INDIGENT DEFENDANTS.—Notwithstanding any other provision of law, this subsection shall govern the appointment of counsel for any defendant against whom a sentence of death is sought, or on whom a sentence of death has been imposed, for an offense against the United States, where the defendant is or becomes financially unable to obtain adequate representation. Such a defendant shall be entitled to appointment of counsel from the commencement of trial proceedings until one of the conditions specified in section 3599(b) of this title has occurred.

"(2) REPRESENTATION BEFORE FINALITY OF JUDGMENT.—A defendant within the scope of this subsection shall have counsel appointed for trial representation as provided in section 3005 of this title. At least one counsel so appointed shall continue to represent the defendant until the conclusion of direct review of the judgment, unless replaced by the court with other qualified counsel.

"(3) REPRESENTATION AFTER FINALITY OF JUDGMENT.—When a judgment imposing a sentence of death has become final through affirmance by the Supreme Court on direct review, denial of certiorari by the Supreme Court on direct review, or expiration of the time for seeking direct review in the court of appeals or the Supreme Court, the government shall promptly notify the district court that imposed the sentence. Within 10 days of receipt of such notice, the district court shall proceed to make a determination whether the defendant is eligible under this subsection for appointment of counsel for subsequent proceedings. On the basis of the determination, the court shall issue an order: (A) appointing one or more counsel to represent the defendant upon a finding that the defendant is financially unable to obtain adequate representation and wishes to have counsel appointed or is unable competently to decide whether to accept or reject appointment of counsel; (B) finding, after a hearing if necessary, that the defendant rejected appointment of counsel and made the decision with an understanding of its legal consequences; or (C) denying the appointment of counsel upon a finding that the defendant is financially able to obtain adequate representation. Counsel appointed pursuant to this paragraph shall be different from the counsel who represented the defendant at trial and on direct review unless the defendant and counsel request a continuation or renewal of the earlier representation.

"(4) STANDARDS FOR COMPETENCE OF COUNSEL.—In relation to a defendant who is entitled to appointment of counsel under this subsection, at least one counsel appointed for trial representation must have been admitted to the bar for at least five years and have at least three years of experience in the trial of felony cases in the federal district courts. If new counsel is appointed after judgment, at least one counsel so appointed must have been admitted to the bar for at least five years and have at least three years of experience in the litigation of felony cases in the federal courts of appeals or the Supreme Court. The court, for good cause, may appoint counsel who does not meet these standards, but whose background, knowledge, or experience would otherwise enable him or her to properly represent the defendant, with due consideration of the seriousness of the penalty and the nature of the litigation.

"(5) APPLICABILITY OF CRIMINAL JUSTICE ACT.—Except as otherwise provided in this subsection, the provisions of section 3006A of this title shall apply to appointments under this subsection.

"(6) CLAIMS OF INEFFECTIVENESS OF COUNSEL.—The ineffectiveness or incompetence of counsel during proceedings on a motion under section 2255 of title 28, United States Code, in a capital case shall not be a ground for relief from the judgment or sentence in any proceeding. This limitation shall not preclude the appointment of different counsel at any stage of the proceedings.

"(b) STATE CAPITAL CASES.—The laws of the United States shall not be construed to impose any requirement with respect to the appointment of counsel in any proceeding in a state court or other state proceeding in a capital case, other than any requirement imposed by the Constitution of the United States. In a proceeding under section 2254 of title 28, United States Code, relating to a state capital case, or any subsequent proceeding on review, appointment of counsel for a petitioner who is or becomes financially unable to afford counsel shall be in the discretion of the court, except as provided by a rule promulgated by the Supreme Court pursuant to statutory authority. Such appointment of counsel shall be governed by the provisions of section 3006A of this title.

"§ 3599. Collateral Attack on Judgment Imposing Sentence of Death

"(a) TIME FOR MAKING SECTION 2255 MOTION.—In any case in which a sentence of death has been imposed for an offense against the United States and the judgment has become final as described in section 3598(a)(3) of this title, a motion in the case under section 2255 of title 28, United States Code, must be filed within 90 days of the issuance of the order relating to appointment of counsel under section 3598(a)(3) of this title. The court in which the motion is filed, for good cause shown, may extend the time for filing for a period not exceeding 60 days. A motion described in this section shall have priority over all non-capital matters in the district court, and in the court of appeals on review of the district court's decision.

"(b) STAY OF EXECUTION.—The execution of a sentence of death shall be stayed in the course of direct review of the judgment and during the litigation of an initial motion in the case under section 2255 of title 28, United States Code. The stay shall run continuously following imposition of the sentence, and shall expire if—

"(1) the defendant fails to file a motion under section 2255 of title 28, United States Code, within the time specified in subsection (a), or fails to make a timely application for court of appeals review following the denial of such a motion by a district court; or

"(2) upon completion of district court and court of appeals review under section 2255 of title 28, United States Code, the motion

under that section is denied and (A) the time for filing a petition for certiorari has expired and no petition has been filed; (B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or (C) a timely petition for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) before a district court, in the presence of counsel and after having been advised of the consequences of his decision, the defendant waives the right to file a motion under section 2255 of title 28, United States Code.

"(c) FINALITY OF THE DECISION ON REVIEW.—If one of the conditions specified in subsection (b) has occurred, no court thereafter shall have the authority to enter a stay of execution or grant relief in the case unless—

"(1) the basis for the stay and request for relief is a claim not presented in earlier proceedings; and

"(2) the failure to raise the claim is (A) the result of governmental action in violation of the Constitution or laws of the United States; (B) the result of the Supreme Court recognition of a new federal right that is retroactively applicable; or (C) based on a factual predicate that could not have been discovered through the exercise of reasonable diligence in time to present the claim in earlier proceedings; and

"(3) the facts underlying the claim would be sufficient, if proven, to undermine the court's confidence in the determination of guilt on the offense or offenses for which the death penalty was imposed."; and

(b) in the chapter analysis of part II, by adding the following new item after the item relating to chapter 227:

"228. Death penalty ..... 3591".

## SUBTITLE B—PROTECTION OF WITNESSES, JURORS, AND COURT OFFICERS.

### SEC. 5201. PROTECTION OF COURT OFFICERS AND JURORS.

Section 1503 of title 18, United States Code, is amended—

(1) by designating the current text as subsection (a);

(2) by striking the words "fined not more than $5,000 or imprisoned not more than five years, or both." and inserting in lieu thereof "punished as provided in subsection (b)."; and

(3) by adding at the end thereof a new subsection (b) as follows:

"(b) The punishment for an offense under this section is—

"(1) in the case of a killing, the punishment provided in sections 1111 and 1112 of this title;

"(2) in the case of an attempted killing, imprisonment for not more than twenty years; and

"(3) in any other case, imprisonment for not more than ten years.".

### SEC. 5202. PROHIBITION OF RETALIATORY KILLINGS OF WITNESSES, VICTIMS, AND INFORMANTS.

Section 1513 of title 18, United States Code, is amended—

(1) by redesignating subsections (a) and (b) as subsections (b) and (c), respectively; and

(2) by inserting a new subsection (a) as follows:

"(a)(1) Whoever kills or attempts to kill another person with intent to retaliate against any person for—

(A) the attendance of a witness or party at an official proceeding, or any testimony given or any record, document, or other object produced by a witness in an official proceeding; or

(B) any information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole or release pending judicial proceedings given by a person to a law enforcement officer; shall be punished as provided in paragraph (2).

"(2) The punishment for an offense under this subsection is—

"(A) in the case of a killing, the punishment provided in sections 1111 and 1112 of this title; and

"(B) in the case of an attempt, imprisonment for not more than twenty years.".

## TITLE VI—JUSTICE SYSTEM IMPROVEMENTS.

Sec. 6001. Table of Contents.

Subtitle A—INS System Improvements

Sec. 6101. INS general arrest authority.
Sec. 6102. Definition of Aggravated Felony.
Sec. 6103. Additions to classes of aliens ineligible to receive visas and excluded from admission.
Sec. 6104. Summary exclusion and deportation of criminal aliens.
Sec. 6105. Expeditious deportation of aggravated alien felons.
Sec. 6106. Ineligibility of aggravated felons for asylum.
Sec. 6107. Elimination of judicial recommendation against deportation of criminal aliens.
Sec. 6108. Elimination of Sec. 212(C) relief for aggravated felons.
Sec. 6109. Elimination of suspension of deportation for criminal aliens in hardship cases.
Sec. 6110. Definition of good moral character to exclude aggravated felons.
Sec. 6111. Ineligibility of aggravated felons for hardship waivers.
Sec. 6112. Elimination of deportation relief for aliens who are aggravated felons.

Subtitle B—Amendments Concerning Records of Crimes Committed by Juveniles

Sec. 6201. Amendments concerning records of crimes committed by juveniles.

Subtitle C—Narcotics-Related Public Corruption

Sec. 6301. Narcotics-related public corruption

Subtitle D—Other System Improvements

Sec. 6401. Alternative methods of incarceration.
Sec. 6402. Close loophole for illegal importation of small drug quantities.
Sec. 6403. Enhancement of penalties for drug trafficking in Federal prisons.
Sec. 6404. Authorization of funding for Treasury undercover operations.

## SUBTITLE A—INS SYSTEM IMPROVEMENTS

### SEC. 6101. INS GENERAL ARREST AUTHORITY.

Section 287 of the Immigration and Nationality Act of 1952 (66 Stat. 233) is amended by adding the following at the end thereof:

"(f)(1) Under the direction of the Attorney General, agents and officers of the Immigration and Naturalization Service are authorized to:

"(A) carry a firearm;

"(B) execute and serve any order, warrant, subpoena, summons, or other process issued under the authority of the United States;

"(C) make an arrest without a warrant for any offense against the United States committed in the officer's presence, or for a felony cognizable under the laws of the United States committed outside the officer's presence, if the officer has reasonable grounds to believe that the person to be arrested has committed or is committing a felony; and

"(D) perform any other law enforcement duty that the Attorney General may designate.

"(2) The authority conferred by subsection (f)(1) of this section does not affect the investigative jurisdiction of any other federal law enforcement agency.".

### SEC. 6102. DEFINITION OF AGGRAVATED FELONY.

Section 101(a)(43) (8 U.S.C. 1101(a)(43)) of the Immigration and Nationality Act of 1952 is amended to read as follows:

"(43) The term 'aggravated felony' means any crime that has as an element the use, attempted use, or threatened use of physical force against the person or property of another that is punishable by imprisonment of five years or more; any crime involving a controlled substance (as defined in section 102 of the Controlled Substances Act, 21 U.S.C. 802) that is punishable by imprisonment of one year or more; any crime involving illicit trafficking in any firearms or destructive devices as defined in section 921 of title 18, United States Code; or any attempt or conspiracy to commit any such crime committed within the United States. For the purposes of this subsection, the term crime includes violations of federal, state and foreign laws or statutes.".

### SEC. 6103. ADDITIONS TO CLASSES OF ALIENS INELIGIBLE TO RECEIVE VISAS AND EXCLUDED FROM ADMISSION.

Section 212(a) (8 U.S.C. 1182(a)) of the Immigration and Nationality Act of 1952 is amended by adding at the end thereof the following new subsections:

"(35) Any nonimmigrant alien seeking admission who is in illicit possession of a controlled substance (as defined in section 102 of the Controlled Substances Act, 21 U.S.C. 802);"

"(36) Any alien who has been convicted of an aggravated felony, as defined in section 101(a)(43) of this Act, or who admits having committed such a crime, or who admits committing acts which constitute the essential elements of such a crime.".

### SEC. 6104. SUMMARY EXCLUSION AND DEPORTATION OF CRIMINAL ALIENS.

Section 235 (8 U.S.C 1225) of the Immigration and Nationality Act of 1952 is amended by adding at the end thereof the following new subsection:

"(d) any alien (including an alien crewman) who may appear to the examining immigration officer or to the special inquiry officer during an examination before either of such officers to be excludable under paragraphs (23), (35), or (36) of section 212(a) of this Act may be ordered summarily excluded and deported by the Attorney General without any inquiry or further inquiry by a special inquiry officer. Such summary exclusion order shall have the same effect as if the alien has been ordered excluded and deported pursuant to section 236 of this Act. Nothing in this subsection shall be regarded as requiring an inquiry before a special inquiry officer in the case of an alien crewman.".

SEC. 6105. EXPEDITIOUS DEPORTATION OF AGGRAVATED ALIEN FELONS.

Section 242A (8 U.S.C. 1252a) of the Immigration and Nationality Act of 1952 is amended by adding at the end thereof the following new subsections:

"(f) Nothwithstanding any other provision of law, an alien convicted of an aggravated felony, regardless of whether such alien is incarcerated, shall be subject to an expedited summary deportation proceeding. Such proceeding shall be conducted on the record by the Attorney General or his designee, who will make written findings as to alienage and deportability. Any order of deportation issued pursuant to this subsection shall be considered to be a final order. An alien subject to such proceeding shall not be eligible for relief from deportation under any provision of the Immigration and Nationality Act.

"(g) Upon sentencing any alien for an aggravated felon as defined in section 101(a)(43) of this Act, the federal or state court shall notify the Immigration and Naturalization Service that it has sentenced a person believed to be an alien for an aggravated felony. The federal or state court shall provide to the Immigration and Naturalization Service any and all information related to the alienage of the individual, and certified copies of any and all conviction documents."

SEC. 6106. INELIGIBILITY OF AGGRAVATED FELONS FOR ASYLUM.

Section 208(a) (8 U.S.C. 1158(a)) of the Immigration and Nationality Act of 1952 is amended by adding the following new subsection:

"(d) Any alien convicted of an aggravated felony, as defined in section 101(a)(43) of this act, shall not be eligible to apply for relief under this section."

SEC. 6107. ELIMINATION OF JUDICIAL RECOMMENDATION AGAINST DEPORTATION OF CRIMINAL ALIENS.

Subsection 241(b) (8 U.S.C. 1251(b)) of the Immigration and Nationality Act of 1952 is amended by deleting "(1)"; and by deleting ", or (2)" and all that follows, and replacing it with a period.

SEC. 6108. ELIMINATION OF SEC. 212(C) RELIEF FOR AGGRAVATED FELONS.

Section 212(c) (8 U.S.C. 1182(c) of the Immigration and Nationality Act of 1952 is amended by adding, at the end thereof, the following:

"Relief under this subsection shall not be available to any alien who has been convicted of an aggravated felony as defined in section 101(a)(43) of this Act."

SEC. 6109. ELIMINATION OF SUSPENSION OF DEPORTATION FOR CRIMINAL ALIENS IN HARDSHIP CASES.

Section 244(a) (8 U.S.C. 1254(a)) of the Immigration and Nationality Act of 1952 is amended by striking the words in the first sentence "(other than an alien described in section 241(a)(19) of this Act)" and substituting therefor the following: "(other than an alien described in section 241(a)(4)(B) or 241(a)(19) of this Act)".

Section 244(a)(2) is amended by adding after "(4)" the following: "(A)".

SEC. 6110. DEFINITION OF GOOD MORAL CHARACTER TO EXCLUDE AGGRAVATED FELONS.

Section 101(f) (8 U.S.C. 1101(f)) of the Immigration and Nationality Act of 1952 is amended by adding the following subsection:

"(9) One who at any time has been convicted of an aggravated felony as defined in section 101(a)(43) of this Act."

SEC. 6111. INELIGIBILITY OF AGGRAVATED FELONS FOR HARDSHIP WAIVERS.

Section 212(h) (8 U.S.C. 1182(h)) of the Immigration and Nationality Act of 1952 is amended:

(a) by adding at the end the following:

"Any alien convicted of an aggravated felony as defined in section 101(a)(43) of this Act is not eligible for relief under this section.";

(b) by replacing the period at the end of section 101(f)(8) with a semicolon.

SEC. 6112. ELIMINATION OF DEPORTATION RELIEF FOR ALIENS WHO ARE AGGRAVATED FELONS.

(a) Section 243(h)(2) (8 U.S.C. 1253(h)(2)) of the Immigration and Nationality Act of 1952 is amended by adding the following paragraph:

"(E) The alien has been convicted of an aggravated felony as defined under section 101(a)(43) of this Act."

(b) Section 245(c) (8 U.S.C. 1255(c)) of the Immigration and Nationality Act of 1952 is amended by replacing the period at the end thereof the following new subsection:

(5) Any alien convicted of an aggravated felony as defined under section 101(a)(43) of this Act."

(c) Section 249 (8 U.S.C. 1259) of the Immigration and Nationality Act of 1952 is amended by adding at the end the following:

"Any alien convicted of an aggravated felony as defined under section 101(a)(43) of this Act is not eligible for relief under this section."

## SUBTITLE B—AMENDMENTS CONCERNING RECORDS OF CRIMES COMMITTED BY JUVENILES.

SEC. 6201. AMENDMENTS CONCERNING RECORDS OF CRIMES COMMITTED BY JUVENILES.

"(1) Section 5038 of title 18, United States Code, is amended by striking subsections (d), and (f), redesignating subsection (e) as subsection (d), and adding at the end thereof new subsections (e) and (f) as follows:

"(e) Whenever a juvenile has been found guilty of committing an act which if committed by an adult would be an offense described in clause (3) of the first paragraph of section 5032 of this title, the juvenile shall be fingerprinted and photographed, and the fingerprints and photograph shall be sent to the Federal Bureau of Investigation, Identification Division. The court shall also transmit to the Federal Bureau of Investigation, Identification Division, the information concerning the adjudication, including name, date of adjudication, court, offenses, and sentence, along with the notation that the matter was a juvenile adjudication. The fingerprints, photograph, and other records and information relating to a juvenile described in this subsection, or to a juvenile who is prosecuted as an adult, shall be made available in the manner applicable to adult defendants.

"(f) In addition to any other authorization under this section for the reporting, retention, disclosure or availability of records or information, if the law of the state in which a federal juvenile delinquency proceeding takes place permits or requires the reporting, retention, disclosure or availability of records or information relating to a juvenile or to a juvenile delinquency proceeding or adjudication in certain circumstances, then such reporting, retention, disclosure or availability is permitted under this section whenever the same circumstances exist.".

(2) Section 3607 of Title 18, United States Code, is repealed, and the corresponding reference in the section analysis for chapter 229 of Title 18 is deleted.

## SUBTITLE C—NARCOTICS-RELATED PUBLIC CORRUPTION.

SEC. 6301. NARCOTICS-RELATED PUBLIC CORRUPTION.

(a) IN GENERAL.—Chapter 11 of title 18, United States Code, is amended by inserting after section 219 the following new section:

"§ 220. Narcotics and public corruption

"(a) Any public official who, directly or indirectly, corruptly demands, seeks, receives, or agrees to receive or accept anything of value personally or for any other person in return for—

"(1) being influenced in the performance of nonperformance of any official act; or

"(2) being influenced to commit or to aid in committing, or to collude in, or to allow or make opportunity for the commission of any offense against the United States or any State;

shall be guilty of a class B felony.

"(b) Any person who, directly or indirectly, corruptly gives, offers, or promises anything of value to any public official, or offers or promises any public official to given anything of value to any other person, with intent—

"(1) to influence any official act;

"(2) to influence such public official to commit or aid in committing, or to collude in, or to allow or make opportunity for the commission of any offense against the United States or any State; or

"(3) to influence such public official to do or to omit to do any act in violation of such official's lawful duty;

shall be guilty of a class B felony.

"(c) There shall be Federal jurisdiction over an offense described in this section if such offense involves, is part of, or is intended to further or to conceal the illegal possession, importation, manufacture, transportation, or distribution of any controlled substance or controlled substance analogue.

"(d) For the purpose of this section—

"(1) the term 'public official' means—

"(A) an officer or employee or person acting for or on behalf of the United States, or any department, agency, or branch of Government thereof in any official function, under or by authority of any such department, agency, or branch of Government;

"(B) a juror;

"(C) an officer or employee or person acting for or on behalf of the government of any State, territory, commonwealth, or possession of the United States (including the District of Columbia), or any political subdivision therof, in any official function, under or by the authority of any such State, territory, commonwealth, possession, or political subdivision; or

"(D) any person who has been nominated or appointed to be a public official as defined in subparagraph (A), (B), or (C), or has been officially informed that he or she will be so nominated or appointed;

"(2) the term 'official act' means any decision action, or conduct regarding any question, matter, proceeding, cause, suit, investigation, or prosecution which may at any time be pending, or which may be brought before any public official, in such official's capacity, or in such official's place of trust or profit; and

"(3) the terms 'controlled substance' and 'controlled substance analogue' have the meaning set forth in section 102 of the Controlled Substances Act.".

(b) CONFORMING AMENDMENTS.—(1) Section 1961(1) of title 18, United States Code, is amended by inserting "section 220 (relating to narcotics and public corruption)," after "Section 201 (relating to bribery),";

(2) Section 2516(a)(c) of title 18, United States Code, is amended by inserting "section 220 (relating to narcotics and public corruption)," after "section 201 (bribery of public officials and witnesses),".

(c) SECTION ANALYSIS.—The section analysis at the beginning of chapter 11, title 18, United States Code, is amended by inserting the following:

"220. Narcotics and public corruption.".

SUBTITLE D—OTHER JUSTICE IMPROVEMENTS.

SEC. 6401. ALTERNATIVE METHODS OF INCARCERATION.

In section 501(b) of the Omnibus Crime Control and Safe Streets Act of 1968 (P.L. 90-351), as amended by the Anti-Drug Abuse Act of 1988 (P.L. 100-690) (42 U.S.C. 3751(b)), is amended by deleting the period at the end of subsection (c) and inserting in lieu thereof ", and;" and by adding the following:

"(22) innovative intermediate sanctions programs, in combination with drug testing, including boot camps, house arrest, electronic monitoring, intensive supervision, and community service.".

SEC. 6402. CLOSE LOOPHOLE FOR ILLEGAL IMPORTATION OF SMALL DRUG QUANTITIES.

Section 497 (a)(2)(A) of the Tariff act of 1930 (19 U.S.C. 1497) is amended by adding "or $500., whichever is greater" after "value of the article.".

SEC. 6403. ENHANCEMENT OF PENALTIES FOR DRUG TRAFFICKING IN FEDERAL PRISONS.

Section 1791 of title 18, United States Code, is amended—

(1) in subsection (c), by inserting before "Any" the following new sentence: "Any punishment imposed under subsection (b) for a violation of this section involving a controlled substance shall be consecutive to any other sentence imposed by any court for an offense involving such a controlled substance.";

(2) in subsection (d)(1)(A), by inserting after "a firearm or destructive device" the words "or a controlled substance in schedule I or II, other than marijuana or a controlled substance referred to in subparagraph (C) of this subsection";

(3) in subsection (d)(1)(B), by inserting before "ammunition," the following: "marijuana or a controlled substance in schedule III, other than a controlled substance referred to in subparagraph (C) of this subsection,";

(4) in subsection (d)(1)(C), by inserting "methamphetamine, its salts, isomers, and salts of its isomers," after "a narcotic drug,";

(5) in subsection (d)(1)(D), by inserting "(A), (B), or" before "(C)"; and

(6) in subsection (b), by striking "(c)" each place it appears and inserting in lieu thereof "(d)".

SEC. 6404. AUTHORIZATION OF FUNDING FOR TREASURY UNDERCOVER OPERATORS.

Paragraph (2) of subsection 7601(c) of the Anti-Drug Abuse Act of 1988 is amended by striking out "after December 31, 1989" and inserting "after December 31, 1991" and by striking out "before January 1, 1990" and inserting "before January 1, 1992" in lieu thereof.

TITLE VII—AMENDMENTS RELATED TO ASSET FORFEITURE AND MONEY LAUNDERING.

Sec. 7001. Table of Contents.

SUBTITLE A—SPECIAL FORFEITURE FUND

Sec. 7101. Special forfeiture fund amendment.

Subtitle B—Forfeiture Amendments

Sec. 7201. Conforming of older innocent owner provisions with those enacted in the Anti-Drug Abuse Act of 1988.

Sec. 7202. Addition of conforming criminal forfeiture provision for cases involving CMIR violations.

Sec. 7203. Clarifying grammatical changes in definition of "financial transaction" for the money laundering statute..

Sec. 7204. Limitation of exception to money laundering forfeitures.

Sec. 7205. Seizure of vehicles with concealed compartments.

Subtitle C—Money Laundering Amendments

Sec. 7301. Continuation of $10,000 cash transaction reporting requirement.

Sec. 7302. FINCEN transfer amendment.

Sec. 7303. Geographic targeting disclosure penalties.

Sec. 7304. Suspicious transaction reporting.

Sec. 7305. Bank Secrecy Act customer violations.

Sec. 7306. Search of outbound mail.

SUBTITLE A—SPECIAL FORFEITURE FUND.

SEC. 7101. SPECIAL FORFEITURE FUND AMENDMENT.

(a) Assets Forfeiture Fund Amendment.

Section 524(c)(9) of title 28, United States Code, is amended to read as follows:

"(9) There are authorized to be appropriated such sums as may be necessary for the purposes described in subparagraphs (A)(ii), (B), (C), (F), and (G) of paragraphs (1). For each of fiscal years 1990, 1991, 1992, and 1993, the Attorney General shall transfer not to exceed $150,000,000 in unobligated amounts available in the Fund to the Special Forfeiture Fund: *Provided,* That such amounts will be transferred on a quarterly basis: *Provided further,* That an amount not to exceed $15,000,000 or, if determined by the Attorney General to be necessary to meet asset specific expenses, an amount equal to one-tenth of the previous year's obligations, may be retained in the Fund and remain available for appropriation.".

(b) Special Forfeiture Fund Amendment.

Section 6073(b) of the Anti-Drug Abuse Act of 1988 (Public Law 100-690) is amended to read as follows:

"(b) DEPOSITS.—In each of fiscal years 1990, 1991, 1992, and 1993, there shall be transfered to and deposited in the Fund, from the Department of Justice Assets Forfeiture Fund pursuant to 28 U.S.C. 524(c)(9), not to exceed $150,000,000: *Provided,* That amounts specified in the second proviso of said section may be retained in the Assets Forfeiture Fund and remain available for appropriation.".

SUBTITLE B—FORFEITURE AMENDMENTS.

SEC. 7201. CONFORMING OF OLDER INNOCENT OWNER PROVISIONS WITH THOSE ENACTED IN THE ANTI-DRUG ABUSE ACT OF 1988.

(1) Sections 511(a)(6) and (7) of the Controlled Substances Act (21 U.S.C. 881(a)(6) and (7)) are each amended by striking "without the knowledge or consent of that owner" and inserting in lieu thereof "without the knowledge, consent, or willful blindness of the owner"; and

(2) Section 981(a)(2) of title 18, United States Code, is amended by striking "without the knowledge of that owner or lienholder" and inserting in lieu thereof "without knowledge, consent, or willful blindness, of the owner or lienholder".

SEC. 7202. ADDITION OF CONFORMING CRIMINAL FORFEITURE PROVISION FOR CASES INVOLVING CMIR VIOLATIONS.

Section 982(a) of title 18, United States Code, is amended by inserting ", 5316" after "5313(a)" in the first sentence.

SEC. 7203. CLARIFYING GRAMMATICAL CHANGES IN DEFINITION OF "FINANCIAL TRANSACTION" FOR THE MONEY LAUNDERING STATUTE.

Section 1956(c)(4) of title 18, United States Code, is amended by inserting "(A)" before "a transaction" the first place it appears, inserting "(i)" before "involving" the first place it appears, inserting "(ii)" before "involving" the second place it appears, and inserting (B) before the phrase "or a transaction."

SEC. 7204. LIMITATION OF EXCEPTION OF MONEY LAUNDERING FORFEITURES.

Section 982(b)(2) of title 18, United States Code, is amended by inserting before the period the following:

"unless the defendant, in committing the offense or offenses giving the rise to the forfeiture, conducted three or more separate transactions involving a total of $100,000 or more in any twelve month period".

SEC. 7205. SEIZURE OF VEHICLES WITH CONCEALED COMPARTMENTS.

Sec. 1. Section 3 of the Anti-Smuggling Act of 1935 (19 U.S.C. 1703) is amended:

(a) by amending the title of such section to read as follows:

"SEC. 1703. SEIZURE AND FORFEITURE VESSELS, VEHICLES AND OTHER CONVEYANCES."

(b) by amending the title of subsection (a) to read as follows:

"(a) Vessels, vehicles and other conveyances subject to seizure and forfeiture";

(c) by amending the title of subsection (b) to read as follows:

"(b) Vessels, vehicles and other conveyances' defined";

(d) by inserting ", vehicle and other conveyance" after the word "vessel" everywhere it appears in the text of subsections (a) and (b); and

(e) by amending subsection (c) to read as follows:

"(c) Acts constituting prima facie evidence of vessel, vehicle or other conveyance engaged in smuggling;

"For the purposes of this section, prima facie evidence that a conveyance is being, or has been, or is attempting to be employed in smuggling or to defraud the revenue of the United States shall be—

"(1) in the case of a vessel, the fact that a vessel has become subject to pursuit as provided in section 1581 of this title, or is a hovering vessel, or that a vessel fails, at any place within the customs waters of the United States or with a customs-enforcement area, to display lights as required by law.

"(2) in the case of a vehicle or other conveyance, the fact that a vehicle or other conveyance has any compartment or equipment that is built or fitted out for smuggling.".

Sec. 2. The table of sections for Chapter 5 if title 19, United States Code, is amended

by striking the items relating to section 1703 and inserting in lieu thereof the following:

"1703. Seizure and forfeiture of vessels, vehicles and other conveyances.
"(a) Vessels, vehicles and other conveyances subject to seizure and forfeiture.
"(b) Vessels, vehicles and other conveyances' defined.
"(c) Acts constituting prima facie evidence of vessel, vehicle or other conveyance engaged in smuggling.".

SUBTITLE C—MONEY LAUNDERING AMENDMENTS

SEC. 7301. CONTINUATION OF $10,000 CASH TRANSACTION REPORTING REQUIREMENT.

Paragraph (3) of subsection 7601(b) of the Anti-Drug Abuse Act of 1988 is amended by striking out "only during the 2-year period beginning on such date" and inserting "only during the 4-year period beginning on such date" in lieu thereof.

SEC. 7302. FINCEN TRANSFER AMENDMENT.

(b) Section 1112 of the Right to Financial Privacy Act of 1978 (Title XI of P.L. 95-630, 12 U.S.C. 3412) is amended—

(1) by deleting subsections (b), (c), and (f);

(2) by redesignating subsections (d) and (e) as (b) and (c) respectively; and

(3) by amending subsection (a) to read: "Financial records originally obtained by an agency in accordance with this chapter may be transferred to another agency without notice to the customer if the transferring agency has reason to believe that the records are relevant to a matter within the jurisdiction of the receiving agency or appropriate for analysis by the receiving agency for law enforcement purposes."

SEC. . 7303. GEORGRAPHIC TARGETING DISCLOSURE PENALTIES.

Section 5326 of title 31, United States Code, is amended by adding a new subsection (c) as follows:

"No financial institution or director, agent, officer or employee of a financial institution subject to an order under this section may disclose the existence or terms of the order to any person except as prescribed by the Secretary.".

SEC. 7304. SUSPICIOUS TRANSACTIONS REPORTING.

Section 1103(a) of the Right to Financial Privacy Act of 1978, (Title XI of Public Law 95-630, 12 U.S.C. 3403(c)), is amended by removing the period at the end thereof and adding the following:

"or for refusal to do business with any person before or after disclosure of a possible violation of law or regulation to a Government authority."

SEC. 7305. BANK SECRECY ACT CUSTOMER VIOLATIONS.

(C) Section 1113 of the Right to Financial Privacy Act of 1978, (Title XI of Public Law 95-630, 12 U.S.C. 3413), is amended by adding a new subsection (p) as follows:

"(p) Nothing in this title shall apply when a financial institution or supervisory agency, or any officer, director, employee, or agent of a financial institution or a supervisory agency, provides to the Secretary of the Treasury financial records which such financial institution or supervisory agency has reason to believe may be relevant to a possible violation of a provision of Subchapter II of Chapter 53 of title 31, United States Code.".

(d) Subsection 1117(c) of the Right to Financial Privacy Act of 1978, (Title XI of Public Law 95-630, 12 U.S.C. 3417(c)), is amended to read as follows:

"(c) Any financial institution or agent or employee thereof making a disclosure of financial records or information in good faith either in reliance upon a certificate by any Government authority pursuant to this chapter or pursuant to section 1113(1) or (p) of this chapter, shall not be liable to the customer for such disclosure under any constitution, law, or regulation of any state or political subdivision thereof.".

SEC. 7306. SEARCH OF OUTBOUND MAIL.

Section 5317(b) of title 31, United States Code, is amended to read as follows:

"(1) For purposes of ensuring compliance with the requirements of section 5316 of this title or of sections 1956 and 1957 of title 18, United States Code, a customs officer may stop and search, at the border and without a search warrant, any vehicle, vessel, aircraft, or other conveyance, any envelope or other container, including mail transmitted by the United States Postal Service which is not sealed against inspection, or which has a Customs declaration affixed by the sender, and any person entering or departing from the United States.

"(2) Notwithstanding 39 U.S.C. 3623(d), or any other provision of title 39, United States Code, with respect to any letter sealed against inspection being transmitted by the United States Postal Service, a search authorized by paragraph (1) may be conducted when a customs officer has reasonable cause to suspect that there are monetary instruments being transported in such a letter.

"(3) Nothing in this section shall be construed to limit the authority of the Secretary of the Treasury or the United States Customs Service under any other provision of law.".

TITLE VIII—MISCELLANEOUS AND TECHNICAL AMENDMENTS

Sec. 8001. Table of Contents.
Sec. 8101. Technical amendments to money laundering offenses.
Sec. 8102. Clarification of applicability of 18 U.S.C. 1952 to all mailings in furtherance of unlawful activity.
Sec. 8103. Addition of drug conspiracy and attempt offenses committed by juveniles as warranting adult prosecution.
Sec. 8104. Grand jury access to certain records.
Sec. 8105. Addition of conforming predicates to money laundering statute.
Sec. 8106. Arrest of fugitive about to enter United States.
Sec. 8107. Elimination of superfluous language.
Sec. 8108. Correction to reference to nonexistent agencies.
Sec. 8109. Disclosure of grand jury information for use in civil forfeiture.
Sec. 8110. Use of a search warrant to obtain contents of a stored wire communication.
Sec. 8111. Authority for State government personnel to assist in conducting court-authorized interceptions.
Sec. 8112. Clarification of inapplicability of 18 U.S.C. 2515 to certain disclosures.
Sec. 8113. Technical amendment of 31 U.S.C. 5325.
Sec. 8114. ONDCP transfer authority.

SEC. 8101. TECHNICAL AMENDMENTS TO MONEY LAUNDERING OFFENSES.

(a) Paragraph (a)(2) and subsection (b) of section 1956 of title 18, United States Code, are amended by striking out "transportation" each place it appears and inserting in lieu thereof "transportation, transmission, or transfer";

(b) Subsection (a)(3) of section 1956 of title 18, United States Code, is amended by striking out "represented by a law enforcement officer" and inserting "represented".

(c) Section 7203 of the Internal Revenue Code of 1986 is amended by replacing the last sentence thereof with the following sentence: "In the case of a willful violation of any provision of section 6050I, the first sentence of this section shall be applied by substituting 'felony' for 'misdemeanor' and '5 years' for '1 year'."

SEC. 8102. CLARIFICATION OF APPLICABILITY OF 18 U.S.C. 1952 TO ALL MAILINGS IN FURTHERANCE OF UNLAWFUL ACTIVITY.

Section 1952(a) of title 18, United States Code, is amended—

(1) by inserting "the mail or" after "uses"; and

(2) by striking out "including the mail,".

SEC. 8103. ADDITION OF DRUG CONSPIRACY AND ATTEMPT OFFENSES COMMITTED BY JUVENILES AS WARRANTING ADULT PROSECUTION.

Section 5032 of title 18, United States Code, is amended—

(1) in the first undesignated paragraph by striking out an offense described in section 401 of the Controlled Substances Act (21 U.S.C. 841), or section 1002(a), 1003, 1005, 1009, or 1010(b) (1), (2), or (3) of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 953, 955, 959, 960(b) (1), (2), (3)),' and inserting in lieu thereof "an offense (or a conspiracy or attempt to commit an offense) described in section 401 or 404 (insofar as the violation involves more than 5 grams of a mixture or substance which contains cocaine base), of the Controlled Substances Act (21 U.S.C. 841, 844, or 846), section 1002(a), 1003, 1005, 1009, 1010(b) (1), (2), or (3), of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 953, 955, 959, 960(b) (1), (2), or (3), or 963),"; and

(2) in the fourth undesignated paragraph—

(A) by striking out "an offense described in section 401 of the Controlled Substances Act (21 U.S.C. 841), or section 1002(a), 1005, or 1009 of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 955, 959)" and inserting in lieu thereof "an offense (or a conspiracy or attempt to commit an offense) described in section 401 or 404 (insofar as the violation involves more than 5 grams of a mixture or substance which contains cocaine base), of the Controlled Substances Act of (21 U.S.C. 841, 844, or 846), or section 1002(a), 1005, 1009, 1010(b) (1), (2), or (3), of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 955, 959, 960(b) (1), (2), or (3), or 963)"; and

(B) by striking out "subsection (b)(1) (A), (B), or (C), (d), or (e) of section 401 of the Controlled Substances Act, or section 1002(a), 1003, 1009, or 1010(b) (1), (2), or (3) of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 953, 959, 960(b) (1), (2), (3))" and inserting in lieu thereof "or an offense (or conspiracy or attempt to commit an offense) described in section 401(b)(1) (A), (B), or (C), (d), or (e), or 404 (insofar as the violation involves more than 5 grams of a mixture or substance which contains cocaine base), of the

Controlled Substances Act (21 U.S.C. 841 (b)(1)(A), (B), or (C), (d), or (e), 844 or 846) or section 1002(a), 1003, 1009, 1010(b)(1), (2), or (3) of the Controlled Substances Import and Export Act (21 U.S.C. 952(a), 953, 959, 960(b)(1), (2), or (3), or 963)".

SEC. 8104. GRAND JURY ACCESS TO CERTAIN RECORDS.

Section 551 of title 47, United States Code, is amended by adding at the end thereof the following new subsection:

"(i) Exception for federal grand jury proceeding Nothing in this section apply to any subpoena or court order issued in connection with proceedings before a federal grand jury.".

SEC. 8105. ADDITION OF CONFORMING PREDICATES TO MONEY LAUNDERING STATUTE.

Section 1956(c)(7)(D) of title 18, United States Code, is amended—

(1) by inserting "section 1005, 1006, or 1007 (relating to false statements of a financial institution employee), section 1014 (relating to false statements in connection with credit and loan applications)," after "section 875 (relating to interstate communications),"; and

(2) by striking "section 1344 (relating to bank fraud),".

SEC. 8106. ARREST OF FUGITIVE ABOUT TO ENTER UNITED STATES.

Section 3184 of title 18, United States, is amended by inserting "or, if there is reason to believe the person will shortly enter the United States" after "if the whereabouts within the United States of the person charged are not known".

SEC. 8107. ELIMINATION OF SUPERFLUOUS LANGUAGE IN 18 U.S.C. 510.

Section 510(b) of title 18, United States Code, is amended by striking out "that in fact is stolen or bears a forged or falsely made endorsement or signature".

SEC. 8108. CORRECTION TO REFERENCE TO NON-EXISTENT AGENCIES IN 18 U.S.C. 1114.

Section 1114 of title 18, United States Code, is amended—

(1) by striking out "any officer or employee of the Department of Health, Education, and Welfare," and inserting in lieu thereof "any officer or employee of the Department of Education, the Department of Health and Human Services,"; and

(2) by striking out "the Federal Savings and Loan Insurance Corporation,".

SEC. 8109. DISCLOSURE OF GRAND JURY INFORMATION FOR USE IN CIVIL FORFEITURE.

(a) Chapter 215 of title 18, United States Code, is amended by adding at the end a new section, as follows:

**"§ 3323. Disclosure of matters occurring before grand jury for use in civil forfeiture**

"(a)" A person who is privy to grand jury information—

"(1) received in the course of duty as an attorney for the government; or

"(2) disclosed under rule 6(e)(3)(ii) of the Federal Rules of Criminal Procedure; may disclose that information to an attorney for the government for use in connection with civil forfeiture proceedings under any law of the United States.

"(b) For purposes of this section, the terms 'attorney for the government' and 'grand jury information' have the meanings assigned such terms in section 3322 of this title.".

(b) Section 3322(a) of title 18, United States Code, is amended by striking out "or for use in connection with civil forfeiture under section 981 of title 18, United States Code, of property described in section 981(a)(1)(C) of such title".

(c) The table of sections for chapter 215 of title 18, United States Code, is amended by adding at the end the following:

"Section 3323. Disclosure of matters occurring before grand jury for use in civil forfeiture.".

SEC. 8110. USE OF A SEARCH WARRANT TO OBTAIN CONTENTS OF A STORED WIRE COMMUNICATION.

Section 2703(a) of title 18, United States Code, is amended by inserting "or wire" after "the contents of an electronic" both places those words appear.

SEC. 8111. AUTHORITY FOR STATE GOVERNMENT PERSONNEL TO ASSIST IN CONDUCTING COURT-AUTHORIZED INTERCEPTIONS.

Section 2518(5) of title 18, United States Code, is amended by inserting "(including personnel of a State or subdivision of a State)" after "Government personnel".

SEC. 8112. CLARIFICATION OF INAPPLICABILITY OF 18 U.S.C. 2515 TO CERTAIN DISCLOSURES.

Section 2515 of title 18, United States Code, is amended by adding at the end the following: "This section shall not apply to the disclosure by the United States, a State, or a political subdivision thereof in a criminal trial or hearing or before a grand jury of the contents of a wire or oral communication, or evidence derived therefrom, the interception of which was in violation of section 2511(2)(d).".

SEC. 8113. TECHNICAL AMENDMENT OF 31 U.S.C. 5325.

(b) Section 5325 of title 31, United States Code, is amended—

(1) by deleting the word "transaction" in subsection (a)(1);

(2) by adding the words ", as defined by the Secretary," after the word "account" in subsection (a)(1); and

(3) by deleting subsection (c).

SEC. 8114. ONDCP TRANSFER AUTHORITY.

Section 1502(d) of title 21, United States Code, enacted by section 1003(d) of the Anti-Drug Act of 1988, is amended by—

(1) deleting the word "and" at the end of subparagraph (6);

(2) deleting the period at the end of subparagraph (7)(B) and inserting in lieu thereof "; and"; and

(3) inserting a new subparagraph (8) as follows:

"(8) transfer funds from the Special Forfeiture Fund referred to in section 6073 of the Anti-Drug Abuse Act of 1988 (21 U.S.C. 1509), as well as other funds appropriated by Congress to the Office of National Drug Control Policy for assistance to high intensity drug trafficking areas, to Federal agencies and departments for the purpose of executing the National Drug Control Strategy."

"(9) transfer funds appropriated to the Office of National Drug Control Policy for a specified purpose to appropriate Federal agencies and departments for the same purpose.".

---

SECTION-BY-SECTION ANALYSIS OF THE NATIONAL DRUG CONTROL STRATEGY IMPLEMENTATION ACT OF 1990

TITLE I—DRUG TESTING, FUNDING PROGRAMS, AND TREATMENT

Subtitle A—Funding Programs and Treatment

Sec. 1101. Drug testing in the criminal justice system as a condition of receipt of Justice Drug Grants.

This amends Title I of the Omnibus Crime Control and Safe Streets Act of 1968 to condition receipt of Federal criminal justice funds upon States adopting drug-testing programs that will include appropriate categories of arrestees, prisoners, probationers, parolees, and those out on bail, and upon States using test results appropriately in bail, sentencing, early release, probation, and parole decisions.

Sec. 1102. Maintenance of effort in ADMS block grants.

This section of the bill amends section 1916(c)(11) of the Public Health Service Act to add language to prohibit States who receive funding from the ADMS Block grant program from reducing their non-Federal expenditures for drug-related activities.

Current law prohibits States receiving Block grant funding from reducing their own funding for alcohol, drug abuse, and mental health activities below the two-year average of their expenditures for all three programs. Since this requirement applies to the total amount spent on all three programs, States could reduce their funding for drug-abuse related programs while maintaining their overall level of expenditures. This amendment would prohibit States receiving Block grant funding from reducing their own funding for drug-abuse related activities below the average of such expenditures for the preceding two years.

Current law allows the Secretary to waive the existing requirement if a State makes a request and if the Secretary determines that there are extraordinary economic conditions in the State to justify such a waiver. This amendment would extend the Secretary's authority to waive the new requirement as well.

Sec. 1103. Establishment of statewide drug treatment plans: amendment to Chapter 6A of title 42 (Public Health Service Act).

This amends Chapter 6A of Title 42 of the United States Code (Public Health Service Act) to require States as a condition of receipt of Federal funds to develop, implement, and submit to the Secretary of HHS a Statewide Drug Treatment Plan. The amendment delineates the contents of the Plan and describes requirements related to submission of the Plan to the Secretary.

Sec. 1104. Raising the Cap on Discretionary Grants for Justice Drug Grants.

This section amends the Bureau of Justice Assistance Drug Grant Program (the Drug Control and System Improvement Grant Program) to increase the cap on funds applied to discretionary grants from $50 million to $100 million.

Subtitle B—Drug-Testing of Defendants on Post-Conviction Release

This subtitle would create a nationwide program of drug testing for federal offenders on post-conviction release, and would effectively supersede and expand the demonstration program established by section 7304 of that Anti-Drug Abuse Act of 1988 in relation to convicted defendants. Section 7304 of that Act created a two-year demonstration program including mandatory drug testing of felons on probation or post-imprisonment supervised release (but not parole) in eight districts to be selected by the Judicial Conference.

Based on prelimary data, the Administration has concluded that there is no need to await the final results of that demonstration program. The idea of a program to require defendants on post-conviction release to submit to periodic drug tests is so clearly meritorious that it should be implemented across the United States, as soon as practicable and feasible. Since the capacity to im-

plement this program depends on the availability of appropriate personnel and/or contractors necessary to ensure quality control, this section allows a degree of flexibility and grants the Administrative Office of the United States Courts the latitude necessary to phase-in the program in stages as soon as practicable and feasible.

It is estimated that more than 81,000 persons will be on some form of federal supervised release in 1990. Under the proposal, defendants placed on parole, probation or post-imprisonment supervised release will be subject to a mandatory condition that they refrain from illegal use of drugs and submit to periodic drug tests. The class of defendants subject to this mandatory condition (limited to felons under the Anti-Drug Abuse Act demonstration program) would be extended to include as well misdemeanant firearms, drug, and violent offenders. The requirement could be suspended or ameliorated upon request of the Director of the Administrative Office or his designee. No adverse action could take place for failure of a drug test unless the test was confirmed using gas chromatography/mass spectrometry techniques or other tests determined to be of equivalent reliability.

TITLE II—SANCTIONS FOR FAILURE TO LAND OR TO BRING TO

Sec. 2101. Sanctions for Failure to land or to Bring to.

Proposed Section 2237 would make it a criminal offense to fail to obey the order of an authorized Federal law enforcement officer to land an aircraft or bring to a vessel. The failure to land offense is limited to cases involving the enforcement of the laws of the United States relating to controlled substances as that term is defined in 21 U.S.C. 802(6) or money laundering (18 U.S.C. 1956–57). It is also limited to aircraft which have crossed the border of the United States, or aircraft or vessels subject to the jurisdiction of the United States operating outside the United States.

This language (together with that proposed in section 2102 below) supports the *National Drug Control Strategy*, which states:

"To address [the air interdiction] problem, the Administration will seek new legislation to provide Federal law enforcement agencies with the appropriate authority to order U.S.-registered aircraft, or any aircraft flying over the U.S. territory, to land if there is reasonable suspicion that the aircraft is in violation of a Federal criminal statute related to aviation drug smuggling. The statute would also give the Federal Aviation Administration the explicit authority to suspend or revoke, on an emergency basis, the airmen certificate of a pilot who does not comply with a lawful order to land and the registration certificate of the aircraft."

Sec. 2102. FAA Summary Revocation Authority.

The Federal Aviation Act of 1958 would be amended to authorize revocation of an aircraft's registration certificate by operation of law upon refusal to land an aircraft. The owner of the registrated aircraft would be authorized to show cause why the factual predicate did not exist to trigger the revocation of the aircraft registration certicate or why it would be in the public interest for the Administrator to issue a new certificate of registration to be effective concurrent with the revocation which occurred by operation of law.

Sec. 2103. Coast Guard air interdiction authority.

This amends title 14 of the United States Code to provide the Coast Guard with specific law enforcement authority with respect to aircraft flying over the high seas and waters over which the United States has jurisdiction. This authority is required to order an aircraft to land. Failure to obey an order issued under this section would be a violation of proposed section 2237 of title 18, United States Code (Section 2101 of this Act). Orders to land an aircraft must be communicated in a manner consistent with the regulations to be issued pursuant to proposed section 2237.

Sec. 2104. Coast Guard civil penalty provisions.

This amends title 14 of the United States Code to provide the Coast Guard with a civil penalty sanction for violations of proposed section 2237 of title 18, United States Code (Section 2101 of this Act), involving orders issued by Coast Guard commissioned officers, warrant officers, or petty officers.

Sec. 2105. Customs orders.

This amends the enforcement provisions of Section 1581 of Title 19 so as to clarify that Customs officers may exercise their enforcement authority outside of the United States, including any location in which Customs Officers are permitted to conduct inspections, examinations or searches, including any such location in a foreign country.

Sec. 2106. Customs civil penalty provisions.

This provides the Customs Service with a civil penalty sanction for violations of proposed section 2237 of title 18, United States Code (Section 2101 of this Act), involving orders issued by Customs officers.

TITLE III—DRUG PARAPHERNALIA

Sec. 3001. Drug Paraphernalia Amendment.

This section makes several changes in the drug paraphernalia statute, 21 U.S.C. 857. Under current law, 21 U.S.C. 857, it is illegal to use the mails to sell drug paraphernalia, to offer for sale such paraphernalia in interstate or foreign commerce, or to import or export such paraphernalia. Originally enacted by the Anti-Drug Abuse Act of 1986, the offense is a felony punishable by up to three years imprisonment and a $100,000 fine.

Subsection (a)(1) amends the penalty provision of the drug paraphernalia statute, 21 U.S.C. 857(c), to provide that criminal forfeiture will be accomplished in accordance with the detailed procedures of section 413 of the Controlled Substance Act (21 U.S.C. 853) which are applicable to other criminal forfeiture provisions of the act.

Subsection (a)(2) is a technical correction which restates the maximum fine amount as "under title 18, United States Code." The statute presently states the criminal fine as up to $100,000.

Subsection (a)(3) adds a civil penalty of up to $100,000 for violations of the paraphernalia statute and authorizes the Attorney General to seek injunctive relief against violators. Such injunctive relief could be sought both to halt an ongoing violation or to prevent a future offense.

Subsection (b) amends 21 U.S.C. 857(c) to add a civil forfeiture provision and conform the seizure and forefeiture of drug paraphernalia with general seizure and forfeiture authority. Contrary to normal governmental forfeiture provisions, seizure and forfeiture of drug paraphernalia under 21 U.S.C. 857(c) requires the criminal conviction of the violator. Subsection (c) provides that the provisions of the Customs laws will be applicable to civil forfeiture. This is because the Customs Service is presently investigating violations of the drug paraphernalia provisions and it is intended that Customs continue to do so.

TITLE IV—INTERNATIONAL NARCOTICS CONTROL

Sec. 4101. Economic assistance for Andean countries.

This section adds a new provision to the Foreign Assistance Act which will permit the Agency for International Development to implement economic assistance for *Peru, Bolivia and Colombia* on an expedited basis, with authorities comparable to those provided in Section 481(a)(4) of the Foreign Assistance Act. The United States Government will, thus, be able to implement narcotics control assistance and complementary economic assistance in a coordinated and timely fashion.

Sec. 4102. Support for law enforcement.

This section waives the prohibition on providing training and equipment for certain law enforcement units in Colombia, Bolivia, and Peru, to allow for implementation of the second phase of the President's Andean Strategy.

Sec. 4103. Waiver of Brooke-Alexander amendment.

This section extends to FY 1991 the waivers of Section 620(q) of the Foreign Assistance Act and Section 518 of the Foreign Operations, Export Financing, and Related Programs Appropriation Act (the Brooke-Alexander Amendment) to permit narcotics-related economic assistance to major coca producing countries which are in arrears on debt repayments to the United States government.

Sec. 4104. Assistance for agricultural and industrial alternatives to narcotics production.

This section provides waivers of existing law which imposes restrictions upon economic assistance in order to promote agricultural and industrial production alternatives to narcotics production.

Sec. 4105. Revisions of certain narcotics related provisions of the Foreign Assistance Act.

This section amends certain narcotics-related provisions of the Foreign Assistance Act. Subsection (a) amends Section 482(b) to authorize the use of funds authorized and appropriated for international narcotics control for defensive arming of U.S.-titled aircraft, and their operators, that are part of the INM Airwing Operations.

At the time that the Section 482(b) prohibition was enacted in 1978, the report of the Senate Foreign Relations Committee stated that the committee did not intend prohibition to apply to helicopters. (S. Rpt. 95–841, International Security Assistance Act of 1978, P.L. 95–384). Subsequent legislation specifically waiving the Section 482(b) prohibition in limited circumstances (involving helicopters) suggests ambiguity in the Congressional construction of the statute. Therefore, in order to remove any ambiguity and to make clear that United States assets and personnel overseas have the authority to obtain the protection that they need to perform their narcotics eradication and interdiction missions, this provision proposes explicit authorization for INM to procure directly out of its budget weapons and ammunition to be used for defensive purposes, instead of relying on other U.S. or foreign agencies to provide such support. This authorization applies to weapons and ammunition to arm aircraft and to arm the U.S. and foreign personnel who operate

them. The weapons and ammunition are to be used exclusively for defensive purposes.

Subsection (b) amends the annual narcotics certification procedure of Section 481(h)(1) to free the President from the obligation to withhold 50 percent of the assistance authorized and appropriated for a major drug-producing or drug-transit country pending the March 1 certification if he determines that it would be contrary to the national interest if the full amount of assistance were not made available in the beginning of the fiscal year for a particular country.

Subsection (c) amends Section 484 of the Foreign Assistance Act of 1961 (FAA) to restrict to aircraft procured with funds authorized to be appropriated by the International Narcotics Control chapter of the FAA, the current provision that any aircraft made available to a foreign country shall be provided only on a lease or loan basis. It also would allow the President to waive the requirement when he determines that it is in the national interest to do so, and so informs the Congress.

Sec. 4106. Size of the military assistance group in Bolivia and Peru.

This section amends the Foreign Assistance Act to permit the assigning of more than 6 members of the armed forces to Military Assistance Groups (MAG) in Bolivia and Peru. Section 4305 of the Anti-Drug Abuse Act of 1988 (P.L. 100-690) amended the Foreign Assistance Act to permit enlargement of the MAG assigned to Colombia. The greatly expanded role of the U.S. military in supporting counter-narcotics operations in Bolivia and Peru justifies enlargement of MAGs in those countries as well.

Sec. 4107. Nonapplicability of certification procedures to certain major drug-transit countries.

This section continues for FY 1991 the waiver contained in the International Narcotics Control Act of 1989 of the requirement to withhold 50 percent of annual foreign aid to certain countries as required by Section 481 of the Foreign Assistance Act. Such countries would be those which have both a fast spend-out rate for foreign assistance funds and a demonstrable record of narcotics cooperation.

Sec. 4108. Extradition of U.S. citizens.

This amendment deals with a problem that arises under some of our older extradition treaties that fail to include specific authority to extradite United States nationals who are charged with crimes in the country seeking extradition. Under prevailing case law, the United States may extradite its nationals in the absence of any limiting language in a bilateral treaty. *Charlton* v. *Kelly*, 229 U.S. 447 (1913). However, if an extradition treaty contains language which limits that authority, e.g., "neither party shall be bound to deliver up its own citizens", the Supreme Court has held that United States nationals may not be extradited unless the treaty also contains a positive grant of authority to surrender United States citizens. *Valentine* v. *United States ex rel. Neidecker*, 229 U.S. 5, 7-12 (1936). Post-*Valentine* extradition treaties of the United States uniformly contain language such as "[N]either of the contracting Parties shall be bound to deliver up its own citizen under the stipulations of this convention, *but the executive authority of each shall have the power to deliver them up, if, in its discretion, it is deemed proper to do so.*" (Emphasis added). Such a clause contains the necessary positive grant of authority to the Executive to extradite United States citizens.

However, the United States still has several pre-*Valentine* treaties in force that contain the limitation but lack a requisite grant of authority. In those instances, the United States must refuse to extradite based on the nationality of the offender. Moreover, the limitation on extradition of nationals posed by these pre-*Valentine* treaties must be remedied in light of the extradition provisions of the new U.N. Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances (1988), Article 4 Paragraph 2. Under these provisions, the United States must either assure that nationality is not a bar to extradition of its citizens or establish its jurisdiction to prosecute those citizens for the drug offenses they have committed abroad. The alternative of prosecution is not feasible as a practical matter. Moreover, it would be inconsistent with our general policy against creating "universal" jurisdiction over extraterritorial crimes.

The proposed amendment would remedy the problem caused by some pre-*Valentine* treaties by expressly permitting the surrender of United States nationals notwithstanding the language of limitation in those treaties. This provision is consistent with the general policy of the United States favoring extradition of nationals to the country where the greatest harm has been suffered because of the commission of criminal acts, and against creating "universal" extraterritorial jurisdiction. It also recognizes the reality that it is not feasible to address this situation on a piecemeal basis by renegotiating all the pre-*Valentine* treaties that contain this flaw. Moreover, it would permit the United States to meet fully the important objectives of the new U.N. Convention.

Sec. 4109. Export-Import Bank financing for sales of defense articles and services for anti-narcotics purposes.

This section amends the Export-Import Bank Act to extend the Eximbank's authority to finance sales of defense articles and services for anti-narcotics purposes to September 30, 1992. The Bank's current authority to finance sales for this purpose expires on September 30, 1990.

## TITLE V—DEATH PENALTY FOR DRUG KINGPINS AND OTHER CRIME PROVISIONS

### Subtitle A—Capital Punishment for Drug Kingpins and Related Offenders

This subtitle would authorize capital punishment for the most aggravated drug crimes and enact necessary standards and procedures for imposing and carrying out the death penalty. It represents a continuation and extension of efforts over the past several years to restore an enforceable death penalty for the most heinous federal offenses. In the 98th Congress, for example, the Senate passed a general federal death penalty bill, S. 1765, by a vote of 63-32, and in the 100th Congress, legislation was enacted as part of the Anti-Drug Abuse Act of 1988 which authorizes capital punishment for certain drug-related killings. In the current Congress, a general proposal to restore an enforceable death penalty for aggravated federal crimes of homicide, treason, and espionage appears as title II of the President's proposed Comprehensive Violent Crime Control Act (S. 1225 and H.R. 2709).

The proposal of this subtitle goes beyond earlier legislation in authorizing capital punishment for the most serious categories of drug offenses and offenders. The constitutionality of this proposal has been fully analyzed in previous statements by the Administration. *See* Statements of Assistant Attorney General William P. Barr and Assistant Attorney General Edward S.G. Dennis, Jr., before the Subcommittee on Crime of the House Committee on the Judiciary concerning Death Penalty Legislation (March 14, 1990); Statement of Assistant Attorney General Edward S.G. Dennis, Jr., before the Senate Judiciary Committee concerning the Death Penalty (October 2, 1989).

The procedural provisions of this subtitle are largely the same as the death penalty procedures proposed in title II of the President's violent crime bill (S. 1225 and H.R. 2709). It also incorporates new provisions concerning appointment of counsel and collateral review, which are modeled on the recommendations of the Ad Hoc Committee of the Judicial Conference on Federal Habeas Corpus in Capital Cases (the "Powell Committee"), to ensure that the effectiveness of the federal death penalty is not undermined by dilatory and repetitive litigation.

The section-by-section analysis below describes and explains the various provisions of this subtitle.

Sec. 5102. Death penalty authorizations and procedures.

This section of the bill adds a new chapter 228 to title 18 of the United States Code, consisting of sections 3591 through 3599, and makes necessary technical amendments. These sections provide that the punishment for certain drug crimes may, in specified circumstances, extend to the death penalty and set forth procedures for imposing and carrying out the death penalty.

*Section 3591 (Sentence of Death)*

This section sets out the offenses for which the death penalty may be imposed if, after consideration of the mitigating and aggravating factors applicable to the case in a post-verdict hearing (described in subsequent sections), it is determined that the imposition of death is justified. The specific categories are as follows:

*Section 3591(a).* The first category of drug offenders who would be potentially eligible for capital punishment—described in proposed 18 U.S.C. 3591(a)—are offenders who are currently subject to a mandatory term of life imprisonment under 21 U.S.C. 848(b). This is the highest category of major traffickers recognized under federal law. Under the general provisions of 21 U.S.C. 848, a person is guilty of engaging in a Continuing Criminal Enterprise (CCE) if he commits a federal drug felony as part of a continuing series of federal drug violations which are undertaken in concert with at least five other persons, where the defendant is an organizer, supervisor, or manager in relation to such persons and derives substantial income or resources from the enterprise. To be subject to mandatory life imprisonment under section 848(b), a CCE violator must, in addition, be a principal organizer, leader, or administrator of such an enterprise, and must either commit a violation involving enormous quantities of drugs—e.g., 30 kilograms of heroin or 150 kilograms of cocaine—or be a principal organizer, leader, or administrator of a CCE that has gross receipts of at least $10 million in a twelve-month period.

Thus, in essence, the offenders potentially subject to capital punishment under proposed section 3591(a) consist of principal organizers, administrators, and leaders of drug enterprises including at least five subordinates where transactions involving enormous quantities of drugs are involved (e.g., 30 kilograms of heroin, 150 kilograms of cocaine) or the enterprise has annual revenues of at least $10 million.

The inclusion of the very largest traffickers in the class of persons potentially eligible for the death penalty, as proposed in section 3591(a), is a response to the human and social devastation that is threatened and actually caused by their activities. In the past, Congress has prescribed the death penalty for treason, *see* 18 U.S.C. 2381, nuclear and other forms of espionage, *see* 10 U.S.C. 906a, and aircraft piracy, *see* Act of September 5, 1961, 75 Stat. 466 (1961). The proposal reflects a recognition that the current scourge of drug abuse and of drug-related crime and violence represents a comparable threat to the security and well-being of the public, and that the use of the ultimate sanction should be available in this context.

*Section 3591(b).* The second category of offenders who would be potentially eligible for capital punishment—described in proposed 18 U.S.C. 3591(b)—consists of a somewhat more broadly defined class of drug kingpins who attempt to obstruct the investigation or prosecution of their activities by attempting to kill persons involved in the criminal justice process, or knowingly directing, advising, authorizing, or assisting another to attempt to kill such a person. To fall within the death-eligible class, the defendant would have to be a CCE principal organizer, administrator, or leader as defined in 21 U.S.C. 848, but would not necessarily have to satisfy the specific criteria for mandatory life imprisonment under section 848(b). Including a more broadly defined class of major traffickers—but limited to those who engage in actual attempted murders to obstruct justice—is justified by the flagrant and growing problem of extreme violence against witnesses in drug cases, as well as the increasing threat and reality of violence directed against criminal justice professionals. A CCE violator under 21 U.S.C. 848 will face, in any event, a very long term of imprisonment (20 years to life) if he is convicted, and he may feel that there is relatively little to lose by attempting to silence a witness or kill other participants in the process. The extension of the death penalty to attempted murders, in this limited context, even where death does not actually result, would send a strong message concerning the system's resolve to deal forcefully and effectively with this problem.

The applicability of proposed section 3591(d), as noted above, would be conditioned on an attempted murder by a drug kingpin to obstruct justice, committed against any public officer—such as a police officer, judge, or prosecutor—juror, or witness, or a member of the family or household of such a person. Family members (i.e., parents, spouses, children and siblings) and members of the households of such persons are included because of their exposure to victimization as targets of efforts at intimidation or reprisal by drug offenders.

*Section 3591(c).* The third category of potentially death-eligible drug offenders—described in proposed 18 U.S.C. 3591(c)—fills a gap in existing law. The Anti-Drug Abuse Act of 1988 enacted provisions authorizing capital punishment for certain intentional drug-related killings, *see* 21 U.S.C. 848(e), but did not cover unintentional killings resulting from aggravated recklessness, such as killings of innocent bystanders during a shoot-out among traffickers, or the death of users resulting from the knowing distribution of bad drugs.

Proposed section 3591(c) would fill this gap by authorizing the death penalty where the defendant, intending to cause death or acting with reckless disregard for human life, engages in a federal drug felony (not necessarily a continuing criminal enterprise offense), and a person dies in the course of the offense or from the use of drugs involved in the offense.

The specific standard of reckless disregard for human life in proposed section 3591(c) refers to the very high level of culpability—i.e., knowingly creating a grave risk of death to another—that the Supreme Court approved as adequate to support the imposition of capital punishment in *Tison* v. *Arizona*, 481 U.S. 137 (1987). *Tison* involved defendants who did not personally kill the victims or intend to cause their death, but who created a situation that resulted in death by freeing two highly dangerous inmates from prison, arming them, and assisting them in waylaying and handling the victims, who were actually killed by the inmates. The Court stated that "the reckless disregard for human life implicit in knowingly engaging in criminal activities known to carry a grave risk of death represents a highly culpable mental state, a mental state that may be taken into account in making a capital sentencing judgment. . . ." *Id.* at 157-58.

The death penalty provisions of President Bush's violent crime bill (S. 1225 and H.R. 2709) include the general principle that killings resulting from aggravated recklessness, pursuant to the *Tison* standard, may be punished by death. Proposed section 3591(c) in this bill would extend the application of this principle to drug-related killings. Moreover, in relation to deaths resulting from drug use, current law (21 U.S.C. 841) generally authorizes or requires life imprisonment where serious bodily injury results from the use of drugs distributed by an offender. This proposal would extend this approach, authorizing the possibility of a death sentence (rather than life imprisonment) where the harm resulting from the use of drugs distributed by the offender is death (rather than serious injury).

*Section 3592 (Factors to be Considered in Determining Whether a Sentence of Death is Justified)*

This section sets forth the statutory mitigating and aggravating factors to be considered by the jury or judge in determining whether a sentence of death is justified upon conviction of a crime described in proposed section 3591. The section also allows, consistent with Supreme Court decisions, for the consideration of any other aggravating or mitigating factor, not listed in the section, which might affect such a determination. See *Skipper* v. *South Carolina*, 476 U.S. 1 (1986); *Lockett* v. *Ohio*, 438 U.S. 586 (1978); *Barclay* v. *Florida*, 463 U.S. 939 (1983); *Zant* v. *Stephens*, 462 U.S. 862 (1983).

Subsection (a) sets forth three mitigating factors which must be considered. They are (1) that the defendant's mental capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of the law was significantly impaired, although not so impaired as to constitute a defense to the charge; (2) that the defendant was under unusual and substantial duress although not such as to constitute a defense; and (3) that the defendant was an accomplice whose participation in the offense was relatively minor, even though he may still be charged as a principal. Subsection (a) further states that the jury or judge shall also consider any other aspect of the defendant's character or record or any other circumstance of the offense that the defendant may offer in mitigation. While the Supreme Court has held that no limitation may be placed on the defendant's introducing evidence of mitigating factors, some linkage must be established between the evidence offered in mitigation and the defendant's persona or the offense. For example, the catch-all provision in subsection (a) is not intended to allow such evidence as that on the night of the murder in New York City, unusually heavy rain had fallen in Los Angeles.

Subsection (b) sets forth aggravating factors to be considered. These factors are tailored to the conditions of drug trafficking and identify features of a defendant's conduct or background that provide particularly strong evidence of dangerousness, incorrigibility, or indifference to human life. The jury would have to find at least one of these additional factors to impose a death sentence:

Paragraphs (1)-(4) of subsection (b) set out general criminal record aggravating factors. These are prior conviction of a homicide punishable by life imprisonment, and prior conviction of at least two violent or drug felonies.

The factor in paragraph (5) of subsection (b) is prior conviction of a drug offense punishable by five or more years of imprisonment. This is nearly the same as one of the aggravating factors in the Anti-Drug Abuse Act death penalty provisions (21 U.S.C. 848(n)(10)).

The factor in paragraph (6) of subsection (b) is using or knowingly directing, advising, authorizing, or assisting another to use a firearm to threaten, intimidate, assault, or injure a person in committing the drug offense, or in furtherance of a continuing criminal enterprise (as defined in 21 U.S.C. 848) of which the offense was a part. Mere possession of a firearm in connection with drug activities would not be covered; the defendant would actually have to engage in or sanction the hostile use of a firearm against a person.

The factors in paragraphs (7)-(9) of subsection (b) involve a violation in committing the drug offense, or in furtherance of a continuing criminal enterprise, of the provisions that define aggravated offenses where trafficking is carried out in a manner that exploits or jeopardizes young people. This includes distribution to persons under twenty-one (21 U.S.C. 845), distribution near schools (21 U.S.C. 845a), and using minors in trafficking (21 U.S.C. 845b). The 1988 Anti-Drug Abuse Act death penalty provisions similarly have an aggravating factor (21 U.S.C. 848(n)(11)) for distribution to persons under twenty-one in violation of 21 U.S.C. 845. These factors would apply where the defendant directly committed such an offense, or would be liable as an accomplice in such an offense under the normal standards of 18 U.S.C. 2 (by aiding, abetting, counseling, commanding, inducing, procuring, or willfully causing the commission of the offense).

Factor (10) of subsection (b) covers cases where the offense involves importing, manufacturing, or distributing drugs that are mixed with a potentially lethal adulterant, and the defendant is aware of the presence of the adulterant. This is designed to reach situations in which the manufacturer or distributor cuts drugs with another toxic substance, such as household detergent.

*Section 3593 (Special Hearing to Determine Whether a Sentence of Death is Justified)*

This section sets out the procedure for a special hearing to determine whether a sentence of death is justified. At the conclusion

of the hearing the jury (except in those unusual cases where the sentencing hearing is before the judge alone) will return a binding recommendation as to whether the sentence of death is justified. If the jury returns a recommendation of the death penalty as opposed to some lesser punishment, the court must impose a sentence of death.

*Subsection 3593(a)* provides that if the attorney for the government believes that the circumstances of one of the offenses for which the death penalty is authorized under section 3591 justify the imposition of the death penalty, he or she must file with the court and serve on the defendant a notice of the conclusion and set forth the aggravating factors (including any not statutorily enumerated) the government proposes to show at the hearing. The notice must be filed and served on the defendant a reasonable time before trial or the accepting of a guilty plea or at such time thereafter as the court may permit upon a showing of good cause. The provision is intended to give adquate notice to the defendant so he can prepare for the post-conviction sentencing hearing and to ensure an appropriate *voir dire* that comports with applicable Supreme Court cases.

*Subsection 3593(b)* provides that if the attorney for the government has filed the notice required by subsection 9a) and if the defendant is found guilty, a sentencing hearing shall be conducted by the judge who presided at trial or accepted the guilty plea or by another judge if the first one is unavailable. No presentence report is to be prepared in such a case inasmuch as the issue at the hearing is the existence of aggravating or mitigating factors and the justifiability of imposing a death sentence, and the issue is to be determined on the basis of the information presented at the hearing. The hearing is to be conducted before the jury that determined the defendant's guilt, except that a jury may be impaneled for the purpose of the sentencing hearing in a case in which the defendant was convicted on a trial to the court or on a plea of guilty, in a case in which the original jury was discharged for good cause, or in a case where reconsideration of the sentence is necessary. This subsection also provides that the defendant may move that the sentencing hearing be conducted before the court alone but that the attorney for the government must concur. In the absence of this concurrence by the government, the sentencing hearing is before a jury.

*Subsection 3593(c)* deals with proof of the aggravating and mitigating factors. Any information relevant to the sentence may be presented. Information concerning any mitigating factor or factors, both those listed in section 3592 and those not so listed, may be introduced. Evidence of at least one aggravating factor listed in section 3592 must be introduced. As explained, the government must give the defendant notice of which aggravating factors it will seek to establish. If evidence of a statutory aggravating factor is introduced, the government may also introduce evidence of any other aggravating factor, again providing the government has given notice as to the nature of such a nonstatutory factor.

The information may include trial transcripts and exhibits or relevant parts thereof. Other evidence relevant to any mitigating or previously identified aggravating factor may be presented regardless of its admissibility under the rules of evidence, except that the court may exclude information if its probative value is outweighed by the danger of its creating unfair prejudice, confusing the issues, or misleading the jury. The burden of establishing an aggravating factor is on the government and the standard of proof for such a factor is beyond a reasonable doubt. The defendant has the burden of establishing any mitigating factor but this burden is satisfied if the defendant proves such a factor by a preponderance of the evidence.

*Subsection 3593(d)* deals with the return of special findings required in the sentencing hearing. It provides that the jury, or if there is no jury, the court, must consider all the information received at the sentencing hearing. The jury, or if there is no jury, the court, must return a special finding identifying each aggravating factor (both statutory and nonstatutory) which it has found. Once again, it can only find the existence of an aggravating factor for which notice was provided. The finding with respect to an aggravating factor must be unanimous. If no aggravating factor is found, the death penalty cannot be imposed and the court must impose some other sentence authorized by statute.

With respect to mitigating factors, subsection 3593(d) reflects the holding of the Supreme Court in *Mills* v. *Maryland*, 486 U.S. 367 (1988), that individual jurors may not be precluded from considering mitigating evidence regardless of the number of jurors who agree on a particular factor. Consequently, subsection (d) provides that a finding with respect to a mitigating factor may be made by one or more members of the jury.

As used throughout section 3593, the term "mitigating factor" is meant to include all mitigating evidence which the sentencer must consider before returning a sentence of death to comport with such cases as *Eddings* v. *Oklahoma*, 455 U.S. 104 (1982). Nevertheless, the jury may only consider evidence presented at trial or at the sentencing hearing. It may not speculate on the existence of some factor completely unsupported by any evidence. See *California* v. *Brown*, 479 U.S. 538 (1987). Any member of the jury who is persuaded by a preponderance of the evidence—the standard set out in subsection (c)—that a particular mitigating factor exists may consider such a factor established. That juror (even if he or she is the only one who believes the evidence and has concluded that such a factor has been established) may then weigh that evidence against any aggravating factors which have been found unanimously beyond a reasonable doubt—again, the requirement of subsection (c)—in deciding, under subsection (e), whether to return a binding recommendation for a sentence of death.

*Subsection 3593(e)* provides that if one or more of the statutorily required aggravating factors is found to exist (a constitutional requirement under *Zant* v. *Stephens* and *Barclay* v. *Florida, supra*) the jury, or the court if there is no jury, must then consider whether the aggravating factor or factors which it has found outweigh the mitigating factor or factors. It is the intent of this subsection that the jurors be instructed that they are to weigh and balance the aggravating factor or factors found against any mitigating evidence. As discussed above, findings of aggravating factors would require a formal determination of the whole jury, but the individual members of the jury would make their own determinations concerning the existence of mitigating factors.

If each juror found no mitigating factors or found that any mitigating factors were outweighed by the aggravating factor or factors, then the jury would be required to make a binding recommendation to impose the death penalty. This reflects the judgment that the death penalty is presumptively the appropriate penalty for the crimes described in section 3591 under the aggravated circumstances described in section 3592, and that the death penalty should be imposed in such cases unless the aggravating factors are balanced or outweighed by mitigating circumstances. The Supreme Court upheld rules requiring that the death penalty be imposed under these conditions in *Blystone* v. *Pennsylvania*, No. 88-6613 (Feb. 28, 1990), and *Boyde* v. *California*, No. 88-6613 (March 5, 1990). This approach promotes equal justice and avoids the potential for arbitrariness that would exist under an approach that gave the jury or court less guidance in imposing the death penalty.

Subsection (e) also requires an instruction to the jury that it is not to be influenced in its decision whether to recommend the death penalty by sympathy, sentiment, passion, prejudice, or any other arbitrary factor, and should make such a recommendation as the information warrants. This is substantially the same as the instruction upheld by the Supreme Court in *Saffle* v. *Parks*, No. 88-1264 (March 5, 1990). *See also California* v. *Brown*, 479 U.S. 538 (1987) (approving similar instruction). The requirement of such an instruction serves to promote equal justice by emphasizing that capital sentencing decisions are not to be influenced by legally inadmissible considerations or personal whim or caprice. Rather, what is called for is a reasoned factual and moral assessment by the jury based on the evidence presented at the trial and sentencing hearing and its conclusions concerning the existence and relative weight of pertinent aggravating and mitigating factors.

*Subsection 3593(f)* is designed as a special precaution against discrimination by the jury against the defendant on the basis of the defendant's or the victim's race, color, national origin, religious beliefs, or gender. It provides that in a sentencing hearing in which the death penalty is sought, the jury shall be specifically instructed that it must not consider these factors and that the jury is not to make its binding recommendation for a sentence of death unless it would recommend such a sentence no matter what the race, color, national origin, religious beliefs, or sex of the defendant or any victim may be. Moreover, the jury must return to the court a certificate signed by each juror stating that consideration of these factors was not involved in his or her individual decision, and that he or she would have made the same binding recommendation as to the sentence no matter what these particular characteristics of the defendant or victim might be.

*Section 3594 (Imposition of a Sentence of Death)*

This section provides that if the jury recommends a sentence of death, the court must sentence the defendant to death. If the court, rather than the jury, is the fact finder at the sentencing hearing, section 3594 requires the court to follow its own recommendation and impose the death penalty. If, however, the jury, or if there is no jury, the court, does not recommend the sentence of death, the court shall impose any sentence other than death authorized by law.

This section also provides that notwithstanding any other provision of law, life imprisonment without possibility of release or

temporary furlough is an authorized sentence for a conviction of an offense punishable by death if the maximum term of imprisonment for such an offense is life.

*Section 3595 (Review of a Sentence of Death)*

This section sets out the rules applicable to appeals from the imposition of the death sentence. *Subsection (a)* provides that a sentence of death shall be subject to review by the court of appeals upon an appeal of the sentence by the defendant. Notice of appeal of the sentence must be filed within the time specified for filing an appeal of the judgment of conviction and the court may consolidate the appeal of the sentence and the appeal of the conviction. The review of a case in which the death sentence has been imposed must be given priority over all other cases.

*Subsection 3595(b)* provides that the court of appeals must consider the entire record including the evidence submitted at trial, the information submitted during the sentencing hearing, the procedures employed at the sentencing hearing, and the special findings returned at the sentencing hearing as to the existence of the aggravating factors.

*Subsection 3595(c)* states that the court of appeals must affirm the sentence if it finds that the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor, and the evidence and information support the special findings of the existence of an aggravating factor or factors. See *Zant* v. *Stephens, supra* (death sentence valid even if an aggravating factor is invalidated or found inapplicable on appeal, provided at least one valid statutory aggravating factor remains). Proportionality review with other death cases is not a part of the review process. *Pulley* v. *Harris,* 465 U.S. 37 (1984). In all other cases, the court of appeals must remand the case for reconsideration under section 3593 or for imposition of another authorized sentence, as appropriate. The court of appeals must state in writing the reasons for its disposition of an appeal of a sentence of death.

*Section 3596 (Implementation of a Sentence of Death)*

This section is concerned with the implementation of a sentence of death. *Subsection 3596(a)* provides that a person sentenced to death shall be committed to the custody of the Attorney General pending completion of the appeal and review process. When the sentence is to be implemented, custody of the person would be given to a United States Marshal who would then supervise the implementation of the penalty in accordance with the law of the State in which the sentence is imposed. If that State has no death penalty, the court would designate another State which does have such a penalty and the execution would be carried out in the manner prescribed in that State. This subsection generally reinstates a portion of the provisions of former section 3566 of title 18 which was repealed as of November 1, 1987, by P.L. 98-473.

*Subsection 3596(b)* states that a sentence of death shall not be carried out upon a person who lacks the mental capacity to understand the death penalty and why it was imposed, or upon a woman who is pregnant. The latter limitation is to spare the unborn. Following the conclusion of the pregnancy, the sentence of death would be implemented. The former limitation is intended to implement the constitutional bar on execution of a person who is mentally incompetent but who was sane at the time of the offense and who was competent to stand trial. See *Ford* v. *Wainwright,* 477 U.S. 399 (1986). This limitation, too, would normally only postpone the implementation of the sentence of death. See *Ford* v. *Wainwright,* concurring opinion of Justice Powell, 477 U.S. at 425 and footnote 5: "The only question raised is not *whether* but *when* his execution may take place. [Emphasis in original.] [I]f petitioner is cured of his disease, the State is free to execute him."

*Section 3597 (Use of State Facilities)*

This section reinstitutes other parts of former section 3566 not contained in subsection 3506(a) by authorizing the United States Marshal charged with implementing the sentence of death to use State facilities and to pay the costs thereof.

*Sections 3598 and 3599 (Appointment of Counsel and Collateral Attack)*

Sections 3598 and 3599 would adopt improved procedures for federal death penalty litigation based on the recommendations of the Ad Hoc Committee of the Judicial Conference on Federal Habeas Corpus in Capital Cases (the "Powell Committee"), as set out in that Committee's report of August 23, 1989. Following the Committee's recommendations, a balanced approach would be adopted under which the defendant's right to appointment of counsel would be extended, but improved safeguards against dilatory tactics and repetitive litigation would also be enacted. The defendant would be afforded counsel meeting specified standards of competence from the commencement of trial proceedings until the conclusion of the litigation of an initial motion for collateral relief under 28 U.S.C. 2255. The defendant would, however, normally be limited to a single section 2255 motion, and the motion would have to be filed within a specified time period. Following the final rejection of such a motion by the courts, further litigation would be limited to extraordinary cases in which the defendant raises a claim that undermines confidence concerning his factual guilt of the offense for which the death penalty was imposed. The specific provisions are as follows:

*Section 3598*

*Subsection (a)* of proposed section 3598 would govern appointment of counsel in all federal capital cases. Paragraph (1) of subsection (a) would create a right to appointed counsel for indigent capital defendants, running from the commencement of trial proceedings until the conclusion of the litigation of an initial motion for collateral relief under 28 U.S.C. 2255, or the failure of the defendant to file or pursue a motion in a timely manner.

Paragraph (2) provides for appointment of counsel at trial in conformity with 18 U.S.C. 3005, an existing statute that entitles a federal capital defendant, or request, to two lawyers at trial. At least one lawyer so appointed would continue to represent the defendant in direct review proceedings, unless replaced by the court with other qualified counsel.

Paragraph (3) governs appointment of counsel for collateral proceedings. After the judgment has become final through the conclusion of direct review or a failure of the defendant to seek direct review in a timely manner, the government would so notify the sentencing court. The court would then proceed within 10 days to determine whether the defendant is eligible for appointment of counsel, and on the basis of that determination would issue an order appointing counsel, or denying appointment of counsel because the defendant was not indigent or refused appointment of counsel. Following the approach of the Powell Committee recommendations, counsel appointed for collateral proceedings would be different from the counsel who represented the defendant at earlier stages, absent a contrary request by the defendant and counsel. This would serve to provide a lawyer capable of taking a fresh and dispassionate look at the issues in the case, including possible errors by counsel in prior proceedings. *See* Powell Committee Report at 10, 12-13.

Paragraph (4) sets standards of competence for appointment of counsel under the section. The basic requirement would be five years' admission to the bar and three years of felony litigation experience in the federal courts. This standard is based on the appointment of counsel standard of the Anti-Drug Abuse Act death penalty provisions (21 U.S.C. 848(q)(5)-(6)). Also following the Anti-Drug Abuse Act provisions (21 U.S.C. 848(a)(7)), the court, for good cause, could appoint other counsel under the section whose background, knowledge, or experience qualified him to handle such cases, although he did not meet the specific experience requirements set out in the statute. Utilization of this authority in appropriate cases would help ensure that the class of qualified counsel available to defendants would not be unduly limited, and that delay would not occur in litigation because of the unavailability of qualified counsel to represent capital defendants. For example, it might be found that extensive criminal litigation experience in state cases, or completion of a training or certification program for capital litigation, would be an adequate substitute or partial substitute for these specific experience requirements.

Paragraph (5) provides that the provisions of the Criminal Justice Act (18 U.S.C. 3006A) would apply to appointments under subsection (a), except as otherwise provided in the subsection. Section 3006A sets general standards and procedures for appointment and reimbursement of counsel, including due allowance for waiving normal compensation limits in cases of unusual difficulty or complexity. The proviso in this paragraph to the applicability of the Criminal Justice Act—"[e]xcept as otherwise provided in this subsection"—recognizes that the standards of the subsection are in some important respects more favorable to defendants than the general section 3006A standards. For example, appointment of counsel for indigents in collateral proceedings is discretionary under section 3006A, but would be mandatory in an initial section 2255 motion under this subsection.

Paragraph (6) provides that the entitlement to counsel for collateral proceedings under subsection (a) would not create any novel right to attack capital sentences on grounds of alleged ineffectiveness of counsel at that stage. This is parallel to proposed 28 U.S.C. 2256(e) in the Powell Committee proposal. *See* Powell Committee Report at 10, 13.

*Subsection (b)* in proposed section 3598 relates to appointment of counsel in state cases. Appointment of counsel for indigents at trial and in an initial appeal is constitutionally required, but there is no constitutional requirement of appointment in other proceedings, such as collateral proceedings and applications for discretionary review. *See Murray* v. *Giarratano,* 109 S. Ct. 2765 (1989). Subsection (b) would make it clear that federal law does not create any additional appointment of counsel requirement

in state capital cases, beyond the constitutional requirement of appointment at trial and on the first appeal.

Subsection (b) also re-affirms the traditional rule that appointment of counsel in federal habeas corpus review of state capital cases is generally not mandatory, but discretionary with the court. In relation to review of state cases, federal habeas corpus is not a true collateral remedy that provides a means for raising claims that could not have been raised at earlier stages. Rather, it typically serves as a quasi-appellate mechanism that involves re-adjudication of the same claims that have already been fully litigated and repeatedly rejected in state proceedings. Appointment of counsel for this essentially repetitive type of review is properly conditioned on the court's determination that appointment will further the interests of justice.

*Section 3599*

Proposed 18 U.S.C. 3599 would be a new section governing collateral litigation—i.e., litigation of motions by federal defendants pursuant to 28 U.S.C. 2255—in capital cases.

*Subsection (a)* of proposed section 3599 would require that an initial section 2255 motion be filed within 90 days of the issuance of the order under proposed section 3598(a)(3) relating to appointment of counsel for collateral proceedings. The court, for good cause, could extend the time for filing for up to 60 days. A motion under the section would be given priority over all non-capital matters in the district court and the court of appeals.

Under the procedures proposed in this bill, federal defendants under sentence of death will always have legal representation for purposes of collateral (section 2255) litigation. Hence, the time allowed is properly limited to the time required for an experienced attorney to prepare and file a section 2255 motion. The 90 days time period proposed under subsection (a), subject to a possible 60 day extension if needed, is ample for that purpose.

*Subsection (b)* of proposed section 3599 provides essentially that execution is automatically stayed until the conclusion of litigation of an initial section 2255 motion, if such a motion is filed and pursued in conformity with the applicable time rules. This is parallel to the mandatory stay of execution provisions of the Powell Committee procedures for state cases. *See* Powell Committee Report at 13-14, 15-17.

*Subsection (c)* of proposed section 3599 governs further litigation following the conclusion of litigation of an initial section 2255 motion, or failure to pursue such a motion in a timely manner. Beyond this point, no court would have the authority to stay the execution or grant relief, except in an extraordinary case involving a claim based on facts which would undermine confidence in the defendant's guilt of the offense for which the death penalty was imposed, where the claim was not raised in earlier proceedings and the failure to raise the claim was the result of (a) governmental action in violation of federal law, (b) Supreme Court recognition of a new right that is retroactively applicable, or (c) based on a factural predicate that could not have been discovered in time for earlier proceedings through reasonable diligence. This is parallel to proposed 28 U.S.C. 2257(c) in the Powell Committee recommendations. *See* Powell Committee Report at 14-15, 17-18.

Subtitle B—Protection of Witnesses, Jurors, and Court Officers

Sec. 5201. Protection of court officers and jurors.

This section of the subtitle would establish more adequate penalties for obstruction of justice offenses against court officers and jurors by amending 18 U.S.C. 1503. Currently, 18 U.S.C. 1503 prohibits a range of conduct that tends to interfere with the administration of justice, including corrupting, threatening, injuring, or retaliating against "any grant or petit juror" and any "officer in or of any court of the United States." The maximum penalty for the offense defined by 18 U.S.C. 1503 is five years of imprisonment, regardless of the seriousness of the crime and the extent of resulting harm. Thus, for example, a criminal who engaged in a retaliatory murder of a juror who had voted to convict him would be exposed to no more than five years of imprisonment pursuant to this statute.

More adequate penalties appear in the statutes that define the comparable offenses of tampering with or retaliating against witnesses, victims, and informants, 18 U.S.C. 1512 (tampering) and 18 U.S.C. 1513 (retaliation). Under both of these statutes, conduct like that prohibited by 18 U.S.C. 1503 is punishable by up to ten years of imprisonment when directed against a witness. 18 U.S.C. 1512 further authorizes imprisonment for up to twenty years in the case of an attempted killing, and incorporates by reference the penalties for murder and manslaughter under 18 U.S.C. 1111 and 18 U.S.C. 1112 for cases where death results.

The proposed amendment would conform the penalties available under 18 U.S.C. 1503 to those available for obstruction of justice offenses against witnesses, thereby providing an adequate system of sanctions for comparable offenses against jurors, judges, and other judicial officers and officers serving in courts. The basic offense would be punishable by up to ten years of imprisonment, with up to twenty years of imprisonment in the case of an attempted killing, and punishment as provided in the murder and manslaughter statutes in cases where death results.

Sec. 5202. Prohibition of retaliatory killings of witnesses, victims, and informants.

This section would amend 18 U.S.C. 1513 to provide more adequate penalties for retaliatory killings and attempted killings of witnesses, victims, and informants. Currently, the companion statute, 18 U.S.C. 1512, prohibits efforts to obstruct justice by tampering or interfering with witnesses, victims, and informants, including killing, attempting to kill, and using physical force against such persons. Under section 1512, a killing is punishable by the penalties prescribed for murder and manslaughter in 18 U.S.C. 1111 and 1112—including death or life imprisonment in cases of first degree murder—while an attempted killing is punishable by up to twenty years in prison. The offense of using physical force, short of attempted murder, is punishable by a maximum of ten years' imprisonment.

18 U.S.C. 1513 makes it a ten-year felony to engage in violent retaliatory acts against the same classes of protected persons as section 1512. For no discernible reason, however, section 1513, unlike its counterpart section 1512, contains no specific prohibition or enhanced penalties for the aggravated offenses of killing or attempting to kill a witness, victim, or informant with the same retaliatory intent. The proposed amendments would close this gap by adding to section 1513 an offense of retaliatory killing or attempted killing of witnesses, victims, and informants, carrying the same penalties as the corresponding provision in 18 U.S.C. 1512(a).

TITLE VI—JUSTICE SYSTEM IMPROVEMENTS

Subtitle A—INS System Improvements

Sec. 6101. INS General Arrest Authority.

This provision would provide law enforcement authorities that will be available to agents and officers of the Immigration and Naturalization Service (INS). The authorities listed below will be available to the extent provided for by the Attorney General in implementing regulations.

(1)(A) INS officers carry firearms pursuant to an implied authority arising from their law enforcement function. This provision would make that authority explicit;

(B) INS officers currently have authority to execute warrants in immigration related cases only. This provision would allow INS officers to execute warrants in other cases as well;

(C) INS officers make over 1,000,000 arrests a year for immigration offenses. During the course of those arrests, they often encounter other violations of law, principally narcotics and customs violations. At present, INS officers can only effect a "citizen's arrest" under state law for these offenses. This provision would give INS officers general arrest authority for these offenses under Federal law; and

(D) This provision would allow the Attorney General to assign other law enforcement duties to INS officers, for example, assisting in joint narcotics interdiction task forces.

(2) This provision confirms that any additional authorities conferred upon INS officers do not affect the authorities of any other Federal law enforcement agency.

Sec. 6102. Definitionof Aggravated Felony.

This provision expands and clarifies the term "aggravated felony" as defined in the Immigration and Nationality Act, to include a broader spectrum of serious criminal activity. The need for this expansion of the term is to capture those egregious crimes of violence that are often concomitant with drug-related crimes. This definition serves as a predicate for summary exclusion and expeditious deportation provisions provided for in this legislative proposal (Sections 6104 and 6105).

Currently, the term "aggravated felony" encompasses "murder, any drug trafficking crime as defined in Section 924(c)(2) of title 18, United States Code, or any illicit trafficking in any firearms or destructive devices as defined in section 921 of such title, or any attempt or conspiracy to commit any such act, committed within the United States."

This provision would amend the definition to include crimes of physical force or threatened force against the person or property of another that are punishable by imprisonment of five years or more, which are so often associated with drug crimes. With respect to drug law violations, the provision extends the term beyond the current limitation to drug trafficking crimes as defined in section 924(c)(2) of title 18, to include feloney crimes involving a controlled substance.

The proposed definition additionally clarifies the definition of "aggravated felony" for purposes of the immigration laws to include violations of State and foreign law, as well as violations of federal law. The current definition was challenged in deporta-

tion proceedings as not encompassing violations of State statutes. *Matter of Barrett*, A37 213 802 (Baltimore), I.D. 3131 (BIA Mar. 2, 1990).

Sec. 6103. Additions to classes of aliens ineligible to receive visas and excluded from admission.

This provision amends the Immigration and Nationality Act by adding two classes of aliens who are ineligible to receive visas and who are not permitted to enter the United States. These classes are:

(1) any nonimmigrant alien seeking admission to the United States who is in illicit possession of a controlled substance; and

(2) and any alien who has committed an aggravated felony as defined in section 101(a)(43) of the Immigration and Nationality Act, as amended (Section 6102) of this legislative proposal).

These additional classes provide a predicate for summary exclusion and expeditious deportation provisions provided for in this legislative proposal (Sections 6104 and 6105).

Sec. 6104. Summary exclusion and deportation of criminal aliens.

The purpose of this amendment is to provide a swift and certain bar to admission to the United States, and to ensure the exclusion from entry, of aliens who:

(1) are nonimmigrant aliens in illicit possession of a controlled substance at the time of application for admission to the United States at a port of entry, and

(2) have committed an aggravated felony as defined in section 101(a)(43) of the Immigration and Nationality Act, as amended (Section 6102 of this legislative proposal).

This amendment mandates, for nonimmigrant aliens in illicit possession of a controlled substance and for aggravated felons, a summary exclusion process where the Attorney General or his designee, instead of an immigration judge and Board of Immigration Appeals, determine the excludability of such an alien. There would be no administrative review of the exclusion order. However, judicial review of the exclusion order is provided pursuant to Section 106 of the Immigration and Nationality Act, as amended.

The present exclusion statute and accompanying appellate processes are overly burdensome and do not add any significant procedural or substantive due process protection. Instead, the present exclusion system, by its multilayered structure, just adds to the time it takes to finally resolve a case.

In a recent General Accounting Office report entitled, "Immigration Control: Deporting and Excluding Aliens from the United States," October 1989, the GAO investigation found that exclusion cases appealed to the Board of Immigration Appeals, an appeal of right under the present exclusion process, generally took more than three years to resolve. These cases do not include those that were appealed to the District Court, also an appeal of right under the present exclusion system.

Sec. 6105. Expeditious deportation of aggravated alien felons.

The purpose of this amendment is to ensure swift and certain deportation from the United States of an alien convicted of an aggravated felony as defined in section 101(a)(43) of the Immigration and Nationality Act, as amended (Section 6101 of this legislative proposal).

This amendment subjects an alien convicted of an aggravated felony to an expedited deportation process where the Attorney General, or his designee, instead of an immigration judge and Board of Immigration Appeals, determine the deportability of an alien. There would be no administrative review of the deportation order. However, judicial review of the deportation order is provided pursuant to Section 106 of the Immigration and Nationality Act, as amended.

The hearing conducted by the Attorney General's designee will be on the record so that a "trial de novo" would not be necessary or permitted. The proposed amendment requires federal and State courts to provide to the Immigration and Naturalization Service information relating to the alienage of the individual and certified copies of conviction documents.

This provision would be applicable solely to convicted aggravated felons: those who have committed and been convicted of egregious crimes involving murder, drug law violatins, violationd of the weapons control laws, and seriouis crimies involving the use of force and violence.

The present deportation statute and accompanying appellate processes are overly burdensome and do not add any significant procedural or substantive due process protection. The present deportation system, by its multilayered structure, just adds to the time it takes to finally resolve the case.

In a recent General Accounting Office report entitled, "Immigration Control: Deporting and Excluding Aliens from the United States", October 1989 the GAO investigation found that 59 percent of deportation cases in New York and Los Angeles took more than one year to complete from the time of apprehension to the immigration judge's decision. When appealed to the Board of Immigration Appeals, about 81 percent took more than two years and 21 percent took more than five years to resolve. These cases do not include those that were appealed to the Circuit Courts of Appeals, which, under the present deportation system, is an appeal of right.

Note on Sections 6106 through 6112:

Sections 6106 through 6112 of this proposed legislation address sections of the Immigration and Nationality Act which provide various avenues of administrative relief from exclusion and deportation.

The provisions deny these avenues solely to an alien convicted of an aggravated felony. Currently each of these forms of relief are often used by the alien, often successfully, in an effort to have the exclusion or deportation order waived or set aside by the adjudicating official. These avenues should not be available to the individual convicted of the egregious crimes encompassed in the definition of the term "aggravated felony."

Sec. 6106. Ineligibility of aggravated felons for asylum.

This provision statutorily disqualifies an alien who has been convicted on an aggravated felony from political asylum under section 208 of the Immigration and Nationality Act, as amended. To extend the legislative grace of political asylum to an aggravated felon is inconsistent with the President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove these individuals from American society.

Pursuant to law, an alien convicted of an aggravated felony may file an application for political asylum, and have the application considered by an immigration judge in deportation hearings. The judge may grant or deny the request. However, even if the claim for asylum is patently frivolous, he is entitled to apply for it, and time and resources are expended in the adjudication of the claim.

The express purpose of this amendment is to statutorily deny this form of relief to a convicted aggravated felon, thus pretermitting the alien's application after a finding of deportability. This, in turn, would expedite the removal of the aggravated felon from the United States.

Sec. 6107. Elimination of judicial recommendation against deportation of criminal aliens.

This provision eliminates the ability of sentencing judges to recommend against the deportation of an alien convicted of an aggravated felony.

Pursuant to section 241(b) of the Immigration and Nationality Act, as amended, sentencing judges are authorized to recommend against the use of a conviction for moral turpitude in determining the deportability of an alien, even an alien convicted of an aggravated felony as defined in section 101(a)(43) of the Immigration and Nationality Act, as amended (Section 6102 of this legislative proposal).

These recommendations against deportation are, in practice, treated as binding on the immigration court and are inconsistent with the President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove convicted aggravated alien felons from American society.

The express purpose of this amendment is to statutorily deny this latitude and form of relief to sentencing judges in the case of a convicted felon, so that the law will ensure a swift, certain deportation, which the integrity of the system demands. This would expedite the removal of the aggravated felon from the United States.

Sec. 6108. Elimination of section 212(c) relief for aggravated felons.

This provision amends section 212(c) of the Immigration and Nationality Act to render an alien convicted of an aggravated felony ineligible for relief pursuant to this section of the law.

Section 212(c) provides relief from exclusion, and by court decision from deportation, to persons who have had an unrelinquished domicile in the United States for seven years and are excludable for all but certain subversive reasons. This discretionary relief is obtained by numerous excludable and deportable aliens, including aliens convicted of aggravated felonies, preventing the government from removing these individuals from American society.

The purpose of this amendment is to deny this form of relief from deportation to a convicted aggravated felon. This, in turn would expedite the removal of the aggravated felon from the United States. This relief is inconsistent with the President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove convicted aggravated alien felons from American society.

Sec. 6109. Elimination of suspension of deportation for criminal aliens in hardship cases.

This provision amends section 244(a) of the Immigration and Nationality Act to render an alien convicted of an aggravated felony ineligible for relief pursuant to this section of the law.

Section 244(a) suspends deportation to convicted aggravated felons who possess 10 years of physical presence in the United

States, and whose removal would cause hardship to family members in the United States.

The purpose of this amendment is to deny this form of discretionary relief from deportation to a convicted aggravated felon. This, in turn, would expedite the removal of the aggravated felon from the United States. This relief is inconsistent with the President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove convicted aggravated alien felons from American society.

Sec. 6110. Definition of good moral character to exclude aggravated felons.

This provision amends Section 101(f) of the Immigration and Nationality Act to bar convicted aggravated felons from establishing good moral character for purposes of the immigration laws.

Pursuant to current law, a convicted aggravated felon may establish "good moral character" for benefits under the immigration laws. This operates to permit such individuals to avail themselves of relief from deportation and other advantages. The lack of a bar to establishing good moral character by a convicted aggravated felon often renders ineffective efforts by the government to remove these felons from society.

Sec. 6111. Ineligibility of aggravated felons for hardship waivers.

This provision amends Section 212(h) of the Immigration and Nationality Act to bar convicted aggravated felons from the hardship waiver to exclusion and deportation provided for in that Section.

Section 212(h) of the Immigration and Nationality Act waives certain criminal grounds of exclusion for an alien who is the spouse, parent, or son or daughter of a United States citizen or lawful resident of the United States, if the exclusion would result in extreme hardship to the relative.

The purpose of this amendment is to deny this form of discretionary relief from exclusion and deportation to a convicted aggravated felon. This would expedite the removal of the aggravated felon from the United States. This relief is inconsistent with President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove convicted aggravated alien felons from American society.

Sec. 6112. Elimination of deportation relief for aliens who are aggravated felons.

These provisions amend sections 243(h), 245, and 249 of the Immigration and Nationality Act to bar aggravated felons from relief from deportation or other benefits provided for in these sections.

The amendment to section 243(h)(2) adds a convicted aggravated felon to the list of classes ineligible for relief from deportation based upon fear of persecution on account of race, religion, nationality, membership in a particular social group, or political opinion.

The amendment to section 245 prohibits a convicted aggravated felon from the benefit of adjustment of status in the United States from that of a nonimmigrant alien to that of an alien lawfully admitted for permanent residence.

The amendment to section 249 bars a convicted aggravated felon from recordation of admission for lawful residency, for an alien who entered the United States prior to July 1, 1924, or June 30, 1948.

These forms of relief are currently available to a convicted aggravated felon. These relief provisions are inconsistent with the President's National Drug Control Strategy and other anti-crime initiatives, and with the Congressional intent evidenced in recent legislation to remove convicted aggravated alien felons from American society.

Subtitle B—Amendments Concerning Records of Crimes Committed by Juveniles

Sec. 6201. Amendments Concerning Records of Crimes Committed by Juveniles.

The amendments in this section are part of the implementation of an element of the President's violent crime program, which calls on the states to "maintain records and report on all serious crimes committed by juveniles who frequently continue their criminal careers into adulthood, but often escape early identification as repeat offenders and recidivists because their juvenile records are not reported." White House Fact Sheet of May 15, 1989, at 6. The same point was endorsed by the Attorney General's Task Force on Violent Crime in 1981, Final Report at 82-83, which stated that states should be encouraged to make available criminal history information for juveniles convicted of serious crimes, and that such information should be entered into the FBI criminal records system.

Empirical data confirms that the unavailability of juvenile criminal records is in fact a serious concern in connection with violent and firearms offenses. For example, the Bureau of Justice Statistics has reported that 54 percent of armed robbers in state prisons in 1986 had previously been sentenced to probation or incarceration as a juvenile, and that 15 percent had a prior juvenile, but no adult, sentence. This problem would be alleviated by generally providing for the inclusion of juvenile records for serious crimes in the FBI records system, and by making corresponding changes in the rules for reporting offenses by juveniles who are federally prosecuted.

To implement this reform, the Justice Department proposes to amend 28 C.F.R. section 20.32, which generally defines the offenses that will be accepted in the FBI records system. Subsection (a) of the rule now states that information is to be included concerning "serious and/or significant offenses." Subsection (b) states that nonserious offenses are excluded, such as drunkenness, vagrancy, disturbing the peace, curfew violations, loitering, false fire alarm, nonspecific charges of suspicion or investigation, and traffic infractions. However, the second sentence of subsection (b) states a blanket exclusion of offenses committed by juveniles, unless the juvenile was tried as an adult. The proposed amendment would delete this sentence, and would make a conforming change in subsection (a), to make it clear that both adult and juvenile offenses, if serious, are to be included in the system. This would permit the FBI to receive and retain records relating to serious offenses of state juvenile offenders.

The statutory amendments in this section propose complementary changes in the provisions regarding the records of federally prosecuted juveniles. The first amendment would change 18 U.S.C. 5038, which generally governs the permissible uses of juvenile records and the circumstances in which they are to be retained. The basic change from current law is that records would routinely be retained and made available where a juvenile is convicted of a serious violent crime or drug crime that supports the exercise of federal jurisdiction pursuant to clause (3) of the first paragraph of 18 U.S.C. 5032. In contrast, the current statute limits the retention and availability of such records through the FBI records system to cases involving a second conviction of the juvenile. The amendment accordingly rejects the view of the current law that a juvenile offender is entitled to "one free bite," even if the initial "bite" is a serious violent crime or drug crime, before information is preserved concerning his offenses for later law enforcement and judicial use.

The amendment also adds a subsection to 18 U.S.C. 5038 authorizing reporting, retention, disclosure and availability of juvenile records pursuant to the law of the state in which a federal juvenile proceeding takes place, if the state law is more permissive as to such matters than the general standards of section 5038. This would generally ensure that federal law will not accord less weight than the law of the state in which the offense occurred to the public's interest in security against crime, and would also eliminate the possibility that a federal prosecutor might be inhibited from exercising federal jurisdiction in a case appropriate for federal prosecution because state law provides more effectively for retention and availability of records concerning the offender.

The second amendment repeals a statute, 18 U.S.C. 3607, that authorizes prejudgment probation for certain drug offenders, and requires expungement of records for such an offender if he was under the age of 21 at the time of the offense. This amendment is also in furtherance of the proposal's general objective of ensuring retention of accurate and complete criminal records, regardless of the age of the offender.

In its specific provisions, 18 U.S.C. 3607 now authorizes prejudgment probation for an offense under 21 U.S.C. 844 for offenders without prior drug crime convictions; 21 U.S.C. 844 generally defines the offense of unlawful possession of controlled substances, punishable by up to a year of imprisonment. If a defendant is accorded the special probationary treatment authorized by the statute, only a nonpublic record is retained of the disposition, and that record can only be used for the purpose of determining in a later proceeding whether the defendant is a first time offender for purposes of section 3607. The effect of the mandatory expungement for offenders under 21 is that all references relating to the arrest, proceedings, and disposition are removed from normal official records. Section 3607 further provides that the expungement order has the effect of restoring the defendant in contemplation of law to the status he occupied before his arrest or prosecution, and that the defendant is not subject to liability for subsequently failing to recite or acknowledge the occurrence of the arrest or prosecution in any context.

This provision implicitly presupposes that drug possession offenses under 21 U.S.C. 844 may properly have less serious consequences for the offender than other offenses carrying comparable penalties, or that knowledge of such offenses is somehow of less importance for the criminal justice system than knowledge of other prior crimes. However, the statute's implicit policy of leniency toward drug offenders through concealment of records is contrary to the concept of user accountability for such offenders, and gives short shrift to the enormous human and social costs of drug abuse. Moreover, in light of the uniquely potent role of drug abuse as a contributing factor in other criminality, knowledge of a defendant's complete record of drug offenses is at least as important as knowledge of other types of crime for law

enforcement, judicial, and correctional purposes.

Section 3607's expungement requirement for offenders under 21 compounds its costs without any offsetting justification. If the offender is a juvenile, he would enjoy in any event the benefits of the special protection of 18 U.S.C. 5038 relating to juvenile records, on the same basis as other juvenile offenders. Conversely, if the offender is an adult, he should be treated in the same way as adults who commit other types of crimes. Neither considerations relating to the offender's interests nor considerations relating to society's interests provide a valid basis for according a specially favored status to defendants who commit offenses covered by section 3607, or justify a special policy of concealment for the records of such offenses. The statute, as proposed in the second amendment, should simply be repealed.

Subtitle C—Narcotics-Related Public Corruption

Sec. 6301. Narcotics-Related Public Corruption.

This subtitle would establish more stringent penalties for drug-related bribery. The section would amend section 18 U.S.C. by inserting a new section 220 that specifically deals with narcotics-related public corruption. Under the proposed section, such corruption would be classified as a class B felony, punishable by up to 25 years of imprisonment.

Subtitle D—Other System Improvements

Sec. 6401. Alternative methods of incarceration.

This section makes explicit the desirability and appropriateness of using Bureau of Justice Assistance Drug Grant funds for innovative intermediate sanctions.

Sec. 6402. Close loophole for illegal importation of small drug quantities.

This proposal would amend section 497 of the Tariff Act of 1930, 19 U.S.C. 1497, to eliminate a loophole whereby in certain situations involving failure to declare illegal importation of small quantities of drugs, the violator is subject to a very minor penalty.

19 U.S.C. 1497 currently provides a civil penalty equal to 1,000 percent of the value of the undeclared substances. If the amount of the drugs, however, is small (e.g., a "roach" or a few pills), the resulting penalties range from $14 to $35. This statutory change would provide for a minimum penalty of $500, enhancing the deterrent effect of the statute.

Sec. 6403. Enhancement of penalties for drug trafficking in Federal prisons.

This proposal is designed to increase the penalties for drug possession and trafficking inside Federal prisons, jails, and detention facilities, as well as for smuggling or attempts to smuggle controlled substances into such institutions. The providing or possession of controlled substances in Federal prisons clearly represents a major threat to prison safety and discipline, promotes disrespect for law, and undermines the prospect for successful rehabilitation of prison inmates. Accordingly, such offenses implicate harms to society separate from and in addition to those associated with drug violations generally, and are deserving of separate and cumulative punishment.

Unfortunately, the existing statute proscribing the providing or possession of contraband in Federal prison, 18 U.S.C. 1791, fails adequately to punish these offenses. For example, section 1791 contains no requirement that the sentence for an offense under it be served consecutively to a sentence imposed for the underlying drug offense. Thus, a person convicted today under 21 U.S.C. 841 for drug trafficking by smuggling crack cocaine to a prison inmate, and under 18 U.S.C. 1791 for an offense involving that same substance, might well receive concurrent sentences reflecting no incremental punishment for the separate serious harm to the prison institution. By contrast, under the proposed amendment, any sentence imposed under 18 U.S.C. 1791 for a violation involving a controlled substance would have to run consecutively to a sentence imposed by any other court (including a State court) for an offense involving that same controlled substance.

Moreover, the maximum penalties provided in section 1791 for controlled substances with a serious potential for abuse (i.e., those in schedules I, II, and III), with only a few exceptions, are far too low. Section 1791 provides an adequate maximum of twenty years' imprisonment only for narcotic drugs (defines to include opiates and cocaine), LSD, and PCP. All other offenses involving the distribution, smuggling, or possession of controlled substances are misdemeanors that carry a maximum prison term of one year. This penalty scheme fails to reflect the seriousness of many types of controlled substances, particularly in a prison context.

Under the proposed amendment, the penalties for offenses involving controlled substances under section 1791 would generally be graduated according to the seriousness of the drug by virtue of its placement in one of the controlled substance schedules set forth in 21 U.S.C. 812. Initially, the list of most serious substances that carry a maximum twenty-year punishment would be augmented by the addition of methanamphetamine (including the variant "ice").

Congress recently amended the Controlled Substances Act (21 U.S.C. 814(b)) to add methanamphetamine to such other highly dangerous drugs as heroin, cocaine, LSD, and PCP as appropriate for minimum mandatory penalties. This proposed amendment would similarly acknowledge the dangers posed by methanamphetamine by adding it to the list of those substances carry the highest penalties under section 1791.

Next, the amendment would add other controlled substances in schedules I and II (except marijuana) to the present category of objects whose unlawful provision or possession in prison carry a ten-year maximum term; and would create a five-year maximum penalty for distributing, smuggling, or possessing schedule III controlled substances or marijuana. Marijuana, although a schedule I substance, carries only a maximum of five years' imprisonment under the Controlled Substance Act for quantities less than 50 kilograms (21 U.S.C. 841(b)(1)(D)), and it is not deemed likely that an offense involving marijuana smuggling or possession in a Federal prison would exceed that magnitude. Offenses involving schedule IV and V controlled substances would remain as one-year misdemeanors.

Finally, the amendment corrects a technical error in subsection (b), where the references should be to subsection (d) instead of (c).

Sec. 6404. Authorization of funding for Treasury undercover operations.

The provisions in this section authorize the use of appropriated funds for the conduct of undercover investigative operations. In addition, if certain approval procedures are followed, the proposed section continues to exempt such operations from federal acquisition, appropriations, property management, and government corporation laws which would otherwise be applicable to a federal agency. These exemptions may be used if complying with those federal laws would risk compromise of the undercover nature of the investigation.

TITLE VII—AMENDMENTS RELATED TO ASSET FORFEITURE AND MONEY LAUNDERING

Subtitle A—Special Forfeiture Fund

Sec. 7101. Special forfeiture fund amendment.

This section of the Bill amends provisions of the Anti-Drug Abuse Act of 1988 to make funds available to the Special Forfeiture Fund earlier than currently authorized. Current law authorizes transfers of amounts from the Department of Justice (DOJ) Assets Forfeiture Fund to the Special Forfeiture Fund at the end of fiscal years 1990, 1991, and 1992.

This section allows transfers to begin in the first quarter of FY 1990. It also extends the authorization of transfers from the DOJ Assets Forfeiture Fund through FY 1992, and makes a similar modification to the Special Forfeiture Fund to conform both sections with the sunset provision affecting the Office of National Drug Control Policy.

Subtitle B—Forfeiture Amendments

Sec. 7201. Conforming of older innocent owner provisions with those enacted in the Anti-Drug Abuse Act of 1988.

Sections 6075 and 6076 of the Anti-Drug Abuse Act of 1988 provided that in the case of a conveyance subject to forfeiture because of its involvement in a drug-related offense, forfeiture would be barred if the owner of the conveyance established that he or she had no knowledge of the offense, did not consent to the offense, and was not willfully blind to the offense.

The 1988 amendments were derived from earlier innocent owner statutes in 21 U.S.C. 881(a) (6) and (7) (relating to other personal and real property involved in drug crimes) and 18 U.S.C. 981(a)(2) (relating to property involved in money laundering). However, neither of these earlier statutes requires the owner or lienholder to prove the absence of willful blindness, and the section 981 provision does not require the owner to prove lack of consent. The proposed amendments would bring these older statutes into conformity with the innocent owner provisions enacted in 1988.

It is intended that, in order to establish the innocent owner exemption, the property owner must establish all three circumstances—i.e., that the owner lacked knowledge, consent, and willful blindness as to the offense giving rise to forfeiture. See *United States* v. *Parcel of Real Property Known as 6109 Grub Road*, 886 F. 2d 618 (3d Cir. 1989) (holding, contrary to the weight of authority, that by using the word "or" in 21 U.S.C. 881(a)(7) Congress intended to give the owner the choice of proving either lack of knowledge *or* lack of consent. The addition of the "willful blindness" wrong underscores the incorrectness of this holding, since it makes no sense that an owner could prevail by showing a lack of willful blindness to the offense even though the owner had knowledge of the offense and consented to it.

Sec. 7202. Addition of conforming criminal forfeiture provision for cases involving CMIR violations.

Section 6463(c) of the Anti-Drug Abuse Act of 1988 amended 18 U.S.C. 982 to require the forfeiture in a criminal case of any

property involved in certain anti-money laundering statutes, including the statute requiring the filing of currency transaction reports (CTRs) and the anti-structuring statute, both found in title 31. However, apparently inadvertently, the 1988 amendment failed to include criminal violations of the statute (31 U.S.C. 5316) requiring the filing of monetary instrument reports (CMIRs) with the Customs Service whenever more than $10,000 is imported into or exported from the United States. Such violations are already subject to civil forfeiture, 31 U.S.C. 5317, and should be subject to the same criminal forfeiture sanctions as are the CTR and anti-structuring offenses.

Sec. 7203. Clarifying grammatical changes in definition of "financial transaction" for the money laundering statute.

This amendment is entirely technical in nature. It is intended merely to add grammatical clarity to the definition of "financial transaction" in the money laundering statute. The clarification is consistent with the legislative history which explains that, for the purposes of this statute, a financial transaction need not involve a financial institution. See S. Rep. 99-44, 99th Cong., 2nd Sess. (1986), at p. 13.

Sec. 7204. Limitation of exception to money laundering forfeitures.

In 1988, the statute permitting forfeiture of property in criminal money laundering cases, 18 U.S.C. 982(b), was amended to authorize the forfeiture of substitute assets. Under the amendment, whenever property involved in money laundering violations cannot be located, has been placed outside the jurisdiction of the court, has been diminished in value, or otherwise is not available for forfeiture because of some action of the defendant, the government is entitled to the forfeiture of substitute property of equal value.

This provision is identical to the substitute assets provision in 21 U.S.C. 853(p) which applies to forfeitures in criminal narcotics cases with one important difference. Section 982(b)(2) provides that the substitute assets provision may not be used where the convicted money launderer was merely an "intermediary" who handled the money "only temporarily" in the course of the money laundering offense. This exception was seen as necessary to prevent an "unduly harsh" result where a person was a mere conduit for a financial transaction between other principals. See Congressional Record, daily ed., November 10, 1988, at S17365. The exception, however, should be narrowed to reflect its true intent, which was to protect the low-level or occasional participant in a money laundering offense, such as a "smurf" who carries his employer's money to a bank but retains none of it for himself, from forfeiture of money over which he never exercised exclusive control. It was not intended to preclude forfeiture of substitute assets from a professional money launderer who moves hundreds of thousands of dollars through various businesses and accounts on behalf of other criminals engaged in drug trafficking or other specified unlawful activity.

The amendment would qualify the 1988 exception by providing that substitute assets will be forfeited even by an intermediary who does not retain the laundered property if that person participates in three or more transactions involving $100,000 or more in a twelve-month period. Such a person is clearly a professional money launderer who is not deserving of the forfeiture exemption.

Sec. 7205. Seizure of vehicles with concealed compartments.

This proposal would amend the seizure and forfeiture provisions of the Anti-Smuggling Act of 1935, 19 U.S.C. 1703, to subject trucks and private automobiles to seizure if there is a concealed compartment, whether or not there is contraband or narcotics residue.

Under current law, vessels and aircraft having a hidden compartment can be seized and forfeited under 19 U.S.C. 1590 and 1703. These provisions, however, do not permit the seizure and forfeiture of automobiles, trucks, or other vehicles that are similarly equipped with hidden compartments designed to smuggle contraband. This provision would cover compartments that are specifically built of fitted for smuggling; it would not reach other compartments (e.g., glove boxes or car trunks) that are part of the normal vehicle configuration.

Subtitle C—Money Laundering Amendments

Sec. 7301. Continuation of $10,000 cash transaction reporting requirement.

This would permit federal law enforcement agencies to continue to receive information reported to the Internal Revenue Service by persons in a trade or business where these persons receive more than $10,000 in cash in a transaction. This reporting requirement applies to those transactions not subject to the title 31 reporting rules, such as the sales of automobiles, boats, and so forth. This information supplements the Currency Transaction Reports being utilized to identify and prosecute persons laundering funds obtained from the sale of drugs and other criminal activity.

Sec. 7302. FINCEN transfer amendment.

This proposal would permit agencies to transfer to FINCEN and other agencies customer account information subject to the Right to Financial Privacy Act, 12 U.S.C. 3401 et seq., without having to provide notice of such transfer.

With limited exceptions, and agency transferring customer account information to another agency is required to provide the customer notice of, and the reasons for, such transfer.

Sec. 7303. Geographic targeting disclosure penalties.

Current law (31 U.S.C. 5326) permits the Secretary of the Treasury to impose lower currency reporting limits in certain geographic areas for limited periods of time. The Secretary may order financial institutions to report any or all domestic currency transactions at a specified level for a specified time period. The Secretary, however, may only request that the financial institutions not disclose the existence of the order to customers; the purpose of the order is defeated by disclosure.

In order for geographic targeting orders to be effective, it is imperative that customers of the financial institutions subject to an order not know of the existence or terms of special reporting requirements. If they know, they will quickly move their activities outside for targeting area or below the reporting amount and frustrate the purpose of the order.

Therefore, this proposal would amend 31 U.S.C. 5326 to permit the Department of the Treasury to prohibit the disclosure of the existence of a geographic targeting order and penalize financial institutions for such disclosures.

Sec. 7304. Suspicious transaction reporting.

This proposal would amend the Right to Financial Privacy Act, 12 U.S.C. 3403, to provide that a financial institution that ceases to do business with a customer because of suspicious transactions is not subject to liability under other statutes, including the Fair Credit Reporting Act.

Exempting financial institutions from liability for refusing to conduct business on the basis of a possible violation of currency reporting requirements would encourage and facilitate cooperation by financial institutions with Federal law enforcement efforts.

Since the inception of the Right to Financial Privacy Act, pursuant to an exception in section 1103(a) (12 U.S.C. 3404(c), financial institutions have been able to report, in good faith, possible violations of law or regulation to federal authorities without notice to the suspected customer and free from civil liability under the RFPA. This provision was further clarified by the Anti-Drug Abuse Act of 1986 and 1988, to specify what information a financial institution could give regarding the customer and suspicious activity and that the protection pre-empted any state law requiring notice to the customer. These changes were added to insure that financial institutions would in no way be inhibited from reporting suspected violations, especially money laundering and Bank Secrecy Act reporting violations.

Nevertheless, financial institutions have advised that there is another concern that in some instances complicate their treatment of suspicious transactions. They fear that if they sever relations with a customer, they risk liability under the Fair Credit Reporting Act, 15 U.S.C. 1691, et seq., or for breach of contract. See *Ricci v. Key Bancshares of Maine*, 768 F.2d 456 (1st Cir. 1985). However, if they continue relations with the customers, they fear that they may be implicated in any illegal activity. In many cases, after a suspicion has been reported, Federal authorities will encourage financial institutions to continue dealing with a suspicious customer so his activities may be monitored. Financial institutions should be free to sever relations with the customer based on their suspicions or on information about a customer received from law enforcement.

Section (a) addresses this concern by extending the protection of section 1103(c) to bank that sever relations with a customer because of activities underlying a suspicious transaction report.

Sec. 7305. Bank Secrecy Act customer violations.

Section 8118 adds new subsection 1113(p) to provide that the RFPA would not apply to a financial institution providing information that it has reason to believe may be relevant to a Bank Secrecy Act violation. This is not a change in current law with respect to supervisory agencies' disclosure to Treasury of records relevant to violations of the Bank Secrecy Act. Pursuant to section 1101(6)(H) of the RFPA, Treasury is a supervisory agency for purposes of Bank Secrecy Act enforcement. Section 1113(b) sets forth that "[n]othing in this chapter [RFPA] prohibits . . . disclosure to any supervisory agency of financial records or information in the exercise of supervisory, regulatory or monetary functions with the respect to a financial institution." Under delegations from Treasury, bank supervisory agencies routinely examine institutions and report to Treasury possible Bank Secrecy Act violations by financial institutions without customer notice. Financial institutions also disclose information and records

about their own past noncompliance to Treasury, without reference to the RFPA.

Nevertheless, the amendment would make an improvement to Bank Secrecy Act enforcement. The law is not clear and an amendment to the RFPA is needed with respect to the situation in which a financial institution wishes to report possible Bank Secrecy Act violations by a customer, i.e., in situations where the bank suspects that a customer has violated 21 U.S.C. s 5224, the anti-structuring provision. If the bank is not implicated in the possible violation, disclosure to Treasury arguably would not be within the exercise of Treasury's "supervisory functions . . . with respect to a financial institution." In that case, banks only would be able to give Treasury the limited suspicious transaction information allowed by section 1103(c) of the RFPA.

The provisions set forth in section 4(d) would authorize full disclosure of information within the possession of the financial institution which the institution has reason to believe is relevant to Bank Secrecy Act violations. The phrase "reason to believe" means reasonable suspicion, and does not equate to probable cause. New paragraph would allow the financial institution to furnish information beyond the identifying data now authorized by section 1103(c), including copies of relevant documents. Disclosure would be made without any notice to the customer otherwise required by the RFPA.

Section (d) provides that a financial institution that discloses information and records relating to a customer violation of the Bank Secrecy Act under proposed 1113(p) in good faith, also would be protected from civil liability under state law. This is comparable to the protection for financial institutions that make reports of suspicious transactions in accordance with section 1103(c).

Sec. 7306. Search of outbound mail.

In Section 1355 of the Anti-Drug Abuse Act of 1986, Pub. L. 99-570 (Oct. 27, 1986), Congress specified that the warrantless border search authority of the Customs Service applied to searches of "any vehicle, vessel, aircraft, or . . . any envelope or other container . . . entering or departing from the U.S." for purposes of ensuring compliance with the international reporting requirement of 31 U.S.C. 5316. However, the inclusion of outgoing letters or parcels in the U.S. mail is unclear in light of 39 U.S.C. 3623(d), a statute that otherwise prohibits warrantless searches of letter class mail. To clarify this point, section 7306 adds the words "including mail transmitted by the U.S. Postal Service" to section 5317(b).

This proposal would clarify the search authority of 31 U.S.C. 5317(b) to provide generally that outbound mail may be searched for currency and monetary instruments. Letters sealed against inspection could only be searched on the basis of reasonable suspicion. Clarification of the search authority of the U.S. Customs Service would enhance detection of illegal transfers of currency and monetary instruments.

TITLE VIII—MISCELLANEOUS AND TECHNICAL AMENDMENTS

Sec. 8101. Technical amendments to money laundering offenses.

The amendments in part (a) that add the terms "transmission" and "transfer" are conforming in nature. Section 6471(b) of the Anti-Drug Abuse Act of 1988 added the verbs "transmits" and "transfers" to 18 U.S.C. 1956(a)(2) following the verb "transports", but failed to make conforming amendments to places later on in that provision, and in subsection (b), where the noun "transportation" appears. The amendment in part (b) eliminates superfluous language. The term "represented" is defined later in the same provision as meaning a representation "by a law enforcement officer". The amendment in part (c) would clarify an apparent drafting oversight. As enacted, the criminal penalty for violations of section 6050I is punishable by imprisonment for not more than five years. However, the penalty is a misdemeanor even though punishable by imprisonment of up to five years. In addition to being inconsistent with other criminal provisions, it is a lesser sanction since persons convicted of a felony may lose certain rights under State law that are not forfeited if the conviction is classified as a misdemeanor.

Sec. 8102. Clarification of applicability of 18 U.S.C. 1952 to all mailings in furtherance of unlawful activity.

18 U.S.C. 1952, enacted in 1961, punishes whoever travels in interstate or foreign commerce, or "uses any facility in interstate or foreign commerce, including the mails," with intent to promote any "unlawful activity", a term defined to encompass several offenses characteristic of organized crime enterprises, such as bribery, extortion, money laundering, narcotics, and prostitution. The language and history of the statute are, unfortunately, less than clear as to whether the phrase "including the mails" requires that there be an interstate mailing for federal jurisdiction, or whether any mailing suffices. Until 1989 the only appellate court interpretation supported the Department of Justice's understanding that any use of the mails was covered. *United States* v. *Riccardelli,* 794 F.2d 829 (2d Cir. 1986). However, very recently another court of appeals has now created confusion by holding that section 1952 reaches only those uses of the mails that are interstate (or foreign) in nature. *United States* v. *Barry,* 888 F.2d 1042 (6th Cir. 1989).

Although section 1952 is not often employed in situations involving intrastate mailings, making Supreme Court review unlikely, such use of the statute has been of some significance in reaching vote buying schemes in Kentucky (a state directly affected by the *Barry* decision) in which absentee ballots are mailed from one part of the state to election officials elsewhere in the state. Both on policy grounds, in order to allow continued prosecution of these cases, and because it is believed that the *Barry* ruling represents a misconstruction of section 1952, the proposed amendment would clarify the statute to include any use of the mail in furtherance of a proscribed "unlawful activity".

Sec. 8103. Addition of drug conspiracy and attempt offenses committed by juveniles as warranting adult prosecution.

This amendment would add certain "crack" cocaine and drug conspiracy and attempt offenses committed by juveniles to the list of crimes set forth in 18 U.S.C. 5032 authorizing prosecution as an adult if the Attorney General certifies that there is a "substantial federal interest in the case" that justifies adult prosecution. Currently, substantive drug offenses in 21 U.S.C. 841 (and other statutes) are predicates for such action, but attempts and conspiracies to commit such offenses are not. As some United States Attorneys have noted, this is an anomaly that should be corrected. Unfortunately, many juveniles today are members of gangs of conspirators involved in drug trafficking, and their roles may range from relatively fringe activities to leadership of the conspiracy itself. When the offense is sufficiently serious, prosecutors should have the option of proceeding against a juvenile drug conspirator as an adult, just as they now have that option with respect to a substantive drug crime; and the same holds true for attempts. Likewise, in view of the seriousness of such offenses, it is appropriate to add to the list of predicate offenses authorizing adult prosecution those involving possession of a mixture or substance containing in excess of five grams of cocaine or "crack". (See 21 U.S.C. 844.)

Sec. 8104. Grand jury access to certain records.

This proposed amendment to the cable television subscriber law would bring that statute into conformity with all other customer privacy provisions, by recognizing an exception for information sought pursuant to a federal grand jury subpoena or a court order relating to a federal grand jury proceeding. See, e.g., 12 U.S.C. 3413(i), creating a similar exception to the Right to Financial Privacy Act of 1978; and 15 U.S.C. 1618(b), containing a grand jury exception to the restrictive disclosure provisions of the Fair Credit Reporting Act. Because the grand jury is the constitutionally prescribed sole means of bringing felony charges in the federal justice system, it is a basic and vital principle that a federal grand jury subpoena should be able to reach any type of record, subject only to a valid claim of privilege on the part of the record custodian. In this regard, the provisions of 47 U.S.C. 551 are anomalous and troublesome, for they prohibit the disclosure of cable television subscriber information to any governmental entity, including even a federal grand jury, save through a court order and an adversary proceeding at which the subscriber must be notified and have an opportunity to participate. This unique requirement, which is exceessive in the grand jury context, may sometimes thwart an important investigation. Recently, for example, a murder investigation in New York was hindered when investigators sought to pursue their sole lead as to the whereabouts of the suspected killer by issuing a federal grand jury subpoena to the cable television service to which the suspect had just subscribed. The service was unable to comply with the subpoena because of the provisions of 47 U.S.C. 551. The proposed amendment would establish a limited grand jury exception, modeled on 12 U.S.C. 3413(i), to remedy this problem.

Sec. 8105. Addition of conforming predicates to money laundering statute.

This proposed amendment would add certain predicate offenses relating to financial institutions to the money laundering statute, 18 U.S.C. 1956. Recently, in the Financial Institutions Reform, Recovery and Endorcement Act of 1989 (FIRREA), Congress amended, increased the penalties for, and provided for forfeiture relating to 18 U.S.C. 1005, 1006, 1007, and 1014. given the seriousness of these offenses and their association with others already included in the money laundering statute, it makes sense to add these same offenses to the definition of "specified unlawful activity" in section 1956(c)(7)(D). The amendment would also delete the specific reference to 18 U.S.C. 1344, the general bank fraud statute, since that reference was made redundant through the addition of section 1344 by FIRREA to the RICO law, 18 U.S.C. 1961, whose predicates are incorporated into section 1956.

Sec. 8106. Arrest of fugitive about to enter United States.

Section 7087 of the Anti-Drug Abuse Act of 1988 amended 18 U.S.C. 3184 to permit an arrest warrant to be issued by the federal district court in Washington, D.C., for a foreign fugitive whose whereabouts within the United States are not known. Issuance of an arrest warrant aids in apprehending such fugitives since it enables the information to be entered into various communications systems which may be readily accessed by law enforcement authorities across the country.

The proposed amendment, requested by Interpol, would logically expand the 1988 amendment to include a situation in which a foreign fugitive was believed to be about to enter the United States, a fairly common circumstance. Under the amendment, authorities would be permitted to obtain an arrest warant for such a fugitive, thereby enhancing the likelihood that the fugitive could be arrested at the point of entry into this country.

Sec. 8107. Elimination of superfluous language.

18 U.S.C. 510(b) punishes the receipt, exchang, delivery, or concealment of a Treasury check or bond or security of the United States, knowing the same to be stolen or to bear a falsely made or forged endorsement; the offense also contains a unique further element that the check, bond, or security "in fact" be stolen or falsely made or carry a forged endorsement. This latter element, no explanation of which appears in the legislative history of the provision, adds nothing to the offense in terms of culpability and is problematic.

Other, more frequently utilized federal offenses that proscribe similar conduct of receiving or trafficking in property know to have been stolen, e.g., 18 U.S.C. 641, 659, 2313, 2314, 2315, contain no requirement that the property "in fact" be stolen. While in most prosecutions under these statutes the property will indeed be of the prohibited character, the effect of the "in fact" clause in section 510(b) is to prevent the use of appropriate "sting"-type investigative techniques that would be authorized by identical provisions in S. 1971 and 1972 and H.R. 3760 in which the defendant "knows" the securities are stolen because an undercover agent has represented to the defendant that the securities are of this character when in fact they were provided by law enforcement authorities. Since there is no reason to bar "sting" investigations with respect to 18 U.S.C. 510 or to treat persons who traffick in stolen or falsely made United States securities any differently from traffickers in other types of stolen or counterfeit goods, the "in fact" language in section 510(b) should be deleted.

Sec. 8108. Correction to reference to nonexistent agencies.

This proposes amendments that are purely technical. The Department of Health, Education, and Welfare was divided into the Department of Education and the Department of Health and Human Servies in 1979. See P.L. 96-88. The Federal Savings and Loan Insurance Corporation was abolished by section 401 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, see P.L. 101-73, and its functions assumed by the Fededral Deposit Insurance Corporation; the latter is already mentioned in 18 U.S.C. 1114.

Sec. 8109. Disclosure of grand jury information for use in civil forfeiture.

Section 964 of the Financial Institutions Recovery, Reform and Enforcement Act of 1989 (FIRREA) enacted a provision (18 U.S.C. 3322) that allows a federal prosecutor to disclose grand jury information to another attorney in the Department of Justice for use in connection with civil forfeiture proceedings involving criminal violations directed at federally insured financial institutions. Under the amendment proposed here, this concept would be expanded to permit such sharing of information among Department of Justice attorneys for the purpose of enforcing civil forfeitures under any law of the United States.

Civil forfeiture statutes exist, and are an important enforcement tool, in such areas as controlled substance and RICO violations, and pornography and gambling offenses, among others. Access to grand jury information that is in the possession of another Department of Justice attorney may often be critical to the success of civil forfeiture efforts. Moreover, there is no reason to limit the scope of the provision enacted in FIRREA to civil forfeitures involving bank law violations. Accordingly, the amendment would extend the principle of section 3322 to any other civil forfeiture provision. It should be noted that disclosure is only permitted to another Department of Justice attorney, thus minimizing the risk of improper use.

Sec. 8110. Use of a search warrant to obtain contents of a stored wire communication.

This section is designed to clarify the procedure by which, under the Electronic Communications Privacy Act (ECPA), the government may require a provider of electronic communication service to disclose the contents of a stored wire communication. Under 18 U.S.C. 2703(a), the government is authorized to use a search warrant to obtain the contents of a stored electronic communication that is in storage for one hundred and eighty days or less (and a warrant, subpoena, or court order for such contents that have been stored for more than one hundred and eights days). It is not apparent, however, by what means the government may obtain access to the contents of a stored *wire* communication, for example a message left with a telephone answering service. A case can be made that a Title III warrant (under 18 U.S.C. 2510 et. seq.), such as must be used to intercept the communication in the course of transmittal, is required, particularly since the definition of "wire communication" in 18 U.S.C. 2510(1) "includes any electronic storage of such communication". On the other hand, access to a stored wire communication may not fit the definition or concept of an "interception" (see 18 U.S.C. 2510(4)), and if this view is taken it would seem appropriate to treat access to the contents of a stored wire communication in the same manner as ECPA treats access to the contents of a stored electronic communication under section 2703(a).

This section adopts the latter approach for stored wire communications and accordingly amends section 2703(a) to bring the contents of stored wire communications expressly within the ambit of that section. Thus, rather than the "super" type of search warrant application required by Title III for "intercepted" communication contents (requiring, in addition to a showing of probable cause, a showing that other methods to get the information have been unsuccessful, high level approval for the warrant application, etc.), an ordinary search warrant based on probable cause, location, and particularly would suffice to get the contents of a wire communication that has come to rest in electronic storage. The reasons for the additional protection mandated by Title III for *intercepting* a wire communication are simply not present, and thus excessive, when applied to stored wire communications. The latter situation is analogous to that in which a letter is sent and delivered to the addressee and the government seeks access to its contents, a classic case for the use of a search warrant based upon probable cause under Rule 41, F.R.Crim.P.

Sec. 8111. Authority for State government personnel to assist in conducting court-authorized interceptions.

This section would amend 18 U.S.C. 2518(5), as added by ECPA, to make clear that State and local government personnel, if acting under federal supervision, may conduct an interception. Under the 1986 ECPA amendment, federal government personnel may be used to conduct an interception if acting under the supervision of an investigative or law enforcement officer authorized to conduct the interception. The amendment was added at the request of the Justice Department in order to facilitate the use of support personnel in monitoring wiretaps. Prior to 1986, Title III required the use of full fledged investigators, such as F.B.I. agents, to perform this time-consuming task, a requirement unrelated to privacy interests and one that needlessly wasted scarce investigative resources. Thus, the 1986 ECPA amendment permitted such monitoring to be handled by "Government personnel" provided such personnel were acting under the supervision of an investigative or law enforcement officer authorized to conduct the interception.

Clearly, this provision covers government personnel who are federal employees. It is doubtful, however, whether it covers personnel of a State or local government as well. Often such personnel, especially law enforcement members, are enlisted to assist in complex, joint investigations involving wire, oral, or electronic surveillance. Currently, federal agencies such as the F.B.I. use such State and local agents to assist in monitoring Title III wiretaps through the cumbersome device of cross-designating such agents as federal agents, or by deputizing them as federal marshals. See, e.g., *United States* v. *Bynum*, 763 F. 2d 477 (1st Cir. 1985). The paperwork involved in such methods is, however, burdensome and costly, with no corresponding benefit to privacy or other interests protected by the statutes. Cross-designation involves no qualitative screening; neither the F.B.I. nor the Marshals Service conducts any meaningful background investigation related to the act of deputation, other than routine checks under NCIC and NADDIS for criminal involvement. It would be far more efficient, and consistent with the purpose of the 1986 amendment adding "Government personnel", if the statute expressly permitted State government personnel, acting under the supervision of a federal law enforcement officer, to participate in the conduct of a Title III interception. Section 434 would effect this result.

Sec. 8112. Clarification of inapplicability of 18 U.S.C. 2515 to certain disclosures.

This section would make a minor amendment to 18 U.S.C. 2515, the statutory exclusionary rule for violations of Title III of the Omnibus Crime Control and Safe Streets Act of 1968, so as clearly to exempt situations in which private persons, not acting for any government authority, illegally intercept and record a communication

which later lawfully comes into the possession of the government, which then wishes to use the recording in a criminal investigation or trail. At present, appellate decisions are in apparent conflict over whether section 2515 precludes such use.

Under one possible interception of section 2515, if a private individual consensually records a conversation in aid of an illegal activity, the contents of that recording are not admissible in a criminal trial or hearing even if the government had no role in having the evidence recorded and only acquired it, through lawful means, at a later date. This is because, under 18 U.S.C. 2511(2)(d), a recording by a consenting party, not acting under color of law, is permissible only if the recording is for a non-criminal or non-tortious purpose. Thus, if a briber secretly records a transaction in which a bribe is paid to an official, and the government later obtains the recording and seeks to use it against the official to prove the bribe, section 2515 arguably precludes such use. One appellate court has so held. *United States* v. *Vest*, 813 F.2d (1st Cir. 1987).

By contrast, another appellate court has held that section 2515 did not bar the government from using evidence where individuals operating an illegal gambling business recorded bets placed by telephone so as to facilitate their business by avoiding disagreements with bettors over the amount of their bets. *United States* v. *Underhill*, 813 F.2d 105 (6th Cir. 1987). While the court in *Vest* acknowledged that no deterrent purpose would be served by suppression, since the government played no role in the illegal recording, it relied on the fact that further disclosure in court of the contents would magnify the original privacy violation. The court in *Underhill*, on the other hand, relied on clear legislative history indicating that Congress, despite the facial breadth of section 2515, did not intend to permit lawbreakers to immunize themselves from prosecution by their own acts, the criminal purposes of which made the recordings illegal.

This section adopts the view that *Vest*, whether or not correctly decided under the existing statutory provision, represents bad policy and that an exemption should be created under section 2515 for that narrow class of cases in which private consensual recordings—unlawful under section 251(2)(d) because made for a criminal or tortious purpose—are later acquired by the government and sought to be used as evidence in a criminal trial or hearing. The truth-seeking function of a criminal proceeding is of paramount importance and, in the absence of any deterrent purpose to be served by exclusion, should prevail over the remaining concern that disclosure in the criminal proceeding would somehow exacerbate the original illegal recording.

Sec. 8113. Technical amendment of 31 U.S.C. 5325.

This provision requires financial institutions to identify non-transaction accountholders purchasing bank checks, cashier's checks, traveler's checks, or money orders in amounts of $3,000 or more in currency. The purpose of the provision was to deter structuring of transactions to avoid the $10,000 reporting requirement of 31 U.S.C. 5313 or at least to force persons conducting such transactions to open bank accounts. There is an advantage to law enforcement in having transaction conducted through accounts. If deposit accounts were opened, including a savings, money market or NOW account, the bank would be required to maintain a record of the person's name and social security number, 31 CFR 103.34. That record would later be available to law enforcement through legal process if there were an investigation or prosection.

However, as currently written, the special identification procedures would apply to all persons not holding "transaction accounts" as defined in section 19(b)(1)(c) of the Federal Reserve Act. This, for instance, would require identification of savings account holders making $3,000 cash purchases of monetary instruments. This is too restrictive. In keeping with the statutory purpose, the identification requirement should be coextensive with the recordkeeping provisions of the Bank Secrecy Act, i.e., only apply to persons where the bank would not be required to maintain records of identity. Therefore, this proposed section deletes the reference to "transaction account" and authorizes the Secretary to defined by regulation the definition of accountholder for purposes of this provision.

Sec. 8114. ONDCP transfer authority.

The Office of National Drug Control Policy does not have the authority to transfer funds to agencies responsible for carrying out the National Drug Program. This section extends the powers of the Director of the Office by providing such authority. This authority will enable the Director to transfer funds from the Special Forfeiture Fund as well as other funds appropriated by Congress to the Office of National Drug Control Policy for assistance to high intensity drug trafficking areas to federal agencies and departments for the purpose of executing the National Drug Control Strategy. It also enables the Director to transfer funds appropriated to the Office of National Drug Control Policy for a specified purpose to appropriate Federal agencies and departments for the same purpose.

---

OFFICE OF NATIONAL
DRUG CONTROL POLICY,
*Washington, DC, May 16, 1990.*

Hon. J. DANFORTH QUAYLE,
*President of the U.S. Senate, Washington, DC.*

DEAR MR. PRESIDENT: I am submitting for the consideration of the Congress a legislative proposal entitled the "National Drug Control Strategy Implementation Act of 1990." Also enclosed is a section-by-section analysis summarizing the contents of this legislation.

The enclosed proposed legislation contains provisions to implement the 1990 National Drug Control Strategy. It also includes several important initiatives that remain outstanding from the 1989 Strategy and the last session of Congress. The major elements of the proposed legislation will, if enacted, authorize the death penalty for major drug kingpins, provide the tools needed to implement the Andean initiative in South America, increase accountability in the drug treatment community, and make several important improvements to the Federal criminal justice system.

In the area of accountability, we are again asking that the States be required to implement a program of drug testing in their criminal justice systems as a condition of receiving Federal Bureau of Justice Assistance grant funds. The Administration originally proposed this initiative last fall, but Congress did not act on it. We also propose establishing a nationwide program of drug testing for Federal offenders on post-conviction release. And we are again proposing that States be required to develop Statewide Treatment Plans as a condition of receiving Federal Alcohol, Drug Abuse, and Mental Health grants. This measure passed both houses of Congress last fall, but has not been reported on by the Conference Committee.

As called for by President Bush, we are also proposing legislation that would authorize the death penalty for drug kingpins. Specifically, our proposal would permit the imposition of the death penalty for: 1) the highest statutory category of major drug traffickers, 2) other drug kingpins who attempt murder to obstruct the investigation or prosecution of their drug offenses, and 3) the perpetrators of drug felonies who cause death intentionally or with aggravated recklessness. We believe that the availability of the death penalty in these instances will communicate the Nation's strong and unequivocal resolve to deal forcefully and effectively with drug trafficking and drug-related violence.

In the international area, we are seeking a number of permanent and temporary waivers needed to facilitate the provision of assistance critical to the implementation of the Andean Initiative. While a number of these waivers were implemented for Fiscal Year 1990, it is vital that they be extended to demonstrate our commitment to the Andean governments. In addition, our proposals would broaden the authority of the Secretary of State to order the extradition of a U.S. citizen to a foreign country.

In an effort to increase the efficiency and effectiveness of our criminal justice system, our proposal contains improvements such as general arrest authority for INS officers and streamlined exclusion and deportation proceedings for criminal aliens. We also seek tougher penalties for violence against witnesses, court officers, and jurors. In addition, our legislation authorizes forfeiture proceedings and civil penalties for violations of the drug paraphernalia statute, and increases penalties for drug-related public corruption. We also propose criminal sanctions for failure to heed the order of an authorized Federal law enforcement officer to land an aircraft or bring to a vessel. And, we are seeking new authority for the Coast Guard to engage in air interdiction over the high seas or waters over which the U.S. has jurisdiction.

In addition to the proposals contained in this package, the Administration has previously proposed a number of other important measures to control crime, including drug-related crimes. These proposals have not been acted on by the Congress. The President's proposed Comprehensive Violent Crime Control Act (S. 1225 and H.R. 2709), which encompasses measures to control the criminal use of firearms, restores an enforceable death penalty for the most heinous Federal offenses, creates a "reasonable good faith" exception to the exclusionary rule, and curbs the abuse of habeas corpus, should be enacted without further delay. Other measures supported by the Administration relating to public corruption, debt collection, drug elimination grants in public housing units, and the Administration's legislative package of essential technical amendments to criminal law are also critically important to the national drug control effort. We urge enactment of the proposals in this drug strategy implementation package in conjunction with these other important elements of the Administration's legislative program.

In addition to these proposals, the Administration fully supports the recommendation

of the Judicial Conference regarding the need for additional judgeships and recommends swift passage of authorizing legislation. As stated in the National Drug Control Strategy, these new judgeships are desperately needed to maintain an effective criminal justice system.

I ask that the Congress act favorably and expeditiously on the enclosed proposal and on the other critical legislative reforms mentioned above. An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget advises that there is no objection to the submission of this proposal to Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

WILLIAM J. BENNETT,
*Director.*

---

By Mr. BURNS (for himself, Mr. GRASSLEY, Mr. SYMMS, Mr. BURDICK, Mr. BOREN, Mr. PRESSLER,Mr. NICKLES, and Mr. DOLE):

S. 2653. A bill to permit States to waive application of the commercial Motor Vehicle Safety Act of 1986 with respect to vehicles used to transport farm supplies from retail dealers to or from a farm, and to vehicles used for custom harvesting, whether or not such vehicles are controlled and operated by a farmer; to the Committee on Commerce, Science, and Transportation.

COMMERCIAL DRIVERS LICENSE WAIVER

Mr. BURNS. Mr. President, I am introducing legislation today which will provide much needed regulatory relief to the farm community in my State and other agriculturally based States. I am pleased to have Senators GRASSLEY, SYMMS, BURDICK, BOREN, PRESSLER, NICKLES, and DOLE joining me as original cosponsors.

This legislation will give States the authority to waive commercial drivers' license [CDL] requirements included in the Commercial Motor Vehicle Safety Act of 1986 for vehicles used to transport farm supplies from retail dealers to or from a farm whether or not such vehicles are operated by a farmer. This bill also extends the same waiver authority to States for vehicles used for custom harvesting.

Mr. President, where I come from family members and young workers have always worked on the family farm or in the family business. If it is not a family member, then it is the young neighbor home from college. In rural America, it is a cost effective and productive way of doing business. It holds true for farmers, farm retailers, and custom harvesters alike—it is American tradition! Now, we are seeing a Federal regulation which interfers with that practice making it impractical at best and illegal at worst.

All I am asking is that the States most affected by these requirements—our Nation's farm States—are given the opportunity to exempt not only farmers, but farm retailers and custom harvesters. I think this is a reasonable piece of legislation and I urge my colleagues to support it.

Let me back up for a moment and give Senators some history on this issue. In 1986, the Commercial Motor Vehicle Safety Act was passed into law and established the commercial driver's license [CDL] program which applies to both interstate and intrastate drivers involved in trade, traffic and transportation. The Department of Transportation issued regulations in the fall of 1988 to implement that law. The DOT regulations gave States the authority to waive CDL requirements for farm vehicles which are controlled and operated by a farmer. In granting this waiver, DOT recognized the excellent safety record of seasonal farm vehicle movements.

I believe that this excellent safety record holds true for agri-businesses and their employees as well as for custom harvesters and their employees, and that they should be extended the same opportunity for exemption from CDL requirements. The safety concerns addressed in 1986 law are certainly legitimate, and I am in no way attempting to undercut them. I want to be very clear on that point. This is not a Federal exemption of those requirements. All this legislation does is give the States—which are more familiar with the way our rural farming economies work—the opportunity to waive CDL requirements if they determine that the safety concerns can be met without them.

The main concern for the farm retailers and the custom harvesters is workers. There are labor shortages in these businesses where the jobs are both seasonal and low paying. If Federal regulations cut out people under 21 years of age, for example, as the CDL requirements do in the case of agri-businesses, we are further draining an already half-empty pool of workers. Many of these businesses rely on family members and college students to perform the kind of jobs I am talking about. I do not think we should let Federal regulations take these jobs away from these young people. I also do not think we should burden these small businesses—and ultimately the farmers—with the additional cost of finding workers who comply with the current law.

There being no objection, the bill was printed in the RECORD as follows:

S. 2653

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, in addition to the authority which the Department of Transportation granted to States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to farm vehicles contained in volume 53, pages 37313-37316, of the Federal Register (September 26, 1988), such States may extend such waivers to vehicles used to transport farm supplies from retail dealers to or from a farm, and to vehicles used for custom harvesting, whether or not such vehicles are controlled and operated by a farmer.

Mr. DOLE. Mr. President, I am proud to join the distinguished Senator from Montana, Senator BURNS, as an original cosponsor of legislation that would permit States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to vehicles used to transport farm supplies from retail dealers to or from a farm, and to vehicles used for custom harvesting, whether or not such vehicles are controlled or operated by the farmer.

Nearly 2 years ago, the U.S. Department of Transportation gave States the authority to waive commercial drivers license requirements for farm vehicles under the Commercial Motor Vehicle Safety Act. Unfortunately, DOT did not recognize when granting this waiver that the majority of these particular seasonal agricultural shipments were carried out by agricultural retail outlets, not necessarily by farmers.

DOT also failed to recognize the importance of the custom harvesting industry, which many farmers rely on to harvest a seasonal, perishable crop. This industry is markedly different than the commercial trucking industry. At least two-thirds of the driving is done offpavement. They differ from other for-hire carriers because they only provide the initial transportation of grain from the field to storage or market. These trucks average around 15,000 miles per year, and are simply not in the same category as other commercial truck operations that may average over 100,000 miles per year.

Mr. President, this bill would go a long way to remove this inequity. Farm operation costs and related transport costs are squeezing the farmer out of business. This is not an exemption from these commercial drivers license requirements. It simply is a commonsense approach to give States, who have an excellent safety record in this area, the ability to set reasonable requirements.

Mr. President, the conditions for the operation of these vehicles differ vastly from those of other commercial, over-the-road carriers. I encourage my colleagues to consider supporting this important legislation that, if not adopted, may have serious consequences for farmers, harvesters, and farm suppliers next year.

Mr. BOREN. Mr. President, I am very proud to be a cosponsor of this legislation with our distinguished colleague, Senator BURNS. We have a serious problem in our part of the world in terms of allowing the custom harvesting process to go forward. The regulations that would be imposed by the Department of Transportation are

burdensome and unnecessary. Our farming operations have burdens enough without being further burdened by the Federal bureaucracy. Custom harvesting is often a family operation. We have all members of the family, some of them teenagers, participating in this process.

As the Senator has just indicated, they have an excellent safety record. We do not have a problem here. It is not a problem that needs to be fixed. We are simply talking about preventing the Federal Government from imposing unnecessary burdens on a sector of the economy that is already struggling to continue to exist. They do not need additional burdens. They need help and understanding and I am very proud to join with the distinguished Senator in cosponsoring this legislation. I hope it will be rapidly enacted.

---

By Mr. HARKIN (for himself, Mr. HATFIELD, Mr. SASSER, Mr. METZENBAUM, and Mr. PELL):

S. 2654. A bill to provide for an intensified national effort to improve the health and enhance the independence of older Americans through research, training, treatment, and other means, and for other purposes; to the Committee on Labor and Human Resources.

INDEPENDENCE FOR OLDER AMERICANS ACT

● Mr. HARKIN. Mr. President, good health and increased independence for older Americans must be a top priority for our Nation. That is why I am pleased to announce that today I am introducing the Independence for Older Americans Act on behalf of myself my distinguished colleague and ranking Republican member of the Appropriations Committee, Senator MARK HATFIELD, the distinguished chairman of the Budget Committee, Senator JIM SASSER, and senior Labor Committee members and leaders in the field of health, Senators HOWARD METZENBAUM and CLAIBORNE PELL. I am honored to join the distinguished chairman of the House Select Committee on Aging, the Honorable EDWARD ROYBAL, as the House sponsor of this bill.

I am also very pleased that a broad coalition of more than 50 leading national organizations representing the older Americans, research, business, and provider communities for their support of this effort.

Mr. President, the Independence for Older Americans Act makes the independence of older Americans a top national priority. It calls for a no-holds-barred war against the illnesses and debilitating conditions which rob the elderly of their independence. Specifically, our plan:

Increases the total Federal investment in aging research to not less than $1 billion—the fiscal year 1990 level is $425 million. This would put Federal support of increasing the independence of our growing elderly population on par with that for other major national priority areas such as cancer, AIDS, and heart research. New moneys would be targeted at the most promising areas of research.

Creates a national task force to better coordinate and target federally supported research aimed at increasing the independence of older Americans. The task force would be made up of representatives from all of the major Federal agencies involved in aging research as well as a bipartisan group of congressional leaders.

Establishes at least 15 top-flight geriatric research and training centers across the Nation to be known as the Claude D. Pepper Comprehensive Independence Centers, in tribute to our late great colleague Senator Pepper. These centers will help to address the inadequate supply of physicians and other health providers trained in geriatrics. They will also concentrate research resources for the specific purpose of increasing the health and functional independence of older Americans.

Supports increased research on comprehensive geriatric assessments, the prevention of frailty, and recovery and rehabilitation from chronic illnesses. This research will move our health care system in a positive direction away from a reliance on nursing homes and other forms of long-term care for our growing elderly population.

Establishes a national computerized clearinghouse to assure that the latest developments in research and treatments to improve the health and independence of older Americans are quickly taken advantage of by health care providers, the elderly, and the Government.

Mr. President. The need for this legislation is clear. Debilitating illnesses and conditions are robbing our elderly of their health, independence, and income. The costs of health and long-term care will skyrocket as our population ages in the coming decades. Consider the following:

The elderly are now spending a record amount out of their own pockets for health care. In 1988, the average senior citizen spent $2,400 for health care, eight times more than in 1966.

By the year 2020, the number of Americans who are 65 and older will more than double from 30 million to over 65 million. The fastest growing segment of our population, Americans age 85 and older, will quadruple in size to over 12 million by the year 2040.

By the year 2020, Medicare costs for people 65 and older will nearly double from their 1987 level of approximately $75 million to about $150 million. Medicare costs will soar to as much as $212 billion by 2040, when the average baby boomer will be 85.

By 2040, as many as 10 million Americans could be suffering from moderate to severe dementia, most from Alzheimer's disease. The cost of their care could reach $149 billion—about the size of our current Federal deficit.

By 2040, 840,000 older Americans will suffer hip fractures, nearly four times the current number. Hip-fracture-related costs are expected to triple to as much as $6 billion a year.

Our leading national aging experts agree that the best way to contain the huge projected increases in health care costs is neither to reduce reimbursements nor to ration health care for older Americans. The best medicine is prevention and the Independence for Older Americans Act offers a large dose of it. Dr. Edward Schneider, director of aging studies at the University of Southern California, recently stated that by investing $1 billion a year in research over the next decade, we could cut the number of older Americans afflicted with disabling conditions in half or delay the onset for 5 years and save more than one-half trillion dollars per decade in health and long-term care costs.

Mr. President. Some may say we can't afford to make such an investment. I say all we need to do is shift our priorities. The increased investment this bill calls for amounts to less than 3 percent of the money we've spent on star wars research. We're wasting $3.8 billion of taxpayers money on this pipedream this year alone. I think the American people would rather have us find a cure for Alzheimer's than design a system that won't work and isn't needed.

I want to specifically thank the Alliance for Aging Research and their national spokesperson, Hon. Joe Califano, for their great work in developing this legislation. I also want to thank the many groups who have joined us in endorsing the Independence for Older Americans Act. I look forward to working with all of you in moving this legislation forward.

Mr. President. I'd like to include for the RECORD the current list of organizations which support the Independence for Older Americans Act as well as a summary of the proposal.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE INDEPENDENCE FOR OLDER AMERICANS ACT

Section 1. Congressional findings.

Congressional findings outline the growth in the size of the elderly population, the prevalence of chronic diseases and disabling conditions that threaten older Americans and their families, elderly health and long-term care costs and out-of-pocket expenditures, the promise that research holds for breakthroughs in diseases and conditions

which rob older Americans of their independence, and the declaration that independence for older Americans is an achievable goal for our nation's research and health care systems.

TITLE I. TASK FORCE ON INDEPENDENCE FOR OLDER AMERICANS

A Task Force on Independence for Older Americans is established within the Department of Health and Human Services (HHS) which will coordinate all Federally sponsored research on conditions and diseases leading to dependence among the elderly and identify the most promising areas of research in this area. This Task Force will be composed of:

Two Members of the House of Representatives appointed by the Speaker in consultation with Minority leader and 2 Senators appointed by the Majority Leader in consultation with the Minority Leader, no more than 2 of whom can be members of the same political party;

The Assistant Secretary of Health;

The Surgeon General of the United States;

The Assistant Secretary for Planning and Evaluation;

The Director of the National Institute on Aging (NIA) and (as may be appointed by the Secretary) the Directors of other NIH Institutes which are carrying out activities related to conditions or diseases which limit the independence of the elderly;

The Director of the National Institute on Mental Health;

The Commissioner of the Administration on Aging;

The Commissioner of the Food and Drug Administration; and,

The Chief Medical Officer of the Veteran's Department.

$100,000 is authorized annually to carry out this Title.

TITLE II. GERIATRIC RESEARCH AND TRAINING CENTERS

15 comprehensive geriatric research and training centers, to be known as the Claude D. Pepper Comprehensive Independence Centers, are to be established by the NIA. These centers shall include research, training, demonstration and dissemination activities related to enhancing the independence of older Americans.

$32.5 million is authorized annually to carry out this Title.

TITLE III. AVAILABILITY OF INFORMATION

The Secretary is to establish a computerized information clearinghouse and toll-free telephone lines to make the latest developments to improve the health and independence of older Americans available to researchers, health professionals, the general public and government agencies.

The Secretary is to make grants to nonprofit and public entities for the development and implementation of public information campaigns concerning the importance of health and nutrition and preventing illnesses and conditions which inhibit independence among the elderly.

$20 million is authorized to carry out this Title.

TITLE IV. PREVENTION AND RECOVERY FROM CHRONIC ILLNESS

The NIA, in cooperation with HCFA, shall support research to determine the most effective techniques for performing, targeting and providing geriatric assessment. Appropriate national guidelines are to be established based on this research.

Up to 5 demonstration programs are to be established within the Pepper Comprehensive Independence Centers to prevent the loss of mobility and help frail older individuals regain independence.

The NIA shall develop model techniques to aid in the recovery and rehabilitation of older persons from chronic and debilitating illness and model curricula for training health professionals in the use of such techniques.

$5 million is authorized to carry out this Title.

TITLE V. RESEARCH IN HEALTH, RETIREMENT AND INDEPENDENCE

A 10 year health and retirement survey is to be initiated concerning health functioning and expenditures, longevity, labor force and retirement, women in the labor force and living arrangements and financial status of older Americans.

The National Health and Nutrition Examination Survey, the National Health Interview Survey and the National Ambulatory Medical Care Survey are to be modified in order to develop better information regarding health promotion and disease prevention among older individuals.

The NIA is to request and fund research proposals on behavioral, social, and environmental mechanisms for promoting the health and independence of older Americans.

$5 million is authorized to carry out this Title.

TITLE VI. INCREASE IN OVERALL AGING RESEARCH AUTHORIZATION

Not less than $1 billion is authorized for all aging research within the National Institutes of Health.

● Mr. HATFIELD. Mr. President, it was only last week that Senators METZENBAUM, GRASSLEY, PRESSLER, and I stood on this floor and introduced the second version of the Comprehensive Alzheimer's Assistance, Research and Education act. The bill, which calls for over $500 million in Federal support for biomedical research, is a substantial step forward toward unlocking the mysteries of Alzheimer's disease and related disorders.

Today, it is a pleasure to join my colleagues on the Senate Appropriations Committee and the Subcommittee on Labor, Health and Human Services, Senator HARKIN and Seantor SPECTER, in moving toward an even broader vision of medical research into the ailments of the aging population. I am delighted to be an original cosponsor of the Independence for Older Americans Act.

This legislation calls for a $1 billion increase in Federal spending on biomedical research into the injuries and diseases which afflict our aging population. It is designed to stimulate an intensified national effort to improve the health and enhance the independence of older Americans by stepping up efforts in research, training, and treatment. It is clear, Mr. President, that this proposal could lead the way to a reordering of our national priorities.

The introduction of this legislation again gives me the opportunity to comment briefly on our budget process. The simple truth is this: Our budgetary priorities attach a higher importance to chemical weapons research than to medical research; a higher priority to disease-causing research than to disease-curing research.

In only the last 24 months, defense-related research and development spending is roughly equivalent to total research and development spending at the National Institutes of Health in the last 100 years. For the price of one underground nuclear test, we could more than triple the amount now spent on research into sudden infant death syndrome. For the price of one

Stealth bomber, we could almost double the amount being spent at the National Institute of Diabetes, Digestive and Kidney Disease.

However, when we consider the drastic cuts suffered by other nondefense, domestic discretionary programs, health research spending has fared relatively well in recent years. Thirteen percent of all Federal research and development money is spent on medical research today—a figure which has remained constant since the beginning of this decade.

But it has done well only at the expense of other worthy programs. And even within the medical research budget itself, worthy programs are forced to compete against each other: AIDS versus cancer, strokes versus heart disease.

The bottom line, Mr. President, is that we must reorder our Federal budget priorities. Public opinion is already on our side. A survey recently conducted by the American Federation for Clinical Research suggests that 53 percent of our constituents would make increased funding for medical research a top budget priority. Only 3 percent would make increased funding for weapons the top priority.

The facts are also on our side. One dollar spent on medical research today produces $13 in savings tomorrow. A $235,000, 17-year study that led to the identification of a vaccine against hepatitis B, for example, is saving between $50 and $100 million each year. A $680,000, 4-year study that led to a preventative treatment of kidney stones will result in a savings of between $300 million and $600 million a year.

As we debate the Federal budget every year, we are given the choice between supporting life enhancing endeavors and life destroying ones. When we hammer out budget agreements and focus our attention on complicated calculations and endless reams of paper, perhaps we feel isolated and insulated from the very real choices we are making. But those who are suffering from cancer and AIDS and hundreds of other diseases understand the implications of our choices all too well.

Mr. President, I wholeheartedly support the increases in this legislation and pledge to redouble my efforts—within the Senate Appropriations Committee and within this body as a whole—to reorient our Federal budget priorities.

There is one other dimension to this problem. As the ranking Republican member of the Senate Appropriations Committee, I am painfully aware of the skyrocketing health care costs and the Federal Government's inadequate efforts to address them. A study by the Department of Health and Human Services, which was released earlier this month, noted that health care spending has increased 117 percent between 1980 and 1988. Health care spending in 1988 alone totaled $540 billion—11.2 percent of our GNP. This is up from 9.1 percent in 1980, 7.3 percent in 1970, and only 5.3 percent in 1960.

Indeed, Mr. President, some experts predict that health care spending will triple by the beginning of the 21st century—a decade away. A study published in the Journal of the American Medical Association later this month predicts that Medicare costs alone will need to triple within the next 50 years to care for our aging baby boom population. But more importantly in our discussion today, Medicare costs for those 85 and older, the fastest growing segment of our population today, could increase sixfold.

We can only combat this escalation by investing far more energy, talent, and money into health research, preventative medicine, and social programs: Sooner rather than later. Suggesting a solution to rising health care costs which involves spending more money—at least in the short term—may seem decidedly unhelpful. Moreover, the concept of investment is hard to sell in a political culture which seeks instant gratification. But I am increasingly convinced that research and prevention offer our best, our most humane, and ultimately our most cost-effective alternative.

Mr. President, imagine the savings if we could develop a way to prevent or cure Alzheimer's disease, which now costs at least $34,000 a year for each of its estimated 4 million victims. Our goal must be not just to make health care better: But to prevent illness and disease in the first place. Translated into dollars, this goal adds up to enormous savings. Translated into life and the quality of life, the savings cannot be measured.

As we in the Congress continue to wrestle with skyrocketing health care costs and with the unmet human needs in our midst, I will be on the forefront of efforts like this one to rechannel our Federal budget into investments in medical research, in preventative medicine, and in social service programs. We must invest in our future—it makes financial sense and it makes human sense. I hope my colleagues will join me.●

---

By Mr. STEVENS

S. 2655. A bill to authorize a certificate of documentation for the vessel *Arctic Fisher;* to the Committee on Commerce, Science, and Transportation.

DOCUMENTATION OF VESSEL "ARCTIC FISHER"

● Mr. STEVENS. Mr. President, this legislation would allow the Coast Guard to issue a valid certificate of documentation for the 191-ton vessel, *Arctic Fisher,* official number 602365, which is currently owned by Sea Fisher Products, Inc., an Alaskan corporation.

The *Arctic Fisher* was built in Pennsylvania in 1945 for the U.S. Navy. In 1975, the U.S. Navy sold the vessel to an Iranian owner. In 1979, Sea Fisher Products, Inc. purchased the vessel, rebuilt it as a fish processing vessel, and has operated as an independent fish buyer for the past 10 years.

The *Arctic Fisher* is restricted from enagaging in coastwise trade because of its Iranian ownership. Mr. Jack Aldrich, president of Sea Fisher Products, Inc., would like his coastwise privileges restored in order that he may provide berthing for oilspill cleanup crews and serve as tender in herring and salmon fisheries for which the *Arctic Fisher* has been documented.

This legislation is needed in order to allow Sea Fisher Products, Inc. to obtain a valid certificate of documentation so that the *Arctic Fisher* can be employed in oilspill cleanup and as a fish tender vessel.●

---

S. 2656. A bill to authorize a certificate of documentation for the vessel *Pumpkin;* to the Committee on Commerce, Science, and Transportation.

DOCUMENTATION OF VESSEL "PUMPKIN"

● Mr. STEVENS. Mr. President, this legislation would allow the Coast Guard to issue a valid certificate of documentation for the 54-foot vessel *Pumpkin,* official number 627259, which is currently owned by Pacific Investments, Inc., an Alaskan corporation.

The *Pumpkin* was built in Marinette, WI in 1968. The vessel was used on the west coast in its capacity as a motorized fuel barge until 1981, when it was purchased by Pacific Investments, Inc. The *Pumpkin* was documented with a coastwise license and registry endorsement in 1982.

Pacific Investments has used and intends to continue to use the vessel solely for transporting fuel between sites in support of mining operations in the Shumagin Islands, in the Aleutians. Alaska Apollo Gold Mines Ltd. [Apollo Gold], a Nevada corporation, is conducting the Shumagin Island mining operations, and the president of Apollo Gold owns a controlling interest in Pacific Investments, Inc.

For insurance purposes, the ownership of the *Pumpkin* was transferred from Pacific Investments to Apollo Gold. Apollo Gold'subsequent application for redocumentation of the vessel was denied by the Coast Guard on the grounds that Apollo Gold did not meet the citizenship criteria of 46 C.F.R. §§ 7.03-9 because three of Apollo Gold's five directors are Canadian.

By mutual consent of both corporations, the transfer of the vessel from Pacific Investments to Apollo Gold was voided. However the Coast Guard

still refuses to license it for coastwise trade because the vessel fails to meet the continuous U.S. ownership requirement of the law.

This legislation is needed in order to allow Pacific Investments, Inc. to continue to use the *Pumpkin* to transport fuel from ports in Alaska to its gold mining sites in the Aleutians.●

By Mr. BRADLEY:

S. 2657. A bill to direct the Secretary of the Interior, acting pursuant to the Reclamation Act of 1902 (act of June 17, 1902, 32 Stat, 388) and acts amendatory thereof and supplementary thereto, to undertake certain studies to investigate opportunities for wastewater reclamation and reuse, to conduct studies of ground water, and for other purposes; to the Committee on Energy and Natural Resources.

S. 2658. A bill to establish conditions for the sale and delivery of water from the Central Valley Project, California, a Bureau of Reclamation facility, and for other purposes; to the Committee on Energy and Natural Resources.

S. 2659. A bill to amend and supplement Federal reclamation law to eliminate abuses of the Reclamation Program, and for other purposes; to the Committee on Energy and Natural Resources.

BUREAU OF RECLAMATION LEGISLATION

● Mr. BRADLEY. Mr. President, I rise today in my capacity as chairman of the Subcommittee on Water and Power to introduce three bills concerning the Bureau of Reclamation. These bills represent a portion of the overall agenda for the Subcommittee and the Federal Reclamation Program that I will pursue in this and subsequent sessions of Congress.

The Bureau of Reclamation has played a vital role in the settlement and economic growth of the American West and the Nation as a whole. Dams, irrigation, and water supply projects constructed by the Bureau serve millions of Americans, providing water, power, recreation, food, and other benefits.

In 1988, the Bureau's projects delivered 9.5 trillion gallons to 27 million people, irrigated 9 million acres on 131,000 farms, produced 58 million tons of agricultural products valued at almost $9 billion, and generated 42 billion kilowatt hours of clean hydroelectric power which netted revenues of $584 million. The Bureau's 298 recreation areas saw 54.5 million visitor days.

The Bureau of Reclamation is a creature of Congress, with an especially close tie to this Chamber. The Reclamation Program was conceived by Senator Francis Newlands of Nevada and has followed a course charted, for the most part, by the Senate. I would ask my colleagues to join me in saluting the thousands of Reclamation employees who have served Congress and the Nation loyally and professionally.

As my colleagues know, environmental problems that have begun to plague the Reclamation Program in recent years have forced some rethinking of the Bureau's traditional approach to water resource development. These problems in no way diminish or devalue the program's many successes. But they do require prompt corrective action.

Mr. President, each of the bills I offer today reflects my belief that the Bureau of Reclamation has a crucial role to play in the future of the Nation, in channeling a vital resource—clean water—to the communities that need it. My object as chairman of the subcommittee has been to find ways to reconcile the Bureau's traditional mission with the newer mandate we all share to maintain a safe and sound environment. With this in mind, I offer the "Reclamation Wastewater and Groundwater Study Act."

This bill would direct the Secretary of the Interior to study opportunities to reclaim and reuse agricultural, municipal, industrial, and other wastewater stemming from water supplied by Reclamation facilities. Though less glamorous than construction of high dams and broad canals, wastewater reclamation and reuse is a sensible means to make the best use of our already developed water supplies. In many cases, I expect that wastewater reuse programs, while meeting growing human needs, will also aid efforts to restore the environment and protect instream flows.

This bill also directs the Secretary to study the Reclamation Program's impact on ground water resources. It is vital that we understand the linkage between surface water development and ground water supplies in order to make the most efficient and environmentally sound use of water resources.

Mr. President, I am committed to see that the past environmental damage that is the unfortunate legacy of the Reclamation Program is addressed and repaired. I am particularly determined to restore and protect fish and wildlife and their habitats, and to do so in a manner that comprehends and respects ecological systems. I believe that we can tackle these problems using resources developed by the Bureau of Reclamation. With this in mind, I offer the Central Valley Project Improvement Act.

The Central Valley Project Improvement Act would direct the Secretary of the Interior to repair environmental damage done by the Central Valley Project in California. The CVP could be considered our most successful reclamation project. It serves 3 million acres, produces hundreds of different crops, employs thousands of people, and generates billions of dollars of economic activity. But the CVP can be improved and made to serve a broader range of interests without sacrificing its place as a leading and extraordinarily productive agricultural enterprise.

Environmental damage caused by this largest of all Federal water supply projects has polarized the State, leading to a deadlock over future water development. For example:

Construction of the Central Valley Project was this century's principal contributor to the loss of 5,700 of the original 6,000 miles of salmon spawning habitat on Central Valley rivers;

The Friant Unit of the CVP dewatered the Upper San Joaquin River and contributed substantially to elimination of chinook salmon from the mainstream San Joaquin;

The Red Bluff Diversion Dam, located on the Upper Sacramento River, has had devastating impacts on migration of juvenile and adult salmon, leading to last year's listing of the river's winter run chinook as a potentially endangered species;

The CVP is responsible for the loss of 100,000 acres of Central Valley wetlands, areas of vital importance to the Pacific flyway's migratory waterfowl.

There can be no doubt that the Central Valley Project has heavily damaged California's fish and wildlife, including migratory species in which the Federal interest is high. Just as troubling, the Bureau of Reclamation violated in California what has been the cardinal principle of Federal water development—deference to State authority. In California, the Bureau stood policy on its head and actually worked to frustrate the State's administration of its own water law.

The Bureau of Reclamation is most comfortable working with its traditional agricultural constituency. Western States' water law is generally oriented toward traditional agricultural uses, so there is usually no tension between the Bureau's sense of its mission and the direction of State law.

But California water law is different and changing. Increasingly, it mandates protection for public values, such as water quality, fish, wildlife, and recreation. The Bureau has shown discomfort with this aspect of California's water law. For example, the Bureau has aggressively opposed efforts by the California State Water Resources Control Board to set new quality standards for the San Francisco Bay/Sacramento-San Joaquin River Estuary. It has attempted to market the remaining firm yield of the CVP without seriously considering public or environmental needs for that water. Where the Bureau has had discretion to renew irrigation water sales contracts for 10 to 40 years, it has chosen to renew them for the longest period possible, making it more difficult for the State to adjust its priorities. Worse, these contracts obligate the Federal Government to defend the

private water user's right to divert and use water "before all courts and agencies."

I would be interested to know what my colleagues from Wyoming or Utah or Idaho would think if the Bureau of Reclamation obligated the Department of Justice to fight their State's water rights administrators. It is unacceptable Federal policy for the Bureau of Reclamation to pick and choose among the States whose water laws they will agree to defer to. This bill includes several provisions that would not be necessary if the Bureau had maintained its appropriate deference.

The Central Valley Project's environmental debt must be paid before any further water development occurs—no matter how environmentally benign the new projects might be. This bill will authorize the Secretary of the Interior to operate the CVP in a way that takes account of the needs of fish and wildlife as well as other water users. The Nation—in many respects following California's lead—has begun to recognize that environmental protection and economic development must be equal partners. This bill will prevent Federal agencies from obstructing that partnership.

My legislation also directs the Secretary of the Interior to deliver enough clean water to the wildlife refuges in the Central Valley to sustain the millions of waterfowl that live in those refuges. It further requires the Secretary to restore Central Valley salmon and steelhead populations, and directs the Department of Commerce to assess the CVP's economic impact on California's commercial, tribal, and sport-fishing communities. I expect the Secretary to work as closely as possible with all local interests in developing these plans, farmers and fishermen as well as environmentalists and developers.

Because 90 percent of the CVP's water already goes to irrigation, this bill prohibits the Bureau of Reclamation from entering into new contracts to provide irrigation water from the CVP until the fish and wildlife restoration goals of the bill are met.

Finally, Mr. President, the third bill I offer today, the Reclamation Reform Act amendments, is a narrowly tailored effort to close loopholes that permit abuse of the ownership and pricing limitations in Reclamation law.

The Federal taxpayer has been very generous to the beneficiaries of the Reclamation Program. By one recent estimate, the Nation has spent between $22 and $23 billion on Bureau irrigation projects. Of that total, only about $3 billion will ever be repaid. The $19 billion subsidy, about 85 percent of the total cost, has been justified by those who cite the central social purpose of the program, that is, to support modest-sized family farms.

Indeed, many farmers have been helped and the overwhelming majority of Reclamation project farms and farmers need and deserve the help they get. I strongly support rural economic development and measures to bring stability to local farm economies.

However, there are those who have created and exploited loopholes in Reclamation law and subverted the worthwhile purposes of the program for personal or corporate gain. Congress has had to act twice in the past 10 years to eliminate such abuses. Recently, it has become clear that Congress must act once again to protect the public interest and the integrity of the program. These amendments will close the loopholes and stop the profiteering.

As I noted at the beginning of my remarks, I believe that the Reclamation Program has served the Nation well since its inception in 1902. We now have an opportunity to recast and renew this exemplary public endowment in a way that recognizes contemporary needs. With these bills, the Reclamation Program will deliver a second generation of benefits to new generations of Americans.

I look forward to the support of my colleagues as we move to capitalize on the Reclamation Program's successes and remedy its problems.●

---

By Mr. BREAUX:

S. 2660. A bill to authorize a certificate of documentation for the vessel *Bounty*; to the Committee on Commerce, Science, and Transportation.

DOCUMENTATION OF VESSEL "BOUNTY"

● Mr. BREAUX. Mr. President, I am introducing a bill today to direct that the vessel *Bounty*, Official Number 950956, be accorded coastwise trading privileges and be issued a coastwise endorsement under 46 U.S.C. 12106. The *Bounty* was constructed in 1960 in Nova Scotia for use by MGM in the filming of the movie "Mutiny on the Bounty" starring Marlon Brando. The ship is a three-masted, fully rigged replica of a famous British ship captained by William Bligh and taken over by mutineers led by Fletcher Christian in the 18th century.

The *Bounty* was purchased by Turner Broadcasting System, Inc. [TBS] in 1986 when it acquired MGM Entertainment Co. The vessel has been used by TBS for public display and in the Turner Television Network remake of "Treasure Island," starring Charlton Heston. The *Bounty* will be used for various visits at ports throughout the world, including Seattle, WA, for this year's Goodwill Games. It will be operated by a nonprofit corporation, available for various public and private events.

Until recently, the vessel was documented as a yacht under the Canadian flag. Prior to its public display visits in the United States, the *Bounty* was inspected by the U.S. Coast Guard and given a certificate of inspection as an attraction vessel. However, because of the particular use contemplated by TBS, the Coast Guard has indicated that the vessel is not operating for pleasure only and, for certain uses, may have to be licensed and inspected as a commercial passenger vessel. However, in order to be used as a commercial passenger vessel, if approved by the Coast Guard—or for various other activities that may fall within the Jones Act—within U.S. waters, the *Bounty* must be documented under U.S. law and possess a coastwise license.

TBS has now received U.S. documentation for the *Bounty* and is having the vessel inspected by the Coast Guard as a passenger vessel. Because the vessel was constructed in Canada, it will take new legislation to qualify it for coastwise trade privileges. The circumstances requiring legislation are the same as those of the *African Queen*, which was given coastwise privileges in Public Law 101-92 in 1989. The House of Representatives has already approved similar legislation for the *Bounty* in H.R. 4009, section 4(2).

The *Bounty* is a very special ship and will be used in a very unique manner by TBS. The company's desire is to comply fully with U.S. documentation and safety requirements so that the *Bounty* can be enjoyed by as many as possible. The purpose of the legislation I am introducing today is to allow the *Bounty* the ability to operate in coastwise trade under the U.S. flag.●

---

By Mr. LAUTENBERG:

S.J. Res. 320. Joint resolution designating July 2, 1990, as "National Literacy Day"; to the Committee on the Judiciary.

NATIONAL LITERACY DAY

● Mr. LAUTENBERG. Mr. President, I am pleased to introduce a joint resolution to designate July 2, 1990, as "National Literacy Day." This is the fifth year in a row that I am introducing this resolution. It is vital to call attention to the problem of illiteracy, to help others understand the severity of this problem and its detrimental effects on our society, and to reach those who are unaware of the service and help available for illiterate people.

In the book "Illiterate America" by Jonathan Kozol, the author describes an invisible minority, the growing crisis of illiteracy in America. In this country it is often said that we live in the information age. Yet for many Americans, information is inaccessible. Over 27 million American adults cannot read. An additional 35 million read below the level needed to function successfully. The cost of these wasted human resources is estimated

at $225 billion, although, in truth, no value can be put on the devastation of illiteracy.

The cost includes the lifetime earnings that will not be realized by men and women who cannot get and hold jobs requiring any reading skills. The cost includes child welfare expenditures for the children of adults who lack the skills to get jobs. The cost includes prison maintenance for the inmates whose imprisonment can be linked to their illiteracy. The cost includes on-the-job accidents and damage to equipment caused by the inability of workers to read and understand instructions for the operation of machines.

And the human cost is even higher. The daily activities that we take for granted—reading the newspaper, reading a menu, reading a street or subway map, reading a note from a child's teacher—become a nightmare for illiterate people. They devise remarkable strategies of evasion and coping. The creativity that goes into hiding the inability to read is a terrible waste and a tragic commentary on the losses illiterate people suffer.

It is vital to call attention to the problem of illiteracy. Our society must begin to understand the severity of this problem and its detrimental effects. Perhaps even more essential is the need to reach the people who need help in overcoming their illiteracy and to make them aware of the services that are available.

Mr. President, for these reasons, I am introducing a joint resolution to designate July 2, 1990, as "National Literacy Day." I urge my colleagues to support this resolution.

I ask unanimous consent that text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 320

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,*

Whereas literacy is a necessary tool for survival in our society;

Whereas thirty-five million Americans today read at a level which is less than necessary for full survival needs;

Whereas there are twenty-seven million adults in the United States who cannot read, whose resources are left untapped, and who are unable to offer their full contribution to society;

Whereas illiteracy is growing rapidly, as two million three-hundred thousand persons, including one million two-hundred thousand legal and illegal immigrants, one million high school dropouts, and one hundred thousand refugees, are added to the pool of illiterates annually;

Whereas the annual cost of illiteracy to the United States in terms of welfare expenditures, crime, prison expenses, lost revenues, and industrial and military accidents has been estimated at $225,000,000,000;

Whereas the competitiveness of the United States is eroded by the presence in the workplace of millions of Americans who are functionally or technologically illiterate;

Whereas there is a direct correlation between the number of illiterate adults unable to perform at the standard necessary for available employment and the money allocated to child welfare and unemployment compensation;

Whereas the percentage of illiterates in proportion to population size is higher for blacks and Hispanics, resulting in increased economic and social discrimination against these minorities;

Whereas the prison population represents the single highest concentration of adult illiteracy;

Whereas one million children in the United States between the ages of twelve and seventeen cannot read above a third grade level, 13 per centum of all seventeen-year-olds are functionally illiterate, and 15 per centum of graduates of urban high schools read at less than a sixth grade level;

Whereas 85 per centum of the juveniles who appear in criminal court are functionally illiterate;

Whereas the 47 per centum illiteracy rate among black youths is expected to increase;

Whereas one-half of all heads of households cannot read past the eighth grade level and one-third of all mothers on welfare are functionally illiterate;

Whereas the cycle of illiteracy continues because the children of illiterate parents are often illiterate themselves because of the lack of support they receive from their home environment;

Whereas Federal, State, municipal, and private literacy programs have only been able to reach 5 per centum of the total illiterate population;

Whereas it is vital to call attention to the problem of illiteracy, to understand the severity of the problem and its detrimental effects on our society, and to reach those who are illiterate and unaware of the free services and help available to them; and

Whereas it is also necessary to recognize and thank the thousands of volunteers who are working to promote literacy and provide support to the millions of illiterates in need of assistance, now, therefore be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That July 2, 1990, is designated as "National Literacy Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.●

## ADDITIONAL COSPONSORS

S. 324

At the request of Mr. WIRTH, the names of the Senator from Louisiana [Mr. JOHNSTON], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of S. 324, a bill to establish a national energy policy to reduce global warming, and for other purposes.

S. 670

At the request of Mr. ARMSTRONG, the name of the Senator from North Dakota [Mr. CONRAD] was added as cosponsor of S. 670, a bill to recognize the organization known as the Retired Enlisted Association, Incorporated.

S. 1664

At the request of Mr. HEINZ, the names of the Senator from Illinois [Mr. DIXON] and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 2071

At the request of Mr. PACKWOOD, the name of the Senator from Mississippi [Mr. COCHRAN] was added as cosponsor of S. 2071, a bill to amend the Internal Revenue Code of 1986 to provide incentives for savings and investments in order to stimulate economic growth.

S. 2078

At the request of Mr. WARNER, the names of the Senator from Kansas [Mrs. KASSEBAUM] and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of S. 2078, a bill to recognize the organization known as the National Center for Theraputic Riding.

S. 2150

At the request of Mr. SYMMS, the name of the Senator from Alaska [Mr. STEVENS] was added as cosponsor of S. 2150, a bill to set aside a fair proportion of the highway trust fund moneys for use in constructing and maintaining off-highway recreational trails.

S. 2256

At the request of Mr. HARKIN, the names of the Senator from South Dakota [Mr. PRESSLER] and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 2256, a bill to amend title XIX of the Public Health Service Act to clarify the provisions of the allotment formula relating to urban and rural areas, and for other purposes.

S. 2293

At the request of Mr. WILSON, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as cosponsor of S. 2293, a bill to warn certain consumers in connection with the purchase of a medicare supplemental policy.

S. 2356

At the request of Mr. SYMMS, the name of the Senator from Mississippi [Mr. COCHRAN] was added as cosponsor of S. 2356, a bill to amend the Internal Revenue Code of 1986 to allow tax-exempt organizations to establish cash and deferred pension arrangements for their employees.

S. 2525

At the request of Mr. GRAHAM, the name of the Senator from South Dakota [Mr. DASCHLE] was added as cosponsor of S. 2525, a bill to recognize the importance of the domestic fruit and vegetable industry in United States farm policy, and to require the Secretary of Agriculture to conduct a

study of the domestic fruit and vegetable industry, and for other purposes.

S. 2600

At the request of Mr. KENNEDY, the names of the Senator from Arizona [Mr. DECONCINI], and the Senator from Maryland [Mr. SARBANES], were added as cosponsors of S. 2600, a bill to combat homelessness through the establishment of housing-based family support centers, through the provisions of housing-based services to elderly individuals with chronic and debilitating illnesses and conditions, through the provision of residence-based outpatient mental health services, and through the use of grants for the improvement of community development corporations, and for other purposes.

S. 2611

At the request of Mr. HARKIN, the name of the Senator from Arkansas [Mr. PRYOR] was added as cosponsor of S. 2611, a bill to authorize assistance to the Washington Center for Internships and Academic Seminars.

S. 2649

At the request of Mr. KENNEDY, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 2649, a bill to provide for improved drug abuse treatment and prevention.

SENATE JOINT RESOLUTION 240

At the request of Mr. SYMMS, the name of the Senator from North Dakota [Mr. CONRAD] was added as cosponsor of Senate Joint Resolution 240, a joint resolution designating the week of June 10, 1990, through June 16, 1990, as "Multiple-Use Sustained-Yield Week."

## SENATE RESOLUTION 288—RELATIVE TO THE REOPENING OF UNIVERSITIES IN THE WEST BANK AND GAZA

Mrs. KASSEBAUM (for herself, Mr. CHAFEE, Mr. INOUYE, and Mr. DOLE) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 288

Whereas on July 22, 1989, the Government of Israel announced that it would begin reopening primary and secondary schools in the West Bank;

Whereas the primary and secondary schools in the West Bank have been reopened;

Whereas the United States Congress applauds recent steps by the Government of Israel to begin reopening community colleges in the West Bank and Gaza;

Whereas the reopening of these community colleges did not lead to increased violence in the West Bank and Gaza;

Whereas all universities in the West Bank and Gaza have been closed for over two years;

Whereas this closure affected over 15,000 university students;

Whereas on May 14, 1990, Israeli authorities announced that they are considering reopening the Arab universities in the occupied territories; and

Whereas reopening of the universities would make an important contribution to improving relations between Palestinians and the Government of Israel and to the peace process in the Middle East: Now, therefore, be it

*Resolved*, That it is the sense of the Senate

(1) that the Government of Israel should undertake to reopen universities in the West Bank and Gaza without delay;

(2) that these institutions should remain open, and should not be closed or caused to be closed for political purposes; and

(3) that these institutions should be respected and regarded as centers of education.

Mrs. KASSEBAUM. Mr. President, I am introducing today, along with Senator CHAFEE and Senator INOUYE, a sense-of-the-Senate resolution calling for the immediate reopening of universities in the West Bank and Gaza.

More than 2 years ago, at the start of the Palestinian uprising, the Israeli authorities moved to close schools in the West Bank and Gaza, which included five universities with over 15,000 students. The unfortunate result of this move has been that students of all ages were collectively punished and denied their right to continuing education.

As the ranking member of our Senate Subcommittee on Education, it is a subject near and dear to my heart, and I believe every one of us here in the U.S. Senate value the importance of education. Last year the Congress supported Senator CHAFEE's effort, and that of myself and others, to urge the reopening of primary and secondary schools in the West Bank and Gaza. Since that time, the Israeli Government has reopened these schools and has begun to reopen community colleges. The Israeli authorities have also announced recently they are considering reopening the Arab universities in the occupied territories.

All these moves by the Israeli Government should be commended. Our resolution is very straightforward. It urges the immediate reopening of the universities without delay. We hope our colleagues will join us in supporting such a move.

I strongly believe, Mr. President, these institutions should be respected and regarded as centers of education. Education must not be used as a pawn or a lever in civil conflict. It is a basic right which must be preserved.

Mr. CHAFEE. Mr. President, thank the Senator from Kansas for her efforts in addressing this very important issue.

I am glad to join in introducing this resolution in the wake of the encouraging news from Israel. Just this past Monday, Mr. Goren, the coordinator of government activities in the occupied territories, met with the heads of all the Palestinian universities. They discussed the possibility of reopening theses universities which, for over 2½ years, have been closed. Those universities have been closed for nearly 3 years.

I believe the measure we are introducing today can have a positive influence on the education of the Palestinian students in the West Bank, and can contribute to the peace process in that region.

What exactly does this resolution do? First, it commends Israel for reopening the Palestinian schools. Second, it encourages Israel to continue on this path by reopening the universities. There is a difference, obviously, Mr. President, between their treatment of the schools and the universities.

The first section outlines the history of Israel's progress in reopening the Palestinian schools on the West Bank and in the Gaza strip. On July 22, 1989, just about a year ago, Israel announced it would begin to open primary and secondary schools in the occupied territories. While these schools were opened and then temporarily closed, all of them were opened again earlier this year.

Israel then began to reopen the community colleges, in an effort to ease tensions between the government and the Palestinian people. This process has proven successful, in that students have been able to resume their studies, and we have not seen an increase in violence as a result.

It is, indeed, this evidence that has led Israel to consider reopening the universities.

Note the difference. Schools, primary and secondary on one hand, they have been opened; the community colleges, they have been opened; but not the universities.

Mr. Goren has stated the reopening of the high schools and colleges did not influence the violence in the territories and this was the reason why Israel was trying to reopen the universities. There was no rise in violence as a result of the reopening of the schools and colleges.

I am hopeful Israel will continue its progress in restoring the educational opportunities for the Palestinian people and in normalizing daily life in the West Bank and Gaza Strip. Thus far over 14,000 university students have been affected, in addition to the thousands of high school graduates who have been able to continue their study.

The second part of this resolution is very straightforward. It expresses three things: First, that Israel should undertake to reopen the universities without delay; second, that these institutions should remain open and should not be closed for political purposes; third, that these institutions should be respected and regarded as what they are, centers of education.

I urge my colleagues to join in cosponsoring this resolution. In July of last year, the Senate unanimously approved a resolution that expressed that these three very same principles: namely, the reopening, they should remain open, and they should remain centers of education and be respected as the same. These same principles with respect to the primary and secondary schools were approved unanimously by this Senate last year, in July.

This resolution simply extends our encouragement to do the same with the universities. The reopening of these institutions would clearly ease tensions between the Palestinian people and the Government of Israel, and thus help foster a favorable climate that is conducive to the peace process we all so earnestly seek.

I commend the junior Senator from Kansas for her resolution and say I join in it enthusiastically and hope we can make as much progress with it as we did with the resolution pertaining to schools last year.

Mrs. KASSEBAUM. Mr. President, I acknowledge Senator CHAFEE'S support. He has been a steadfast advocate of the importance of education and the opening the schools in Israel. I also am pleased to ask unanimous censent that Senator DOLE'S name be added as a cosponsor as well.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AMENDMENTS SUBMITTED

## CONSTITUTIONAL PROCEDURES FOR IMPOSITION OF SENTENCE OF DEATH

### SPECTER AMENDMENT NO. 1663

(Ordered to lie on the table.)

Mr. SPECTER submitted an amendment intended to be proposed by him to the bill (S.1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes, as follows:

At the appropriate place, insert the following:

SEC. . SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES.

(a) IN GENERAL.—Part IV of title 28, United States Code, is amended by inserting immediately following chapter 153 the following new chapter:

"CHAPTER 154—SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES

"Sec.

"2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence: appointment of counsel; requirement of rule of court or statute; procedures for appointment.
"2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions.
"2263. Filing of habeas corpus petition; time requirements; tolling rules.
"2264. Evidentiary hearings; scope of Federal review; district court adjudication.
"2265. Certificate of probable cause inapplicable.
"2266. Counsel in capital cases; trial and post-conviction standards.
"2267. Law controlling Federal habeas corpus proceeding; retroactivity.
"2268. Habeas corpus time requirements.

**"§ 2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment**

"(a) This chapter shall apply—

"(1) to—

"(A) cases in which the defendant is tried for a capital offense; or

"(B) cases arising under section 2254 of this title brought by prisoners in State custody who are subject to a capital sentence; and

"(2) only if subsections (b) and (c) are satisfied.

"(b) This chapter is applicable if a State establishes by rule of its court of last resort or by statute a mechanism for the appointment, compensation, and payment of reasonable fees and litigation expenses of competent counsel consistent with section 2266 of this title.

"(c) Any mechanism for the appointment, compensation, and reimbursement of counsel as provided in subsection (b) must offer counsel to all State defendants tried for a capital offense and all State prisoners under capital sentence and must provide for the entry of an order by a court of record—

"(1) appointing one or more counsel to represent the defendant or prisoner upon a finding that the defendant or prisoner—

"(A) is indigent and has accepted the offer; or

"(B) is unable competently to decide whether to accept or reject the offer;

"(2) finding, after a hearing, if necessary, that the defendant or prisoner has rejected the offer of counsel and made the decision with an understanding of its legal consequences; or

"(3) denying the appointment of counsel upon a finding that the defendant or prisoner is not indigent.

"(d) No counsel appointed pursuant to subsections (b) and (c) to represent—

"(1) a State defendant being tried for a capital offense; or

"(2) prisoner under capital sentence during direct appeals in the State courts, shall have previously represented the defendant or prisoner at trial or on direct appeal in the case for which the appointment is made unless the defendant or prisoner and counsel expressly request continued representation.

"(e) The ineffectiveness or incompetence of counsel during State or Federal collateral post-conviction proceedings in a capital case shall not be a ground for relief in a proceeding arising under this chapter or section 2254 of this title. This subsection shall not preclude the appointment of different counsel at any phase of Federal post-conviction proceedings.

**"§ 2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions**

"(a) Upon the entry in the appropriate State court of record of an order pursuant to section 2261(c) of this title for a prisoner under capital sentence, a warrant or order setting an execution date for a State prisoner shall be stayed upon application to any court that would have jurisdiction over any proceedings filed pursuant to section 2254 of this title. The application must recite that the State has invoked the procedures of this chapter and that the schedule execution is subject to stay.

"(b) A stay of execution granted pursuant to subsection (a) shall expire if—

"(1) a State prisoner fails to file a habeas corpus petition under 2254 of this title within the time required in section 2263 of this title; or

"(2) upon completion of district court and court of appeals review under section 2254 of this title, the petition for relief is denied and—

"(A) the time for filing a petition for certiorari has expired and no petition has been filed;

"(B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or

"(C) a timely fashion for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) before a court of competent jurisdiction, a State prisoner under capital sentence waives the right to pursue habeas corpus review under section 2254 of this title, in the presence of counsel and after having been advised of the consequences of making the waiver.

"(c) If one of the conditions in subsection (b) has occurred, no Federal court thereafter shall have the authority to enter a stay of execution or grant relief in a capital case unless—

"(1) the basis for the stay and request for relief is a claim not previously presented in the State or Federal courts;

"(2) the failure to raise the claim—

"(A) was the result of State action in violation of the Constitution or laws of the United States;

"(B) was the result of a recognition by the Supreme Court of a new Federal right that is retroactively applicable; or

"(C) is due to the fact the claim is based on facts that could not have been discovered through the exercise of reasonable diligence in time to present the claim for State or Federal post-conviction review; and

"(3) the filing of any successive petition for a writ of habeas corpus is authorized by the appropriate court of appeals in accordance with section 2264(c).

**"§ 2263. Filing of habeas corpus petition; time requirements; tolling rules**

"(a) Any petition in capital cases for habeas corpus relief under section 2254 of this title must be filed in the appropriate district court not later than 90 days after the filing in the appropriate State court of record of an order issued in compliance with section 2261(c) of this title. The time requirements established by this section shall be tolled—

"(1) from the date that a petition for certiorari is filed in the Supreme Court until the date of final disposition of the petition if a State prisoner seeks review of a capital sentence that has been affirmed on direct appeal by the court of last resort of the State or has otherwise become final for State law purposes; and

"(2) during an additional period not to exceed 60 days, if counsel for the State prisoner—

"(A) moves for an extension of time in Federal district court that would have jurisdiction over the case upon the filing of a habeas corpus petition under section 2254 of this title; and

"(B) makes a showing of good cause for counsel's inability to file the habeas corpus petition within the 90-day period established by this section. A court that finds that good cause has been shown shall explain in writing the basis for such a finding.

"(b) A notice of appeal from a judgment of the district court in a claim under this chapter shall be filed within 20 days of the entry of judgment.

"(c) A petition for a writ of certiorari to the Supreme Court of the United States in a claim under this chapter shall be filed within 10 days of the issuance of the mandate by the court of appeals.

**"§ 2264. Evidentiary hearings; scope of Federal review; district court adjudication**

"(a) Whenever a State prisoner under a capital sentence files a petition for habeas corpus relief to which this chapter applies, the district court shall—

"(1) determine the sufficiency of the evidentiary record for habeas corpus review; and

"(2) conducted any requested evidentiary hearing necessary to complete the record for habeas corpus review.

"(b) Upon the development of a complete evidentiary record, the district court shall rule on the merits of the claims properly before it within the time limits established in section 2268 of this title.

"(c)(1) Except as provided in paragraph (2), a district court may not consider a successive claim under this chapter.

"(c)(2) A district court may only consider a successive claim under this chapter if the applicant seeks leave to file a successive petition in the appropriate court of appeals. A decision by the court of appeals to grant or deny leave to file a successive petition under this chpater shall not be reviewable in any court.

"(c)(3) In a case in which the appropriate court of appeals grants leave to file a successive petition, the time limits established by this chapter shall be applicable to all further proceedings under the successive petition.

**"§ 2265. Certificate of probable cause inapplicable**

"The requirements of a certificate of probable cause in order to appeal from the district court to the court of appeals does not apply to habeas corpus cases subject to this chapter except when a second or successive petition is filed.

**"§ 2266. Counsel in capital cases; trial and post-conviction standards**

"(a) A mechanism for the provision of counsel services to indigents sufficient to invoke the provisions of this chapter under section 2261(b) of this title shall provide for counsel to indigents charged with offenses for which capital punishment is sought and to indigents who have been sentenced to death and who seek appellate or collateral review in State court.

"(b)(1) In the case of an appointment made before trial, at least one attorney appointed under this chapter must have been admitted to practice in the court in which the prosecution is to be tried for not less than 5 years, and must have had not less than 3 years' experience in the trial of felony prosecutions in that court.

"(2) In the case of an appointment made after trial, at least one attorney appointed under this chapter must have been admitted to practice in the court of last resort of the State for not less than 5 years, and must have had not less than 3 years' experience in the handling of appeals in that State courts in felony cases.

"(3) Notwithstanding this subsection, a court, for good cause, may appoint another attorney whose background, knowledge, or experience would otherwise enable the attorney to properly represent the defendant, with due consideration of the seriousness of the possible penalty and the unique and complex nature of the litigation.

"(c) Upon a finding in ex parte proceedings that investigative, expert or other services are reasonably necessary for the representation of the defendant, whether in connection with issues relating to guilt or issues relating to sentence, the court shall authorize the defendant's attorney to obtain such services on behalf of the defendant and shall order the payment of fees and expenses therefor, under subsection (d). Upon finding that timely procurement of such services could not practicably await prior authorization, the court may authorize the provision of and payment of such services nunc pro tunc.

"(d) Notwithstanding the rates and maximum limits generally applicable to criminal cases and any other provision of law to the contrary, the court shall fix the compensation to be paid to an attorney appointed under this subsection and the fees and expenses to be paid for investigative, expert, and other reasonably necessary services authorized under subsection (c), at such rates or amounts as the court determines to be reasonably necessary to carry out the requirements of this subsection. A State court's determination of reasonable compensation, fees, and expenses shall not be reviewable in proceedings under this chapter or under section 2254 of this title, and any alleged insufficiency in compensation, fees, or expenses shall not be grounds for granting a writ of habeas corpus under this chapter or under section 2254 of this title, unless the court finds that the compensation, fees, and expenses awarded were so insufficient as to result in a denial of due process.

**"§ 2267. Law controlling in Federal habeas corpus proceedings; retroactively**

"In cases subject to this chapter, all claims shall be governed by the law as it was when the petitioner's sentence became final, supplemented by an interim change in the law, if the court determines, in light of the purpose to be served by the change, the extent of reliance on previous law by law enforcement authorities, and the effect on the administration of justice, that it would be just to give the prisoner the benefit of the interim change in the law.

**"§ 2268. Habeas corpus time requirements**

"(a) A Federal district court shall determine any petition for a writ of habeas corpus brought under this chapter within 110 days of filing.

"(b) The court of appeals shall hear and determine any appeal of the granting, denial, or partial denial of a petition for a writ of habeas corpus brought under this chapter within 90 days after the notice of appeal is filed.

"(c) The Supreme Court shall act on any petition for a writ of certiorari in a case brought under this chapter within 90 days after the petition is filed.

"(d) The Administrative Office of United States Courts shall report annually to Congress on the compliance by the courts with the time limits established in this section.".

(b) AMENDMENT TO TABLE OF CHAPTERS.—The table chapters for part IV of title 28, United States Code, is amended by inserting after the item for chapter 153 the following:

"154. Special habeas corpus procedures in capital cases, 2261".

(c) AMENDMENT TO SECTION 2254 OF TITLE 28.—Section 2254(c) of title 28, United States Code, is amended by—

(1) striking "An applicant" and inserting "(1) Except as provided in paragraph (2), an applicant";

(2) adding at the end thereof the following:

"(2) An applicant in a capital case shall be deemed to have exhausted the remedies available in the courts of the State when he has exhausted any right to direct appeal in the State.".

## INTERNATIONAL DATA IMPROVEMENT ACT

### MURKOWSKI AMENDMENT NO. 1664

(Ordered referred to the Committee on Commerce, Science, and Transportation.)

Mr. MURKOWSKI submitted an amendment intended to be proposed by him to the bill (S. 2516) to augment and improve the quality of international data compiled by the Bureau of Economic Analysis under the International Investment and Trade in Services Survey Act by allowing that agency to share statistical establishment list information compiled by the Bureau of the Census, and for other purposes, as follows:

On page 2, line 3, immediately before "Section" insert "(a)".

On page 2, between lines 15 and 16, insert the following:

(b) Section 5 of the International Investment and Trade in Services Survey Act of 1976 (22 U.S.C. 3104) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following:

"(d) COMMITTEE REVIEWS AND REPORTS.—

"(1) Notwithstanding any other provision of this section restricting disclosure of or access to information submitted under subsection (b)(2), the President, or the President's designee responsible for monitoring the impact of foreign investment in the United States and coordinating implementation of United States policy on such investment, is authorized to review any such information in order to evaluate, analyze, compare, or verify the nature and extent of foreign investment in the United States.

"(2) Authorized officials and employees designated by the President to perform functions under this subsection shall have access to and may obtain copies of, any information submitted pursuant to subsection (b)(2), including all records, documents, reports, books, papers, and other materials related thereto. Such access shall be granted promptly but not later than 5 days after a duly authorized official or employee has made a request therefor.

"(3) Except as provided in this subsection, an official or employee designated to perform functions under this subsection shall not disclose to any other person or organization any information, including any records, documents, reports, books, papers, and other materials related thereto, acquired during a review conducted pursuant to paragraph (1), that specifically identifies any person who finished information pursuant to subsection (b)(2). The President shall establish such procedures and safeguards that are necessary to prevent the unauthorized disclosure of this information. An official or employee designated to perform functions under this subsection may discuss any matter relating to such information with officials or employees designated to perform functions under the data collection program.

"(4) The President or the President's designee may submit a report to the Congress on any review conducted pursuant to paragraph (a), except that any such report shall not specifically identify any person who furnished information pursuant to subsection (b)(2). Nothing in this subsection shall prevent an official or employee designated to perform functions under this subsection from discussing the findings, conclusions, or recommendations of a draft or final report with a committee or subcommittee of the Congress.".

Mr. MURKOWSKI. Mr. President, I rise today to offer an amendment to S. 2516, the International Data Improvement Act. This bill was introduced by one of my own distinguished colleagues from Nebraska, Senator EXON, on April 25 of this year. It has since been referred to the Committee on Commerce, Science, and Transportation. It is one of several timely pieces of legislation to improve the sharing of data on foreign investment amongst our Government agencies.

Mr. President, last year I also introduced legislation to improve our system on foreign investment data sharing. The legislation I introduced, S. 856, allows for the sharing of data between the Census Bureau and the Bureau of Economic Analysis, or the BEA.

Senator EXON's legislation also does this, but my bill allows the Committee on Foreign Investment in the United States, CFIUS, access to data collected by the Bureau of Economic Analysis. That is the difference between our two bills.

Mr. President, I feel strongly that the legislation introduced by my colleague from Nebraska is not sufficient if CFIUS is not included in the sharing of BEA's disaggregated data. CFIUS is the interagency body designated by the President to monitor foreign investments in the United States, and to coordinate U.S. policy on such investments. So, I am offering an amendment to S. 2516 to include the Committee on Foreign Investment to include CFIUS in sharing of BEA data.

My colleague stated when introducing his bill that it represents what the Bush administration is willing to do on the matter. The argument raised by the administration, or those who support the administration position on the issue is that the confidential information which Census and BEA have cannot be protected if it is shared by CFIUS. The argument is advanced that if confidentiality cannot be guaranteed, then there will be a dampening effect on further foreign investment, an effect, we do not wish to generate.

In response, Mr. President, I think it would be useful to explain to my colleagues exactly who is on the Committee on Foreign Investment in the United States. At a hearing before the Subcommittee of Commerce, Consumer Protection, and Competitiveness of the Committee on Energy and Commerce in the House of Representatives held in March, Assistant Secretary of the Treasury for International Affairs Charles Dallara, described the membership of CFIUS:

CFIUS membership is the Secretary of the Treasury (Chair), the Secretary of State, the Secretary of Defense, the Attorney General, the Secretary of Commerce, Director of the Office of Management and Budget, the Chairman of the Council of Economic Advisers, and the United States Trade Representative.

I find it hard to believe that the confidentiality of information cannot be guaranteed by the Cabinet members who serve on CFIUS. I find it hard to believe that Secretary Brady's learning that a Japanese electronics conglomerate also happens to be an owner of an auto parts plant in the United States will discourage that Japanese company from investing in the United States.

I also find it hard to believe that the very body which oversees foreign investment should not be privy to information, the specific kind of information the Senator from Alaska feels the Government should have and evaluate. This is not all foreign investment but foreign government-controlled investment, and there is a difference.

Quite clearly, we have seen the action of Great Britain when the Government of Kuwait took a significant interest in the largest petroleum producer in Great Britain, British Petroleum. The British Monopolies Board investigated the case and found it was contrary to the national security interests of Great Britain that a foreign government, as opposed to a foreign private investor controlled a significant share of Great Britain's largest petroleum producing company.

My purpose in this legislation is to ensure that the appropriate agencies have knowledge when there is foreign government participation, foreign government loan guarantees, foreign government financing below market rates as opposed to the quite legitimate foreign investment which we all basically welcome in this country. But when there is a foreign government involved in a transaction for the specific purpose of obtaining a market share, I think relevant agencies ought to have access to the information and be able to respond if necessary with action. That is the purpose of this specific legislation which I think is in the administration's best interests.

I also find it hard to believe that the very body which oversees foreign investment should not be privy to this information. I am referring to the Exon-Florio provision of the Omnibus Trade Act of 1988 which gave the President or his designee the power to investigate and even prohibit foreign investment which may be contrary to the national security interests. The President's designee in this case is CFIUS.

The Senator from Alaska maintains that to have that knowledge, you have to be able to differentiate between foreign government investment and foreign private investment. I find it courious that my colleague who wrote the Exon-Florio provision would not make the responsible committee more efficient by having this information.

I would solicit my colleagues to review this information and consider supporting it.

## AUTHORITY FOR COMMITTEES TO MEET

### SUBCOMMITTEE ON MEDICARE AND LONG TERM CARE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Medicare and Long Term Care of the Committee on Finance be authorized to meet during the session of the Senate on May 18, 1990, at 9:30 a.m. to hold a hearing on recommendations for the Medicare volume performance standards [MVPS] for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

### COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Friday, May 18, at 10 a.m., for a hearing on "Improving Math and Science Education for America's Youth."

The PRESIDING OFFICER. Without objection, it is so ordered.

### COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Friday, May 18, 1990, at 10 a.m. to conduct a hearing on S. 2327 and H.R. 3848, Depository Institution Money Laundering Amendments of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. MITCHELL. Mr. President, the Committee on Veterans' Affairs would like to request unanimous consent to hold a hearing on compensation and pension (title I of S. 2100); insurance (title III of S. 2100); expansion of radiation presumptions (S. 2556); administrative reorganizations (S. 2102); and national cemeteries (S. 2482 and S. 2485); VA debt collection (S. 2615); and miscellaneous legislation (S. 1887, S. 2454, S. 2499) on Friday, May 18, 1990, at 9:30 a.m. in SR-418.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE SUPERFUND, OCEAN AND WATER PROTECTION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Superfund, Ocean and Water Protection, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Friday, May 18, beginning at 9:30 a.m., to conduct a markup of S. 203, the Ground Water Research and Education Act and, immediately following the markup, to conduct a hearing on pending legislation to require local educational agencies to conduct testing for radon contamination in schools, S. 1697—the Radon Testing for a Safe Schools Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### CUBA RECOGNIZES 88TH YEAR OF INDEPENDENCE FROM SPAIN

● Mr. MACK. Mr. President, this Sunday, May 20, the Cuban people wil recognize their 88th year of independence from Spain. This is usually a time for celebration and thanksgiving but Cuba's celebration will be empty and false because they have not yet achieved true independence and freedom.

Independence is when a government is controlled by the people not when the people are controlled by their government. Freedom is the most precious of man's God-given rights. Freedom is when one can be unrestricted in opinion, choice or action.

These are the American values which have made our nation the inspiration for people around the world struggling to achieve their own freedom and independence.

Just 90 miles from the southern tip of my home State of Florida lies an island ruled by a ruthless Communist dictator. Cuba, the Alcatraz of the Atlantic, remains in the hands of a Stalinist regime that ignores basic human rights and tortures individuals who cry out for the kind of God-given freedoms that we so easily take for granted.

I am confident the winds of freedom which have swept Europe and Latin America will reach a Cuba yearning for freedom from Castro's oppression.

Despite Castro's attempt to block TV and Radio Marti from bringing the message of freedom to Cuba, the Cuban people will always continue to foster hope.

The Cuban people have waited long enough for their nightmare to end. We in the United States, the land of freedom and independence, have the moral responsibility to support their yearning for freedom. Their day of freedom is near but unfortunately, it is not near enough.

Defending democracy and asserting the American values of liberty and constitutional government around the world are policies I support. I will never compromise my values and love of freedom and I will work to make sure the nation of Cuba will soon be free.

The Cuban people have a right to be heard and determine their form of government. We must stand firm behind the principle that democracy is the cornerstone of a free and open society.

Once again, I call on Castro to put his leadership to the test and find out whether Cubans really favor Communism. Since he took power 31 years ago, some 2 million Cubans have fled their homeland, voting against Castro with their feet. He knows if he allows Cubans to speak their mind, he will be out of power.

The message of freedom is the message of hope. I'm confident the people of Cuba will continue to have the hope that one day they will find freedom.

Who would have thought that this time last year we would have seen the tearing down of the Berlin Wall, the liberation of Eastern Europe and free elections in Nicaragua. Maybe next year we will see freedom in Cuba.

Even though the Cuban people will recognize their independence from Spain this Sunday, tragically, they must wait until they can celebrate their freedom from Castro and Communism. When that day comes the Cuban people will finally have true independence. I look forward to that day when we can welcome Cuba into the community of free nations.●

### PUBLIC IS—CORRECTLY—WARY ABOUT DECIMATING THE DEFENSE BUDGET

● Mr. BOSCHWITZ. Mr. President, the American public does not want the Congress to rush ahead with uncoordinated, irresponsible cuts in the defense budget.

The $30 billion in budget authority cuts proposed by the Budget Committee for next year will decimate our defense effort. I use the word "decimate" advisedly, in its original sense of "selecting at random and killing one of ten in a given group." The budget the majority forced through the Budget Committee cuts defense budget authority by 10 percent in a single year—with more cuts to come in future years. The budget cuts were simply presented and voted on without any significant discussion or consideration of their ramifications.

Not only are the cuts proposed by the Committee on the Budget irresponsible: They are also out of sync with the wishes of the American people.

The Gallup poll's recent national survey reveals that "most Americans are cautious about cutting too much from the defense budget too soon * * * close to eight in ten (78 percent) feel it is prudent to wait and see how things develop before making deep reductions in the Pentagon's budget."

I am sure that they would agree that if we maintain a properly funded defense budget now, the cuts in the future will be deeper than those contemplated by the committee, because the concessions we will be able to exact will be all the more significant. The American people realize, for example, that the deep defense cuts of the seventies only postponed the accomplishments of the past few years. If we had maintained our defense effort at that level, we simply would never have achieved the recent concessions at the negotiating table, and we would not have been on the verge of new, safer defense cuts in the future.

Mr. President, the Gallup poll's findings deserve the close attention of my colleagues and I ask that they be inserted in the RECORD at this point.

The material follows:

PUBLIC WARY ABOUT DEEP CUTS IN MILITARY SPENDING

(By Larry Hugick)

A recent Gallup Poll finds that most Americans are cautious about cutting too much from the defense budget too soon in response to events in Eastern Europe. Although roughly two-thirds (68 percent) believe the situation will eventually lead to large cuts in defense spending, close to eight in ten (78 percent) feel it is prudent to wait and see how things develop before making deep reductions in the Pentagon's budget.

Even among Democrats, only 10 percent favor immediate action to scale back the defense budget significantly.

SENTIMENT FOR CUTTING DEFENSE HIGHEST SINCE VIETNAM ERA

Sentiment for cutting military spending is as great as it has been at any time since the latter stages of U.S. involvement in Vietnam. Today, 50 percent of Americans feel that defense spending is too high, while only 10 percent feel it is too low.

Since the mid-1980s, a plurality of Americans have felt that we are overspending on defense. One must look back to 1971, however, to find the last time that that plurality reached 50 percent in the Gallup Poll. The

belief then that the defense budget should be cut was associated with a growing perception that the United States should get out of Vietnam.

In the past decade, when Americans thought about the biggest threat to the country's future, fear of war with the Soviet Union gave way to concern about economic competition from Japan and other countries.

In the context of events in Eastern Europe, U.S. military power seems less critical than it did in the past. Since 1984, the percentage who believe that building the strongest military force in the world is very important to our nation's future has declined from 45 percent to 36 percent. Over the same period, the percentage who say it is very important to develop the best educational system in the world—often cited as a key to solving our competitiveness problems—has increased from 82 percent to 91 percent.

Opinion about the necessity of military superiority to our country's future strength varies along generational lines. While close to half (45 percent) of adults over fifty years of age believe it is very important to be the strongest military power, fewer than a third (30 percent) of those under fifty—the post-World War II generation—share this opinion.

### MANY CONCERNED ABOUT EFFECTS OF CUTS ON NATIONAL SECURITY, ECONOMY

Americans look to the post-Cold War era and what some have called the "peace economy" with mixed feelings. Despite the shift in attitudes toward the Soviet Union in recent years, reduced fear of a military conflict has not yet resulted in the perception that our country is stronger militarily than it needs to be. About two-thirds (64 percent) of Americans say that our defense capabilities are adequate, but not excessive, to meet our needs. And people are as likely to say our defenses are not strong enough (17 percent) as they are to say our defenses are overly strong (15 percent).

Almost three-fourths (73 percent) of adults say they would be be very or somewhat concerned that our national security would become threatened if defense spending were greatly reduced.

As many as one-third (33 percent) of adults and 40 percent of those age fifty or older say they would be very concerned about or national security under such circumstances.

The fear that sharp cuts in defense would threaten our security is highest in the South.

In addition to uneasiness that a scaled-down defense might leave us vulnerable, there is a lack of consensus about how our economy might be affected by military spending cuts. A larger percentage of Americans think that sharp reductions would hurt (35 percent) rather than help (28 percent) the national economy. Another 30 percent don't feel the economy would be affected much one way or the other.

Roughly a fourth (27 percent) expect large defense-spending reductions to have a negative impact on their local economy; only half as many (13 percent) say lower levels of military spending would be good for the local economy. In the western states, where the defense industry has played a major role in the postwar era, as many as a third (33 percent) express concern about possible negative economic fallout locally. By contrast, only about a fifth (20 percent) of Midwesterners see their local economy being hurt by defense cutbacks.

One-fourth (25 percent) of Americans feel that their own family's financial situation might be affected by a shrinking defense budget. People are about as likely to say they would be helped (12 percent), however, as they are to say they would be hurt (13 percent). Despite the regional patterns observed for expectations about effects on the local economy, there are no significant differences by region in expectations about effects on family finances.

### PUBLIC FAVORS REDUCING U.S. TROOPS IN EUROPE

While cautious about the situation in Eastern Europe and the effect it should have on our defense budget, a clear majority of the public (57 percent) supports reducing the number of U.S. troops in Europe. Roughly a third (34 percent) disapprove of making any reductions at this time.

The idea of troop cuts wins the support of a majority in all age groups, political party affiliations and regions of the country. Withdrawal is particularly attractive to college graduates, 72 percent of whom favor bringing some U.S. troops home from Europe. Among the groups less supportive of the idea are non-whites (47 percent).

### PUBLIC WANTS PEACE DIVIDEND TO GO TOWARD SOCIAL SPENDING

While President Bush seems to be enjoying much of the political benefits of being in office during this period of change, his Democratic opposition could make some political gains as well. The public's appetite for new social spending, a traditional Democratic theme, may increase as the perception builds that a reduced defense burden will result in more money for other government programs.

When asked how the U.S. should spend the "peace dividend"—financial resources that can be diverted from defense to other areas—opinion breaks 62 percent to 27 percent in favor or using the money for social spending such as aid to the homeless, the war against drugs, and public education, rather than for reducing the federal budget deficit.

Democrats in the poll split 68 percent to 18 percent in support of spending more on social problems. Independents are only slightly less solid in the view (62 percent to 26 percent). A majority of Republicans (55 percent) agree with the social spending option, but those identifying with the GOP are significantly more likely than others to prefer the deficit reduction option (35 percent).

There is much discussion as to the amount of money the government in Washington should spend for national defense and military purposes. How do you feel about this? Do you think we are spending too little, about the right amount, or too much?

[In percent]

| | Too little | Right amount | Too much | No opinion |
|---|---|---|---|---|
| 1990 | 9 | 36 | 50 | 5 |
| 1987 | 14 | 36 | 44 | 6 |

## MEETING OF PRUNSKIENE AND GORBACHEV

● Mr. RIEGLE. Mr. President, for the last 2 months, as Lithuania and its fellow Baltic republics of Latvia and Estonia have declared the restoration of independence, I have called on the administration to raise the issue of Baltic independence with the Soviet Government on several occasions. But, as the Soviets tightened their grip of economic coercion on Lithuania and condemned the independence movements in Latvia and Estonia, President Bush has looked the other way.

Finally, after months of acquiescence, Secretary Baker, in Moscow this week for pre-summit negotiations with Soviet President Gorbachev and Foreign Minister Schevardnaze, elevated Baltic independence to its rightful place among American foreign policy priorities. Only one day after Baker's warning to the Soviets that further delays in negotiations would have a cooling effect on the warming trend in United States-Soviet relations, President Gorbachev met with Lithuanian Prime Minister Prunskiene in the first talks between leaders of the two governments.

Underlying Gorbachev's decision to meet with Prunskiene was undoubtedly Lithuania's unselfish and peaceminded offer to suspend laws implementing its independence declaration. Still, the coincidence of Baker's raising the Baltic issue as a potential stumbling block to better American-Soviet relations and Moscow's decision to meet with Prunskiene is too strong

to be ignored. The connection between continued pressure by the American Government and progress toward Baltic self-determination is plain and unmistakable.

Mr. President, I urge the administration to persevere in its efforts to convince the Soviet Government to expand the good-faith talks between Gorbachev and Prunskiene into full, bilateral negotiations on Lithuanian independence between Vilnius and Moscow. Rather than rewarding the Soviets for their aggressive behavior in the Baltic states, the United States must continually make clear that continued delays in talks on Baltic independence will have a negative impact upon United States-Soviet relations.●

## STUART EIZENSTAT: ISRAEL MUST REFORM ITS ECONOMY

● Mr. BOSCHWITZ. Mr. President, Israel is on the verge of a great transformation. The waves of Soviet immigrants now arriving there, fully motivated to improve their place in life, have the potential to reinvigorate a stalled economy. With the Russians vastly enriching the current mix of native Israelis and other immigrants, Israel now has one of the most highly skilled and innovative work forces to be found anywhere in the world.

But it the Soviet immigrants' potential to help Israel prosper is to be realized, the way has to be cleared to allow their spirit of enterprise to flourish—not to speak of that same spirit of the Israelis themselves. This means that Israel's barriers to economic activity have to be lifted.

Israel's leaders need to make some hard choices about the way its economy is governed. They have to deregulate, lower taxes, bust cartels and monopolies, encourage competition, loosen controls on the flow of capital as well as on land use, and sell off state enterprises.

These are not mere theoretical concerns: if the Israeli economy is ever to begin the job of absorbing the new immigrants, much must be done in the very near term to make the housing and industrial sectors more efficient. Once a beginning is made, however, I have little doubt that the Russian immigrants will become self-sustaining, fully contributing members of Israeli society. Having seen the failure of perhaps the most centralized, bureaucratized regime known to man, I am sure that the immigrants from the Soviet Union will provide impetus to move the Israeli society away from that model and toward a freer economy.

Finally, Mr. President, I should add that in addition to changes in the economy, there will have to be changes in the Israeli political system to make it more responsible to the overall national interest and less responsive to the views of tiny fractions of the electorate.

My friend Stuart Eizenstat has some experience in making the kind of hard economic choices I alluded to earlier. Stu advised President Carter on the difficult process of deregulating the Nation's economy—a prelude to the more extensive deregulation that helped cause our economy to boom during the Reagan and Bush years. A keen observer of the Israeli scene, he has written an admirable prescription for the Israeli economy that recently appeared in the Wall Street Journal—Europe. Mr. President, I ask that the article be inserted at this point in the RECORD.

The article follows:

[From the Wall Street Journal Europe, Apr. 3, 1990]

### HOW TO REFORM THE ISRAELI ECONOMY

(By Stuart E. Eizenstat)

When Israel's economy was near the precipice in 1985, with 400% inflation and dangerously low foreign reserves, Secretary of State Shultz personally intervened to urge additional economic help and to provide advice.

Tariffs were reduced and a U.S.-Israel Free Trade Agreement was implemented. The Israeli government's sole control over credit markets was ended, food and transportation subsidies were phased out and the government stopped bailing out failing institutions and undertaking projects beyond Israel's financial capacities, such as the Lavi fighter plane.

It worked. Budget deficits were reduced from 15% of GNP to 1% to 2%. Inflation dropped to around 16%.

Today, Israel faces the enormous challenge of a sudden inrush of Soviet Jews. It needs to take an even harder step: changing its highly bureaucratized, monopolistic, cartelized economy into a more Western-oriented free market system while maintaining the best of its social welfare state. The Bush administration should take the same interest now that the Reagan administration took five years ago to help Israel effectively use the badly needed special U.S. assistance I hope will be forthcoming.

The first 25 years of Israel's rebirth as a modern state, its nation-building phase, were little short of remarkable. Its population tripled and growth rates averaged over 9% in real terms from 1960 to 1973 with single-digit rates of inflation. A modern infrastructure of roads, sewage systems, and communications was developed and swamps were converted into magnificent, lush valleys. A sophisticated military was established.

But after the Yom Kippur war and OPEC oil embargo of 1973, the economy lurched sideways. In the last five years, growth has barely equaled that of mature nations, such as the United States.

#### AN UNUSUAL ECONOMY

For sure, the huge growth in defense expenditures after 1973—although financed in large part by massive loans from the U.S. Government—contributed to Israel's woes. Its foreign debt and defense expenditures account for over 60% of its budget.

But, it became clear from a recent conference in Israel sponsored by the Israel Center for Social and Economic Progress that something more fundamental is the biggest barrier to the successful integration of Soviet Jews. Israel has failed to move from its early nation-building phase—when heavy state involvement and limited competition may have been essential—to a modern, liberalized economy. It has developed a unique, partly-managed, partly-free market, partly-socialist set of institutions which make up one of the most unusual two-tiered economies in the world.

At one level Israel has developed world-class products and technologies. It has produced bio-medical breakthroughs and a space satellite. But there is a third-world quality to some parts of the economy. The Histadrut is both a labor union to which an overwhelming percentage of Israel's salaried workers belong and one of the country's largest employers. It is the owner of debt-ridden enterprises.

One of every three Israeli workers is employed by the government, compared to one in five 20 years ago. A stultifying bureaucracy inflicts regulations a Talmudic scholar would have difficulty understanding, blocking the natural entrepreneurial spirit of the people. An explosion in transfer payments has created a modern welfare state, but with an income base which can barely afford it. Taxes are high and have a patchwork quality.

A dramatic increase in housing and jobs is critically necessary to absorb the Soviet Jews arriving each week, but housing exemplifies the rigidity of the economy. Last year only about 20,000 dwellings were built compared to two-and-a-half times that amount in 1974. Roughly 50,000 units will be necessary to accommodate new immigrants this year. It takes an unbelievable 22 to 27 months on the average to construct an apartment building. A permit for even minor changes in plans can take months or years to obtain. An Israeli paper recently published a full-page spread of licensing and permitting agencies. It looks like an organizational chart of the Pentagon.

The price of an acre of land in the Tel Aviv area rivals that of downtown Washington, D.C. That's because the Israel Land Authority and other public bodies own over 90% of the country's land. The Land Authority never sells its property—which in Zionist ideology is God's gift for the people—but leases it for 49 years with a 49-year option. It is extraordinarily parsimonious. It rarely "tenders" land for lease, creating a pent-up demand and artifically inflating real-estate and home values. The Mayor of Maalot, Shlomot Buchbut, called it "Mission Impossible" to get land from the Land Authority. David Lewis who has virtually remade the hotel industry in Eilat, had to wait two years to get land to construct housing for the new workers brought in to service his new hotels—and then got enough for only two-thirds of the units needed.

As if excessive licensing and extraordinarily high land costs were not enough, the costs of construction for housing, and everything else, skyrocket because the basic materials are suppplied by state sanctioned monopolies or cartels. Developers cannot shop around because cartel members protect each other's high prices. Import permits are stricly limited. In the mid-1970s, Nesher, the chief producer of cement, crushed an Israeli importer's effort to import Romanian cement by dramatically raising the price of cement domestically and then dropping it precipitously. There have been virtually no imports of cement since.

Between 20% and 30% of the business sector is controlled by monopolies and cartels. Medieval-style professional guilds in

law, architecture, engineering and accounting set fees. It is difficult to leave your accountant without his permission. Agricultural marketing boards limit price competition in fruit and vegetables. There are scores of state-owned enterprises.

Meryl Jaffe, a young American female entrepreneur with an American Ivy League degree, recently came to Israel and wants to import books from the U.S. to start a book business. She faced taxes on investment capital raised abroad and government-set exchange rates which bear little relationship to true currency values. Government-supported importers make it virtually impossible for people like Meryl Jaffe to compete.

MOVING ISRAEL FORWARD

Hopes for a successful Soviet Jewish absorption rest significantly on a rapid movement to a more deregulated competitive economy:

Red tape and bureaucratic delay must be eliminated. As the mayor of the development town of Migdal Haemek, Shaul Amor, put it, there is a need for "perestroika in the bureaucracy." There should be a freeze on government employment so that the percentage of government workers in the economy is reduced.

State-owned enterprises should be privatized except in areas essential to national security, like the aircraft industry.

Monopolies, cartels, and limits on import licenses should end so that the fresh air of competition can invigorate the Israeli economy.

The Israel Land Authority should tender all the land under its control over a three-year period.

Indexing of wages, prices, and interest rates, which perpetuates inflation, should be phased-out.

As the United States did in 1986, the tax base should be broadened, exemptions reduced, and tax rates lowered.

The government should continue its progress in removing its control over capital markets by gradually moving to a more flexible, market-oriented exchange rate for the Israeli shekel.

A private secondary mortgage market institution, like the Federal National Mortgage Association in the U.S., should be created to encourage investment in housing.

In a small country like Israel with huge defense, social, and absorption challenges, there is still an important role for government in providing social services, job training, incentives for affordable housing, and infrastructure in areas like the Negev and the Galilee. But the Israeli government's biggest challenge is to remove itself from economic management.

Israel is a land of miracles in which seemingly insurmountable odds are regularly overcome. Yet another miracle—an economic one—will be needed if the historic movement of Soviet Jews to the Jewish homeland is to be successful.

(Mr. Eizenstat, A Washington lawyer, was President Carter's Chief domestic policy adviser. He recently returned from a visit to Israel sponsored by the Israel Center for Social and Economic Progress.)●

## EXECUTIVE SESSION

### NOMINATION OF RICHARD G. AUSTIN TO BE ADMINISTRATOR OF GENERAL SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the executive session to the consider the following nomination: Calendar Order No. 771, Richard G. Austin to be Administrator of General Services; further, that the nominee be confirmed; that any statements appear in the RECORD as if read; that the motion to reconsider be laid upon the table; and that the President be immediately notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination was considered and confirmed as follows:

GENERAL SERVICES ADMINISTRATION

Richard G. Austin, of Illinois, to be Administrator of General Services.

STATEMENTS ON THE NOMINATION OF RICHARD AUSTIN

Mr. GLENN. Mr. President, I would like to say a few words regarding the nomination of Richard Grant Austin to be Administrator of the General Services Administration [GSA].

GSA may not be a very high-profile agency. But I consider it to be a vital one in the operation, management, and administration of the Federal Government. For GSA manages several billion dollars each year in Government contracts for goods and services, along with all Federal real estate holdings. It sets Federal policy with all Federal real estate holdings. It sets Federal policy in the areas of communications, data processing, building leasing and construction, information resources management, and Government travel.

The next GSA Administrator will head a staff of over 18,000 people with a yearly internal budget of almost $9 billion. But despite the efforts of many fine employees, GSA's image, according to a recent GAO report on GSA management, has often been unfavorable.

The GAO report cited many structural and operational deficiencies which can be addressed with the proper attention and resources. However, the most glaring problems at GSA relate to leadership. Frequent political turnovers, poor interaction between political appointees and career executives, and a lack of involvement by career personnel in the planning process are among the primary factors cited by GAO which have inhibited effective leadership, increased staff turnover, and lowered employee morale.

Today, GSA stands at the crossroads. A multitude of problems, some of which have been festering for years, have come to the forefront. They threaten not only to undermine GSA's present mission, but also compromise its ability to prepare for and meet the challenges of the coming century.

That is precisely the reason why the Committee on Governmental Affairs, which I chair, took a very hard and long look at Mr. Austin. What GSA needs most is strong, effective, and professional leadership. And that must start at the top.

Now, there were some people who contacted the committee to ask "What was taking so long?", or "Why don't you just confirm the guy?", or "Don't you know there are some major contract decisions needing to be made?" Well, given GSA's history, I didn't want to confirm someone just for the sake of having an administrator. I wanted someone whom I felt sure was qualified for the job, and deserved the consent and approval of this body. That is why the committee's confirmation and investigative process was so lengthy and extensive.

Indeed, issues surrounding Mr. Austin's past GSA performance which were examined in both of the committee's hearings, caused me some concern, particularly his handling of the Paul Cation matter. In addition, I had some misgivings not only over the growth of political appointees at GSA while Mr. Austin has served as Acting Administrator, but their quality as well.

I have raised these and other specific issues in private meetings with White House officials and with the nominee directly.

Based on these discussions, the hearing record, and assurances received from Mr. Austin, give Mr. Austin the benefit of some doubt and vote for his confirmation. I do not because of two primary reasons.

First, while Mr. Austin displayed poor judgment in his hiring and retention of Paul Cation, I have his assurances and his word that this was a one-time mistake, which shall not be repeated on his GSA watch. The bottom line here, in my opinion, is that this one incident, by itself, does not represent a flaw so serious as to preclude confirmation.

Second, I also give weight to the fact Mr. Austin has been acting GSA Administrator for over 18 months, has experience, and possesses a working knowledge of the agency's operations. His responses to my substantive questions indicated to me his awareness of the issues and his commitment to both address longstanding problems and meet the challenges facing GSA.

Further, I have received certain assurances and commitments from the nominee, described as follows, which have satisfied my particular concerns.

The nominee has pledged that, during his tenure, he will not exceed

60 total political employees—Schedule C and noncareer SES personnel—within GSA at any one time, and that positions will be established only where needed for the efficient operation of GSA.

In response to questions arising from the Cation Case, the nominee has also instituted procedures within GSA to terminate any employee convicted of a felony. Further, GSA employees under investigation for these types of offenses will now be placed on administrative leave until the matter is resolved.

I feel that Mr. Austin's assurances represent a good-faith commitment to work with the committee and the Senate, and will help to ensure that GSA operates in a competent, efficient, and professional manner.

On that basis, and with these specific commitments, I am ready to proceed to confirm Mr. Austin and look forward to working with him in the years ahead.

Mr. WARNER. Mr. President, I am delighted to have today the opportunity to vote to confirm Richard G. Austin to be Administrator of General Services at the U.S. General Services Administration [GSA].

I know that my colleagues will agree that President Bush made a fine choice when he selected Dick for this position. Dick's performance during his tenure as Acting Administrator has proven the wisdom of the President's choice.

As my colleagues know, Dick Austin has held the post of Acting Administrator since September 1988, while continuing to hold the post of Deputy Administrator at GSA.

President Bush formally transmitted Dick Austin's nomination to the Senate in October 1989, yet, due to the early adjournment of the first session of the 101st Congress, there was not sufficient opportunity for the Senate to proceed with confirmation at that time.

Once the Congress reconvened in 1990, the Senate Governmental Affairs Committee set about its confirmation process. That process, I am happy to say, culminated last Tuesday, May 8, 1990, with the unanimous 11-to-0 vote to favorably report Dick's nomination to the full Senate for confirmation.

Mr. President, in the 20 months since Dick has been at the helm of GSA, I have worked with him on a number of matters of considerable importance to the Nation and to the Commonwealth of Virginia. I have been very impressed with the GSA under Dick's leadership, as we have worked and continue to work together in my capacity as the ranking Republican on the Senate Armed Services Committee on the renovation of the Pentagon, implementation of the base closures and realignments mandated by the Congress, and securing new, modern space for the Department of the Navy.

This last item is one very near and dear to me, Mr. President, given the role I played in bringing the Navy into northern Virginia some 20 years ago. Moving the Navy to new quarters could not be in better hands than those now in charge of GSA and the U.S. Navy [USN]. I have every confidence that working together, we—Dick Austin, the Navy, northern Virginia's local elected officials and its congressional delegation—can achieve a resolution of the outstanding issues involved in the acquisition of a new home for the Navy.

Mr. President, the responsibility borne by the Administrator of General Services is of utmost importance to those of us who represent large numbers of Federal employees, particularly in the National Capital region. The productivity of each of this area's hundreds of thousands of Federal employees rests in large part upon the GSA's ability to provide a healthy, safe, and comfortable environment in which to work. Dick Austin is the kind of administrator to see to it that that challenge is met. I have no doubt that, once confirmed by the Senate, Dick Austin will be an even greater advocate for effective and efficient government.

Mr. President, I am proud to support the confirmation of Richard G. Austin to be Administrator of General Services. I urge my colleagues to confirm Mr. Austin to this important post without delay.

Mr. FORD. Mr. President, I would like to take a moment and speak on behalf of Richard G. Austin to be Administrator of the General Services Administration [GSA].

For the past 20 months that Dick Austin has been Acting Administrator of GSA, he has proven himself to be a capable administrator. I know this firsthand. My office and the GSA under Dick Austin have worked together on a project to convert the city post office here in Washington, DC, into office space for both executive branch and Senate tenants. This project had run into a number of impediments. As a result of Dick's direct involvement, these obstacles were overcome. His effectiveness in working with Senator STEVENS and me on this project made our success possible.

In addition, in my capacity as chairman of the Committee on Rules and Administration, I am aware of the support services that the GSA provides to Senators' home State offices. Working through the office of the Senate Sergeant at Arms, the GSA under Mr. Austin has been very responsive to the needs of Congress. I have no doubt that, once confirmed by the Senate, Mr. Austin will continue to be responsive.

Mr. President, I am pleased to support the confirmation of Mr. Austin to be Administrator of GSA, and I urge my colleagues to support his confirmation.

Mr. MOYNIHAN. Mr. President, I am pleased to support the nomination of Mr. Richard G. Austin for the post of Administrator of the U.S. General Services Administration [GSA]. The Committee on Governmental Affairs unanimously supported Mr. Austin's nomination.

Dick Austin has held the post of Acting Administrator since September 1988. As chairman of the Environmental and Public Works Subcommittee on Water Resources, Transportation, and Infrastructure, I have had the opportunity to work with Mr. Austin during the 20 months he has held the top job at GSA. He has testified before my subcommittee on one of the little noticed, but very important issues facing Government—the acquisition of Government buildings. The administration has recently proposed one of the largest Government building programs ever—21 buildings at a cost of nearly $3 billion. This ambitious plan will provide the Federal Government with much-needed space for its agencies and avoid the waste of leasing the Government's long-term space requirements. Mr. Austin and I share the view that increased Government ownership of space is the most cost-efficient method to house the Government.

In working with Mr. Austin on this program, I have found him to be a dedicated and hard-working individual intent on producing a more efficient and effective Government building program. I have no doubt that if confirmed by this body, Dick Austin will continue such efforts.

Ms. MIKULSKI. Mr. President, I rise today in support of the nomination of Richard G. Austin to be the Administrator of the U.S. General Services Administration [GSA].

GSA has been in the forefront of one of the most compelling issues facing the American work force today, that of ensuring access to quality child care. I believe it is highly appropriate for the Federal Government to lead the way in setting an example for employer involvement in child care. I commend Mr. Austin for his efforts in this area.

During his 20 months as Acting Administrator of GSA, Mr. Austin has actively promoted GSA's involvement in providing child care for Federal employees. GSA's child care initiatives have resulted in the establishment of 65 centers that are operating in GSA-controlled space. These centers serve over 3,205 children, with approximately 2,300 being children of Federal employees. An additional 48 centers are

at various stages in the planning process.

Under Richard Austin's direction, GSA is expanding the scope of its involvement beyond the design and construction of child care centers. This past February, Mr. Austin established the office of child care and development programs within GSA to assist new and existing centers to operate more efficiently and to meet the wide-ranging needs of today's families.

In addition, Mr. Austin is currently organizing an initial training conference for July 1990 that will bring directors, staff, board members of GSA-housed centers, GSA regional child care coordinators, and Federal agency contacts together to learn what each can do to improve the availability, affordability and quality of child care in Federal facilities.

I support Mr. Austin's efforts, and I look forward to working with him to continue expanding the availability of child care services for Federal employees. I urge my colleagues to confirm him as Administrator of General Services so that he may continue his good work in this area.

Mr. BOSCHWITZ. Mr. President, I am pleased to rise today to express support for Mr. Richard G. Austin to be the Administrator of the U.S. General Services Administration [GSA].

I believe that President Bush made a fine selection. Dick's performance as Acting Administrator has demonstrated that he is most equipped to handle this important position. Dick Austin has held the post of Acting Administrator since September 1988, and prior to that was GSA's Regional Administrator in Chicago. He brings with him an operational perspective that is vital to managing an organization as diverse as GSA.

Mr. President, I have worked with Dick Austin both in his capacity as Regional Administrator and as Acting Administrator, most recently on the development of a new courthouse for Minneapolis, MN. I know Dick to be resourceful and capable, and I am confident that upon confirmation by the Senate, he will be even more effective and efficient as the leader of GSA.

Mr. President, I am proud to support the confirmation of Richard G. Austin to be Administrator of General Services. I urge my colleagues to confirm him as Administrator of General Services.

Mr. SYMMS. Mr. President, I am pleased to rise today to support Mr. Richard G. Austin to be the Administrator of the U.S. General Services Administration [GSA].

In my position as the ranking Republican on the Senate Environment and Public Works Subcommittee on Water Resources, Transportation and Infrastructure, I have had the opportunity to work with Dick Austin and with our chairman, the Senator from New York [Mr. MOYNIHAN], on a wide range of issues.

Mr. Austin has proven himself to be an able administrator over the past 20 months that he has served as the Acting Administrator of GSA. He has also proven that President Bush made a fine decision in selecting him for this post, as I am sure my colleagues will agree.

Dick Austin has held the post of Acting Administrator since September 1988. President Bush formally transmitted Dick's nomination to the Senate in October 1989. Unfortunately, there was not sufficient time for the Senate to proceed with confirmation at that time.

However, the Senate Governmental Affairs Committee continued Dick's confirmation process, and on Tuesday last, May 8, voted unanimously to report Dick's nomination to the full Senate for confirmation.

It is important that the Federal agency which is tasked with so many of the Government's administrative duties is in the hands of a person of the caliber and the expertise of Dick Austin.

Mr. President, I am pleased to support the President's nomination of Richard G. Austin to be Administrator of General Services. I urge my colleagues to confirm Mr. Austin to this important post without delay.

## LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

## CORRECTING THE ENGROSSMENT OF SENATE CONCURRENT RESOLUTION 133

Mr. MITCHELL. Mr. President, I ask unanimous consent that in the engrossment of Senate Concurrent Resolution 133, the year "1989" be stricken and the year "1990" be substituted therefor.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I understand that Senators DECONCINI and CRANSTON wish to be recognized to address the Senate.

I ask unanimous consent that Senator DECONCINI and Senator CRANSTON be recognized to address the Senate and that at the conclusion of their remarks the Senate stand in recess under the order until 1 p.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona [Mr. DECONCINI].

## DRAFT SOVIET EMIGRATION REFORM LEGISLATION

Mr. DECONCINI. Mr. President, I have just learned that the Soviet Parliament has finally issued a revised version of new draft emigration legislation which takes into account many Western and Soviet citizens' concerns about the right of the Soviet peoples to freedom of movement. As chairman of the Helsinki Commission, I have followed the issue of Soviet emigration closely and have been encouraged by the changes which have taken place over the past few years.

I am particularly encouraged by the general thrust of this proposed emigration reform legislation. I do, however, have one serious reservation about which Cochairman STENY HOYER and I have just cabled Ivan Laptev, Chairman of the Council of the Union of the U.S.S.R. Supreme Soviet asking for a clarification. I refer to paragraph 1 under article 7 of the draft which states and I quote:

> Grounds on which foreign travel can be refused* * *
>
> (1) For reasons concerning the state security of the USSR until these reasons shall cease to exist;

Congressman HOYER and I are concerned, Mr. President, because this statement does not define what these reasons might be. In addition, it places no time limit on the denial period. In the next section, article 8, it is clearly stated that citizens possessing State secrets cannot be denied travel abroad for more than 5 years. The language of article 7, however, provides Soviet authorities with an open-ended avenue for denying Soviet citizens permission to emigrate. Article 7, as currently drafted, appears to take us back to square one regarding the central issue of visa denials.

I hope, therefore, that Chairman Laptev will provide us with a prompt and complete explanation for this apparently serious loophole in the proposed emigration law prior to formal codification currently scheduled for the end of May. Quite frankly, I am sick and tired of the behind-the-scene shenanigans of those who are trying to derail this nomination. Venal and vindictive attempts to destroy Jon's reputation are unworthy of this body. I hope and trust they will stop and that this nomination will move forward expeditiously.

## JON STEINBERG

Mr. DECONCINI. Mr. President, on another subject, I want to speak for just a few minutes. There have been some negative articles, I am sorry to say, on the nomination of Jon Steinberg for a judgeship on the new Court of Veterans Appeals. Having worked intimately with Jon over the past 13 years, this Senator thinks the time has

come to tell this body of the exceptional abilities that he possesses.

I can think of no person who is more conversant with both the issues and the laws affecting our Nation's veterans. I can think of no person who is more dedicated to ensuring that veterans receive the benefits to which they are entitled. I can think of no person with whom I have worked on the hill here who has been more helpful to this Senator in ensuring that Arizona veterans are fairly treated under the existing veterans benefits system.

Over the course of the past 13 years, I have come to respect Jon's enormous intellectual abilities and his love for the law. The combination of Jon's abilities and long professional experience in the area of veterans affairs makes him an ideal person to fill the position for which he has been nominated. I compliment Secretary Derwinski for making this recommendation to the White House, and I compliment the President for choosing someone of this character and ability.

I am very saddened and I am tired of what I consider to be the behind-the-scenes shenanigans of those who may be trying to derail this nomination. Venal and vindictive attempts to destroy Jon's reputation are unworthy. I do not know where they come from, but they continue to appear in the press. I think it is most unfortunate.

Jon has worked, I am advised, on veterans' issues for almost 20 years. He is a veteran, indeed, of this body. He has been tireless. He has bent over backwards on many occasions to assist with this Senator's needs. I know he has done the same for many other Senators.

The distinguished chairman of that committee has just come in and we will hear from him just how important Jon has been to the entire committee.

This Senator personally knows of occasions on which Jon has taken the time to call the Director, to talk to veterans groups in my State.

So, it is with a great deal of pride and pleasure on my part to see his name before the Senate Veterans' Affairs Committee for confirmation. But I am very saddened to see derogatory remarks about him and what appear to be some efforts to send this nomination back.

This would be a tragedy, not only to the system but to Veterans' Administration and the court he would serve on because he is so suited for it.

I yield the floor.

The PRESIDING OFFICER. The Senator from California [Mr. CRANSTON].

## JON STEINBERG

Mr. CRANSTON. I first want to thank Mr. DECONCINI, the ranking majority member on the Veterans' Affairs Committee, for remarks he just made about Jon Steinberg and the situation swirling around him. Jon Steinberg was one of the first people I employed when I came to the Senate over 21 years ago. I think it is one of the wisest personnel choices I ever made.

He has been responsible for veterans affairs ever since. He has been the principal staffer in the Senate on veterans matters. He is presently the chief counsel of the Veterans' Affairs Committee.

I believe that he knows more about veterans' law and more about veterans' needs, more about veterans' problems, as they relate to the law under Government programs, than any other person, not only in Washington, but in the entire country. He is brilliant. He is a very, very fine attorney. He would make a marvelous judge.

He served as a clerk to then-Judge Warren Burger of the U.S. Court of Appeals for the D.C. Circuit, who later served as Chief Justice of the United States. He served as the Deputy General Counsel of the Peace Corps with Sergeant Shriver in the Kennedy days. He has a quite remarkable background. He would be a truly great judge with total understanding of the law and compassion for those who become embroiled in its processes.

I have looked at all the documents that are available at the time a nomination is submitted to the Senate, as Jon Steinberg's was a few days ago. There is absolutely nothing in any of those documents that would cause anyone to have any doubts about the wisdom of the nomination. It was delayed almost endlessly for rather mysterious and unknown reasons. Eventually, it was submitted just a few days ago.

Then a rumor yesterday that it was about to be withdrawn, and there was some evidence that that was under consideration at the White House. I think there is no doubt about the fact that it was.

The law provides that the new Court of Veterans Appeals, on which Jon Steinberg has been nominated to serve, will be almost evenly divided as to its membership between nominees emanating from the Democratic Party and the Republican Party, and no one party is supposed to have more than a one-member advantage over the other party.

Thus, Jon Steinberg is a Democratic nominee. I would certainly consider it a very unfriendly act, and an intolerable act, if the nomination were withdrawn at this time, for no apparent reason that relates to Jon Steinberg.

My impression is that he is caught up in some other affair that has no relationship to him, no relationship to me, no relationship to veterans' affairs. I do not understand the situation, and I have been unable to ascertain exactly why there is difficulty, but I have been told that it does not relate to the qualifications of Jon Steinberg. His qualifications are great.

It is unfortunate that this situation leads to speculation in the press and some statements in the press that cast some aspersions on Jon Steinberg. He is an outstanding public servant. He will be an outstanding member of the bench. I think he is highly qualified to serve in even higher posts than the one for which he has been nominated, such as on the Federal bench in just about, I would say, any capacity.

I trust the nomination will not be withdrawn by the White House. I know that there is overwhelming support for Jon Steinberg on the Veterans' Affairs Committee on both sides of the aisle, from those who know and respect his brilliance, his dedication, his energy, his hard work. He has a broad vision, but he also is able to dot every i and cross every t.

Often, he stayed up all night before markups in the Veterans' Affairs Committee to make sure everything was in perfect order, and that every base that should be covered had been covered. It would be a tragic loss for the veterans of America were he denied this opportunity to serve on the Court of Veterans Appeals. It would be a tragedy in the life of a remarkable American who has served his country with distinction and who is fully entitled to the post for which he has been nominated by the President.

I trust that the White House will not yield to whatever pressures are being put upon them to withdraw this nomination, and that it will remain now in the custody of the Senate for our deliberations and for our decision as to what do do about the nomination.

I am very confident the Veterans' Affairs Committee, under those circumstances, would report him with an overwhelming vote and that he would be approved overwhelmingly by the Senate with votes from both sides of the aisle.

I would really be outraged if the White House took a step that would be so damaging to Jon Steinberg and so damaging to veterans, depriving them of the service of this remarkable man for reasons that have no relationship to the Court of Veterans Appeals, apparently, and no relationship to the qualifications of Jon Steinberg.

I will be watching with great interest as the next steps unfold in this matter.

## ORDERS FOR MONDAY, MAY 21, 1990

RECESS UNTIL 1 P.M.; MORNING BUSINESS; PROCEED TO THE CONSIDERATION OF S. 1970, THE OMNIBUS CRIME PACKAGE

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it

stand in recess until 1 p.m. on Monday, May 21; and that following the time for the two leaders, there be a period for morning business not to extend beyond 1:30 p.m., with Senators permitted to speak therein for up to 5 minutes each; I further ask unanimous consent that at 1:30 p.m. the Senate proceed to the consideration of Calendar Order No. 422, S. 1970, the omnibus crime package; and that on Monday, when S. 1970 is considered, there be debate only, and that no amendments or motions be in order.

The PRESIDING OFFICER. Hearing no objection, it is so ordered.

## RECESS UNTIL MONDAY, MAY 21, 1990, AT 1 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will now stand in recess.

Thereupon, at 1:46 p.m., the Senate recessed until Monday, May 21, 1990, at 1 p.m.

## NOMINATIONS

Executive nominations received by the Senate May 18, 1990:

### THE JUDICIARY

MICHAEL BOUDIN, OF THE DISTRICT OF COLUMBIA, TO BE UNITED STATES DISTRICT JUDGE FOR THE DISTRICT OF COLUMBIA VICE JOHN H. PRATT, RETIRED.

## CONFIRMATION

Executive nomination confirmed by the Senate May 18, 1990:

### GENERAL SERVICES ADMINISTRATION

RICHARD G. AUSTIN, OF ILLINOIS, TO BE ADMINISTRATOR OF GENERAL SERVICES.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

# SENATE—*Monday, May 21, 1990*

*(Legislative day of Wednesday, April 18, 1990)*

The Senate met at 1 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

## PRAYER

The PRESIDENT pro tempore. As we prepare to reverence our God, our Shelter, and our Shield, the prayer will be led by the Senate Chaplain, the Reverend Dr. Richard C. Halverson.

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

* * * *but my people have changed their glory for that which doth not profit.* * * * *For my people have committed two evils; they have forsaken me the fountain of living waters, and hewed them out cisterns, broken cisterns, that can hold no water.*—Jeremiah 2:11,13.

Merciful God, perfect in love, grace, and patience, forgive our thoughtless indifference and renew in us the spiritual and moral roots upon which our national greatness was built. We have seen the total bankruptcy of atheism as policy after a 70-year experiment. For 200 years we have enjoyed a system conceived in the minds and hearts of those who took God seriously. We profess to believe in Thee, but we behave as though we do not. We operate as though Thou art either nonexistent or unnecessary. We forsake Thee by our indifference, while we pursue ways that are contrary and meaningless.

In the words of Jeremiah, we have changed our "glory for that which doth not profit." We have forsaken * * * the fountain of living waters, and hewed them out cisterns, broken cisterns, that can hold no water."

In His name who is the Way, the Truth, and the Life. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. Under the order, the majority leader or his designee will be recognized.

## THE JOURNAL

Mr. GLENN. Mr. President, I ask unanimous consent that the Journal of proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## SCHEDULE

Mr. GLENN. Mr. President, following the time for the two leaders today, there will be a period for morning business not to extend beyond 1:30 p.m., with Senators permitted to speak therein for up to 5 minutes each.

At 1:30 today, the Senate will begin consideration of S. 1970, the omnibus crime package. During today's consideration of the measure, there will be debate only. No amendments or motions will be in order.

## RESERVATION OF LEADERSHIP TIME

Mr. GLENN. Mr. President, I ask unanimous consent that the time for the majority and minority leaders be reserved for their use later today.

The PRESIDENT pro tempore. Without objection, the time of the two leaders will be reserved.

## MASSACHUSETTS ASSOCIATION OF PRIVATE CAREER SCHOOLS

Mr. KENNEDY. Mr. President, in the last few years we have heard a great deal about private career schools and the education they do, or do not, provide their students. With all the negative publicity these schools have received, it is easy to get the impression that nothing is right in this corner of the postsecondary education universe.

That is not an accurate picture. The important fact is that most private career schools do a very good job and that thousands of students receive a high quality education in these institutions every year. The actions of unscrupulous schools should not blind us to the success stories that are commonplace.

The Massachusetts Association of Private Career Schools [MAPCS] is an organization that represents high quality, accredited career schools in my State. One of the important activities of this organization is its annual awards dinner that recognizes outstanding students from its member schools. The students honored at this event have been nominated by their institution and are saluted for their academic excellence, outstanding professional potential or devoted service to school and community.

The 1989-90 awards dinner was held on May 1, 1990 at the Pier Four restaurant in Boston. Twenty-one students were honored. Mr. President, the stories behind these awards are inspiring. They often represent a triumph over incredible adversity. The students honored this year struggled to attend school and succeeded despite challenges such as physical disabilities, financial hardship, single parenthood and cultural barriers. The honorees include recent immigrants from the Soviet Union, Cambodia, and Jamaica. The only common thread in all of these cases is a commitment to excellence.

The students who were recognized this year, and the schools they attended, are:

Joan Evans, of Mattapan; Taunton; Blaine Hair and Beauty School, Boston;

Roger Andrews, of New Bedford, Butera School of Art, Boston;

Doi Ngoc Le, of East Boston; Boston Technical Center, Inc., Boston;

Robin McGeer, of Holland; Rob Roy Beauty Sciences Academy of Worcester;

Chanvanna Khem, of Lowell; RETS Electronics School, Boston;

Rita de Cassia dos Santos, of New Bedford; Kinyon-Campbell Business School, New Bedford;

Kenneth Lavine, of Wilmington; East Coast Aero Technical School of Lexington;

Al Jackson, of Lynn; Wentworth Technical School, Waltham;

Eleanor Mooney, of Stoneham; Computer Learning Center, Somerville;

Laura Smigelski, of Groton; Andover Tractor Trailer School, Methuen;

Samir Makhlouta, of Lynn; TAD Technical Institute, Chelsea;

Joyce Maggiore, of Weymouth; Travel Education Center, Cambridge;

Daniel Sousa, of Hyde Park; Bay State School of Appliances, Hyde Park;

Amy McCrory, of South Boston; the Hickox School, Boston;

Alicyn Barteaux, of Lynn; Pedigree Career Institute, Lynn;

Bonnie Caruthers, of Boston; Women's Technical Institute, Boston;

Linda Parker, of Dayville, CT; Dudley Hall Career Institute of Worcester;

Wanda Rudolph, of Shirley; Henri's School of Hair Design, Fitchburg;

M.J. Michaud, of Worcester; Bancroft School of Massage Therapy, Worcester;

Anna Kaganzky, of Acton; Lowell Academy Hairstyling Institute, Lowell;

Edward Samelot, of Taunton; New England Tractor Trailer Training School, Brockton.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Mr. President, it is impossible for us to predict what roads these students will take in the future. But one thing we know is that the commitment, perseverance, and excellence that they demonstrated as students will help them reach their career and personal goals. I salute each of them. In addition, I commend MAPCS for putting this event together and honoring these outstanding men and women.

## NAMIBIAN FOREIGN MINISTER GURIRAB

Mr. KENNEDY. Mr. President, I recently had the honor of meeting a distinguished representative of the world's newest democracy, the Foreign Minister of Namibia, Theo-Ben Gurirab.

While many around the world may be captivated by the dramatic events in Eastern Europe, we must also recognize the extraordinary achievements of the people of Namibia in their struggle for freedom.

After more than a century of control by foreign powers, the last vestiges of South African colonialism have been swept away. And that triumph is a shining tribute to the courage and determination of the Namibian people.

We all rejoice in the culmination of that struggle with the formal admittance of Namibia as a full member of the United Nations on April 23, 1990.

Foreign Minister Gurirab is no stranger to the United States—or to the struggle for freedom in Namibia.

America can take a special pride in the shining accomplishments of Minister Gurirab—for much of his commitment to justice was nurtured here in the United States by our own civil rights movement.

As his people's representative at the United Nations for many years, he carried their message of hope to the people of the United States and across the world.

Many of us in the United States supported your struggle over the years and we join together with you today in pledging to lend our support again as you build your new nation.

As a first step, the United States Congress is considering an emergency bill which includes $10 million for Namibia. But we must do much more to develop a strong and mutually beneficial relationship with this new nation.

You have much of which to be proud—in fact your example has already been cited as a possible approach to the crisis in Cambodia.

Let me extend a warm welcome to Minister Gurirab, a sincere congratulations to the people of Namibia for their democratic triumph and a hearty embrace to the newest addition to the family of democratic nations—Namibia.

## TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,892d day that Terry Anderson has been held in captivity in Beirut.

## JIM HENSON

Mr. MOYNIHAN. Mr. President, it was Plato's belief that "early education," as he puts it, should "be a sort of amusement."

Jim Henson did not set out to teach, simply to amuse. As it happens, he did both. And with unprecedented success.

This country will miss him; indeed the world will. But his unique contribution will continue, for as Henry Adams said, "A teacher affects eternity; he can never tell where his influence stops."

## STATEMENT ON THE NOMINATION OF RICHARD AUSTIN TO BE THE ADMINISTRATOR OF THE GENERAL SERVICES ADMINISTRATION

Mr. THURMOND. Mr. President, last Friday, Mr. Richard Austin was confirmed by the Senate as Administrator of the General Services Administration. I was pleased to support his nomination.

Since 1988, he has served as Acting Administrator of the GSA and has rendered very able service to the Nation. Additionally, his experience as former Deputy Administrator and former Regional Director of GSA should serve him well as Administrator. As Deputy, he assisted the Administrator in the direction and implementation of all aspects of the programs and responsibilities of the agency. As Regional Administrator, he was responsible for all GSA operations in Illinois, Michigan, Wisconsin, Minnesota, Indiana, and Ohio. His work in both of these areas—the central office and the field—will be valuable as he oversees supply procurement, property management, telecommunications, data processing, and the other work of GSA.

Mr. President, I have worked with Dick Austin and his staff and I have found him to be of great assistance and very dedicated to his work. One example is his assistance in clarifying the delegation of long-term lease authority for medical research to the Department of Veterans Affairs. Through such delegation, the VA may enter into lease arrangements for much-needed medical research.

In addition, Dick Austin has demonstrated his leadership in the current GSA efforts to provide new headquarters for the Environmental Protection Agency, the Department of Transportation, and the Department of the Navy. He is to be credited with waging the effort to secure the authority and funding for these new projects. Providing a healthy, safe, and comfortable environment is not only a responsibility of the Federal Government as an employer, but also such considerations can lead to increases in productivity, job satisfaction, and morale.

Again, Mr. President, I was pleased to support this nominee and I look forward to working with him as Administrator.

## TRIBUTE TO LT. COL. ARPAD SZURGYI

Mr. WARNER. Mr. President, I salute today a truly professional soldier on the occasion of his departure from the Office of the Army's Deputy Chief of Staff for Personnel, where he served as the congressional affairs contact officer.

Lt. Col. Arpad Szurgyi enlisted in the Army in 1966. He served as an enlisted man before going to Officer Candidate School and Army Flight School, where he was trained to fly both fixed and rotary wing aircraft. During his tour in Vietnam at the height of the war, he frequently saw extreme levels of combat.

Since then, Colonel Szurgyi has served in positions of increasing responsibility in commands within the United States and overseas. Since December 1988, he has been assigned in the Pentagon as the congressional affairs contact officer.

Throughout his assignment, Colonel Szurgyi provided a vital link and served at the conduit of information between the Army and the U.S. Congress in the ever-important areas of Manpower and Personnel during a period critical to our Nation's defense.

Colonel Szurgyi ensured that information and justification was provided the Congress to permit the enactment of legislation that impacted favorably on the Army's ability to manage the force, maintain readiness and improve the quality of life of America's soldiers and their families.

He can be most proud of the selfless contributions he has made to the overall improvement of the Army—an Army that will, no doubt, miss his superlative and dedicated service in its continuing relations with the Congress.

As he goes forward to his next position in Europe, he does so confident of success and continued good fortune. Most significantly, Colonel Szurgyi takes with him the well earned respect of his subordinates, peers and superiors alike, as well as the sincere thanks of a grateful nation.

## THE SITUATION IN KASHMIR

Mr. MOYNIHAN. Mr. President, events in the Indian state of Jammu and Kashmir have gone from bad to

worse. Although the leaders of both India and Pakistan have repeatedly stressed their desire to avoid war and are making efforts to keep lines of communication open, tensions are rising nonetheless. Today we may well have what the economist aptly described as "The makings of a bloody, old-fashioned war." These are large and well-armed nations and their troubled relations since independence provide little comfort. In the 25 years following the United Kingdom's withdrawal from the subcontinent India and Pakistan fought 3 wars, 2 of which were related to the situation in Kashmire.

We should be greatly concerned by this situation, not only out of a humanitarian concern over the potential loss of life, but also because India and Pakistan together constitute the largest concentration of citizens governed by democratically elected representatives in the world. Indeed. India alone is the largest democracy in the world. Today, both nations are under great stress.

And there is the nuclear issue. That too must be considered. Today we are struggling—not alone in South Asia—with the deadly irony of seeing nuclear confrontation between the global superpowers replaced by the dread possibility of the use of weapons of mass destruction by developing nations.

The United States is not just interested in this matter; it also bears some responsibility. We have become involved, largely through our substantial assistance, including military assistance and sales, to the government of Pakistan. We also owe great thanks to the Pakistani people for their cooperation with the United States in assisting the Afghan Majahadeen and the literally millions of refugees who were displaced by the Soviet invasion of their country. That tragedy continues despite the Soviet withdrawal, as does our cooperation with the newly democractic government of Pakistan.

Of late terrorism has come to Kashmir. Radical Kashmiri separatists have turned to kidnapping and murder to achieve their goals. Hindu refugees from Kashmir have poured into nearby states. Indian troops have sometimes over-reacted to provocations and protests. Abuses have occurred. In consequence of which, rhetoric has become heated.

Yet we must be most emphatically clear on one point. The United States will oppose offensive military operations by either side. The people of the United States have assisted Pakistan because it is at a strategic crossroad in a troubled region. Bordered on the North and West by the Soviet Union and Afghanistan respectively, Pakistan had a claim on our attention and assistance. But the weaponry the United States had provided to Pakistan was provided for defense purposes only. There should be no mistake that the Congress of the United States would accept or continue to support with spare parts or other assistance—including diplomatic—the use of United States aid for offensive purposes.

It should be equally clear that the United States Congress would oppose any offensive operations by India.

War between these two nations would be the very height of folly. Temptations abound without doubt. Both sides doubtless have grievances. Both sides view events in Kashmir with alarm and concern. The United States has helped the Government of Pakistan create a powerful, well-equipped military. At the same time, India's population vastly exceeds even the 110 million people in Pakistan.

This conflict arises at a time when the United States is already reexamining its foreign aid priorities. In last Thursday's New York Times Elizabeth Martella argued that Congress needs to "take a new look at foreign aid, which is still addressing cold war concerns." The same day the Washington Post noted that Pakistan is the fifth largest United States aid recipient, "ostensibly for defense against a Soviet army that no longer threatens it from neighboring Afghanistan." The message should be clear. The Congress will be scrutinizing each foreign aid dollar as never before. Aid will not be provided to nations which begin wars.

The President has wisely decided to send a party of senior officials, headed by Deputy National Security Adviser Robert M. Gates, to the region to make our concerns known. The Senate wishes them every success, and urges our friends in both India and Pakistan to hear them out with close attention. Perhaps especially the Pakistanis. For it appears to this Senator that the military in Pakistan could make a dreadful miscalculation. Pakistan's situation is difficult enough. There are still more than 3 million Afghan refugees living in Pakistan. The Afghan situation is, if anything, deteriorating. Bitter divisions within the Mujahadeen forces have settled into fixed estrangement. No common front now exists. None is in prospect. Hence, the border there will continue to be a source of difficulty, if no longer immediate danger.

But to start a war over Kashmir would change everything and instantly so. For one thing, after the usual early successes that are not that difficult to achieve in modern warfare, the Pakistani forces would inevitably be defeated and possibly destroyed. A move into the Vale of Kashmir would be countered with a thrust into the Punjab. A dash for Karachi. The loss of the navy. Rebellion in Baluchistan. Chaos all round. Ruin all round. And above all, no sympathy, no assistance from anywhere save Beijing which is much too occupied with reestablishing relations with the Soviet Union to risk them over Pakistan.

The cold war is over. Anyone in Islamabad counting on playing that card will be sore disappointed. That fact is equally important for New Delhi. Should war break out on the subcontinent, there will doubtless be statements of solidarity and support from Moscow. But more?

And so I would plead with all the parties to observe the extraordinary evolution toward political peace in Central Europe, where a whole world has transformed itself without a shot being fire, save in the case of Rumania. After fighting three wars in less than 25 years, the leaders of India and Pakistan met in the Indian city of Simla and turned away from violent solutions to the conflict. In July 1972 Indian Prime Minister Indira Gandhi and Pakistani President Ali Bhutto met and signed the Simla Agreement, committing the parties to pursue a peaceful settlement to the Kashmir problem. For the last 19 years the two nations have been at peace. I urge both nations to continue on the path of peaceful diplomacy which they began at Simla.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Is there further morning business?

If not, morning business is closed.

## OMNIBUS CRIME BILL

The PRESIDENT pro tempore. Under the order previously entered, the Senate will now proceed to the consideration of Calendar Order No. 422, S. 1970, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDENT pro tempore. Under the order entered, no motions or amendments will be in order, only debate.

The Senator from Delaware [Mr. BIDEN] is recognized.

Mr. BIDEN. Mr. President, the Senate takes up the so-called crime bill, something that we have long awaited. As a consequence of a series of events that I will attempt to explain in a few moments, we have finally arrived at this moment.

Mr. President, S. 1970, the so-called vehicle that we agreed to use at the end of the last session in order to hopefully dispose of a number of contentious and not so contentious issues relating to the criminal justice system, is an omnibus crime bill which I introduced in November of last year. It addresses six topics.

I might add and emphasize that the six topics it addresses were all topics that the senior Senator from South Carolina and the senior Senator in the U.S. Senate and the ranking member of the Judiciary Committee and I agreed that we would address and that we would bring back to the Senate a single piece of legislation addressing these often—let me amend that—always contentious issues.

Those topics are the death penalty, habeas corpus, or habeas corpus reform depending on how you view that question, the exclusionary rule, firearms legislation, money laundering legislation, and reorganization of the Justice Department, in part, that the Senate, as I said, agreed by unanimous consent last year to take up this year.

Today, I would like to make some opening comments about the legislation, and I would like to divide my comments into three general areas.

First, I have some introductory observations about some of the controversy that has surrounded consideration of this bill. None of it goes to the merits of the bill, none of it goes to the essence of the debate, but it does go to, for a lack of a better phrase and to be perfectly honest about, the politically contentious elements of the debate where each side—and there are more than two sides, quite frankly—attempts to, in my view, gain political advantage by characterizing the other efforts on criminal justice legislation in manners and means that are not as flattering as they might want to be thought.

Second, I would like to talk about the provisions, the specific elements, of S. 1970.

Third, I would like to discuss the principal amendments that I intend to offer to the bill that has been laid down.

Fourth, I will make some comments on how we intend to proceed, hopefully—and I emphasize hopefully, for no one in this body, and I suspect no one in the history of this body knows more about the difficulty that can arise with contentious legislative initiatives in terms of the parliamentary maneuvers that can legitimately take place in this body to prevent or to allow one to move forward on consideration of specific items before this body. And so when I say I would like to make some comments on how we intend to proceed, I suspect some of those comments I am about to make may be filled with a hope and aspiration without any absolute certainty as to how we are likely to be able to proceed.

I would like to warn my colleagues that these remarks will be much more lengthy than I am accustomed to making on the floor of the U.S. Senate and this is so because I will not give a long speech when I offer my extensive amendments to the bill we have introduced, S. 1970, tomorrow.

Tomorrow, we hope to move through business quickly, without long speeches, because we have much work to do in order to finish this bill. Today was specifically designed for the ranking Member and myself and others who have a keen interest in this subject to be able to move not expeditiously but thoroughly through the provisions of the legislation we are about to debate.

As a result, I am going to combine two speeches into one set of remarks today—a speech today and a speech for tomorrow. As I said, I hope we can move quickly tomorrow.

Let us start with a recap of how we got where we are at this very moment because we have heard, in my view, too often, a good deal of rhetoric suggesting that the President's crime bill has been languishing in the Senate since last May. I think it is time to set the record straight, at least in my perspective as chairman of the Judiciary Committee.

Last May, the President unveiled an anticrime proposal. That proposal contained two distinct parts. One part contained five legislative proposals: on the death penalty, on habeas corpus, the exclusionary rule, firearms control, and drug testing for prisoners. And the second part of the proposal was for increases in law enforcement and prisons.

Congress got to work on this proposal right away, Mr. President. Amazingly, just 4 months later, the full Senate, through the leadership of the Presiding Officer of this body, had passed every single request in the second part of the President's crime package; that is, the funding for law enforcement, the teeth, the portion that will and has begun to make a difference in terms of making the streets safe for Americans. I need not tell the Presiding Officer, who is also chairman of the Appropriations Committee, how tortuous that process was, led by him. So we did, we did pass every single thing the President wanted in terms of law enforcement and much more.

Congress approved every penny asked for by the President's bill and then some. We gave him every DEA agent that he wanted, drug enforcement agent, every U.S. marshal that he wanted, every firearms agent he wanted, and on down the line. And we did not stop there. We gave him 20 percent more prison cells than he asked for because we felt they were necessary. We almost doubled the number of FBI drug fighters that he requested because we felt what he asked for was not enough to provide for the safety of the citizens of this country. And we doubled the number of Federal drug prosecutors because we felt that, in order to deal with these drug cases, we had to have people on the spot there prepared to prosecute these cases so they did not pile up and have people out on bail waiting for trial continuing to commit crimes.

And we did not stop there. We went further still and more than doubled the President's request that he made for the States, the requested aid for State and local agencies, we doubled that, Mr. President. We said to the President, we believe the increase you are asking for to help State and local law enforcement officers and State and local law enforcement agencies was good but did not go nearly far enough. So we doubled what the President asked for to fight crime. And that is what has been done already.

So I think we kind of, hopefully, put aside this sort of partisan bantering and hopefully not here about how the President's crime bill has been left to languish on Capitol Hill. It not only did not languish, Mr. President, it was strengthened; it was added to; it was made stronger; and it was moved rapidly. Most of his bill has already passed and it has been beefed up in the process.

What was left of the crime bill were five legislative proposals, all of which were important, but for the past 18 years that I have been here, have been debated extensively and will continue to be debated after we, hopefully, pass the crime bill before us. But, Mr. President, they are not the essence of a crime bill. They contain the death penalty, habeas corpus reform, exclusionary rule, firearms and drug testing for prisoners—a very small portion of that gigantic effort that was underway.

I might add, Mr. President, ask the police officers of America which they would have rather had, those five individual pieces or all that through your leadership we provided for them, and I will bet you anything they will say: What you gave us.

That does not mean we do not want more of this. I want more of this. The proposal I have introduced today and wrote increases the number of offenses that are punishable by the death penalty. It changes habeas corpus, which I think should be changed in the present system. It codifies the Supreme Court's decision on

the exclusionary rule. And it deals with taking off the streets assault weapons, which are being used to kill police officers.

There are not a lot of folks who have an AK-47 underneath their bed to protect against burglars. Some, maybe, but not many. There is kind of an interesting name for one particular rifle the manufacture of which the provision tries to ban. It is called a street sweeper. Is that not kind of interesting? How many people go out and sweep the streets with a weapon? It is designed to do nothing more than kill human beings. It is an assault weapon.

I hope we do something about assault weapons in this bill. I also hope we deal with the other provisions I have suggested here, without going into detail now.

But now, these items, the items that are left in the President's crime bill from back in May—broadening the death penalty, habeas corpus reform, exclusionary rule, guns and drug testing—now we will debate those items and resolve them one way or the other, as we should. But they have hardly been ignored, Mr. President. The President's crime bill has hardly been ignored.

The Judiciary Committee passed an assault weapons back in July, and the death penalty back in September. The full Senate passed drug testing for prisoners in October and our Judiciary Committee sent the habeas corpus reform bill to the floor in March. On all of these matters, Mr. President, we have had committee hearings. The administration's views have been heard, considered and/or rejected by our colleagues as they have seen fit and as the process is supposed to function.

I do not need to go into the details of why it has taken until now to come to the floor with a package dealing with the remaining matters from the crime bill. The majority leader laid all of this out last week in a speech on the Senate floor. But to summarize, we are here now because, by agreement between Democratic Senators and Republican Senators and the administration, earlier proposals to bring this legislation up were deemed ill-advised.

I want to emphasize that now, so we, hopefully, put this away. By agreement, Democratic leaders, Republican leaders, and the White House last year decided that we should wait until now to bring up these five remaining issues for the full Senate to consider them, for reasons I will not go into, some of them related to the speed with which the Senate could deal with other issues and whether this would impede it or not impede it; some related to the director deciding he would rather not have this brought up before his drug legislation was considered, some related to other things. But the end result was leadership in both parties in the Senate and the White House agreed we should put it off until now.

But the charges of delay endure. They came from the Vice President last week, when I was down to the dedication honoring those brave women and women in police forces who have fallen in the line of duty. Senator THURMOND and I were there, and other Members of this body. Frankly they disturbed me.

The time to play politics on this crime issue is over. We all know the story of the 1988 elections and the success that the issue had for some at that time. But now it is time to do something about crime and address the remainder of the agenda. Now it is time for bipartisan cooperation, for compromise on competing crime proposals, and for bipartisan action.

Despite my numerous suggestions of cooperation and offers to negotiate the crime bill with everything on the table, the administration has refused. They do not want to talk. Well, so be it. That is their prerogative. The best way to get something done, in my humble opinion, at least in the crime area, is the way ranking Republican, Senator THURMOND, and I have been able to do it over the years: agree on what we can agree on and bring it to the floor and get it done; what we cannot agree on, take it to the floor and debate it.

But the administration has not been very receptive to any real negotiation on the crime bill. They are not interested in compromise. At least that is how it seems to me. I hope it is not because they see more political gain in conflict over political gain in cooperation.

Take the death penalty proposal, for example. Since last September the administration has been calling for the death penalty for drug kingpins. How many times have you heard that, coming from our President and others? "I want the death penalty for drug kingpins." But the law has been on the books since November of 1988 and the administration has failed to use it one single time.

The law, through your leadership and the leadership of the Senator from the State of South Carolina, and with my support, provides for death for drug kingpins. And we define what drug kingpins are. There is no real disagreement that I am aware of between us and the administration and the Senate. Yet, it has been on the books, Mr. President, and not one single time, to the best of our knowledge, has the Justice Department used it. Yet, I hear constantly, constantly: "We want the Senate to move on death for drug kingpins."

I wish, respectfully, the President would get a new speech writer because the speech writer obviously does not know—and I have had trouble with speech writers so I understand it—does not know what is in the law.

Mr. President, why the administration did not even ask for the death penalty for a single case until just 2 week ago is beyond me; yet the rhetoric continues. The President calls for death penalty for drug kingpins but his crime bill does not contain a single provision, not one, expanding the death penalty in drug cases—the crime bill he keeps referring to.

It was not until last week—I emphasize last week, Mr. President—that the administration submitted to Congress any proposal for broadening the 1988 death for drug kingpins law, a law which, as I said a moment ago, the administration has failed to use yet.

Let us end the partisan games and deal with the crime issue. If the administration wants to make the issue partisan, then we are ready. Democrats come to the Senate floor with a tough anticrime proposal, with proposals we are prepared to put before the American people for their consideration and their support. But I speak for all my colleagues on this side of the aisle when I say we offer cooperation rather than bickering. We would rather work together and pass a tough crime bill than jockey for political advantage on the issue. We would prefer to work together jointly to do something to fight crime rather than to waste time fighting each other on the Senate floor.

Let us take a look at the bill before us, S. 1970.

With that introduction, I would like to turn to specifics in the bill. In a speech delivered in Kansas City on this bill the President called this bill, S. 1970, a sheep in wolf's clothing. Well, I regard this as somewhat fascinating. But if the President wants to trade barbs, I have decided from this moment on I am out of the business of doing that. There is enough to do up here rather than respond, even as we speak. The fact of the matter is that at the time I responded by saying something to the effect that this bill is not a sheep, but it is a wolf with teeth.

I stopped and thought about that. Here the President is talking about a sheep in wolf's clothing, and I am talking about a wolf with teeth. It all sounds neat, I thought to myself when I went home. The police were kind enough to have a little testimonial for me at home. My law enforcement agencies in the State of Delaware are law enforcement agencies. I thought about it. These men and women are walking out on the street every day putting their lives on the line. A sheep in wolf's clothing or a wolf with teeth, I did not want to hear any of that.

They say: What are we going to do? Are you going to pass something, Joe? Are you going to get something done?

That is what I hope we can do. These are the exact same offenses covered by the President's crime bill, S. 1225, and Senator THURMOND's bill, S. 1971, the exact same, exact same offenses. So I find it difficult to figure out how one is a sheep and the other is a wolf, but let us put it aside.

Let me speak about the death penalty. Title I of S. 1970, the bill I introduced, provides for the largest single expansion of the Federal death penalty in terms of number of offenses in our history—30 Federal offenses for which death is currently unavailable as a punishment would be punishable by death if the bill we discuss today, S. 1970, passes.

I ask unanimous consent, Mr. President, that the full list of the 30 offenses be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

DEATH PENALTY OFFENSES AFFECTED UNDER S. 1970 AND S. 1971

I. FEDERAL OFFENSES FOR WHICH THE DEATH PENALTY NOW EXISTS, BUT CANNOT BE USED FOR LACK OF PROCEDURAL SAFEGUARDS

Destruction of Aircraft.
Destruction of Motor Aircraft.
Murder of Family Member of Federal Official.
Murder of Member of Congress, Cabinet, or Supreme Court.
Espionage.
Transporting Explosives with Intent to Kill.
Arson of Federal Property.
Arson of Property in Interstate Commerce.
Murder of Nuclear Regulatory Inspector.
Murder of Territorial Jurisdiction of the U.S.
Murder of Federal Official.
Mailing of Injurious Articles.
Assassination of the President.
Wrecking a Train.
Bank Robbery.
Treason.
Aircraft Hijacking.
Murder of Agriculture Department Official.
Murder of Federal Witness.
Murder of Horse Inspector.
Murder of Meat Inspector.
Murder of Poultry Inspector.
Murder of Egg Products Inspector.

Note.—The death penalty can be applied for the above offenses only where death results, except in the cases of treason, espionage, and assassination of the President.

II. FEDERAL OFFENSES FOR WHICH THE DEATH PENALTY WOULD BE AUTHORIZED AND LIFE IMPRISONMENT IS CURRENT PENALTY

Genocide.
Murder of Foreign Official.
Kidnapping.
Hostage Taking.
Murder-for-Hire.
Murder in Aid of Racketeering.

Note.—The death penalty would be applied for the above offenses only where death results.

III. NEW FEDERAL OFFENSE FOR WHICH DEATH PENALTY WOULD BE AUTHORIZED

Murder by Prisoners Serving Life Sentences in Federal Prisons.

Mr. BIDEN. These are the same offenses covered by the President's crime bill, S. 1225, and Senator THURMOND's bill, S. 1971.

Title II of the bill before us, Mr. President, deals with habeas corpus in capital cases.

Mr. President, the statutory writ of habeas corpus has been available since the year 1867, or for 120 years. The bill we have before us today, S. 1970, would impose the first ever, the first ever limit on the number of petitions for release a prisoner could file and the first ever limit on the time in which a prisoner has to file a petition.

Title III deals with the exclusionary rule. This provision enacts into law what would be a first ever legislative curtailment of that rule's protection against unlawful searches and seizures. Under the bill, the Congress would sanction for the first time the use of unlawfully obtained evidence in Federal court under certain circumstances.

I might note parenthetically, in each of these titles I go through, the disagreement among the President and Senator THURMOND, to the extent that he disagrees with the President, and us is in degree. That is where the fight comes, not whether or not we reform habeas corpus, not whether or not we increase the number of offenses for the death penalty. As I go through them, not whether or not we provide an exception to the exclusionary rule but how much, how far, how often. That is the debate.

Nobody among the principals in this debate is arguing, as we have argued in the past, that there should be no change in habeas corpus, that there should be no death penalty, that there should be no change in the exclusionary rule.

When I say nobody, I mean nobody among the principals, the manager of the bill, the manager on the Republican side, or the administration. There are others of our colleagues, to their great credit, who have different views than the three of us: the President, Senator THURMOND, and myself. And they will come to the floor to make their case.

But on the three major positions that are going to be debated, there is no disagreement as to whether or not change should take place. How much is enough, that is the debate.

Under this bill, in title IV, we would add the so-called DECONCINI assault weapons ban, S. 747, a far tougher ban on the sale of guns of choice of drug dealers than anything with which the President has come forward, and I might add it also passed out of the Judiciary Committee by a majority vote. It deals with 14 named weapons.

Title V contains new provisions to clamp down on money laundering, the process whereby major organized crime figures and drug dealers take illegally gotten gains, run them through legitimate processes in the banking institutions, come out with money that cannot be traced, and go out and do everything from buy the local automobile company to the local bank to the local restaurant to the local office building—legitimately—and further undermine the value and safety of Americans.

Title V contains these provisions to clamp down on money laundering, the life blood of criminal organizations and international drug cartels.

Title VI, Mr. President, creates at the Justice Department a new division, a unit to set up our attack on organized crime and dangerous drug dealers; not reorganizing the whole Justice Department, but saying we think there should be within the Justice Department a specific division organized specifically for the purpose of managing our attack on organized crime and dangerous drug dealers.

So this is S. 1970, Mr. President, a death penalty bill that covers the same crimes as the President's bill, unprecedented limits on habeas corpus, and the exclusionary rule, limits on assault weapons manufacture and money laundering that go far beyond anything the President has proposed, and a new unit at justice to attack crime and drug kingpins and gangs.

Mr. President, this bill is a tough bill. If the President thinks it is not, then I think this ought to be and will be debated. But it is a tough bill. It is more like a debate between lions and tigers rather than sheep and wolves with or without teeth. These are tough pieces of legislation.

The Senator from South Carolina has a tough piece of legislation. What we are talking about here are unprecedented, unprecedented changes in the law designed and intended by all three of us to help us in the battle against crime and drugs.

The bill imposes a death penalty for heinous crimes as does the President's bill. But unlike the President's bill, it also takes away drug dealers' guns, their illicit proceeds, and creates a new unit to hunt them down.

In sum, this bill is the toughest crime bill that I have ever brought to the floor in the 9 years I have been the ranking Democrat of this committee. If it passes, it will unquestionably be the toughest bill enacted into law, in the 17 years that I have been here, on these specific issues.

Again, quite frankly, Mr. President, the tough, tough, tough part of these bills is when we say to the local law enforcement officer, "You can hire 2, 5, 12, 15 more officers. You can train those officers at Glynco, down in Georgia, where we train our FBI agents. You can have in your State more DEA agents." We are going to add more FBI agents to hunt down or-

ganized crime units. That is real muscle. But on the issues of death penalty, habeas, exclusionary, reorganization, this is as tough as the Senate has ever gotten, as tough as anybody is asking for.

We are not stopping with S. 1970, Mr. President, because, tough as this crime bill is, it is not enough by itself. You see, President Bush has always had a disagreement with us on how much we should do for local law enforcement. When we debated the drug bill and the crime bill last year, Mr. President, the President had a number of proposals before us on drugs and crime. We came in here and made a mistake.

I looked at my staff for some guidance. I do not think there was a single amendment to toughen up the drug bill or crime bill that we offered that did not pass. I might add it was not Democrat or Republican. When I came to the floor for more money for State and local law enforcement officers, I introduced the amendment that said the President's bill is not tough enough. Guess what? Ninety-nine Senators in here said, "You are right, BIDEN, it is not tough enough. We agree. We vote for that provision."

I could go through a list of several amendments, not all introduced by me alone, some introduced by the Senator from South Carolina, by the Senator from Texas, by the Senator from New Hampshire, across the board. Mr. President, this body in almost six instances, by votes of 90 or more said, "You are right. The President's bill does not go far enough. It is not tough enough."

In fairness to the President, if I can be a spokesman for a moment, the President had a priority difference with us—not we Democrats, but with the Senate, Democrats and Republicans. As you, Mr. President, well know as chairman of the Appropriations Committee, he said we do not have enough money to spend on those things. I respect him for that. But it would be totally inappropriate for me to stand here and say the President does not care about the drug problem, he does not care about the lawlessness in this country, he does not care about the increase in violent crime. Of course, he cares about it.

The disagreement is not between Republicans and Democrats, no matter how much my Republican colleagues will try to make it sound that way for a while. At least to now it has been between the President and the Senate—in what priority? The ultimate priority—spending. What priority would be given to the fight on drugs and crime.

So, Mr. President, we are not stopping with S. 1970 because, as tough as it is, it does not go far enough, in my opinion. You see, we have to do more because I know history as well as my two colleagues in this Chamber know history. If the President wants to have a war on crime, so be it. I am pleased that he sees this bill as a valuable weapon that can end the long stalemated war we have been having here.

Of course, Mr. President, we will tomorrow add additional provisions that are based largely upon S. 1972, Mr. President—this amendment and a bill I introduced last November.

I now ask unanimous consent that the full list of the differences between the Biden amendment and S. 1972, as introduced, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LIST OF CHANGES MADE TO S. 1972—TO BE USED AS A PERFECTING AMENDMENT TO S. 1970.

TITLE I—STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE (ADDED AS TITLE VII)

Sec. 102. (c)(3) adds a Foglietta proposal to list certain types of crime and drug prevention programs to be initiated by community coalitions.

Sec. 102. (g) adds a Foglietta proposal to include a minimum grant allocation of $10,000.

Sec. 102. (h) changes the authorization years to 1991 and 1992.

TITLE II—FEDERAL LAW ENFORCEMENT (ADDED AS TITLE VIII)

Sec. 201. (2) now totals $100.5 million for DEA, in response to DOJ.

Sec. 201. (2)(B) changes "not fewer than 250 agents" to "not fewer than 250 agents and necessary support personnel" in response to DOJ.

Sec. 201. (6)-(10) includes at the end, a DeConcini amendment allocating Customs ($45M), ATF ($37.5M), IRS ($30M) and Border Patrol ($35M)

Sec. 202. OMITTED (additional judicial positions)

TITLE III—RURAL DRUG ENFORCEMENT (ADDED AS TITLE IX)

Sec. 304. (b) adds reference to "date of enactment of this Act,"

TITLE IV—MANDATORY DETENTION (ADDED AS TITLE X) NO CHANGES

TITLE V—FORFEITURE (ADDED AS TITLE XI)

Sec. 508. (b) adds a DeConcini amendment to limit retention of seized assets by the Attorney General for administrative purposes to 10 percent.

Sec. 512. (a) is amended to avoid totalling cutting out section 1955 (d) (Title 18, U.S.C.), which would have eliminated criminal forfeiture.

Sec. 512. (a)(2) changes an incorrect reference to section 413 of the Controlled Substance Act to section 511 of that Act, ensuring that section 1955 specifically covers real property, in response to DOJ.

Sec. 514 is cut to eliminate any potential inconsistency with grand jury secrecy rules.

TITLE VI—PUBLIC CORRUPTION (ADDED AS TITLE XII)

Sec. 602 and others no longer make reference to Indian tribal governments.

TITLE VII—CIVIL ENFORCEMENT (ADDED AS TITLE XIII) NO CHANGES AT THIS TIME

TITLE VIII—JUVENILE PROGRAMS (ADDED AS TITLE XIV)

Sec. 801 now reads as an amendment to part B of the Juvenile Justice and Delinquency Prevention Act instead of part C, in response to DOJ.

TITLE IX—DRUG EMERGENCY AREAS (ADDED AS TITLE XV)

Title IX is changed to conform to S. 2313, the Drug Emergency Areas Act as introduced on March 21, 1990.

TITLE X—POLICE CORPS (ADDED AS TITLE XVI) OMITTED

TITLE XI—FIREARMS (ADDED AS TITLE XVI)

Title XI is changed to conform to the administration's bill;

Sec. 1113. (b)(2) now includes an exemption for the export of firearms to foreign law enforcement agencies, in response to DOJ.

TITLE XII—MISCELLANEOUS IMPROVEMENTS (ADDED AS TITLE XVII)

Sec. 1204 and Sec. 1212. (Recidivist penalties and Dial A Porn Remedies) no longer exist.

Sec. 1233, a wiretap provision, is replaced with language from Senator Pryor.

Sec. 1234. is a technical amendment to 21 U.S.C. Sec. 845 to clarify the mandatory minimum penalties for three related offenses pertaining to drug dealing and minors.

Sec. 1235. is a technical amendment to make consistent the penalty for money laundering conspiracies with penalties for drug conspiracies, which carry the same penalty as the offense that is the object of the conspiracy.

Sec. 1236. is a technical amendment to the reference to section 1956(a)(2) in the money laundering section in S. 1970, making it just section 1956.

Sec. 1237. requires the Secretary of the Treasury to approve the transfer of seized assets to a participating foreign country, along with the Secretary of State as required in section—of S. 1970.

Sec. 1238. creates a money laundering forfeitures provision to allow for the substitution of forfeited assets.

TITLE XIII—ASSAULT WEAPONS (ADDED AS TITLE XVIII)

Sec. 1302. is amended to clarify that the form (record) that must be maintained about the sale of a weapon only refers to that one sale, not future sales.

Sec. 1306. now limits fines for failing to comply with assault weapons recordkeeping requirements to $1000.

TITLE XIV—MONEY LAUNDERING (ADDED AS TITLE XVII) OMITTED

TITLE XV—JUSTICE REORGANIZATION (ADDED AS TITLE XVIII) OMITTED

TITLE XVI—DRUG TESTING POST CONVICTION (ADDED AS TITLE XIX)

Sec. 1902.-Sec. 1904. now include procedural protections requiring that tests be equivalent to the quality of gas chromotography tests.

Mr. BIDEN. Mr. President, to truly fight the drug war one needs resources adequate to the attack. This amendment, the Biden amendment, which will be introduced tomorrow provides resources at a State level, at a local level, and at a Federal level. It starts by attacking the crime and drug problem where it is most acutely felt, in the streets and at the local level.

The amendment doubles the law enforcement funding that State and local governments will be getting. The President proposes an increase to $450 million. This proposes $900 million in funds, funds critically needed by our

frontline on the attack against the traffickers and violent crime.

What will this get us, Mr. President? As the first chart in the back will show, Mr. President, without my amendment, the administration's drug and crime plan will only put 89 new antidrug police strike forces on the streets. This is for the whole of the country. If my amendment were adopted, it would put 1,000 of these task forces in our cities and towns, making them safer for everyone.

My amendment also includes new programs modeled on legislation introduced by Senator KOHL and Representative FOGLIETTA and provides seed money for up to 3,000 community groups to board up crack houses, to form street patrols, and organize youth activities.

Mr. President, I, like you, have visited the small and large towns of this country, in my own State and in other States. As recently as last week, I was in Philadelphia, PA, and 2 weeks earlier in the same city. I looked in the parts of that large metropolitan area, not unlike many across the country, walked down the street with the community leaders pointing out to me, showing me, as I stood there in front of a grocery store, counting the bullet holes in the window. I walked by a school right in the middle of a drug dealing area, a grade school where children in the portico got caught in the crossfire at noontime. I looked at the school. From the second-story window in that school, you could look at a corner across the street right into a crack house where women were fornicating on a regular basis in open view of these children because that is how they get their money to buy the crack. The crack dealer says, "You want the crack? You stay here and service customers." It is a neighborhood with beautiful young children skipping down the street on Saturday afternoon. The only reason they were able to do that was because dealers were gone because we were there with cameras. That is happening all across America.

Lest we think it does not happen in rural America, I need only look to you and other Senators who represent rural States, like me—the largest city in my State is about 85,000 people. I can take you into cities in my State with fewer than 15,000 people where they have renamed streets in that town Crack Alley, where, when I walk out of a meeting in a church with some ministers, as I walk down the steps and across the parking lot to my car, they say, "Joe, lest you doubt us, drive, turn left, go down the street—" and I will not identify the town at this point because they have enough problems—"go down the street four blocks." And from three corners, at 4 o'clock on a Friday afternoon, three people walk off three corners competing to sell to this U.S. Senator, one of whom recognized him, and in broad daylight, drugs. They realized it was me and one of them said, basically, "This sale will not work," and walked away. The other two figured, why not keep trying.

This is the same town, Mr. President, like many towns in South Carolina and West Virginia, where folks ride down the street in their pickup trucks with gun racks, with guns in their racks, because they like to hunt. They are not yuppies riding around in their new pickups. They are hard working folks. If you ever told them 5, 7, 10 years ago that they would have open drug sales on their streets, they would have told you you were crazy. These are small towns, Mr. President, where the churches are still strong, where Boy Scouts and Girl Scouts are active, where the school varsity clubs and the PTA's are active. But this dread has crept in like a fog in the night, and when the daylight came, it stayed.

Mr. President, we have problems, serious problems. And I believe they should be able to participate in helping. How do you get, I might add, a well-trained, dedicated sheriff in a police department, a local police chief of two or three, to be able to possibly know enough to know how to deal with drug cartels, knowing how to set up organizations in their town? How do you do that?

Guess what, Mr. President, we know how to help, when we send in DEA agents in those communities, to help them organize their State police, their Federal police organizations, their local police, county police. It works, Mr. President. It works.

Mr. President, I will show you in a minute that there are a number of States in this country that do not have the capability of having available to them the expertise in dealing with national, international cartels who move into their rural neighborhoods to set up shop, and we should provide for them.

The second part of my amendment addresses the Federal Government's crackdown on major drug trafficking organizations. At a hearing last fall, the FBI director—and I think one of the finest—I note parenthetically, I have watched you do a number of things here, Mr. President, that will follow you for a long, long time.

I think that what you did to enhance the quality of law enforcement and equitable application of the law, at a Federal level more than anything else, is when you changed the method by which, and the term under which FBI Directors would be appointed, and you took it out of politics, something no one wanted to touch at the time, I might add, but you.

I think Director Sessions is one of the best that we have had ever. He is straight; he is honest; he is tough, and he understands the Constitution. Judge Sessions came before us and everyone was asking him, "Judge," I say that not to confuse people, because he is a former Federal judge, "Director Sessions, why are you not doing more on the S&L scandal; why do we have so many backed up cases? Why are you not doing more on organized crime, on white collar crime," and so on?

He sat there and basically said, "You want an honest answer, I will tell you; I do not have enough people." That is the gospel truth, Mr. President. Talk about robbing Peter to pay Paul, the man does not have enough resources.

So he told the committee that the FBI has identified 400 drug trafficking organizations, identified them, gave us a chart, showed us, and he can give us names and locations and sizes, and the quantities of drugs, that they are peddling. Four hundred of them, Mr. President. So we asked him, "Director, how many have you targeted?" He said, "We were only able to attack about one-half of them Senator, about one-half." That is right. We know about 200 drug organizations that we are attacking.

I asked Director Sessions, "How many agents would you need to go after them all?" He said he would need 1,000 more.

So as this next chart will show, Mr. President, what we did, we added 1,000 in the bill, which I will be adding as an amendment to S. 1970, adding an additional 1,000 agents to go after all of the drug trafficking groups, while without my amendment we will be adding only the 272 new agents. That is better than none, Mr. President.

My amendment would also boost other Federal crime fighting agencies by adding 1,000 new DEA agents and 435 new Bureau of Alcohol, Tobacco and Firearms agents to attack the flow of illegal weapons into the hands of drug traffickers, Mr. President. We want to get tough on crime. Tell me how you get tough on crime when you know, you have identified, you have on a chart, 400 trafficking organizations, and you have the resources only to go after 200 of them. Is that getting tough, Mr. President?

Will a change in the habeas corpus law affect that? I want to change the habeas corpus law. But ask the law enforcement agencies, do you want a change in habeas Corpus or do you want to be able to attack every one of those organizations? Mr. President, I read in the paper today a welcome comment. The administration says they are going to provide more border patrol officers to boost interdiction efforts.

That is good. Mr. President, we are leaking like a sieve. Our border patrol is overtaxed, overworked, undermanned. So we add 500 border patrol

officers to boost these efforts, 347 new Internal Revenue Service positions to process money laundering investigations.

It is a big business, Mr. President, as you well know. This is not like "Godfather 1," where the Godfather is sitting out in his Long Island estate in the garden planting his tomatoes, playing with his grandson with a pencil in hand adding up the profits. This is somebody sitting on the 90th floor of a major new building, with computer terminals that exceed that which most small businesses have, doing planning and processing.

This is not green eye-shade stuff any more, Mr. President. This is sophisticated big business, and we need sophisticated Internal Revenue agents to do what they did do with the Al Capones of the world. They are undermanned, Mr. President. At tax time, what did we hear? The reason tax returns is, even though we have new processes to get them back, will be slow, we do not have enough people. Where are we going to get the people sophisticated enough to follow this trail into the Bahamas and offshore banks and Switzerland and God knows where else? Until you get their money, Mr. President, you do not begin to touch the life blood of these organizations.

We add 120 new agents to investigate drug-related crimes within the IRS; 480 new Federal prosecutors.

The distinguished Senator from South Carolina and I, at the end of last week, introduced a new judgeship bill, Mr. President. We added close to 80 new Federal judges. I see the distinguished Senator from Utah who knows a great deal about this matter. I suspect we all agree that we need the judges to process the criminal and civil docket more rapidly.

Mr. President, we also need prosecutors, so that when these jokers are nailed, caught, when they are brought to the bar of justice, they are able to be convicted and, if convicted, they are able to be sentenced.

The third part of my amendment focuses our attack on crime by targeting those areas hardest hit by drug trafficking and violent crime. This is the Biden-Kennedy-Cranston-Specter drug emergency area proposal.

Let me note here by the way how we came up with this notion. South Carolina, California, Louisiana, Arkansas, and many other areas, have all in the recent past and present been hit by natural disasters, horrifying natural disasters, that have done great damage to their citizenry and their State. What have we done as a nation? We have not said Hurricane Hugo was a South Carolina problem, let them take care of it. We did not say that. Now as we watch nightly on the news the Trinity River overflows and wipes out homes, livelihoods, and lives we do not sit in Delaware and Pennsylvania and say that is their problem. When the California earthquake hit all the American and the world's eyes were riveted on California. We did not say that is California's problem, not Utah's, or Missouri's, or Illinois'. In all those instances, when the natural disaster hit we said that is America's problem. They are Americans in need, and all of America responded.

Mr. President, these international drug cartels' locus is not Philadelphia, or San Diego, or Chicago, or New York. They are international. The fact that they land on the shores of New York, South Carolina, or Florida, is purely coincidental. Floridians, Carolinians, New Yorkers did not invent the problem. They were not the cause of this disaster. It was inflicted upon them as much as a hurricane is inflicted upon them or torrential rains.

So, Mr. President, we concluded that those communities in America that are hit like that should be treated.

The new Senator from Hawaii has come to me and he wants an amendment which I strongly support and will support him on, dealing with ice, a new form of a drug that is particularly addictive and does particularly dangerous things to the mind causing aberrant behavior that usually results in violence. We know certain things. That is starting in Hawaii. If we do not stop it on the shores of Hawaii, as sure as I am standing here it will be in California, which it already is, and as sure as I am standing here in 6 months, 8 months, 12 months, 18 months, it will be in Wheeling, WV. It will be in Wilmington, DE. It will be throughout the Nation.

So, Mr. President, it seems to me for us to sit back and say as these natural disasters strike we should say that is a local problem, you all take care of that, it is not only wrong in terms of how we handle ourselves as an American community, it is bad judgment, because if we do not stop it on the shores of California, we will not be able to stop it in the streets of Wheeling, and I am not making a judgment about Wheeling in terms of whether there is so-called ice on the streets. I do not know.

But I do know the drug problem is not avoiding any place in America. There is a pattern to it.

We saw some years ago crack cocaine. Now every American is aware of the writhing infants in incubators in pain from cocaine, and we are aware of it. We become aware of that, from reports from the Bahamas several years ago, saying it is on the way. Then it hit New York, and New York said, "my God, this is a devastating problem. Help."

Now it is in every pore, every opening, of the drug bloodstream in America regardless of where we live.

So, Mr. President, this next chart that I am about to show is a $300 million program, modeled, as I said, on the Federal Disaster Assistance Program, and it is a bipartisan alternative to the administraiton's high-intensity drug trafficking areas. Our proposal helps more places with more money for more purposes and gets the aid directly to those who need it most.

I will not bore you, Mr. President, at this moment, but I will go into this at a later date when the debate ensues. I will not bore you with the fact that the present programs, Mr. President, are not getting to the people who need them. Surprise, surprise, surprise. The States get certain amounts of money, Mr. President, and God bless the Governors; they have their hands full. But it takes months and months for it to get down to the cities and the towns, and this proposal like the game Monopoly, bypasses "go," go straight to jail. This bypasses "jail" and goes straight to "go." This gets the money in immediately.

The fourth focus, and as I said, you can see on the chart the comparison provisions, the funding level, the Bush plan is $50 million for the entire Nation. Ours is $300 million. As to the funding target, 100 percent must go to enforcement, it appears, based on the way they have it written. Ours will allow the State to provide up to 50 percent for enforcement or prevention, and many of the cities are saying, "give us money to help with prevention to help the children from getting into the drug stream, help us now before the crack, before the ice, before the methamphetamines hit our streets. Help us now."

The targeted areas of the Bush plan are well deserved—New York, Los Angeles, Houston, Miami, and the Southwest border. Under our proposal any area designated a drug emergency area by the President would qualify.

Just like unemployment, Mr. President, just like natural disasters, the President says this is a natural disaster, this is a drug emergency area; then they apply for a certain amount of money. They do not necessarily get it just like Louisiana and Arkansas may not get all they ask for. Mr. President, it goes to direct funding, 100 percent, wherever the district is the President, says should get it, and they can get up to $50 million.

The fourth focus of this amendment is on rural crime, 1972 I am referring to now. Despite the common perception that crime is an urban problem, drug trafficking and crime in rural areas is widespread and growing. Based on Senators BAUCUS and PRYOR'S "Rural Drug Initiative," the Biden amendment substantially increases the Federal commitment to fighting crime in rural America, providing more resources, more manpower and more training.

And as the next chart shows, there are 20 States in the country that have fewer than 10 DEA agents for the entire State. Worse still 14 States have fewer than 5 agents. Look up there at the red, Mr. President. All those States in red have fewer than 10 DEA agents that we call for here, and many of them have fewer than 5.

Mr. President, my amendment beefs up the Federal crime fighting effort in these States adding new grants for rural law enforcement agencies; increasing the minimum number of DEA agents in rural States from 3 to 10; and doubling the number of rural agents who receive specialized drug enforcement training at the Glyno training center in Georgia.

Mr. President, I might add just a little digression here, methamphetamine, which is the synthetic version of cocaine and crack in particular, is controlled by drug trafficking organizations in California. There is a problem, though. When they make this synthetic drug, which has all the negative properties of crack, for example, the chemical reaction required gives off a horrible odor, and the byproduct thrown into the streams is a toxic waste literally. So, Mr. President, they found out that as the market increased there was not any real good place to be able to do it in the middle of a city because the next door neighbor says, "My Lord, what is the odor?" As the odor is more identifiable, the police agencies can come in. So what they did is they went back to the 1968 days and 1965 days when I was in college and the version of VW bus is back in order with little smokestacks at the time. They ride the highways and process it on the highways. Guess what? They go up in the areas of Montana, Wyoming, Idaho, and North and South Dakota, and they pollute, figuratively and literally those States because they need wide-open spaces to produce this stuff.

They do not have drug enforcement agents up there, Mr. President. They do not have enough training for this particular type of activity. I am not in any way criticizing the law enforcement capability of brave women and men in those States, but they are not trained to deal with this. So we say, send them down to Glynco, GA, train them like you train the FBI. Give them a chance. Give them some DEA people to be able to go in there and organize their effort to take on these new gangs. We have all seen those B movies on late night television, when you cannot sleep and turn it on, and it is the classic genre of the motorcycle gang riding into town, taking over a small town with one police officer and 300 people. Mr. President, this is the equivalent. They need help. They need help now, not tommorrow, now.

Mr. President, our next amendment shows that we are responding to the increases in juvenile crime as well.

The fifth focus in one criminal group that needs our special attention—juvenile offenders, Mr. President. Tens of thousands of youths across the Nation are becoming actively engaged in violence and crime before they have become teenagers. Once loosely knit groups of juveniles have now organized into powerful and violent gangs.

Mr. President, it is disturbing—I will not go through it with you now because I know you know it. But, for the record, the age at which the majority of violent crimes are committed in America is dropping decade by decade and year by year. It used to be, Mr. President, that the bulk of the violent crimes were committed by people in their early twenties. All you need do is pick up the newspaper—and I am not being anecdotal—pick up the newspaper. It is violence, Mr. President. Raw, raw violence is now being committed and perpetrated by people in their early teens. And what are we doing about it?

Well, our next chart shows that this amendment that I am proposing responds to the startling increase in juvenile crime—and I say startling increase—by creating a new $100 million juvenile antidrug and antigang initiative that will fund State local programs to fight gang crime.

Remember, I talked earlier about methamphetamines going on up in those Mountain States and rural States. Well, they are gangs, Mr. President, classic gangs, juvenile gangs, Bloods and Crips and motorcycle gangs. They are not the mafioso types, Mr. President. These are kids who have become very, very, very sophisticated. Tens of thousands of youths across the Nation have become actively engaged in violence and crime, as I said, before they become teenagers.

The Biden amendment also contains many new legal tools for prosecutors and judges; tools that ensure that offenders are swiftly prosecuted and incarcerated.

Specifically, it includes three proposals to protect the public while breaking offenders' cycle of drug abuse and crime.

First, the amendment includes a proposal written by Senator SIMON which assures that offenders awaiting sentencing and appeal are not free to commit new crimes. This "manadatory detention" policy for dangerous criminals is a much-needed reform.

Second, and again based on a proposal originated by Senator SIMON, this amendment requires drug testing for all defendants released on probation, parole or supervised release. And if they fail, they are in.

And third, the amendment includes provisions that I drafted to provide the Attorney General with new powers to shut down "shooting galleries" and "crack houses."

In addition, the amendment contains several other provisions, to equalize the firepower differential between the criminals and the police—right now, many police officers find themselves outgunned by drug dealers and other dangerous criminals.

This amendment tries to shift the balance away from the firepower of the criminal and to the police officers through the DeConcini assault weapon ban of 14 weapons; a provision that allows Federal agents to use firearms forfeited by criminals; a ban on the purchase and sale of guns by those person convicted of misdemeanors involving a firearm or serious drug misdemeanor; and an authorization for law agencies to use money forfeited by drug dealers to purchase new weapons for police officers.

Finally, the amendment contains several other provisions to strengthen civil forfeiture laws; toughen public corruption statutes; create new penalties for drug-related public corruption; aid undercover investigations of property crimes—such as theft—and more.

In sum, 1972, the amendment I refer to, this amendment contains many provisions that would make a real difference in fighting crime in this country. And if the administration is as serious about fighting crime as its rhetoric says that it is—and I believe they are—I say this: Come let us sit down and support these provisions or negotiate them if you think they are too tough or if you think they cost too much money. We will try in earnest to come up with a bill that I believe the Senate can handle. But we will see who is most interested, Mr. President, in deciding whether or not we are going to be tough on crime.

Many of the provisions I cited here, I want to make it clear, just because I introduced the bill, are not only amendments that I support. I strongly suspect that many of my Republican colleagues support many of the provisions I have suggested here.

That finishes my summary of the legislation before us, and the major amendment I intend to introduce tomorrow. I have other amendments I may offer, and will be discussing them in more detail as I bring them forward.

I want to close now with a few words on how we will proceed with this bill.

As we all know, there is no unanimous consent agreement covering how we will go about considering this legislation. But the majority leader has said that we will finish this bill before we go home for Memorial Day recess, and it is going to take some hard work to get that done.

It is my hope that we can begin tomorrow with the gun issue and get through the several amendments on

that issue as soon as possible, because I believe we should take the most contentious elements of all that we are talking about and deal with them, vote them up or vote them down.

It is my hope, as I said, to begin with the gun issue and get through the amendments dealing with that quickly. Then we can move on to other matters.

Several of my colleagues have asked me if this is a drug bill or just a crime bill. I hope we could keep the amendments limited to the scope of this legislation, knowing that legislation dealing with drug demand, international drug control, and other related topics is certain to be emerging from the relevant committees later this year in the normal course of events; that is, treatment and education and all those other matters, as well as enforcement.

As for the amendments that do have some place here, I urge my colleagues to contact the managers of the bill as soon as possible. Hopefully, we can get as many of these amendments cleared on both sides as soon as possible and get them adopted quickly. I am sure there are a number of amendments my Republican and Democratic colleagues have proposed that we have not thought of and that the managers of the bill would be ready to accept because they would strengthen the effort. But I urge my colleagues to come forward as quickly as possible. If we work together, the Senate can recess on Thursday, and it can do so with the knowledge that it has passed one of the toughest crime bills ever.

That is my goal, Mr. President, and I know that is the goal of Senator THURMOND. I hope all Senators will work cooperatively toward that end.

I want to thank you, Mr. President, and thank my colleagues for their patience. As I said, when we get down to work tomorrow I will not be giving a lengthy speech about my extensive amendments I will be introducing at that time. I will merely introduce them.

Let me conclude, Mr. President, by suggesting if the truth were known there is not that much disagreement in this body on much of what has come forward. There are three serious bones of contention, I suspect. One will be the death penalty, and not the scope of the death penalty. Senator THURMOND, the President, and I agree it should be broadened greatly. But on the safeguards there will be one very contentious amendment.

The bill that is on the floor provides an amendment called the Racial Justice Act, a test that must be met before someone can be put to death after having been convicted of a crime that calls for death. There also is in that legislation protection against putting to death someone who is mentally retarded or someone who is a minor. They will be the contentious elements of the death penalty. I am not counting those people who, to their great credit—I happen not to be one of them—have a strong moral objection to death under any circumstances. But that will be one contentious area.

The second will be guns. I see my friend from Utah. My friend from Ohio is not here, Senator METZENBAUM. I imagine those two gentlemen will have a great deal to say about whether or not we ban the manufacture of anything relating to guns, whether you call them assault weapons or otherwise.

The third area will be the extent and scope of what we pass in terms of the total cost of whatever we pass.

But I really think, Mr. President, they are the three most contentious areas. There will be legislation introduced, amendments by each side, and we will split. I predict we will see on some of the more contentious amendments, Republicans splitting and Democrats splitting. This does not lend itself to straight party line legislation.

But is is my hope, Mr. President, we can get on with it tomorrow, that we can settle those most contentious areas. I have been here over 17 years. I know the Presiding Officer and Senator THURMOND have so much more experience in how this body works than either Senator HATCH of myself. But it has been my observation on very contentious issues, if you bring them up, debate them, and settle them, the rest then flows much more rapidly.

That is our hope. That is the intention. But as the Presiding Officer knows, the rules lend themselves to other ways of proceeding and we will not know until tomorrow how much cooperation we are likely to have on moving along this bill.

I want a bill, Mr. President. I want a tough bill. I think all the ingredients are there.

I want to thank in advance my colleague, Senator THURMOND, for being willing to attempt over the last 4 days, with our staffs, to see if we could work out a compromise to bring to the floor. I think if it were left to the Senator and myself we could work out a compromise. I am not sure each of us can deliver our colleagues but as these things jell, we will see if we can do that.

I thank the Chair for his patience. I thank my colleague from South Carolina for his willingness to sit there that long. I look forward to hearing what he has to say, and I look forward to this debate and passing the bill.

I yield the floor, Mr. President.

The PRESIDING OFFICER (Mr. ROBB.) The Senator from South Carolina [Mr. THURMOND].

Mr. THURMOND. Mr. President, in the beginning, I would like to say to the distinguished Senator and my friend from Delaware, I will be glad to work any way I can for a strong tough bill. I do not think the bill he has brought forth is in that category, but maybe we can get together on one that will be.

I am pleased that the Senate today will face the important issue of crime. However, it is critical that the Senator act on tough, effective legislation which will curb the crime related crisis we face in this country today.

I listened closely to the opening statement by Senator BIDEN regarding the legislation pending before the Senate. Stated simply, I do not believe this legislation is tough enough. In fact, there are many problems with it. The truth about this legislative proposal now before the Senate is that it will expand the rights of criminal defendants—I repeat—it will expand the rights of criminal defendants at the expense of those who are the victims of crime. For this reason, I intend to offer my substitute amendment to the pending legislation which is a much tougher crime package than the underlying bill before the Senate. This substitute, which is similar to S. 1971 which has 14 cosponsors and has been endorsed by several law enforcement agencies, will give Senators a clear choice. I believe the only choice is the tough, substitute package. Violent and drug related offenders must know that the commission of heinous crimes will lead to swift, harsh punishment.

Mr. President, this substitute is a sweeping antiviolent and antidrug related crime package which is similar to S. 1971, which I introduced on November 20, 1989. S. 1971, the Violent Crime Control and Criminal Procedures Reform Act is vitally important legislation designed to combat the growing problem of drug and related violent crime.

The scourge of the crime and drug epidemic has its grip upon the throat of our Nation. According to figures released by the Department of Justice, there is a violent crime committed every 20 seconds in the United States. Someone is murdered every 25 minutes and a forcible rape occurs every 6 minutes. In 1988, there were over 16,300 murders in the United States—a truly appalling number. These figures reflect the need for a stronger national effort to halt the spread of violent crime.

The pending bill, S. 1970, attempts to address many of the same issues raised in my substitute. However, the pending legislation does not properly address these important issues and falls well short of my proposal in terms of tough, effective reform which is so desperately needed. President Bush referred to the pending bill as a "sheep in wolves clothing" and as a "Trojan horse standing at the gates of Congress [which] will be tougher on law enforcement than on criminals."

I would not characterize the pending bill as such. However, I will go into detail and contrast the two.

Briefly, I would like to discuss some of the differences between the two proposals. Title I on my substitute is the Federal Death Penalty Act and it is virtually identical to a bill which passed the Senate in 1984 by an overwhelming vote of 63 to 32. This important legislation would provide the constitutional procedures necessary for implementation of a Federal death penalty.

Unfortunately, title 1 of the pending Biden bill includes the Federal Death Penalty Act as amended by the Senator from Massachusetts, [Mr. KENNEDY]. It contains the Kennedy Racial Justice Act. This version of the death penalty would eliminate the death penalty in both the Federal Government and in every State. I urge my colleagues, especially those from States where the death penalty is in effect, to understand the effect of this legislation. It is no secret that I oppose the Kennedy amendment. In fact, this amendment was soundly defeated by the full Senate when it was offered as an amendment to the 1988 drug bill. Although the title of this act sounds positive, it is deceiving. The impact of this legislation would be ominous and devastating.

The Racial Justice Act would amend Federal law to invalidate the death penalty, both in the Federal Government and in every State, whenever statistics show a racially disproportionate pattern without regard to the henious facts that led to imposition of the death sentence. It is important to note that only 3 years ago the Supreme Court examined the issue of using statistical data to invalidate the death penalty in the case of McCleskey versus Kemp. The Court rejected this proposal and noted that to take this proposal "to its logical conclusion, throws into serious question the principles that underline our entire criminal justice system * * * " Further, the unconstitutionality of such a quota system under the equal protection clause is clear. Many Supreme Court death penalty decisions seek to minimize the role of race in capital sentencing. But the Kennedy quota provisions would make purely statistical considerations based upon race paramount in upholding the validity of a death sentence.

The Judiciary Committee held hearings on the Kennedy amendment. I think it is important to note that every witness who testifed in support of the Kennedy amendment, when asked, stated that they are personally opposed to the death penalty. Several witnesses who testified against the Kennedy amendment pointed out numerous critical problems with the amendment. For example, William B. Hill, deputy attorney general for the State of Georgia, put it best when he stated succinctly, "[It] simply abolishes the death penalty." He noted that the amendment disregards the principles of equal protection and years of eighth amendment jurisprudence.

In addition, the Department of Justice strongly opposes the Kennedy provisions. I recently received a letter from the Department of Justice which clearly sets forth the administration's strong opposition to the Kennedy racial provisions. In fact, were S. 1970 presented to the President for his signature in its present form, the Department would "be compelled to urge that it be vetoed."

The Kennedy amendment is based upon the premise that the death penalty is currently imposed in a racially biased manner. Proponents of the amendment like to cite a study by Prof. David Baldus as evidence of this racial sentencing. However, the Baldus study was rejected by numerous witnesses before the committee and was rejected as invalid and unreliable by every court which has examined it.

We should realize some important facts about the death penalty. First of all, a recent Gallop Poll shows that 80 percent of Americans favor the death penalty. As well, a majority of our Nation's blacks support the death penalty. In addition, the constant repetition that American juries discriminate against minorities is rebutted by the hard facts. According to the Department of Justice, out of every 1,000 murders committed by whites, 19 whites are given the death penalty. Out of every 1,000 murders committed by blacks, only 12 blacks are given the death sentence. This means that whites, as a class, are arguably 36 percent more likely to get the death penalty than blacks.

Mr. President, I believe supporters of the Kennedy racial quota provisions would agree with the following statement: "Race should play no role whatsoever insofar as the death penalty is concerned." Yet, the Racial Justice Act would do just that. It would permit vicious murderers to avoid a death sentence by invoking the race of their victims as a shield and it would put prosecutors in the position of seeking the death penalty based upon a racial quota system.

In summary, I want to state the following so that there can be no doubt in any Senator's mind. A vote today in favor of the Thurmond substitute is a vote for a Federal death penalty and for continued validity of State death penalties currently in place. A vote against the substitute is a vote to kill, not only the Federal death penalty, but every State death penalty as well.

HABEAS CORPUS

Mr. President, title II of my substitute is identical to S. 1760, which I introduced. S. 1760 embodies the legislative recommendations of the Ad Hoc Committee on Federal Habeas Corpus in Capital Cases, or as it is commonly referred to—the Powell Committee. The legislation reforms Federal habeas corpus and collateral attack procedures and minimizes Federal judicial interference with State criminal convictions.

Although I have introduced another habeas reform proposal, S. 88, which the Attorney General and I believe is preferable, I have decided to offer the recommendations of the Powell Committee. The issue of habeas corpus reform has lingered in Congress for years and we must act. After conferring with a number of Senators, I am convinced that the Powell Committee recommendations, which Chief Justice Rehnquist supports, stand the best chance of passing since it is somewhat less controversial and will receive broader support.

Habeas petitions have grown by vast numbers in recent years. In 1941, State prisoners filed 127 habeas corpus petitions in the Federal district courts. By 1961, that figure had risen to 1,020. Over the years, that number has continued to rise with Federal district courts receiving an incredible 9,880 habeas petitions in 1988. The problem of these numerous filings is compounded by the extraordinary delay in habeas corpus filings. Currently, there are over 2,300 people on death row. Since 1976, when the Supreme Court upheld the constitutionality of the death penalty, only 124 people have been executed. The delay in filing petitions and the frivolous litigation inherent in these cases results in a criminal justice system which is overburdened with piecemeal and repetitious litigation and years of delay between sentencing and a final judicial resolution of the criminal matter.

A particular case warrants mention. In February 1979, Ronald Woomer went on an 8-hour crime spree in South Carolina. By the time he was finished, four people were murdered. Woomer, who has never disputed his guilt, was convicted of murder and sentenced to death that summer. He was first sentenced on July 18, 1979—over 10 years ago—to die in the electric chair. His case had been to the Supreme Court on four separate occasions. The Woomer case is a prime example of the obstruction of justice and inordinate delay surrounding these habeas corpus cases.

My substitute embodies the precise recommendations of the Powell Committee. The committee was formed by Chief Justice William Rehnquist in June of 1988. The Powell Committee was charged with inquiring into the "necessity and desirability of legislation directed toward avoiding delay and the lack of finality" in capital

cases in which the prisoner had been offered counsel.

The Powell Committee proposal is aimed at achieving the following goal: death penalty cases should be subject to a complete and fair course of collateral review, one in the State system and one in the Federal system, free from the time pressure of impending execution, and with the assistance of competent counsel for the defendant. Once this appropriate and fair review is completed, the criminal process should be brought to a conclusion.

This proposal allows a State to bring death penalty litigation by its prisoners within the new statute by providing competent counsel for inmates on State collateral review. Participation in the new procedures is optional with the States. This legislation also provides for a 6-month period within which a Federal habeas petition must be filed. This 6-month period begins to run on the appointment of counsel for the prisoner and is tolled during the pendency of all State court proceedings. In addition, this legislation provides for an automatic stay of execution, which is to remain in place until Federal habeas proceedings are completed. This provision ensures that habeas claims not be considered by a court under the time pressure of an impending execution.

In summary, this proposal balances the need for finality in death penalty cases with the requirement that a defendant have a fair examination of his claims. Thereafter, if the conviction and sentence are found to be appropriate, judicial proceedings will be at an end, absent any exceptional developments in the defendants case.

Mr. President, the precise recommendations of the Powell committee should be enacted, not the legislation contained in the pending bill. Although it is termed a "modified version" of the Powell committee recommendations, it is far from it. By contrast, the pending bill would have the effect of increasing both the number of cases in Federal court and the cost of litigation to the Government. The Biden habeas provisions would, according to Justice Lewis Powell—this is Justice Lewis Powell's statement—increase, not decrease, the number of habeas corpus cases—the overwhelming majority of which would be stale, frivolous, and repetitious. This is due to the fact that the bill provides for numerous exceptions to the ban on subsequent habeas cases; one of which creates a major loophole for abuse. It allows subsequent review when the convicted defendant alleges that he is the victim of a "miscarriage of justice"—no matter how many times he has previously been in Federal court. Finally, the pending bill would also overturn leading Supreme Court precedent which have kept the number of habeas cases from being even larger than they currently are and which clarify the complicated area of law surrounding the retroactivity of law in habeas cases.

It has been noted that the Biden provision is very similar to the recommendations of the American Bar Association. However, we must remember that the ABA has opposed virtually every effort to enact Federal death penalty legislation and that it also supports the previously mentioned racial justice act as offered by Senator KENNEDY.

In summary, the glut of habeas petitions in the Federal system and the unacceptable delay in execution of capital sentences are all evidence of the dire need for real reform—not specious reform legislation which will lead to more litigation and abuse. For the reasons I have stated, numerous State Governors and attorneys general oppose the measure contained in the Biden bill. In fact, I have a letter signed by 23 State attorneys general which opposes the Biden habeas measure. I ask that a copy of this letter be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. THURMOND. Mr. President, in addition, I have received numerous letters from State attorney generals, including California, Florida, and New Hampshire, which express the same sentiment. The proposal contained in this substitute is supported by the administration, the Chief Justice of the United States, the Conference of State Chief Justices, and numerous Federal district and appellate judges.

Mr. President, as Justice Powell stated during his testimony before the committee, the current situation brings our judical system into disrepute. Justice Powell, who incidentally is opposed to the death penalty, nevertheless, respects the rights of the majority to see to it that constitutionally imposed sentences of death are carried out. It is the duty of this Congress to do the same. Endless consideration of issues in criminal cases that have no merit and are filed only for purposes of delay must be eliminated from our judicial system. The principles of justice, upon which our criminal justice system is based, demand that we take action. It is imperative that we pass this much needed reform measure.

EXCLUSIONARY RULE REFORM

Mr. President, this substitute includes as title III a codification of the good faith exception to the exclusionary rule that has been recognized by the Supreme Court. All too often in violent crime and drug cases, evidence is excluded at trial simply because the law enforcement officer, by some harmless technicality, innocently violated search and seizure rules. However, the Supreme Court has recognized, in the case of United States versus Leon, that the exclusionary rule should not be used when the police officer with a warrant has acted in good faith. This provision addresses a legal loophole which allows drug offenders and violent criminals to go free despite the ruling of the Supreme Court even when the officer acted in good faith. When a law enforcement officer acts in good faith, compliance with the fourth amendment with or without a warrant, to allow a violent drug offender to go free on a mere technicality does not serve the ends of justice.

The substitute version of this bill differs from the pending bill—and when I refer to the pending bill I refer to the Biden bill—in that it extends the good faith exception to warrantless searches. The pending bill would limit the good faith exception to searches made pursuant to a warrant provided it meets several limiting conditions. By voting for the provision contained in the Biden bill, we would preclude Federal courts from further interpretation of the Leon decision. Debate in courts surrounding any further extension of the good faith exception would end. For this reason, Congress should extend the good faith exception to its logical conclusion, as is done in S. 1971 and this substitute.

FIREARMS

Mr. President, this substitute also addresses the need to punish those who commit drug related and other violent crimes with firearms. Title IV of this legislation, among other things, permits consideration of pretrial detention for certain firearms and explosive offenses, requires mandatory revocation of supervised release for possession of a firearm, and increases penalties for knowingly giving false information in connection with the acquisition of a firearm. Enhanced and mandatory penalties for those who commit violent crime should be key components of any criminal legislation and are included in this substitute. As an integral and substantive component in our war against violent crime, the firearms provisions will help ensure swift apprehension, prosecution, and punishment to fit the crime for those who violently prey upon on law abiding society. Increased drug related homicides and violent crimes are being perpetrated by drug traffickers and users at an alarming rate. The criminals who engage in the despicable crime of drug trafficking have no respect for our Nation's laws against drugs. I believe these criminals, would, with equal fervor, show no respect for laws that ban firearms. That is why we should pass laws that will unequivocally land these thugs in jail a long time as punishment for their illegal acts.

DRUG TESTING

Title V of my proposal provides for mandatory drug testing of drug relat-

ed and firearms related defendants on postconviction release. Title VI of the bill incorporates S. 326 which passed the Senate as an amendment to S. 1711. The purpose of this provision is to make it possible, once again, to prosecute and send to prison persons who corrupt the administration of government at the Federal, State, and local level. Additionally, this bill includes a provision which authorizes the use of officially sanctioned undercover "sting" operations to combat crimes of trafficking in, or receiving, stolen or counterfeited property.

DEPARTMENT OF JUSTICE REORGANIZATION

Finally, there are some additional provisions in the Biden bill, S. 1970, which this substitute does not include. One such provision is contained in title four of S. 1970. Title IV of the pending bill proposes to create a new "Organized Crime and Dangerous Drug Division" within the Department of Justice. The Attorney General is strongly opposed to this provision. In fact, the Office of National Drug Control Policy studied this proposal, as required by law, and has recommended against it. Specifically, Director Bennett concluded that the establishment of another division would "add yet another element of bureaucracy to the drug enforcement effort within the Justice Department. * * * [It] is not necessary and would not * * * enhance the civil and criminal law enforcement effort."

Further, a study of the proposal reveals that the Attorney General's decision to consolidate the Organized Crime Strike Forces with local U.S. attorneys' offices would be overturned by creating this new division within the Justice Department. This decision on the part of the Attorney General was unpopular with some Senators. Nevertheless, it is clear that this decision is within the Attorney General's administrative authority. For these reasons, Congress should not adopt this provision which would in essence be micromanagement of the Department of Justice.

In closing, the fight to win the war on crime will not be easy. Yet, one just has to witness the crime, violence, and death to know that we must enact a comprehensive death penalty, enhance the penalties for those who use firearms to commit these crimes, and reform the criminal procedures which cause so much delay and injustice within our criminal justice system. The American people demand action. We should not hesitate any longer to pass this important substitute legislation. This reform must be real reform. For Congress to pass cumbersome and ineffective legislation which can never be utilized and promote it to the American people as tough, effective habeas reform or authentic death penalty legislation would be a disservice to the American people.

Mr. President, the reasons for supporting this substitute are clear. A vote for the Thurmond substitute is a vote to preserve the dealth penalty in those States which currently have it. A vote for the Thurmond amendment is a vote to put an end to excessive dealth penalty litigation. A vote for the Thurmond amendment is a vote for law enforcement.

Mr. President, I would like to note for the record that the following law enforcement and victims' organizations have endorsed S. 1971 which is similar to this measure: The International Narcotic Enforcement Officers Association, Inc.; The Airborne Law Enforcement Association; Society of Former Special Agents of the FBI; The National Troopers Coalition; Virginia Association of Chiefs of Police; The Victims Assistance Legal Organization, Inc.; The Federal Criminal Investigators Association; and the FBI National Academy Associates. In addition, the attorney generals from the following States, all of which have capital punishment statutes, have written to express their strong opposition to the habeas provisions and the racial justice act contained in the Biden legislation: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Georgia, Idaho, Indiana, Kentucky, Louisiana, Mississippi, Nebraska, New Hampshire, Nevada, New Jersey, New Mexico, North Carolina, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Washington, and Wyoming.

The support for the Thurmond substitute serves as evidence that this legislation is the criminal law reform proposal that the American people truly demand.

For all of these reasons, I urge my colleagues to support this vital substitute legislation.

Mr. President, I yield the floor.

EXHIBIT 1

*March 12, 1990.*

Hon. JOSEPH R. BIDEN, JR.,
*Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.*

DEAR SENATOR BIDEN: Our states have capital punishment statutes, and each of our offices has had experience in federal habeas litigation. We are writing to express our strong opposition to two parts of S. 1970, and also to express our support for S. 1971.

Section 107 of S. 1970 is designed to do nothing less than end the death penalty in this country. As Attorney General Thornburgh stated in his January 24, 1990 letter to Senator Thurmond, section 107 would "have the practical effect of abolishing capital punishment in the United States—at both the state and federal levels . . ." The people of this country overwhelmingly support the death penalty as an appropriate punishment in cases of aggravated murder; nearly three-fourths of the state legislatures have enacted capital punishment statutes; and Congress ought not to attempt to abolish the death penalty. For that reason, section 107 of S. 1970 should not be enacted.

We are also opposed to the provisions of S. 1970 (also contained in S. 1757) that would amend the federal habeas corpus statute as it relates to capital cases. By legislatively repealing Supreme Court decisions involving the procedural default doctrine and decisions establishing non-retroactivity doctrine, S. 1970 would undermine important interests in the finality of state court judgments, would increase rather than decrease relitigation, and would significantly add to the delay that already exists in federal habeas review of capital cases. While ostensibly designed to move cases along the process, the so-called "time limits" provisions of S. 1970 would not have that effect. Instead, when coupled with the mandatory stay provisions, those two provisions of S. 1970 would increase the delay between steps in the collateral review process rather than reduce it.

As to almost every applicable aspect of the current problems involving federal habeas review of state capital cases, S. 1970 would make the situation worse instead of better. No state would willingly elect to come under its provisions, and no state should be forced to do so. The habeas corpus provisions of S. 1970 (also S. 1757) should not be enacted.

Congress should enact S. 1971. By extending the "full and fair litigation" rule of Stone v. Powell, 428 U.S. 465 (1976), to all claims, it would accomplish true federal habeas reform. State courts can fully and fairly adjudicate claims. Under S. 1971, Supreme Court certiorati review would remain, as would federal habeas determination of whether a state court's treatment of a claim had been "full and fair." By ending redundant review, S. 1971 would safeguard important interests in the finality of judgments, would decrease relitigation, and would significantly reduce delay in reviewing both capital and non-capital sentences.

We urge you and the other members of Congress to reject section 107 of S. 1970; to reject the federal habeas provisions of S. 1970 (also S. 1757); and to enact S. 1971.

We would appreciate it if you would see that this letter is distributed to the members of the Senate Committee on the Judiciary and to any other interested members of Congress.

Sincerely,

Don Siegelman, Attorney General, State of Alabama; Steve Clark, Attorney General, State of Arkansas; Robert K. Corbin, Attorney General, State of Arizona; Duane Woodard, Attorney General, State of Colorado; John J. Kelly, Chief State's Attorney, State of Connecticut; Jim Jones, Attorney General, State of Idaho, Frederic J. Cowan, Attorney General, State of Kentucky; Mike Moore, Attorney General, State of Mississippi; Brian McKay, Attorney General, State of Nevada; Hal Stratton, Attorney General, State of New Mexico; Michael J. Bowers, Attorney General, State of Georgia; Linley E. Pearson, Attorney General, State of Indiana.

William J. Guste, Jr., Attorney General, State of Louisiana; Robert M. Spire, Attorney General, State of Nebraska; Robert J. Del Tufo, Attorney General, State of New Jersey; Lacy H. Thornburg, Attorney General, State of North Carolina; Robert H. Henry, Attorney General, State of Oklahoma; Ernest D. Preate, Jr., Attorney General, State of Pennsylvania; Roger A. Tellinghuisen, Attorney General, State of South Dakota; Joseph B. Meyer, Attorney General, State of

Wyoming; Dave Frohnmayer, Attorney General, State of Oregon; T. Travis Medlock, Attorney General, State of South Carolina; Kenneth O. Eikenberry, Attorney General, State of Washington.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Utah.

Mr. HATCH. Mr. President, I want to compliment the distinguished ranking member of the Senate Judiciary Committee for the lucid and intelligent remarks that he made. There is no question in my mind that when it comes to stiff criminal laws, laws that really are likely to do something to help our society, which is what this body generally tries to bring forth, the distinguished Senator from South Carolina has been at the forefront of every one of these battles.

I just want to personally pay my respect and compliment him for the work that he has done in the Senate Judiciary Committee ever since he has been there. I sit next to him on the Judiciary Committee, and I know the tremendous, meaningful work he has done for this country and in the best interest of this country. I remember a few years back that when we passed the most sweeping, tough, and difficult-to-pass Criminal Code reform bill, it was Senator THURMOND who helped to bring that about, having had some good work by Members in the House.

Frankly, there is nobody in the Congress of the United States who can speak more authoritatively than our distinguished Senator from South Carolina.

Mr. President, I am a cosponsor of this bill, of his substitute, and I believe we will be well put if we supported that substitute out here on the floor as we debate this issue. I rise today, Mr. President, to speak in favor of criminal justice reform to strengthen the peace forces of our society against the criminal forces. Accordingly, I have to oppose S. 1970.

S. 1970 is, on balance, a criminal rights bill. If enacted, S. 1970 would effectively eliminate the use of the death penalty not only at the Federal leve, but in the States as well. If enacted, S. 1970 would give vicious criminals convicted of capital crimes even greater opportunities than they have today to delay imposition of their death sentences. It would exclude more probative evidence than occurs today under Supreme Court precendents.

In short, as Senator THURMOND has quoted, President Bush, S. 1970 is a Trojan horse, tougher on law enforcement than on criminals, a sheep in wolf's clothing.

For years, Congress and the courts have struggled to ensure a safe society, while at the same time upholding the time-honored principles of personal freedom and security embodied in the fourth, fifth, and sixth amendments to the Constitution. With enactment of each new criminal sanction, we attempt to balance these sometimes competing interests and, for the most part, I believe that we have done reasonably well in the past.

At the same time, however, there is a feeling among the people that something is terribly wrong with the system. Despite many legislative attempts to get tough on crime, we are experiencing disturbingly high levels of violent crime in this country. As the level of drug abuse has grown, so has the incidence of violent crime and the apparent lack of respect, among criminals, and others, for the system which is supposed to protect our society.

While this lack of respect is undoubtedly due to many factors, I believe that one of the primary reasons for this attitude is a shift in the balance between the rights of criminals versus the rights of law-abiding citizens. In the zeal to guarantee the protections of the fourth, fifth and sixth amendments, Congress and the courts have created statutory and judicial doctrines which unnecessarily favor the criminal forces against the peace forces of our country. This has led to the reduction in the level of respect that our criminal system needs in order to be effective.

The statutory and judicial doctrines to which I refer are those which prohibit the introduction of probative evidence into trial simply because an officer made a minor technical error in the search or seizure of the evidence; those doctrines which permit the endless appeal of cases and sentences; those doctrines which return criminals to the streets long before they have served the sentences imposed; as well as the failure to put into place an effective Federal death penalty.

That is why I am glad that we are finally getting a chance to address these issues here on the Senator floor. We have attempted to deal with them before, but we never seem to take all of the steps necessary to have a positive effect. Today we take up S. 1970, which, its sponsors claim, will adequately address these issues. Unfortunately, my review of its provisions makes it abundantly clear, at least to me, that S. 1970 is not the solution. Instead of calling this a tough on crime bill, something that we desperately need, this bill should be called the soft on crime bill. Let me explain why.

DEATH PENALTY

For years we have been in need of an enforceable, constitutional Federal death penalty procedure. The American public supports the death penalty as an appropriate response to violent crimes, and they have demanded that we put into place the procedures necessary to enforce such a penalty. I would remind my colleagues of the historical fact that there has always been a Federal death penalty. A variety of Federal crimes are already punishable by death. The debate today is not about whether or not we should create a Federal death penalty. Instead, the need for legislation is only to adopt procedures to allow the death penalties already on the books to be constitutionally carried out.

Retired Justice Lewis Powell wrote on the subject of capital punishment last year in the Harvard Law Review. (Powell, "Capital Punishment," 102 Harv. L. Rev. 1035 (1989)). He noted that:

> The Supreme Court has made clear that death is a constitutionally valid sanction for some offenders, and a clear majority of citizens favors its use.

I certainly agree with his conclusion.

The death penalty is justified on several bases. First, there is retribution: it is consistent with most people's sense of justice that the most serious crimes be punished with the most severe punishment. That is also my personal view. In a democracy, it is right that the people's view on this fundamental question be followed. After all, this is not some arcane question of tax policy or nuclear physics—it is, instead, a question of elemental justice, of life and death, as to which each citizen is every bit as competent as we are to say what is right and what is just.

The people of America have clearly spoken on the question of the death penalty. Although the Supreme Court invalidated 37 existing State death penalties in 1972, in the years following the Furman decision, 40 State legislatures voted to adopt death penalties. That exceeds the number of States that have had the death penalty at any other time in our history. The overwhelming margins by which death penalties have been adopted by referendum in California, Illinois, and other States are also testament to the current sense that this punishment is needed.

As a second basis for supporting the death penalty, I believe that the penalty is both a general deterrent and a specific deterrent to crime. No one has ever disputed the penalty's effectiveness as a specific deterrent: murderers who are executed will clearly never murder again. Several prison guards have been murdered by criminals originally sentenced to death, but, for various reasons, not executed. Had their death sentences been carried out, we know as a matter of undeniable fact, that those brave prison guards would be alive today.

I also believe that the death penalty is a general deterrent to crime. For some capital offenses, this proposition is undeniable. Consider treason, espionage, murder for hire—it is clear that in many cases the crime will not be

committed if the potential punishment includes the ultimate sanction, a price some potential criminals will not want to risk. In these crimes of calculation, the criminal has a price and considers the penalties to be encountered in deciding whether or not to commit the crime.

Finally, I note that some scholars think that the mere existence of the death penalty deters the commission of capital crimes generally. This view is also in accord, I believe, with the natural instincts of most persons. It is common for death penalty opponents to dismiss this basis for having the penalty, but I believe that deterrence does provide an additional independent reason for retaining the death penalty.

Still, I do not place my support for the penalty on that basis alone or on any other single basis. One's innate sense of justice as to the appropriateness of a certain penalty cannot be so neatly categorized, nor may it always be defended in words that will convince others. It is enough for me that I believe the punishment to be right and that so many of my fellow citizens—each of them as competent as I to decide—also agree.

Some other death penalty issues should be dealt with briefly. First, no one should be fooled by the claims of some that the death penalty is carried out on innocent persons. It is not. While one recent study has made that claim, the Judiciary Committee recently held hearings on this subject, and testimony was received from Assistant U.S. Attorney Paul Cassell. He is the coauthor of the leading law review article on this subject in the Stanford Law Review, where it is conclusively demonstrated that no alleged instance of an innocent person's being executed has ever been accurately proved. More attention is given to the establishment of the truth in death penalty cases than in any other area of human endeavor. Most death penalty cases involve no assertion of innocence on the part of the criminal—many confess their crime and never withdraw or dispute their confession.

I ask unanimous consent that the law review article to which I have referred be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HATCH. Second, I turn to the question of whether the death penalty is applied disproportionately with regard to the race of the perpetrator or of the victim. We will hear much on this subject later, but I would simply note at this point that no court has accepted this theory, nor is this statistical approach to achieving racial justice likely to produce anything except paralysis in our criminal justice system. The Senate properly recognized the fallacy underlying this theory when, in the 100th Congress, a proposal to prohibit the death penalty in the Federal courts on this basis was soundly rejected by the Senate. S. 1970 would abolish the death penalty in the States as well.

This is the major underlying problem with the death penatly title of S. 1970. Even though there is page after page of procedures to impose and carry out death sentences, it is all for nought. Buried within these procedures is section 107, the so-called Racial Justice Act, which would effectively eliminate the death penalty in both Federal and State courts. For now, I would simply note that my conclusion that section 107 would eliminate the death penalty in America is shared by the attorneys general of most States, as well as by the Attorney General of the United States, who has written that he will recommend a Presidential veto of any bill containing such a provision.

In addition, S. 1970 also contains a very problematic provision relating to the statutory mitigating factors that it would recognize as cutting against the return of a death sentence. Mitigating factor No. 8 requires the sentencing jury in a death penalty case to consider by way of mitigation the fact that: "Another defendant or defendants, equally culpable in the crime, will not be punished by death." (Proposed section 3592(a).)

This mitigating factor is nonsensical; its unforseen consequences have surely not been considered by the drafters of this legislation; and the provision, if not removed, will only guarantee jury confusion or mistake.

The basic problem is that capital defendants, more often than not, are not tried together, and the jury in whichever trial takes place first will simply not be able to know what the ultimate disposition of the case against other accomplices of their defendant may be. Thus, this mitigating factor makes the jury's sentence inherently conditional—months or years after trial, the sentence in the first case could be upset by another jury's decision to accord mercy to the first defendant's accomplices. If that were to happen, then the first defendant would surely argue on appeal or postconviction review that his jury had not been properly instructed as they had not heard any evidence on a statutorily mandated factor. He might well be entitled to a vacation of his death sentence and to a new sentencing hearing.

There are many reasons why a prosecutor may choose to try criminal defendants in a certain order or may be compelled—by sixth amendment considerations or speedy trial provisions—to try one defendant first. This subsection makes that prosecutorial decision a matter of life or death—that is inappropriate.

Our goal is enacting these death penalty procedures should be to enhance certainty and finality. That goal is not served by the approval of a provision such as subsection 8 which can only have the effect of introducing uncertainty into the process.

Even if there were a workable way to put before the jury the information which subsection 8 finds relevant, I believe that it should be rejected. One jury's decision to show mercy to a capital defendant—for whatever reason—is inherently specific in that case and not necessarily relevant to any other case. Indeed, its relevence can only be established where the second jury is informed as to the possible reasons why the first jury decided not to return a death sentence.

If the first defendant, for example, had no criminal background, and the second defendant had been twice convicted of murder, a possible reason for the discrepancy in result would be shown. But under subsection 8 the second jury would not receive the benefit of this information. It would only learn that the other defendant had not been sentenced to death. That information is thus inherently misleading unless a full review of the record of the other trial is provided. That is simply not a jury's proper function. Appellate courts regularly review death sentences with an eye toward detecting disparities in treatment for similarly situated defendants. That is where such investigations properly lie; not in the hands of the jury.

The Thurmond substitute, S. 1971, on the other hand, provides a balanced, fair set of procedures. It will restore an important tool for Federal prosecutors in their efforts to help reduce violent and drug related crimes. It removes any question that may exist that the Federal Government can, in most serious cases of treason, espionage, airline hijacking, and other capital offenses, carry out the death penalties that are on the books. And most important, it does not interfere with the States' right to impose death penalties.

This is not, Mr. President, a partisan issue, no matter how the other side of the aisle may try to portray it. Chairman BIDEN received a letter last March from the following State attorneys general and other chief legal officers expressing their strong opposition to section 107 of S. 1970, the so-called Racial Justice Act, as well as to its habeas corpus provisions. At the same time, these legal officers expressed support for S. 1971.

The signers of the letter to which I refer are the following:

The attorney general of Alabama: Don Siegelman, a Democrat.

The attorney general of Arkansas: Steve Clark, a Democrat.

The attorney general of Arizona: Robert K. Corbin, a Republican.

The attorney general of of Colorado: Duane Woodard, a Republican.

The chief State's attorney of Connecticut: John J. Kelly, whose party affiliation, if any, is not known to me.

The attorney general of Georgia: Michael J. Bowers, a Democrat.

The attorney general of Idaho: Jim Jones, a Republican.

The attorney general of Indiana: Linley E. Pearson, a Republican.

The attorney general of Kentucky: Frederic J. Cowan, a Democrat.

The attorney general of Louisiana: William J. Guste, Jr., a Democrat.

The attorney general of Mississippi: Mike Moore, a Democrat.

The attorney general of Nebraska: Robert Spire, a Republican.

The attorney general of Nevada: Brian McKay, a Republican.

The attorney general of New Jersey: Robert J. Del Tufo, a Democrat.

The attorney general of New Mexico: Hal Stratton, a Republican.

The attorney general of North Carolina: Lacy H. Thornburg, a Democrat.

The attorney general of Oklahoma: Robet H. Henry, a Democrat.

The attorney general of Oregon: Dave Frohnmayer, a Republican.

The attorney general of Pennsylvania: Ernest D. Preate, Jr., a Republican.

The attorney general of South Carolina: T. Travis Medlock, a Democrat.

The attorney general of South Dakota: Roger A. Tellinghuisen, a Republican.

The attorney general of Washington: Kenneth O. Eikenberry, a Republican.

The attorney general of Wyoming: Joseph B. Meyer, a Republican.

This list does not include many other State attorneys general whom I know to agree with its conclusions. I have, for example, received a similar letter of support for S. 1971 and opposition to S. 1970, from the Honorable R. Paul Van Dam, the attorney general of my home State of Utah. He is, like many of the names which I have just read, a Democrat.

These views on the dangers of the death penalty provisions of S. 1970 are clearly bipartisan.

S. 1970 will eliminate the death penalty in this country. The Thurmond substitute will make it usable again.

HABEAS CORPUS REFORM

Let me turn now to the issue of Federal habeas corpus. Since 1867, the Federal Government has by statute allowed certain prisoners in State confinement to challenge the constitutionality of their convictions or sentences by means of an application filed in Federal district court. While this remedy was originally limited to jurisdictional challenges and later expanded to encompass all constitutional claims, the habeas corpus remedy under 28 U.S.C. 2254 is now virtually limitless. Every prisoner in State custody can relitigate the validity of his confinement through this means for a virtually unlimited number of times throughout his imprisonment.

Let me give you an illustration. I brought this chart with me that we use in the Judiciary Committee. In Utah, we have a man on death row named William Andrews. He committed one of the most heinous crimes. Everybody knows he has done it. He has been convicted justly and properly. The crime was committed in April 1974—April of 1974.

As of today, May of 1990, he is in the 17th year of appealing his sentence. He has taken 26 appeals, many of them habeas corpus proceedings. Fifteen of the appeals are Federal habeas corpus cases or appeals therefrom. Eleven are State habeas corpus appeals. Everybody knows he is guilty, everybody knows he committed the crime, everybody knows it was heinous, and everybody knows the sentence was justified, I would use the death penalty in a very limited way, only where it is justified and only where the crimes are tremendously heinous crimes, as these crimes were. Yet these 26 appeals, 15 of them through our Federal courts—and as far as I know they are appealing again—these appeals have cost the taxpayers millions and millions of dollars. Some States are failing to use the death penalty as well as they should because they just cannot stand the appeals. They cannot stand the expenses involved; 26 appeals over 17 years.

I think that is something we all ought to be concerned about. I will have more to say about it at a later date.

Because a prisoner has nothing to lose and everything to gain from taking every opportunity to relitigate and reexamine his conviction, it is not surprising that the habeas corpus remedy is particularly prone to abuse. I believe that reasonable limits on a prisoner's opportunity to relitigate his case must be recognized in order that the judgment of the court and jury not be trivialized. The failure of our Federal statute to provide any such limits has gone uncorrected for too long.

Reasonable limits on a prisoner's opportunity to relitigate his case must be recognized in order that the judgment of the court and jury not be trivialized. Currently, prisoners can just appeal as long as they have a new idea every time they turn around. And there are plenty of innovative lawyers with plenty of new ideas to keep these appeals going in this case as well as others.

I would also add, from the perspective of penology, that there is value in affirming that a criminal judgment is final and correct. Only then can a defendant begin to come to terms with his crime, recognize his debt to society, and begin the process of rehabilitation. Constant relitigation of purely procedural issues, entirely apart from questions of guilt or innocence, can only be counterproductive to the goals of incarceration.

It is clear that this area is in need of some serious reform. But, look what we get from the habeas corpus provisions of S. 1970.

The habeas corpus provisions of this bill will dramatically compound the problems that exist today, not reduce them. These provisions are a giant step in the wrong direction. Instead of enacting the reform which everyone seeks—resulting in less delay and more finality in resolving criminal cases—the proposed bill will do just the opposite: It will overrule many of the most significant Supreme Court cases of recent years which have had some effect in stemming the habeas corpus hemorrhage, and it will introduce new avenues of delay and postponement to be exercised by prisoners on death row.

S. 1970 will increase, not decrease, the number of habeas corpus cases—the overwhelming majority of them "stale, frivolous, and repetitious"—in Federal court. I submit, Mr. President, that a bill which allows any death row inmate alleging that he is the victim of "miscarriage of justice" to obtain another review of his conviction and sentence in Federal court—no matter how many times he has previously been to Federal court—is not calculated to reduce the number of habeas corpus petitions. But that is what S. 1970 provides. Proposed section 2257(c)(3). That is one of the reasons why retired Justice Lewis Powell as well as the chief judges of the 5th and 11th circuit courts of appeals have testified that enactment of title II of S. 1970 will result in more, not fewer, repetitive habeas corpus cases.

S. 1970 will overturn leading Supreme Court precedent. Justice Powell also pointed out the deleterious impact of S. 1970's procedural default rule. Proposed section 2259 requires the district court to hear every claim that alleges a "miscarriage of justice," even if the argument has been specifically waived or abandoned at trial or on appeal for strategic or other reasons. This rule would overrule the leading Supreme Court case of *Wainwright* v. *Sykes*, 433 U.S. 72 (1977). This decision has kept the number of habeas cases from being still larger by prohibiting a prisoner from raising in Federal court a claim which he is legitimately barred from raising in State court unless the prisoner can show good cause for the default, resulting in prejudice to his case. That is a reasonable rule, broad enough to allow every

genuine case of constitutional error to be heard. It should be retained.

Also overruled by S. 1970 would be the plurality opinion in *Kuhlmann* v. *Wilson*, 477 U.S. 436, 454 (1986). That case stated that successive habeas petitions should only be allowed where questions of guilt or innocence were raised. The Powell Committee on habeas reform specifically recommended limiting successive habeas petitions to those involving questions of guilt or innocence, but S. 1970 would expand current law by permitting any petition alleging a miscarriage of justice to be heard.

S. 1970 does not establish a definite time limitation on filing habeas petitions. While S. 1970 purports to limit the availability of Federal habeas relief to the first 365 days after the exhaustion of all State remedies, there is an exception large enough to swallow up the purported rule. Whenever the death row inmate files a certiorari petition in the Supreme Court—and he can file as many of these as he wants—the statute of limitation is tolled—proposed section 2258(1).

S. 1970 contains a dangerous innovation in criminal law which I do not believe has previously been proposed. The question of whether a decision of an appellate court shall have prospective or retroactive effect is intimately connected with the question of whether a criminal conviction can ever be final. Under current law, a defendant whose appeal is pending can generally take advantage of any recent or new court decision that is favorable to him. However, once his direct appeal is finished, and his case is considered final, he cannot avail himself of newly announced court decisions that are designed to govern the proceedings in future cases.

This sensible rule is the only one that allows a criminal case to achieve any degree of finality. The rule, moreover, is a salutary one because it encourages the courts to develop new and more fair rules of criminal procedure free from the fear that a newly prescribed rule will have the effect of opening the jailhouse doors.

The Miranda case is a good example of how these principles work in action. When the Supreme Court laid down new rules which all future defendants could claim, the Court specifically held that the rules would only apply prospectively. How could they have held otherwise? To say that the specific Miranda rules must have been given before the Miranda case had even been decided would have meant that virtually every prisoner in America would have had to be let out of prison. Had the Supreme Court not have possessed the power to specify that its decision would apply only prospectively, we can certainly assume that it would never have decided Miranda as it did. The same is true of Escobedo versus Illinois and any number of other leading cases in the field of criminal procedure.

But S. 1970 would take this power away from the Supreme Court. It would instead give to an individual Federal district court hearing a habeas petition the power to overrule the holding of the Court on this question of retroactivity—proposed section 2262. It would moreover allow the district court to apply cases retroactively to criminal cases that have already become final—thus opening up for review cases that may have been settled for years or decades.

As the Attorney General has recently observed, this innovation would overrule several leading Supreme Court cases and would "resurrect the chronic problems of unpredictability and lack of reasonable finality of judgments" which those decisions put to rest—letter of Dick Thornburgh to Senator THURMOND, March 15, 1990, page 7.

No efficient system of criminal justice can function under such an arrangement. If nothing else, the proposed retroactivity rule of S. 1970 would encourage prisoners to file repetitious petitions simply on the hope that their petition may be heard by a new district judge—one who may decide the retroactivity issue differently than the previous judge. At least under the current system, the Supreme Court sets the rules and they apply nationwide.

Consider another absurdity of proposed section 2262: It would establish one rule for death cases while leaving in effect the current retroactivity rules for every other case. Thus a prisoner sentenced to life in prison would have to serve out his sentence even though a new nonretroactive Supreme Court case would, if it had applied to his case, result in reversal. However, a death row inmate claiming the very same error would be able to receive a new trial—or even his freedom—based on the same Supreme Court decision. Is that a rational result? Is that the equal protection of the laws? We would be allowing the clearly more culpable defendant to benefit from the new law while continuing to deny its benefits to the less culpable criminal. That is frankly absurd, if not in fact unconstitutional.

The retroactivity provision of S. 1970 is not designed to achieve justice—its only purpose is to prevent the execution of persons who have been otherwise unsuccessful in preventing the carrying out of their death sentences.

I would like to turn, now, Mr. President, to the appointment of counsel provisions of S. 1970. Title II provides counsel, at taxpayer expense, for what I believe is the first time ever to plaintiffs in civil cases—litigants who have no constitutional right to counsel. Moreover, the typical habeas petitioner on death row has already had his death sentences reviewed and affirmed by at least three and as many as nine different courts, including the Supreme Court of the United States. Habeas cases only begin, by definition, after the criminal case is over and the Government has no further prosecution pending. They are civil cases, tried under the rules of civil, not criminal, procedure. *Browder* v. *Director, Dept. of Correction*, 434 U.S. 257, 269 (1978). There is no constitutional right to counsel in these cases. A habeas petitioner has, moreover, already received or been entitled to receive free appointed counsel in as many as nine separate judicial proceedings before ever coming to Federal court. I think that is enough.

S. 1970 writes into law very specific and unrealistically limited experience requirements for appointed counsel. Where counsel is appointed before trial, this bill requires that at least one attorney must have been admitted to practice in the very court in which the prosecution is to be tried for not less than 5 years and must have had not less than 3 years' experience in the trial of felony prosecutions in that court. Why the relevant practice requirement should be required to be obtained in a specific court—some States have nearly 100 different courts—and in no other, is not apparent.

For postconviction appointment of counsel, that is, for attorneys to file civil actions in Federal trial court, the bill is entirely backward. It calls for the appointment of attorneys with experience in trying appellate criminal cases in State court. On all three variables, into which the legal practice commonly divides itself—civil versus criminal practice, trial versus appellate practice, and State versus Federal practice—this bill chooses the wrong one as an experience requirement for appointed counsel. One who is taking a Federal habeas case will have to draft pleadings pursuant to the Federal rules of civil procedure, will have to be admitted in the relevant Federal court, and will have to know the rules of practice pertaining to district court, that is, trial-level legal work. But the bill calls for a State criminal appeals specialist to do all of this—an attorney who may have spent his entire career in State court, practicing under State rules of criminal procedure, in appellate cases, where there is never the need to conduct discovery, examine witnesses, or try a case. All of these things will be required of the attorney in a successful habeas petition.

As my remarks should indicate, there are many variables to be considered when the question is the appointment of a particular lawyer in an individual case. I, for one, am satisfied with the current system of discretion-

ary appointment whereby our Federal judges will appoint counsel in every case in which a colorable claim is raised—and, as the reported cases indicate, in many cases where no legitimate claim is made—and they will appoint counsel based on their knowledge of the local legal community. That system has served us well; there is no need to abandon it at this time.

I would remind my colleagues that when we discuss postconviction counsel we are talking about prisoners whose guilt has been established beyond a reasonable doubt and whose conviction and sentence have, in every case, been affirmed by the highest appellate court of the State, and, in most cases, by the Supreme Court of the United States. Only then, after their appeals are over and their criminal case is completed, would S. 1970 operate to provide still more lawyers for the prosecution of their civil remedies.

S. 1970 expands the right of appeal from adverse rulings on habeas petitions. Under present law, most unsuccessful habeas petitioners may only appeal the dismissal of their petitions where the district judge issues a certificate of probable cause, asserting that the legal issues presented by the case are not entirely frivolous. S. 1970 creates, for the first time, an absolute right to have habeas decisions reviewed on appeal—proposed section 2260. This will further aggravate the current overload being experienced by the Federal courts of appeals. Moreover, the new appeals allowed by S. 1970 will, by definition, be frivolous cases which would not previously have been litigated beyond the trial level.

These are the principal reasons why any Senator who truly favors reform of the habeas corpus system should oppose the habeas corpus provisions, title II, of S. 1970. S. 1970 is not habeas reform; it is habeas even further out of control. The habeas provisions of S. 1971, the Thurmond bill, by contrast, are designed to establish a true time limitation—1 year after exhaustion of State remedies—for instituting habeas cases and to preserve and codify the important Supreme Court rulings in this area.

Mr. President, 37 years ago, Justice Robert Jackson complained that the Supreme Court's radical extensions of the Federal habeas corpus statute to allow for the complete review of all State criminal convictions had resulted in the Federal courts being inundated by "floods of stale, frivolous, and repetitious" cases. *Brown* v. *Allen*, 344 U.S. 443, 536 (1953). The "flood" of which Justice Jackson spoke was the 541 habeas petitions filed in 1952; he could never have foreseen the more than 10,000 petitions which are now filed annually in our Federal courts. Still, Justice Jackson's characterization of the typical habeas petition is, if anything, even more accurate: they continue to be overwhelmingly frivolous and repetitious, particularly in death penalty cases; and they continue to demand a disproportionate share of the judicial branch's attention as they tie up our Nation's trial and appellate courts. A way of limiting the habeas jurisdiction to genuine cases of constitutional error must be found.

Some have indicated we could free up as many as 100 Federal judges in this country if we would truly reform, as does S. 1970, the habeas corpus laws.

Mr. President, as I noted earlier during my remarks on the death penalty, this is a bipartisan issue. Another reason why I say that this issue is nonpartisan is because of the Senators who have previously endorsed the Thurmond habeas proposal to the extent of having voted in favor of it in 1984. At that time, the following democratic Senators voted to support this version of habeas reform: BUMPERS, BURDICK, BYRD, DECONCINI, DIXON, EXON, FORD, BAUCUS, HEFLIN, INOUYE, JOHNSTON, MITCHELL, NUNN, PELL, BOREN, and RIEGLE.

That is about the democratic Senators who are still serving in the Senate. Many others joined to make the 67 to 9 majority by which the Thurmond habeas proposal previously passed this body.

The Thurmond substitute provides true habeas corpus reform. S. 1970 is soft on habeas corpus reform; the Thurmond substitute is strong.

EXCLUSIONARY RULE REFORM

The fourth amendment protects the right of the people against unreasonable searches and seizures. In order to enforce that right, the courts created the exclusionary rule. Under that rule, whenever evidence is obtained unreasonably—according to current fourth amendment standards—it is inadmissible as evidence in court. Although the fourth amendment triggers its judicial application, the exclusionary rule is not a part of the Constitution. This court-made rule was first adopted for Federal cases in *Weeks* v. *U.S.*, 2332 U.S. 383 (1914) and applied to the States in *Mapp* v. *Ohio*, 367 U.S. 643 (1961).

Under the rule, evidence considered to have been obtained illegally is not permitted into trial. In addition, any other evidence obtained as a result of that illegal evidence is also tainted and inadmissible. The result of this rule has often been that completely credible and probative evidence critical to conviction, seized in the heat of apprehending a suspected felon, may be excluded from consideration solely because a court deliberating months later believes that it was obtained in an unreasonable fashion. Under the rule, a criminal who, in fact, committed a dreadful violent crime, even one who is caught in the act, is set free—not because he is innocent, but because the evidence necessary to establish his guilt is deemed to have been unreasonably seized.

Until 1984, even when the police officers obtaining the evidence have acted under a good-faith reliance on a search warrant, the evidence was still excluded. In the 1984 case of *United States* v. *Leon*, 468 U.S. 897, the Supreme Court held that the exclusionary rule would not bar the introduction of evidence seized by officers acting in reasonable reliance on a search warrant issued by a detached and neutral magistrate, even if the warrant is later found to be invalid. In other words, if the officers acted with a good-faith reliance on a search warrant, the evidence would be admissible.

Despite the Leon case, the exclusionary rule still goes too far in protecting criminals, particularly in cases involving warrantless searches. It is my view, and the view of many others, that further modification of the rule is still required. Again, S. 1970 is a giant step in the wrong direction.

As drafted, the exclusionary rule provisions of S. 1970 appear on their face to be a codification of the law as set out in the Leon case. As such, I would argue that these sections are not really necessary since Leon is already the law. Furthermore, the codification of the Leon standard might be viewed by some courts as a prohibition on their ability to further expand the good-faith exception or to judicially remove the rule altogether.

But, in any event, S. 1970 does not even go so far as to codify Leon. S. 1970 departs in two ways from the Leon decision that will have a restrictive effect on the Leon good-faith rule. Under this bill, the rule would not apply if the judicial officer provided approval of the warrant without exercising a neutral and detached review of the application for the warrant. This is different from the language in the Leon case which stated that the good-faith rule wold not apply in cases where the issuing magistrate wholly abandoned his judicial role in the manner condemned in *Lo-Ji Sales, Inc.* v. *New York*, 442 U.S. 319 (1979). The Lo-Ji case involved an egregious situation in which the magistrate issued a largely blank warrant, accompanied the officers on the search, and gave ad hoc authorizations to seize particular items at the search site.

The facts of the Lo-Ji case are pretty specific, yet the language of S. 1970 seems to invite a much broader inquiry into the role and procedures followed by the magistrate. It would invite attacks on the use of evidence based on alleged failings of the issuing magistrate in neutrality or detachment, even though he was unquestionably carrying out his normal judicial function. I would also question the redundancy of the terms detached and

neutral. In establishing the good-faith rule, the bill states that the warrant must be issued by a detached and neutral magistrate. But the second exception to the general rule states that evidence may be excluded if the magistrate did not exercise neutral and detached review. Are these conditions the same or different? If they are the same, why are they both stated? If they are different, what does one add to the other? This exception just seems to add uncertainty and invites interpretive problems.

The second restriction placed on the Leon rule by this bill occurs in language which provides that good-faith rule would not apply in cases where "the warrant is so facially deficient that the executing officers could not reasonably presume it to be valid." The Leon case cites an example of the failure to particularize the place to be searched or the things to be seized and makes reference to the case of *Massachusetts* v. *Sheppard,* 468 U.S. 981 (1984). In that case, the warrant was seriously deficient on its face, but the court held that it was nevertheless reasonable for the officer to rely on it in light of the magistrate's assurances that he would correct the deficiency. Again, because the bill seems to broaden the scope of the Leon case exceptions, it would restrict the effect of the good-faith rule.

Finally, in addition to the fact that this language appears to restrict the Leon rule, this bill does not address the good-faith issue with respect to warrantless searches. This is an important part of the debate on exclusionary rule reform. In my mind, these are serious problems with the language of S. 1970.

The Thurmond substitute, on the other hand, addresses these concerns. Its provisions would permit the admission of evidence obtained in circumstances justifying an objectively reasonable belief that a search was in conformity with the fourth amendment.

Under the Thurmond bill, this standard would apply the underlying principle of the Leon case to circumstances in cases involving warrantless searches, as well as in cases involving searches pursuant to a warrant. This is an important reform. As the Leon court noted, excluding evidence where an officer's conduct is objectively reasonable "with not further the ends of the exclusionary rule in any appreciable way; for it is painfully apparent that * * * the officer is acting as a reasonable officer would and should act in similar circumstances. Excluding the evidence can in no way affect his future conduct unless it is to make him less willing to do his duty." *Leon,* 468 U.S. at 920. The same rationale applies to warrantless searches. And this principle has been practiced for several years in the fifth and eleventh circuits with respect to searches both with and without warrants.

Furthermore, under the Thurmond substitute, evidence could not be excluded from trial on the basis of search and seizure violations that are nonconstitutional unless such an exclusion is expressly authorized by law. Given the high price of the exclusionary rule to the truth-finding process, and the fact that the Leon case now removes its application in relation to some constitutional violations, it is desirable to codify explicitly the principle that evidence may not be excluded on the basis of nonconstitutional violations in the absence of statutory authority to do so.

This proposed restriction on the exclusion of evidence is already implicit in the broader rule of Federal Rule of Evidence 402, which provides that—

[a]ll relevant evidence is admissible, except as otherwise provided by the Constitution of the United States, by Act of Congress, by these rules, or by other rules prescribed by the Supreme Court pursuant to statutory authority.

The Thurmond language would remove a confusing source of litigation in the lower courts which are inundated with cases in which defendants attempt to secure the exclusion of relevant and probative evidence of their guilt on the basis of alleged violations of nonconstitutional regulations.

The provisions of this bill would also protect other Supreme Court recognized exceptions to the application of the exclusionary rule which are not confined to the "objective reasonableness" situation. They would not, however, preclude the courts from considering other broader limitations on the exclusionary rule in the future.

S. 1970 is soft on exclusionary rule reform. The Thurmond substitute language provides a better approach to dealing with this admission of evidence problem.

ASSAULT WEAPONS

Mr. President, we need to make sure that we keep deadly weapons out of the hands of criminals. But again, S. 1970 does not deliver. Instead of focusing on criminals, it would place restrictions on the second amendment rights of law-abiding citizens. It would prohibit the possession of a class of firearms which have always been legal to own, and it would create a burdensome paperwork registration requirement that will be impossible to enforce. These provisions will effect only law-abiding citizens and will not stop determined criminals from obtaining any firearm that they may choose to use in a crime.

The Thurmond substitute, on the other hand, does deliver. It would strengthen existing criminal penalties for use of firearms during criminal activities, and it would also provide some additional protections to the second amendment rights of law-abiding citizens. The Thurmond bill is strong on crime.

JUSTICE DEPARTMENT REORGANIZATION

The Justice Department needs our support in enforcing the Criminal Code. Part of that support includes the freedom to manage their resources as they see fit. However, S. 1979 proposes a major reorganization. It would create a new Organized Crime and Dangerous Drug Division. This division would require additional, duplicative sections to review wiretapes, to facilitate extraditions, to manage a witness security program, to forfeit assets, to track money-laundering schemes, and to perform normal administrative overhead functions.

This reorganization would also reverse the consolidation, effective December 31, 1989, which merged the Organized Crime Strike Forces with the U.S. attorneys' offices nationwide. The Department of Justice opposes this title of the bill for the following reasons:

The Director of the Office of National Drug Control Policy, commissioned by Congress, evaluated the merits of structural reorganization and rejects the creation of a new Division.

Such a Division would encourage diversity in prospective standards and philosophy, where consistency is a paramount virtue.

Such a Division would require additional, duplicative sections to perform normal administrative overhead functions.

Such a Division would add yet another element of bureaucracy to the drug-enforcement effort within the Justice Department.

The Department of Justice supports the continued consolidation of strike forces with the U.S. attorneys' offices for the following reasons:

The consolidation will increase efficiency and eliminate coordination problems.

The consolidation is a change in management and not in direction, in our efforts against organized crime.

Consolidation adds greater flexibility in providing additional prospective resources at the U.S. attorney's direction, if needed.

The Thurmond substitute, on the other hand, does deliver. It lets the Justice Department conduct its own affairs and provides additional law enforcement tools such as a workable capital punishment procedure, effective reforms of habeas corpus and the exclusionary rule, and drug testing of defendants on post conviction release.

CONCLUSION

As long as the criminal justice system allows violent criminals to commit crimes with little or no threat of apprehension, serious punishment, or finality of process, I am afraid that the trend of violent crime will contin-

39-059 O-91-21 (Pt. 8)

ue. As I have stated, I believe that the most effective approach toward reducing death and injury due to violent crime must involve major adjustments to the criminal justice system. The Federal death penalty must be reinstated and enforced. Both the exclusionary rule and habeas corpus proceedings must be reformed. We need to commit still more resources to the expansion of Federal and State prison facilities, and sentences requiring internment in those facilities must be carried out to their full term. We need additional law enforcement agents and Federal prosecutors. In short, we need to reinforce deterrence in the criminal justice system by instituting certain, firm, and sure enforcement of our criminal laws. S. 1970 will seriously set back law enforcement. S. 1971, the Thurmond bill, will allow us to move ahead.

## COMMENTS—PROTECTING THE INNOCENT: A RESPONSE TO THE BEDAU-RADELET STUDY

(By Stephen J. Markman* and Paul G. Cassell**)

Given the fallibility of human judgments, the possibility exists that the use of capital punishment may result in the execution of an innocent person. This terrible prospect raises the issue of whether the risk of error in administering the death penalty is sufficiently high both to outweight the potential benefits of capital punishment and to offend the moral sensibilities that must support a free society's criminal justice system. Despite occasional claims that specific individuals have been put to death from crimes they did not commit, the risk of executing the innocent has never been the subject of thorough and rigorous empirical study. Recently, however, two opponents of the death penalty, Hugo Adam Bedau and Michael L. Radelet, have published the results of "sustained and systematic" research purporting to show that the use of capital punishment entails an intolerable risk of mistaken executions.[1] According to the authors, 350 persons have been wrongly convicted of capital or "potentially capital" crimes in the United States during this century; and twenty-three innocent persons have actually been executed.[2] These alarming conclusions cannot be taken at face value. Not only is the Bedau-Radelet study severely flawed in critical respects, it wholly fails to demonstrate an unacceptable risk of executing the innocent. To the contrary, it confirms—as convincingly as may be possible—the view that the risk is too small to be a significant factor in the debate over the death penalty.[3] Because of these shortcomings, the study deserves a response, lest it gain currency to the detriment of clear thinking on the subject for years to come.[4]

The response presented here proceeds along two lines. The first is directed at the relevance and validity of the study itself. As the discussion in Part I indicates, the study suffers from a number of flaws. The most serious of these are the authors' reliance on material irrelevant to the risk of wrongful executions and their method of determining innocence. With respect to relevance, only about seven percent of the study deals with cases of allegedly erroneous executions. Moreover, even as regards these cases, the authors' decision to include cases from the early part of this century, long before the adoption of the extensive contemporary system of safeguards in the death penalty's administration, skews their analysis of capital punishment under contemporary circumstances. With respect to methodology, the authors' method is overly subjective. It is also one-sided in its description of the cases of alleged error. Indeed, with respect to some of the allegedly mistaken executions, there appears to be little resemblance between the authors' descriptions and the actual cases.

The second line of response, presented in Part II, rebuts the argument that capital punishment should be abolished because the risk of erroneous execution is unacceptably high.[5] That argument fails for several reasons. First, no sound reason exists for believing that there is currently an intolerable risk of executing an innocent person. Over the past fifteen years, procedural protections have been adopted to reduce as much as possible the likelihood that error will be committed or, if committed, that it will go undetected. More to the point, the authors present no credible evidence that any innocent person has been executed during this period; and they do not claim that any individual now awaiting execution is innocent. In addition, the argument undervalues the important reason why the great majority of Americans and their legislators recently have determined that capital punishment should be reinstated, notwithstanding society's inability to administer the death penalty with "godlike perspicacity."[6] That reason is to save lives. Through a combination of deterrence, incapacitation, and the imposition of just punishment, the death penalty serves to protect a vastly greater number of innocent lives than may be lost through its erroneous application. Finally, society would be guilty of a self-destructive "failure of nerve"[7] if it were to forego the use of an appropriate and effective punishment simply because it is not humanly possible to eliminate the risk of mistake entirely.

### I. FLAWS IN THE BEDAU-RADELET STUDY

Starting with the unexceptionable proposition that "[f]ew errors made by government officials can compare with the horrow of executing a person wrongly convicted of a capital crime,"[8] Bedau and Radelet have undertaken an empirical study aimed at providing "a better understanding of the miscarriages of justice in capital or potentially capital cases that have occurred in the United States during this century."[9] To this end, they present "350 cases in which defendants convicted of capital or potentially capital crimes in this century, and in many instances sentenced to death, have later been found to be innocent."[10] Twenty-three of these cases, they claim, resulted in the execution of an innocent person.[11]

In fact, the Bedau-Radelet study is too flawed to provide much support for the authors' argument against the death penalty. A complete analysis of the study's shortcomings, including an examination of the validity of the authors' conclusions with respect to each of the 350 cases presented, is outside the scope of this article. Nevertheless, even a partial analysis of the study's methodology and conclusions is sufficient to expose the study's defects.

#### *A. The Misleading Nature of the Study*

As noted above, the authors assert that 350 Americans have been wrongly convicted of capital or "potentially capital" crimes during this century.[12] The category of "potentially capital" cases, however, consists in large measure of cases in which the death penalty was not available or was not the sentence given. It includes cases of persons convicted in states without capital punishment for the defendant's crime, convicted of lesser offenses such as second-degree murder and voluntary manslaughter, and convicted of capital offenses but sentenced to imprisonment rather than death.[13] The authors justify including these "potentially capitals cases" on the ground that, "except for some relatively adventitious factor," they might have culminated in a death sentence.[14] This approach seriously misstates the magnitude of the problem of wrongful capital convictions. The authors have pointed to only 200 allegedly wrongful convictions for first-degree murder during this century.[15] In only 139 of these cases were the defendants actually sentenced to death.[16] More to the point, the death sentence was carried out in only twenty-three of the 350 cases cited by the authors.[17] Thus, strictly speaking, only 6.6 percent of the study is relevant to the issue of wrongful executions. Moreover, the authors cite but a single allegedly erroneous execution during the past twenty-five years—that of James Adams.[18] A review of that case demonstrates, however, that Adams was unquestionably guilty.[19] Thus, Bedau and Radelet have made no persuasive showing that anyone has been wrongly executed since new capital punishment procedures were instituted in the wake of *Furman v. Georgia*.[20] In short, what the authors have done could be compared to studying traffic deaths before the adoption of traffic signals.

The authors also mislead readers through their presentation of the data. They apparently seek to elicit shock or alarm, rather than to promote reasoned consideration of the issues. Thus, with respect to their finding that an innocent person was sentended to death in 40 percent of the cases they present, they state: "This is error in capital cases in the strictest sense of the term, at an average rate of three such errors every two years."[21] Yet the eye-catching statistic is misleading. This is an alleged average annual rate of erroneous death sentences. But, since the discussion's context is the human propensity to err in making capital judgments, the appropriate statistic would be the number of erroneous death sentences divided by the total number of such sentences.

Also objectionable is the author's emphasis on erroneous death sentences, when the more significant consideration is the number of erroneous executions. Presumably, the issue is whether the magnitude of the risk of executing innocent persons makes capital punishment unwise as a matter of policy. The size of this risk can only be evaluated, however, by dividing the number of innocent persons who have been executed by the total number of persons executed.[22] The number of persons wrongly convicted of capital crimes and sentenced to death is less significant for at least two reasons: First, if these persons were not executed, their erroneous convictions and death sentences have no bearing on the wisdom of executing persons properly convicted of capital crimes. Second, focusing on trial court dispositions alone completely ignores the procedural protections for detecting erroneous convictions that are available through direct appeal and collateral attack.[23]

*B. The Subjectivity of the Study*

1. Determining innocence

The overwhelming problem with the Bedau-Radelet study is the largely subjective nature of its methodology and therefore of its conclusions. The linchpin of the study is the claim that the authors have identified "350 cases in which defendants convicted of capital or potentially capital crimes in this century, and in many cases sentenced to death, have later been found to be innocent." [24] This claim raises the critical question of the meaning of the phrase "found to be innocent.[11] The use of this phrase—and its variant, "proved to be innocent" [25]—clearly suggests a high degree of certainty in the determination of innocence. The use of the passive voice, however, belies that the authors themselves made many of the findings; and neither the standard they use to determine innocence nor the proof they offer to meet that standard permits such assurance.

The authors' standard is simply their belief, arrived at after reviewing the information available to them regarding each case, that "a majority of neutral observers, given the evidence at [the authors'] disposal, would judge the defendant in question to be innocent." [26] The type of information upon which the authors rely includes the alleged subsequent discovery that no capital crime was committed,[27] alleged acknowledgment of error by the state,[28] another person's confession,[29] a combination of lack of evidence against the defendant and the implication of another person as the culprit,[30] a state official's opinion that the defendant was not guilty,[31] and the "weight of the evidence" available to subsequent investigators.[32] More specifically, in the twenty-three cases involving allegedly mistaken executions, the information upon which the authors rely to "prove" innocence consists of another person's confession (six cases),[33] the implication of another person (three cases),[34] a state official's opinion (six cases),[35] and "subsequent scholarly judgment" [36] that the defendant was innocent (eight cases).[37]

The authors' dubious method of finding convicted individuals to have been innocent strikes the neutral observer reading the authors' very brief discussion of wrongful executions.[38] There one reads the following:

"The evidence for judgment of error in these cases will naturally interest many, but what we can report will satisfy only a few. In the notorious cases, we have relied on the judgment of other scholars whose investigative work convinces us that error did indeed occur. Nothing we can say here will cause the controversy that still surrounds each of these cases to abate. In some of the more obscure cases, we have relied entirely on the opinions of officials whose views we believe deserve to be taken seriously. In none of these cases, however, can we point to the implication of another person or to the confession of the true killer, much less to any official action admitting the execution of an innocent person." [39]

"Adams, James (black), 1974. Florida. Adams was convicted of first-degree murder, sentenced to death, and executed in 1984. Witnesses located Adams' car at the time of the crime at the home of the victim, a rancher. Some of the victim's jewelry was found in the car trunk. Adams maintained his innocence, claiming that he had loaned the car to his girlfriend. A witness identified Adams as driving the car away from the victim's home shortly after the crime. This witness, however, was driving a large truck in the direction opposite to that of Adams' car and probably could not have had a good look at the driver. It was then discovered that this witness was angry with Adams for allegedly seeing his wife. A second witness heard a voice inside the victim's house at the time of the crime and saw someone fleeing. He stated this voice was a woman's; the day after the crime he stated that the fleeing person was positively not Adams. More importantly, a hair sample found clutched in the victim's hand, which in all likelihood had come from the assailant, did not match Adams' hair. Much of this exculpatory information was not discovered until the case was examined by a skilled investigator a month before Adams' execution. Governor Graham, however, refused to grant even a short stay so that these questions could be resolved." [43]

Our review of the record in the Adams case reveals that this description is seriously misleading. The authors have misrepresented or excluded critical evidence of the defendant's guilt and have exaggerated the significance of supposedly exculpatory evidence. In addition, there is no basis for their suggestion that Adams was denied a fair opportunity to establish his innocence.

Bedau and Radelet begin their defense of James Adams by claiming that one witness who identified Adams leaving the scene of the crime "was driving a large truck in the direction opposite to that of Adams' car, and probably could not have had a good look at the driver." The trial testimony, as recounted by the State in its response to Adams's second federal habeas corpus petition, gives a different picture of the witness's identification:

"Willie Orange . . . passed a car travelling in the opposite direction which was wobbling all across the road so much . . . that Orange had to pull over as far to the right as he could. The car slowed before it reached him, and moved back to the left side, travelling west. Orange identified the car as being a brown Rambler, and identified the driver as being the defendant. He was positive of his identification of defendant as the driver. The next day he picked defendant out of the lineup." [44]

The article also states that "[i]t was later discovered that this witness was angry with Adams for allegedly seeing his wife." [45] Defense counsel made this suggestion, however, in their opening statement at trial in 1974 and did not later pursue it.[46]

The Bedau-Radelet article also misrepresents the testimony of the second witness to which it refers. According to the authors, this witness "heard a voice inside the victim's home at the time of the crime and saw someone fleeing. He stated this voice was a woman's; the day after the crime he stated that the fleeing person was positively not Adams," [47] Resort to the trial proceedings gives quite a different impression of this witness's testimony:

"[Foy Hortman, the witness to whom Bedau and Radelet refer,] finally drove this truck toward the house in order to find Mr. Brown [the murder victim] and saw a brown Rambler in front with mirrors on the outside and something hanging on the mirror on the inside. As he approahced the house, he thought he heard someone say, "In the name of God, don't do it." He then listened for a short while, re-entered his truck and started to back out when he saw the door that opens into the carport of the house open. The day was "real cloudy," and it rained a bit as Hortman had approached the house. When he saw someone leaving the house, he stopped his truck and got out. The person leaving the house was "real black," and had something sticking out in his front pocket. Hortman exchanged a few words with the man, who continued walking away toward the Rambler. As soon as the man rounded the corner of the House Hortman heard a door open and a car leave. The man Hortman saw appeared to be 30 to 35 years old, approximately 6 feet tall,[48] and Hortman noticed no mustache on him. Hortman said the lighting conditions underneath the carport area was "kind of dark" since the sun "wasn't shining a bit." On cross-examination, Hortman testified that the voice that he heard from inside the house did not sound like Mr. Brown's voice. On direct examination, he had testified that the voice sounded "kind of like a woman's voice, kind of like strangling or something and I thought it was on the radio or T.V. or something." On recross and direct examination, he stated that the voice sounded like "it was kind of strangled or something," and that "if he couldn't hardly talk it would sound that way, if he had been beat up like he was." Hortman also testified that he could not say that defendant was or was not the man that he saw, and that he did not identify defendant in a linelup the next day." [49]

As this testimony makes clear, the voice Hortman heard said, "In the name of God, don't do it." It was not seriously disputed at trial that this must have been Mr. Brown's last pleas for life, and therefore it is without consequence that the voice sounded in certain respects like a woman's. Moreover, contrary to the authors' implication that the real killer was a woman,[50] the witness made it clear that the person he saw leaving the scene of the crime was a man, even though he was unable to identify the man positively as Adams.

Finally, and "[m]ore importantly," the article contends, "a hair sample found clutched in the victim's hand, which in all likelihood had come from the assailant, did not match Adams's hair." [51] The article even suggests that this evidence was newly discovered but that the Governor refused to delay the execution in 1984 to consider the issue. The hair sample issue, however, actually was raised and litigated in 1984 before the Florida courts. They, like many other state courts, have procedures for evaluating recently discovered evidence suggesting that a defendant may have been erroneously convicted. In this Florida proceeding, the state pointed out that the hair sample analysis was made known to defense counsel at trial in 1974. Defense counsel chose not to use it [52] because the sample was not particularly probative.[53] It was a remnant of a sweeping of the ambulance and so could have come from another source.[54]

All of the evidence relating to the hair sample, along with several other issues, was placed before the state court which denied Adam's motion to vacate sentence in an order dated April 25, 1984.[55] Adams apparently decided not to pursue the hair sample issue. He did not even raise it when he appealed to the Florida Supreme Court on other grounds.[56]

It seems reasonable to conclude, therefore, that the article offers little evidence to support its contention that Adams was in fact innocent of the murder. More tellingly, the article ignores the compelling evidence that convinced a unanimous jury of his guilt beyond a reasonable doubt.

Josephine Brown, the wife of victim Edgar Brown, testified that shortly before the

murder she had seen a brown Rambler heading towards their residence with a black man driving it. When she returned home at approximately 10:50 a.m., she saw her husband lying on the floor in a pool of blood. He was still alive, and she attempted to treat him. He was taken by ambulance to a hospital but died the next day. Edgar Brown's physician testified that he died from blows to the head. A bent fireplace poker, stained with type O blood, the same type as the victim's was found in the house.[57]

In addition to Willie Orange and Foy Hortman, whose testimony implicating Adams has been reviewed above, three other witnesses testified that they saw Adams or his car at, or in the immediate vicinity of, the Brown ranch on the morning of the murder.[58] In addition, on the afternoon of the murder, Adams took his brown Rambler to an auto body shop and asked to have the car painted another color. The police spotted the car as the one that had been identified leaving the scene of the crime and later arrested Adams driving a friend's Oldsmobile. When he was arrested, Adams had nearly $200 in his pockets, mostly in ten-and twenty-dollar bills. One of the twenty-dollar bills was stained with type O blood. When Adams was asked about the blood on the money, he said that it came from a cut on his finger. His blood was type AB, however, while the victim's was type O.[59] Police found a pair of pants, a striped shirt, a pair of eyeglasses, a blue suit, two rings, and a gold watch in the car's locked trunk. The pants and shirt both had type O blood on them. The optician who made the glasses identified them as Edgar Brown's; the watch and rings were identified as coming from Brown's house. Adams acknowledged that the clothing was his and claimed that the jewelry "was stuff that he had acquired over a period of time." [60] Further, the owner of the construction company where Adams worked testified that Adams had failed to show up for work on the day of the murder.[61] Finally, Adams's possession of the money appeared suspicious. The construction company paid him only $2.50 an hour, and Adams's neighbor had made two loans to him totalling $35 shortly before the murder.[62]

Adams's alibi defense was that he had not driven down the road in front of the Brown ranch on the day of the crime. He said that he went to a bar to have a beer at approximately 9:00 a.m., then went to Vivian Nickerson's home, arriving shortly after 10:00 a.m. At approximately 10:15 a.m., he said, he lent his car to Nickerson, who left for approximately thirty-five to forty-five minutes to buy cards. That afternoon, he added, he put some jewelry and some of his clothes in the Oldsmobile's trunk. He denied, however, that he had ever seen the rings or watch identified as coming from the victim's house. Contrary to his earlier statement to the police, he also denied owning the pants and striped shirt on which the blood was found. Finally, he stated that he had never seen the victim's glasses before.[63] Adam's testimony was inconsistent with his earlier statement and was inadequate to explain his possession of the property taken from the victim's home.

In addition, Adams' principal alibi witness contradicted him on the critical issue of his whereabouts at the time of the crime. The witness, Vivian Nickerson, testified that Adams arrived at her home at approximately 11:15 a.m., at least twenty minutes after the murder had been committed, and that Adams also had a "strange looking face" that day.[64]

To summarize, consideration of all the evidence demonstrates beyond a reasonable doubt that Adams was guilty of the crime for which he was executed. The authors are able to maintain that Adams was the victim of a "miscarriage of justice" only by resorting to a distorted view of the evidence, derived solely from the defendant's brief before the Clemency Board, and by ignoring the compelling evidence directly linking him to the murder.[65] Moreover, as is shown by the following brief review of some of the other alleged examples of erroneous executions, the authors' misrepresentation of the Adams case is not an aberration. They show similar disregard of the evidence in many other cases.

3. Other alleged erroneous executions

The authors state that "[c]ritics who seize on the weakest cases and generalize from them to the whole set will miss the forest for a few trees." [66] Our examination reveals, however, that there are not enough "trees" to make up corpse, let alone a "forest." In evaluating Bedau and Radelet's conclusions, we focus on cases in which the authors assert that innocent people have actually been executed, because they are the most relevant to evaluating the magnitude of the risk of wrongful execution.[67] We narrow the focus further to eleven of the remaining twenty-two cases in which the authors claim that an innocent person was executed. We do so only because appellate opinions for them set forth the facts proved at trial in detail sufficient to permit a neutral observer to assess the validity of the authors' conclusions.[68] Examination of these opinions, supplemented in some instances by reference to the authors' sources and to other materials, demonstrates the weakness of the authors' methods and conclusions.[69]

Everett Applegate. Applegate and a codefendant, Frances Creighton, were executed in 1936 for having murdered Applegate's wife with rat poison. The authors' claim that Applegate was innocent, stripped of irrelevancies, rests on the incorrect assertion of an earlier author that "virtually no evidence against Applegate existed beyond Mrs. Creighton's unsupported word." [70] Even if that were true, which it is not, it would not compel the conclusion that Applegate was innocent. More to the point, questions of credibility were for the jury to resolve. The proof at trial certainly entitled the jury to credit the testimony of Creighton. She had admitted her guilt, but claimed that she had acted at the behest and under the domination of Applegate, who had threatened to cause trouble for her and her husband by publicizing their past involvement in a case of suspected murder. As the New York Court of Appeals put it after reviewing the evidence:

"[T]he jury were justified in finding [Applegate] guilty. He had reason to fear his wife. His motive for disposing of her is apparent. Ruth [Creighton's daughter] and he were in love with each other. . . .

". . . Applegate evidently wanted to marry Ruth. Marriage was talked over and Ruth was crying about it before Mrs. Applegate was in her grave. The conduct of the defendant showed that he had no fear of consequences and at least no love or affection for his wife. She had threatened to expose him. He had committed a state's prison offense. The night the rat poison was bought he went to the drug store with Mrs. Creighton. He admits giving her money for the price of the purchase. He admits giving his wife the eggnog and taking a very long time to do it, an hour or more before she could get it down. He kept feeding it to her. He declined to have a *post mortem* and was not at all interested in whether a crime had been committed." [71]

Creighton's admitted involvement in the crime permits only two possible explanations of the murder: Either Creighton, acting alone, killed Mrs. Applegate; or Creighton and Applegate, acting in concert, killed her. Together with other evidence, the proof related to motive amply supported the jury's acceptance of the latter hypothesis. Evidence showed that Creighton disliked both Applegate and his wife and wanted them to move out of her house. Those facts, however, hardly supplied Creighton with a motive to murder Mrs. Applegate, particularly considering that it was not Mrs. Applegate, but her husand, who was blackmailing Creighton. In contrast, Applegate had two powerful motives for wanting his wife dead: She had threatened to expose his unlawful sexual relationship with Creighton's minor daughter Ruth, and she stood in the way of his marriage to Ruth.

In short, the authors have presented little to persuade a neutral observer that Applegate was not guilty of murdering his wife. Beyond that, their claim that Applegate was innocent is discredited by the fact that two of the sources they cite to support Applegate's innocence actually believed he was guilty.[72]

Sie Dawson. Dawson was executed in 1964 for murdering a two-year-old boy in the course of a lethal assault on the boy's mother. The principal evidence against him was a confession which he repudiated at trial. He claimed that he had confessed only to avoid being turned over to a mob and that the woman's husband had committed the murders. Bedau and Radelet base their conclusion that Dawson was innocent on a brief that his confession was false and that the husband was the true culprit, and on the fact that "[y]ears later, newspaper stories revived doubts that had surrounded the conviction from the beginning." [73] Since the jury that convicted Dawson did not share these doubts, the critical questions in reassessing his guilt or innocence are the truth of his confesssion and the plausibility of his later claim that another person was the killer.

With respect to the first question, the authors tell us that Dawson had a low IQ and that he confessed after spending more than a week in custody. What they do not tell us is that Dawson "stoutly maintained his innocence" for five days after the alleged threats to turn him over to the mob,[74] that he admitted the murder only after learning that an eye-witness to the crime was still alive,[75] that he repeated his confession twelve days later,[76] and that every detail of the confession except the actual commisison of the crime was corroborated by other witnesses' testimony.[77] As to the claim that the woman's husband was the murderer, the authors also fail to mention that "other witnesses accounted for the whereabouts of [the husband] on the fatal day with such minute detail that it would have been almost an impossibility for him to have committed the criminal act." [789]

Stephen Grzechowiak and Max Rybarczyk. These defendants were executed in 1930 following their convictions for a murder they committed together with Alexander Bogdanoff during a robbery. Bedau and Radelet believe a neutral observer would find them not guilty because they

maintained their innocence "[i]n their final words" and because Bogdanoff exonerated them at trial and again shortly before his execution.[79] However, the opinion of the New York Court of Appeals belies the claim of innocence.[80] It begins with the following passage:

"Evidence which is not challenged establishes that on the 27th day of July, 1929, Ferdinand Fechter was killed in the city of Buffalo, Erie County. His death was the result of wounds inflicted by robbers who escaped with a large amount of money which Fechter was carrying from a bank to his home. On September 7, 1929, the defendant Rybarczyk was arrested. Early the next day the other two defendants were arrested. At the police station they were questioned separately and together. Two made written statements admitting that they had taken part in the robbery. The defendant Rybbarczyk made no written statement, but the evidence establishes that he admitted before a number of witnesses that he had taken part in the robbery and that the written statement of Grzechowiak, made in his presence, was true." [81]

Since the defendants confessed, the court was justified in observing that the "evidence . . . is clearly sufficient to sustain a conviction." [82] On that point, even the dissenting justice—who disagreed with the majority's rejection of the defendants' belated challenger to the sufficiency of the indictment—concurred: "The defendants committed an atrocious murder, and are clearly guilty." [83] Bedau and Radelet offer no persuasive reason for accepting the defendants' protestations to the contrary.[84]

Joseph Hillstrom ("Joe Hill"). Hillstrom was executed in 1915, having been convicted of shooting a storekeeper to death. Bedau and Radelet conclude that he was innocent because "[t]the presecution was based on sketchy circumstantial evidence and was in part the result of collusion between the prosecution and the trial judge in an atmosphere of anti-union hostility." [85] In fact, the evidence, which was reviewed in great detail by the Utah Supreme Court,[86] admitted of no rational conclusion other than guilt.

Shortly before the shooting, a witness saw a man on a brightly lit street outside the victim's store. She testified that he was similar to the defendant in size and features, that he had the same slim face, sharp nose, and large nostrils, and that he had the same scar on the side of his face and neck. A witness to the shooting testified that the murderer was about the same size as the defendant, had a similarly shaped head, and wore clothing like the defendant wore that night. Following the murder, during which the victim shot the killer in the chest, two witnesses saw a man, whose appearance and voice were similar to the defendant's run from the scene of the crime. In addition, the proof showed that the defendant sought medical attention for a fresh bullet wound in his chest on the night of the murder. The bullet was fired from a gun of the same caliber as that used by the victim to shoot his assailant. The defendant told the doctor that the wound resulted from a fight over a woman and asked him not to reveal the matter to others. Finally, when he was arrested several days later, the defendant admitted having thrown away his gun shortly after leaving the doctor's home.[87]

While it is true no witness positively identified the defendant as the murderer, no such proof was necessary in light of the defendant's unexplained gun shot would which, as the Utah Supreme Court aptly observed was "quite as much a distinguishing mark as though [the murderer] in the assault had one of his ears chopped off." [88] One concurring judge stated: "[T]he jury were authorized to conclude—indeed, it is not easy to perceive how rational men could have arrived at any other conclusion—that the appellant was, in fact, shot in Morrison's store at the time of the homicide." [89] Maintaining the defendant's innocence is difficult in the face of this and the other evidence summarized above.[90]

Maurice Mays. The authors rely on two arguments to support their belief that this defendant was wrongly convicted and executed in 1926 for murdering a woman in her bedroom during a robbery: (1) "The conviction rested on the testimony of a police officer who had disliked Mays for years and on the testimony of an eyewitness who never got a clear look at the killer," and (2) the "real killer" confessed several years after Mays was executed.[91] Neither argument can withstand scrutiny.

The Tennessee Supreme Court opinion gives a more complete and accurate account of the evidence presented at Mays's second trial for the murder.[92] A witness who had been sleeping in the same room as the victim, and who had no motive to identify Mays falsely, testified that Mays was the man who fired the fatal shot. The lighting conditions in the room were good, and she was positive of her identification because she spoke with him after the shooting in a successful effort to persuade him not to assault her to take money instead. Shortly after the crime she described the murderer to the police with such specificity that they immediately realized Mays was the man. They went promptly to his house, where they found him, pretending to be asleep, in possession of a .38-caliber revolver, the same type of gun used in the murder. It appeared that one bullet had recently been fired from the pistol. In addition, Mays was wearing clothing and shoes the condition of which indicated that he had recently been in the vicinity of the house in which the victim was killed. Police then took Mays before the eyewitnesses who, with no prompting by the police, immediately, positively, and repeatedly identified him as the killer. May's defense was an alibi, but he failed to account for his whereabouts at the time the murder was committed.[93] He also introduced testimony of a witnesses who claimed that the arresting officer was out to get Mays, but the officer denied this. The appellate court noted that the issue was immaterial since there was no evidence that the officer tried to influence the eyewitness's identification of Mays in any way.[94]

Finally, the notion that the person who later confessed to the murder was the true killer is baseless. According to Bedau and Radelet, this person was a white woman, who claimed to have dressed up as a black man and she committed the murder because the victim was having an affair with her husband.[95] Despite their recognition that confessions of third parties are often "false or dubious" and "must be evaluated with extreme caution," [96] the authors provide no justifiction for believing this bizarre confession to be true. Although they do note that the authorities never accepted it as true,[97] they fail to state the reasons for this official reaction: The woman's account of the murder contained serious discrepancies, and her husband explained to the police that she had confessed falsely because she was temporarily demented.[98] Given these facts, as well as the confession's implausibility in light of evidence which convinced twenty-four jurors at two trials that Mays was guilty beyond a reasonable doubt, the woman's confession provides no sound basis for crediting the author's claim that Mays was innocent.

Willie McGee. McGee, a black man convicted by three separate juries of raping a white woman in 1945, was executed in 1951.[99] According to Bedau and Radelte, "[t]he chief evidence against McGee was a coerced confession that he gave after being held incommunicado for thirty-two days after this arrest." [100] The authors apparently believe that this confession was false, because "the victim's husband and her two children, asleep in the next room never heard any commotion from the alleged attack," and because a journalist's subsequent investigation "revealed that the victim has been consorting with McGee for four years and was angry at his efforts to terminate their relationship." [101] They thus imply that she accused him of rape to make him pay for rejecting her.

Resort to the opinion of the Mississippi Supreme Court, which unanimously affirmed McGee's third conviction,[102] shows that these allegations provide no basis for concluding that the jury convicted McGee mistakenly. First, with respect to the confession. McGee made "quite a number of admissions of guilt of raping the woman," the first of which occurred as he was being taken to, and while he was at, the crime scene the day after the rape.[103] At that time, "he stated he raped his victim; pointed out the house . . . where the event occurred; pointed out where he parked his truck after seeing her lying on the bed, through the windows, before the light was extinguished; and other details—all corroborated by the physical facts and oral testimony of witnesses." [104]

According to the appellate court, "[t]he proof overwhelmingly support[ed] the State's contention that these statements were voluntarily made without duress or promise." [105]

The opinion is also more informative than Bedau and Radelet with respect to the question of consent. It appears that the victim did not alert her husband to the attack because "the woman was terrified, and resisted as best she could, even calling to her husband, who was on a sleeping porch at the back of the house, and who could not be awakened, but ceased her resistance when [McGee] threatened to cut her throat, and more poignantly to her, the throat of her infant child.[106]

McGee's oral statement to the police following his arrest also belies consent. He implied that he had decided on the spur of the moment to attack a woman who was a stranger to him.[107] Other proof that the victim did not know him also existed.[108]

Albert Sanders. Sanders, a cab driver, was executed in 1918 for having participated with Fisher Brooks in the robbery-murder of a female passenger the year before. The authors support their belief in Sanders's innocence only with Brooks's testimony that Sanders was not involved in the crime, a claim that both men repeated before they were hanged.[109] But the authors present no information that would lead a neutral observer to credit these claims. Indeed, they omit from the description of the case several critical facts relevant to Brooks's credibility. First, they fail to mention that Brooks's exonerating testimony was given after he himself had been convicted at a separate trial, and, therefore, when he had nothing

to lose by clearing Sanders.[110] Second, they overlook Brooks's admission at Sanders's trial that he had told so many different stories about the murder that he was unable to recall what he had said previously.[111] Third, they omit other facts making the exoneration unbelievable, including Brooks's admission at Sanders's trial that he had previously told the authorities that Sanders had participated with him in the Commission of the crime.[112]

But the case against Sanders consisted of far more discrediting Brooks. It included testimony by a fellow prisoner of Sanders and Brooks who overheard a conversation between the two men in which Sanders acknowledged his guilt.[113] It also included persuasive circumstantial evidence of Sanders's complicity. The proof showed that Sanders knew the victim had money, that the victim was stabbed, that Sanders had blood on his fingernails when he was arrested shortly after the crime, that he had cut pieces from, and then hidden, the clothes he had worn on the night of the murder, that bloodstains were found on those pieces and on his shoes, that he and Brooks were seen in close proximity shortly before and after the murder, and that Sanders's alibi defense was concocted after the event.[114]

Charles Louis Tucker. Tucker was executed in 1906, having been convicted of stabbing a young woman to death during a robbery. Altough Bedau and Radelet disparage the evidence against Tucker as "circumstantial only," [115] the Massachusetts Supreme Judicial Court opinion and one of the authors' cited sources show that the jury was fully warranted in finding him guilty.[116] Proof of guilt included Tucker's bloodstained knife, which he first denied owning but later admitted having broken into pieces in order to avert police suspicion, and which fit the wounds on the victim's body and tears in her corset; a slip of paper bearing Tucker's handwriting, found near the body; and a pin belonging to the victim, found concealed in Tucker's coat pocket. Furthermore, the unemployed Tucker had a ten dollar bill shortly after the murderer took a similar bank note from the victim's purse.[117] In his defense, Tucker relied on an alibi; but he did not testify himself.[118] and his alibi witness was apparently impeached with prior inconsistent statements.[119]

Bedau and Radelet do not explicitly contend that there was insufficient evidence of Tucker's guilt.[120] Their position apparently is that the circumstantial evidence of guilt outweighed by the fact that "[m]ore than 100,000 Massachusetts residents signed petitions on behalf of clemency" and that "[a]mong those convicted of [Tucker's] innocence was the county medical examiner (who lost his job because of his stand) and a clergyman who said a witness had told him she had perjured herself at the original trial." [121] The clemency petitions were not, however, the product of legitimate doubts as to Tucker's quilt. They were the result of an irresponsible campaign by partisan journalists whose reports of the case included only small parts of the state's evidence, falsely leading the public to believe that there was not sufficient evidence to convict Tucker.[122] Finally, neither Bedau and Radelet, nor the sources they cite, provide sufficient basis for crediting the medical examiner's and the clergyman's views instead of the conclusions of the jurors who convicted Tucker, the judge who presided at his trial, and the Governor who rejected the clemency petitions after a personal review of the case.[123]

The foregoing discussion makes three pertinent points regarding Bedau and Radelet's study. First, the authors have employed an unacceptable standard for determining innocence. It gives no weight at all to the considered judgment of the juries and judges who decided and reviewed the cases. Second, in the cases we have reviewed, the authors have consistently presented incomplete and misleading accounts of the evidence. Third, in each of the cases in which a reasonably complete account of the facts is readily available, the authors' claims that the defendant was later "found" or "proven" to be innocent is unconvincing. These cricial flaws seriously diminsh the value of the study to the debate over the significance of the risk of erroneous execution.

II. FLAWS IN THE ARGUMENT FOR ABOLITION

Even if Bedau and Radelet's study could be take at face value, it would not provide a rational basis for rejecting capital punishment. The danger or executing the innocent, as well as the uniquely irremediable nature of such a mistake, has long been recognized by death penalty proponets,[124] as well as by opponents.[125] Opponents contend that society should eschew the use of the death penalty entirely because of this danger. Therefore, a response to the study would be incomplete if it did not address the merits of that position.

There are two principal difficulties with the argument that we should not use capital punishment because of the risk of executing an innocent person. First, it gives weight to the slight risk of erroneous executions. This is particularly so in light of new procedural protections governing imposition of the death penalty, for Bedau and Radelet cannot provide even one credible example of an erroneous execution in the past fifteen years. Second, the argument fails to consider the countervailing benefits of capital punishment. A fair assessment of risk and benefits demonstrates that society has decided reasonably to make the dealth penaty available for certain offenses.[126]

*A. The Risk of Erroneous Execution*

The use of capital punishment entails some risk that an innocent person will be executed.[127] Proponents of the death penalty have commonly taken the position that this risk is not great.[128] The Bedau-Radelet study confirms this view. After "sustained and systematic" research,[129] they point to only twenty-three out of more than 7000 executions as erroneous. Their judgments of error are unconvincing with respect to the twelve cases in which sufficient facts are available to test them. Their methodology makes their conclusion in the other eleven cases suspect as well.[130] Assuming, however, for the sake of argument that as many as twenty-three innocent persons have been executed, the rate of error would be only about one-third of one person over the past eighty-seven years.[131] Moreover, even accepting the authors' claims, this miniscule rate of error has been reduced by more than one-third since 1943.[132]

But, say Bedau and Radelet, "[e]valuating the argument against the death penalty based on the fact that innocent defendants have been and will be executed requires some care.[133] This is so, they add, because "[o]ur total of twenty-three wrongful executions is not an estimate, and it cannot serve as a basis for a reasonable estimate, of the total number of wrongful executions in the United States during this century." [134] The true number is far greater, they hint; [135] but "any attempt to calculate the odds of executing the innocent . . . is doomed to fail." [136] It must be remembered, however, that Bedau and Radelet are the ones who argue that existing law should be changed. Accordingly, they bear the burden of justifying their argument by producing credible evidence that the use of capital punishment entails a significant risk of executing the innocent. This they have failed to do, and their assertion that the task is impossible is no substitute. Responsible social policy should be based on the best information available, not—as the authors apparently would have it—on speculation as to what the information would show if it were available.

*B. Safeguards Against Erroneous Execution*

The safeguards that exist to protect criminal defendants, especially those charged with capital crimes, lessen the risk of erroneous execution. In particular, a number of statutory protections have arisen since the Supreme Court's decision in *Furman v. Georgia.*[138] Although the specific provisions of statutes governing capital punishment vary among jurisdictions, these statutes generally share a number of features, most of which are intended to safeguard against erroneous imposition of the death penalty. The important provisions of a typical death penalty statute, and of related law, in the United States are as follows.[139]

First the statutes limit imposition of capital punishment to the most serious offenses against society—intentional crimes that involve the taking of human life.[140]

Second, the defendant must be notified in advance of the state's intention to seek the death penalty and of the aggravating factors the state proposes to prove as justifying a sentence of death,[141] so that the defendant will have a sufficient opportunity to make ready a defense to the charge and to prepare for the post-trial penalty hearing if found guilty.

Third, if the trial results in a guilty verdict, a post-verdict hearing must be held to determine the penalty. The hearing is conducted before a jury if the defendant wishes, and he or she is entitled to continued representation by counsel.[142]

Fourth, in order to justify the death penalty's imposition, the state must prove beyond a reasonable doubt the existence of at least one statutorily specified aggravating factor that is not outweighed by any mitigating factors.[143] Aggravating factors specified in the statutes generally include commission of the offense by use of turture,[144] in a manner that created a great risk of death to others,[145] by a person who had previously been convicted of a serious violent crime,[146] for money,[147] and against certain designated public officials.[148] Typical mitigating factors include the defendant's youth,[149] impaired mental capacity,[150] commission of the offense under unusual and substantial duress,[151] and playing the role of a relatively minor subordinate to the principal offender in the crime's commission.[152]

Fifth, the jury must unanimously determine, on the basis of its findings concerning aggravating and mitigating factors, whether the death penalty is justified, or whether a lesser penalty should be imposed instead.[153] The judge may not impose a death sentence unless the jury recommends it.[154]

Sixth, the state's highest court automatically reviews all death sentences to ensure that there is an adequate legal basis for imposing the death penalty, that the sentence was not imposed as a result of passion or

prejudice, and that the sentence is not excessive or disproportionate to the penalty imposed in similar cases.[155] In some cases, direct review is also available in the Supreme Court.[156]

Seventh, the defendant may also seek a new trial on the basis of newly discovered evidence that she or he was not guilty.[157] In addition, both state and federal laws allow a person whose capital conviction has been upheld by the highest court of the state to obtain collateral review in the state courts, in the lower federal courts, and in the Supreme Court.[158] After all judicial remedies have been exhausted, a condemned defendant may seek executive clemency.[159]

An example of the use of these extraordinary procedural protections in capital cases is the Adams case discussed above.[160] Adams was convicted in 1974, and the judge followed the jury's recommendation by imposing a death sentence.[161] The judgment and sentence were affirmed by the Florida Supreme Court,[162] and the United States Supreme Court denied certiorari.[163] Pursuant to the rule of *Gardner v. Florida*,[164] the Florida Supreme Court directed the trial judge to state whether he had imposed the death sentence on the basis of any information not known to petitioner. The trial judge responded that he had not. The Florida Supreme Court denied relief on that basis,[165] and the United States Supreme Court denied certiorari.[166] After the Florida Supreme Court resolved a dispute concerning the appointment of counsel for Adams's post-conviction relief motion,[167] the trial court denied Adams's first motion for post-conviction relief. The Florida Supreme Court affirmed.[168]

Adams then sought federal habeas corpus relief in the United States District Court for the Southern District of Florida. In a lengthy order, the court denied the petition.[169] The United States Court of Appeals for the Eleventh Circuit affirmed,[170] and the United States Supreme Court refused to grant certiorari [171] and denied rehearing.[172]

In 1984, Adams filed a second motion for post-conviction relief which the state trial court denied.[173] On May 2, 1984, the Florida Supreme Court affirmed the denial in a written opinion.[174] The court also denied Adams's petition for habeas corpus and his application for a stay of execution.[175]

Adams then filed a second petition for habeas corpus relief in the federal district court, raising issues that had already been litigated in his 1983 federal habeas corpus petition, which was also denied.[176] An Eleventh Circuit panel granted a stay of execution pending appeal, but the Supreme Court vacated the stay.[177]

Meanwhile, on May 1, 1984, Adams filed an application for executive clemency with the Florida Governor's Office. The Clemency Board reviewed that application and denied it following oral presentations by representatives for Adams and for the state.[178]

Thus over a 10-year period, various aspects of Adams's conviction and sentence were reviewed on at least twelve separate occasions by numerous state and federal judges, as well as by the Governor's Clemency Board. This history, typical of death penalty cases,[179] shows that procedural safeguards are adequate to prevent erroneous executions.[180] It also exposes as baseless Bedau and Radelet's suggestion that Adams was the victim of a rush to judgment.[181]

*C. The Effect of Safeguards in Recent Years*

According to Bedau and Radelet, ninety-four defendants have been the subjects of "miscarriages of justice" in capital or potentially capital cases since 1960.[182] However, only twenty-six of these persons were sentenced to death.[183] Only two were executed, and the authors give unconvincing reasons for concluding that these executions were erroneous.[184] There is, in short, no persuasive evidence that any innocent person has been put to death in more than twenty-five years. Equally significant, Bedau and Radelet do not include in their catalogue any individual on death row at the end of 1986. Although they seem to think that some of these persons were innocent,[185] they identify only two such persons.[186] One of these had his conviction reversed and sentenced vacated in 1987;[187] the other was plainly guilty and was executed in 1987.[188]

The likely explanation for the absence of errors in capital cases during the past quarter century is the greater care taken by the courts to assure the correct resolution of such cases and, particularly, the painstaking reviews that occur in cases in which the death sentence is actually imposed. The point is illustrated by the very few "miscarriages of justice" claimed by Bedau and Radelet to have occurred in the decade after the Supreme Court upheld the constitutionality of the death penalty.[189] Out of approximately 50,000 murder convictions during the period from 1977 to 1986,[190] the authors point to only thirty-one persons who, they claim, were wrongly convicted of capital offenses or potential capital crimes.[191] Even if one accepts their claim that all of these convictions were mistaken, the authors' accounts of these cases demonstrate that current post-conviction procedures work reasonably well in discovering and correcting errors. After all, in each of these cases the mistake was discovered. Furthermore, in more than three-fourths of the cases the error was discovered within four years of conviction, resulting in the defendant's acquittal or release from prison, or in the dismissal of charges; and in eight of the cases the error was discovered within one year.[192]

*D. The Benefits of Capital Punishment*

A thorough inquiry into the significance of the risk of executing an innocent person in the debate over capital punishment should attempt to evaluate capital punishment's benefits. Bedau and Radelet simply despair of this effort, concluding that "since there is no consensus in our society over the weight to be assigned to each variable in [the death penalty] equation, we are doomed to disagree over how to compute it." [193] However, an assessment of the costs and benefits leads to the conclusion that the minute risk of executing an innocent person is substantially outweighed by the protection that capital punishment affords to society through incapacitation, deterence, and just punishment.

1. Incapacitation

The authors' assertion that we are "doomed to disagree" over the weight to be assigned variables in a capital punishment cost-benefit evaluation is incorrect. We can compare the number of lives of innocent persons saved or lost through the imposition and the abolition of the penalty. As a cost, Bedau and Radelet claim that twenty-three innocent persons have been executed in this century. Even accepting this figure as an accurate representation of the penalty's cost,[194] the number of innocent persons whose lives have been saved through the penalty's incapacitative effects outweighs it.

Capital sentences, when carried out, save innocent lives by permanently incapacitating murderers. Some persons who commit capital homicide will slay other innocent persons.[195] The death penalty is the most effective means of preventing such killers from repeating their crimes. The next most serious penalty, life imprisonment without possibility of parole, prevents murderers from committing some crimes but does not prevent them from murdering in the prision environment.[196] Furthermore some killers who commit capital murder eventually obtain parole.[197]

While it is impossible to determine precisely how many innocent lives the execution of convicted murderers has saved, the available data suggest that the number is not insignificant. Of the roughly 52,000 state prision inmates serving time for murder in 1984, an estimated 810 had previously been convicted of murder and had killed 821 persons following those convictions.[198] Executing each of these inmates following the first murder conviction would have saved 821 lives over the last several decades. Of course, as Bedau and Radelet point out,[199] only a fraction of convicted murderers receive the death penalty. Therefore, the number of innocent lives saved would be substantially smaller, although still more than the number of "innocent" persons Bedau and Radelet claim have been executed in this century.[200]

Bedau and Radelet's response to this arithmetic is inadequate. They assert that with the abolition of the mandatory death penalty, "society runs both the risk of executing the innocent and the risk of recidivist murder, whereas it is only necessary that society run one or the other." [201] Because of what they believe to be a "low incidence of recidivism,"[202] they urge that society not run any risk of executing an innocent person. This response is curious because it postulates that society has only two extreme choices: executing all murderers or executing none. In fact, society has many intermediate options, such as executing murderers only after a careful assessment of the aggravating and mitigating factors,[203] or executing murderers after a finding of "dangerousness." [204] Because the middle course approaches chosen by society serve important goals besides incapacitation (e.g., satisfying constitutional requirements, allowing the possibility of mercy), it is hardly objectionable that they do not focus solely on maximizing the incapacitative benefit of capital punishment.

2. Deterrence

While the innocent lives saved through the incapacitative effect of capital punishment are important, the penalty has also saved innocent lives through its general deterrent effect. Logic supports the conclusion that the death penalty is the most effective deterrent for some kinds of murders—those that require reflection and forethought by persons of reasonable intelligence and unimpaired mental faculties. It stands to reason that capital punishment deters such persons more than the next most serious penalty, life imprisonment without parole. As the Supreme Court observed in *Gregg* v. *Georgia*, "There are carefully contemplated murders, such as the murder for hire, where the possible penalty of death may well enter into the cold calculus that precedes the decision to act." [205]

Statistical studies also suggest that capital sentences, like other criminal sanctions, have a deterrent effect. To be sure, some statistical surveys, often conducted by opponents of the death penalty, have found no

such effect. A detailed review undertaken by the Department of Justice concluded, however, that few, if any, of these studies relied on rigorous methodologies or adequately controlled for many variables that affect the homicide tate in the jurisdictions under consideration.[206] Moreover, it appears to be common ground in the deterrence literature that a statistically valid study should account not only for the response of criminals to penalties imposed by an outside authority (the so-called "demand" for crime) but also for an outside authority's response to changes in crime (the so-called "supply" for crime).[207] The "supply-demand" econometric studies that have been done to date support the conclusion that the death penalty deters homicide.

The most recent substantial econometric study was performed by Professor Stephen K. Layson of the University of North Carolina at Greensboro, who analyzed data for the United States from 1936 to 1977.[208] Layson concluded that increases in the probability of execution reduced the homicide rate. Specifically, Layson found that, on average, each execution deterred approximately eighteen murders. Layson's study of the United States data is consistent with his earlier study concerning the deterrent effect of capital punishment in Canada[209] and with important empirical work in this area by Isaac Ehrlich[210] and other scholars.[211] These econometric studies are buttressed by a growing body of literature demonstrating that punishment has a deterrent effect on crime in a wide variety of settings,[212] including "cohort" studies using data on particular individuals rather than aggregate crime rates.[213] Indeed, the premise that more severe penalties deter more serious crimes is fundamental to our criminal justice system.

If Layson's empirical work (which is strongly supported by deterrence theory) is correct, we can estimate that the death penalty has deterred roughly 125,000 murders in this century.[214] This figure dwarfs the twenty-three innocent persons Bedau and Radelet claim have been executed in the same time period. More important, it demonstrates rather starkly that under any realistic risk assessment the presence of capital punishment saves more innocent lives than it jeopardizes.[215]

Bedau and Radelet also assert that because no innocent defendant ever "consents" to running the risk of an erroneous execution, the death penalty should not be imposed despite its deterrent effects.[216] Accepting this reasoning would cast in doubt the legitimacy of a host of socially useful governmental enterprises. For example, one could argue that the nation's prisons should be closed because innocent defendants have not consented to the risk of erroneous imprisonment. The consent notion has not been adopted as a guiding principle for government action in the criminal justice area because of its theoretical boundlessness.[217] Instead, our society's choices with respect to sentencing and other justice-related matters are based on the benefits and hazards of the various options available.[218]

*3. Just Punishment*

Through the imposition of just punishment, civilized society expresses its outrage and sense of revulsion toward those who, by contravening its laws, have not only inflicted injury upon discrete individuals, but also weakened the bonds that hold communities together. Certain crimes constitute such outrageous violations of human and moral values that they demand retribution. It was to control the natural human impulse to seek revenge and, more broadly, to give expression to deeply held views that some conduct deserves punishment, that criminal laws, administered by the state, were established. The rule of law does not eliminate feelings of outrage but does provide controlled channels for expressing such feelings. People can rely on society to sanction criminal conduct and to carry out deserved punishment. The law's acceptability and effectiveness as a substitute for self-help depends, however, on the degree to which society's members perceive the law as actually providing just punishment for particularly serious criminal offenses. The intentional and unjustified taking of an innocent person's life is such an offense. As the Senate Judiciary Committee has recognized, "[m]urder does not simply differ in magnitude from extortion or burglary or property destruction offenses; it differs in kind. Its punishment ought to also differ in kind. It must acknowledge the inviolability and dignity of innocent human life. It must, in short, be proportionate."[219] Determining what sanction is proportionate and, therefore, what constitutes just punishment for committing certain types of murder is admittedly a subjective judgment. Nevertheless, when there is widespread public agreement that the death penalty is a just punishment for certain kinds of murder—as there is in this country today[220]—and when a jury acting under standards meeting constitutional requirements determines that a particular person has killed another under circumstances for which the legislature has found that death is the appropriate penalty, the resulting judgment is no less "just" because its validity cannot be verified objectively.

The death penalty's retributive function thus vindicates the fundamental moral principel that a criminal should receive her or his just deserts. Even if capital punishment had no incapacitative or deterrent utility, its use would be justified on this basis alone. But as discussed above,[221] there is ample evidence that the death penalty protects innocent lives through incapacitation deterrence. Equally important, through the provision of just punishemnt, capital punishment also affirms the sanctity of human life and thereby protects it. Walter Berns has traced this process.[222] To summarize his explanation: We punish in part because we are angry at what the criminal has done and want to pay him back. The law respects and acknowledges the rightness of our anger (which expresses caring for others) when it punishes the object of that anger. The law thus validates and promotes the law-abiding person's abhorrence of criminality. In short, retribution has a value-reinforcing effect. It deters crime not only by instilling fear of punishment, but also, through a process of rewarding the anger aroused by the sight of crime, by praising law-abidingness.

Of course, in order to protect lives through the operation of this value-reinforcing effect, retribution must be appropriate to the offense committed. "So the question becomes," as Berns puts it, "how do we pay back those who are the objects of great anger because they have committed great crimes against us?"[223] The answer Berns gives is worth quoting at some length:

"The purpose of the criminal law is not merely to control behavior—a tyrant can do that—but also to promote respect for that which should be respected, especially the lives, the moral integrity, and even the property of others. In a country whose principles forbid it to preach, the criminal law is one of the few available institutions through which it can make a moral statement and, thereby, hope to promote this respect. To be successful, what it says—and it makes this moral statement when it punishes—must be appropriate to the offense and, therefore, to what has been offended. If human life is to be held in awe, the law forbidding the taking of it must be held in awe; and the only way it can be made to be awful or awe inspiring is to entitle it to inflict the penalty of death."[224]

One could argue that the execution of innocent defendants undermines the death penalty's capacity to provide the incapacitation, deterrence, and just punishment necessary to protect the innocent lives of others. With respect to incapacitation, for example, if an innocent person is executed for murder, the true culprit is likely to remain at large, free to kill again. Likewise, the threat of capital punishment theoretically may not deter persons from murdering if they perceive the threat to be directed indiscriminately at the innocent as well as at the guilty.[225] Infliction of the death penalty upon innocent persons is also clearly not just punishment.

The force of these arguments depends, however, on the frequency with which persons are executed for capital offenses they did not commit and, to the extent that the arguments relate to deterrence and just punishment, on the degree of public knowledge of the number of mistaken executions. If such miscarriages of justice are relatively common, then capital punishment—in addition to taking the lives of innocent defendants—might well be ineffective in protecting innocent life generally. On the other hand, if such occurrences are unusual, then these consequences are unlikely. In fact, erroneous executions appear to be extremely rare if not nonexistent. The risk of executing the innocent thus has little detrimental effect on the death penalty's protection of innocent lives.

*E. The Duty of Society*

The foregoing discussion of the manner in which the incapacitative, deterrent, and retributive functions of capital punishment protect innocent life demonstrates the reasonableness of concluding that the death penalty's benefits outweigh the chance of a mistaken execution. Given this judgment, it is imperative that society demonstrate the courage of its convictions. Unless it is prepared to forsake murder victims, society must demonstrate its self-confidence and steadfastness of purpose by imposing and carrying out the death penalty in cases that reasonably meet the law's stringent requirements. The minimal but unavoidable risk of error in the administration of capital punishment must not be allowed to induce a "failure of nerve"[226] that would paralyze society from taking the steps necessary to protect its citizens.

Ultimately, the Bedau-Radelet study offers little to opponents of capital punishment. The eighty-four percent of Americans who support the death penalty do so not because they believe its administration is perfect, but because they believe it to be prudently administered in a manner consistent with the society's interest in justice and the protection of the innocent. Nothing presented by Bedau and Radelet undermines that conviction.[227]

[2] *Id.* at 23, 36.

[3] As discussed in detail below, even if one were to concur in the authors' claim that 23 innocent persons have been executed during this century, that number is only about one-third of 1% of the total number of executions that place since 1900. *See* note 22 *infra* and accompanying text. Of course, even the execution of one innocent person would be a tragedy and is hardly insignificant in that sense. But so far as the debate over the death penalty is concerned, the question that must be addressed is whether the risk of such tragedies is significant either in absolute terms or in terms of the balance between the costs and the benefits of capital punishment. The authors of this article believe that the risk is insignificant, in the sense that it is statistically minuscule and also in the sense that it does not affect the validity of our society's considered judgment that the benefits of capital punishment outweigh the costs.

[4] A response to the Bedau-Radelet study is necessary for practical reasons as well. According to the authors, defense attorneys have been attempting, in some cases successfully, to use the study's findings during the penalty phase of capital cases to buttress their arguments for imprisonment rather than death. *See* Bedau and Radelet, *supra* note 1, at 83.

[10] *Id.* at 23-24 (footnote omitted).

[11] *Id.* at 36, 72-73 & Tables 2, 10.

[12] *Id.* at 23-24.

[13] *Id.* at 31-33.

[14] *Id.* at 33. The arbitrary nature of the author's methodology is evident from their unwillingness to carry through on their own definition of potentially capital crimes. While the authors do include all homicides that could not or did not result in the imposition of the death sentence, they only include rapes if the defendant was sentenced to death. *See id.* at 33-34. This suggests that the authors are more than a little uncomfortable with the idea that the risk factor for executing an innocent person should include cases in which the defendant could have been but was not sentenced to death and cases in which the death penalty for the crime was unavailable in the particular jurisdiction.

In addition, the authors chose not to include robbery, kidnapping, burglary, and treason—crimes for which a capital sentence has been permissible punishment. *See id.* at 33-34. Again, this omission suggests that the authors are unwilling to accept the implications of their definition of the relevant offense pool. Moreover, many of the reasons the authors give for excluding these crimes—for example, that they are less relevant given modern constitutional holdings and are not typically thought of as capital crimes—would apply equally to many of the "potentially capital cases" which they do include. *See id.* The exclusion of treason is especially peculiar because it is a quintessential capital offense and was included in an earlier draft of the author's study. The reason for the exclusion may be to avoid the criticism that would result from their declaring the innocence of Ethel and Julius Rosenberg, whom they categorized earlier as having been executed erroneously despite acknowledging that "the most recent reinvestigations of the 1953 Rosenberg case . . . report new discoveries that tend to confirm the prosecution's case (at least against Julius Rosenberg). . . ." Bedau & Radelet, Miscarriages of Justice in Potentially Capital Cases 16-17, Appendix I at 42-43 (first draft Oct. 15, 1985) (on file with the *Standford Law Review*) (citing R. Radosh & J. Milton, The Rosenberg File: A Search for the Truth (1983)).

[20] 408 U.S. 238 (1972).

[21] Bedau & Radelet, *supra* note 1, at 36.

[22] As the authors recognize, their own figures show this risk to be exceedingly small—the 23 allegedly wrongful executions they identify constitute only 0.33% of the approximately 7000 executions that have taken place in this country since 1900. *See id.* at 73.

[23] Moreover, elimination of capital punishment would have no effect on the number of wrongful convictions for otherwise capital offenses.

The authors contest our assertion that the bulk of their work is beside the point. They note that we do not dispute their claim that a number of wrongful death sentences would have been carried out had it not been for interventions having nothing to do with normal judicial review procedures or statutory safeguards. *See* Bedau & Radelet, *The Myth of Infallibility: A Reply to Markman and Cassell*, 41 Stan. L. Rev. 161, 163-64 (1988). Since these death sentences were not carried out, it is unnecessary to address the contentions that the defendants involved were innocent and that the criminal justice system cannot take credit for sparing their lives. Even so, we certainly do not concede these defendants' innocence, for we have not examined their cases. *See* text following note 11 *supra*. What we can say without hesitation is that if they were innocent, their vindication was possible only because the system permits all manner of post-conviction interventions.

Indeed the authors' refusal to give due weight to the influence of post-conviction procedures is curious in light of their concession that "the criminal justice system is arguably shown to have been nearly as effective as it could be" when a wrongful conviction is averted at trial. Bedau & Radelet, *supra* note 1, at 45. The same may be said when an erroneous conviction is reversed on appeal, on collateral attack, or even when a pardon is granted. Since post-conviction review is such an important feature of the criminal justice system, one cannot judge the system fairly without taking it into account.

[24] Bedau & Radelet, *supra* note 1, at 23-24 (footnote omitted).

[25] *See, e.g., id.* at 38.

[26] *Id.* at 47.

[27] *Id.* at 42. Subsequent discovery of an alleged victim alive does, of course, provide objective proof of the innocence of a defendant convicted of murdering that person. The authors, however, claim this has occurred in only seven cases, *id.* at 64-65 & Table 7; in none of those cases was the defendant executed.

[28] The circumstances that the authors regard as signifying official acknowledgment of error include an award of indemnity, executive pardon, and reversal of the conviction on appeal followed by acquittal on retrial or dismissal of the charges. *See id.* at 48-52. The authors also consider a pardon to be a good indicator of innocence, although insufficient by itself. *Id.* at 50.

The hazards of relying on such circumstances as evidence of innocence are obvious and are well illustrated by the case of Lem Woon. Woon was convicted of murder in Oregon in 1908 and sentenced to death; but the sentence was commuted to life imprisonment, and he was subsequently pardoned on condition that he be deported. *See id.* at 171. The deportation condition plainly belies any inferrence that Woon was innocent. More importantly, pardon was used at that time in Oregon as a substitute for parole, as Bedau has previously pointed out, there being no other way of shortening a life sentence for murder. *See* Bedau, *Capital Punishment in Oregon*, 45 Or. L. Rev. 1, 31 (1965). Moreover, since Bedau did not suggest in his earlier article that Woon was innocent, *see id.* at 33-34, his inclusion among those now claimed to have been wrongly convicted is puzzling.

[29] *See* Bedau & Radelet, *supra* note 1, at 52. The authors recognize that "[m]any such confessions are false or dubious, and thus they must be evaluated with extreme caution." *Id.* As their discussion of the Mays case indicates, however, *id.* at 52, 144-45, they are willing to accept an implausible confession of a person other than the defendant whose innocence they assert. *See* notes 95-98 *infra* and accompanying text.

[30] *See* Bedau & Radelet, *supra* note 1, at 53. The validity of this basis for concluding that a defendant was innocent depends on the correctness of the author's appraisal of the weight of the evidence against the defendant, as well as on the plausibility of the hypothetical case against the other person. As the discussion below of the Adams, Appelgate, and Dawson cases indicates, there is no reason to credit the author's judgments that these defendants did not commit the crimes for which they were executed. *See* notes 43-78 *infra* and accompanying text.

[31] *See* Bedau & Radelet, *supra* note 1, at 53. These officials are a county medical examiner and two prison wardens. *Id.* at 53, 164; *see also id.* at 173 (Coding Schedule), 49, Table 5 (Coding Schedule's description). Since the authors do not explain why the opinions of these individuals are entitled to such weight, it is difficult to understand why they should be persuasive.

[32] *Id.* at 53-54. This heading includes "the unshaken conviction by the defense attorney and others who studied the case" that the defendant was innocent and the persistence of "widespread belief in the innocence of the executed defendant." *Id.* But the authors claim that the best evidence of innocence in cases in which the defendant was executed consists of a variety of defects in the original prosecution that were discovered later through private investigation. *Id.* at 54.

[33] *See id.* at 117, 173 (Garner), 121, 175 (Grzechowiak and Rybarczyk), 144-45, 174 (Mays), 158, 173 (Sanders), 161, 173 (Sumway).

[34] *See id.* at 91, 178 (Adams), 92 175 (Appelgate), 177 (Dawson).

[36] *See id.* at 49, Table 5.

[37] *See id.* at 91-92, (Anderson), 106-07, 175 (Collins), 124-25 (Hauptmann), 125-26, 173 (Hill), 136-37, 174 (Lamble), 145-46, 176 (McGgee), 157-58, 174 (Sacco and Vanzetti).

[38] *See id.* at 72-75.

[39] *See id.* at 74 (footnote omitted). Also interesting is the authors' concession that the weight of their evidence of innocence rangers from "conclusive" to "slight." *Id.* at 48. They * * *

* * * * *

[43] Bedau & Radelet, *supra* note 1, at 91. For this description of the case, the authors cite only the defendant's Application for Executive Clemency. *See id.* at 91 n.350 (citing Application for Executive Clemency, *In re* James Adams (May 1, 1984) (on file with the *Stanford Law Review*)).

[44] Response to Petition for Writ of Habeas Corpus at 8, Adams v. Wainwright, 709 F.2d 1443 (11th Cir. 1983) (No. 82-5595) (citing trial transcript at 375-77, 382-83).

[45] Bedau & Radelet, *supra* note 1, at 91.

[46] In his opening argument, defense counsel stated "We intend to show that Willie Orange knew Mrs. Adams, James Adams' wife, that the Willie Orange knew James Adams, and that Willie Orange knew that James Adams' wife—that James Adams was going out with his wife." Application for Exective Clemency, *supra* note 43, at 25 (citing trial transcript at 833). However, defense counsel did not produce evidence to support this statement at trail, *id.*, and Adams did not raise this claim in his Motion to Vacate Judgement and Sentence, served on opposing counsel on April 24, 1984, Response to Motion to vacate Judgment and Sentence, State v. Adams (St. Lucie County, Fla. filed Apr. 25, 1984) (No 73-284)-CF) although newly discovered evidence could have been raised in support of the motion. *See* Hollman v. State, 371 So. 2d 482, 484-85 (Fla. 1979).

[47] Bedau & Radelet, *supra* note 1, at 91.

[48] Adams testified at trial that he was 35 years old and was 5 feet, 9 inches tall. *See* Response to Petition for Writ of Habeas Corpus, *Supra* note 44, at 8 (citing trial transcript at 887).

[49] *Id.* at 8 (citing trial transcript at 353-54, 355-58, 361, 363, 365 366-68, 371).

[50] *See* Bedau & Radelet, *Supra* note 1, at 91.

[51] Id.

[52] *See* Response to Motion to Vacate Judgment and Sentence, *Supra* note 46, at 11. Counsel did, however, explore the possible origin of the hair in cross-examination of the detective who had delivered it to a laboratory for testing. *Id.* at 13.

[53] The state's request for analysis of the sample described the hair as "[h]air removed from Mr. Brown's hand, by his wife, while in the ambulance enroute to the hospital. This hair was thrown on the floor of the ambulance, and the ambulance was

cleaned out and the hair thrown in the trash can." Motion to Vacate Judgment and Sentence at 2, State v. Adams, No. 73-284-CF (St. Lucie County, Fla., filed Apr. 1984), *quoted in* Response to Motion to Vacate Judgment and Sentence, *Supra* note 46, at 12.

[54] Note 53 *supra*. Even assuming that the hair had been found in Mr. Brown's hand, there was another plausible source. Elease Smith, a black woman who lived on Brown's property, had helped Josephine Brown, the victim's widow, treat the victim's wounds. In particular, she helped Mrs. Brown wash off the victim's face. *See id.* at 9 (citing trial transcript at 480-81, 483, 485); *see also* Response to Motion to Vacate Judgment and Sentence, *supra* note 46, at 13 ("the trial transcript also suggests that, if the hair was indeed in the victim's hand, its source might have been Elease Smith, the black lady who was helping Mrs. Brown aid her husband").

[55] Order, State v. Adams, No. 73-284-CF (St. Lucie County, Fla. filed Apr. 25, 1984).

[56] *See* Adams v. State, 449 So. 2d 819, 820 (Fla. 1984) (listing grounds for relief proffered by Adams).

[57] *See* Response to Petition for Writ of Habeas Corpus, *supra* note 44, at 5, 9, 11 (citing trial transcript at 267-97, 778-79, 491-92).

[58] *See id.* at 6 (citing trial transcript at 322-28, 339-47, 398-408).

[59] The victim's wife and son testified that Edgar Brown carried large amounts of money with him, usually in $20 bills, and that he had a sizeable sum with him on the day of the murder. *See id.* at 7-11 (citing trial transcript excerpts).

[60] *Id.* at 12, 15 (citing trial transcript at 609, 612-15, 648-49, 682, 817-18, 878, 879, 730-31, 807-11).

[61] *Id.* at 13 (citing trial transcript at 671).

[62] *See id.* (citing trial transcript at 626, 639, 671, 675).

[63] *See id.* at 14 (citing trial transcript at 843, 856, 857-70, 875-79).

[64] *See id.* at 16 (citing trial transcript at 959). A witness for the state testified on rebuttal that the distance from the Nickerson residence to the Brown ranch was approximately 12 miles and that the travel time at 55 miles per hour was 15 minutes. *See id.* at 16-17 (citing trial transcript at 991-93).

[65] In their article, Bedau and Radelet state that "if new evidence were to show that we have erroneously included a case in which the defendant was truly guilty, we would of course have no objection to deleting it from our catalogue." Bedau & Radelet, *supra* note 1, at 48. On the basis of an independent review of the Adams case, the authors of this article have requested that Bedau and Radelet delete this case from their list. *See* Letter from Assistant Attorney General Stephen J. Markman to Professor Hugo Bedau (Nov. 17, 1987) (on file with the *Stanford Law Review*). Bedau has written in reply, "During the months ahead, my colleague and I will give close attention to reviewing the information about Adams that you have supplied us. You may be sure that if it or other subsequent evidence causes us to change our mind, you will be duly informed." Letter from Hugo Adam Bedau to Stephen J. Markman (Dec. 10, 1987) (on file with the *Stanford Law Review*). Bedau and Radelet maintain, however, that "nothing [in this response] removes the very serious doubts in the Adams case, or in any other case included in our catalogue." Bedau & Radelet, *supra* note 23, at 163.

[66] Bedau & Radelet, *supra* note 1, at 48.

[67] *See* notes 12-23 *supra* and accompanying text.

[68] The authors cite these opinions in footnotes to their descriptions of the cases, but they invariably fail to acknowledge the weight of the evidence of guilt that these opinions show was produced at trial.

[69] We discuss nine of the eleven cases below. The cases of Sacco and Vanzetti are not discussed here only because adequate treatment of the evidence supporting their guilt would expand this response inordinately. Suffice it to say that the evidence produced at trial, which was reviewed in meticulous detail by the Massachusetts Supreme Judicial Court, *see* Commonwealth v. Sacco, 255 Mass. 369, 151 N.E. 839 (1926), was plainly sufficient to support the verdict. Furthermore, the principal argument offered by the authors to show the defendants' innocence—the claim that another man confessed to the crime, *see* Bedau & Radelet, *supra* note 1, at 158—was not even raised on appeal from the denial of the defendants' motions for a new trial. Moreover, as the authors recognize, the most recent work on the subject, by a long-time student of the case, presents recently discovered evidence of Sacco's and Vanzetti's guilt. *See id.* at 158 n.818 (citing F. Russell, Sacco and Vanzetti: The Case Resolved (1986)).

[70] Bedau & Radelt, *supra* note 1, at 92 (quoting W. Brown, They Died in the Chair 103 (1963)). In fact, Appelgate himself supplied telling evidence of his own guilt. He admitted the facts that gave him a powerful motive for killing his wife, he admitted having assisted in the purchase of the poison, he admitted having prepared the poisoned eggnog and having spent two or three hours getting his wife to drink it, and he refused to permit an autopsy until persuaded to do so by the authorities. *See* People v. Creighton, 271 N.Y 263, 272-77, 2 N.E.2d 650, 654-56 (1936). Moreover, the jury that found Appelgate guilty was instructed that "you cannot convict the defendant Appelgate upon [Creighton's] testimony alone, unless you find that her testimony is corroborated by other evidence which tends to connect Appelgate with the commission of the crime." *Id.* at 281, 2 N.E.2d at 658.

[71] *See Creighton*, 271 N.Y. at 280-81, 2 N.E.2d at 658 (1936). The "state's prison offense" referred to by the court was second degree rape, committed on numerous occasions against Creighton's minor daughter Ruth, with whom Appelgate had been living together "almost as man and wife." *Id.* at 269, 2 N.E.2d at 653. The threat to "expose" Appelgate mentioned by the court was established by evidence that, following a fight a few weeks before the murder during which her husband slapped her, Mrs. Appelgate said: "[I]f you ever do that again I will tell something that will put you where you belong." *Id.* at 268, 2 N.E.2d at 652.

[72] *See* D. Kilgallen, Murder One 190-91, 230 (1967) (Appelgate "very nearly got away" with the murder); L. Lawes, Meet the Murderer 334-35 (1940) ("Frankly, I do not doubt the culpability" of Appelgate), *cited in* Bedau & Radelet, *supra* note 1, at 92 n.362. The authors also state, incorrectly, that the Governor of New York denied a clemency petition despite having "doubts about Appelgate's guilt." *Id.* at 92. One of the authors' sources cited for support wrote that the governor did not "question [Appelgate's] guilt. He took keen interest in the proceedings and made every possible effort to see that justice was meted out." L. Lawes, *supra*, at 334-35. Thus, even though they rely on no evidence other than that presented at trial, Bedau and Radelet believe that a neutral observer would find Appelgate innocent when a unanimous jury, a unanimous Court of Appeals, the Governor, and two of their three secondary sources reached the opposite conclusion.

[73] Bedau & Radelet, *supra* note 1, at 109.

[74] *See* Dawson v. State, 139 So. 2d 408, 412 (Fla. 1962). Dawson's testimony concerning threats to turn him over to a mob was controverted by the state's witnesses. *Id.* Moreover, although the lengthy detention period cannot be condoned, consideration of all the circumstances shows that Dawson's confession was true.

[75] *Id.* at 421 (Drew, J., dissenting). The authors assert, falsely, that there were no eyewitnesses to the crime. Bedau & Radelet, *supra* note 1, at 109. In fact, as the Florida Supreme Court opinion indicates, there was an eyewitness—the victim's 4-year-old brother, Donnie, who had been beaten and left to die at the crime scene. *See Dawson*, 139 So. 2d at 410. When found a day later, Donnie told his father, the police chief, and a family friend that Sie Dawson had committed the murder. *See* St. Petersburg Times, Sept. 24, 1977, at 12A, col. 1. The prosecution did not place Donnie on the stand, presumably because of his age; and the witnesses who had heard him identify Dawson as the killer could not testify as to his statements because of the hearsay rules. Seventeen years later, when interviewed by the St. Petersburg Times about the details of the crime, he explained how Sie Dawson had brutally killed his mother with a hammer. *See id.* at col. 5.

[76] *See Dawson*, 139 So. 2d at 418 (Thornal, J., concurring).

[77] *Id.* at 414.

[78] *Id.* In this connection, Judge Thornal observed that "the circumstantial evidence is completely consistent with the details revealed by the confession, whereas it is not equally consistent with the details described by Dawson from the witness stand when he undertook to repudiate his confession." *Id.*

Material contained in the clemency files of the Florida governors is also relevant to the claim that the woman's husband was the murderer. Although the authors refer the reader to these files, *see* Bedau & Radelet, *supra* not 1, at 109 n.478, they neglect to mention that the materials they contain provide no support for their position. Those materials indicate that investigations by both the Parole Commission and a representative of the Florida Governor's Office found nothing to substantiate the defense claim that the husband had committed the crime. *See* Memorandum from William A. Norris, Jr. to Governor Bryant re: Sie Dawson 2 (May 1, 1964) (on file with the *Stanford Law Review*); Memorandum from Al Healy to Bill Norris re: Sie Dawson (Apr. 29, 1964) (on file with the *Stanford Law Review*). The materials also reveal that "intensive investigation at the time [of the crime] failed to develo[p] any indication that Alvin Clayton [the husband] was implicated in the murders." Memorandum from Al Healy, *supra*, at 2.

Finally, if there is any need for additional refutation of the authors' claim that Dawson was innocent, Bedau himself supplies it. He indicated in 1982 that the Dawson case "remain[ed] in the limbo of uncertainty" because "[t]he original news story [regarding Dawson's supposed innocence] merely reported allegations and was inconclusive; no subsequent inquiry known to me has established whether Dawson was really innocent." Bedau, *Miscarriages of Justice and the Death Penalty*, in The Death Penalty in America, 236-37 (H. Bedau ed. 1982) (citing to the same newspaper articles as are cited in *Stanford Law Review* article).

[79] Bedau & Radelet, *supra* note 1, at 121.

[80] *See* People v. Bogdanoff, 254 N.Y. 16, 171 N.E. 890 (1930).

[81] *Id.* at 19, 171 N.E. at 891. The confessions were reliable. A year after his conviction, Rybarczyk told the governor's clemency investigator, *see* note 84 *infra*, that the police did *not* use any third-degree methods to obtain the confession. *See* Buffalo Evening News, July 3, 1930, at 1, col. 8, at 3, col. 6. Indeed Rybarczyk was apparently motivated to confess to the murder by a jailhouse meeting with his mother. *See id.*, Nov. 5, 1929, at 3, col. 1. Moreover, Rybarczyk's confession included an account of another mobster slaying that he had observed. The truthfulness of that account, and of his confession in the Fechter case, was confirmed after his conviction, when police found the body of the apparent victim in circumstances that fit Rybarczyk's description. *See id.*, Nov. 5, 1929, at 1, col. 6.

[82] *Bogdanoff*, 254 N.Y. at 32, 171 N.E. at 896. The confessions were corroborated by other evidence of the defendants' guilt. At least three witnesses with good views of the crime scene positively identified Grzechowiak, Rybarczyk, or both, as participants in the murder. *See* Buffalo Evening News, Oct. 24, 1929, at 1, col. 6, at 3, col. 1; *id.*, Oct. 25, 1929 at 1, col. 1.

[83] *Bogdanoff*, 254 N.Y. at 40, 171 N.E. at 899 (Crane, J., dissenting, on the grounds of the majority's rejection of the challenge to the sufficiency of the indictment).

[84] *See* Bedau & Radelet, *supra* note 1, at 121. The authors' reliance on the defendants' exoneration by their codefendant Bogdanoff is misplaced. The lengthy police investigation that preceded the arrests of the three men included infiltration of the gang, a wiretap, and around-the-clock surveillance of the Grzechowiak residence for several weeks. It showed that Grzechowiak and Rybarczyk were members of Buffalo's notorious "Blue Ribbon Gang," headed by Bogdanoff. *See* Buffalo Evening News, Nov. 6, 1929, at 2, col. 1. Bogdanoff had boasted to an undercover agent that the gang was wanted for the Fechter robbery-murder. *Id.*, July 3, 1930, at 3, col. 8. The only reason Bedau and Radelet suggest for believing Bogdanoff is his refusal to name "his true accomplices." Bedau & Radelet, *supra* note 1, at 121. In fact, after the Governor refused to consider clemency for Grzechowiak and Rybarczyk without this information, Bogdanoff claimed that his accomplices had not been members of his gang but three gunmen from Chicago whose names, addresses, and descriptions he furnished to the authorities. *See* Buffalo Evening News, July 5, 1930, at 3, col. 1. the Governor's legal adviser and others investigated Bogdanoff's story; but "[n]othing was brought forth to substantiate the claim, which was regarded as a last attempt to save Rybarczyk and Grzechowiak." *Id.*, July 18, 1930, at 3, col. 3. Police also viewed the claim as inconsistent with the known facts of the case. *See* N.Y. Times, July 17, 1930, at 14, col. 3. *See generally id.*, July 18, 1930, at 3, col. 3.

[85] Bedau & Radelet, *supra* note 1, at 125.

[86] *See* State v. Hillstrom, 46 Utah 341, 150 P. 935 (1915).

[87] *Id.* at 349, 150 P. at 939.

[88] *Id.* at 356, 150 P. at 941.

[89] *Id.* at 371, 150 P. at 947 (Frick, J., concurring); *see also id.* at 373, 150 P. 948 at (McCarty. J., concurring) (the evidence that the defendant was one of the perpetrators of the crime was "about as conclusive on that point as though the witnesses had positively identified the defendant as the taller of the two men who were at and in the immediate vicinity of the crime just before and immediately after it was committed").

[90] Indeed, Bedau & Radelet cite a work of fiction to support their conclusion that Hillstrom was not guilty. Bedau & Radelet, *supra* note 1, at 126 n. 588 (citing "generally" W. Stegner, Joe Hill: A Biographical Novel (1969) (first published under the title The Preacher and the Slave)). The novel's foreward explicitly explains that it "is fiction, with fiction's perogatives and none of history's limiting obligations. . . . Joe Hill as he appears here--let me repeat it—*is an act of the imagination.*" W. Stegner, *supra*, atr 13-14 (emphasis added). It is more than a little troubling that Bedau and Radelet use a work of fiction as one of their two sources for the proposition that Hillstrom was innocent. More disturbing yet, Bedau and Radelet cite the Stegner novel "generally" to support Hillstrom's innocence despite the fact that the author's view was to the contrary. *See* Stegner, *Correspondence: Joe Hill*, New Republic, Feb. 9, 1948, at 39; *see also* Stegner, *Joe Hill: The Wobblies Troubadour*, New Republic, Jan. 5, 1948, at 30.

[91] Bedau & Radelet, *supra* note 1, at 144. The authors also rely on the fact that Mays maintained his innocence up to the time he was executed, although they recognize that a defendant's "own protestations" are "not enough" by themselves to prove innocence. *Id.* at 48. As the analysis of the Mays case shows, however, the arguments made to support the defendant's protestations of innocence are unavailing.

[92] May's previous conviction of the crime had been overturned because the judge rather than the jury had imposed the death penalty, an error that had nothing to do with the defendant's guilt or innocence. *See* Mays v. State, 143 Tenn. 443, 226 S.W. 233 (1920).

[93] Mays v. State, 145 Tenn. 118, 123-32, 238 S.W. 1096, 1097-1101 (1921).

[94] *Id* at 135-35, 238 S.W. at 1101.

[95] Bedau & Radelet, *supra* note 1, at 52, 145.

[96] *Id* at 52.

[97] *Id* at 145.

[98] Edgerton, *A Case of Prejudice: Maurice Mays and the Knoxville Race Riot of 1919*, S. Exposure, July/Aug. 1983, at 64. Edgerton also reports another salient fact Bedau and Radelet omit: The Governor denied clemency only after his own review of the case and that of an independent commission convinced him that the verdict was correct. (The commission also suggested that Mays might have been insane.) *See id.* at 63.

[99] McGee's first conviction, by an all-white jury in the county where the crime was committed, was reversed because the trial court had erroneously denied a change of venue. McGee v. State, 200 Miss. 592, 26 So. 2d 680 (1946). His second conviction, in a different county but also by an all-white jury, was overturned because blacks were excluded on account of their race from the grand jury that indicted him. McGee v. State, 203 Miss. 592, 33 So. 2d 843 (1948) (en banc). He was indicted again in the original county, this time by a grand jury with three black members and was found guilty a third time. McGee v. State, 40 So. 2d 160 (1949) (en banc), *cert. denied*, 338 U.S. 805 (1949).

[100] Bedau & Radelet, *supra* note 1, at 145.

[101] *Id.* at 145-46.

[102] McGee v. State, 40 So. 2d 160.

[103] *Id* at 169.

[104] *Id.*

[105] *Id.* The court also rejected McGee's claim that his subsequent written confession had been coerced by daily and nightly beatings, in part on the ground that "[t]he very extravagance of such extreme assertions furnishes, in large measure, their own refutation, averting the credibility of reasonable men." *Id.* at 170.

[106] *Id.* at 171. Moreover, as the court pointed out, the fact of rape was corroborated not only by McGee's admissions, but also by the victim's husband and a neighbor who testified that the victim was hysterical immediately after the attack, by her physician who testified that voluntary sexual intercourse would not likely have produced the condition of her sexual organs, and by physical signs of entry into her bedroom through a window. *Id.*

[107] *See* text accompanying notes 103-105 *supra; see also McGee*, 40 So. 2d at 170, also undermines the consent claim. Nothing in the court's opinion suggests that McGee was deterred from taking the stand by a prior conviction or the like. To the contrary, the court described him as an "intelligent" man who "could read and write, and had a responsible job, delivering goods and collecting therefor, in the employ of the Laurel Wholesale Grocery Company." *Id.*

[108] The authors also claim that "[i]nvestigation by journalist Carl Rowan revealed that the victim had been consorting with McGee for four years and was angry at his efforts to terminate their relationship" and that "local blacks were too intimidated to give this evidence in court." Bedau & Radelet, *supra* note 1, at 146. Rowan's investigation consisted of a few conversations with blacks in the town where the crime had occurred. *See* C. Rowan, South of Freedom 174, 177-85 (1952). He concluded that "the evidence of this so-called clandestine romance was no more ironbound than was the evidence to the contrary," *id* at 185, and he questioned how the hypothesis of consent on the night in question could "jibe with testimony of a woman defense witness that McGee was with her at the time of the alleged attack." *Id* at 186. Indeed, it appears that Rowan had deep-seated doubts about McGee's innocence, contrary to what the authors imply, and was convinced only of the injustice of subjecting him to the death penalty for an offense that had never been thought to warrant that punishment when committed by a white. *See id* at 176, 191-92.

[109] *See* Bedau & Radelet, *supra* note 1, at 158.

[110] *See* Sanders v. State, 202 Ala. 37, 39, 79 So. 375, 377 (1918). Bedau and Radelet state incorrectly that Sanders was convicted "with Fisher Brooks" and that "[b]oth men were sentenced to death and executed in 1918." Bedau & Radelet, *supra* note 1, at 158. In fact, the two men were convicted separately; and Brooks was executed in 1917, almost a full year before Sanders. *See Sanders*, 202 Ala. at 38, 79 So. at 376.

[111] *See* Mobile Register, July 21, 1917, at 1, col. 1, at 9, col. 1 (" 'I've just told so many stories I don't know what I have told' ").

[112] *See id.* at 9, col. 1. At Sanders's trial, Brooks claimed that he had acted alone in committing the murder. Testimony from a night watchman contradicted this point. He saw and heard a screaming woman in a taxi (like Sanders, Brooks was a taxi driver) with two men, on the road to the bridge from which the victim's body was dumped into a river. Brooks also claimed that he stopped the taxi to throw the body from the bridge into the river. But a guard at the bridge testified that he heard a splash as the taxi drove over the bridge with increasing speed. Blood was found on the west railing, the opposite side from the steering wheel in the taxi as it drove over the bridge. *See id.*, July 20, 1917, at 1, col. 7, at 9, col. 3; *id.*, July 21, 1917, at 1, col. 1, at 9, col. 2.

[113] *See* Sanders v. State, 202 Ala. at 38, 79 So. at 376. According to a local newspaper account of the trial, the witness said he overheard Brooks assure Sanders that Brooks's testimony would "help" Sanders, to which the later replied, " 'I'm guilty as —.' " Mobile Register, July 21, 1917, at 1, col. 1.

[114] *See* Mobile Register, July 20, 1917, at 1, col. 7, at 9, cols. 3-4; *id.*, July 21, 1917, at 9, cols. 1-3; *id.*, July 22, 1917, at 1, col. 1.

[115] Bedau & Radelet, *supra* note 1, at 164.

[116] *See* Commonwealth v. Tucker, 189 Mass. 457, 76 N.E. 127 (1905); E. Pearson Masterpieces of Murder 157-79 (1963). Indeed, the bill of exceptions which the defendant presented to the appellate court conceded that "there was evidence for the jury on all issues presented to them." *Tucker*, 189 Mass. at 467, 76 N.E. at 130. Moreover, Pearson's chapter which the authors cite generally to support their discussion of the case, *see* Bedau & Radelet, *supra* note 1, at 164 n.869, does not suggest that Tucker was innocent. In fact, it actually implies the opposite conclusion. *See* E. Pearson, *supra*, at 168 ("even without [the handwriting evidence] the Government's case was very strong"); *id.* at 171 (the Governor's rejection of the defendant's petition for clemency was "conscientious and admirable").

[117] *Tucker*, 189 Mass. at 465-76, 76 N.E. 129-34; E. Pearson, *supra* note 116, at 164-68.

[118] Tucker's defense counsel later reported that Tucker had decided not to testify after being told by counsel that he should testify if he were innocent but not if he were guilty. E. Pearson, *supra* note 116, at 178-79.

[119] *See Tucker*, 189 Mass. at 479, 484, 76 N.E. at 135, 137; *see also* E. Pearson, *supra* note 116, at 170 (in denying Tucker's motion for a new trial, the trial judges described most of the evidence produced on his behalf as untrue). Moreover, it appears that Tucker's alibi witnesses could not account for Tucker's whereabouts at the time of the murder. *See* Hewett, *Shreds of Evidence*, Boston Mag., Nov. 1983, at 133, 134.

[120] *See* Bedau & Radelet, *supra* note 1, at 164. As noted above, *see* note 116 *supra*, Tucker admitted on appeal that the case was strong enough to go to the jury. Beyond that, in denying Tucker's motion for a new trial, the two judges who presided at the trial expressed the view that " 'a verdict of acquittal would have been a failure of justice.' " E. Pearson, *supra* note 116, at 170. The Governor concurred. His review of the case led him to state, "I am compelled to an undoubting belief in his guilt." *Id.* at 175.

[121] Bedau & Radelet, *supra* note 1, at 164.

[122] *See* F. Pearson, *supra* note 116, at 169-72; *see also* F. Russell, Sacco and Vanzetti: The Case Resolved 203-16 (1986) (discussing ill-founded public protest on behalf of condemned prisoners generally and of Tucker in particular). The true nature of the agitation on Tucker's behalf is demonstrated by the fact that "[t]he names of entire families, including, in some instances, children in the cradle, were solemnly set down at the foot of these documents." E. Pearson, *supra* note 116, at 170.

[123] The medical examiner, who testified at trial that he thought the victim had been killed with a knife of the type owned by Tucker, claimed at the clemency hearing that such a knife could not have been the murder weapon, and that the state had deliberately framed Tucker for the murder. *See* Hewett, *supra* note 119, at 134, 136. The trial judges, however at the Governor's request, reviewed the evidence presented at the clemency hearing. They reported that they could not find "that there would now be any material change in the testimony of the medical experts." E. Pearson, *supra* note 116, at 173. The authors are also mistaken about the trial witness' alleged admission of perjury to a clergyman. The witness made no such admission. What the clergyman reported was a third person's statement contradicting the witness' trial testimony. *See* Hewett, *supra* note 119, at 136. This double hearsay would not convince a neutral observer of Tucker's innocence without proof that the witness lied and that true testimony would have raised a reasonable doubt about Tucker's guilt.

[124] *See, e.g.*, W. Berns, *supra* note 6, at 178; van den Haag, *The Death Penalty Once More, 18 U.C. Davis L. Rev. 957, 967 (1985).*

[125] *See, e.g.*, C. Black, Capital Punishment: The Inevitability of Caprice and Mistake 22-30 (2d ed. 1981); Pollak, *The Errors of Justice*, in Capital Punishment 207 (T. Sellin ed. 1967).

[126] The laws of 37 states, as well as certain federal laws, permit imposition of the death penalty. *See* U.S. Dep't of Justice, Bureau of Justice Statistics, Capital Punishment, 1986, at 3 (1987) [hereinafter Capital Punishment, 1986].

[127] *See, e.g.*, Senate Comm. on the Judiciary, Report on S. 1765, Establishing Constitutional Procedures for the Imposition of Capital Punishment, S. Rep. No. 251, 98th Cong., 1st Sess. 14 (1983) [hereinafter "Senate Report"].

[128] W. Berns, *supra* note 6, at 178 (erroneous executions are unlikely); Senate Report at 14 (the risk is "minimal"); van den Haag, *supra* note 124, at 967 (miscarriages of justice are "rare"). Indeed, Bedau himself has observed that it is "false sentimentality to argue that the death penalty ought to be abolished because of the abstract possibility that an innocent person might be executed, when the record fails to disclose that such cases occur." Bedau, *The Death Penalty in America*, Fed, Probation, June 1971, at 32, 36. Bedau now asserts that "[t]he publication of the present research, shows the reality of such mistakes to be a virtual certainty." Bedau & Radelet, *supra* note 1, at 26. However, in our judgment, the study does not show with "virtual certainty" that mistaken executions have occurred in this century; and so Bedau's earlier assessment remains essentially accurate. *See also* Kaplan, *Administering Capital Punishment*, 36 U. Fla. L. Rev. 177, 186 ("It is true that in the modern history of the death penalty, the last thirty-some years, probably no innocent person has been executed").

[129] Bedau & Radelet, *supra* note 1, at 27.

[130] *See* text accompanying notes 42-123 *supra*. The remaining 11 allegedly erroneous executions predate modern times. Only two occurred during

the past 50 years, and both of these took place more than 40 years ago. *See* Bedau & Radelet, *supra* note 1, at 73, Table 10 (Sberba 1938; Anderson 1945).

[131] *See* note 22, *supra*.

[132] Bedau and Radelet claim that between 1900 and 1942 there were 19 erroneous executions out of an estimated 5229 total executions—a rate of error of 0.36%. Bedau & Radelet, *supra* note 1, at 73. Between 1943 and 1985, they claim, there were four mistaken executions out of a total of 1863—a rate of error of 0.22% *Id.*

[133] *Id.* at 78.

[160] *See text accompanying notes 42–65 supra.*

[161] Florida law differs from the typical death penalty statute in that it permits the judge to impose the death penalty after considering the jury's recommendation. Fla. Stat. § 921.141(2), (3) (West 1985). In the Adams case, the judge found numerous aggravating factors to support imposition of the death penalty. For example, at the time of the murder Adams had escaped from the Tennessee prison system where he was serving a 99-year sentence for rape. Adams v. State, 341 So. 2d 765, 769 (Fla. 1976).

[162] *Adams,* 341 So. 2d at 765.

[163] Adams v. Florida, 434 U.S. 878 (1977).

[164] 430 U.S. 349 (1977).

[165] Adams v. State, 355 So. 2d 1205, 1206 (Fla. 1978).

[166] Adams v. Florida, 439 U.S. 947 (1978).

[167] Adams v. State, 380 So. 2d 421 (Fla. 1980).

[168] Adams v. State, 380 So. 2d 423 (Fla. 1980). At that time, Adams was also one of 123 Florida death row inmates who unsuccessfully sought relief in *Brown v. Wainwright.* 392 So. 2d 1327 (Fla), *cert. denied,* 454 U.S. 1000 (1981).

[169] *See* Adams v. Wainwright, 709 F.2d 1443, 1445 (11th Cir. 1983).

[170] *Id.*

[171] Adams v. Wainwright, 464 U.S. 1063 (1984).

[172] Adams v. Wainwright, 465 U.S. 1074 (1984).

[173] *See* Adams v. State, 449 So. 2d 819, 820 (Fla. 1984).

[174] *Id.* at 820–21. Adams did not raise a claim that he was innocent before the Florida Supreme Court. Nor did he report to the Court any "newly discovered" evidence of his innocence even though such evidence could, in proper circumstances, be the basis for relief under Florida law. *See* Hallman v. State, 371 So. 2d 482, 484–85 (Fla. 1979).

[175] *Adams,* 449 So. 2d at 820–21.

[176] *See* Adams v. Wainwright, 734 F.2d 511, 511–12 (11th Cir. 1984) (noting the petition's successive nature and its denial by the district court).

[177] Wainwright v. Adams, 466 U.S. 964 (1984).

[178] Interview with Andrea Hillyer, Florida Attorney General's Office (March 1987).

[179] *See. e.g.,* Darden v. Wainwright, 473 U.S. 928, 929 (1985) (Burger, C.J., dissenting from grant of certiorari) ("In the 12 years since petitioner was convicted of murder and sentenced to death, the issues now raised in the petition for certiorari have been considered by this Court four times . . . and have been passed upon no fewer than 95 times by federal and state court judges."). *See generally Who Is on Trial? Conflicts Between the Federal and State Judicial Systems in Criminal Cases: Hearing Before the Subcomm. on Gov't Information, Justice, and Agriculture of the House Comm. on Gov't Operations,* 100th Cong., 2d Sess. 25–27 (1988) (statement of Paul Cassell, Associate Deputy Attorney General).

[180] *See* Bedau & Radelet, *supra* note I, at 70–71, 84.

[181] *See id,* at 91. It should also be noted that in 1986 the average elapsed time from sentencing to execution in death penalty cases was more than seven years. *See* Capital Punishment, 1986, *supra* note 126, at 9.

[182] Bedau & Radelet, *supra* note 1. at 38, Table 4.

[183] *Id.*

[184] *See* notes 42–43, 73–78 *supra* and accompanying texts (discussion of the Adams and Dawson cases).

[185] Bedau & Radelet, *supra* note 1, at 38–39.

[186] *See id.* at 29–31 n.40 (cases of John Henry Knapp and Earl Johnson). The authors also refer to seven other "recent capital cases involving inmates released in the first six months of 1987 from death rows . . . because of evidence raising doubts about their guilt," *id.;* but according to the information supplied by the authors, six of these individuals (Peek, Cobb, Williams, McManus, Brown, Ramos) were no longer under a sentence of death at the end of 1986. Their convictions and death sentences had been vacated before then. The same is true of the seventh individual, Hill, whose case was actually decided in 1985, not 1987., *See* Hill v. State, 473 So. 2d 1253 (Fla. 1985).

[187] Bedau & Radelet, *supra* note 1, at 30 n.40 (case of John Henry Knapp).

[188] *Id.* (case of Earl Johnson). The authors claim that "substantial doubts remain" about Johnson's guilt, but—once again—the appellate opinions in the case show that Johnson was certainly guilty. The elderly victim of the assault that preceded the police officer's murder positively identified Johnson as her assailant the next day and at trial. She was unable to make a positive identification early because "she was in a state of shock and was confused due to the viciousness of the beating on her head and body as well as the attempt upon her life and safety. Johnson v. State, 416 So. 2d 383, 387 (Miss. 1982). Moreover, Johnson's claim that his confession was false appears to have been an afterthought. *See* Johnson v. State, 508 S. 2d 1126, 1127 (Miss. 1987). He did not attack its admissibility on direct appeal, *see* Johnson v. State, 416 S. 2d 383, 387 (Miss. 1982), in his state application for a writ of error *coram nobis, see* Johnson v. Thigpen, 449 So. 2d 1207 (Miss. 1984), or in his federal petition for habeas corpus, *see* Johnson v. Thigpen, 623 F. Supp. 1121 (S.D. Miss. 1985), *aff'd* 806 F.2d 1243 (5th Cir. 1986), *cert denied,* 107 S. Ct. 1618 (1987). In any event, Johnson's confession was corroborated in at least three important respects: it led to the recovery of the gun that the murderer took from the officer and used to kill him, Johnson v. State, 416 So. 2d 385–86; witnesses placed a vehicle like that owned by Johnson at the crime scene at the time in question, Johnson v. Thigpen, 623 F. Supp at 1126; and Johnson admitted to a trustee at the jail where he was being held that he had shot the officer, Johnson v. Thigpen, 806 F.2d at 1251; Johnson v. State, 416 So. 2d at 387.

[189] *See e.g.,* Gregg v. Georgia, 428 U.S. 153 (1976).

[190] We derived the 50,000 figure by multiplying the approximately 200,000 murder arrests between 1977 and 1987 by the 25% conviction rate for that crime during the preceding few years. *See* U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1986, at 41. Table 1 (1987).

[191] Bedau & Radelet, *supra* note 1, at 178–79. Only five of the 31 cases cited resulted in imposition of a death sentence. In none of these was the sentence actually carried out. *Id. see also* notes 185–188 *supra* and accompanying text. *But see id.* at 29 n.40 (nine new cases in which the death sentence may have been wrongfully imposed, with one resulting in an execution).

[192] *See* Bedau & Radelet, *supra* note 1, at 96 (Beeman), 161 (L. Smith), 112–13 (Fay), 125 (Hicks), 170 (S. Wilson), 112 (Estes), 155 (Reynolds), 93 (Bachelor), 146 (McIntosh), 91 (Amado), 156 (Robertson), 129–30 (Jaramillo), 151–52 (Petree), 156 (Robinson), 103 (Carden), 129 (James & Peterson), 126–27 (Holbrook), 126–27 (Rucker), 103 (Carter), 113 (Ferber), 100–01 (A. Brown), 149 (Norwood), 143 (Malloy), 163–64 (Torres).

[193] Bedau & Radelet, *supra* note 1, at 78. Despite this caution, Bedau and Radelet do not hesitate in announcing their view that the costs outweigh the benefits and that "abolition is the better policy," *id.* at 80–81.

[194] The authors' protestations that their figures "understate" the numbers of innocent persons executed are unconvincing. *See* notes 133–136 *supra* and accompanying text.

[195] *See, e.g.,* Tison v. Arizona, 107 S. Ct. 1676, 1677 (1987) (defendants aided the prison escape of their father who was serving a life sentence for murdering a prison guard and who then proceeded to kill four more innocent persons).

[196] "At least five federal prison officers have been killed since December 1982, and the inmates in at least three of the incidents were already serving life sentences for murder." W. Weld & P. Cassell, Report to the Deputy Attorney General on Capital Punishment and the Sentencing Commission 28 (Feb. 13, 1987).

[197] *See* Senate Comm. on the Judiciary, establishing Constitutional Procedures for the Imposition of Capital Punishment, S. Rep. No. 251, 98th Cong., 1st Sess. 12 (1983). A recent study of recidivism among young parolees revealed that 6% of young adults paroled in 1978 after having been convicted of murder were arrested again for murder within the following six years. *See* U.S.Dept. of Justice, Bureau of Justice Statistics, Recidivism of Young Parolees 4, Table 4 (1987) [hereinafter Recidivism of Young Parolees].

[198] *See* Memorandum from Lawrence A. Greenfeld to Steven R. Schlesinger 2 (Dec. 18, 1985) (on file with the *Stanford Law Review).* Of the 1405 on death row at the end of 1984, an estimated 132 had prior murder convictions. *Id.* at 1. These figures were based on a Bureau of Justice Statistics 1979 survey of 11,397 state prison inmates, weighted and adjusted for the 1984 prison population. *See* U.S. Dep't of Justice, Bureau of Justice Statistics, Profile of State Prison Inmates, 1986, at 7 (1988); U.S. Dep't of Justice, Bureau of Justice Statistics, Capital Punishment, 1984, at 7, table 9 (1985) [hereinafter Capital Punishment, 1984] (of 1405 persons serving death sentences, 104 had been previously convicted for homicide).

[199] *See* Bedau & Radelet, *supra* note 1, at 80.

[200] For instance, one might derive a rough estimate by multiplying 810 convicts by 3.1%—the proportion of convicted murderers who had been sentenced to death out of those admitted to prison for homicide in 1983. *See* Capitol Punishment, 1984, *supra* note 198, at 9. Table A–1. This calculation yields a figure of approximately 24 lives saved through the use of capital punishment over the last several decades. This estimate may be conservative. Since the death penalty is reserved for the most aggravated murders, it seems fair to conclude that the perpetrators pose a greater risk of subsequent homicide than the population of convicted murderers generally. *See, e.g.,* Tex. Code Crim. Proc. Ann. art. 37.071(b)(2) (Vernon 1981 & Supp. 1988) (requiring a finding that "there is a probability that the defendant would commit criminal acts of violence that would constitute a continuing threat to society"). Moreover, the 23 allegedly wrongful executions span this entire century while 24 lives saved through incapacitation covers the last few decades.

[201] Bedau & Radelet, *supra* note 1, at 80.

[202] *Id.* at 81. *But see* Recidivism of Young Parolees, *supra* note 197, at 4. Table 4. The data cited reveals that of 11,404 persons originally convicted of "willful homicide" and released during 1965 to 1974, 34 were returned to prison for commission of a subsequent criminal homicide *during the first year alone. See also* H. Bedau, *Recidivism, Parole, and Deterrence,* in The Death Penalty in America 173, 175 (3d ed. 1982) (cited in Bedau & Radelet, *supra* note 1, at 79 n.296).

[203] *See, e.g.,* Ga. Code Ann. § 17–10–30 (1982).

[204] *See, e.g.,* Tex. Code Crim. Proc. Ann. art. 37.071(b)(2) (Vernon 1981 & Supp. 1988).

[205] 428 U.S. 153. 186 (1976) (plurality opinion). Anecdotal evidence supports this view. For instance, according to the Attorney General of Kansas, one of the contributing factors leading to the 1935 reenactment of the death penalty in Kansas for first-degree murder was the spate of deliberate killings committed in Kansas by criminals who had previously committed such crimes in surrounding states where their punishment, if captured, could have been the death penalty. These criminals admitted having chosen Kansas as the site of their crimes solely for the purpose of avoiding a death sentence in the event that they were captured. Report of the Royal Commission on Capital Punishment 1949-53, at 375 in 7 Reports of Commissioners, Inspectors, and Others 677 (1952-1953). For more anecdotal examples, see W. Weld & P. Cassell, *supra* note 196, at app. C.

[206] *See* W. Weld & P. Cassell, *supra* note 196, at 15-19.

[207] *See id.* at 19 (explaining supply-demand econometric model of deterrence).

[208] *See* Layson, *Homicide and Deterrence: A Reexamination of the United States Time-Series Evidence,* 52 S. Econ. J. 68, 75, 80 (1984); Layson, *United States Time-Series Homicide Regressions with Adaptive Expectations,* 62 Bull N.Y. Acad. Med. 589 (1986).

[209] *See* Layson, *Homicide and Deterrence: Another View of the Canadian Time-Series Evidence,* 16 Can. J. Econ. 52 (1983).

[210] *See* Ehrich, *Capital Punishment and Deterrence: Some Further Thoughts and Additional Evidence,* 85 J. Pol. Econ. 741 (1977). This study is a response to criticisms of an earlier study by Ehrlich. *See* Ehrlich, *The Deterrent Effect of Capital Punishment: A Question of Life and Death,* 65 Am. Econ. Rev. 397 (1975).

[211] *See, e.g.,* Wolpin, *Capital Punishment and Homicide in England: A Summary of Results,* 68 Am Econ. Rev. 422 (1978); Phillips & Ray, *Evidence on the Identification and Causality Dispute About the Death Penalty,* in Applied Time Series Analysis 313 (1982). These studies are particularly informative since Bedau and Radelet argue in their reply to this article that nothing we cite addresses the issue of whether the death penalty has a marginal deterrent effect over long-term imprisonment. Bedau & Radelet, *supra* note 23, at 168-69. But Wolpin, as well as Phillips and Ray, controlled for imprisonment length and observed a unique deterrent effect attributable to death sentences.

[212] *See, e.g.,* Bartel, *Women and Crime: An Economic Analysis,* 17 Econ. Inquiry 29 (1979); Block, Nold & Sidak, *The Deterrent Effect of Antitrust Enforcement,* 89 J. Econ. 429 (1981); Corman, *Criminal Deterrence in New York: The Relationship Between Court Activities and Crime,* 19 Econ. Inquiry 476 (1981).

[213] *See, e.g.,* Viscusi, *The Risks and Rewards of Criminal Activity: A Comprehensive Test of Criminal Deterrence,* 4 J. Lab. Econ. 317 (1986); Witte, *Estimating the Economic Model of Crime with Individual Data,* 94 Q.J. Econ. 57 (1980). *But see* Myers, *Estimating the Economic Model of Crime: Employment Versus Punishment Effects,* Q.J. Econ. 157 (1983) (challenging Witte's conclusions).

[214] Between 1900 and 1985, 7092 persons were lawfully executed. *See* Bedau & Radelet, *supra* note 1, at 73. We multiplied Layson's estimate of the execution/homicide tradeoff (18) by 7092 to get 125,000. Layson's data extends from 1933 to 1977. *See* Layson, *supra* note 208, at 70. We assume in our equation that the tradeoff he calculates would apply at the same level for the entire period from 1900 to 1985.

[215] For instance, even if one were to contend that there was only a small (say 25%) chance of Layson's figures were correct, then one would have to weight 31,250 lives (25% × 125,000) in any risk assessment equation.

Of course, to complete the calculation, one must consider the possibility of a counterintuitive "brutalization" effect (*i.e.,* an increase in the homicide rate) attributable to society's use of the death penalty. *See* Kaplan, *The Problem of Capital Punishment,* 1983 U. Ill. L. Rev. 555, 560-61; *see also* Bedau & Radelet, *supra* note 1, at 80. The anecdotal and statistical support for such an argument is extremely thin. *See* W. Weld & P. Cassell, *supra* note 196, at 15-16. Moreover, Layson's equations demonstrate that any "brutalization" effect is outweighed by capital punishment's deterrent effect. *See id.* at 16, n.17.

[216] Bedau & Radelet, *supra* note 1, at 79.

[217] As Ernest van den Haag has observed: " 'All human activities—building houses, driving a car, playing golf or football—cause innocent people to suffer wrongful death, but we don't give them up because on the whole we feel there's a net gain.' " N.Y. Times, Nov. 14, 1985, at A19, col. 1. Similarly, van den Haag argues, capital punishment is justified even though a few innocent persons may be executed, because it produces "a net gain in justice . . . being done." *Id.* Bedau and Radelet claim that van den Haag's comparison is misleading, *see* Bedau & Radelet, *supra* note 1, at 79, but it appears that they have misunderstood his position. Van den Haag's argument is not that those who participate in such activities as building houses or driving cars consent to their exposure to risk, but that such activities inevitably create risks for others who are not involved in those activities. Society tolerates these risks because, on balance, the consequences of these pursuits are more desirable than not. Nor is it fair of Bedau and Radelet to criticize van den Haag's comparison on the ground that "the intention of capital punishment is to kill the convicted, whereas this is not the intention of the practices to which van den Haag draws a parallel." *Id.* In truth, it is no more "the intention of capital punishment" to kill the innocent than it is the intention of builders or drivers to do so. In either case, a mistake that causes the death of an innocent person is an unintended cost of the activity.

[218] According to the authors, "[g]iven the irremediability of the death penalty and the availability of an adequate alternative punishment, the execution of *any* defendant is unnecessary and cannot be justified even if there were substantial benefits of capital punishment." Bedau & Radelet, *supra* note 1, at 79. One flaw in this reasoning is that it takes as a premise the very question at issue—"the availability of an adequate alternative punishment." Beyond that, the conclusion that even substantial benefits cannot justify the execution of actual murderers suggests that the authors' objection to capital punishment is not really based on the risk of executing the innocent. They would apparently oppose the death penalty even if it could never result in a wrongful execution and even though it would deter an indefinite number of prospective murders. *See id.* The authors suggest that supporters of capital punishment "might see the issue differently" if they were "the innocent defendants facing the executioner." *Id.* But, by the same token, opponents of capital punishment might see the issue differently if they were the innocent victims of a kidnaper who had not yet decided whether to kill the hostages. *Cf.* F. Carrington, Neither Cruel nor Unusual 99 (1978) (robbery victim was shot and left for dead by assailants who had decided not to leave a witness because a murder would make no difference in the "time" they would "do" if caught).

[219] Senate Comm. on the Judiciary, *supra* note 197, at 13.

[220] Media General/Associated Press published the most recent national poll regarding the death penalty based on interviews conducted from November 7-14, 1986. That poll found that 84% of Americans favor the death penalty for especially brutal murders, and only 11% oppose capital punishment entirely. The poll also revealed that support for the death penalty crossed as racial, educational, economic, and regional lines. Media General/Associated Press Poll: Death Penalty, Nov. 7-14 (1986), *reprinted in* W. Weld & P. Cassell, *supra* note 196, at app. B at 1, 8.

[221] *See* notes 194-215 *supra* and accompanying text.

[222] *Capital Punishment: Hearings Before the Comm. on the Judiciary,* 97th Cong., 1st Sess., 246-47 (1981) (testimony of Walter Berns).

[223] Berns, *Defending the Death Penalty,* 26 Crime & Delinq. 503, 509 (1980).

[224] *Id.* at 511. Lesser penalties are inadequate to achieve this purpose and may, indeed, demean the value of human life. As the husband of a murder victim stated following the recent convictions of several defendants for his wife's brutal slaying in the District of Columbia: "I hate that D.C. doesn't have the death penalty. It's a lot of people who think they can kill somebody and get away with it. Now we got to feed those prisoners. They'll be sitting up looking at TV and having fun." Wash. Post, Dec. 19, 1985, at A39, col. 4.

[225] *See* E. van den Haag, Must the American Criminal Justice System Be Impotent? 2 (Sept. 19, 1985) (White Paper prepared for the Washington Institute for Values in Public Policy) ("The sanctions of the criminal justice system are effective only if inflicted upon the guilty and not on the innocent. If innocents were as liable to be punished as guilty persons, punishment would not be a reason for avoiding crime.").

[226] *See* van den Haag, *supra* note 7, at 68: "The irrevocability of a verdict of death is contrary to the modern spirit that likes to pretend that nothing ever is definitive, that everything is open-ended, that doubts must always be entertained and revisions made. Such an attitude may be proper for inquiring philosophers and scientists. But not for courts. They can evade decisions on life and death only by giving up their paramount duties: to do justice, to secure the lives of the citizens, and to vindicate the norms society holds inviolable." *Id.*

[227] This conclusion is only strengthened by the authors' reply to our critique. *See* Bedau & Radelet, *supra* note 23. As proponents of the view that capital punishment should be abolished because it entails an unacceptable risk of erroneous execution, *see* Bedau & Radelet, *supra* note 1, at 80-81, they have the burden of persuasion. Yet they now admit that neither they nor any previous researchers have proved any executed defendant to be innocent. *See* Bedau & Radelet, *supra* note 23, at 164. They also now concede that the risk of executing the innocent is relatively unimportant to the death penalty debate. *See id.* at 165-66.

Mr. THURMOND. Mr. President, I take this opportunity to express my appreciation to the able Senator from Utah for the great work he has done on the Judiciary Committee and the magnificent work he has done on this crime situation. He has been a stalwart in this matter. He deserves great credit, and I deeply appreciate the fine cooperation he has given me in this important matter.

Mr. HATCH. I thank my dear friend and colleague from South Carolina. I apologize for saying he was from North Carolina a little earlier. He shot out of his chair. I have not seen him move that fast in years. And he moves fast, let me tell you. I appreciate his kind remarks.

I must say that I am looking forward to working with the distinguished Senator from Delaware in, hopefully, resolving this bill. He has to live with a lot of different situations on his side of the floor. So it makes it more difficult for the bill to be as good as I would like to see it.

But I intend to work with him and with the distinguished Senator from South Carolina to try to perfect these bills, if we can, so as to resolve some of these problems.

I thank the Chair. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FORD). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I rise to discuss an amendment I will offer tomorrow, in an effort to strengthen the assault weapons provisions of the crime bill.

This amendment adds the most dangerous assault weapons to the list of firearms that are already included in this bill.

It also bans the sale of magazines larger than 15 rounds.

These provisions have the support of the law enforcement community.

I will offer this amendment for the same reason I introduced legislation on assault weapons last year.

That is the tragic event that took place January 17, 1989, in Stockton, CA, when a madman armed with an AK-47 assault rifle opened fire and turned a schoolyard into a killing field.

There was no reason, no logic, nothing on his agenda, but the gun used by Patrick Edward Purdy to kill 5 children and wound 30 others was not a hunting rifle designed for sportsmen, but a combat weapon made in China for use by Communist troops.

He carried enough ammunition for a small army, and had two large magazines, one for 75 rounds, the other for 35 rounds.

Unfortunately, that incident in Stockton, CA, was but one of many incidents of this kind that have occurred across the country. There was a situation down in Louisville, KY, where a disgruntled employee, a former printing plant employee, came back to the plant and for no reason at all with an assault weapon killed 7 of his fellow workers and wounded 13 others.

The police officers of this country are all too familiar with assault weapons. They are too often outgunned on the streets by drug dealers and other criminals who arm themselves with these weapons of war. The police have been clear and unanimous in their support for the strongest possible legislation to ban assault weapons. Police officers of this country are no different than any of the rest of us. They want to live, and semiautomatic assault weapons too often bring their lives to an untimely end.

My amendment will ban semiautomatic assault weapons whether they are imported or domestic. What an absurdity we have in this country now where the President of the United States bans imported semiautomatic assault weapons but permits the sale of those manufactured in this country. Does the President of the United States really think that the law enforcement community of this country finds it more comfortable, is more willing to die with a weapon made in this country than one made in China or Israel or the Soviet Union or wherever?

The bill that we have before us would add more assault weapons to the list of firearms being banned. The present bill contains four domestic semiautomatic assault weapons and five additional ones that are imports. Those five are already banned.

So of the nine we add only four that are new weapons to be banned. The amendment that we will offer tomorrow puts in 13 additional semiautomatic assault weapons. Most of these are domestic weapons not covered by the President's ban on imported assault weapons.

On that score, I want to come back to the point I made previously. I do not understand the President's logic. I do not understand how he can recognize the harm, the hurt, the devastation that is caused by semiautomatic assault weapons, and then take that strong position, really a courageous position, to ban the import of those semiautomatic assault weapons, but not do anything about those made in this country.

As any police officer in this country will tell you, or the widows of those police officers will tell you, it makes no difference if those police officers are shot by a foreign or domestic assault weapon. Either way the price is just the same; he is just as dead.

Then we will hear, as this debate goes on, the National Rifle Association will tell us of all the harm and the terrible things that will happen if we pass this amendment. You may be certain that the NRA will lie about the amendment as well. There is nothing new about that. The NRA lies about almost every piece of legislation having to do with guns in this country. They have lied about other assault weapon legislation. They lied about plastic gun legislation. They lied about cop-killer bullet legislation. "Lies, damn lies and NRA ads" is how one national magazine put it after looking into NRA claims about what my legislation would do.

The truth about this amendment is that no currently owned weapon would be affected. Nobody would lose their gun if the amendment passes. It would affect only future sales of assault weapons.

The NRA lied and said there is no way to distinguish between assault weapons and hunting rifles. It is a lie. Time and time again they have lied to their members, they have lied in newspaper ads, they have lied in television ads, they have lied in radio ads. I know. They came to my State in 1988 and lied about the legislation that I supported.

The truth is that even the Bush administration has concluded, after an extensive study by the Bureau of Alcohol, Tobacco and Firearms, "There are viable, clear differences between semiautomatic assault rifles and semiautomatic rifles used in traditional sports." That is the Bureau of Alcohol, Tobacco and Firearms speaking. That is not partisan, one side or the other. That is our governmental agency that deals with this issue.

I believe it is time for Senators to stand up to the NRA. I believe it is time to say no to the NRA, and stand with the police officers of this country and with all innocent people like those children in Stockton.

I believe it is time to raise up our shoulders and say that the NRA has been fooling the people long enough, their members and some others as well, about legislation pending in the U.S. Congress. It is time to pass strong, sane legislation that will save lives.

That is the reason I hope when this issue is brought to the floor tomorrow the Members of this body will see fit to support the amendment that will be offered in my behalf.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, during the past several months, the Senate has had the opportunity to consider legislation on a wide variety of issues. We have passed clean air legislation. We have passed a supplemental appropriations bill that provides aid to Nicaragua and Panama as well as funding for hundreds of our favorite congressional pet projects. And we have passed legislation that allegedly reforms the Hatch Act.

A good number of these bills have been tagged with the special interest label. Sometimes this label is justified. And sometimes it is not.

But one issue that transcends the special interests—that affects virtually everyone in this country—is the often horrifying issue of crime.

Just last week, the Justice Department released statistics showing that an alarming 36.1 million crimes were committed in 1989. This is obviously an enormous—and very disturbing—number, and the number is bound to get larger unless Congress takes decisive steps to reform some of the key ingredients of our criminal justice system.

FRAMING THE DEBATE

So far, this debate has been a simple one. It is a debate between the Democrat approach offered by my distinguished colleague, Senator BIDEN, and a Republican bill introduced by the ranking member of the Judiciary Committee, Senator THURMOND.

Both bills claim to cover the same territory. They claim to reform habeas corpus procedure and the exclusionary rule. They claim to toughen up the Federal death penalty. And they claim to deal with such difficult issues as firearms-related crimes and the drug testing of convicted criminals.

In reality, though, both bills take radically different approaches. One approach significantly improves the criminal justice system, while the other makes the system more difficult, more complicated—all under the guise of something called criminal justice reform.

CAPITAL PUNISHMENT

The bill introduced by Senator THURMOND is unequivocal when it comes to the death penalty. It says "yes" to the death penalty as a deterrent to crime. And it says "yes" to the death penalty as a legitimate expression of society's outrage at those who commit capital offenses.

The Thurmond bill, for example, establishes capital sentencing procedures that satisfy the often complicated constitutional standards developed by the Supreme Court since the Furman versus Georgia decision.

The Thurmond bill also establishes—and, in some instances, restores—an enforceable death penalty for the most serious Federal crimes, such as murder for hire, hostage taking and kidnaping resulting in death, murder of Federal law enforcement officers, assassination of Federal officials, fatal mail bombings, murder by Federal prisoners serving life terms, and aggravated crimes of espionage and treason.

RACIAL JUSTICE ACT

On the other hand, the bill introduced by my distinguished colleague from Delaware slams the door on the death penalty by incorporating something called the Racial Justice Act.

The Racial Justice Act is part of a rich tradition here in Congress of giving harmless-sounding names to harmful pieces of legislation.

On its face, the Racial Justice Act sounds great. It sounds like a worthy cause. And there is not a single Member of the Senate who does not, in fact, support racial justice or worthy causes.

But when you look behind the label, you will see that the Racial Justice Act is nothing more than a pleasant-sounding prescription for the complete nullification of the Federal and State death penalties.

It is antidemocratic, anticapital punishment, and it has nothing to do with racial justice.

Do not just take my word for it. Take the word of our Nation's highest law enforcement official, Attorney General Richard Thornburgh, who has written that the so-called Racial Justice Act is not a serious effort to address any actual or potential problems of discrimination in the administration of capital punishment, but a transparent effort to make capital punishment impossible by imposing standards and requirements that cannot be met. Its enactment would effectively end capital punishment in the United States.

I urge my colleagues to take a few minutes to read the actual language of the Racial Justice Act, particularly the provisions establishing the burden of proof for someone alleging racial bias in a capital sentence.

This provision states that:

> It shall not be necessary to show discriminatory motive, intent, or purpose on the part of any individual or institution. Ordinary methods of statistical proof shall suffice.

In other words, just numbers.

No discriminatory motive. No discriminatory intent. No discriminatory purpose. No proof—in other words—and the courts will still be required by the Biden bill to sacrifice hundreds of legitimate capital sentences—all at the altar of raw statistics.

HABEAS CORPUS AND EXCLUSIONARY RULE REFORM

In two other important areas of criminal justice reform—habeas corpus and the exclusionary rule—the Thurmond bill is far superior to the bill introduced by my distinguished colleague from Delaware.

The Thurmond bill adopts most of the recommendations of the Powell Commission, which concluded that the habeas system had spun out of control, consuming precious judicial resources and causing endless delays in capital cases.

The Thurmond bill would slow down the habeas merry-go-round by limiting the right of Federal courts to hear habeas cases that have been fully and fairly litigated in State court. It would also establish a 1-year time limitation on habeas corpus applications.

The Biden bill, on the other hand, would have the unintended effect of opening up the habeas floodgates by establishing a fuzzy, open-ended miscarriage of justice standard of habeas review. This standard will allow any death row inmate to obtain yet another review of his conviction and sentence in Federal court simply by alleging that he is a victim of a miscarriage of justice—whatever that term may mean.

As Attorney General Thornburgh has pointed out:

> Even claims that cast no doubt on a defendant's factual guilt could be raised at the 11th hour under an undefined "miscarriage of justice" standard.

When it comes to the exclusionary rule reform, the Thurmond bill does not fool around. It codifies the Supreme Court's Leon decision, which recognized a general good faith exception. And unlike the Biden bill, it also takes the Leon decision one step further by extending the good faith exception to warrantless searches.

This makes sense. And it is good public policy. Requiring the courts to toss out valuable evidence—even when a law enforcement officer has acted completely in good faith—is the height of form over substance. It is cutting your nose off to spite your face.

OTHER PROVISIONS

The Thurmond bill would also mandate the drug testing of any individual convicted of a drug-related or firearm-related crime prior to his release from prison. And it would authorize a mandatory minimum penalty of 10 years for any person who uses a semiautomatic weapon during the commission of a violent crime or serious drug offense.

Mr. President, these are serious and important reforms, and they deserve our support.

Mr. President, 83 percent of all Americans will be victimized by crime at some point during their lifetime. A violent crime affects one person in this country every 20 seconds.

Obviously, as these frightening numbers suggest, the crime problem will not go away overnight. It will not vanish simply with a wave of the legislative magic wand, or speeches of anybody on this floor or the good intentions of anyone in this country.

But in this case Congress does have some responsibility and the Senate has some responsibility. We have to start somewhere.

The bill introduced by my distinguished colleague from South Carolina is more than a good start. If passed, it will be an important and effective weapon in a war to win back the streets, the neighborhoods, and the cities of this country.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BRYAN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRAHAM). Without objection, it is so ordered.

## MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on May 18, 1990, during the recess of the Senate, received a message from the President of the United States transmitting sundry nominations, which were referred to the appropriate committees.

(The nominations received on May 18, 1990, are printed in today's RECORD at the end of the Senate proceedings.)

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BURDICK, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 1804. A bill to amend title 23, United States Code, to reduce the amount of Federal highway funds allocated to any State that does not provide for the revocation or suspension of the driver's license of any individual convicted of a drug offense (Rept. No. 101-298).

By Mr. LEAHY, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute:

S. 2205. A bill to designate certain lands in the State of Maine as wilderness (Rept. No. 101-299).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. INOUYE, from the Select Committee on Indian Affairs:

Carl J. Kunasek, of Arizona, to be Commissioner on Navajo and Hopi Relocation.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BOSCHWITZ:

S. 2661. A bill for the relief of Lolita Raya; to the Committee on the Judiciary.

S. 2662. A bill for the relief of Bruno Figueroa and Patricia Figueroa; to the Committee on the Judiciary.

By Mr. McCAIN (for himself, Mr. THURMOND, Mr. LOTT, and Mr. D'AMATO):

S. 2663. A bill to provide increased and special benefits to individuals involuntarily separated from the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. BENTSEN (for himself, Mr. BURDICK, Mr. JOHNSTON, Mr. BUMPERS, Mr. BOREN, Mr. PRYOR, Mr. NICKLES, Mr. GRAMM, Mr. BREAUX, and Mr. CONRAD):

S. 2664. A bill to provide disaster assistance for agricultural producers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HATCH (for himself and Mr. THURMOND):

S. 2665. A bill to amend the Stewart B. McKinney Homeless Assistance Act to extend the Job Training for the Homeless Demonstration Program, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. BOSCHWITZ (for himself, Mr. GORTON, Mr. DASCHLE, Mr. COCHRAN, Mr. HEFLIN, and Mr. CONRAD):

S.J. Res. 321. A joint resolution to designate the week of August 19 through 25, 1990, as "National Agricultural Research Week"; to the Committee on the Judiciary.

By Mr. SIMON:

S.J. Res. 322. A joint resolution to designate the 7-day period commencing October 7, 1990, and ending October 13, 1990, as "National Aviation Education Week"; to the Committee on the Judiciary.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL (for himself and Mr. DOLE):

S. Res. 289. A resolution to direct the Senate Legal Counsel to appear as amicus curiae in the name of the Senate in *United States ex rel. Rudd, et al.* v. *General Contractors, Inc., et al.*; considered and agreed to.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTION

By Mr. McCAIN (for himself, Mr. THURMOND, Mr. LOTT, and Mr. D'AMATO):

S. 2663. A bill to provide increased and special benefits to individuals involuntarily separated from the Armed Forces, and for other purposes; to the Committee on Armed Services.

INVOLUNTARILY SEPARATED MILITARY PERSONNEL BENEFITS ACT

● Mr. McCAIN. Mr. President, I believe all Americans rejoice in the profound political reform currently underway in the world. Americans have endured many threats and hardships in our advocacy and protection of democracy. Now that democratic values are ascendant in much of the world, we are rightly proud of our leadership of the free world in the long struggle with tyranny.

Throughout this struggle, the U.S. armed services have been the vanguard of the free world. In our satisfaction with the global progress of liberty, we must be careful to keep faith with the people who kept faith with America and our great cause—the men and women of the U.S. Armed Forces.

The leadership of the free world was an expensive undertaking. Now, in the wake of these many democratic advances, Americans eagerly anticipate being relieved of some of the burden of leadership. All Americans welcome the prospect of a peace dividend. We have endured much in our defense of liberty and deserve opportunities to turn our attention and resources to domestic improvements. But in our eagerness to avail ourselves of a peace dividend, we must not abandon our commitment to those who have endured the most to reach this moment.

It is with that commitment in mind, that I introduce, today, legislation to provide a comprehensive military transition plan that protects American service men and women. The end of the cold war is, indeed, cause for celebration. But it is also the occasion to impose wrenching changes on thousands of American lives. The transition to a military that responds to today's political and military realities will result in massive personnel cuts in the American Armed Forces. It will be a transition of enormous proportions affecting many people, but for thousands of military personnel the world will be turned inside out.

These faithful Americans entered our all-volunteer services, assumed the great personal risk and hardships entailed in military service, kept America safe and promoted our values. They did so with the understanding that, at a minimum, they would be repaid for their faithful service with the security of full careers in the military if they so chose. Now, Mr. President, that security will not be provided to many American service men and women who will be required to abbreviate their military careers and return to civilian life. If we determine that we do not require the services of these people any further, then it is incumbent on the Government of the United States to take measures that will compensate them for the loss of their security and to ease the hardships entailed in the transition to other careers.

Changes, whether for good or bad, often have unintended consequences. Let us limit the number of negative consequences associated with the important victories of recent months. That is what this legislation will do. My purpose is to protect the well-being of the men and women responsible for the well-being of the United States. They kept faith with us. Now, we must keep faith with them. I am confident that all Americans want to honor our debt to our Armed Forces. I urge the Senate to do likewise by adopting this legislation.

Mr. President 2 weeks ago I rose before this body to provide a comprehensive transition plan to protect the men and women who will be forced to leave military service. Today, I am introducing legislation to transform that plan into law. This legislation reacts to the fact that we face the most urgent crisis in the way we treat our military personnel since the days in which we carried out massive personnel cuts following World War II.

We are only just beginning to debate the size of the cuts we will make in our forces. It is already clear, however, that these cuts will be much larger than those contained in this year's budget request or the new 5-year plan being discussed in the Pentagon.

During the next few years, we will almost certainly have to force nearly half a million volunteers to leave military service, the vast majority against their will. Rumors of these cuts are already having a major impact on morale. Military men and women are bewildered and confused about their future careers.

We are also dealing with a very different situation than we faced in making previous force cuts. We are not at war and the economy does not have a shortage of skilled manpower. In fact, the cuts in military manpower will coincide with major cuts in the manpower used by defense industry.

The men and women in today's military are not conscripts who expect to serve for only a short period of time and then make civilian life their career. They are volunteers. They joined to serve their country. Most joined to make the military a career. They must not become the forgotten victims of the peace dividend, and be forced out of military service at the lowest possible cost to the U.S. budget. These men and women deserve consideration and respect.

This is why we must pass legislation to protect the men and women of our volunteer military force. We need a transition plan that will provide improved separation pay, unemployment compensation, relocation and outplacement services, priorities in Federal hiring, benefits under the GI bill, and medical insurance. We need to take urgent action to protect our men and women in uniform as we reduce our forces and defense budgets.

Our current system clearly does not provide that protection. It assumes that virtually all military personnel either leave military service at a time of their own choosing, or retire with substantial benefits after making the military their career. It is not set up to deal with the reality that tens of thousands of fully qualified personnel will be forced to leave military service years before they planned to do so, and often with only limited warning.

THE IMPACT OF FORCED REDUCTIONS IN MILITARY MANPOWER

Mr. President, we need to realize that we are not talking about some small fraction of our uniformed military. Even if we make conservative assumptions about the coming cuts in the President's defense budget request, we will still have to cut 500,000 to 700,000 people from the armed services during the next 5 to 6 years.

The Department of Defense and each military service has already made it clear that every effort will be made to accomplish such reductions without forcing men and women out of military service. The Department has applied for relief from the current legislation that prevents voluntary retirements until officers have served for 3 years in grade or 3 years in a given position.

Each military service is planning to accommodate as many reductions as possible through voluntary discharges, retirements and end of obligated service discharges. Senator GLENN is considering important legislation to allow retirement before 20 years of service with a proportionate cut in retirement benefits.

These measures are a good first step, however, it is clear that such measures will not be enough. We cannot possibly deal with this level of reductions by cutting accessions, or by offering early outs and other incentives to leave military service voluntarily. We are going to have to force dedicated and highly competent personnel—people who are fully qualified to stay in the military, and who, at any other time would be promoted to higher ranks—to leave under conditions where they will often have only a few months of warning.

The Army is already faced with an immediate need to cut manpower, a need that has been made more difficult because of the failure to authorize reprogramming into the manpower accounts of this year's defense budget. It is forced to cut its end strength by at least 40,000 this year. It will be forced to cut at least 75,000 more personnel next year, and the total could exceed 125,000.

No one can now predict the number of men and women the Army will have to cut from its current strength, but it is clear that the Army of the mid-1990's will drop to a force of 12 to 14 divisions. This is almost certain to reduce the Army from 750,000 to no more than 520,000.

It also is not just the Army that will be affected. Military personnel in all branches of service face manpower cuts. Even if we make a conservative estimate of the manpower impact of the coming cuts in defense spending, over the next 5 years the Navy could drop from 597,000 to as little as 480,000. The Marine Corps could drop from 197,000 to 160,000. The Air Force could drop from 571,000 to 428,000.

THE LESSONS OF VIETNAM

The men and women in military service may not yet know how severe these cuts will be, but they know major cuts are coming and they have good reason to be worried about their human impact. We failed to treat these dedicated Americans properly after Vietnam. We failed to honor them for their sacrifices, and we failed to ensure that they could make a smooth transition to civilian life.

Our post Vietnam cuts led to the confused and improper handling of thousands of personnel who had served their country in an unpopular war. There were no parades, and there were far too few efforts to help men and women transition back into the civilian economy. The Government made countless false economies in helping men and women qualify for the jobs they deserved, and we are still paying a high price in terms of human tragedies, welfare and medical costs, and lost tax revenues.

Unfortunately, the current laws and regulations that affect men and women who are forced out of military service would repeat these same mistakes. Under current law, tens of thousands of fully qualified personnel and their families from every State are going to be forced to leave military service with few of the options and protection available to those who retire or voluntarily leave the military.

Unless we adopt legislation to create a comprehensive transition plan to protect our uniformed personnel, we are going to repeat many of the mistakes we made after Vietnam, and we are going to destroy our all-volunteer force structure as qualified men and women rush to leave service for any job they can find.

This is why it is vital that our servicemen and women know that the coming personnel reductions are well thought out and well programmed. This is why it is equally vital that they know they will be protected against forced reductions in personnel strength long before these reductions reach high levels, and why they be assured that they will not be the victims of false economies in the rush to meet budget goals or reduce defense expenditures.

A COMPREHENSIVE TRANSITION PLAN TO PROTECT MEN AND WOMEN WHO ARE FORCED TO LEAVE MILITARY SERVICE

Let me summarize the legislation that is required:

GIVING SEPARATION PAY TO ENLISTED MEN

First, separation pay is now only available to officers. We need to ensure that it is available to career enlisted personnel as well as career officers.

My legislation will provide all service members, commissioned officers, warrant officers, and enlisted, who are involuntarily but honorably discharged, separated or denied re-enlistment with separation pay.

To be eligible, a service member must have served 7 years of continuous and honorable service. This legislation is consistent with the Department of Defense's guidelines on separation pay as they exist today, meaning that the criteria to receive 100 percent of authorized separation pay will remain the same in my legislation as it is currently constructed by DOD policy today.

My legislation will remove the current $30,000 cap so that members having served longer periods of active duty will be better compensated for lifetime losses in retired pay. The separation pay amounts will be based on

the amount of time a member has served and their rank. The details of this proposed severance pay plan are shown in the attached chart.

ENSURING EQUITABLE UNEMPLOYMENT COMPENSATION

Second, the unemployment compensation now available to military personnel is different than that offered to other workers. This simply is not fair. Many military families will find it far harder to seek work in the place they may want to make their new home than civilian families who already live there, and many military families who are dislocated in the process of leaving the service will lose two wage earners—not just one.

My legislation will repeal UCX, 5 U.S.C. 8521(c). It will provide unemployment compensation for the same 26 weeks available to civilians, and be available after one week. Currently, former military are eligible for only 13 weeks of compensation and have to wait 4 weeks before they become eligible to receive unemployment compensation.

PROVIDING THE PROPER RELOCATION SERVICES

Third, we learned in Vietnam that relocation services are needed to help former military personnel assimilate into a new community. Under my legislation, those who are involuntarily separated will be authorized permissive temporary duty and leave in order to visit areas where they may wish to relocate. In addition, departing military personnel and their families will be provided with information about the area where they are considering relocating.

PROVIDING OUTPLACEMENT SERVICES

Fourth, the Department of Defense would provide job search and job referral services to those released from active duty and who are eligible for severance pay. Spouses of those involuntarily separated would also be authorized to participate in the outplacement program.

Procedures would be established to expedite providing names and addresses of those involuntarily separated, and their spouses, who voluntarily agree to make them available to outside entities. In addition, the bill would encourage the President to establish a committee to seek private sector cooperation and job placement.

Priority placement will be given to involuntarily separated service members in hiring for Federal jobs. This measure, incidentally, will more than pay for itself in many job categories. Using skilled military personnel who have demonstrated their capabilities and loyalty, will realize substantial cost savings by eliminating unnecessary recruiting and background investigation expense.

ENSURING MONTGOMERY G.I. BILL COVERAGE

Fifth, my legislation will allow those service members who are involuntarily separated to become vested in the Montgomery GI bill educational benefit. The service member will pay the $1,200 required to become vested in the program and will be eligible to receive the full educational benefit.

There are those who did not sign up in the program; counting on making the military a career. With that option no longer available, the need for the Montgomery GI bill benefits becomes necessary. The opportunity for further education also provides benefit in terms of increased employment opportunities, less impact of major reductions on the employment base at any one period of time, and increased near-term tax revenues as military personnel qualify for better jobs.

PROTECTED HEALTH CARE BENEFITS

Sixth, involuntarily separated military and their families will be eligible for CHAMPUS at active duty rates for 3 months after separation from active duty. Individuals enrolling in the uniform services insurance program within that 3-month period will have continued eligibility for documented preexisting conditions. Involuntarily separated service members and family members who are pregnant at the time separation orders are executed will be covered under CHAMPUS at active duty rates.

Additionally, beneficiaries undergoing care and treatment for an injury, illness, or disease, including pregnancy for beneficiaries in their last trimester, at a military facility as of midnight of the member's date of separation from active duty will be entitled to receive continuing care and treatment as designees of the Secretaries of the military departments.

Such care and treatment will be authorized at a military facility with the capability to provide medically necessary and appropriate continuous care. This care will continue until such time as the injury, illness, or disease, including pregnancy, cannot be materially improved by further hospitalization or treatment, or such time as other insurance becomes effective, or after 1 year, whichever is first.

PROPER BRIEFING AND COUNSELING OF PERSONNEL

Finally, the services will be required to establish these programs and to make them available to the service members. Included in the briefing will be relocation and outplacement services, information on Reserve components and National Guard programs, veterans benefits, Montgomery GI bill benefits, priority placement, unemployment compensation, life insurance, and health care plans. Family members will be encouraged to attend the briefings as well.

RECOGNIZING THE CONTRIBUTIONS OF OTHERS

I do not wish to give the impression that I have not had help in drafting this transition plan, or that other Members of Congress have not been active in this area. These include Senator COHEN, Senator CRANSTON, Senator GLENN, Senator MURKOWSKI, Congressman DOWNEY, Congressman MONTGOMERY, and Congressman SLATTERY—to name a few. I also would like to thank my colleagues, Senator THURMOND, Senator LOTT, and Senator D'AMATO for being original cosponsors of this vital legislation.

The bill I am submitting is also the result of the help and efforts of many experts in the field, and I have drawn on several important pieces of legislation that have been proposed by others. I have worked with the Office of the Secretary of Defense, with staff of the Senate Armed Services Committee, and the staff of the Veterans' Affairs Committee.

Additionally, I have drawn heavily on the efforts of the military coalition, a group of 22 military associations, which created the core of the transition plan that I have just outlined. The work of Dorsey Chescavage and Sydney Hickey of the National Military Family Association, the efforts of Paul Arcari and Bill Hart of the Retired Officers Association, and Mack McKinney of the Non-Commissioned Officers Association has been particulary useful.

I also do not wish to imply that this legislation is set in concrete. I have asked the Department of Defense for further comments, and the CBO for a detailed cost analysis. I would appreciate additional suggestions and views from my colleagues, and I welcome additional suggestions from military experts and the men and women, and their families, who will be directly affected.

THE NEED FOR URGENT ACTION BASED ON UNDERSTANDING OF THE TRUE COST OF SUCH A PROGRAM

We cannot, however, delay in taking action, wait for "final" decisions on the size of the coming cuts in manpower, or wait for long studies and all the usual bureaucratic and analytic delays.

We also need to understand that the budget impact of such matters will be quickly offset by preserving the recruiting and retention base for our all volunteer military, by reducing welfare and other social costs, and by paid rises in tax revenue. The measures required to create an effective transition plan are only costly if one ignores the costs of not having an effective transition plan—and human and moral values are involved, not just budget dollars.

In short, I believe we must not only address, but pass legislation during this coming year that fully assures the men and women in the military, that Congress is not ignoring them, and that efforts are already underway to ensure that they will be treated properly if they are forced to prematurely end their chosen career. These men

and women met their obligation to us, we must now meet our obligation to them.

Mr. President, I ask unanimous consent that the text of the bill and a summary of the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2663

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Involuntarily Separated Military Personnel Benefits Act of 1990".

SEC. 2. SEPARATION PAY FOR MEMBERS OF THE ARMED FORCES WHO ARE INVOLUNTARILY DISCHARGED OR RELEASED FROM ACTIVE DUTY OR ARE DENIED REENLISTMENT.

(a) AMENDMENTS TO SECTION 1174 OF TITLE 10, UNITED STATES CODE.—Section 1174 of title 10, United States Code, is amended—

(1) in subsection (c)(1)—

(A) by striking out in the material preceding clause (A) "other than a regular member who after September 14, 1981, is discharged or released" and inserting in lieu thereof "discharged, separated, or released";

(B) by striking out "or" at the end of clause (A);

(C) by striking out clause (B) and inserting in lieu thereof the following:

"(B) in the case of a regular enlisted member, the member was denied reenlistment on active duty or was involuntarily separated from active duty under criteria established by the Secretary concerned; or

"(C) in the case of a reserve member, the member was not accepted for an additional tour of active duty for which the member volunteered.";

(2) in subsection (c)(3), by striking out "at least five" and inserting in lieu thereof "at least seven";

(3) in subsections (b) and (c) by striking out "five or more" each place it appears and inserting in lieu thereof "seven or more"

(4) in subsection (d)(1), by striking out "or $30,000, whichever is less"; and

(5) in subsection (g)(2), by striking out "may not exceed $30,000" and inserting in lieu thereof "shall be the amount determined under subsection (d)(1) or (d)(2), as appropriate".

(b) EFFECTIVE DATE.—Except as provided in paragraph (1), the amendments made by subsection (a) shall become effective on the first day of the first month following the month in which this Act is enacted.

(c) SAVINGS PROVISION.—In the case of any regular commissioned officer serving on active duty in the Armed Forces on the day before the effective date of the amendments made by subsection (a) who is discharged or released from that active duty on or after that effective date and who has five or more years of service in the Armed Forces but less than seven years, the amendments made by paragraphs (2) and (3) of subsection (a) shall not apply.

SEC. 3. PERIOD OF UNEMPLOYMENT COMPENSATION FOR EX-SERVICEMEN EXTENDED.

(a) IN GENERAL.—Subsection (c) of section 8521 of title 5, United States Code, is amended to read as follows:

"(c) The aggregate amount of compensation payable on the basis of Federal service (as defined in subsection (a)) to any individual with respect to any benefit year shall not exceed 26 times the individual's weekly benefit amount for total unemployment.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to claims for unemployment compensation made by individuals discharged or released on or after the date of the enactment of this Act.

SEC. 4. PROGRAM TO FURNISH EMPLOYMENT AND TRAINING INFORMATION AND SERVICES TO MEMBERS OF THE ARMED FORCES BEING INVOLUNTARILY SEPARATED FROM THE ARMED FORCES.

(a) PROGRAM ESTABLISHED.—The Secretary of Defense (hereafter in this section referred to as the "Secretary"), in consultation with Secretaries of the other Departments of the United States, shall conduct a program to furnish employment and training information and services to members of the Armed Forces during the 180 days before such members are involuntarily separated from the Armed Forces.

(b) PROGRAM SERVICES.—(1) The program referred to in this section shall assist members being involuntarily separated from the Armed Forces in assimilating to civilian life.

(2) In conducting the program referred to in this section, the Secretary shall—

(A) provide to members being involuntarily discharged or released from active duty, and to their spouses, job search training and job referral services;

(B) establish procedures to release the names of such members and spouses of such members, upon the consent of such members and spouses, to civilian employers, organizations, and entities to assist such members and spouses in locating civilian employment opportunities;

(C) provide counseling and assistance to such members in the procurement of loans and grants from the Small Business Administration; and

(D) provide information relating to the area of relocation chosen by such members, including—

(i) the cost and availability of housing,

(ii) employment opportunities for such members and the spouses of such members,

(iii) opportunities for such members for service in reserve components of the Armed Forces or in the national guard,

(iv) educational opportunities for such members and the families of such members,

(v) the cost and availability of child care,

(vi) the cost and availability of medical care, and

(vii) other living costs.

(c) BRIEFING FOR INVOLUNTARILY SEPARATED MEMBERS.—(1) Not less than 180 days before a member is involuntarily separated from the Armed Forces, the Secretary shall—

(A) notify the member of the date of the member's separation, and

(B) brief the member regarding the availability of potential retirement benefits, medical benefits, civilian employment, job preference for veterans, the Montgomery G.I. Bill, the Uniformed Services Voluntary Insurance Plan, and benefits referred to in subsection (b).

(2) In providing the briefing referred to in paragraph (1)(B), the Secretary shall—

(A) give the briefing during a member's normal duty hours,

(B) permit the spouse of an attending member to attend the briefing, and

(C) provide child care services at a reasonable cost to allow the attendance of a member and a member's spouse.

(3) The briefings referred to in paragraph (1)(B) shall be conducted by persons who are well qualified by virtue of their education, training, and experience to conduct such briefings.

(d) PROGRAM SUPPORT.—(1) The Secretary may utilize disabled veterans' outreach program specialists, local veterans' employment representatives, other employment service personnel, and representatives of veterans' service organizations to furnish the employment and training information and services under the program.

(2) The Secretary may enter into contracts with public or private entities to furnish the information and services referred to in subsection (b).

(e) REPORT.—Not later than one year after the program provided for in this section is initiated, the Secretary shall transmit to the Committees on the Armed Services of the Senate and the House of Representatives a report on the effectiveness of the program in furnishing employment and training information and services to members being involuntarily separated from the Armed Forces.

(f) INVOLUNTARY SEPARATION OF CERTAIN MEMBERS STATIONED OUTSIDE THE UNITED STATES.—In preparation for the discharge or release from active duty of members of the Armed Forces who are stationed outside the United States and whose dependents were permitted to accompany such members, the Secretary of Defense shall, to the maximum extent practicable, reassign the member and the member's accompanying dependents to the United States for the final three to six months of the member's tour of active duty.

(g) REPORT ON COOPERATION BY CIVILIAN EMPLOYEES.—The Congress urges and requests the President to establish a special committee to report to the Congress, the President, and the Secretary of Defense regarding effective and practical means of encouraging civilian employers to cooperate with and assist the Federal Government in providing employment training and job placement services to members being involuntarily separated from the Armed Forces.

(h) DEFINITION.—For purposes of this section, a person who is denied reenlistment and consequently discharged or released from the Armed Forces shall be considered to have been involuntarily discharged or released from active duty, but a person who is discharged from the Armed Forces under dishonorable conditions, who was discharged under section 1170 or 1173 of title 10, United States Code, or who is separated from the Armed Forces for unfitness or unsatisfactory performance shall not be considered to have been involuntarily discharged or released from that active duty.

(i) AUTHORIZATION.—There are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

SEC. 5. FEDERAL HIRING PREFERENCE ESTABLISHED FOR INDIVIDUALS INVOLUNTARILY DISCHARGED OR RELEASED FROM ACTIVE DUTY OR DENIED REENLISTMENT.

(a) PREFERENCE FOR PERSONS INVOLUNTARILY DISCHARGED OR RELEASED.—Section 2108 of title 5, United States Code is amended—

(1) by striking out "and" at the end of paragraph (3)(F),

(2) by adding "and" at the end of paragraph (3)(G),

(3) by adding at the end of paragraph (3) the following new subparagraph:

"(H) an involuntarily separated veteran;",

(4) by redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively; and

(5) by inserting after paragraph (2) the following new paragraph:

"(3) 'involuntarily separated veteran' means an individual—

"(A) denied reenlistment on active duty in the armed forces; or

"(B) involuntarily separated from active duty in the armed forces under honorable conditions and under criteria established by the Secretary of the military department concerned;".

(b) ADDITIONAL POINTS AWARDED.—Section 3309(2) of title 5, United States Code, is amended to read as follows:

"(2) a preference eligible under section 2108(4)(A) or (H) of this title—5 points.".

(c) CONFORMING AMENDMENT.—Section 3309(1) of title 5, United States Code, is amended by striking out "section 2108(3)(C)-(G)" and inserting in lieu thereof "section 2108(4)(C)-(G)".

(d) SENSE OF THE CONGRESS.—It is the sense of the Congress that with respect to persons involuntarily separated from the Armed Forces—

(1) efforts should be made to expand the number of noncompetitive position appointments available in the Federal Government and to increase the pay grade level for such appointments, and

(2) preferential hiring policies and procedures should be established as a condition for receiving the Federal share of expenditures for State and local programs.

SEC. 6. EXTENDED MEDICAL CARE.

(a) AMENDMENT TO CHAPTER 55 OF TITLE 10, UNITED STATES CODE.—Chapter 55 of title 10, United States Code, is amended by adding at the end the following new section:

**"§ 1105. Extended medical care for persons and dependents of persons involuntarily discharged or released from active duty**

"(a) Notwithstanding any other provision of this chapter, the Secretary concerned shall provide medical care to a person, and the dependents of a person, who is involuntarily discharged or released from active duty on or after the date of the enactment of this section for a period of 90 days following the date on which the person is involuntarily discharged or released from active duty. The Secretary shall provide such medical care at the same rates that medical care is provided for spouses and children under section 1079 of title 10, United States Code.

"(b)(1)(A) A person referred to in subsection (a) who, within 90 days after the date on which the person is involuntarily discharged or released from active duty, enrolls in the Uniformed Services Voluntary Insurance Plan (made available to members of the uniformed services upon their discharge or release from active duty) shall be entitled to receive medical care (and medical care for such person's dependents) under section 1079 of this title for any injury, illness, or disease of the person or dependent that was incurred or aggravated on or before the date of the involuntary discharge or release of the person and that is not covered by the Uniformed Services Voluntary Insurance Plan.

"(B) The Secretary concerned shall provide the medical care referred to in subparagraph (A)—

"(i) for a period of one year after the date of the involuntary discharge or release of the person;

"(ii) at the same rates that medical care is provided for spouses and children under section 1079 of this title; and

"(iii) for the pregnancy of a person referred to in subsection (a) or the pregnancy of a dependent of such a person if the pregnancy existed before the involuntary discharge or release of the person.

"(2) A person referred to in subsection (a) who does not enroll in the Uniformed Services Voluntary Insurance Plan within such 90 days, shall be entitled to receive (for such person and the dependents of such person) medical care, at any military medical facility with the capability to provide such care, for any injury, illness, or disease (including pregnancy) that was incurred or aggravated by the person or dependent before the date of the involuntary discharge or release of the person for such time as the injury, illness, or disease is cured or cannot be materially improved by further treatment, until the injury, illness, or disease is covered by an insurance plan, or for one year following the date of the involuntary discharge or release from active duty of the person, whichever occurs first. Such medical care shall also be provided for the pregnancy of a person referred to in subsection (a) or the pregnancy of a dependent of such a person if the pregnancy existed before the involuntary discharge or release of the person.

"(c) For purposes of this section, a person who is denied reenlistment and consequently discharged or released from the armed forces shall be considered to have been involuntarily discharged or released from active duty, but a person who is discharged from the armed forces under dishonorable conditions, who is discharged under section 1170 or 1173 of this title, or who is separated for unfitness or unsatisfactory performance shall not be considered to have been involuntarily discharged or released from that active duty.".

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of chapter 55 of such title is amended by adding at the end the following new item:

"1105. Extended medical care for persons and dependents of persons involuntarily discharged or released from active duty.".

SEC. 7. EDUCATIONAL BENEFITS FOR PERSONS INVOLUNTARILY DISCHARGED OR RELEASED FROM ACTIVE DUTY.

(a) ELIGIBILITY FOR BENEFITS UNDER THE MONTGOMERY G.I. BILL.—Chapter 30 of title 38, United States Code, is amended by inserting after section 1419 the following new section:

**"§ 1420. Eligibility of persons involuntarily discharged or released from active duty**

"(a)(1) An individual described in paragraph (2) who is involuntarily discharged or released from active duty on or after the date of the enactment of this section shall be entitled, as provided in this section, to basic educational assistance benefits under this chapter.

"(2) An individual referred to in paragraph (1) is an individual who—

"(A) elected not to receive educational assistance under this chapter or who is not entitled to the basic educational assistance benefits under this chapter for the maximum period; or

"(B) was eligible to participate in the educational benefits program under chapter 32 of this title.

"(b)(1) Subject to paragraph (2), an individual described in subsection (a) of this section shall be entitled to 36 months of basic educational assistance under this chapter (or the equivalent in the event of part-time benefits).

"(2) To become entitled to the basic educational assistance provided for under this chapter an individual referred to in subsection (a) of this section must make written application to the Secretary in accordance with such regulations as the Secretary shall prescribe and pay to the Secretary the amount determined under paragraph (3) of this subsection.

"(3)(A) An individual referred to in subsection (a)(2)(A) of this section shall be required to pay to the Secretary an amount equal to the difference between the amount withheld from the individual's basic pay under section 1411(b) of this title and $1,200.

"(B) An individual who elected to participate in the educational benefits program under chapter 32 of this title but elected to contribute at less than the maximum amount shall be required to pay to the Secretary an amount equal to the amount the individual contributed under section 1622 of this title and $1,200.

"(C) If an individual referred to in subsection (a)(1)(B) of this section elects to receive benefits under this section and the amount the individual contributed under section 1622 of this title was in excess of $1,200, the Secretary shall refund to the individual an amount equal to the difference between the amount contributed under that section and $1,200.

"(c) An individual who becomes eligible for benefits under this chapter by virtue of this section shall not be eligible for benefits under chapter 32 of this title.

"(d) For purposes of this section, an individual who is denied reenlistment and consequently discharged or released from the Armed Forces shall be considered to have been involuntarily discharged or released from active duty, but an individual who is discharged under dishonorable conditions or who was discharged under section 1170 or 1173 of title 10 or who is separated for unfitness or unsatisfactory performance shall not be considered to have been involuntarily discharged or released from that active duty.

"(e) The Secretary shall prescribe such regulations as may be necessary to carry out effectively this section and to administer the provisions under this section in the case of individuals described in subsection (a) of this section in the same manner, to the maximum extent practicable, as the provisions of this chapter are administered in the case of individuals otherwise eligible for basic educational assistance benefits under this chapter.".

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of chapter 30 of such title is amended by inserting after the item relating to section 1419 the following new item:

"1635. Eligibility of persons involuntarily discharged or released from active duty.".

---

SUMMARY OF MCCAIN TRANSITION PLAN

1. Separation Pay.—McCain legislation will provide separation pay for officer and enlisted who are involuntarily separated after 7 years of continuous and honorable service. The legislation will remove the current $30,000 cap on separation pay.

2. Unemployment Compensation.—McCain legislation will repeal UCX, 5 U.S.C. 8521(C) and will allow military released from active duty to be eligible for 26 weeks of unemployment and to be able to apply end of one week of unemployment. Current law restricts military released from active

duty to only 13 weeks of compensation and to start after four weeks.

3. Relocation Services.—McCain legislation will allow those members eligible for separation pay limited leave time, not to be charged to the individual, to visit the areas where they may wish to relocate. The expense of the trip will be borne by the individual member but they will be given the time by the service.

4. Outplacement Services.—McCain legislation will provide job search and job referral services to those eligible for separation pay and their spouses. The bill will give these military members priority placement for federal jobs. Additionally, the bill calls on the President to establish a committee to seek private sector cooperation and job placement.

5. Montgomery G.I. Bill.—McCain legislation will allow those members that are involuntarily separated under honorable conditions and that are not currently enrolled in the Montgomery G.I. Bill to pay the $1,200 required to become vested in the program and to receive the full educational benefit.

6. Health Care.—McCain legislation will allow those eligible for separation pay to receive continued CHAMPUS health benefits, at active duty rates, for three months after separation. Those that enroll in the Uniform Services Insurance Program within those three months will have continued eligibility for documented conditions. Members undergoing care at a military facility as of midnight of the day of separation will be covered up to one year for that pre-existing condition.

7. Service Briefings.—The military services will ensure that transition briefings are available to members as well as their spouses. The briefings will cover, at a minimum, those items covered above.●

---

By Mr. BENTSEN (for himself, Mr. BURDICK, Mr. JOHNSTON, Mr. BUMPERS, Mr. BOREN, Mr. PRYOR, Mr. NICKLES, Mr. GRAMM, Mr. BREAUX, and Mr. CONRAD):

S. 2664. A bill to provide disaster assistance for agricultural producers, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DISASTER ASSISTANCE ACT OF 1990

Mr. BENTSEN. Mr. President, we have all watched in horror in recent days as torrential rains have caused massive flooding in Texas, Oklahoma, Arkansas, and Louisiana. Lives have been lost, homes and belongings have been destroyed or damaged, millions of dollars in property damage has been done. The devastation is widespread and continuing as flood waters work their inexorable way downstream.

Herculean efforts are underway to minimize the damage and to provide relief to the flood victims. Presidential disaster declarations have been issued for 41 Texas counties, and more may very well be required.

I have been working closely with the many Federal agencies involved in providing flood relief, and their efforts to date have been commendable. I am keeping a close eye on current Federal efforts to make sure they are adequate, and I will be offering legislation to provide further assistance if that is needed.

One area in which I think that Federal legislation is clearly warranted is in the area of agricultural disaster assistance. Farmers in Texas and other States hit by the flood this year are every bit as deserving of disaster assistance as farmers in the Midwest who lost crops to natural disasters in 1988 and 1989. This year many Texas farmers are losing not only their crops, but their houses and barns as well. The legislation that I am introducing today will merely provide equal treatment to Texas farmers with losses in 1990 by making them eligible for the same kind of disaster assistance that was provided in 1989.

The Secretary of Agriculture has the power to provide crop disaster assistance without any action by Congress, but has consistently refused to use it. In each of the last 2 years Congress has enacted, and the President has signed into law, disaster legislation to assist farmers who lost crops to natural disasters. From the looks of east Texas, I think we need it do it again this year.

I am proposing this bill knowing that its enactment will be difficult and that it may very well need to be changed. We will get more information as time goes by about the needs associated with this year's farm disasters and the funds which are available within the budget constraints to deal with those problems.

However, I think that as a simple matter of equity we should provide this assistance. Hopefully the 1990 farm bill will result in improvements in the programs of the Federal Crop Insurance Corporation so that disaster legislation will not be needed in future years. However, this year we still have the same programs in place that we had in 1988 and 1989, both years in which agricultural disaster legislation was enacted into law. The agricultural losses suffered in 1990 are no less devastating to the farmers involved than those suffered in 1988 or 1989, and I think that we should provide the same kind of assistance this year.

The bill which I am introducing today does simply that. It is substantially the same as the legislation signed into law last year. In cases of crop losses above a minimum level, farmers could apply for disaster payments at a rate of 65 percent of the target price, or 65 percent of the market price for crops which do not have a target price established. As in last year's law, the minimum loss would be 35 percent for program crops covered by crop insurance, 40 percent for program crops not covered by crop insurance, 45 percent for soybeans and other oilseeds, and 50 percent for crops not covered by the farm programs.

The bill which I am introducing does not include section 110 of the 1989 law. This was the infamous ghost acres or replanted acres provision. Its implementation by the Secretary of Agriculture last year caused severe problems. We were able to win some improvements, but that misguided provision still had the effect of unduly penalizing farmers who worked hard to grow a second crop after their primary crop was destroyed. That is not good policy.

Mr. President, I was born and raised on a farm, and my family still farms, when the weather will let us. I know what it is like to lose a crop, to watch it wither and die day by day in a searing drought. We had not missed a milo crop in 30 years, but we had total crop failures the last 2 years because of drought. This year we have had rain in South Texas and, if the good Lord is willing, we may well have enough moisture to make a crop.

It has also rained on our neighbors to the north, in Texas and in our neighboring States. But up there it has rained too much. It is too early to get a good estimate, but their losses will be tremendous. Wheat crops have been washed away before they could be harvested. Many farmers had already planted spring crops, putting in some cases 40 percent of their total expenses into the ground only to see it washed away. Fields are too wet now to plant spring crops—some of those fields are under feet, not just inches, of water. Mother Nature's fall freeze waits on no one, and if those spring crops cannot be planted on time then there will be no harvest this fall.

The massive floods this spring have caused tremendous economic devastation in Texas, not just to farmers, but to small businessmen, homeowners, and many others. This legislation is just one small part of the work that needs to be done to deal with these problems. Hopefully most of the problems can be dealt with administratively.

In the case of agricultural losses, however, experience has shown that administrative action will not be taken and simple equity demands that the farmers suffering losses this year get the same type of assistance that their brethren in other States have received in the last 2 years. Mr. President, I urge the passage of this legislation.

Mr. JOHNSTON. Mr. President, I am pleased to join with the senior Senator from Texas [Mr. BENTSEN], in introducing this legislation today which will provide meaningful assistance to farmers in those States which have suffered from heavy flooding over the past 3 weeks. Farmers in northwest and central Louisiana have been very hard hit: an early assess-

ment of farmland damages caused by flooding on the Red River in just 5 of the 11 parishes for which disaster assistance has been requested—Natchitoches, Red River, DeSoto, Caddo, and Bossier—indicates that already over $7 million has been lost. I visited areas south of Alexandria over the weekend, Mr. President, and I can tell you that the situation is very bad. So far, 140 square miles of farmland have been inundated and about 300 people have been evacuated from their homes. We have not seen the light at the end of the tunnel yet: many expect the situation to get even worse next month as the Red backs into its tributaries and the Mississippi swells with water from the rains in the Midwest last week and in Arkansas over the weekend.

Farmers in Louisiana are carrying very heavy debt loads and are hard-pressed to pay back what they already owe. Low-interest loans, as one of my Elm Grove constituents told me over the weekend, simply won't provide enough help to enable many of these farmers to recover. The grant assistance which this bill will provide similar to the $4.9 billion in grant assistance provided to victims of drought in 1988 and 1989 will help, however, and will give those who have been farming for many years a chance to stay in business.

I hope that we will act quickly on this legislation, Mr. President. Without meaningful and timely disaster relief, losses of the magnitude now contemplated will have a devasting impact on Louisiana's hard-pressed economy.

---

By Mr. HATCH (for himself and Mr. THURMOND):

S. 2665. A bill to amend the Stewart B. McKinney Homeless Assistance Act to extend the job training for the Homeless Demonstration Program, and for other purposes; to the Committee on Labor and Human Resources.

EXTENDING JOB TRAINING UNDER THE STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT

Mr. HATCH. Mr. President, today I am introducing legislation to extend the Stewart B. McKinney Homeless Assistance Act Job Training for the Homeless Demonstration Program. I am pleased to be joined in this effort by our distinguished colleague from South Carolina, Senator THURMOND.

This demonstration program provides job training, placement, and supportive services to homeless people and contributes information that can be used to model other programs. The measure we are introducing today will authorize an appropriation of $13 million for fiscal year 1991. Of this $13 million, $2.2 million would be earmarked for homeless veterans' reintegration projects. This sum is the same as current law.

This bill would also extend the due date for the Secretary of Labor's final report evaluating the program and the program's termination date to October 1, 1992.

Mr. President, we are pleased to have been asked by the administration to sponsor this legislation. I hope the Senate can move quickly to pass this legislation so that this worthwhile program can continue its operation.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2665

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. AUTHORIZATION OF APPROPRIATIONS.

Section 739(a)(1) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11449(a)(1)) is amended by adding at the end thereof the following: "There is authorized to be appropriated $13,000,000 for fiscal year 1991 to carry out this subtitle, of which $2,200,000 shall be available only to carry out section 738.".

SEC. 2. EVALUATION.

Section 736(a) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11446(a)) is amended by striking "Not later than 6 months before the termination date specified in section 741," and inserting in lieu thereof "Not later than October 1, 1992,".

SEC. 3. TERMINATION.

Section 741 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11450) is amended by striking "October 1, 1990." and inserting in lieu thereof "October 1, 1992.".

---

SECTION-BY-SECTION ANALYSIS

SECTION 1

Section 1 of the bill amends section 739(a) of the McKinney Act to authorize an appropriation of $13 million for fiscal year 1991 to carry out the Job Training for the Homeless Demonstration Program, of which $2.2 million would be earmarked for Homeless Veterans' Reintegration Projects. It should be noted that while the total authority for the program for fiscal year 1991 under this bill would be $13 million, $1.5 million of that amount was already appropriated in fiscal year 1990 in Public Law 101-166 to become available in fiscal year 1991. Therefore, the President's budget for fiscal year 1991 requests $11.5 million for the program.

SECTION 2

Section 2 of the bill amends the requirement contained in section 736(a) of the McKinney Act that the Secretary of Labor submit to the President, the Congress and the Interagency Council on the Homeless a final report on the evaluations of each demonstration six months before the termination date of the program. The amendment would require submission of the final report not later than October 1, 1992. Since it is expected that some of the demonstration grants awarded from fiscal year 1991 will not be completed until April 1992, the additional time period provided by this amendment would allow the final report to take the results of these projects into account in reaching its conclusions.

SECTION 3

Section 3 of the bill would amend section 741 of the McKinney Act to extend the termination date of the Job Training for the Homeless Demonstration Program from October 1, 1990 to October 1, 1992.

---

By Mr. BOSCHWITZ (for himself, Mr. GORTON, Mr. DASCHLE, Mr. COCHRAN, Mr. HEFLIN, and Mr. CONRAD):

S.J. Res. 321. Joint resolution to designate the week of August 19 through 25, 1990, as "National Agricultural Research Week"; to the Committee on the Judiciary.

NATIONAL AGRICULTURAL RESEARCH WEEK

● Mr. BOSCHWITZ. Mr. President, I rise today with my colleagues, Senators GORTON, DASCHLE, COCHRAN, HEFLIN, and CONRAD to introduce a resolution to designate the week of August 19 through August 25, 1990, as National Agricultural Research Week.

Agriculture research is responding to the greatest needs facing rural America: new markets for ag commodities, more jobs in a diversified economy, and safe food and ground water. Current research is developing biodegradable plastics from corn, nontoxic ink from soybeans, and industrial lubricants from speciality crops. It's also finding ways to increase environmental protection in the use of fertilizer and pesticides. These developments promise to open new markets overseas and at home while creating vital jobs and protecting the environment of rural areas.

National Agricultural Research Week will provide us with an opportunity to observe what has been accomplished by agriculture and agriculture research. Mr. President, as a member of the Senate Agriculture Committee, I am proud to recognize the importance of this innovative research and I invite my colleagues to join me in support of this resolution.●

---

By Mr. SIMON:

S.J. Res. 322. Joint resolution to designate the 7-day period commencing October 7, 1990, and ending October 13, 1990, as "National Aviation Education Week"; to the Committee on the Judiciary.

NATIONAL AVIATION EDUCATION WEEK

● Mr. SIMON. Mr. President, today I am introducing a joint resolution that would designate the week of October 7 through October 13, 1990, as "National Aviation Education Week."

This joint resolution would encourage schools, at all levels, nation-wide to focus more attention on the aviation industry and its contributions to the United States.

Since the first flight of the Wright brothers in 1903, our country has had a rich history of aviation advancement. We are all aware that the aviation industry makes important contributions to the United States. These

contributions are made by commercial, cargo, and military groups. Pilots, engineers, flight attendants, mechanics, electricians, machine tool operators, radar and radio operators, are just a few of the people who make up these groups.

What you may not know is that the Federal Aviation Administration has predicted a growth rate for the aviation industry of 2.6 percent per year for the next 10 years. As a result of this growth, they anticipate a shortage of pilots, engineers, and other skilled workers.

Women and minorities have, in the past, been underrepresented in technical fields such as aviation. We must find ways to encourage growth of these groups in the aviation industry, not only because of the anticipated shortage, but also because they are a valuable resource that we must not neglect.

While it is important to increase interest in the industry, it is of utmost importance to maintain the highest standard of education and safety.

The future contributions of aviation to the United States are dependent on an informed and educated public. It is important that the schools, at all levels, within the States actively pursue the advancement of aviation education.

Educators at all levels, including unions, have a part to play in producing a competent work force. I hope that as a result of this resolution we, as a nation, are able to increase the awareness, safety, integrity, and productivity of the aviation industry. I urge my colleague to support this resolution.

I ask unanimous consent that my remarks and the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 322

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. FINDINGS.

The Congress finds and declares that—

(1) the aviation industry makes important contributions to the economic development of the United States;

(2) since the future contributions of aviation to the United States are dependent upon an informed and educated public, it is important that the schools within the States actively pursue the advancement of aviation education at all levels;

(3) a number of individual States already recognize the importance of aviation education by proclaiming one week as Aviation Education Week;

(4) pilot hiring at major, national, and regional airlines is conservatively expected to add between 4,600, and 5,600 new pilots to the workforce per year for the next 5 years;

(5) the Federal Aviation Administration projects an aviation industry growth of 2.6 percent per year until 1999;

(6) the demand for pilots and technical workers is high and supply is low, and there is the need to maintain the highest standard of education and professionalism;

(7) the aviation industry increasingly becomes more complex and technical; and

(8) women and minorities have often been underrepresented in technical fields relating to aviation.

SEC. 2. DESIGNATION.

The seven-day period beginning October 7, 1990, and ending October 13, 1990, is designated as "National Aviation Education Week", and the President of the United States of America is authorized and requested to issue a proclamation calling upon the people and schools of the United States to observe the week with appropriate activities.●

## ADDITIONAL COSPONSORS

S. 345

At the request of Mr. DODD, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 345, a bill to grant employees family and temporary medical leave under certain circumstances, and for other purposes.

S. 416

At the request of Mr. DOMENICI, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of S. 416, a bill to provide that all Federal civilian and military retirees shall receive the full cost of living adjustment in annuities payable under Federal retirement systems for fiscal years 1990 and 1991, and for other purposes.

S. 1068

At the request of Mr. GORE, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 1068, a bill to require actions to improve competition in the delivery of television programming, to prohibit discrimination by cable programmers, and to permit telephone companies to provide video programming.

S. 1511

At the request of Mr. PRYOR, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 1511, a bill to amend the Age Discrimination in Employment Act of 1967 to clarify the protections given to older individuals in regard to employee benefit plans, and for other purposes.

S. 1664

At the request of Mr. HEINZ, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 1981

At the request of Mr. HOLLINGS, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 1981, a bill to permit the Bell Telephone Companies to conduct research on, design, and manufacture telecommunications equipment and for other purposes.

S. 2025

At the request of Mr. HEINZ, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 2025, a bill to amend the Internal Revenue Code of 1986 to make permanent certain expiring tax provisions.

S. 2104

At the request of Mr. KENNEDY, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of S. 2104, a bill to amend the Civil Rights Act of 1964 to restore and strengthen civil rights laws that ban discrimination in employment, and for other purposes.

S. 2111

At the request of Mr. PRYOR, the names of the Senator from Texas [Mr. GRAMM] and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of S. 2111, a bill designating the month of May as "Asian/Pacific American Heritage Month."

S. 2149

At the request of Mr. BOSCHWITZ, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 2149, a bill to amend the Internal Revenue Code of 1986 to stimulate employment in, and to promote revitalization of, economically distressed areas designated as enterprise zones, by providing Federal tax relief for employment and investments, and for other purposes.

S. 2215

At the request of Mr. HARKIN, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 2215, a bill to amend the Public Health Service Act to provide for the development and operation of centers to conduct research with respect to contraception and centers to conduct research with respect to infertility, and for other purposes.

S. 2250

At the request of Mr. DECONCINI, the names of the Senator from New York [Mr. MOYNIHAN] and the Senator from Montana [Mr. BURNS] were added as cosponsors of S. 2250, a bill to amend title 5, United States Code, with respect to setting rates of basic pay for law enforcement officers, and for other purposes.

S. 2286

At the request of Mr. HOLLINGS, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of S. 2286, a bill to require the Secretary of Transportation to lead and coordinate Federal efforts in the development of magnetic levitation transportation technology and foster implementation of a magnetic levitation transportation system.

S. 2356

At the request of Mr. SYMMS, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 2356, a bill to amend the

Internal Revenue Code of 1986 to allow tax-exempt organizations to establish cash and deferred pension arrangements for their employees.

S. 2384

At the request of Mr. HEINZ, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of S. 2384, a bill to amend the Internal Revenue Code of 1986 with respect to the treatment of certain real estate activities under the limitations on losses from passive activities.

S. 2489

At the request of Mr. LEAHY, the names of the Senator from Maine [Mr. COHEN] and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of S. 2489, a bill to improve the nutritional health of needy Americans, to provide emergency food assistance, to authorize several vital nutrition programs, and for other purposes.

S. 2513

At the request of Mr. BOSCHWITZ, the names of the Senator from Virginia [Mr. WARNER], the Senator from Washington [Mr. GORTON], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from North Dakota [Mr. CONRAD] were added as cosponsors of S. 2513, a bill to require Congress to purchase recycled paper and paper products to the greatest extent practicable.

S. 2526

At the request of Mr. BOSCHWITZ, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 2526, a bill to establish a program to improve access by small and large private businesses to technical information and expertise within the Federal Government and selected States.

S. 2561

At the request of Mr. GORTON, the names of the Senator from Oregon [Mr. HATFIELD] and the Senator from Indiana [Mr. COATS] were added as cosponsors of S. 2561, a bill to amend the Controlled Substances Act with respect to the regulation of precursor chemicals.

S. 2651

At the request of Mr. D'AMATO, the names of the Senator from Massachusetts [Mr. KERRY] and the Senator from Washington [Mr. GORTON] were added as cosponsors of S. 2651, a bill to amend chapter 53 of title 31, United States Code, to require the Department of the Treasury to issue regulations concerning the identification of nonbank financial institutions subject to the Bank Secrecy Act, to prohibit illegal money transmitting businesses, and for other purposes.

SENATE JOINT RESOLUTION 256

At the request of Mr. SIMON, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Utah [Mr. HATCH], the Senator from Utah [Mr. GARN], the Senator from Maine [Mr. COHEN], the Senator from Rhode Island [Mr. CHAFEE], the Senator from New York [Mr. D'AMATO], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Idaho [Mr. SYMMS], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Iowa [Mr. GRASSLEY], the Senator from Mississippi [Mr. LOTT], the Senator from Idaho [Mr. MCCLURE], the Senator from California [Mr. WILSON], the Senator from Kentucky [Mr. FORD], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Delaware [Mr. BIDEN], the Senator from Hawaii [Mr. INOUYE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Colorado [Mr. WIRTH], the Senator from Massachusetts [Mr. KERRY], the Senator from Arkansas [Mr. BUMPERS], the Senator from Tennessee [Mr. GORE], the Senator from Georgia [Mr. NUNN], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Maryland [Mr. SARBANES], the Senator from Nebraska [Mr. EXON], the Senator from Maryland [Ms. MIKULSKI], the Senator from Arizona [Mr. DECONCINI], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 256, a joint resolution to designate the week of October 7, 1990, through October 13, 1990, as "Mental Illness Awareness Week."

SENATE JOINT RESOLUTION 273

At the request of Mr. BREAUX, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from Arizona [Mr. DECONCINI], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Senate Joint Resolution 273, a joint resolution to designate the week of October 7-13, 1990 as "National Health Care Food Service Week."

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the name of the Senator from Delaware [Mr. BIDEN] was added as a cosponsor of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990 as "National Scleroderma Awareness Week."

SENATE JOINT RESOLUTION 276

At the request of Mr. LIEBERMAN, the names of the Senator from Montana [Mr. BURNS], the Senator from Washington [Mr. ADAMS], the Senator from Illinois [Mr. SIMON], the Senator from Indiana [Mr. COATS], the Senator from Georgia [Mr. NUNN], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 276, a joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week."

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Wyoming [Mr. SIMPSON], the Senator from Michigan [Mr. LEVIN], and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE JOINT RESOLUTION 282

At the request of Mr. WILSON, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of Senate Joint Resolution 282, a joint resolution to designate the decade beginning January 1, 1990, as the "Decade of the Child."

SENATE JOINT RESOLUTION 285

At the request of Mr. THURMOND, the names of the Senator from Connecticut [Mr. DODD], the Senator from Georgia [Mr. NUNN], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Florida [Mr. GRAHAM], the Senator from Tennessee [Mr. GORE], the Senator from California [Mr. CRANSTON], the Senator from Massachusetts [Mr. KERRY], the Senator from North Carolina [Mr. SANFORD], the Senator from Idaho [Mr. MCCLURE], the Senator from Washington [Mr. GORTON], the Senator from Kansas [Mr. DOLE], the Senator from New Hampshire, [Mr. HUMPHREY], the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of Senate Joint Resolution 285, a joint resolution to designate the period commencing September 9, 1990, and ending on September 15, 1990, as "National Historically Black Colleges Week."

SENATE JOINT RESOLUTION 290

At the request of Mr. ARMSTRONG, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Nebraska [Mr. EXON], the Senator from Texas [Mr. GRAMM], the Senator from South Dakota [Mr. DASCHLE], the Senator from Illinois [Mr. SIMON], the Senator from Tennessee [Mr. SASSER], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 290, a joint resolution to designate the week of July 22, 1990, through July 28, 1990, as the "National Week of Recognition and Remembrance for Those Who Served in the Korean war."

SENATE CONCURRENT RESOLUTION 104

At the request of Mr. BIDEN, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Concurrent Resolution 104, a concurrent resolution expressing the concern of the Congress regarding the Birmingham Six, and calling on the British Government to reopen their case.

SENATE CONCURRENT RESOLUTION 127

At the request of Mr. KENNEDY, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from

North Dakota [Mr. BURDICK], and the Senator from North Dakota [Mr. CONRAD] were added as cosponsors of Senate Concurrent Resolution 127, a concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services to American communities.

## SENATE RESOLUTION 289—DIRECTING AN APPEARANCE BY THE SENATE LEGAL COUNSEL

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 289

Whereas, in the case *United States ex rel. Rudd, et al. v. General Contractors, Inc., et al.*, Nos. C-89-397-RJM and C-89-821-RJM, pending in the United States District Court for the Eastern District of Washington, the constitutionality of the *qui tam* provisions of the False Claims Act, as amended by the False Claims Amendments Act of 1986, Pub. L. No. 99-562, 100 Stat. 3153 (1986), 31 U.S.C. §§ 3729, *et seq.* (1988), have been placed in issue;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(c), 288e(a), and 288*l*(a) (1988), the Senate may direct its counsel to appear as amicus curiae in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore, be it

*Resolved*, That the Senate Legal Counsel is directed to appear as amicus curiae in the name of the Senate in the case of *United States ex rel. Rudd, et al. v. General Contractors, Inc., et al.* to defend the constitutionality of the *qui tam* provisions of the False Claims Act.

## AMENDMENTS SUBMITTED

## CONSTITUTIONAL PROCEDURES FOR THE IMPOSITION OF THE SENTENCE OF DEATH

### COATS AMENDMENT NO. 1665

(Ordered to lie on the table.)

Mr. COATS submitted an amendment intended to be proposed by him to the bill (S. 1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes, as follows:

SECTION 1. AMENDMENT TO ANTI-DRUG ABUSE ACT OF 1986.

Subsection (a) of section 1822 of the Anti-Drug Abuse Act of 1986 (21 U.S.C. 857) is amended to read as follows:

"(a) It is unlawful for any person—

"(1) to make use of the services of the Postal Service as part of a scheme to sell drug paraphernalia;

"(2) to offer for sale or sell drug drug paraphernalia; or

"(3) to import or export drug paraphernalia,".

SEC. 2. USE OF LOCAL LAW ENFORCEMENT.

The Attorney General shall use the authority provided under section 508 of the Controlled Substances Act to provide for the enforcement of section 1822 of the Anti-Drug Abuse Act of 1986 (21 U.S.C. 857) as amended by this Act through the use of task forces consisting of appropriate Federal, State, and local personnel.

SEC. 3. FORFEITURE TO THE STATES.

Section 1822 of the Anti-Drug Abuse Act of 1986 is amended by adding at the end thereof the following:

"(f) A person who commits the offense specified by this section shall forfeit to the United States—

"(1) any profits or proceeds and any interest or property he has acquired or maintained in violation of this section that the sentencing court determines, after a forfeiture hearing, to have been acquired or maintained as a result of narcotics racketeering or violating the provisions of this section; and

"(2) any interest in, security of, claim against, or property or contractual right of any kind affording a source of influence over, any enterprise which he has established, operated, controlled, conducted, or participated in the conduct of, in violation of this section, that the sentencing court determines after a forfeiture hearing, to have been acquired or maintained as a result of narcotics racketeering or violating this section.

State and local law enforcement agencies shall share equitably in all assets forfeited under this section to the extent of their participation in the investigation and successful prosecution of the case.".

### COATS (AND LEVIN) AMENDMENT NO. 1666

(Ordered to lie on the table.)

Mr. COATS (for himself and Mr. LEVIN) submitted an amendment intended to be proposed by them to the bill S. 1970, supra, as follows:

At the appropriate place, insert the following:

SEC. . FUNDS FOR STATE "BOOT CAMP" SHOCK INCARCERATION PROGRAMS.

(a) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated under this section $20,000,000 in a special discretionary fund for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995, for use by the Director of the Bureau of Justice Assistance (referred to as the "Director") to make grants under this section. The Director is authorized to make grants to States to establish, operate, and support shock incarceration programs, also known as special alternative incarceration or boot camp prisons, as an intermediate sanction or as an alternative to conventional prisons.

(b) DEFINITION.—For purposes of this section the term "shock incarceration program" means—

(1) a correctional program in which adult offenders who have been convicted of offenses for which the sentence authorized by state law is 1 year or longer in prison are required to participate in a highly regimented program that provides strict discipline, physical training, hard labor, and drill; and

(2) a program that does not include offenders who are—

(A) convicted of offenses for which probation or parole is not available, if State law provides for probation or parole for certain offenses;

(B) convicted of an offense for which a sentence of life imprisonment or capital punishment is authorized by State law; and

(C) convicted of homicide, sexual assault, or assault with a dangerous weapon.

The State officials responsible for selection or confinement decisions for prisoners in a shock incarceration program may exclude offenders other than offenders described in paragraph (2) who are deemed by such officials to be dangerous or violent offenders.

(c) PROGRAM.—In carrying out a project pursuant to this section, a State shall provide that—

(A) all offenders who are confined to shock incarceration programs shall be offered substance abuse treatment, counseling, and literacy education during confinement, as required, and shall be subject to periodic testing for illegal drug use;

(B) all offenders who successfully complete shock incarceration shall—

(i) serve a form of community confinement or be placed under home detention or intensive supervision upon release;

(ii) be subject to periodic testing for illegal drug use;

(iii) continue to receive substance abuse treatment, counseling, and literacy education, as required; and

(iv) provide restitution and participation in community service programs, as required; and

(C) to the fullest extent possible, all offenders who are confined to shock incarceration programs shall be offered vocational education and job training both during confinement and during community confinement, home detention, or supervised release.

(d) APPLICATION BY STATE.—To request a grant under subsection (a) of this section, the chief executive of a state corrections department shall submit to the Director an application at such time and in such form as the Director may require. Such application shall include—

(1) a certification that Federal funds made available under this section will not be used to supplant State or local funds that would, in the absence of Federal funds, be made available to carry out such project;

(2) a statement as to whether the State will make use of contributions by private entities, in cash or in kind;

(3) a description of the method the State will use to carry out the evaluation required by paragraph (4); and

(4) an assurance that after each fiscal year in which funds from a grant made under this section are expended, the State shall submit to the Director an evaluation of the impact and the effectiveness of the project for which such grant is made.

(e) SELECTION CRITERIA.—For purposes of determining whether to make a grant under this section, the Director shall—

(1) consider the overall quality of an applicant's shock incarceration program, including the existence of substance abuse treatment, drug testing, counseling, literacy education, vocational education, and job training programs during incarceration or after release; and

(2) give priority to States that clearly demonstrate that the capacity of their correctional facilities is inadequate to accommodate the number of individuals who are convicted of offenses punishable by a term of imprisonment exceeding 1 year.

(f) GRANTS LIMITS.—Notwithstanding subsection (e), the Director shall not approve a grant under this section to any State—

(1) in an amount that exceeds 10 percent of the aggregate amount appropriated for such fiscal year to carry out this section; or

(2) for substance abuse treatment, drug testing, counseling, literacy education, vocational education, or job training, independent of a shock incarceration program.

(g) ADDITIONAL FUNDING.—Notwithstanding the amount of any funds appropriated under this section, the Director may grant discretionary funding for shock incarceration projects under his general discretionary funding authority.

---

## COATS AMENDMENT NO. 1667

(Ordered to lie on the table.)

Mr. COATS submitted an amendment intended to be proposed by him to the bill S. 1970, supra, as follows:

At the appropriate place, insert the following:

SEC. . JUVENILES IN DRUG CRIME PREVENTION ACT OF 1990.

(a) SHORT TITLE.—This section may be cited as the "Juveniles in Drug Crime Prevention Act of 1990".

(b) INCREASED MINIMUM IMPRISONMENT FOR EMPLOYMENT OF PERSONS UNDER 18 YEARS OF AGE IN DRUG OPERATIONS IN CASE OF PRIOR CONVICTION.—

(1) FIRST OFFENSES.—The second sentence of section 405B(b) of the Controlled Substances Act (21 U.S.C. 845B(b)) is amended by striking "one year" and inserting "five years".

(2) SECOND OFFENDERS.—The second sentence of section 405B(c) of the Controlled Substances Act (21 U.S.C. 845b(c)) is amended by striking out "one year" and inserting in lieu thereof "eight years".

(c) NEW MINIMUM IMPRISONMENT FOR EMPLOYMENT OF PERSONS UNDER 14 YEARS OF AGE IN DRUG OPERATIONS.—Section 405B(d) of the Controlled Substances Act (21 U.S.C. 845b(d)) is amended—

(1) by striking "five years" and inserting "10 years";

(2) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(3) by inserting "(1)" after "(d)"; and

(4) by adding at the end the following new paragraph:

"(2) Except to the extent a greater minimum sentence is otherwise provided—

"(A) a term of imprisonment under paragraph (1)(B) of this subsection shall be not less than 7 years; and

"(B) in the case of a second or subsequent violation, a term of imprisonment under such paragraph shall be not less than 10 years.".

(d) SERIOUS DRUG OFFENSES BY JUVENILES AS ARMED CAREER CRIMINAL ACT PREDICATES.—Section 924(e)(2)(A) of title 18, United States Code, is amended—

(1) by striking "or" at the end of clause (i);

(2) by striking "and" at the end of clause (ii) and inserting "or"; and

(3) by adding a new clause (iii), as follows:

"(iii) any act of juvenile delinquency that if committed by an adult would be a serious drug offense described in this paragraph; and".

## COATS (AND BURNS) AMENDMENT NO. 1668

(Ordered to lie on the table.)

Mr. COATS (for himself and Mr. BURNS) submitted an amendment intended to be proposed by them to the bill S. 1970, supra, as follows:

At the appropriate place in the bill, insert the following new sections:

SEC. . DRUG TESTING OF FEDERAL PRISONERS.

(a) DRUG TESTING PROGRAM.—Subchapter A of chapter 229 of title 18, United States Code, is amended by adding at the end thereof the following new section:

**"§ 3608. Drug testing of defendants on post-conviction release**

"(a) The Attorney General, in consultation with the Director of the Administrative Office of the United States Courts shall, as soon as is practicable after the effective date of this section, establish by regulation a program of drug testing of targeted classes of arrestees, individuals in jails, prisons, and other correctional facilities, and persons on conditional or supervised release before or after conviction, including probationers, parolees, and persons released on bail.

"(b)(1) The Attorney General shall, not later than 6 months after the date of enactment of this section, promulgate regulations for drug testing programs under this section.

"(2) The regulations issued pursuant to paragrah (1) shall be based in part on scientific and technical standards determined by the Secretary of Health and Human Services to ensure reliability and accuracy of drug test results. In addition to specifying acceptable methods and procedures for carrying out drug testing, the regulations may include guidelines or specifications concerning—

"(A) the classes of persons to be targeted for testing;

"(B) the drugs to be tested for;

"(C) the frequency and duration of testing; and

"(D) the effect of test results in decisions concerning the sentence, the conditions to be imposed on release before or after conviction, and the granting, continuation, or termination of such release.

"(c) In each district where it is feasible to do so, the chief probation officer shall arrange for the drug testing of defendants on post-conviction release pursuant to a conviction for a felony or other offense described in section 3563(a)(4) of this title.".

(b) TECHNICAL AMENDMENT.—The section analysis for subchapter A of chapter 229 of title 18, United States Code, is amended by adding at the end thereof the following:

"3608. Drug testing of defendants on post-conviction release.".

SEC. . MANDATORY PENALTIES FOR ILLEGAL DRUG USE IN FEDERAL PRISONS.

(a) DECLARATION OF POLICY.—It is the policy of the Federal Government that the use or distribution of illegal drugs in the Nation's Federal prisons will not be tolerated and that such crimes shall be prosecuted to the fullest extent of the law.

(b) AMENDMENT.—Section 401(b) of the Controlled Substances Act (21 U.S.C. 841(b)) is amended by adding the following new paragraph at the end thereof:

"(7)(A) In a case involving possession of a controlled substance within a Federal prison or other Federal detention facility, such person shall be sentenced to a term of imprisonment of not less than 1 year without release in addition to any other sentence imposed by the possession itself.

"(B) In a case involving the smuggling of a controlled substance into a Federal prison or other Federal detention facility or the distribution of a controlled substance within a Federal prison or other Federal detention facility, such person shall be sentenced to a term of imprisonment of not less than 10 years without release in addition to any other sentence imposed for the possession of distribution itself.

"(C) Notwithstanding any other law, the court shall not place on probation or suspend the sentence of a person sentenced under this paragraph. No person sentenced under this paragraph shall be eligible for parole during the term of imprisonment imposed under this paragraph.".

---

## SPECTER AMENDMENT NO. 1669

(Ordered to lie on the table.)

Mr. SPECTER submitted an amendment intended to be proposed by him to the bill S. 1970, supra, as follows:

At the appropriate place, insert the following:

SEC. . SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES.

(a) IN GENERAL.—Part IV of title 28, United States Code, is amended by inserting immediately following chapter 153 the following new chapter:

CHAPTER 154—SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES

"Sec.

"2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment.

"2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions.

"2263. Filing of habeas corpus petition; time requirements; tolling rules.

"2264. Evidentiary hearings; scope of Federal review; district court adjudication.

"2265. Certificate of probable cause inapplicable.

"2266. Counsel in capital cases; trial and post-conviction standards.

"2267. Law controlling in Federal habeas corpus proceedings; retroactivity.

"2268. Habeas corpus time requirements.

**§ 2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment**

"(a) This chapter shall apply—

"(1) to—

"(A) cases in which the defendant is tried for a capital offense; or

"(B) cases arising under section 2254 of this title brought by prisoners in State custody who are subject to a capital sentence; and

"(2) only if subsections (b) and (c) are satisfied.

"(b) This chapter is applicable if a State establishes by rule of its court of last resort or by statute a mechanism for the appointment, compensation, and payment of reasonable fees and litigation expenses of competent counsel consistent with section 2266 of this title.

"(c) Any mechanism for the appointment, compensation, and reimbursement of counsel as provided in subsection (b) must offer counsel to all State defendants tried for a

capital offense and all State prisoners under capital sentence and must provide for the entry of an order by a court of record—

"(1) appointing one or more counsel to represent the defendant or prisoner upon a finding that the defendant or prisoner—

"(A) is indigent and has accepted the offer; or

"(B) is unable competently to decide whether to accept or reject the offer;

"(2) finding, after a hearing, if necessary, that the defenadant or prisoner has rejected the offer of counsel and made the decision with an understanding of its legal consequences; or

"(3) denying the appointment of counsel upon a finding that the defendant or prisoner is not indigent.

"(d) No counsel appointed pursuant to subsections (b) and (c) to represent—

"(1) a State defendant being tried for a capital offense; or

"(2) prisoner under capital sentence during direct appeals in the State courts,

shall have previously represented the defendant or prisoner at trial or on direct appeal in the case for which the appointment is made unless the defendant or prisoner and counsel expressly request continued representation.

"(e) The ineffectiveness or imcompetence of counsel during State of Federal collateral post-conviction proceedings in a capital case shall not be a ground for relief in a proceeding arising under this chapter or section 2254 of this title. This subsection shall not preclude the appointment of different counsel at any phase of Federal post-conviction proceedings.

**§ 2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions**

"(a) Upon the entry in the appropriate State court of record of an order pursuant to section 2261(c) of this title for a prisoner under capital sentence, a warrant or order setting an execution date for a State prisoner shall be stayed upon application to any court that would have jurisdiction over any proceedings filed pursuant to section 2254 of this title. The application must recite that the State has invoked the procedures of this chapter and that the scheduled execution is subject to stay.

"(b) A stay of execution granted pursuant to subsection (a) shall expire if—

"(1) a State prisoner fails to file a habeas corpus petition under section 2254 of this title within the time required in section 2263 of this title; or

"(2) upon completion of district court and court of appeals review under section 2254 of this title, the petition for relief is denied and—

"(A) the time for filing a petition for certiorari has expired and no petition has been filed;

"(B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or

"(C) a timely petition for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) before a court of competent jurisdiction, a State prisoner under capital sentence waives the right to pursue habeas corpus review under section 2254 of this title, in the presence of counsel and after having been advised of the consequences of making the waiver.

"(c) If one of the conditions in subsection (b) has occurred, no Federal court thereafter shall have the authority to enter a stay of execution or grant relief in a capital case unless—

"(1) the basis for the stay and request for relief is a claim not previously presented in the State or Federal courts;

"(2) the failure to raise the claim—

"(A) was the result of State action in violation of the Constitution or laws of the United States;

"(B) was the result of a recognition by the Supreme Court of a new Federal right that is retroactively applicable; or

"(C) is due to the fact the claim is based on facts that could not have been discovered through the exercise of reasonable diligence in time to present the claim for State or Federal post-conviction review; and

"(3) filing of any successive petition for a writ of habeas corpus is authorized by the appropriate court of appeals in accordance with section 2264(c).

**"§ 2263. Filing of habeas corpus petition; time requirements; tolling rules**

"(a) Any petition in capital cases for habeas corpus relief under section 2254 of this title must be filed in the appropriate district court not later than 30 days after the filing in the appropriate State court of record of an order issued in compliance with section 2261(c) of this title. The time requirements established by this section shall be tolled—

"(1) from the date that a petition for certiorari is filed in the Supreme Court until the date of final disposition of the petition if a State prisoner seeks a review of a capital sentence that has been affirmed on direct appeal by the court of last resort of the State or has otherwise become final for State law purposes; and

"(2) during an additional period not to exceed 60 days, if counsel for the State prisoner—

"(A) moves for an extension of time in Federal district court that would have jurisdiction over the case upon the filing of a habeas corpus petition under section 2254 of this title; and

"(B) makes a showing of good cause for counsel's inability to file the habeas corpus petition within the 30-day period established by this section. A court that finds that good cause has been shown shall explain in writing the basis for such a finding.

"(b) A notice of appeal from a judgment of the district court in a claim under this chapter shall be filed within 20 days of the entry of judgment.

"(c) A petition for a writ of certiorari to the Supreme Court of the United States in a claim under this chapter shall be filed within 20 days of the issuance of the mandate by the court of appeals.

**"§ 2264. Evidentiary hearings; scope of Federal review; district court adjudication**

"(a) Whenever a State prisoner under a capital sentence files a petition for habeas corpus relief to which this chapter applies, the district court shall—

"(1) determine the sufficiency of the evidentiary record for habeas corpus review; and

"(2) conduct any requested evidentiary hearing necessary to complete the record for habeas corpus review.

"(b) Upon the development of a complete evidentiary record, the district court shall rule on the merits of the claims properly before it within the time limits established in section 2268 of this title.

"(c)(1) Except as provided in paragraph (2), a district court may not consider a successive claim under this chapter.

"(c)(2) A district court may only consider a successive claim under this chapter if the applicant seeks leave to file a successive petition in the appropriate court of appeals. A decision by the court of appeals to grant or deny leave to file a successive petition under this chapter shall not be reviewable in any court.

"(c)(3) In a case in which the appropriate court of appeals grants leave to file a successive petition, the time limits established by this chapter shall be applicable to all further proceedings under the successive petition.

**"§ 2265. Certificate of probable cause inapplicable**

"The requirement of a certificate of probable cause in order to appeal from the district court to the court of appeals does not apply to habeas corpus cases subject to this chapter except when a second or successive petition is filed.

**"§ 2266. Counsel in capital cases; trial and post-conviction standards**

"(a) A mechanism for the provision of counsel services to indigents sufficient to invoke the provisions of this chapter under section 2261(b) of this title shall provide for counsel to indigents charged with offenses for which capital punishment is sought and to indigents who have been sentenced to death and who seek appellate or collateral review in State court.

"(b)(1) In the case of an appointment made before trial, at least one attorney appointed under this chapter must have been admitted to practice in the court in which the prosecution is to be tried for not less than 5 years, and must have had not less than 3 years' experience in the trial of felony prosecutions in that court.

"(2) In the case of an appointment made after trial, at least one attorney appointed under this chapter must have been admitted to practice in the court of last resort of the State for not less than 5 years, and must have had not less than 3 years' experience in the handling of appeals in that State's courts in felony cases.

"(3) Notwithstanding this subsection, a court, for good cause, may appoint another attorney whose background knowledge, or experience would otherwise enable the attorney to properly represent the defendant, with due consideration of the seriousness of the possible penalty and the unique and complex nature of the litigation.

"(c) Upon a finding in ex parte proceedings that investigative, expert or other services are reasonably necessary for the representation of the defendant, whether in connection with issues relating to guilt or issues relating to sentence, the court shall authorize the defendant's attorney to obtain such services on behalf of the defendant and shall order the payment of fees and expenses therefor, under subsection (d). Upon finding that timely procurement of such services could not practicably await prior authorization, the court may authorize the provision of and payment of such services nunc pro tunc.

"(d) Notwithstanding the rates and maximum limits generally applicable to criminal cases and any other provision of law to the contrary, the court shall fix the compensation to be paid to an attorney appointed under this subsection and the fees and expenses to be paid for investigative, expert, and other reasonably necessary services authorized under subsection (c), at such rates or amounts as the court determines to be reasonably necessary to carry out the requirements of this subsection. A State

court's determination of reasonable compensation, fees, and expenses shall not be reviewable in proceedings under this chapter or under section 2254 of this title, and any alleged insufficiency in compensation, fees, or expenses shall not be grounds for granting a writ of habeas corpus under this chapter or under section 2254 of this title, unless the court finds that the compensation, fees, and expenses awarded were so insufficient as to result in a denial of due process.

**§ 2267. Law controlling in Federal habeas corpus proceedings; retroactivity**

"In cases subject to this chapter, all claims shall be governed by the law as it was when the petitioner's sentence became final, supplemented by an interim change in the law, if the court determines, in light of the purpose to be served by the change, the extent of reliance of previous law by law enforcement authorities, and the effect on the administration of justice, that it would be just to give the prisoner the benefit of the interim change in the law.

**"§ 2268. Habeas corpus time requirements**

"(a) A Federal district court shall determine any petition for a writ of habeas corpus brought under this chapter within 110 days of filing.

"(b) The court of appeals shall hear and determine any appeal of the granting, denial, or partial denial of a petition for a writ of habeas corpus brought under this chapter within 90 days after the notice of appeal is filed.

"(c) The Supreme Court shall act on any petition for a writ of certiorari in a case brought under this chapter within 90 days after the petition is filed."

"(d) The Administrative Office of United States Courts shall report annually to Congress on the compliance by the courts with the time limits established in this section.".

(b) AMENDMENT TO TABLE OF CHAPTERS.—The table chapters for part IV of title 28, United States Code, is amended by inserting after the item for chapter 153 the following:

"154. Special habeas corpus procedures in capital cases..... 2261".

(c) AMENDMENT TO SECTION 2254 OF TITLE 28.—Section 2254(c) of title 28, United States Code, is amended by—

(1) striking "An applicant" and inserting "(1) Except as provided in paragraph (2), an applicant"; and

(2) adding at the end thereof the following:

"(2) An applicant in a capital case shall be deemed to have exhausted the remedies available in the courts of the State when he has exhausted any right to direct appeal in the State.".

---

## GORTON AMENDMENT NO. 1670

(Ordered to lie on the table.)

Mr. GORTON submitted an amendment intended to be proposed by him to the bill S. 1970, supra, as follows:

At the appropriate place in the bill, insert the following:

SEC. . PRECURSOR CHEMICALS.

(a) EXPANDED LIST OF PRECURSOR CHEMICALS.—Section 102(34) of the Controlled Substances Act (21 U.S.C. 802(34)) is amended by striking subparagraphs (A) through (L) and inserting the following:

"(A) Anthranilic acid.
"(B) Benzyl cyanide.
"(C) Chloroephedrine.
"(D) Chloropseudoephedrine.
"(E) D-lysergic acid.
"(F) Ephedrine.
"(G) Ergonovine maleate.
"(H) Ergotamine tartrate.
"(I) Ethylamine.
"(J) Hydriodic acid.
"(K) Isosafrole.
"(L) Methylamine.
"(M) N-acetylanthranilic acid.
"(N) N-ethylephedrine.
"(O) N-ethylpseudoephedrine.
"(P) N-methylephedrine.
"(Q) N-methylpseudoephedrine.
"(R) Norpseudoephedrine.
"(S) Phenylacetic acid.
"(T) Phenylpropanolamine.
"(U) Phenyl-2-propanone.
"(V) Piperidine.
"(W) Piperonal.
"(X) Propionic anhydride.
"(Y) Pseudoephedrine.
"(Z) Safrole.
"(AA) Thionylchloride.
"(BB) Any salt, optical isomer, or salt of an optical isomer of the foregoing chemicals.".

(b) CONFORMING REPEAL.—Section 102(35) of the Controlled Substances Act (21 U.S.C. 802(35)) is amended—

(1) by striking subparagraph (E); and

(2) by redesignating subparagraph (F), (G), and (H) as subparagraph (E), (F), and (G).

(c) ELIMINATION OF THRESHOLD REQUIREMENT FOR PRECURSOR CHEMICALS.—Section 102(39)(A) of the Controlled Substances Act (21 U.S.C. 802(39)(A)) is amended—

(1) by inserting "any amount of a listed precursor chemical, or" before "a threshold amount, including a cumulative threshold amount for"; and

(2) by striking "listed chemical" the first place such term appears and inserting "listed essential chemical".

(d) REPORTS OF REGULATED TRANSACTIONS.—Section 310(b)(1) of the Controlled Substances Act (21 U.S.C. 830(b)(1)) is amended—

(1) by inserting "any quantity of a listed precursor chemical," after "involving"; and

(2) by striking "a listed chemical" and inserting "a listed essential chemical".

(e) PROVISION TO STATES OF INFORMATION RELATING TO REGULATED TRANSACTIONS.—Section 310(c)(3) of the Controlled Substances Act (21 U.S.C. 830(c)(3)) is amended—

(1) by striking "and" at the end of subparagraph (A);

(2) by striking the period at the end of subparagraph (B) and inserting "; and"; and

(3) by adding at the end thereof the following new subparagraph:

"(C) cooperate with the authorities of each State by providing information relating to regulated transactions in listed precursor chemicals and anticipated regulated transactions (including impending interstate deliveries) in such chemicals that might be useful in the enforcement of State laws relating to precursor chemicals, controlled substances, and other illegal drugs.".

(f) LICENSING.—Section 310 of the Controlled Substances Act (21 U.S.C. 830) is amended by adding at the end thereof the following new subsection:

"(d)(1) It shall be unlawful for a person to—

"(A) engage in a regulated transaction involving a listed precursor chemical; or

"(B) manufacture, distribute, import, or export a listed precursor chemical,

without a license required under this subsection.

"(2)(A) The Attorney General shall by rule establish a licensing program for regulated persons and regulated transactions involving listed precursor chemicals under which licenses will be required in circumstances in which the Attorney General determines that requiring licensing will contribute to the achievement of the purposes of this section and to criminal drug law enforcement in general.

"(B) The licensing program described in subparagraph (A) shall require a license application to be made in such form as the Attorney General shall prescribe and may provide for the denial, revocation, or suspension of a license for cause, after opportunity for a hearing on the record.

"(3) Whoever violates paragraph (1) shall be fined under title 18, United States Code, or imprisoned not more than 4 years, or both.

"(4) The Attorney General shall by inspection or otherwise provide for the audit and control of listed precursor chemical inventories of persons possessing a license under this subsection.".

(g) MANAGEMENT OF LISTED CHEMICALS.—(1) Part C of the Controlled Substances Act (21 U.S.C. 801 et seq.) is amended by adding at the end thereof the following new section:

"MANAGEMENT OF LISTED CHEMICALS

"Sec. 311. (a) It is unlawful for a person who possesses a listed chemical with the intent that it be used in the illegal manufacture of a controlled substance to manage the listed chemical or waste from the manufacture of a controlled substance otherwise than as required by regulations issued under sections 3001 through 3005 of the Solid Waste Disposal Act (42 U.S.C. 6921-6925).

"(b)(1) In addition to a penalty that may be imposed for the illegal manufacture, possession, or distribution of a listed chemical or toxic residue of a clandestine laboratory, a person who violates subsection (a) shall be assessed the costs described in paragraph (2) and shall be imprisoned as described in paragraph (3).

(2) Pursuant to paragraph (1), a defendant shall be assessed the following costs to the United States, a State, or other authority or person that undertakes to correct the results of the improper management of a listed chemical:

"(1) The cost of initial cleanup and disposal of the listed chemical and contaminated property.

"(2) The cost of restoring property that is damaged by exposure to a listed chemical for rehabilitation under Federal, State, and local standards.

"(c) The Attorney General may direct that assets forfeited under section 511 in connection with a prosecution under this section be shared with State agencies that participated in the seizure or cleaning up of a contaminated site.

"(3) Pursuant to paragraph (1), a defendant shall be imprisoned not less than 5 years, and in the case of a willful violation, not less than 10 years.

"(4) The Court may order that all or a portion of the earnings from work performed by a defendant in prison be withheld for payment of costs assessed under paragraph (1).".

(2) Section 523(a) of title 11, United States Code, is amended—

(1) by striking "or" at the end of paragraph (9);

(2) by striking the period at the end of paragraph (10) and inserting "; or"; and

(3) by adding the following new paragraph at the end thereof:

"(11) for costs assessed under section 311(b) of the Controlled Substances Act.".

## McCONNELL AMENDMENT NOS. 1671 THROUGH 1673

(Ordered to lie on the table.)

Mr. McCONNELL submitted three amendments intended to be proposed by him to the bill S. 1970, supra, as follows:

AMENDMENT No. 1671

At the appropriate place, insert the following:

SEC. . PROTECTING THE ELDERLY FROM CRIME.

(a) CRIMINAL OFFENSE.—(1) Chapter 227 of title 18, United States Code, is amended by adding at the end the following new section:

"§ 3581. Mandatory sentence for felony against individual age sixty-five or over

"(a) Upon any plea of guilty or nolo contendere or verdict or finding of guilty of a defendant of a crime of violence under this title, if any victim of such crime is an individual who had attained age sixty-five on or before the date that the offense was committed, the court shall sentence the defendant to imprisonment—

"(1) for a term of not less than one-half of the maximum term of imprisonment provided for such crime under this title, in the case of a first offense to which this section is applicable; and

"(2) for a term of not less than three-fourths of the maximum term of imprisonment provided for such crime under this title, in the case of a second or subsequent offense to which this section is applicable.

"(b) Notwithstanding any other provision of law, with respect to a sentence imposed under subsection (a) of this section—

"(1) the court shall not suspend such sentence;

"(2) the court shall not give the defendant a probationary sentence;

"(3) no defendant shall be eligible for release on parole before the end of such sentence;

"(4) no defendant shall be eligible for participation in a home incarceration program before the end of such sentence;

"(5) such sentence shall be served consecutively to any other sentence imposed under this title; and

"(6) the court shall reject any plea agreement which would result in the imposition of a term of imprisonment less than that which would have been imposed under subsection (a) of this section in connection with any charged offense.

"(c) As used in this section, the term—

"(1) 'crime of violence' means—

"(A) a felony that has an element of the offense the use, attempted use, or threatened use of physical force against the person or property of another; or

"(B) a felony that, by its nature, involves a substantial risk that physical force against the person or property of another may be used in the course of committing the offense; and

"(2) 'victim' means an individual against whom an offense has been or is being committed.".

(2) The table of sections for chapter 227 of title 18, United States Code, is amended by adding at the end the following new item:

"3581. Mandatory sentence for felony against individual of age sixty-five or over.".

(b) APPEALS.—Section 3731 of title 18, United States Code, is amended by inserting after the second paragraph the following new paragraph:

"An appeal by the United States shall lie to a court of appeals from an otherwise final decision, judgment, or order of a district court sentencing a defendant on the ground that such sentence is less severe than that required under section 3581 of this title.".

(c) FEDERAL RULES OF CRIMINAL PROCEDURE.—(1) Rule 32(c) of the Federal Rules of Criminal Procedure is amended—

(A) by adding at the end of the first paragraph in paragraph (1) the following: "Neither the defendant nor the court may waive a presentence investigation and report unless there is in the record information sufficient for the court to determine whether a mandatory sentence must be imposed pursuant to title 18, United States Code, section 3581."; and

(B) in paragraph (2)(D), by inserting after "the offense" the following: "and information relating to whether any victim of the offense had attained age 65 on the date that the offense was committed".

(2) Rule 11(e)(1) of the Federal Rules of Criminal Procedure is amended by striking out "The" after "In General." and inserting in lieu thereof "Except as provided in title 18, United States Code, section 3581, the".

AMENDMENT No. 1672

At the appropriate place, add the following:

TITLE —NATIONAL CHILD SEARCH ASSISTANCE ACT OF 1990

SEC. —01. SHORT TITLE.

This title may be cited as the "National Child Search Assistance Act of 1990".

SEC. —02. REPORTING REQUIREMENT.

(a) IN GENERAL.—Each Federal, State, and local law enforcement agency shall report each case of a missing child under the age of 18 reported to such agency to the National Crime Information Center of the Department of Justice.

(b) GUIDELINES.—The Attorney General shall establish guidelines for the collection of such reports including procedures for carrying out the purposes of this title.

(c) ANNUAL SUMMARY.—The Attorney General shall publish an annual summary of the reports received under this title.

SEC. —03. STATE REQUIREMENTS.

(a) IN GENERAL.—Each State reporting under the provisions of this title shall—

(1) ensure that no law enforcement agency within the State establishes or maintains any policy which requires the observance of any waiting period before accepting a missing child report.

(2) provide that all necessary and available information, which shall include—

(A) the name, date of birth, sex, height, weight, and eye and hair color of the child;

(B) the date reported missing and the last known location of the child; and

(C) the category by which the child was abducted,

is entered into the State law enforcement system and the National Crime Information Center computer networks and forwarded to the Missing Children Information Clearinghouse within the State or other agency designated within the State to receive such reports as established in title IV of the Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93-415); and

(3) provide that after receiving reports as provided in paragraph (2), the Missing Children Information Clearinghouse or designated agency shall—

(A) notify all other law enforcement agencies in the State;

(B) verify and update with any additional information the original entry made into the State law enforcement system and National Crime Information Center computer networks;

(C) institute or assist with appropriate search investigative procedures; and

(D) maintain close liaison with the National Center for Missing and Exploited Children for the exchange of information and technical assistance in the missing children cases.

(b) LIMIT ON GRANTS.—Any State not complying with the provisions of subsection (a) shall be denied any grant, cooperative agreement, or other assistance authorized by the Missing Children's Assistance Act (Public Law 98-473).

AMENDMENT No. 1673

At the appropriate place, insert the following:

SEC. —. LAW ENFORCEMENT OFFICERS, BILL OF RIGHTS.

(a) IN GENERAL.—Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by adding at the end thereof the following new section:

"LAW ENFORCEMENT OFFICERS BILL OF RIGHTS

"SEC. 820. Beginning with the first fiscal year commencing not less than two years after the effective date of this section, a grant under part B or C of this title that would otherwise be made, directly or indirectly, to any State, unit of general local government, or public agency, shall be reduced by 20 percent unless there is in effect with respect to such State, unit of general local government, or public agency, a law enforcement officer's bill of rights which substantially provides as a minimum the following rights for the law enforcement officers of such State, unit of general local government, or public agency:

" 'BILL OF RIGHTS

" 'POLITICAL ACTIVITY OF LAW ENFORCEMENT OFFICERS

" 'SECTION 1. Except when on duty or acting in his official capacity, no law enforcement officer shall be prohibited from engaging in political activity or be denied the right to refrain from engaging in such activity. This section shall not apply to a law enforcement officer covered by chapter 15 of title 5, United States Code.

" 'RIGHTS OF LAW ENFORCEMENT OFFICERS WHILE UNDER INVESTIGATION

" 'SEC. 2. Whenever a law enforcement officer is under investigation for alleged malfeasance, misfeasance, or nonfeasance of official duty, with a view to possible disciplinary action, demotion, dismissal, or criminal charges, the following minimum standards shall apply:

" '(1) No adverse inference shall be drawn and no punitive action taken from a refusal of the law enforcement officer being investigated to participate in such investigation or be interrogated other than when such law enforcement officer is on duty, or when exigent circumstances otherwise require.

" '(2) Any interrogation of a law enforcement officer shall take place at the offices of those conducting the investigation, the place where such law enforcement officer reports for duty, or such other reasonable place as the investigator may determine.

" '(3) The law enforcement officer being investigated shall be informed, at the com-

mencement of any interrogation, of the nature of the investigation, the names of any complainants, and the identity and authority of the person conducting such investigation, and at the commencement of any interrogation of such officer in connection with any such investigation shall be informed of all persons present during such interrogation. All questions asked in any such interrogation shall be asked by or through a single interrogator.

"'(4) No formal proceeding which has authority to penalize a law enforcement officer may be brought except upon charges signed by the persons making those charges.

"'(5) Any interrogation of a law enforcement officer in connection with an investigation shall be for a reasonable period of time, and shall allow for reasonable periods for the rest and personal necessities of such law enforcement officer.

"'(6) No threat, harassment, promise or reward shall be made to any law enforcement officer in connection with an investigation in order to induce the answering of any question, but immunity from prosecution may be offered to induce such answering.

"'(7) All interrogations of any law enforcement officer in connection with the investigation shall be recorded in full.

"'(8) The law enforcement officer shall be entitled to the presence of his or her counsel or any other one person of his or her choice at any interrogation in connection with the investigation.

"'REPRESENTATION ON COMPLAINT REVIEW BOARDS

"'SEC. 3. Whenever a police complaint review board has been established which includes in its membership persons other than law enforcement officers of the agencies under the jurisdiction of such board, such board shall also include a fair representation of such officers.

"'CIVIL SUITS OF LAW ENFORCEMENT OFFICERS

"'SEC. 4. Any law enforcement officer shall have the right, and shall receive public legal assistance when requested, to recover pecuniary and other damages from persons violating any of the rights established under the law enforcement officer's Bill of Rights.

"'DISCLOSURE OF FINANCES

"'SEC. 5. No law enforcement officer shall be required to disclose, for the purposes of promotion or assignment, any item of his property, income, assets, debts, or expenditures or those of any member of such officer's household.

"'NOTICE OF DISCIPLINARY ACTION

"'SEC. 6. Whenever a personnel action which will result in any loss of pay or benefits, or is otherwise punitive is taken against a law enforcement officer, such law enforcement officer shall be notified of such action and the reasons therefor a reasonable time before such action takes effect.

"'RETALIATION FOR EXERCISING RIGHTS

"'SEC. 7. There shall be no penalty nor threat of any penalty to a law enforcement officer for the exercise of the officer's rights under this Bill of Rights.

"'OTHER REMEDIES NOT DISPARAGED

"'SEC. 8. Nothing in this Bill of Rights shall disparage or impair any other legal remedy any law enforcement officer shall have with respect to any rights under this Bill of Rights.

"'DEFINITIONS

"'SEC. 9. As used in this Bill of Rights—

"'(1) "law enforcement officer" means any officer or employee of a public agency, if the principal official function of such officer or employee is to investigate crimes, or to apprehend or hold in custody persons charged or convicted of crimes, and include police, sheriffs, bailiffs, and corrections guards;

"'(2) "complainant" means the person whose information was the basis for the initiation of an investigation; and

"'(3) "complaint review board" means any public body with specific lawful authority to investigate and take public action, including making reports, on charges of improper conduct by law enforcement officers, but is not a law enforcement agency, a grand jury, or other entity similar to a grand jury; and

"'(4) "law enforcement agency" means any public agency charged by law with the duty to investigate crimes, apprehend and hold in custody persons charged with crimes.'".

(b) AMENDMENTS TO TABLE OF CONTENTS.—The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by inserting after the item relating to section 819 the following new item:

"Sec. 820. Law enforcement officers bill of rights.".

## NOTICES OF HEARINGS

SENATE SELECT COMMITTEE ON ETHICS

Mr. HEFLIN. Mr. President, Senator RUDMAN joins me to ask that, in accordance with the Rules of Procedure of the Select Committee on Ethics, which were adopted February 23, 1978, and amended on December 21, 1989, the following notice of hearings be published in the CONGRESSIONAL RECORD for the second session of the 101st Congress, and we ask unanimous consent that the notice of hearings be so published.

The material follows:

The Senate Select Committee on Ethics announced May 9, 1990 that it is conducting an Investigation concerning Senator Durenberger's receipt of Senate reimbursements for using a condominium in Minneapolis, Minnesota. The Committee had previously announced that it is conducting an Investigation concerning his arrangement with Piranha Press, and the other matters specified in the Committee's February 22, 1990 Press Release.

The Public adjudicatory hearings respecting all matters under Investigation concerning Senator Durenberger will commence, in Room 216, Hart Senate Office Building, Washington D.C., at 9:30 a.m. on June 12, 1990. Two weeks of hearings have been scheduled.

## AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet on May 21, 1990, beginning at 1 p.m., in 485 Russell Senate Office Building, to consider the nomination of Carl J. Kunasek for the position of Commissioner for the Navajo and Hopi Relocation Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DEFENSE INDUSTRY AND TECHNOLOGY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Defense Industry and Technology of the Committee on Armed Services be authorized to meet during the session of the Senate on Monday, May 21, 1990, at 2 p.m. to receive testimony on Department of Defense laboratory management in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Monday, May 21, 1990, to hold hearings on the drugs and violence: "The Criminal Justice System in Crisis."

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. HEFLIN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objectives of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 for Senator ROTH to participate in a program in Gemany, sponsored by the United States Association of Former Members of Congress, from May 27 to June 1, 1990.

The committee has determined that participation by Senator ROTH in the program in Germany, which is being partially funded by the Friedrich Ebert Foundation and also being funded by the United States Association of former Members of Congress through a grant from the German Marshall Fund, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule

35 for Dr. Andrew K. Semmel, a member of the staff of Senator RICHARD G. LUGAR, to participate in a program in Romania, sponsored by the National Republican Institute for International Affairs, from May 16 to 21, 1990.

The committee has determined that participation by Dr. Semmel in the program in Romania, at the expense of the National Republican Institute for International Affairs, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Dr. Patricia Ruggles, a member of the staff of the Joint Economic Committee, to participate in a program in Canada, sponsored by the Statistics Canada, from April 22 to 24, 1990.

The committee has determined that participation by Dr. Ruggles in the program in Canada, at the expense of the Statistics Canada, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Senator and Mrs. WALLOP, to participate in a program in Taipei, Taiwan, sponsored by the Chinese National Association of Industry and Commerce, from May 17 to 21, 1990.

The committee has determined that participation by Senator WALLOP in the program in Taiwan, at the expense of the Chinese National Association of Industry and Commerce, is in the interest of the Senate and the United States.●

## THE CHEMICAL AND BIOLOGICAL WEAPONS CONTROL ACT

● Mr. GORTON. Mr. President, last Thursday, the Senate unanimously adopted the Chemical and Biological Weapons Control Act. I was pleased to be an original cosponsor of this legislation that demonstrates our serious intention to not only stem the proliferation of chemical and biological weapons, but also to take action against those countries that would employ these horrible weapons.

The use of chemical agents by Iraq and Iran during their long conflict indicates that the rubicon between conventional and chemical warfare can be crossed at any time. It is clear that there are leaders of countries for whom the use of these deadly weapons is little more than an afterthought. I dare say that not even the maniacal Adolf Hitler employed these weapons. though he had them in his arsenal.

As the managers of this bill have already noted, this bill has two principal purposes: First, to establish sanctions against countries that use chemical or biological weapons in violation of international law and norms; and second, to establish sanctions against foreign countries that would assist certain other countries in acquiring these terrible weapons.

It is high time we erect some serious obstacles in the way of foreign companies that would place profits before the security and safety of the population. Nor can the United States stand idly by while countries like Iraq use chemical weapons to squash domestic unrest or to gain an advantage on the battlefield.

While I wholeheartedly support this legislation, I cannot help but think, however, that the chemical genie is out of the bottle. Given the difficulty of monitoring chemicals that are produced for peaceful purposes but which can be used as weapons of war, and given the proliferation of the long-range means of delivery for these "poor-mans nuclear weapons," I think it imperative that we accompany this important legislation with some reflection on what the United States can do to protect itself and its allies against the very real threat of chemically armed ballistic missiles.

To be sure, stemming the proliferation of chemical and biological weapons is only part of the solution—a truly effective deterrent to the use of chemical weapons delivered by ballistic missiles is to build a system that can defend against those missiles. Third World countries now acquire ballistic missiles because they realize that there are no defenses against them. The introduction of missile defenses would, I believe, have a stabilizing effect by removing the incentive for Third World nations to acquire ballistic missiles of all ranges.

Mr. President, I will end here because this is not the proper forum to debate the merits of missile defenses. Let me reiterate, once again, my strong support for this legislation as a palpable step toward thwarting the spead of deadly weapons.●

## ALASKANS FOR DRUG FREE YOUTH

● Mr. MURKOWSKI. Mr. President, I am pleased to submit two essays by young Alaskans to the RECORD. These essays were written in response to a contest sponsored by Alaskans for Drug Free Youth and represent the deep commitment of the youth of Alaska to establish and maintain a drug-free community and school. Leah Homstad of Tatitlek and Regan Grandy of Petersburg are both interns in my office this summer and are fine examples of the leadership that young Alaskans can provide to their peers.

Mr. President, I ask that these two essays be submitted into the RECORD.

The essays follow:

### MY CHOICE, DRUG FREE

(By Regan Grandy)

During the 18 years of my life I have seen the devastating effects of drug and alcohol on friends and other significant people in my life. I learned early in life that those effects are far reaching and widespread. They damage not only the life of the user-abuser, but have effects on family, friends, community members, and society in general. Today they are causing moral decay in society and humanity.

I have strong religious and moral convictions that my body is sacred and not to be defiled. I strive to keep my body nourished with wholesome nutritious food, exercise it sufficiently, and rest it properly to maintain a good balance of health of all of my body's functions and systems. Therefore, it does not make any sense to me to willfully abuse my body by taking drugs. I do not need a tiger in my bloodstream or burned out brain cells.

Some teenagers today think it's fun to "party," where alcohol and drugs are plentiful and encouraged. It has never made any sense to me that my peers have allowed themselves to be lured into a false sense of security and power by becoming partakers of drugs. In reality, they are losing power and control over their minds and bodies. To illustrate the loss of power and control, I relate the following incident.

A young college student was arrested and convicted for using a controlled substance which is a felony. The judge gave him probation. Since the penalty seemed light, the young man turned to his lawyer and asked, "What did I lose?" The lawyer looked at him and replied, "You have lost the right to vote, the right to run for public office, and the right to own a gun."

The lawyer further stated, "You have lost the opportunity of ever being a licensed doctor, dentist, lawyer, engineer, realtor, architect, private detective, stock broker, osteopath, pharmacist, physical therapist, school teacher, or funeral director. You can never get a job where you have to be bonded or licensed. You can't work for the city, county, state or federal government. You can enlist in the military service, but you will not have a choice of service and will probably be assigned to a labor battalion. Those are examples of what you really lost." It's an incredibly high price to pay!

Others have yet a higher price to pay. Prisons currently house 500,000 inmates at a cost of 11 billion dollars per year. 30% of those inmates are incarcerated on drug related charges. This translates to 150,000 prisoners incarcerated on drug related crimes at a cost of 3.3 billion dollars annually to taxpayers, who really pay this debt to society.

A recently compiled study compares teenage drug users in Alaska to the U.S. The study concludes that Alaska's teens have a significantly higher drug use rate than those from the other 49 states. This study included; Cigarattes, Beer, Wine Coolers, Liquor, Marijuana, Cocaine, Uppers, Downers, Inhalants, Hallucinogens, and other drugs. The higher percentage is particularly noticeable at the high school level with the percentage of Cocaine use at 11.3%; Marijuana 24.9%, and liquor soaring even higher to 25.8% above the national average.

Other startling statistics indicate that youth are becoming increasingly more involved with drug use at earlier ages in their lives. For example, Alaskan youth in junior high schools show a significant substance abuse problem, according to the study.

Being a youth in Alaska I feel ashamed about these statistics and am hopeful that by my leadership and personal crusade against drugs, I have made a difference on

some of my friends and peers. I am fairly confident that I have.

We need to continually keep educating the children, youth, and adults about the harmful effects of drugs and do all in our power to dissuade them from making wrongful choices that could have lasting negative effects on their lives. Parents need to be educated that there is no room for a double standard when dealing with such volatile substances. To paraphrase what President Bush said in his televised address to the nation on September 5, 1989. "Drug education doesn't begin in class . . . It must begin at home and in the neighborhood. Parents and families must set the first example of a drug-free life." I am grateful that my parents have set this proper example for me.

Confucious once stated: "There are three marks of a superior man; being virtuous, he is free from anxiety; being wise, he is free from perplexity; being brave, he is free from fear." To me, this directly relates to non-use of drugs. Conviction and strength of character will make me virtuous, education will make me wise, and the courage to withstand peer pressure will make me brave. All of these and abstinence from drugs can help make me that superior free man!

I am proud to say that I have never smoked a cigarette or marijuana joint. I have never partaken of an alcoholic beverage nor of a grain of cocaine, or any other abusive substance. I am determined and committed to be able to say this for the rest of my life. I think that for the youth today they should pattern their goals to be drug free. This is my choice-drug free.

MY CHOICE, DRUG FREE

(By Leah Gaye Homstad)

"Just Say No!" is a chanted slogan throughout the country, in every state and in every school. Concerts, workshops, and seminars have been growing from what was once just a mother's cry. Now not only are there concerns from parents, but drugs and pushing for a drug free country is now a nationwide concern.

The blunt, rebellious spirit of the 1960's has grown much larger than the "hippies" could ever have imagined, I'm sure. The youth of the sixties established a new set of boundaries to live by. But how could they have known that self destruction is the end result of unrestraint? From that generation has come an offspring that wants the same freedom their parents rebelled for. Freedom isn't just unrestricted boundaries, as one definition of Webster's Dictionary states. True freedom is being controlled by no one other than yourself. It comes from within. This is a truism that must be taught, and by taking drugs, you are escaping that truth. By rejecting the establishment and experimenting with "free love" and drugs, they thought they had accomplished individuality and the freedom to express it. Instead, we, the next generation, have been left with a seemingly hopeless legacy. Unless . . .

Children are mirrors of their parents' past and present combined. Any religion, tradition, or habit that was passed to my parents was also passed to me; the good with the bad unless, they break the cycle. In order to break the cycle of drugs, someone must live truth out: resist the pressure. This is an individual struggle within all of us young adults today.

My real father was an alcoholic and drug addict. I had the potential to be one also had I grown up with him. With the support and encouragement of my family, I have made the decision to step out and break the mold. If every family in our country upheld a standard as steady as my mother and stepfather, I believe our country could begin a new cycle: a NEW generation, a drug free America. We could eliminate the unnecessary drug problem among our youth.

I desire to live out that lit torch of freedom to my children, and from them to their children, in hope that they, too, might make a difference as I wish to.

In my opinion, our country is doing what it can for a problem that is virtually out of its control and in the hands of the American families.●

## THE 25TH ANNIVERSARY OF HEAD START

● Mr. SIMON. Mr. President, last Friday marked the 25th anniversary of our national Head Start Program. On May 18, 1965, President Lyndon B. Johnson officially launched this important educational effort.

For 25 years, Head Start has been providing comprehensive child development services to children from low-income families, serving more than 11 million to date. Head Start is based on simple principles geared toward providing students with a learning environment that helps them develop emotionally, socially, intellectually, and physically. All of this is done on levels appropriate to children's developmental stages, and with the maximum involvement of parents.

We should pause a moment to recognize this important landmark. We should pay tribute to the "success stories" of children in the program who have gone on to become productive members of our society. We should honor the staff, volunteers, and parents who have been so heavily involved in the program, and help keep it going.

Earlier this month, Head Start agencies in Illinois commemorated the 25th anniversary with rallies and celebrations. As we celebrate the last 25 years, we must also look ahead to the next 25. We need to continue working until the needs of all economically disadvantaged children are met.

This week some of our colleagues are meeting with the administration to discuss the budget and spending priorities. As we work in this area, Mr. President, I urge my colleagues to remember Head Start and join me in supporting efforts to significantly increase funding for this valuable program.

To all those whose lives have been touched by Head Start, I wish you happy anniversary and continued success.●

## FORMER MEMBER OF CONGRESS JIM LLOYD ENDORSES CONGRESSIONAL TERM LIMITATION

● Mr. HUMPHREY. Mr. President, I continue to hear from former Members of Congress who favor congressional term limitation. These are people who have had the unique experience of making laws, and living under the product of their endeavors. They recognize some of the pitfalls of losing touch with the constituency.

I would suggest that all of us in Congress would be well-served by the same experience, and that the American people would be best served by a regular infusion of new perspectives and ideas into Congress.

I ask that a letter I have received from former Member of Congress Jim Lloyd appear in the RECORD immediately following my remarks. Mr. Lloyd served in the House from California, from 1975 to 1981.

The letter follows:

JACKIE LLOYD,

*Washington, DC, February 27, 1990.*

Hon. GORDON J. HUMPHREY,

*531 Hart Senate Office Building,*

*Washington, DC.*

DEAR SENATOR HUMPHREY: Absolutely, positively put me down as a supporter of S.J. Res. 2351.

Two 6-year terms for Senators and six 2-year terms for Representatives is just right!

Good luck!

Sincerely,

JIM LLOYD,

*Congressman, CA (1975-81).*●

## A BANNER DAY FOR WOODLORE

● Mr. KASTEN. Mr. President, I rise today to honor the signal achievement of the Allen-Edmonds Shoe Corp. of Port Washington, WI. Over the years, this company has consistently shown a spirit of excellence and devotion to quality that is a source of great pride to our State.

On June 19, Allen-Edmonds will be holding a grand opening for its brand new Woodlore facility. For 3 years now, Woodlore has been located in a rented facility—where it has been producing outstanding aromatic cedar shoe trees and related accessories.

From 5 employees in 1987, Woodlore has grown into a company employing a total of 40 workers today. These employees are looking forward to moving into their new 25,000-square-foot plant next month.

The economic future of our country is being built on achievements like this one. I ask all my colleagues to join me in honoring this small business success story—and in recognizing the perseverance and creativity of company president John Stollenwerk in making it happen.●

## PERIODICALS WITHOUT TOBACCO ADVERTISING

● Mr. SIMON. Mr. President, it has come to my attention that there are a good many magazines that do not accept tobacco advertising.

I commend them for that.

There is no other legal product that is sold in the United States that does

as much harm to people, and does no good for them, as cigarettes.

At the end of my remarks, I will place their names and addresses in the RECORD.

If my colleagues or others believe there are other periodicals who should be added to the list, I will be pleased to place their names in the RECORD.

There has been a controversy over whether or not Congress should limit by law, tobacco advertising. But there can be no question about the limitation on tobacco advertising by periodicals on a voluntary basis being a positive contribution to the Nation.

I am grateful to the publishers, editors, and others involved in making the decision on not accepting tobacco advertising in these periodicals.

I ask that their names be printed in the RECORD at this point.

The names follow:

Adirondack Life, P.O. Box 97, Jay, NY 12941

Air & Space, National Air & Space Museum, Washington, DC 20560

## HUMAN RIGHTS RECORD OF THE SALVADORAN MILITARY

● Mr. HATFIELD. Mr. President, today I am joining my House colleagues HOWARD BERMAN and GEORGE MILLER in releasing a report which profiles the top leadership of the Salvadoran military. This analysis entitled "Barriers to Reform: A Profile of El Salvador's Military Leaders," prepared by the staff of the Arms Control and Foreign Policy Caucus, comes at a pivotal moment when Congress has a very real opportunity to assist the efforts to bring peace to El Salvador.

Those of us who have studied El Salvador recognize that the situation is desperate—at least 70,000 lives have been lost in this tiny country's civil war. Yet renewed hope for reconiliation exists as the government and the representatives of the FMLN open U.N.-sponsored negotiations. Reports from the talks indicate that both sides seem to be serious about these discussions and about finding a peaceful settlement.

The United States can help El Salvador, but not by continuing its blind policy of throwing money into a black hole of death squads, corrupt military officers, a nonfunctioning judiciary and a rebellion which ignores the value of human life. We have spent $4 billion in El Salvador over the past 10 years but have ignored the results—most of them negative—of our investment.

This report is the third on El Salvador commissioned by me and other officers of the Arms Control and Foreign Policy Caucus. It was requested because we felt that Congress was not

receiving the kind of information necessary to accurately assess our policy in El Salvador. Past reports have analyzed governmental, social and humanitarian situations in that country; this report studies the Salvadoran military, which receives one-quarter of our total assistance and is suspected of very serious human rights abuses, including the murder of the six Jesuits and two women who were slain at the University of Central America last fall.

I believe that the findings included in this report will provoke renewed debate over our policy in El Salvador. For the information contained therein clearly shows that, despite our best efforts to reform and sensitize the Salvadoran Armed Forces, the military still remains in the hands of an elite group of tightly knit officers who have done nothing to curb human rights abuses of the most horrifying nature: 14 out of the 15 officers have had documented abuses of human rights occur under their command.

Certainly, the FMLN has committed contemplate and cynical violations of its own, but we bear a special burden to hold accountable those we assist through our foreign assistance programs. Some will say that it is unreasonable for an officer in a civil war, a war which their families and other civilians have been targeted by the FMLN, to be held to the same standard as that of a peacetime military. But certain military values are absolute: you can not grade the responsibility of the troops on a curve. Protection of non-combatants and prisoners in custody is an absolute fundamental duty as it is to report any violations. In demanding respect for human rights we must be even more vigilant when we are the ones putting up the money.

The information contained in this study is from highly reputable sources. Some of the human rights case studied were prepared at great personal risk by distinguished organizations including Amnesty International, Americas Watch and Tutela Legal, the Salvadoran Catholic Church's human rights investigation group. I encourage my colleagues to give careful consideration to the information revealed in this report.

I ask unanimous consent the report be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BARRIERS TO REFORM: A PROFILE OF EL SALVADOR'S MILITARY LEADERS

(A report to the Arms Contrtol and Foreign Policy Caucus, sponsored by Republican Howard L. Berman, Chairman; Senator Mark O. Hatfield, Chairman, 100th Congress; Republican George Miller, Chairman, Central America Task Force)

INTRODUCTION AND SUMMARY OF FINDINGS

As Congress addresses the role of senior Salvadoran military officers in the November, 1989, murders of six leading Jesuits and prepares to address the level of military aid to El Salvador, the leadership of the Salvadoran military has become the focus of much attention.

This report reviews the career records of the 15 officers who now hold the primary commands in the Salvadoran military, and tracks documented human rights abuses by troops under their command in the last decade.

By matching for the first time information on officers' previous assignments (provided by the Government of El Salvador and the U.S. Department of Defense) with reports of abuses of human rights by units they commanded (provided by reputable and experienced human rights groups operating in El Salvador), the report concludes that nearly all of El Salvador's commanding officers have presided over brutal human rights abuses committed by troops under their command. Serious questions are therefore raised as to whether the officer corps has either been above the law in allowing repeated abuses of human rights to occur on their watch, or, at a minimum, has shown serious problems of competence in failing to halt them.

Specifically, the report finds:

Fourteen of the 15 officers in El Salvador's primary commands have risen to their positions despite having had documented abuses of human rights carried out by troops under their command, including Chief of Staff René Emilio Ponce, the Minister and two Vice Ministers of Defense, the heads of the three security forces and five of the six major brigades;

In none of the over 50 cases listed have even junior officers been brought to trail, even though nearly every case would seem to point to officers either ordering the abuse, concealing it, or failing to investigate it; and

The cases listed describe brutal incidents that violate fundamental military ethics: under 13 officers, killings of non-combatants were documented—often of persons in custody; under 12, prisoners were reportedly tortured or abused; under four, wounded victims were denied medical treatment for extended periods; and under three, "disappearances" were documented. Finally, ten of the 15 commanders either themselves appear to have engaged in falsification of the facts by incorrectly absolving the military of abuses, or they commanded troops who did so.

The intent of this report is not to charge the primary commanders themselves with ordering each abuse or participating in each attempt to protect the perpetrators and their superiors from justice: in most cases, no evidence exists that would merit such charges. Rather, its intent is to examine the Salvadoran officer corps' accountability for abuses of human rights by their troops. The promotion to senior positions of so many officers whose troops committed repeated abuses of human rights, and the absence of prosecutions of even junior officers for these abuses, suggest that a basic level, there is little accountability.

Other findings, based on extensive interviews with Salvadoran and U.S. personnel and others close to the Salvadoran military as well as on the materials provided by the Government of El Savador and the Department of Defense, include:

Of the 14 commanders whose troops reportedly committed abuses, 11 received U.S. training—some for many years. This raises doubts about the Salvadoran military's ability to absorb U.S. training in human rights principles regarding treatment of non-combatants, or possibly about the relevance of the U.S. training;

Of the 15 primary commanders, 12 are members of the Tandona, the "big class" that graduated from the Salvadoran military academy in 1966 and that is resisting pressures to reform. This unprecedented concentration of power permits the Tandona to protect its members form removal for corruption, abuses or incompetence. The Tandona at times shows more loyalty to its members than to the rule of law or even to the President;

The commanders make key decisions by consensus rather than through a formal command structure. A group of eight to ten top officers in the Tandona known as the Compadres (which means, literally, men who act as godfathers to each others' children) mediates difficult diputes; and

Widespread corruption appears to be a significant barrier to efforts to hold top officers accountable to the law for abuses of human rights. Many officers have detailed knowledge of each others' questionable business practices, and could use this information to discourage the cooperation with authorities that would be needed to bring officers to justice for abuses of human rights. A U.S. official interviewed in El Salvador estimates that "ghost soldiers," whose pay goes instead to commanders, account for five to fifteen percent of the entire Armed Forces.

---

PRIMARY COMMANDS OF THE SALVADORAN ARMED FORCES

(T: member of the "Tandona," class of 1966).

(H: reported human rights abuses by troops under his command).

Chief of Staff: Col. René Emilio Ponce Torres T H.

Vice Chief of Staff: Col. Gilberto Rubio Rubio T H.

Minister of Defense: Gen. Rafael Humberto Larios López H.

V. Minister, Defense: Col. Juan Orlando Zepeda T H.

V. Minister, Public Security: Col. Inocente Orlando Montano T H.

National Guard Director: Col. Juan Carlos Carrillo Schlenker T H.

National Police Director: Col. Dionisio Ismael Machuca T H.

Treasury Police Director: Col. Ciro López Roque T H.

Commander, Air Force: Gen. Rafael Antonio Villamariona H.

Commander, 1st Brigade: Col. Franscisco Elena Fuentes T H.

Commander, 2nd Brigade: Col. José Humberto Gómez T H.

Commander, 3rd Brigade: Col. Mauricio Ernesto Vargas T H.

Commander, 4th Brigade: Col. Roberto Pineda Guerra.

Commander, 5th Brigade: Col. José Emilio Chávez Cáceres T H.

Commander, 6th Brigade: Col. H. Heriberto Hernández Martinez T H.

SECONDARY COMMANDS OF THE SALVADORAN ARMED FORCES

(T: member of the "Tandona," class of 1966).

(Note: No assessment has been made of reported human rights abuses by troops under his command).

*Military Detachments*

Military Detachment 1: Col. Jorge Antonio Medrano.

Military Detachment 2: Col. René Arnoldo Majano Araujo.

Military Detachment 3: Col. Julio César Grijalva.

Military Detachment 4: Col. Humberto Corado Figueroa.

Military Detachment 5: Col. Orlando Carranza.

Military Detachment 6: Col. Juan Armando Rodríguez Mendoza T.

Military Detachment 7: vacant.

*Immediate Reaction ("Elite") Battalions*

Arce Battalion: Col. José Roberto González Aguilar.

Atlacatl Battalion: Col. Oscar Alberto León Linares.

Atonal Battalion: Lt. Col. Luis Mariano Turcios.

Belloso Battalion: Lt. Col. José Domingo Flores Portillo.

Bracamonte Battalion: Lt. Col. Juan Emilio Velasco Alfaro.

*Other Commands*

Artillery Brigade: Col. Carlos Rolando Herrarte.

Cavalry Regiment: Col. Roberto Tejada Murcia.

Engineering Brigade: Col. Nelson Ivan López y López.

Transmissions Center: Col. Benjamin Eladio Canjura Alvayero T.

Dir., Nat. Intelligence: Col. Francisco José Martínez Calderon.

Commander, Navy: Col. Fernando Menjivar Campos.

Vice Commander, Air Force: Col. Héctor Leonel Lobo Pérez.

Military Academy: Col. Ricardo Alfonso Casanova Sandoval T.

*Joint General Staff*

Personnel (C-1): Col. Ricardo Antonio Martinez Cuéllar.

Intelligence (C-2): Col. Iván Reynaldo Díaz.

Operations (C-3): Col. Román Alfonso Barrera.

Logistics (C-4): Col. José Alexander Méndez.

Psychological Ops. (C-5): Col. Carlos Armando Avilés Buitrago.

Transmissions (C-6): vacant.

THE SALVADORAN ARMED FORCES: DESCRIPTION

*Official Command Structure*

The formal structure of the Salvadoran military is quite different from the system with which Americans are familiar. This section based in large part on interviews with Salvadoran military officials, describes the forces and their formal chain of command.

The 55,000-soldier Armed Forces of El Salvador operates under the jurisdiction of the Minister of Defense and Public Security. The President, who is the Commander-in Chief, may appoint any active-duty military officer to this position. (In nearly all Latin American nations, the Minister of Defense has traditionally been a military rather than a civilian post.) The Minister has two Vice Ministers (also active-duty military officers), one for Public Security and one for Defense.

The Chief of Staff, who reports to the Minister of Defense, commands both the 44,000-soldier Army and the 11,000-soldier security forces (the National Guard, the Treasury Police and the National Police). He is assisted by a highly-ranked Vice Chief of Staff and a Joint General Staff comprised of six usually junior colonels who each coordinate one aspect of national command: personnel, intelligence, operations, logistics, psychological operations and communications.

The three directors of the security forces (also active-duty military officers) report to both the Chief of Staff and the Vice Minister for Public Security. The security forces are deployed in small units in cities an rural communities throughout the country, with the National and Treasury Police being based in cities more frequently than the National Guard, which has traditionally been the rural security force. Officers in the security forces are regular Army officers who usually rotate back to assignments in the Army.

The duties of the security forces are quite different from those Americans traditionally associate with police. While the security forces are responsible for investigating crimes, they also operate as local combat and intelligence units that coordinate operations with the Army.

The Army itself consists of regional combat forces that divide the country's 14 geographic areas, known as "departments," into 16 regional commands, specialized commands such as the Air Force, the Navy and the Engineering and Artillery brigades, and elite combat forces that can be sent anywhere in the country. Three of the specialized commands also have regional combat responsibilities.

The regional commands comprise:

Six brigades (numbered one through six) of 2,500 to 3,500 troops each. The six brigade commanders are the top combat commanders, and between them they have responsibility for the entire country. Each is responsible for the department in which he is based, and often for adjoining areas as well, since all other regional commanders must report to one of the six brigades. For example, the commander of the 3rd Brigade in San Miguel Department also directs the commanders of Military Detachments 4 and 5 in the neighboring departments of Morazán and La Unión. The 1st Brigade is viewed as the top brigade command, since it covers San Salvador, but the 3rd Brigade (San Miguel) and the 4th Brigade (Chalatenango) cover the areas of the most combat, and are also seen as key commands.

Seven military detachments (numbered one through seven) of 1,000 to 2,000 troops each. The commander of a military detachment generally has responsibility for a single department. Although he reports to a nearby brigade commander, he usually has a great deal of authority as the direct commander of the department, and at times reports directly to the Chief of Staff.

Three specialized commands (Artillery and Engineering Brigades and Cavalry Regiment) of up to 2,000 troops each. The Artillery and Cavalry split one department and the Engineers control another, but they all also provide support to combat operations throughout the country. Their commanders report to a nearby brigade commander and the Chief of Staff.

Other specialized commands include the 1,000-soldier Air Force, the 1,000-soldier Transmissions Instruction Center (which is next to the presidential palace and so also functions as a palace guard), the 500-soldier Navy, the National Intelligence unit, and the separate military schools for officers, troops and intelligence.

The five elite "immediate reaction" battalions (named Arce, Atlacatl, Atonal, Belloso and Bracamonte) of 1,000 troops are each based in a different department but do not have specific regional responsibilities. They are moved around under the orders of the Chief of Staff, although they report to a brigade commander when operating in his zone.

The second most important officer in each military unit is the executive officer (who is called the deputy director or subdirector in the security forces and the vice commander in the Air Force). The executive officer is directly below the commander in the chain of command, and translates the commander's orders into action.

This report defines 15 officers as primary commanders: the Chief of Staff and his Vice Chief of Staff, the Minister of Defense and his two Vice Ministers, the Directors of the three security forces, the Commander of the Air Force and the Commanders of the six regional brigades. The Commanders of the military detachments, elite battalions and specialized brigades or regiments are defined as among the 26 secondary commanders, since all report to one or more of the regional brigade commanders. Also defined as among the secondary commanders are officers with less direct responsibility for important combat decisions, such as the Directors of the Military Academy and National Intelligence, the Commanders of the Navy and the Transmissions Instruction Center, the Vice Commander of the Air Force and the six members of Col. Ponce's general staff.

Nearly all primary and secondary commanders are colonels. As in most Latin American militaries, the rank of general is extremely rare, and is awarded more as a recognition of exceptionally long service than as an indication of chain of command.

*The Command Structure in Practice: The "Tandona" and the "Compadres"*

This section, based on extensive interviews with over 15 Salvadoran and U.S. personnel and others close to the Salvadoran military, describes the actual command structure in effect today in El Salvador. That structure is not only quite different from the system with which Americans are familiar, but from the official Salvadoran structure as well.

The Salvadoran military does not operate through a clear chain of command, but rather through a complex system of consensus within the Tandona (the "big class" graduating from the military academy in 1966, which is also referred to as the Sinfónica, or "the class as large as a symphony"), and between tandas (this and other graduating classes). The Tandona had 47 graduates, more than twice the average size of 18 for both the four preceding tandas and the four that followed.[1] It is noteworthy also for having among its members many sons of former high-ranking officers as well as many sons-in-law to powerful families. Roughly 20 members of the class remain in senior positions, excluding military attachés.

The system of consensus is managed at present more by Chief of Staff Col. René Emilio Ponce and Vice Chief of Staff Col. Gilberto Rubio than by Minister of Defense Gen. Rafael Humberto Larios. This is in part because Col. Ponce has been the traditional leader of the Tandona since graduating first in the class in 1966, and in part because Gen. Larios was chosen as a compromise between competing tandas and does

[1] Footnotes at end of article.

not wield the power usually associated with his position.

Chief of Staff Ponce consults with most other primary commanders before making and implementing key decisions. When the decisions involve assignments of officers, some Salvadoran sources state that Col. Ponce convenes a group of eight to ten officers from the Tandona that works out the agreement with him and the affected officers. This group is referred to by others in the Tandona as the Compadres (which means, literally, men who act as godfathers to each others' children). The reference is not just symbolic: members of this group are often asked to be godfathers to each other's children and to children of other officers, and so establish deep bonds of loyalty and reciprocity.

The Tandona first assumed control of leading positions in November, 1988, when Col. Ponce became Chief of Staff. The Tandona hoped that Col. Ponce would be made Minister of Defense in 1989, but President Alfredo Cristiani had reportedly made an initial offer of the post to a member of an earilier tanda, Air Force Gen. Juan Rafael Bustillo. After much negotiation, Cristiani retracted his offer to Bustillo, and Gen. Larios was accepted as a compromise candidate. In the wake of this deferral of Col. Ponce's promotion, more members of the Tandona took up positions as primary commanders, until it achieved today's unprecedented concentration of the members of one class in the primary commands: 12 out of 15.

The tanda system creates separate power bases in the military. Every officer is identified with his tanda, and each tanda has an association whose leaders negotiate with the leaders of other tandas for their class' assignments. For the graduating classes of the 1980's, which have become much larger and include officers commissioned through other means than graduating from the military academy, the role of the tanda system has become less important. Barring some dramatic change in command structure, though, the small tandas of the 1970's will control the military well past the year 2000.

According to U.S. officials, while all graduating classes of officers, or tandas, protect their classmates to some extent from accountability for corruption, incompetence or abuses of human rights, this sense of loyalty to classmates has become extreme in the Tandona, and in some instances exceeds not only loyalty to the law and the President, but to the Armed Forces as a whole.

For example, when asked whether top-ranking officers knew of military involvement in the killing of the Jesuits soon after it occurred, one official in the U.S. Embassy told Caucus staff that "a lot of officers knew something was up and didn't come forward. . . . They are a tight group." Another U.S. official identified a member of the Tandona who the official believed "knew early" about military involvement in the killing, but had shown "loyalty to the Tandona rather than to his Commander-in-Chief" by failing to respond to President Alfredo Cristiani's request that all information be provided to him.

According to numerous non-governmental sources in El Salvador, the Tandona has successfully resisted intense efforts by the U.S. Embassy to force the retirement of officers the Embassy believes are corrupt, incompetent or responsible for abuses of human rights. According to them, the Embassy was deeply disappointed at the results of a much-anticipated shifting of commands in December, 1989. Air Force Gen. Juan Rafael Bustillo and Director of National Intelligence (and Tandona member) Col. Carlos Marucio Guzmán-Aguilar, whose transfers had reportedly been encouraged by the Embassy, were assigned as military attachés. However, an expected broader set of changes were not forthcoming, and the Tandona emerged with control of all three security forces and five of the six brigades.

In May, 1990, 7th Military Detachment Commander Col. Roberto Mauricio Staben and Navy Commander Col. Humberto Pineda Villalta, both members of the Tandona although not among the primary commanders, were also assigned as attachés. The State Department says that Staben, a close aquaintance of ex-Major Roberto D'Aubuisson who was arrested with him once for reportedly planning a coup, was "implicated" in running a kidnapping ring.[2] Villalta had been the subject of reporting in the United States about alleged corruption and possible conflict of interest as owner of a fishing company.[3] However, non-governmental sources report that the U.S. Embassy has told Col. Ponce of another 15 members of the Tandona it wants transferred out of command positions.

El Salvador's rejection of Embassy demands to remove top commanders stands in sharp contrast to the results of U.S. efforts in December, 1983, led by then-Vice President George Bush, to have junior officers the U.S. Government considered notorious abusers of human rights sent abroad as attachés. Virtually all the officers on "the Bush list" presented to President Alvaro Magaña in 1983 were sent out of the country.[4]

If the Tandona continues to resist efforts to remove its members from command posts, it will dominate the Salvadoran military until 1997, since officers do not have to retire until they have served 35 years, including time at military academy. (The cabinet post of Minister of Defense and diplomatic posts such as military attaché are exempted from this requirement.)

Widespread corruption among officers in the Salvadoran military appears to be a significant barrier to efforts to hold top officers accountable to the law for abuses of human rights. Many officers have detailed knowledge of each others' questionable business practices, and could use this information to discourage the cooperation with authorities that would be needed to bring officers to justice for abuses of human rights.

Military command have traditionally been seen as sources of income, since official salaries are minimal (only $500 per month for a full colonel). Many sources in El Salvador provided specific examples to corroborate the detailed Research of Joel Millman—summarized in a December, 1989 article in the New York Times Magazine—who concluded that many officers exploit their positions by selling goods at inflated prices to their soldiers, or by forming businesses with clear advantages over civilian competitors.[5]

Some U.S. Embassy officials discount the significance of these practices, arguing that in the Salvadoran context these are not seen as corrupt practices. However, Embassy officials do see the practice of "ghost soldiers"—whose pay goes instead to commanders—as an unacceptable form of corruption. An Embassy official told Caucus staff that the "ghost soldiers" account for five to fifteen percent of the entire Armed Forces.

PRIMARY COMMANDERS: BIOGRAPHIES AND RECORDS ON HUMAN RIGHTS

For each of the officers holding primary command, this section:

(1) lists all known major assignments in the 1980's and foreign training, as reported by the Government of El Salvador and the U.S. Department of Defense, with some details added from Salvadoran press reports and other U.S. and Salvadoran Government sources;

(2) provides a profile of the commander, based on extensive interviews with U.S. and Salvadoran officials (both civilian and military), former Salvadoran military personnel, and with journalists and other analysts knowledgeable about the Salvadoran military; and

(3) summarizes incidents of human rights abuses in which the officer was either the commander or, in a few cases, the executive officer of the forces allegedly responsible, as reported by reputable human rights monitors. It also reports cases in which the officer provided information on the incident that absolved the perpetrators of responsibility, but later proved to be incorrect. For each incident, the summary provides the date and the location, the details as reported and (in a foot-note) the source and date of the report.

The summaries of alleged abuses are based almost exclusively on on-site investigations, primarily by distinguished human rights organizations such as the Salvadoran Catholic Church's Tutela Legal (Legal Guardian), Americas Watch and Amnesty International, but in some cases also by the State Department and Members of Congress. While the Caucus does not have independent conformation of these cases, the organizations and offices cited are reputable and highly knowledgeable about El Salvador.

The cases cited are the result of rigorous culling by Caucus staff. In most of the tens of thousands of abuses in El Salvador that have been attributed to government forces over the past 11 years of civil war, victims and their families or other witnesses have been unwilling or unable to say which unit committed the abuse. The cases cited are special in that they are both well-documented and have been attributed by reputable organizations to specific commands of the Armed Forces.

The role of Tutela Legal merits special mention, both because of the number of cases in this report for which its files in El Salvador are the primary source.

Founded by Salvadoran Archbishop Arturo Rivera Damas, since 1982 Tutela Legal has carried out on-site investigations of reported abuses of human rights throughout El Salvador. Funding for the effort has come from the Archdiocese of the Catholic Church of San Salvador and the Ford Foundation,

Tutela Legal has been called the "documenter of record" in El Salvador's civil war and the "conscience of the country," because it investigates and maintains records of abuses by both the FMLN and the security forces. Tutela has a relatively small staff of five to ten investigators who nonetheless travel throughout the country to gather testimony from as many witnesses and family members as possible. Recently, Director Maria Julia Hernández received the Archbishop Oscar Romero Award for human rights.

*The Principle of Accountability*

As noted in the introduction, it is not the intent of this report to charge the primary commanders themselves with ordering abuses by their troops or participating in attempts to protect the perpetrators and their superiors from justice. Rather, the intent of this section is to determine the general level of accountability demanded of Salvadoran officers for abuses by their troops.

Military accountability means that officers are ultimately responsible for the actions of the soldiers serving under them. It is a standard far higher than that of a court of law trying to determine personal responsibility, but it is one to which military forces around the world hold officers, in order to ensure that officers have an abiding self-interest in the performance of their troops. This principle does not mean that one isolated incidence of poor performance by one soldier should invariably derail an officer's career, but rather that officers whose troops continually perform poorly in battle, or run ships aground, or abuse human rights, generally should not get promoted.

Just as it is a violation of fundamental military ethics for a soldier to harm a noncombatant or prisoner, even if ordered to do so, it is violation of a fundamental military duty for an officer not to investigate fully and punish all officers and soldiers implicated in such violations, and then take strong action to ensure that they are not repeated.

In any military force, the promotion of an officer whose troops have harmed non-combatants risks sending an unmistakable message to soldiers that misbehavior is tolerated. If the officer also fails to bring to justice junior officers who actually order or acquiesce in abuses, the negative message is made even clearer. In El Salvador, where tens of thousands of civilians have died at the hands of armed combatants in the past decade, the concept of accountability and its implementation is especially relevant.

*The Primary Commanders*

CHIEF OF STAFF: COL. RENÉ EMILIO PONCE TORRES

*Key assignments*

1970: Student, U.S. Army School of the Americas, Engineering Course.

1979: Promoted to Major; Chief of Personnel (S-1), General Staff of the Treasury Police.

1981: Deputy Director (Executive Officer) of the Treasury Police while also holding S-1 position.

1982: Chief of Transit Authority, National Police.

1983: Promoted to lieutenant colonel; Commander, Belloso Immediate Reaction Battalion (11/83-11/84).

1984: Chief of Operations (C-3), Joint General Staff (11/84-6/87).

1986: Promoted to colonel (12/86).

1987: Commander, 3rd brigade (6/87-10/88).

1988: Chief of Staff (11/88 to the present).

*Profile*

Col. Ponce graduated first in his class in the 47-member Tandona in 1966, and has always functioned as its leader. He commands intense loyalty as head of the Compadres, the elite core of the Tandona. One person interviewed recounts how Col. Roberto Mauricio Staben—who has long been a target of U.S. reform efforts—said very emotionally of Ponce, "If my chief has to sacrifice me for the good of the Army, I'll accept." In May, 1990, Staben was true to his word and accepted a transfer from a combat command to the position of military attaché to Honduras.

Ponce has a reputation as a middle-of-the-roader who leads by consensus. A number of people interviewed recall that when ex-Maj. Roberto D'Aubuisson's call for attacks on civilian opponents of the military represented the "mainstream" thinking of the Salvadoran military in the early 1980's, Ponce was known as a hard-line officer and a close D'Aubuisson associate who would meet with him at his National Assembly office. When the mainstream moved away from D'Aubuisson and toward "civic action" in the late 1980's, Ponce dropped both his association with him and his hard-line image, and focused his efforts on civic action campaigns. As one person put it, "Now the stream has shifted, and so has he."

One reason for the trust placed in Ponce by his peers and officers in the other tandas is what many refer to as his reputation as an "honest broker." He consults fully with all interested parties before suggesting an arrangement that all can live with rather than conspiring with a small group and issuing surprise announcements. As leader of the Tandona, though, he has acknowledged that he is ultimately dependent on its support, either as Chief of Staff or, in the future, as Minister of Defense. This makes it difficult for him to respond to U.S. demands that he remove some 15 of his roughly 20 class-mates who remain in command positions.

*Reported human rights abuses by troops under his command*

While Ponce was Deputy Director of the Treasury Police and essentially commanding it under an inactive director on the night of April 7, 1981, the State Department reported that "thirty civilians were killed by the Treasury Police" in a sweep of the Soyapango district of San Salvador. Most of these civilians were reportedly taken from their homes and summarily executed, or killed in their homes. The police claimed that the deaths had occurred in a shoot-out, but a number of bodies reportedly were found with their hands bound behind their backs. After an investigation, the State Department called the Treasury Police's version "not credible" and "inane," and labelled the case "violence by Government elements against non-guerrilla elements." According to Amnesty International, there was no investigation or disciplinary action.[6]

Also while Ponce was Deputy Director of the Treasury Police throughout 1981, there were numerous reports of Treasury Police abducting people in San Salvador who were never seen again. Amnesty International has documented five specific examples for 1981 that it attributes to the Treasury Police.[7]

While Ponce was Commander of the Belloso elite battalion in March, 1984, Belloso troops reportedly took an unarmed merchant, 48, off a bus along a highway in Ahuachapán and shot him to death in front of a number of other passengers.[8]

While Ponce was Commander of the 3rd Brigade on February 25, 1988, Army troops from Military Detachment 4, which reports to the 3rd Brigade, reportedly seized a cooperative leader, 25, in his home during the night and also picked up a man, 18, and a boy, 16, in Tepemechin, Morazán. According to witnesses, in the morning the troops tortured the three and forced them to run through a burning field with no shoes. The witnesses later heard gunfire and saw helicopters called in to simulate a skirmish, even though no contact had been made with rebel troops. Two of the men were found dead with their ears, nose and thumbs cut off. The third was never found. After an autopsy had been performed on the bodies by a foreign pathologist a few months later, reporters asked Ponce what he intended to do to investigate the incident. He replied that the two dead men were "subversives" who had died in a firefight, and that: "We cannot investigate every combat report. In these cases, I must believe what my colonels report." [9]

While Ponce was Commander of the 3rd Brigade in April, 1988, in separate incidents a boy, 17, and a man, 20, were reportedly taken away from their farms in San Miguel and Morazan, respectively, by 3rd Brigade troops. Their bodies were found a few days later, with one hacked to death and showing signs of torture. The cause of the other's death could not be determined because animals had destroyed parts of the body.[10]

* While Ponce was Chief of Staff in January, 1989, he told Rep. Gerry Studds that the head-wounds found on 10 villagers killed in San Sebastian in September, 1988, must have been the result of the FMLN digging up the bodies and shooting them to fabricate a massacre that would be attributed to the Army. According to Rep. Studds, this explanation was dismissed as ridiculous by a U.S. Embassy official working on the case.[11] A few weeks later, following intense pressure from the U.S. Embassy, the Army acknowledged that the massacre had in fact been committed by its troops.

VICE CHIEF OF STAFF: COL. GILBERTO RUBIO RUBIO

*Key Assignments*

1983: Chief of Intelligence (C-2), Joint General Staff

1985: Commander, Military Detachment 3 (3/85-2/86)

1986: Commander, 4th Brigade (2/86-7/87)

1987: Director, National Intelligence Directorate (7/87-10/88)

1988: Vice Chief of Staff (11/88 to the present)

*Profile*

Col. Rubio graduated in the middle of the Tandona in 1966. He is seen as a major force in the Tandona, and is probably one of the Compadres. He has a reputation for financial honesty that has helped him in his career, and is his current position as Vice Chief of Staff he is responsible for managing the military budget.

One of the reasons he is thought to be a candidate for promotion to Vice Minister of Defense is that he would then take on an even more sensitive financial position, that of managing the military's $120 million pension fund. The fund, created in the 1980's with mandatory deductions from both soldiers and officers' salaries, has become the largest single source of investment capital in El Salvador and is relied on by officers for their future security.

Rubio's reputation on military grounds is mixed. He commanded the 4th Brigade when its El Paraíso base was overrun by FMLN forces in 1987, and 69 Salvadoran soldiers and a U.S. adviser died. However, the base is acknowledged to be difficult to defend, and a number of U.S. officials interviewed consider him competent as a commander.

*Reported human rights abuses by troops under his command*

While Rubio was Commander of the 4th Brigade in April, 1986, troops from the bri-

gade reportedly opened fire on a group of young people near a swimming hole in Chalatenango, killing two boys, 12 and 13, and a man, 21. Shortly thereafter, troops reportedly emerged from helicopters and cut off the right ear from each victim. During burial the next day, troops reportedly came to the scene and displayed the ears of the victims.[12]

While Rubio was Commander of the 4th Brigade on February 13, 1987, a 22-year old man had been badly injured by a grenade during a battle in El Común, Chalatenango, between the brigade and the FMLN was reportedly interrogated without medical treatment for four days. The man was reportedly subjected to beatings, electric shocks and injections of drugs before being taken to a hospital.[13]

While Rubio was Commander of the 4th Brigade on April 2, 1987—shortly after the main base at El Paraiso, Chalatenango, had been attacked by the FMLN—troops there reportedly tortured a 17-year old boy who was being interrogated about the attack. The boy was reportedly seized after getting off a bus in front of the base, beaten and kicked severely and tortured with electric shocks.[14]

While Rubio was Commander of the 4th Brigade on May 30, 1987, a 34-year old herdsman was killed in Las Cañas, Chalatenango. Villagers nearby heard gunfire, and Tutela Legal attributed responsibility to soldiers of the 4th Brigade. The brigade claimed that the herdsman had died from stepping on an FMLN mine, but Tutela Legal examined the body and determined that gunshots caused the death.[15]

While Rubio was Commander of the 4th Brigade on June, 13, 1987, soldiers from that Brigade and the Belloso Battalion reportedly stabbed in the throat and left for dead four unarmed men they had seized for questioning in Plan Verde, Chalatenango. The soldiers had taken the men from their homes or while walking on the road and interrogated them prior to the attempted murders. The men survived to tell of their treatment, but the Army denied any involvement. Two of the men's wives reported being raped.[16]

MINISTER OF DEFENSE: GEN. RAFAEL HUMBERTO LARIOS LÓPEZ

*Key Assignments*

1962: Student, U.S. Army School of the Americas, Communications Officers Course.

1964: Student, U.S. Army School of the Americas, Command General Staff Course.

1975: Executive Officer, battalion of the Artillery Brigade.

1980: Director of the Military Academy.

1982: Promoted to Colonel.

1983: Military Attaché to the United States (to 1985); student at U.S.-run Inter-American Defense College.

1985: Commander, Artillery Brigade (6/85-7/87).

1986: Promoted to Brigadier General.

1987: Director, National Guard (6/87-6/88).

1988: Vice Minister of Defense (7/88-5/89).

1989: Minister of Defense (6/89 to the present).

*Profile*

Gen. Larios was a compromise choice for the position of Minister of Defense, appointed after a power struggle in June, 1989, in which President Cristiani reported abandoned his preference for Air Force Commander Gen. Juan Rafael Bustillo and members of the Tandona abandoned their preferred choice of Col. Ponce. Larios is expected to step down in favor of Ponce at some point in 1990. He graduated from the Military Academy in 1961, fifth in a class of 13.

While some people interviewed refer to Larios as a "strawman," or a caretaker who is not a factor in military decisions, others say he has participated in military deliberations during his tenure, although not as actively or with as much importance as Col. Ponce.

As part of the compromise making Larios Minister of Defense, his classmate Col. Castro was given the important financial post of head of the pension fund, and Larios works closely with him in managing the fund. Traditionally, this post has gone to the Vice-Minister of Defense or Armed Forces, but with Col. Zepeda being a classmate of Chief of Staff Ponce, it was agreed that the Tandona should not be given the financial post as well.

*Reported human rights abuses by troops under his command*

While Larios was Commander of the Artillery Brigade in the fall of 1986 and the spring of 1987, a pattern of abuse of people being interrogated appeared to emerge. In at least four separate incidents seven men reportedly were taken from their homes and held at brigade headquarters in La Libertad, where they were subjected to such abuses as beatings, hanging from the ceiling, being drugged and being denied food and sleep.[17]

While Larios was Director of the National Guard, on July 8, 1987, the 36-year old leader of a cooperative affiliated with the National Union of Campesinos was reportedly taken from his house in Palacios, Cuscatlán, by five soldiers in the National Guard. The soldiers were accompanied by a man in civilian dress who had been in the town earlier in the day pointing out townspeople to the Guard for questioning. The cooperative leader was found dead the next morning with seven bullet-wounds in his face.[18]

While Larios was Director General of the National Guard, on June 11, 1988, a 23-year old man was reportedly taken from a hospital in Nueva San Salvador, La Libertad, by soldiers in the National Guard. Guard troops reportedly searched his house and told his family that if they did not turn over his weapons, he would die. The family denied that he had weapons. Three days later, the family was informed by the National Guard that he had committed suicide with a pistol that a sergeant had left on a desk. Tutela Legal, however, attributed the death to the National Guard.[19]

VICE MINISTER OF DEFENSE: COL. JUAN ORLANDO ZEPEDA

*Key Assignments*

1969: Student, U.S. Army School of the Americas, Counter-Insurgency Course.

1982: Executive Officer, 1st Brigade.

1984: Acting Director, Military Academy (1/84-3/85).

1985: Chief of Intelligence (C-2), Joint General Staff (3/85-5/88).

1986: Promoted to Colonel (12/86).

1988: Commander, 1st Brigade (6/88-5/89).

1989: Vice Minister of Defense (6/89 to the present.)

*Profile*

Col. Zepeda is regarded by many as the "ideological master of the Tandona" and some describe him as ARENA's point man in the military: in the early 1980's, Zepeda was close to ARENA founder Roberto D'Aubuisson, and he was one of the few officers to show publicly his preference for ARENA's Alfredo Cristiani during the 189 presidential campaign. He is a very powerful member of the Tandona, and almost certainly one of the Compadres. He graduated 13th out of 47 in the class.

As commander of military intelligence from 1985 to 1988, he is credited with creating a system of information-gathering in urban areas that allowed the monitoring of both suspected rebels and civilian opposition groups as the war moved into the cities.

According to many people interviewed, Zepeda has received extensive training from Taiwan in psychological operations and intelligence, although the training does not appear on the list of assignments and foreign training provided by the Government of El Salvador and the Department of Defense.

In April, 1989, Zepeda accused the University of Central America (the Jesuit-run university which housed the 6 priests killed in November, 1989) of "planning strategies of the FMLN, being a refuge and haven for terrorist leaders and being accomplices in the April 19, assassination of the Attorney General." [20] Earlier that year, he and rightist civilians authored a plan for armed private Patriotic Civil Defense units that would function as adjuncts to the armed forces in their neighborhoods. After the Salvadoran press reported Zepeda's swearing in of the first unit, former President José Napoleón Duarte compared the units to death squads, and the plan was officially dropped.[21]

When Zepeda came to the United States in December, 1989, to present his perspective on the killing of the Jesuits, he argued to U.S. Members of Congress that the FMLN could have been responsible for the murder.

Col. Ponce reportedly favored Cols. Vargas or Barrera for this position. It is unusual for Zepeda not to have the directorship of the Armed Forces' pension fund while serving as vice minister. It is reported that he will be given the position and remain as vice minister if and when Col. Ponce does become Minister of Defense.

*Reported human rights abuses by troops under his command*

While Zepeda was Commander of the 1st Brigade on June 2, 1988, a 24-year old man was reportedly taken from his home in the Apopa section of San Salvador by 25 troops of the 1st Brigade. His family appealed to soldiers at the base where the troops were stationed, and was directed to other bases. While they were going to the other bases, the man was found dead in a nearby river with gun-shot wounds in the face and neck. Another man, who had reportedly been seized and released by the same group of troops, said that he had seen the man in custody prior to his death.[22]

While Zepeda was Commander of the 1st Brigade on June 4, 1988, a 19-year old man was reportedly seized and killed by troops of the brigade outside his relative's home in Las Animas, Cuscatlán. A witness testified that the soldiers blindfolded and beat him before shooting him and taking his identification card. The soldiers had reportedly been waiting for him near the relative's house earlier in the day.[23]

While Zepeda was Commander of the 1st Brigade on August 10, 1988, two brothers, 26 and 22, were reportedly taken from their family's home in San Nicolás, San Salvador, by members of the brigade who asked for

them by name. According to court documents, the brothers were found shot to death near a river, with one's thumbs tied together with shoelaces.[24]

VICE MINISTER OF PUBLIC SECURITY: COL. INOCENTE ORLANDO MONTANO

*Key Assignments*

1981: Commander, Military Detachment 6.
1982: Executive Officer, Belloso Battalion.
1983: Commander, Arce Battalion; Director, National Police School; Executive Officer, 4th Brigade.
1984: Commander, Transmissions School and Palace Guard (CITFA).
1985: Commander, Military Engineering Brigade.
1987: Commander, 6th Brigade (7/87-6/89).
1990: Vice Minister of Public Security (6/89 to the present).

*Profile*

Montano acquired his nickname, "Sleeping Beauty," for a mysterious incident in 1967, when he was captured inside Honduras leading an Army convoy loaded with weapons, and claimed that he had gone to sleep and the convoy had taken a wrong turn and crossed the border. Many observers believe that the convoy was arming dissident Honduran officers for a coup.

Some people interviewed questioned his intellectual abilities, but he graduated third out of 47 in the Tandona. He is seen as a power in the Tandona, and perhaps as one of the *Compadres.* He has an engineering degree from the University of Central America, but five months prior to the murders of the Jesuits there in November, 1989, publicly accused the University of being a "front group" that published "lies" to discredit the Army.[25]

*Reported human rights abused by troops under his command*

While Montano was Commander of the Engineering Brigade on August 6, 1986, three brothers (42, 30 and 28) were reportedly taken from their home in San Pedro Nonualco, La Paz, by soldiers of the Engineering Brigade and taken to a military installation. The next day their bodies were reportedly found in the street with their throats cut and one's tongue cut out. According to their family, the local military commander said that the brothers has been killed as an example, because they had been accused of collaborating with the FMLN.[26]

While Montano was Commander of the 6th Brigade on July 5, 1987, soldiers from the brigade on a sweep reportedly threw a grenade into a house in Jiquilisco, Usuluán, wounding all 9 people inside. One of them, a 48-year old man, died later at a hospital, while his wife and their four children and a 30-year old woman and her two children survived their wounds. At the hospital, after the wife refused to agree to an Armed Forces' press officer's statement that the FMLN has thrown the grenade, one of the children was reportedly denied treatment.[27]

While Montano was commander of the 6th Brigade on July 6, 1987, soliders from the brigade and the Atonal Battalion (which operates in the area under the brigade's command) reportedly threatened a man during sweep in Berlin, Usulután, when he refused to sell them bread. Five days later, soliders reportedly entered his house at night and riddled him with bullets in his hammock, while simulating a firefight outside his house. The Armed Forces' press office reported that Atonal soldiers had encountered a rebel and killed him.[28]

While Montano was Commander of the 6th Brigade on January 30, 1989, soldiers from the brigade's Oromontique Battalion reportedly seized two men, 40 and 32 years old, who were members of the FENACOA agricultural cooperative in San Francisco Javier, Usultán. Later that day, residents heard explosions and gunfire nearby, although no rebels had been seen in the area. The two men's bodies were found three days later with arms and ears cut off. The Armed Forces' press office reported that the two were rebels who had been killed in a firefight with the Army.[29]

NATIONAL GUARD DIRECTOR: COL. JUAN CARLOS CARRILLO SCHLENKER

*Key Assignments*

1968: Tactical Officer, U.S. Army School of the Americas.
1980: Chief of Intelligence (S-2), General Staff of the Treasury Police (12/80-1982).
1982: Executive Officer, Military Detachment 5.
1983: Deputy Director, Treasury Police (6/83-1/84).
1984: Executive Officer, Military Detachment 1 (2/84-9/84); Commander, Atalactl Battalion (10/84-6/87).
1986: Promoted to Colonel (12/86).
1987: Commander, Military Detachment 4 (6/87-7/88).
1988: Commander, Cavalry Regiment (7/88-6/89).
1989: Director General, National Guard (6/89 to the present).

*Profile*

Carrillo is widely acknowledged to be a powerful force in the *Tandona,* and is almost certainly one of the *Compadres.* He is seen as a tough and active field commander. However, repeated allegations of abusive behavior by his troops, particularly when he commanded one of the toughest combat zones (Military Detachment 4), has reportedly become an issue in discussions between the U.S. Embassy and the *Tandona,* diminishing his chances for service after this assignment.

He was Deputy Director of the Treasury Police under Col. Nicolas Carranza, who was reportedly linked to former Maj. Roberto D'Aubuisson in death squad operations. One person interviewed recalls Carrillo himself as close to D'Aubuisson at the time. According to two others, other officers overheard him angrily upbraiding Col. Benavides after he had been arrested in the Jesuits case, to which Benavides responded: "I thought those were my orders." [30]

*Reported human rights abuses by troops under his command*

While Carrillo was Commander of the Atlacatl Battalion in March, 1985, a wounded FMLN combatant, 32, was reportedly captured by Atlacatl soldiers in Chalatenango, tortured in the field and marched on foot to the 4th Brigade barracks, although he had lost a great deal of blood and was obviously in need of medical care. He was then reportedly held in the barracks without food or water for three days, denied medicine and medical treatment, interrogated extensively and tortured with electric shocks.[31]

While Carillo was Commander of Military Detachment 4 on July 2, 1987, a large number of troops of the detachment reportedly seized a 17-year old boy at his house in San Francisco Gotera Jurisdiction, Morazán, who had deserted from the detachment seven months before. The unit reportedl killed him by shooting him in the back and dragged his body to the doorway of a local hospital. According to his sister, the unit then returned to his house to say that his body had been found at the hospital, and asked who had killed him.[32]

While Carillo was Commander of Military Detachment 4 on February 25, 1988, troops from the detachment reportedly seized a 25-year old leader of a cooperative in his home during the night and also picked up a man, 18, and a boy, 16, in Tepemechín, Morazán. According to witnesses, in the morning the troops tortured the three and forced them to run through a burning field with no shoes. The witnesses later heard gunfire and saw helicopters called in to simulate a skirmish, even though no contact had been made with rebel troops. Two of the captives were found dead with their ears, nose and thumbs cut off. The third was never found.[33]

While Carrillo was Commander of Military Detachment 4 on June 9, 1988, troops from the detachment reportedly sought a man, 40, at his house in Meanguera, Morazán, and then continued on to his workplace, and found him there. Family members who had come to find him at his workplace after the search of his house heard a burst of gunfire, followed by the detonation of a grenade. His body was found in pieces scattered throughout the area.[34]

While Carillo was Director General of the National Guard on November 16, 1989, Guard troops reportedly arrested an American English Teacher, 36, at his home in San Salvador, and beat him at National Guard headquarters. When his head began to bleed after he was reportedly slammed against a wall during interrogation, the troops claimed he had been wounded in combat. He was released the next day.[35]

NATIONAL POLICE DIRECTOR: DIONISIO ISMAEL MACHUCA

*Key Assignments*

1981: Manager, State Telephone Company.
1983: Assistant Chief of Operations (D-III), Joint General Staff.
1984: Student, U.S. Army School of the Americas, Joint Operations Course.
1988: Student, U.S.-run Inter-American Defense College (June); Director, Treasury Police (7/88-11/88); Director, National Intelligence (11/88-9/89).
1989: Director, National Police (10/89 to the present).

*Profile*

Machuca graduated second in the Tandona out of 47, behind Col. Ponce. He has a reputation for financial honesty, and the U.S. Embassy reportedly once identified him as a suitable treasurer for the military. It appears that he has had few combat assignments, although this cannot be confirmed from the listing of assignments provided by the Government of El Salvador and the Departments provided by the Government of El Salvador and the Department of Defense, since unlike other listings, it provides no information on assignments between 1984 and 1988.

While Machuca's stature in the Tandona is indicated by his presence on the Honor Board that reviewed culpability for the Jesuits case, he is not considered one of its leading members. A number of sources describe him as a deeply religious man who led a group prayer at San Salvador's military headquarters during the November, 1989, offensive.

*Reported human rights abuses by troops under his command*

While Machuca was Director of the Treasury Police, on July 12, 1988, the former head of the Social Security Workers' Union and two acquaintances walking with him reportedly were forced into his car near San Salvador by three armed men in civilian clothes. Treasury Police in civilian clothes returned to the scene a few hours later and told relatives of one of the other men that he would reappear, since they had been after the former secretary only. The other men were released along a highway that night. After the former union chief was reportedly seen alive inside Treasury Police headquarters, the union, which has a history of confrontation with security forces, staged a march on the headquarters to demand his release. He has never been seen again.[36]

While Machuca was Director of the National Police on November 8, 1989, a 23-year old student disappeared in San Salvador. On November 19, National Police reportedly took him as a prisoner to a hospital, where he was diagnosed as having severe head and stomach injuries about three days old. He died on November 25.[37]

While Machuca was Director of the National Police on November 15, 1989, uniformed soldiers of the National Police reportedly raided the San Salvador office of the Committee of Mothers of the Disappeared, Murdered and Political Prisoners, and seized and beat two U.S. citizens and seven Salvadorans. The police reportedly forced them to pose for photographs in front of an FMLN flag and forced two, including one of the Americans, to put on rebel camouflage uniforms for the photographs. The group was then taken to Treasury Police headquarters, where one of the Americans, a 41-year old woman, was reportedly beaten and sexually molested while blindfolded and handcuffed, and finally released two days later on the condition that she leave the country.[38]

TREASURY POLICE DIRECTOR: COL. CIRO LOPEZ ROQUE

*Key Assignments*

1971: Student, U.S. Army School of the Americas, Joint Operations Course.

1979: Major at National Guard Headquarters.

1980: Unit Commander, National Guard.

1981: Executive Officer, Transmissions School and Palace Guard (CITFA).

1982: Commander, 1st National Guard District.

1983: Student, U.S. Army School of the Americas, Communications Officer Course; Executive Officer, Cavalary Regiment.

1984: Commander, Transmissions School and Palace Guard (CITFA) (6/84-8/86).

1986: Commander, Military Detachment 3 (9/86-7/88).

1988: Commander, 4th Brigade (7/88-2/90).

1990: Director General, Treasury Police (2/90 to the present).

*Profile*

Lopez graduated 33rd out of 47 in the Tandona, and is not regarded as a top combat commander. Like Col. Rubio, he commanded the 4th Brigade headquarters at El Paraiso when it was badly damaged during an attack by the FMLN. Unlike most of the primary commanders from the Tandona, he had combat commands as a junior officer not in the Army but in the less-respected National Guard. However, since leaving the command of the transmissions instruction center (also a low-status position) in 1986, he has had important combat postings.

*Reported human rights abuses by troops under his command*

While Lopez was Commander of the 1st National Guard District (which covers San Salvador) on April 7, 1982, a man, 36, was reportedly captured by the National Guard in San Salvador, and hanged.[39]

While Lopez was Commander of Military Detachment 3 on May 21, 1987, soldiers from the detachment reportedly captured a man, 23, and during the next 12 days made him put on the detachment's uniform and walk in front of a combat unit on patrol. On June 2, he returned to his home, but was reportedly taken away again in the evening by soldiers from the detachment. His body was found the next day with a bullet through the neck. The Armed Forces' press office said he had been assassinated by the FMLN.[40]

While Lopez was Commander of the 4th Brigade on August 3, 1988, soldiers from the brigade in search of a fleeing guerrilla reportedly entered a house of a foreign religious worker in San Francisco Morazán, Chalatenango. According to witnesses, the soldiers began shooting at random, killing a 99-year old man and his 50-year old mentally handicapped daughter. No rebel was found in the house.

COMMANDER, AIR FORCE: GEN. RAFAEL ANTONIO VILLAMARIONA

*Key Assignments*

1963: Student, U.S. Army Counterinsurgency Course, San Salvador.

1971: Student, U.S. Air Force Base, Maxwell, Alabama (to 1972).

1977: Student, U.S.-run Inter-American Defense College (to 1978).

1979: Commanding officer, fighter squadron.

1979: Student, three-month political warfare course, Taiwan.

1983: Student, U.S. Army School of the Americas, Joint Operations Course: promoted to Colonel.

1984 Vice Commander of the Air Force (12/84-12/89).

1988 Promoted to Brigadier General (12/88).

1990 Commander of the Air Force (⅑0 to the present).

*Profile*

Gen. Villamariona is characterized by many sources as a weak player in the Salvadoran military, and certainly not on a par with his predecessor Gen. Bustillo, who ran the Air Force almost as a personal fiefdom for a decade befo' accepting the largely honorary position of military attaché to Israel and Europe. However, most sources also agree that Villamariona is seen as a "Bustillo guy" who continues to report informally to Bustillo (who has chosen to stay in El Salvador, despite his new assignment) and so enjoys the benefit of the considerable power Bustillo still wields.

Due to his rank, Villamariona was made the nominal head of the Honor Board of the Armed Forces that met in Janaury, 1990, after President Cristiani announced that military personnel were the prime suspects in the case of the Jesuits. The board's workings remain a mystery, as no documents have been provided to the judicial system explaining how it named nine officers and soldiers for charging in the case out of some 50 suspects.[42]

As Vice Commander, Villamariona was Bustillo's top operations assistant during a period of numerous allegations of bombing of civilian areas and the operation of a contra supply operation at the Air Force base, using fuel provided by U.S. military aid. He is a classmate of Minister of Defense Larios and so is much older than other commanders. In general, it takes longer to rise to top command in the Air Force than in the Army.

As it appears to be widely assumed that Villamariona will not serve long as commander, officers who have been mentioned as possible replacements for him are listed here: Commander of Comalapa Airbase Col. Galileo Conde Vásquez, Air Force School Commander Manfredo E. Koeningsberg Cubías, Vice Commander Col. Héctor Leonel Lobo Pérez and Comalapa Airbase Vice Commander Lt. Col. Martínez Varela. None of these officers are members of the Tandona; its only Air Force officer, Freddy Roberto Ascensio, died in a plane crash.

Points of interest about three of these possible replacements include: Koeningsberg directed security forces for the Air Force in the early 1980's that some allege to have been death squads, and has been the subject of allegations of drug-smuggling; when he served as Air Force attaché in Washington, Lobo reportedly assisted Oliver North with contra supply operations being run out of El Salvador's main air base and travelled with North to the region; and Varela is credited with orchestrating an Air Force "work stoppage" to protest President Cristiani's failure to appoint Gen. Bustillo Minister of Defense.

*Reported human rights abuses by troops under his command*

While Villamariona was Vice Commander of the Air Force on August 6, 1985, the village of El Ocotal, Chalatenango, was reportedly bombed by Air Force jets, and three people were killed. The Air Force eventually acknowledged that it had made a mistake, with Commander Gen. Juan Rafael Bustillo saying: "We're all human."[43]

While Villamariona was Vice Commander of the Air Force on January 22, 1987, seven civilians reportedly died in aerial bombardment of the town of San Diego, San Miguel.[44]

While Villamariona was Vice Commander of the Air Force on March 7 and 8, 1989, indiscriminate air attacks were reported in a number of communities and farms in the departments of San Miguel and Morazán. On March 8, five people were reported killed, including four children, in the Torola Jurisdiction of Morazán.[45]

While Villamariona was Vice Commander of the Air Force on April 15, 1989, Air Force soldiers reportedly captured, tortured and then killed a french nurse, an Argentinian doctor, a paramedic, a teacher and a wounded combatant at an FMLN field hospital in San Ildefonso, San Vincente. A French doctor who performed an autopsy concluded that the nurse probably had also been raped. The Armed Forces' press office included the five on a list of nine armed rebels who died in combat that day.[46]

During Villamariona's current tenure as Commander of the Air Force, five villagers (including four children) reportedly were killed and 16 wounded when a house was rocketed on February 11, 1990, in the village of Corral de Piedra, Chalatenango, after rebels retreated through the village. The Armed Forces initially barred reporters and human rights monitors from the scene and claimed in the press that rebel "catapults" had destroyed the house. After contrary ac-

counts appeared in the press, the Air Force eventually acknowledged that government aircraft had rocketed the house, but took no steps to discipline the pilot, even though the attack would appear to violate the Air Force's own guidelines.[47]

COMMANDER, 1ST BRIGADE: COL. FRANCISCO ELENA FUENTES

*Key Assignments*

1969: Student, U.S. Army School of the Americas, Unconventional Warfare School.

1983: Executive Officer, 4th Brigade; Executive Officer, 6th Brigade.

1984: Executive Officer, Cavalry Brigade.

1985: Student, U.S. Army School of the Americas (through 7/86).

1986: Chief of Psychological Operations (C-5), General Staff of the High Command (8/86-7/88).

1988: Commander, Military Detachment 3 (7/88-6/89).

1989: Commander, 1st Brigade (6/89 to the present).

*Profile*

Elena Fuentes is recognized as a top leader of the Tandona, and is almost certainly one of the Compadres. The 1st Brigade is the most important combat post in the country, because it has responsibility for the capital. No officer is likely to be given the command unless he is trusted by his fellow officers, both for political judgment and military skill. He is considered an aggressive commander with hard-line views about civilians thought to be sympathetic to the rebels, and is seen by many as a protégé of the man he replaced as commander of the 1st Brigade, Col. Zepeda.

Elena Fuentes' power in the Tandona does not mean that he will continue to be promoted automatically. Non-governmental sources report that recent abuses of human rights at the 1st Brigade, and in particular his initial attempt to deny the killings at Tres Ceibas, have become an issue with the U.S. Embassy and may preclude him from becoming Chief of Staff or a Vice Minister of Defense. However, given his reported popularity with both his troops and the Tandona, he will be difficult to deny.

*Reported human rights abuses by troops under his command*

While Elena Fuentes was Commander of the 1st Brigade in July, 1989, he reportedly provided inaccurate information on the murder by soldiers of the brigade of two men from the village of Tres Ceibas on the outskirts of San Salvador, claiming that they had died falling out of a truck. It was later confirmed that one had been beaten to death in the field and one had been beaten in brigade headquarters for over a week in which he was denied transfer to a hospital and humanitarian agencies where denied access to him despite repeated requests. A deserter from the brigade has now been charged with both killings, although he apparently did not participate in the beatings in the headquarters or the decision to hold the man past the 72-hour legal limit and deny him medical care.[48]

While Elena Fuentes was Commander of the 1st Brigade in November 1989, during the FMLN offensive in San Salvador, a 17-year-old boy who had been digging trenches for the FMLN and a health worker in a church were seized by soldiers from the brigade in separate incidents. At present, the brigade is denying it has either one, although witnesses say they either were in custody with them or visited them in custody shortly after their capture.[49]

COMMANDER, 2ND BRIGADE: COL. JOSÉ HUMBERTO GÓMEZ

*Key Assignments*

1979: Executive Officer, 5th Infantry, National Guard, San Miguel (1979-80).

1982: Promoted to Lieutenant Colonel (12/82).

1983: Sub-Director, National Guard (1983-85).

1986: Commander, Belloso Elite Battalion (2/86-6/87).

1987: Commander, 4th Brigade.

1988: Director General, National Guard (7/88-6/89).

1989: Commander, 2nd Brigade (6/89 to the present).

*Profile*

Gómez graduated 42nd out of 47 in the Tandona. His brigade assignment is in an area of limited combat. He is not seen as much of a power in the class, and has spent much of his command career in the National Guard, a force which is held in lower regard than the regular armed forces, such as brigades.

*Reported human rights abuses by troops under his command*

While Gómez was Sub-Director of the National Guard in April 1985, a doctor who the military accused of treating rebels was reportedly seized at his house by the National Guard and held for 17 days. He reported that he was stripped naked, blindfolded and interrogated without sleep throughout this period, and that he was subjected to mock executions, beatings and hanging from the ceiling by his thumbs. He was hidden from representatives of the International Committee of the Red Cross—in violation of an agreement between the ICRC and the Salvadoran Government—when they asked to examine him on two occasions during his captivity.[50]

While Gómez was Commander of the Belloso Elite Battalion on June 8, 1987, soldiers of the Belloso Battalion reportedly killed four wounded FMLN combatants in San Fernando, Chalatenango. Two FMLN health workers who witnessed the executions had been carrying the wounded to safety when the soldiers encountered them. Although the victims reportedly identified themselves as wounded and unarmed, the soldiers shot them anyway. According to the witnesses, when one soldier kicked a victim to see if he was dead and noticed that he was not, the soldier shot them all again.[51]

While Gómez was Commander of the Belloso Elite Battalion on June 13, 1987, soldiers of that battalion and the 4th Brigade reportedly stabbed in the throat and left for dead four unarmed men they had seized for questioning in Plan Verde, Chalatenango. The soldiers reportedly had taken the men from their homes or while walking on the road and interrogated them prior to the attempted murders. The men survived to tell of their treatment, but the Army denied any involvement. Two of the men's wives reported being raped.[52]

While Gómez was Commander of the 2nd Brigade in July and August, 1989, four persons connected with the Santa Ana campus of the National University disappeared, including two students a professor and a union activist. Most were reportedly held for periods of over a month by the 2nd Brigade, and reappeared in late August after an international campaign was mounted on their behalf. Two claimed that they had been tortured and threatened with death. Gómez denied responsibility for the disappearances.[53]

While Gómez was Commander of the 2nd Brigade during the FMLN Offensive in November 1989, soldiers from the brigade reportedly summarily executed at least five and possibly as many as nine people after they were captured in La Unión, Santa Ana. Witnesses reported that some of the victims were wounded or captured guerrillas, and that others were civilians who were assisting the guerrillas in non-combat roles. Investigations showed that several of the victims were shot at close range. One witness testified that she heard a corporal say, "Why should we let these people live? If we let them live, they'll be put in prison and the human rights (groups) will let them out." [54]

COMMANDER, 3RD BRIGADE: COL. MAURICIO ERNESTO VARGAS

*Key Assignments*

1970: Student, U.S. Army School of the Americas, Operations Basic Course.

1980: Assistant Chief of Psychological Operations (D-5), Joint General Staff.

1981: Commander, 1st Infantry Battalion, 2nd Brigade.

1982: Student, U.S. Army School of the Americans, Joint Operations Course.

1983: Instructor, U.S. Army School of the Americas (1983-84).

1984: Commander, Atonal Elite Battalion (7/84-9/85).

1985: Commander, Military Detachment 4 (9/85-6/87); promoted to Colonel (12/86).

1987: Chief of Operations (C-3), Joint General Staff (6/87-10/88).

1988: Commander, 3rd Brigade (11/8 to the present).

*Profile*

Vargas holds one of the most important combat commands, and has served an unusually long time in it, indicating that he is trusted as a commander by his fellow Tandodna members. Another indication of their confidence in him is that he held the key coordinating position of chief of operations (C-3) on the general staff.

There have been tensions between him and other commanders and government officials, though, because of his membership in the centrist Christian Democratic party, of which his father was a founder. Most top commanders are either identified with the ruling rightist ARENA party or with no political party.

Perhaps as a result of his affiliation, Vargas has been criticized by other officiers for being too eager to promote a settlement with the FMLN. He countered these criticisms somewhat by taking a public "Hard line'; on the issue of dialogue in 1989, and he has represented the military in the government's dialogue with the FMLN.

Vargas appears to have been the choice of Col. Ponce for the position of Vice Minister of Defense, but that post went to ARENA supporter Col. Zepeda. His current position as a brigade commander for the eastern provinces is seen by some as a "golden exile" that ARENA supports because it removes him somewhat from Tandona politics. He could be considered again for a higher position if Ponce becomes Minister of Defense.

Vargas has a reputation as a charismatic leader with good rapport with his soldiers, and as a tough commander with a hot temper. His troops in Military Detachment 3 reportedly carried out a "scorched earth" policy in Morazán in 1986, burning fields and relocating civilians in order to weaken the FMLN. He told reporters that burnings were not the Army's policy, and were in fact accidential: "There are hot, self-combustible

minerals in the earth. The fires start themselves." [55]

He also blocked shipments of food into the region during that period, permitting residents to carry in only subsistence levels. One resident told Tutela Legal: "Colonel Mauricio Vargas told us that we definitely cannot bring more than a pound of sugar because that was sufficient for a family, and that if we wanted to bring more, it is because we want it for the guerrillas." [56]

*Reported human rights abuses by troops under his command*

While Vargas was Commander of Military Detachment 4 in May, 1986, troops of the detachment's Morazan battalion reportedly captured and executed a farmer, 29, on his way home in Cacaopera, Morazan, after an accidental firefight between two of the battalion's units that each thought the other was a group of guerrillas. His body was found later with a bullet would in the back of the head and his identification card missing.[57]

While Vargas was Commander of Military Detachment 4 on December 15, 1986, a teacher, 50, was reportedly shot to death by soldiers from the detachment in San Francisco Gotera, Morazan while they were questioning him in the street. The victim was seen arguing with the soldiers just prior to the shooting.[58]

While Vargas was Commander of Military Detachment 4 in May, 1987, soldiers of the detachment's Morazan battalion reportedly shot to death a woman, 35, who had gone down to a well to bathe. According to her mother, the soldiers said they had made a "mistake" and ordered her to bury the woman immediately. The body showed several bullet wounds.[59]

While Vargas was Commander of the 3rd Brigade on September 15, 1989, an officer of an employee association was reportedly handed over to the 3rd Brigade after his capture by the Cavalry Regiment. The victim testified that during his six-day interrogation he was beaten, tortured by having a plastic hood placed over his head to induce suffocation, burned with matches and threatened with death. A death threat against the victim had been issued over the radio by the death squad "ARDE" a week earlier.[60]

COMMANDER, 4TH BRIGADE: COL. ROBERTO PINEDA GUERRA

*Key Assignments*

1967: Student, U.S. Army School of the Americas, Cadet and Basic Combat Army courses.

1982: Assigned to Military Detachment 5.

1989: Director, National Intelligence School; Executive Officer, Military Detachment 4.

1990: Commander, Military Detachment 5 (12/89–2/90).

1990: Commander, 4th Brigade (3/90 to the present).

*Profile*

Pineda is the only one of the six brigade commanders not to be a member of the Tandona, and seems to have had less command experience than the rest of the officers in primary commands. Having graduated from the Military Academy one year after the *Tandona* class, he is rumored to be one of the leaders of the group of younger colonels who have been frustrated by the *Tandona*'s control of the top positions in the military, which has stalled the rise of these younger colonels into important commands.

*Reported human rights abuses by troops under his command*

No reports were found of abuses by forces under his command.

COMMANDER, 5TH BRIGADE: COL. JOSÉ EMILIO CHÁVEZ CÁCERES

*Key Assignments*

1974: Student, U.S. Army School of the Americas, Courses in Urban Warfare, Counterinsurgency and Military Intelligence.

1980: Assigned to Department IV (logistics), National Police; assigned to Department I (Personnel), National Police.

1981: Chief of Police, National Police, Santa Ana Department.

1982: Chief of Police, National Police, San Miguel Department; promoted to lieutenant colonel (12/82).

1984: Executive Officer, 6th Brigade (2/84–8/84).

1985: Commander, Bracamonte Elite Battalion (8/84–12/85).

1986: Commander, Military Detachment 7.

1988: Commander, 5th Brigade (7/88 to the present).

*Profile*

Chávez Cáceres is a member of the *Tandona*, but is not seen as a major power in the class. Several people interviewed said that his role in what appeared to be an attempt to cover up the San Sebastián massacre had enraged the U.S. Embassy, and may have hurt his chances for new assignments. Chávez Cáceres is seen as a commander who acts harshly toward civilians suspected of sympathizing with the FMLN, and one former Salvadoran officer warned upon hearing his name: "May God guard you from him."

*Reported human rights abuses by troops under his command*

While Chávez Cáceres was Commander of the Fifth Brigade on September 21, 1988, soldiers of the Jiboa Battalion of the 5th Brigade reportedly assassinated ten civilians in San Sebastian, San Vicente. Villagers were rounded up and individuals were selected from a list and led away. According to testimony of soldiers participating in the operation, a firefight was faked to hide the cause of death. Exhumation of the bodies revealed that several had bullet holes in the head, as if they had been executed. Chávez Cáceres told the press that the ten victims died in a guerrilla ambush, and that the guerrillas returned to the scene later that night and mutilated the bodies to make them appear as if they had been shot at close range. Following intense pressure from the U.S. Embassy, the Army acknowledged that the massacre had in fact been committed by its troops, and 11 were arrested. In February 1990, the charges against all of the arrested except a major and a corporal were dropped.[61]

While Chávez Cáceres was Commander of the Fifth Brigade on June 20, 1989, troops from the brigade reportedly captured a farmer, 19, as he was walking to work in San Sebastián, San Vicente, and took him to headquarters. He testified later that during virtually his entire six-day detention he was blindfolded and handcuffed, and that he was subjected to beatings, having his head held under water to simulate drowning, having a plastic hood placed over his head to induce suffocation, and electric shocks.[62]

COMMANDER, 6TH BRIGADE: COL. HÉCTOR HERIBERTO HERNÁNDEZ MARTINEZ

*Key Assignments*

1979: Chief, Department I (Personnel), National Police.

1982: Promoted to Lieutenant Colonel (12/82).

1983: Chief of Logistics (S-4), Joint Task Force for Operations in San Vicente (6/3–11/83); graduated from the Command and General Staff Course (11/83).

1984: Assigned to Military Detachment 2, Cabañas Department.

1985: Executive Officer, 1st Brigade.

1986: Commander, Bracamonte Elite Battalion (1/86–6/87).

1987: Commander, Military Detachment 2 (6/87–10/88).

1988: Director, Treasury Police (11/88–2/90).

1990: Commander, 6th Brigade (3/90 to the present).

*Profile*

According to non-governmental sources, repeated reports of abuse at the Trasury Police while Hernández was Director, including a number involving Americans, resulted in demands by the U.S. Embassy that he be removed from active duty. His transfer to a brigade command therefore "a real disapointment to the Embassy."

Hernández graduated 36th of 47 in the Tandona, and is not seen a key player in the class. He has reportedly received Taiwanese training, as many Salvadoran officers have, but this does not appear on the list of assignments and foreign training provided by the Department of Defense.

According to a number of people interviewed, a possible example of the use of "ghost soldiers" by Hernández was revealed during the November 1989, offensive: former Col. Sigifredo Ochoa had reportedly paid the Treasury Police to prepare a unit to protect the state power facilities he was managing, but when he called for the unit during the offensive he was told that it was not available, leading to speculation that it did not actually exist.

*Reported human rights abuses by troops under his command*

While Hernández was Director of the Treasury Police in May, 1989, a woman was reportedly captured by four armed men on her way to work in San Salvador and taken to Treasury Police headquarters. According to her testimony, she was handcuffed and blindfolded for three days and hung up by her handcuffs, with her hands in back, "like a piñata," beaten, drugged and tortured with a plastic hood that induces suffocation.[63]

While Hernández was Director of the Treasury Police on August 5, 1989, a former union leader was reportedly seized by police in Planes de Renderos, just outside of San Salvador, and taken to Treasury Police headquarters. According to his testimony, during his four-day detention he was stripped naked, beaten and tortured with a plastic hood that induces suffocation. He said that the police threatened to cut his fingers off unless he confessed to their accusations.[64] Nearly identical treatment was reportedly accorded to a union official arrested on September 8 in San Salvador.[65]

While Hernández was Director of the Treasury Police on November 15 and 16, 1989, two U.S. citizens and seven Salvadorans were reportedly transferred to the Treasury Police after their arrest at the San Salvador office of the Committee of Mothers of the Disappeared, Murdered and Political Prisoners. Both Americans reported being beaten during their detention at Treasury Police headquarters, and one claimed she was sexually molested while handcuffed and blindfolded. Also, in a sepa-

rate incident in the same period, another American citizen reported being handcuffed, blindfolded and beaten while in the custody of the Treasury Police.[66]

While Hernández was Director of the Treasury Police on November 16, 1989, Treasury Police reportedly detained a French citizen and tortured him after a paraffin test came back positive, indicating contact with gunpowder. Other detainees in custody at the time claimed that they heard him screaming in response to being beaten and tortured.[67]

While Hernández was Director of the Treasury Police on November 20, 1989, seven foreigners, including one U.S. citizen, were reportedly transferred to Treasury Police headquarters after their arrest by the National Guard. They were reportedly beaten, and the American said she was hit in the head and threatened by having a knife pulled across her throat.[68]

## STOP TAXING AWAY THE AMERICAN DREAM

● Mr. KASTEN. Mr. President, all over the world—from Eastern Europe to Central America to the Baltic States—people are freeing themselves from the shackles of oppressive government to pursue the kind of freedom, economic opportunity and family prosperity exemplified by what we call the "American Dream."

But here in Congress, we have made it harder for American families to pursue that dream. Our Federal estate tax laws punish those who build a business that they can leave to their family and children.

When the owner of a small business dies, his heirs must raise the necessary cash to pay estate taxes. In many cases, the heirs are forced to sell the family business just to pay the State tax, which rises to a maximum of 55 percent.

Moreover, high estate taxes reduce the productivity of small business. The time, money and effort that are spent on minimizing the estate tax burden could be better spent on maximizing productivity, efficiency and competitiveness.

Family businesses are the source of America's economic growth and entrepreneurial spirit. At a time when America is locked in a life-or-death competitive struggle with foreign economic rivals, we cannot afford to handicap this essential competitive resource.

For starters, we should repeal section 2036(c)—commonly referred to as the "antiestate freeze rule." Section 2036(c) forecloses one of the few methods available to family owned businesses to minimize the deleterious impact of the estate tax.

The estate freeze rule is a method used by owners of family businesses to transfer their business to their children. Traditionally, parents were allowed to freeze the value of their interest in a business and transfer the future growth to their children. This method lessened the estate tax burden when the parent died.

In an effort to end abuses of the estate freeze, Congress enacted section 2036(c) in the 1987 reconciliation bill. But section 2036(c) is so broad that it affects an alarming number of family business transfers. As a result: The cost of transferring a family business from one generation to the next has increased dramatically; the confusion and uncertainty have caused legitimate estate plans and family transfers to grind to a halt; common family transfer methods now result in punitive taxes. In many cases, heirs are forced to sell the family business just to pay the estate taxes.

Let me cite an example given to me by the U.S. Chamber of Commerce. John Smith of Wisconsin founded a widget business in 1955. John's business is now worth $2 million. John wishes to retire and transfer operation and ownership to his kids.

If section 2036(c) had not been enacted, John could have used an estate freeze. That would have froze the value of his interest in the business and transferred the future growth to his kids.

Eight years later, John passes away with the family widget business valued at $4 million. His wife dies shortly thereafter.

With the use of an estate freeze, the tax bill would only be $320,000. Without the estate freeze, as is now the case with 2036(c), the potential tax liability is $1,300,000.

Under this scenario, John's kids have to sell the business just to pay the tax!

Hard working parents who built a family business from scratch may be denied their greatest reward—passing it on to their children. In effect, section 2036(c) makes it easier to transfer a family business to a stranger than to one's own children.

Mr. President, the events surrounding section 2036(c) are strikingly similar to the onerous section 89 nondiscrimination rules.

Like section 89, section 2036(c) is overkill. It presumes that every family business owner in America is guilty of abusing the estate freeze rules.

Like section 89, this provision was passed in the dead of night without hearings or debate.

Like section 89, the Ways and Means Committee and the Treasury Department want to reform—not repeal—section 2036(c). In my view, the Ways and Means reform plan is still complex and unworkable. Instead of saving section 2036(c), we ought to repeal it outright.

And like section 89, outright repeal of this onerous tax provision is the best solution. The perceived abuse that prompted section 2036(c) should be resolved by the courts.

I would like to put the tax-writing committees on notice. Unless this issue is resolved to the satisfaction of the small business community, I will bring this issue to a vote right here on the Senate floor.

Today, 36 Senators and 228 Members of the House have cosponsored bills to repeal 2036(c). I think we have the votes for repeal. And I look forward to working with the leaders of the repeal movement including Senators DASCHLE, SYMMS, and HEFLIN to get big government off the backs of family businesses.

Mr. President, we must stop taxing family businesses out of business. In addition to repealing section 2036(c), we ought to reduce the estate tax burden for family businesses that are passed on and continue to be operated by the next generation. In this regard, Congress should consider legislation to increase the $600,000 unified tax credit to $2 million for small business men and women who pass along their life's work to their children.

These small businesses—ranging from family farms to family restaurants—are a vital component of our Nation's economy. Family businesses are the true essence of the "American Dream." They are the source of our economy's creativity and ingenuity.

The Federal Government should provide incentives—not disincentives—for hard-working entrepreneurs who build a business that they can give to their children. So let us repeal section 2036(c) and reduce the estate tax burden on family businesses. Our economic future depends on it.

I yield the floor.●

## A RURAL MENTAL HEALTH FIELD HEARING IN MARSHALL, MN

● Mr. DURENBERGER. Mr. President, I want to take a few moments today to publicly commend the efforts of the National Advisory Mental Health Council [NAMHC] and the National Mental Health Leadership Forum [Forum] to bring national attention to the mental health crisis facing rural America. The NAMHC is a 12-member body consisting of experts in the field of health, science, and public policy. The Forum is made up of 20 national, professional, scientific, and consumer organizations representing about 1½ million members who are concerned with the major mental health issues facing this Nation. Both of these bodies are comprised of people who are leaders, experts, and innovators in the field of mental health.

In early April, these two groups sponsored a field hearing at Southwest State University in Marshall, MN. I am very pleased that these groups selected Minnesota for this hearing. The purpose of the hearing was to expose the rapidly rising incidence of mental

illness in rural America. During this conference, Forum and Council members heard testimony from four different panels on four topics. The topics covered: The indigenous qualities of rural life which contributes to mental health problems; the alarming increase in rural suicides—especially in the young; the stigma associated with mental illness and its impact on access to care in rural areas; and depression, which is frequently a result of economic uncertainty and hardship in rural areas.

Mr. President, I spent a lot of time at the Marshall hearing listening to experts, rural advocates, family members, and victims of mental illness as they described the mental health problems confronting our farm families. I learned about the steady rise in the incidence of diagnosable despression since the mid-1980's, increases in family violence, suicide, child and spouse abuse, and excessive use of alcohol and other drugs. These are critical problems, compouned by the lack of readily accessible mental health services for a large proportion of the rural population, particularly the elderly for whom long travel is difficult or impossible. As noted by Dr. Lewis Judd, Director of the National Institute of Mental Health, "the gap between capacity and need is growing." Add to that the pervasive rural attitude of fierce independence and pride—a pride which often dictates a "go-it-alone" course of action—and it is not surprising that the rate of mental health problems among farmers is so high.

These hearings were successful because they brought to light a problem that can no longer be ignored. However, we should not declare victory just because we have increased awareness of a problem for one segment of our society. The next step is for us to expand upon the treatment opportunities that currently exist as a result of past accomplishments in basic and clinical brain research. This will benefit all Americans. Mr. President, what we know about the brain today is truly remarkable, and what we can know within the next few years is even more astounding. We can actually anticipate a time when we will more fully understand the normal functioning of the human brain, and thus be able to understand, and even anticipate, its biological dysfunction. This cognate of knowledge, in turn, would offer the real hope of intervening in the disease process to prevent mental illness.

In order to realize these possibilities, we must fully implement the research and the research-based service demonstration projects described in the National Institute of Mental Health's National Plan for Research on Schizophrenia and the Brain. In addition, it is also important that we implement the NAMHC's recent report, entitled a National Plan for Research on Child and Adolescent Disorders. This report, done at the request of the House and Senate Appropriations Committees, follows on a study done by the Institute of Medicine [IOM] on the status of the research knowledge and mental health services available to children. IOM found that "No field has a greater or more pressing need * * * than child and adolescent mental health. * * * " It is alarming to me that at least 12 percent of children under the age of 18 in the United States—approximately 7.5 million—suffer from a diagnosable mental disorder. I am sure that the mental health problems which affect many farm families also have considerable impact on the children of those families—even beyond the rising rates of teenage suicide. Besides being a terrible emotional burden for these children and their families, childhood mental illness also takes a tremendous toll on our national economy. Direct expenditures for medical treatment, and the costs of special programs in public schools, family welfare services, and the juvenile court system are estimated to cost billions of dollars annually. Mr. President, a small investment in our children's mental health will return a lifetime of benefits.

In closing, NAMHC/Forum efforts provide a new and needed approach to address a problem that has been going on for too long in rural America. But we must not stop here. It is up to us in the Congress to provide support for the research, services, education, and social supports that are needed to improve mental health. The efforts of groups like the NAMHC and the Forum, taken together with our steady support for programs conducted through the National Institute of Mental Health, will surely prevent mental illness from unnecessarily impairing more lives in America's heartland.●

## STATEMENT ON THE NOMINATION OF RICHARD G. AUSTIN

● Mr. CHAFEE. Mr. President, today I rise to note the Senate's action last Friday to confirm Mr. Richard G. Austin to be Administrator of the General Services Administration [GSA].

As you know, Dick Austin has had a long and distinguished career with GSA. From 1986-88, he served as regional administrator in Chicago, IL. In 1988, Mr. Austin was appointed Deputy Administrator and has served as Acting Administrator of the General Services Administration since September 1988.

As the ranking Republican member of the Committee on Environment and Public Works, I have had several firsthand opportunities to speak with Dick Austin on Federal space issues. Whether it was dealing with the need for new headquarters space for the Environmental Protection Agency or the renovation of the historic courthouse in old San Juan, I have always found Dick Austin and his staff to be well-informed, receptive to suggestion and responsive.

Dick Austin shares my concern with regard to the Federal Government's spiralling lease costs and the need to commit Federal dollars for building construction. I am pleased that the Senate has confirmed a man with experience and foresight in the area of public buildings administration to deal with these issues.

I supported the confirmation of Mr. Richard G. Austin to be Administrator of the General Services Administration and look forward to working with him in the future.●

## VOLUNTEERISM IN EAGAN, MN

● Mr. BOSCHWITZ. Mr. President, I rise today to call attention to volunteerism in Eagan, MN, and to applaud the tireless efforts of one particular volunteer, the late Michael M. Thomas.

As a community-spirited citizen in his hometown of Eagan, Michael offered his services to advance many social causes. Setting a fine example for others, he served on the Eagan Volunteer Fire Department for 9 years. In recognition for his fine leadership qualities and sense of commitment, he achieved lieutenant status.

However, his dedication to the good people of Minnesota extended far beyond his valuable contribution of time and concern at the fire department. For example, Michael served as a member of the Eagan Advisory Park and Recreation Committee. It was there that he promoted Minnesota's own natural beauty and fostered responsible economic development—all for the enjoyment of others in his community.

Michael's fine example is precisely what President Bush often refers to as "1,000 Points of Light." It is giving individuals like Michael who embody in themselves and thereby instill in others the purest spirit of volunteerism in America today.

Leaving his wife, seven children and three grandchildren, Michael's efforts and dedication will not be forgotten. In fact, his legacy will grow and beautify the environment for the citizens of Eagan, MN. This week, a tree will be planted in memory of this great volunteer at the fire station where he gave so much of his time and energy. Appropriately, Michael's fine example of dedication, concern, and commitment will live forever.●

## EMPLOYER-ASSISTED HOUSING

● Mr. LAUTENBERG. Mr. President, this country is facing a housing crisis of severe proportions. Too few Americans can afford a home of their own, too many people must live in substandard conditions, and far too many are completely homeless.

It is time to make housing a priority again. That means providing resources to develop affordable housing and reversing the terrible funding reductions that housing programs have suffered over the past decade. But it also means looking for new and innovative approaches to addressing the housing problem.

One particularly promising approach is employer-assisted housing. Congress already recognized the potential of this approach when we amended the Taft-Hartley Act to allow creation of housing trust funds. Yet there is much more that can be done to encourage employers and employees to work together to meet housing needs.

A leading advocate of employer-assisted housing is a good friend of mine, Assemblyman David Schwartz of New Jersey. Assemblyman Schwartz—known to many in New Jersey as "Mr. Housing"—has devoted his considerable talent and energy to promoting this concept, and his efforts already are paying off. Increasingly, employers and workers are finding that it is in their common interests—and the community's interest generally—to develop employer-assisted housing plans.

Assemblyman Schwartz has convinced me that we need to do more to help businesses and workers develop such plans. That's why I am working with Senator CRANSTON in an effort to include in omnibus housing legislation a provision that would authorize HUD to provide technical assistance to employers and workers who seek to establish employer-assisted housing programs. I think such assistance could prove a cost-effective way for the Federal Government to help meet housing needs.

Mr. President, a recent article by Neal Peirce in the National Journal provides a good overview of the employer-assisted housing concept. I ask unanimous consent that it be printed in the RECORD so that my colleagues can become familiar with this exciting new approach to housing.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the National Journal, May 19, 1990]

STATE OF THE STATES: A CRUSADE FOR EMPLOYER-AIDED HOUSING

(By Neal R. Peirce)

New Jersey Assemblyman David Schwartz describes himself as "possessed" with an idea he believes may revolutionize housing in America: Why not let employers offer housing as a fringe benefit, just health insurance or pensions?

Employer-assisted housing is in fact a revolution that has made it past its first barricades, Schwartz contends. More than 300 U.S. companies already provide housing benefits for their workers. And with a bill President Bush signed last month, 43 years of Taft-Hartley Labor Management Relations Act prohibitions have been lifted, allowing unions to bargain for housing benefits. Housing could become one of the hottest labor negotiation issues of the 1990s.

The breakthroughs so far show employers helping workers get over the down-payment hurdle that excludes millions from home ownership. Employers are also helping subsidize rents so that their workers aren't forced into 70-mile commutes to put a decent roof over their heads. And some are giving an assist to community development corporations to build affordable housing near work sites.

Does this mean a return to the old "company town" setup, where cheap shanties were grouped around a belching factory? Where mill hands or miners were coerced into running up debts at the company store?

"Not at all," replied Schwartz, who is director of the American Affordable Housing Institute at Rutgers University. In today's employer-backed housing programs, employers don't control workers' lives or try to impose a life-style. The housing financial transactions are at "arm's length," and employers own almost none of the housing.

What today's employer-aided housing adds up to, Schwartz argues, is a "win-win" strategy for everyone: businesses, workers, communities and local taxpayers.

Business gets happier, more-productive employers. When workers gain access to quality housing closer to work, some side effects of long-range commuting—lateness, absenteeism and sheer exhaustion—ease off. If workers settle in quality housing near the factory or office, civic blight may be counteracted and the company's own real estate values may rise.

"For workers," Schwartz said, "it's the ticket to the American middle class, the American dream—often home ownership much sooner in their lives than they'd otherwise be able to afford—if ever."

For the community, workers living closer to their office or factory means fewer traffic jams, reduced pollution, ultimately less gobbling up of green spaces and farmlands. Helping workers with housing costs can also be good for local economic development. Already, sky-high housing costs in a number of metropolitan areas are being blamed for slowdowns in business growth because firms can't attract the workers they need. In more than a few cases, companies are packing up and moving elsewhere.

For taxpayers, there's potential gain when moderate-income housing needs are met without government subsidies. The plus for taxpayers was a key reason Bush and congressional conservatives leaped for a change in the 1947 Taft-Hartley law that they otherwise might have scorned as excessively pro-labor. Liberals went for the idea of broadened housing availability and the notion of allowing workers, through unions, to bargain for quality housing. The bill was introduced by two unlikely but increasingly common bedfellows—Sens. Orrin G. Hatch, R-Utah, and Edward M. Kennedy, D-Mass. It passed the Senate, 99–0.

Unions and companies will now be allowed to set up trust funds to help workers buy homes or rent apartments. Schwartz says his phone has been ringing off the hook with calls from labor unions asking for contract language.

A hint of what is on the horizon in this area lies in an agreement between nine Boston hotels and a restaurant-hotel workers union, Local 26. The union's 3,000 members make an average of $16,000 a year in a city where the median home price is $175,000. The hotels will pay 5 cents per-hour-per-worker to a housing trust fund that will also contain $12 million in union pension money.

"Even though the majority of the union members of Local 26 hold down more than one job, 78 per cent cannot afford to buy an apartment in metropolitan Boston, and 98 per cent cannot afford to buy a house," Rep. Edward J. Markey, D-mass., whose district is in suburban Boston, said on the floor of the House.

Around the country, variants of employer financial aid for housing are being tried. Big companies such as Colgate-Palmolive Co. arrange for volume discounts on mortgages for their employees or help their workers with closing costs. The University of Pennsylvania guarantees its employees' mortgages, and so banks charge no down payment. Some companies provide security deposits for cash-short tenants or loans for remodeling. Others even subsidizes construction of housing in neighborhoods near their work sites.

How do workers feel about it? Schwartz's institute interviewed a cross-section of 1,200 Americans age 18–44 who don't yet own a home. Six of 10 said they could afford monthly mortgage payments—but couldn't raise a down payment. Two-thirds said they'd pledge to stay with their employer at least five years in exchange for a forgivable down-payment loan. And 63 per cent said they might be willing to give up promised annual wage increases in exchange for employers' guaranteeing the mortgages on their homes.

The details of financial aid programs remain complex and potentially controversial. Some may require more congressional action to alter employee benefit law. Many employers, already hit by hyperinflated medical bills driving up their cost of doing business, are apprehensive about any new demand on their resources.

But a powerful new idea has sprung into employer-worker relations—the idea that housing can be as much a right for lower-income workers as for the top executives whose more substantial housing costs have received corporate subsidies for generations.●

## COMMITTEE REFERRAL OF NOMINATION

Mr. MITCHELL. Mr. President, as in executive session, I ask unanimous consent that if the nomination of Richard Hankinson to be Inspector General at the Department of Justice is reported by the Committee on the Judiciary it be referred to the Committee on Governmental Affairs for not to exceed 20 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR STAR PRINT—S. 2637

Mr. MITCHELL. Mr. President, I ask unanimous consent that S. 2637, the Lead Exposure Reduction Act of

1990, be star printed to reflect the changes I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR STAR PRINT—S. 2605

Mr. MITCHELL. Mr. President, I ask unanimous consent that S. 2605, the Pharmaceutical Access and Prudent Purchasing Act of 1990, be star printed to reflect the changes I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, on May 10, 1990, I introduced S. 2605, the Pharmaceutical Access and Prudent Purchasing Act of 1990. Unfortunately, it has come to my attention that there were some technical drafting errors. I believe that these errors should be corrected before the bill is printed. To accomplish this, I ask unanimous consent that Senate legislative counsel's redraft of this bill, which reflects and incorporates the necessary technical changes, be substituted as a star print.

Mr. President, this will enable the many interested parties, including States, advocates of the medically indigent, pharmacists, physicians, and drug manufacturers, to have timely access to this technically corrected bill version.

## DIRECTING SENATE LEGAL COUNSEL TO TAKE CERTAIN ACTIONS

Mr. MITCHELL. Mr. President, on behalf of myself and the distinguished Republican leader, Mr. DOLE, I send to the desk a resolution to direct the Senate legal counsel to appear as amicus curiae in the name of the Senate in a case pending in the U.S. District Court for the Eastern District of Washington, and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 289) to direct the Senate Legal Counsel to appear as amicus curiae in the name of the Senate in United States ex rel. Rudd, et al. v. General Contractors, Inc. et al.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to the consideration of the resolution.

Mr. MITCHELL. Mr. President, last year the Senate agreed to Senate Resolutions 104, 117, and 160, authorizing the Senate legal counsel to file briefs as amicus curiae in several actions pending in the U.S. district courts in order to defend the constitutionality of the qui tam provisions of the False Claims Act. These provisions authorize private persons to bring civil actions against contractors who have defrauded the Government and to share a portion of the penalties and damages that are recovered on the Government's behalf.

The district courts in the northern and central districts of California have since entered rulings in several of these cases upholding the constitutionality of the act.

The qui tam provisions of the False Claims Act are once again under challenge in United States ex rel. Rudd, et al. versus General Contractors, Inc. et al., pending in the U.S. District Court for the Eastern District of Washington. The Department of Justice has advised the Senate legal counsel that it has no plans to file a brief in response to the challenge to the constitutionality of the qui tam provisions of the act that is presented in this case.

This resolution authorizes the Senate legal counsel to appear in this case as amicus curiae on behalf of the Senate to continue the constitutionality of the qui tam provisions of the False Claims Act.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 289) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 289

Whereas, in the case United States ex rel. Rudd, et al. v. General Contractors, Inc., et al., Nos. C-89-397-RJM and C-89-821-RJM, pending in the United States District Court for the Eastern District of Washington, the constitutionality of the qui tam provisions of the False Claims Act, as amended by the False Claims Amendment Act of 1986, Pub. L. No. 99-562, 100 Stat. 3153 (1986), 31 U.S.C. 3729, et seq. (1988), have been placed in issue;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(c), 288e(a), and 2881(a) (1988), the Senate may direct its counsel to appear as amicus curiae in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore, be it

*Resolved*, That the Senate Legal Counsel is directed to appear as amicus curiae in the name of the Senate in the case of United States ex rel. Rudd, et al. v. General Contractors, Inc., et al. to defend the constitutionality of the qui tam provisions of the False Claims Act.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. THURMOND. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

## ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I am advised that the distinguished Senator from Washington, Senator GORTON, wishes to address the Senate. I know of no other Senators who wish to address the Senate at this time.

Mr. President, I ask unanimous consent that Senator GORTON be recognized to address the Senate, and that, upon the completion of his remarks, the Senate stand in recess under the order until 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I ask unanimous consent to proceed as if in morning business.

The PRESIDING OFFICER. The Senator has that right. The Senate will be in morning business and will continue in morning business until the conclusion of the Senator's remarks, at which time the Senate will recess.

## TENTH ANNIVERSARY OF THE ERUPTION OF MOUNT ST. HELENS

Mr. GORTON. Mr. President, last Friday, May 18, 1990, marked the 10th anniversary of the devastating eruption of Mount St. Helens in Washington State. The eruption was so devastating that it caused $3 billion in property damage, took 57 lives, hurled 540 million tons of ash into the sky, and forced 20 billion gallons of flood water off the mountain in the first day alone.

A decade later, Washingtonians celebrate the engineering achievements undertaken to combat the catastrophic damages caused by the eruption.

This past weekend, the U.S. Army Corps of Engineers dedicated a sediment retention structure on the north fork of the Toutle River. This project was by far the Corps of Engineer's most expensive project associated with Mount St. Helens. The structure not only keeps waterways open, but, should the mountain erupt again, will protect any residents in the path of destruction.

The damage has not been limited to rivers and property alone. Nearly 5 billion board feet of timber was lost due to the eruption. This is approximately 25 percent more than the historic annual harvest level on all national forest land in Washington and Oregon combined.

Much of this land has now been replanted. The Weyerhaeuser Co., and the U.S. Forest Service have planted

more than 27 million trees in the past 10 years, many of which are now more than 20 feet tall. In fact, by reason of special planting techniques developed there, trees grow remarkably fast in the soil and ash.

The eruption also gave us the opportunity to research volcanic phenomenia. The geological and ecological research associated with Mount St. Helens has deepened our knowledge, and provided useful understanding of similar notable occurrences at other locations.

Mr. President, as we celebrate the accomplishments of the last 10 years, we must also remember the tragedies associated with this disaster. I wish to commend not only the U.S. Army Corps of Engineers for its achievements over the last 10 years, but also the communities and residents that were so deeply affected by this disaster. Their dedication to rebuilding and their dedication—not at all, incidental—to making not just a research site but a tourist attraction out of this unique phenomenon, have shown how responsive and how flexible we are both here in this Government but most particularly in communities affected by disasters like this one.

## ORDERS FOR TOMORROW

RECESS UNTIL 9:30 A.M.; MORNING BUSINESS; RESUMPTION OF CONSIDERATION OF S. 1970; RECESS FROM 12:30 P.M. TO 2:15 P.M.

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate complete its business today it stand in recess until 9:30 a.m., tomorrow, Tuesday, May 22; that following the time for the two leaders there be a period for morning business until 11 a.m., with the first hour of that morning business under the control of Senator GORE, that is the hour from 9:30 a.m. until 10:30 a.m., and then with a period for morning business between 10:30 a.m. and 11 a.m., with Senators permitted to speak therein for up to 5 minutes each; and that at 11 a.m. the Senate resume consideration of S. 1970.

I further ask unanimous consent that the Senate stand in recess from 12:30 p.m. until 2:15 p.m. tomorrow in order to accommodate the respective party conferences.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

## RECESS UNTIL 9:30 A.M. TOMORROW

The PRESIDING OFFICER. Pursuant to the previous order the Senate will stand in recess until tomorrow, Tuesday, May 22, at 9:30 a.m.

Thereupon, the Senate, at 5:45 p.m.; recessed until Tuesday, May 22, 1990, at 9:30 a.m.

## NOMINATIONS

Executive nominations received by the Secretary of the Senate after the recess of the Senate on May 18, 1990, under authority of the order of the Senate of January 3, 1989:

DEPARTMENT OF STATE

HARRY W. SHLAUDEMAN, OF CALIFORNIA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF CAREER MINISTER, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF NICARAGUA.

EUGENE L. SCASSA, OF VIRGINIA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO BELIZE.

THE JUDICIARY

CAROL BAGLEY AMON, OF NEW YORK, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF NEW YORK VICE MARK A. COSTANTINO, RETIRED.

# HOUSE OF REPRESENTATIVES—*Monday, May 21, 1990*

The House met at 12 noon and was called to order by the Speaker pro tempore [Mr. WHITTEN].

## DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
*May 18, 1990.*

I hereby designate the Honorable JAMIE L. WHITTEN to act as Speaker pro tempore on Monday, May 21, 1990.

THOMAS S. FOLEY,
*Speaker of the House of Representatives.*

## PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Teach us, O gracious God, to use our words in ways that reflect what we believe and not as idle chatter designed to use people for our own benefit. May our words of praise and thanksgiving to You, O God, be those of adoration and honor, and as we communicate with each other, may we express faithfulness and respect. Amen.

## THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The gentleman from California [Mr. HERGER] will please come forward and lead the House in the Pledge of Allegiance.

Mr. HERGER led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 311. Concurrent resolution providing for printing of additional copies of the booklet entitled "Our Flag."

The message also announced that the Senate had passed bills, joint resolutions and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1128. An act for the relief of Richard Saunders;

S. 1738. An act to convey certain Oregon and California Railroad Grant Lands in Josephine County, OR, to the Rouge Community College District, and for other purposes;

S. 1791. An act to amend the International Travel Act of 1961 to assist in the growth of international travel and tourism into the United States, and for other purposes;

S. 2240. An act to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes;

S.J. Res. 240. Joint resolution designating the week of June 10, 1990, through June 16, 1990, as Multiple-Use Sustained-Yield Week";

S.J. Res. 315. Joint resolution for the designation of July 22, 1990, as "Rose Fitzgerald Kennedy Family Appreciation Day"; and

S. Con. Res. 133. Concurrent resolution providing for the use of the Capitol rotunda.

## TRADE BRIDGE WITH JAPAN MUST BE TWO WAY

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. TRAFICANT. Mr. Speaker, the controversial Japanese politician Shintaro Isihara, who wrote the book "The Japan That Can Say 'No'" was in America yesterday speaking to a group of workers in Michigan. He said in the past that Americans were lazy and in fact we were racist, and that was our major problem.

He now has labeled us again. He said, "America is one big giant cry baby."

There was something interesting yesterday though, because Isihara had admitted some truthful facts about Japan. He admitted that Japan has closed markets. In fact, he said Japanese consumers pay six times more for rice than any other country in the world.

He also admitted he would love to own a Motorola cellular telephone, but Motorola, an American company, is prevented from doing business in Japan.

But he said we can work it out. He said America needs with Japan a new marriage, but this time Japan must be the wife, not the mistress.

I say, Mr. Speaker, it is time for a shotgun wedding if Japan does not open up those markets. Our people are losing their jobs, losing their homes, and Japanese politicians are admitting they are practicing illegal trade in closing their markets.

Congress ought to be ashamed of themselves. It is time to tell the Japanese we need a new two-lane bridge, and we are not going to pay for the bridge this time, and we sure as hell are not going to have a toll road either.

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC,
*May 18, 1990.*

Hon. THOMAS S. FOLEY,
*The Speaker, House of Representatives, Washington, DC.*

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5 of rule III of the Rules of the U.S. House of Representatives, the Clerk received at 9:25 a.m. on Friday, May 18, 1990, the following message from the Secretary of the Senate: That the Senate passed without amendment House Concurrent Resolution 286.

With great respect, I am,
Sincerely yours,

DONNALD K. ANDERSON,
*Clerk, House of Representatives.*

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Rollcall votes, if postponed, will be taken on Tuesday, May 22, 1990.

## PETROGLYPH NATIONAL MONUMENT ESTABLISHMENT ACT OF 1990

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 286) to establish the Petroglyph National Monument in the State of New Mexico, and for other purposes, as amended.

The Clerk read as follows:

S. 286

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

TITLE I—PETROGLYPH NATIONAL MONUMENT

SEC. 101. (a) This title may be cited as the "Petroglyph National Monument Establishment Act of 1990".

(b) The Congress finds that—

(1) the nationally significant Las Imagines National Archeological District on Albuquerque's West Mesa Escarpment contains more than 15,000 documented prehistoric and historic petroglyphs;

(2) this district also contains approximately 65 other archeological sites;

(3) the West Mesa Escarpment and the petroglyphs are threatened by urbanization and vandalism, and hundreds of petroglyphs have already been destroyed;

(4) the State of New Mexico has shown great leadership in recognizing the importance of the archeological resources of the West Mesa Escarpment through the establishment of the Las Imagines National Archeological District;

(5) the city of Albuquerque has played a significant role in the preservation of the natural, cultural, and recreational resources of the West Mesa Escarpment;

(6) the Middle Rio Grande Pueblo Tribes have shown a strong and sincere interest in preservation of their heritage through protection of the West Mesa Escarpment;

(7) the Atrisco Land Grant, Inc., now held by Westland Development Co., Inc., a corporation whose stock is owned primarily by heirs of the Atrisco Land Grant, has played a significant role in the settlement of the West Mesa area since the grant's formation in 1692 and has shown a strong interest in the preservation of their traditional lands;

(8) the National Park System has no unit established for the specific purpose of protecting, preserving, and interpreting prehistoric and historic rock art; and

(9) in light of the national significance of the West Mesa Escarpment and the petroglyphs and the urgent need to protect the cultural and natural resources of the area from urbanization and vandalism, it is appropriate that a national monument be established in the West Mesa Escarpment area, near Albuquerque, New Mexico.

SEC. 102. (a) In order to preserve, for the benefit and enjoyment of present and future generations, that area in New Mexico containing the nationally significant West Mesa Escarpment, the Las Imagines National Archeological District, a portion of the Atrisco Land Grant, and other significant natural and cultural resources, to provide for the interpretation of such resources, and to facilitate research activities associated with the resources, there is hereby established, subject to subsection (d), the Petroglyph National Monument (hereinafter referred to as the "monument") as a unit of the National Park System. The monument shall consist of approximately 7,274 acres including the Atrisco, Boca Negra, and Piedras Mercadas Units as depicted on the map entitled "Boundary Map, Petroglyph National Monument", numbered NM-PETR-80,010B and dated May 1990, which shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior, in the offices of the Department of Energy, Minerals, and Natural Resources of the State of New Mexico, and in the office of the mayor of the city of Albuquerque, New Mexico.

(b) The monument shall be administered by the Secretary or, where appropriate, by the Secretary in cooperation with the State of New Mexico (hereinafter referred to as the "State") and the city of Albuquerque, New Mexico (hereinafter referred to as the "city"), in accordance with section 104 of this title.

(c) Within 6 months after the enactment of this title, the Secretary shall file a legal description of the monument with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives. Such legal description shall have the same force and effect as if included in this title, except that the Secretary may correct clerical and typographical errors in such legal description. The legal description shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior, in the offices of the Department of Energy, Minerals, and Natural Resources of the State of New Mexico, in the office of the mayor of the city of Albuquerque, New Mexico, and in the monument office: *Provided,* That the Secretary may from time to time, after completion of the plan referred to in section 105(a) of this title, make minor adjustments to the boundary by publication of a revised map or other boundary description in the Federal Register.

(d) The monument shall be established only when the city, the State, and the Secretary have entered into a binding agreement that all lands within the boundaries of the monument shall be managed in accordance with section 104 of this title.

SEC. 103. (a)(1) Within the boundary of the monument, the Secretary is authorized to acquire lands and interests in lands by donation, purchase with donated or appropriated funds, exchange, or transfer from any other Federal agency, except that lands or interests therein owned by the State or a political subdivision thereof may be acquired only by donation or exchange.

(2) The Secretary may also acquire some or all of the approximately 95 acres within the area identified as "Potential Addition" on the map referenced in section 102(a), if, after consultation with the Commission established under section 108, the Secretary determines that such acquisition would further the purposes of this Act.

(3) The authority of the Secretary to make acquisitions pursuant to paragraph (2) shall expire on the date three years after the date of enactment of this Act.

(4) Any lands acquired pursuant to paragraph (2) shall be incorporated into Petroglyph National Monument and shall be managed accordingly.

(b) Where the surface and subsurface estates of private land to be acquired are separately owned, the Secretary shall acquire the subsurface estate to such land prior to or at the same time the surface estate is acquired: *Provided,* That this subsection shall not be applicable if the Secretary determines that the prior acquisition of the surface estate is necessary—

(1) to prevent damage to the resources of the monument; or

(2) to properly manage and interpret the monument in accordance with section 102.

(c) The Secretary may exchange lands within the area described on the map referred to in section 102 as the Piedras Marcadas Unit for lands owned by the city within the area described on the map referred to in section 102 as the Atrisco Unit. The Secretary may exchange lands within the area described on the map referred to in section 102 as the Boca Negra Unit for lands owned by the State within the area described on the map referred to in section 102 as the Atrisco Unit. Exchanges shall be on the basis of equal value, and either party to the exchange may pay or accept cash in order to equalize the value of the properties exchanged.

(d) Prior to acquiring fee simple ownership of private lands or interests therein within the boundaries of the monument, the Secretary is authorized to acquire an appropriate interest in such land by donation or for a nominal fee from its owners for the purpose of providing immediate protection against trespass and vandalism and initiating any resource inventories necessary to carry out the purposes of this title.

SEC. 104. (a) Pending establishment of the monument and thereafter, the Secretary shall administer lands and interests therein under his jurisdiction within the boundary of the monument. The Secretary shall administer, manage, and protect the monument in accordance with the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1 et seq.), the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461 et seq.), and this title, and in such manner as to preserve, for the benefit and enjoyment of present and future generations, its cultural and natural resources, and to provide for interpretation of and research on such resources.

(b) Units of the monument to be managed by the State and the city shall be managed and developed in accordance with management and operational plans prepared cooperatively with the National Park Service, consistent with section 106 of this title. Visitor use and interpretive programs within the State and city units shall be undertaken consistent with plans developed with the assistance of the National Park Service.

(c) The Secretary is authorized to enter into cooperative agreements with either the State or the city under which the Secretary may manage and interpret any lands owned by the State or the city, respectively, within the boundaries of the monument.

(d) In order to encourage a unified and cost effective interpretive program of the natural and culutral resouces of the West Mesa Escarpment and its environs, the Secretary is authorized to enter into cooperative agreements with other Federal, State, and local public departments and agencies, Indian tribes, and nonprofit entities providing for the interpretation of these resources. Such agreements shall include, but need not be limited to, provision for the Secretary to develop and operate interpretive facilities and programs on lands and interests in lands outside the boundaries of the monument, with the agreement of the owner or administrator thereof. Such cooperative agreements may also provide for financial and technical assistance for the planning and implementation of interpretive programs and minimal development related to those programs.

(e) Federal laws generally applicable to units of the National Park System, including the National Environmental Policy Act of 1969 and the Archeological Resources Protection Act of 1979, shall apply to the monument. The Secretary is authorized to pursue concurrent jurisdiction of the monument for the purposes of law enforcement and implementation of Federal regulations.

SEC. 105. (a) The Secretary may participate in land use and transportation management planning conducted by appropriate local authorities for lands adjacent to the

monument and may provide technical assistance to such authorities and affected landowners for such planning.

(b) Nothing in this title shall be construed as authorizing or requiring revocations for any interest or easement for existing electric transmission or distribution facilities or prohibiting the operation of maintenance of such facilities within or adjacent to the boundaries of the monument.

SEC. 106. (a) Within 3 years from the date funding is made available for the purposes of this section, the Secretary, in cooperation with the city and the State, shall develop and transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, a general management plan for the monument consistent with the purposes of this title, including but not limited to—

(1) a statement of the number of visitors and types of public use within the monument which can be accommodated in accordance with the protection of its resources;

(2) a resource protection program;

(3) a general interpretive program;

(4) a plan to implement the joint resolution entitled "American Indian Religious Freedom", approved August 11, 1978 (42 U.S.C. 1996);

(5) a general development plan for the monument, including proposals for a visitors' center, and the estimated cost thereof; and

(6) a development for the Rock Art Research Center.

(b) The management plan shall be prepared in consultation with the Petroglyph National Monument Advisory Commission, established pursuant to section 107, appropriate Indian tribes and their civil officials, the heirs of the Atrisco Land Grant, the New Mexico State Historical Preservation Office, and other interested parties.

(c) The Secretary shall undertake, in consultation and cooperation with appropriate New Mexico Indian tribes and their civil officials, research and other Rio Grande style rock art sites in New Mexico on Federal lands, and through cooperative agreements with State and willing private land owners, on non-Federal lands. The Secretary shall provide the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, within 3 years of the date funding is made available for the purposes of this section, a report that—

(1) lists various locations of Rio Grande style rock art;

(2) identifies the ownership of the rock art;

(3) identifies the condition of the resources; and

(4) identifies the appropriate type of technical assistance needed for the protection and care of these resources.

The report shall be updated and transmitted to such committees every 2 years thereafter.

SEC. 107. (a) In order to provide for research relating to Rio Grande style rock art, undertake comprehensive evaluations of pertroglyphs within the national monument, prepare interpretive programs that are sensitive to the concerns of the Indian and Hispanic peoples, and relate monument resources to other styles and forms of rock art, the Secretary, acting through the National Park Service and in cooperation with the University of New Mexico, other educational institutions, foundations, Indian tribes, and private entities, shall establish a Rock Art Research Center (hereinafter referred to as the "Center").

(b) The Center shall function as a focal point for the systematic and scholarly collection, analysis, and dissemination of information relating to Rio Grande style rock art, and other forms of rock art within the region.

(c) The Center shall produce research data and educational materials that will enhance public understanding of prehistoric and historic rock art.

(d) The Center shall provide for a broad program of research including ethnographic studies, resource management techniques, and comparative studies of rock art forms and styles.

(e) Research shall be primarily directed toward rock art managed by the National Park Service. The Secretary may enter into cooperative agreements with other agencies and entities as may be appropriate to carry out the requirements of the Rock Art Research Center.

(f) The Secretary, acting through the National Park Service, is authorized to undertake research and assist in management and protection of Rio Grande style rock art sites on public and, with the agreement of the landowner, private lands within the Galisteo Basin. The Secretary is authorized to enter into cooperative agreements with landowners of such rock art sites and expend appropriated funds for research, site protection, and interpretive programs. Research shall include the identification and mapping of rock art sites and the development of protection options.

SEC. 108. (a) There is established the Petroglyph National Monument Advisory Commission (hereinafter referred to as the "Commission"). The Commission shall be composed of 11 members appointed by the Secretary for terms of 5 years as follows:

(1) one member, who shall have professional expertise in history or archaeology, appointed from recommendations submitted by the Governor of the State of New Mexico;

(2) one member, who shall have professional expertise in history or archaeology, appointed from recommendations submitted by the mayor of the city of Albuquerque, New Mexico;

(3) one member, who shall have professional expertise in Indian history or ceremonial activities, appointed from recommendations submitted by the All Indian Pueblo Council;

(4) one member who shall be a shareholder of the Westland Development Co., Inc.;

(5) one member who shall be an heir of the Atrisco Land Grant;

(6) one member who shall be an affected landowner;

(7) one member who shall have professional expertise in Indian rock art;

(8) one member who shall have professional expertise in cultural anthropology;

(9) one member who shall have professional expertise in geology;

(10) one member from the general public; and

(11) the Director of the National Park Service, or his or her designee, ex officio.

(b) Any member of the Commission may serve after the expiration of his term until his successor is appointed. A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(c) Members of the Commission shall serve without pay. While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5703 of title 5, United States Code.

(d) The Chair and other officers of the Commission shall be elected by a majority of the members of the Commission to serve for terms established by the Commission.

(e) The Commission shall meet at the call of the Chair or a majority of its members, but not less than twice annually. Six members of the Commission shall constitute a quorum.

Consistent with the public meeting requirements of section 10 of the Federal Advisory Committee Act (5 U.S.C. App.), the Commission shall, from time to time, meet with persons concerned with Indian history and historic preservation and with other interested persons.

(f) The Commission may make such bylaws, rules, and regulations as it considers necessary to carry out its functions under this title. Section 14(b) of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Commission.

(g) The Commission shall advise the Secretary on the management and development of the monument and on the preparation of the plan referred to in section 105(a) of this title. The Secretary, or his designee, shall from time to time, but at least semiannually, meet and consult with the Commission on matters relating to the management and development of the monument.

(h) The Commission shall cease to exist 10 years after the date of its first meeting.

SEC. 109. There are authorized to be appropriated such sums as may be necessary for the purposes of this title. The Secretary shall prepare and submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, concurrently with the proposed budget for the second fiscal year beginning after the date of enactment of this title, and every five years thereafter, a report on the status of the agreement referred to in section 102(d), its associated costs, and any proposed alterations to the agreement.

## TITLE II—PECOS NATIONAL HISTORICAL PARK

SEC. 201. The purpose of this title is—

(1) to recognize the multitheme history, including the cultural interaction among diverse groups of people, of the Pecos area and its "gateway" role between the Great Plains and the Rio Grande Valley, and

(2) to provide for the preservation and interpretation of the cultural and natural resources of the Forked Lightning Ranch by establishing the Pecos National Historical Park.

SEC. 202. (a) In order to enhance and preserve the existing Pecos National Monument and related nationally significant resources for the benefit and enjoyment of present and future generations, there is hereby established the Pecos National Historical Park (hereinafter in this title referred to as the "park").

(b) The park shall include the existing Pecos National Monument and the area known as the Forked Lightning Ranch which surrounds the Pecos National Monument and shall consist of approximately 5,865 acres of the lands and interests in lands as generally depicted on the map entitled "Boundary Map—"Pecos National His-

torical Park Boundary Concept", numbered 430/80028 and dated March 1990. The map shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior. The Secretary of the Interior (hereinafter in this title referred to as the "Secretary") may from time to time make minor revisions in the boundary of the park in accordance with section 7(c) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4 and following).

(c) The Act entitled "An Act to authorize the establishment of Pecos National Monument in the State of New Mexico, and for other purposes" approved June 28, 1965 (79 Stat. 195), is hereby repealed, and any funds available for purposes of the Pecos National Monument shall be available for purposes of the park.

SEC. 203. The Secretary is authorized to acquire lands, waters, and interests therein within the boundaries of the park by donation, purchase with donated or appropriated funds, or exchange; *provided, however,* that the Secretary may not acquire lands within the Forked Lightning Ranch as depicted on the map from the owner of record of such lands as of May 1, 1990 without the consent of such owner unless the Secretary determines that the lands are being used, or that there is an imminent threat that the lands will be used, for any purpose that is incompatible with the purposes of this Act.

SEC. 204. The Secretary shall administer the park in accordance with the provisions of this title and the provisions of law generally applicable to the administration of units of the National Park System, including the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1, 2-4), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461-7).

SEC. 205. Within 3 full fiscal years from the date funding is made available for the purposes of preparing a general management plan, the Secretary shall develop and transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, a general management plan for the park consistent with the purposes of this title, including (but not limited to)—

(1) a general visitor use and interpretive program that fully considers the prehistoric and historic aspects of the national historical park including the "gateway theme" and early Spanish settlement of New Mexico;

(2) a statement on the number of visitors and types of public uses within the park which can be reasonably accommodated in accordance with the protection of its resources; and

(3) a general development plan for the park, including the estimated cost thereof.

SEC. 206. The Secretary, acting through the National Park Service, shall undertake a study of the Rowe Ruin, Arrowhead Pueblo, Hobson-Dressler Ruin, and Las Ruedas site for the suitability and feasibility of their inclusion in the park. The Secretary shall submit the study to the Congress within one year after the date of enactment of this title.

SEC. 207. There is authorized to be appropriated such sums as may be necessary to carry out this title.

TITLE III—ZUNI-CIBOLA NATIONAL HISTORICAL PARK AND JUAN DE ONATE MEMORIAL

SEC. 301. The first sentence of section 202 of Public Law 100-225 (16 U.S.C. 460uu-12) is amended by deleting "and Zuni-Cibola National Historical Park" and inserting "Zuni-Cibola National Historical Park, and petroglyph National Monument".

SEC. 302. The Zuni-Cibola National Historical Park Establishment Act of 1988 (16 U.S.C. 410pp et seq.) is amended—

(1) in section 2(c)—

(A) by striking "24 months" and inserting "6 years"; and

(B) by striking "24 months" and inserting "6-years"; and

(2) in section 3(a) by striking "18 months" and inserting "5½ years".

SEC. 303. (a) The tracts of land described in subsection (b) shall be treated as public land for the purposes of the Act of June 14, 1926 (43 U.S.C. 869 et seq.; commonly known as the "Recreation and Public Purposes Act").

(b) The land referred to in paragraph (1) is approximately 5 acres of the Sebastian Martin Land Grant near Los Luceros, New Mexico, as generally depicted on the map entitled "Onate Memorial Map" and dated July 1989.

The SPEAKER pro tempore. Is a second demanded?

Mr. SCHIFF. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes, and the gentleman from New Mexico [Mr. SCHIFF] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today we have the opportunity to preserve and make accessible to the American people two sites of prehistoric and historic significance. S. 286 combines House Resolution 4235, introduced by our colleague, BILL RICHARDSON, that establishes Pecos National Historical Park with House Resolution 745, introduced by our colleague STEVE SCHIFF and S. 286, which recently passed the Senate, that establishes Petroglyph National Monument. Both Pecos and Petroglyphs are threatened by development that would destroy their irreplaceable and nationally significant resources. In addition, authority for some of the State funding for acquisition at Petroglyph ceases on June 30 of this year, making timely action crucial.

These areas preserve evidence of centuries of human occupation and activity. At Petroglyph National Monument, some 15,000 rock art carvings have been cut into the boulders strewn around the escarpment. These carvings provide impressive evidence of a past culture, and are silent witnesses to that culture's ideas and beliefs.

At Pecos National Historical Park, located on the gateway between the Great Plains and the Rio Grande Valley, centuries of human activity have left resources both prehistoric and historic. On this route of trade and travel passed prehistoric Indians, Spanish soldiers and missionaries, Santa Fe traders and the American Army. Rock shelters, pithouses, kivas, Spanish homesteads, Santa Fe trail ruts and Kozlowski's ranch which served as the headquarters for Union troops during the Civil War show the diverse human activities here.

Mr. Speaker, the committee adopted an amendment which made various changes to the legislation as introduced. At Petroglyphs it adds a rock art research center and other authority to research rock art, and directs that the Federal, State, and city land be consistently managed to National Park Service standards through joint agreements. It gives authority for the addition of two parcels of land to improve visitor access and the ability of the National Park Service to manage the resources, and deletes a reverter clause that was not in the House bill as introduced.

The Pecos language remains essentially as it was introduced. The Secretary is now directed to study four areas for potential addition whose importance witnesses stressed at the hearing. Given her generosity through the years, the ranch now owned by Mrs. Greer Garson Fogelson is to be acquired on a willing seller basis unless there is an imminent threat that the lands are being used, or will be used, for any purpose that is incompatible with the purposes of this act. The substitute also makes two minor technical amendments. It provides for a 5 acre land transfer from the Bureau of Land Management in order to establish a monument to the early Spanish explorer Juan de Onate. This provision has already passed the House once. It also extends the deadline for the establishment of the Zuni-Cibola National Historical Park from 2 years to 6 years.

Mr. Speaker, I endorse this legislation and urge its passage. These lands preserve special parts of our heritage and will make them accessible to the American people.

Mr. Speaker, I reserve the balance of my time.

Mr. SCHIFF. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am a supporter of the legislation now contained in H.R. 745. However, as the principal sponsor of the Petroglyph National Monument portion of that bill, I would like to take a couple of minutes to speak more particularly about that particular portion of the legislation.

The petroglyphs are rock art drawings. They are created by the scraping in an artistic fashion of the dark outer side of certain rocks to expose the white underside, and thereby produce images. These images are produced of religious and other drawings. There are approximately 15,000 such rock art images located in the Albuquerque,

NM, area on approximately 7,000 acres which would be protected under the Petroglyph National Monument. These rock art drawings are between 700 and 1,300 years old. Most of them were drawn by native Americans. However, some of them were made by early Spanish settlers.

□ 1210

They constitute the largest collection of ancient rock art in the United States and share a home with 65 other archaeological sites, some up to 12,000 years old. This is one of the largest sites of such a collection in the United States which has not been appreciably damaged by vandals, and which is largely intact today.

Mr. Speaker, the petroglyphys, however, are threatened unless Congress takes urgent action. They are threatened by increasing vandalism in the area. They are threatened by theft. The petroglyphs have developed a certain value on the market, and on smaller stones which can be moved we believe that some have been stolen and are being sold on the market. Most significantly, Mr. Speaker, they are threatened by development. The area of 7,000 acres I have described is right in the path of the growth of the city of Albuquerque, which is a growing city in the Sun Belt of the United States. On the site literally houses are built now right up against where the petroglyphs exist.

Mr. Speaker, there has been a total cooperative effort to bring this to the House floor and to pass it obviously in the other body of the United States. It is supported by both sides of the aisle.

I want to thank the gentleman from Minnesota [Mr. VENTO], chairman of the subcommittee, and the gentleman from California [Mr. LAGOMARSINO], the ranking Republican on the subcommittee for their support, as well as my two colleagues from New Mexico, Mr. JOE SKEEN and Mr. BILL RICHARDSON, who have both supported it in their respective committees and subcommittees.

Petroglyph National Monument is supported by local groups. It is supported by general community groups in the Albuquerque area and supported by native American and Hispanic groups. In addition, one of our citizens, Ike Eastvold, set aside all of his personal matters to devote full time to supporting the creation of this national monument and forming an organization called Friends of Albuquerque Petroglyphs which has been instrumental in trying to bring this bill to the floor. In addition, national preservation organizations have supported the establishment of this national monument.

Finally, Mr. Speaker, this bill, if enacted by the Congress and signed into law, presents certain unique opportunities. The first is a unique sharing of responsibilities and costs by the Federal Government with the State government and with local governments. The State of New Mexico and the city of Albuquerque intend to pay a signficant share of the cost of acquisition of the land upon which the petroglyphs are now located. In addition, the State of New Mexico and the city of Albuquerque have offered a continuing role by paying for a portion of the management of the national monument under the direction of the Secretary of the Interior.

Finally, Mr. Speaker, we have another unique opportunity. The petroglyphs are not cave drawings made many thousands of years ago by people who are now long lost to history. The descendants of the Native Americans who drew most of the petroglyphs are alive and living in the Albuquerque and New Mexico areas today. The descendants of the Spanish explorers who drew some of the petroglyphs, and equally significantly upon whose land as part of an original spanish land grant, the Atrisco land grant of the 17th century where many of the petroglyphs are now located, are also living today and can be identified, and identify themselves in the Albuquerque and New Mexico area. The fact that we have the opportunity not only to preserve a historical treasure, but to work with the identified descendants of the people who created this treasure is remarkable.

If the Petroglyph National Monument becomes law, I recommend that the Park Service work very closely with all of the descendants in every step of the development of the national monument, from the development of a plan to permiting the continuation of ceremonies which exist to this day, to educating and teaching visitors to the national monument about the history of these groups.

Mr. Speaker, the House Interior and Insular Affairs Committee passed this bill unanimously. I hope the House will do likewise.

Mr. Speaker, I reserve the balance of my time.

Mr. VENTO. Mr. Speaker, there have been a number of individuals who have worked very hard in bringing this legislation to the floor today. Of course, one was the sponsor of the petroglyph bill, the gentleman from New Mexico, Congressman SCHIFF, who has just spoken, and I want to commend him for his work. But I think he had a very strong ally in the petroglyphs bill in Congressman BILL RICHARDSON who serves on the subcommittee and has been interested in this issue for some time, and in addition to that hosted myself and staff members and other committee members at a visit to the petroglyphs as well as to the Pecos National Monument which is expanded in this same bill. These are two unique areas, one an established monument today which we are converting into a park, and the other establishment of a new park.

Mr. Speaker, it would be hard to find the adjectives to adequately describe the archaeological and historic value of this 17-mile-long escarpment with literally tens of thousands of rock art inscriptions on it, an outstanding resource, one that literally is under threat by subdivision and other types of activities today. But today we are in the process of trying to protect these important resources in the Southwest. The Secretary of the Interior has personally, of course being a native of Albuquerque, stated his interest.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Mexico [Mr. RICHARDSON], who is, in my mind, the principal architect of this bill that we have before us today. It touches a number of proposals that have made the Rock Art Institute and the other technical changes that are made to it, and of course the Pecos and his work on the petroglyphs along with many others.

Mr. RICHARDSON. Mr. Speaker, I thank the gentleman for yielding time to me, and thank him and his staff for their excellent support for this legislation, and their hard work in pursuit of the objectives of this legislation. I also thank my colleague, STEVE SCHIFF from New Mexico, a freshman Member, and congratulate him on the passage of what I think may be his first bill, but nonetheless, one that is very important to his congressional district and to the State of New Mexico.

I think what we are doing here is rolling a number of important environmental initiatives into one. First, the petroglyphs. I think the gentleman from Minnesota [Mr. VENTO], chairman of the subcommittee, and the gentleman from New Mexico [Mr. SCHIFF], mentioned the importance of this legislation with magnificent samples of Rio Grande style of rock art practiced between the 14th and the 17th century. These are threatened by vandalism, shooting, theft, and construction activities, external threats across the board.

Funding from the State of New Mexico once again is contingent upon what the Congress and the President do by June 30 of this year. So there is a dramatic urgency to getting this legislation passed. In fact, if the monument is not designated by June 30, 1990, $300,000 in State funds will be lost, and the balance of the funding will expire in June 1992.

Once again, the legislation authorizes the acquisition of approximately 7,370 acres, including the Atrisco, Boca Negra, and Piedras Mercadas units. It includes an amendment I proposed to create a rock art research center that

would increase our knowledge of prehistoric Indian cultures, broaden our understanding and appreciation of the Spanish rock art and attendant culture, and provide data for public education and interpretation of the petroglyphs.

Also included is an amendment I offered during full committee in consultation with the minority that would authorize the Park Service to study and acquire an additional 95 acres for the Petroglyph National Monument if the Secretary of the Interior determines that such acquisition would further the purposes of the act.

It is important that Congress act quickly on this legislation before all chances to preserve these wonderful artifacts are lost.

In addition to this legislation, we rolled in several other bills that are important to the State of New Mexico. Secondarily in importance is the Pecos National Monument, strategically situated on top of a small mesa where ancient Spanish and Indian ruins lie. This too is also threatened by development.

□ 1220

Adjacent to the monument is the Forked Lightning ranch owned by actress Greer Garson Fogelson. The ranch is currently for sale on the open market and has attracted quite a bit of attention. Earlier this year developers proposed to purchase the ranch and establish a resort city entitled "Santa Fe East 2001." The resort would include an airstrip, a resort hotel, residential housing, a multnational shopping center, an athletic center, a convention center, a private hunting preserve.

This is something that the townspeople of Pecos rebelled against, Mr. Speaker.

Although Mrs. Fogelson has decided against selling to these developers, the ranch remains on the open market. Any development would pose a serious threat to the historic scene of the existing Pecos National Monument. In addition, many archeological sites, Santa Fe Trail remnants, and areas associated with the Spanish settlement and the Civil War on the Forked Lightning lands would also be lost.

The legislation we are considering today would authorize the acquisition of approxmately 5,500 acres of the Forked Lightning Ranch so that they may be preserved for future generations. In full committee markup I offered an amendment that would authorize the Secretary of Interior to acquire these lands only with the consent of the owner, unless the Secretary determines that the lands are being used, or there is an imminent threat that the lands will be used, for purposes that are incompatible with the purposes of this act. In respect of the fine stewardship provided by Mrs. Greer Garson Fogelson, I believe it is only proper that the lands be acquired with her prior consent. It is extremely important that we act on this legislation quickly before these pristine lands are lost forever.

Mr. Speaker, some may be wondering if we are talking about the same Greer Garson that is a famous actress, an Oscar star of—well, I will not give the time that she was a star, but let us say in this century. She is an outstanding woman, and this is the same movie star.

Mr. Speaker, The bill also includes language to establish the Don Juan Onate Monument and amends the Zuni-Cibola National Historical Park Act of 1988.

The Onate provision simply removes a technical obstacle to the consideration by the Secretary of a transfer, under the Recreation and Public Purposes Act, of the surface estate on 5 acres of BLM land to Rio Arriba County in New Mexico, Rio Arriba County, which is largely Hispanic, wishes to erect a monument to a Spanish explorer, Don Juan Onate, on BLM land near the site where Onate's expedition established the first European settlement in what is now the United States.

With respect to the Zuni-Cibola National Historical Park Establishment Act of 1988, the amendment would simply extend the time in which the Secretary must accept a leasehold interest in the land. In accordance with the act, the Zuni Tribe must make an offering, and the Secretary of the Interior must accept a leasehold interest in the land in order to establish the park. The act terminates if the Secretary does not accept a leasehold within 2 years of establishment of the act.

The 2-year deadline is rapidly approaching and many issues remain to be resolved before an agreement can be reached.

Mr. Speaker, this House historically approved the first Indian national park cooperative venture in the last session of the Congress.

Finally, I am supportive of committee report language with respect to the Petroglyphs that recognizes the historic connection between this land and the Pueblo people as well as between this land and the heirs to the Atrisco land grant. The establishment of the monument will ensure that this land is protected and accessible to both these groups and the American public. Further, the committee encourages the National Park Service in its dealing with the Pueblo people and with the Atrisco heirs to ensure their appropriate access to this monument, under the American Indian Religous Freedom Act and the first amendment of the U.S. Constitution.

This legislation has bipartisan support and I urge a favorable vote today.

I especially want to commend the gentleman from California [Mr. LAGOMARSINO] for his not just foresightedness but for his spirit of compromise and commitment to national park issues, to conservation, to the environment, his ability to forge compromises out of differences.

I think it is clear that early on this legislation, the merging of the two bills caused some concerns among members of the minorities. Well, that is no longer the case except that what we have developed is a compromise which I believe is acceptable to all sides. But I do not think that this compromise on this effort and these landmark bills for the State of New Mexico and the country would have been achieved without the gentleman from California [Mr. LAGOMARSINO] and the gentleman from Minnesota [Mr. VENTO].

Finally, Mr. Speaker, to the Members of the other body, the New Mexico sponsors of this legislation, enormous credit must go to them.

I once again urge this House strongly support this legislation, give it an overwhelmingly unanimous vote and recognize what we are doing here is not just New Mexico legislation but national legislation that preserves the culture of the native Americans and the Spanish people, preserves land that brings tourism, protects from unwanted development and, most importantly, insures that the future generations will have an opportunity to see what many of our forefathers created in the 14th and 17th centuries.

The proposed Petroglyph National Monument lies just west of Albuquerque encompassing a 17-mile long basalt escarpment and five volcanic cones.

An estimated 15,000 to 17,000 petroglyphs lie in this location representing at least 12,000 years of human history.

The petroglyphs date between 1300 and 1650 AD—some nearly 3,000 years old.

BACKGROUND ON PETROGLYPH LEGISLATION

S. 286 would: First, authorize land acquisition of 7,274 acres including the Atrisco, Boca Negra, and Piedras Mercadas Units; second, authorize necessary appropriations—estimated cost of $58 million; third, direct the Secretary to administer the monument in accordance with all laws applicable to the National Park Service; fourth, authorize the Secretary to enter into cooperative agreements with either the State of New Mexico or the city to manage and interpret any lands owned by the State or the city within the boundaries of the Monument; fifth, allow the Secretary to acquire a less than fee interest in lands to provide immediate protection for the petroglyphs; sixth, calls for the preparation of a general management plan; seventh, directs the Secretary to under-

take research and prepare a report on other Rio Grande style rock art sites in New Mexico; and eighth, establish an advisory commission.

Pecos is located on the major gateway between the Great Plains and the Rio Grande Valley, and on the Santa Fe Trail. Prehistoric Native Americans, Spanish Missionaries and colonizers, Santa Fe traders, and the U.S. Army all used this route.

The Forked Lightning Ranch adjacent to the existing Pecos National Monument is for sale on the open market. A developer proposed to purchase the ranch in order to develop a major resort city—Santa Fe East 2001—including an airstrip, golf courses, shopping centers, and residential housing.

Any development would pose a serious threat to the monument's historic scene and destroy archeological sites, Santa Fe Trail remnants and areas associated with the Spanish settlement and the Mexican and Civil Wars.

WHAT THE PECOS BILL DOES

First, the bill would establish the Pecos National Historical Park authorizing acquisition of 5,865 acres; second, authorizes necessary appropriations—estimated at $5.5 million; third, provides for park's administration; and fourth, directs the Secretary to prepare a general management plan.

JOHN L. ROACH, INC.,
ATTORNEYS AT LAW,
*Dallas, TX, April 23, 1990.*

Hon. BRUCE F. VENTO,
*Chairman, National Parks and Public Lands Subcommittee, Washington, DC.*

DEAR CHAIRMAN VENTO: We are counsel for Greer Garson Fogelson. Mrs. Fogelson has been ill for an extended period and has left the city for recuperation. We have discussed with her the fact that there is pending legislation the ultimate result of which will be the extension of the Pecos National Monument, in San Miguel County, New Mexico, to include her Forked Lightning Ranch as a part of such facilities, as well as the expansion of the interpretive mission of the facilities.

As you know, Mr. and Mrs. Fogelson have supported such Monument for many years and have made various significant contributions in connection therewith. Mrs. Fogelson certainly does not object to the proposed legislation and has expressed to me her feeling that the expansion of the Monument to include her ranch would be a permanent dedication thereof to a matter in which she and her late husband have been interested for many years.

Very truly yours,

JOHN L. ROACH.

Mr. SCHIFF. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I stated a moment ago but I am happy to reemphasize that this was a bipartisan effort and my colleague, the gentleman from New Mexico [Mr. RICHARDSON], has been with me in every step in the way in supporting this bill. I thank him for that and want to state that I support the portion of this bill that Congressman RICHARDSON drafted.

I also thank Chairman VENTO for his support of this bill as he has supported so many other preservation acts in the U.S. Congress.

Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LAGOMARSINO], the ranking member of the subcommittee.

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of S. 286, an act to establish Petroglyphs National Monument and for other purposes. My colleague from Minnesota has described the measures included in this bill and I would like to simply highlight a few features of the important Petroglyphs National Monument legislation before us today.

Mr. Speaker, this is a piece of legislation which is significant in many ways. The 15,000 to 17,000 petroglyphs chiseled into the hard volcanic rock are clearly a nationally significant resource. Similar in importance is the cooperative partnerships which have been built around this legislation; not only in the form of strong bipartisan support from the entire New Mexico delegation, but also the partnership among the local, State and Federal governments which will all be participating in the preservation and management of this resource. I would like to commend my colleague, Mr. SCHIFF, primary author of the House bill for the leadership role he has shown in building these partnerships, and also to Mr. RICHARDSON and Mr. SKEEN for their valuable contributions.

Finally, the total estimated cost for acquisition of this 7,300-acre park, $90 million, is significant. However, this cost is offset by the financial contribution of $30 million which has been pledged by the city and State governments. Mr. Speaker, it is this level of commitment on behalf of these other levels of government which makes this project feasible and I commend them for their participation. This type of cooperation will be increasingly important to the future success of our National Park System.

Mr. Speaker, the time to act on this measure is now. The Petroglyphs are being daily threatened by urban encroachment and I am grateful to the subcommittee chairman for moving this bill rapidly through the committee. It is also notable that establishment of this new monument will provide for important new recreation opportunities in the Albuquerque urban area. Providing increased opportunities for urban recreation is a high priority of the administration and an area of great need for the American people.

For these reasons, I urge my colleagues to join me in supporting this bill.

Mr. SCHIFF. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. WHITTEN). The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the Senate bill, S. 286, as amended.

The question was taken.

□ 1230

Mr. VENTO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. WHITTEN). Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

## GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on S. 286 of the Senate bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

## REGARDING BURMESE ELECTIONS

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 324) concerning human rights, democracy, and illicit narcotics production and trafficking in Burma, as amended.

The Clerk read as follows:

H. CON. RES. 324

*Resolved by the House of Representatives (the Senate concurring),*

SECTION 1. FINDINGS.

(a) HUMAN RIGHTS AND DEMOCRACY IN BURMA.—The Congress finds that—

(1) the people of Burma continue to be ruled by an unelected military government that does not govern by the consent of the people;

(2) the Burmese Government has violently suppressed prodemocracy demonstrations, killing or imprisoning thousands of demonstrators and forcing others to flee for their lives;

(3) the Government of Burma has pledged to hold free and fair elections in Burma on May 27, 1990;

(4) despite this commitment—

(A) thousands of persons connected with the prodemocracy movement remain imprisoned, and the government continues to arrest opposition figures engaged in peaceful political activities;

(B) independent human rights monitors report that the Burmese authorities have continued to engage in abuses against civil-

ians that include rape, torture, extrajudicial execution, and forced porterage;

(C) prominent civilian leaders who might represent a significant electoral challenge to the military regime's monopoly of power have been imprisoned or placed under house arrest and prevented from standing for election; and

(D) the State Law and Order Restoration Council has announced a severely restrictive set of national election campaign restrictions that provide the authorities with nearly unlimited discretion to restrict free and open debate on political issues;

(5) despite these obstacles to a free and fair election, the presence of impartial international observers both prior to and during the elections in Burma would signal the international community's strong interest in democracy in Burma, and might encourage fairness and help ensure that accurate judgments are made about the integrity of the electoral process; and

(6) economic and military cooperation between the Government of Burma and other foreign governments, including arms sales and cooperation with Burmese troops operating in border areas, has strengthened the position of the military regime, and has helped enable it to restrict the process of political reform and continue its abuses of human rights and humanitarian law.

(b) ILLICIT NARCOTICS PRODUCTION AND TRAFFICKING IN BURMA.—The Congress also finds that—

(1) Burma is the largest producer and exporter of illicit opium in the world, with narcotics production nearly doubling since the current military regime came to power in September 1988;

(2) increases in narcotics production since September 1988 have been facilitated by a lack of enforcement and eradication efforts by the Burmese Government, and a policy of accommodation with the main narcotics producing and trafficking organizations in Burma;

(3) this accommodation with drug traffickers has helped enable the Government of Burma to direct military energies and resources against opposition groups challenging the government, resulting in a wide range of human rights abuses;

(4) almost all United States-supported antinarcotics efforts in Burma were suspended in September 1988;

(5) a recent report by the United States General Accounting Office determined that the results of the United States-supported antinarcotics program in Burma prior to September 1988 had been seriously deficient;

(6) this report found that the current political situation in Burma precludes a resumption of United States antinarcotics programs;

(7) the administration does not fully concur with the conclusions of the General Accounting Office report; and

(8) a resumption of United States antinarcotics assistance at this time might be interpreted as a slackening of the United States Government's opposition to the repressive nature of the current Burmese regime and the widespread abuse of human rights carried out by that regime.

SEC. 2. POLICY STATEMENTS.

(a) ELECTIONS IN BURMA.—The Congress calls upon the Government of Burma to establish the conditions necessary to ensure free and fair elections by taking actions to—

(1) release all persons imprisoned or otherwise restricted for the peaceful expression of their views;

(2) permit all Burmese citizens committed to peaceful participation in the political process the opportunity to contest the elections;

(3) lift electoral campaign restrictions that provide the authorities with nearly unlimited power to limit free and open debate on political and economic issues;

(4) end the involvement of the State Law and Order Restoration Council in the formulation and administrration of electoral regulations, and establish for that purpose an impartial election commission that has independent authority to establish and administer election rules; and

(5) permit access to Burma for international election observers, including those associated with intergovernmental as well as nongovernmental organizations concerned about human rights and political reform.

(b) RESPECT FOR BASIC HUMAN RIGHTS IN BURMA.—The Congress calls upon the Government of Burma to demonstrate a commitment to basic human rights by taking action to—

(1) abandon martial law restrictions on the right to a fair trial and provide all persons charged with crimes with access to lawyers and family members, adequate time to prepare defenses, and the opportunity to have cases heard by impartial tribunals; and

(2) end the practices of rape, torture, extrajudicial executions, and forced porterage of civilians, and order thorough investigations of reports of abuses and pursue prosecutions against those believed to be responsible.

(c) ACTIONS BY THE INTERNATIONAL COMMUNITY.—The Congress—

(1) calls upon the international community to withhold foreign assistance from the Government of Burma and to end all military cooperation with the Burmese Government, including arms sales and cooperation with Burmese troops operating in border areas; and

(2) calls upon the President—

(A) to undertake efforts to discourage other countries from providing foreign assistance to Burma and engaging in military cooperation with the Burmese Government, and

(B) to encourage international observation of the election process.

(d) DRUG TRAFFICKING IN BURMA; UNITED STATES ANTINARCOTICS ASSISTANCE.—The Congress—

(1) denounces the practice of accommodation with drug traffickers followed by the current Government of Burma;

(2) calls upon the Government of Burma to end its tolerance of the production and trafficking of illicit narcotics and to take vigorous actions to implement effective antinarcotics programs;

(3) take note of and welcomes Administration statements that it has no present intention of resuming narcotics control assistance in Burma;

(4) declares its unwillingness to support narcotics control measures in Burma—

(A) which, giving particular weight to the views and attitudes of the Burmese people, could indicate a lessening of United States support for democratic evolution and improvement of human rights in Burma; or

(B) which are not appropriately monitored and do not effectively reduce the production and trafficking of illicit narcotics in Burma; and

(5) urges the President to—

(A) pressure the Burmese Government to cease its practice of accommodation with drug traffickers and to pursue more vigorous antinarcotics policies;

(B) focus international scrutiny on Burma's reprehensible antinarcotics record; and

(C) encourage the Burmese Government to adhere to all international antinarcotics agreements and to cooperate with relevant international agencies.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, almost 2 years ago, in an action which foreshadowed the subsequent brutality which we all witnessed in Tiananmen Square in China, the military regime in Burma, in a desperate effort to remain in power, unleashed its own armed forces against the Burmese people. As a result thousands were killed, others were imprisoned, and the genie of democracy was stuffed back into the bottle of repression.

Since that time, the military government in Burma has responded to the democratic aspirations of the Burmese people with repression rather than with reconciliation. Over the course of the last year and a half, the systematic violation of the human rights of the Burmese people continues apace. Tens of thousands have been forcibly relocated from their neighborhoods and villages into the countryside. Thousands have been forced to engage in porterage in areas of the country where the government continues to wage war against its ethnic minorities. Torture is widespread. Rape is commonplace. The people of Burma who deeply and desperately desire to be freed, undoubtedly greatly resent the oppression which has fallen on them.

This resolution, Mr. Speaker, takes note of the continuing abuse of human rights in Burma, and calls upon the Burmese authorities to finally begin to respect the fundamental human rights of their own people. In an effort to make themselves look better in the international community, the Burmese Government has agreed to permit, next Sunday, the first multiparty elections in the last 30 years in that country. Unfortunately, the elections are a fraud, in the process of becoming a farce. Most of the key opposition leaders are either in jail or are under house arrest. All sorts of restrictions have been imposed on the ability of the candidates to campaign. The

government, unlike the Sandinista regime in Nicaragua, unlike the South African administration in Namibia has been utterly unwilling to permit international observers to enter the country in order to monitor these elections. I was myself denied a visa a few days ago when the government spokesmen said that they did not want any person in Burma like myself who in effect was not prepared to issue paeans of praise to the wise and benevolent leadership of the current regime.

This resolution calls upon the Government of Burma, if it is going to have an election, to make it a real election, to make it a genuine election, to make it a fair election. It calls upon the Government of Burma to release opposition leaders who have been unable to campaign so they can participate in the last week of this electoral contest in the political process. It calls upon the Government of Burma to permit international observers into the country. It also calls upon other foreign governments to cease their military cooperation with Burma, and to end whatever foreign aid program they may have in the country. There is no justification whatsoever for government efforts on the part of other nations to prop up a totally discredited and corrupt dictatorship in Burma.

Finally, Mr. Speaker, this resolution also addresses the narcotics problem in that country. Burma is the largest producer and exporter of illicit opium in the world. To make matters worse, the government there engages in a matter of accommodation with the drug traffickers in their own country. The resolution welcomes recent statements by the administration that it has no present intention of resuming narcotics control assistance in Burma. The resolution indicates that the Congress would not be prepared at this time to support any expansion of our narcotics program in Burma, particularly given the extent to which that could very easily be interpreted by the Burmese people as an indication that we were somehow or other by virtue of such activity, legitimizing what is, in effect, an illegitimate government. Also, given the degree of cooperation between the government and the narcotics producers, there is absolutely no reason to hope or believe that any increased cooperation between our two governments could, in fact, lead to a solution of the problem.

As some of our colleagues may know, the GAO recently submitted a report raising very serious questions about the efficacy of any narcotics control program in Burma, given the problems we have had in implementing these programs in the past, and the degree to which the government seems to benefit from the narcotics trade in the country.

Mr. Speaker, in conclusion I want to urge my colleagues to support this resolution. I think we will shortly find out from my dear friend on the other side of the aisle, that distinguished apostle of bipartisanship and statesman, the gentleman from Michigan [Mr. BROOMFIELD], the ranking minority member of the committee, that this resolution enjoys strong bipartisan support. We have accommodated some of the concerns of the minority. I am told the administration has no opposition to the adoption of the resolution. In conclusion, Mr. Speaker, that whatever impact this resolution may or may not have on the Government of Burma, and I am rapidly losing faith in anything to influence the Government of Burma, I do think it will be warmly received by the people of Burma who will learn about it not from the government-controlled media, but from the Voice of America and other foreign broadcasting services which are able to penetrate the bamboo curtain in Burma, and which are heard by the Burmese people. They will learn, once again, that they have not been forgotten, and that the cause of democracy which burns so brightly in their hearts, has been seen and responded to by the world's greatest parliamentary body, the Congress of the United States.

□ 1240

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

First, I would like to compliment the gentleman in the chair. I do not know if many people realize that we have in the chair today the dean of the entire House of Repersentatives, the gentleman from Mississippi [Mr. WHITTEN], who has served more than 50 years. JAMIE, it is good to see you up there.

The SPEAKER pro tempore (Mr. WHITTEN). I thank the gentleman for those kind statements.

Mr. BROOMFIELD. Mr. Speaker, I want to join my good friend, the gentleman from New York [Mr. SOLARZ], who is the chairman of the Subcommittee on Asian and Pacific Affairs of the Committee on Foreign Affairs. The gentleman from New York is one of the most distinguished Members of this House and is one of the most knowledgeable people that I know on the subject of foreign affairs. I am happy to join him in support of this particular concurrent resolution, because it is a bipartisan effort supported by the chairman of the Committee on Foreign Affairs and also by the gentleman from Pennsylvania [Mr. YATRON], the chairman of the Subcommittee on Human Rights and International Organizations of the Committee on Foreign Affairs. In fact, most of the members of the Committee on Foreign Affairs have expressed their strong support of the legislation which the gentleman from New York has explained.

Mr. Speaker, I just want to make a few observations along the lines of those made by the gentleman from New York [Mr. SOLARZ].

Mr. Speaker, Burma, which once had been considered the richest country in Southeast Asia is now considered one of the poorest in the world. While the Burmese people are suffering violations of their basic human rights, the military regime in control will be conducting elections on May 27 that are neither free nor fair and make a mockery of the electoral process.

To make things worse, the Government is cooperating with drug producers and traffickers that have made Burma the world's leading producer and exporter of illicit opium. We have the military regime in Burma to thank for this. Since they came to power in September 1988, narcotics production has nearly doubled in Burma.

House Concurrent Resolution 324 clearly expresses the concerns of the Congress regarding the dismal picture in Burma. It calls on Burma to hold elections that are free and fair, and urges the international community to support such elections. Further, it calls for Burma to respect the internationally recognized human rights of its people.

In the area of narcotics trafficking, it calls on Burma to end its tolerance of the production and trafficking of illicit narcotics and to implement effective antinarcotics programs. The resolution also declares the unwillingness of Congress to support antinarcotics control measures that could indicate a lessening of United States support for democratic evolution and improvement of human rights in Burma.

These are important signals on where our country stands as Burma approaches its elections. There is still a chance for the Burmese Government to do things right and allow democracy to flourish. I urge my colleagues to approve this resolution.

Mr. RICHARDSON. Mr. Speaker, I am heartened to see that a resolution condemning human rights abuses in Burma is sharing time on the floor today with a similar resolution regarding China. In many ways the human rights abuses in Burma have been as serious, perhaps more serious, than the ones in the People's Republic of China. Unfortunately, human rights abuses by the military regime in Rangoon have not undergone the scrutiny and public attention that is deserved.

Last week, the human rights caucus held a hearing chaired by my colleague from Illinois, JOHN PORTER, which focused needed attention on human rights abuses in Burma.

During this hearing Deputy Assistant Secretary of State for Human Rights Paula Dobriansky testified to the tremendous abuses being perpetrated by Generals Ne Win, Saw Maung, and their cronies.

Ordinary civilians are pressed into duty as porters by the military. These porters are

unpaid, poorly fed, and, once too weak to carry on, are left to die.

There are substantiated reports of porters being used to sweep minefields.

The Burmese student activist movement, crushed by the military's massacre in Rangoon in September of 1988, remains in hiding along the Burma-Thai border. This body approved one-quarter million dollars last year for food and medicine for the student camps. As the situation continues to deteriorate, these students will require both moral and substantiive support from the United States.

And amidst this atmosphere, the military regime in Rangoon is attempting to convince the world that Burma is about to undergo free and fair elections on May 27. Mr. Speaker, these elections will neither be free nor fair.

Suu Kyi, the dynamic leader of Burma's strongest opposition party, the National League for Democracy, has been under house arrest since July 1989. Tin Oo, the National League for Democracy's chairman, has been sentenced to 3 years hard labor. Hundreds, if not thousands, of opposition activists have met the same fate.

And in an effort to finance their regime, the Burmese generals have sold off their nations teak forests and fishing harvests to foreign companies and nation's willing to pay top dollar for wood and fish, regardless of the disastrous impact on the Burmese people.

Mr. YATRON. Mr. Speaker, I thank my colleague from New York, Mr. SOLARZ, for introducing this important legislation. I also want to commend the chairman of the Foreign Affairs Committee, Mr. FASCELL, and the ranking minority member, Mr. BROOMFIELD, for their leadership on this and other human rights issues. Mr. BEREUTER and Mr. LEACH should also be commended for their continued efforts to promote human rights.

The Burmese military government is one of the most corrupt and oppressive in Asia. The resolution before us today puts the Congress on record as deploring the sham elections scheduled for May 27 and the imprisonment of thousands of people associated with the democracy movement. House Concurrent Resolution 324 also calls attention to Burma's growing narcotics production since the military regime came into power in 1988.

Mr. Speaker, it has been almost 2 years since the Burmese military killed over 3,000 democracy demonstrators. According to a recent Amnesty International report, severe human rights violations have persisted at a consistently high rate ever since the military crackdown. These abuses include mass arrests, widespread torture, summary trials, and extrajudicial executions.

The military government has guaranteed its success at the polls on May 27 by jailing several thousand members of the opposition. Most of the members of the leading opposition party are either serving time in hard labor, detention, or are under house arrest. Moreover, the American Embassy has cited evidence that some opposition politicians have been tortured and killed while in detention.

The Burmese military regime has taken what was once one of the most prosperous countries in Asia and made it destitute. This Government is propping itself up on its drug profits, while the Burmese people are barely surviving.

Mr. Speaker, the lack of democratic and fundamental human rights in Burma and that country's role as the world's largest opium supplier should be of key concern to the Congress, the Bush administration, and the world community. Therefore, I urge the adoption of this resolution.

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 324, concerning human rights, democracy, and illicit narcotics production and trafficking in Burma.

Mr. Speaker, in the jubilation over the events of Eastern Europe, it may be easy to forget those who are still enslaved. We must not let this happen in the case of Burma, which is suffering under a cruel military dictatorship despite the clear wishes of the people for democratic reform. Elections are scheduled for May 27, but despite the Government's promise that they will be free and fair, thousands of prodemocracy demonstrators remain in prison, opposition figures continue to be arrested and prevented from standing for election, the authorities regularly abuse the civilian population through rape, torture, executions, and forced porterage, and the rules of the election campaign have been rigged to prevent free and open debate. This is an election in name only, and one in which it seems inevitable that the people will lose.

As if this depressingly familiar litany of problems were not sufficient, the Burmese authorities have cynically reached an accommodation with drug traffickers in that country, permitting the authorities to devote their attention full time to oppressing their own people. As a result, Burma has become the largest producer and exporter of illicit opium in the world.

House Concurrent Resolution 324 notes all of these developments, and calls on the Burmese Government to establish the conditions necessary to ensure free and fair elections, and to demonstrate a commitment to basic human rights. It calls on the international community to withhold foreign assistance from the Burmese Government and to end military cooperation with that Government. Finally, it denounces the cynical practice of accommodation with drug traffickers, states the unwillingness of Congress to support narcotics control measures in Burma which could undermine United States support for democratic evolution or which are not appropriately monitored.

This resolution, of course, may not change the minds of the ruthless authorities in Burma. But it will put Congress on record as standing with the Burmese people, who yearn for the same kind of freedom that other tyrannized countries are now beginning to experience. I urge all my colleagues to support House Concurrent Resolution 324.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

Mr. SOLARZ. Mr. Speaker, I thank the gentleman from Michigan [Mr. BROOMFIELD] for his comments. I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 324, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the concurrent resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the current resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## CONCERNING THE FIRST ANNIVERSARY OF THE TIANANMEN SQUARE MASSACRE

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 393) concerning the first anniversary of the Tiananmen Square massacre of June 4, 1989, in the People's Republic of China.

The Clerk read as follows:

H. RES. 393

Whereas the death of the former General Secretary of the Communist Party of the People's Republic of China, Hu Yaobang, on April 15, 1989, gave rise to peaceful protests throughout China calling for democratic reforms, including freedom of expression, freedom of assembly, and the elimination of corruption by government officials;

Whereas after that date, thousands of democracy demonstrators continued to protest peacefully in and around Tiananmen Square in Beijing until June 3 and 4, 1989, when Chinese authorities ordered the People's Liberation Army and other security forces to use lethal force to disperse demonstrators in Beijing, especially in the vicinity of Tiananmen Square;

Whereas according to the Department of State's Country Reports on Human Rights Practices for 1989, on June 3 and 4, 1989, People's Liberation Army soliders and other security forces killed at least several hundred, possibly thousands, and wounded thousands more;

Whereas thousands of people suspected of taking part in the democracy movement have been arrested and detained without trial, and some have reportedly been tortured;

Whereas the Government of the People's Republic of China continues to suppress the people of China and has launched a countrywide campaign to punish and silence anyone suspected of involvement in the democracy movement; and

Whereas on the occasion of the first anniversary of the Tiananmen Square massacre of June 4, 1989, the House of Representatives should recognize the significance of this date and commend the participants in the democracy movement in the People's Republic of China: Now, therefore, be it

*Resolved,* That the House of Representatives—

(1) expresses its sympathy to the families of those killed as a result of their involvement in the democracy protests in the People's Republic of China;

(2) commends those involved in the democracy movement for their courage and determination, and recognizes their great personal risk in seeking democracy for the people of the People's Republic of China;

(3) urges the Government of the People's Republic of China to release all persons detained for the peaceful expression of their views and to refrain from persecuting democracy movement participants; and

(4) calls on the Government of the People's Republic of China to respect internationally recognized human rights, including freedom of expression, assembly, and association.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, permit me to begin by paying tribute to my very good friend, the author of the resolution, the distinguished gentleman from Pennsylvania [Mr. YATRON], who unfortunately could not be with us today but who is engaged in pressing business at this very moment dealing with the subject matter of this resolution. I think he deserves the appreciation of all the Members of the House for his initiative in drafting this resolution and in facilitating its expeditious consideration by the Committee on Foreign Affairs and in turn making it possible for us to bring it to the floor in such a timely fashion.

Next week we will be observing the first anniversary of the massacre in Tiananmen Square, which brought a temporary end to what may well have been the greatest movement for democracy in the history of our troubled and turbulent times. Who among us can possibly forget the stirring scenes we saw on our own television screens last spring when literally millions of Chinese—not just students but workers and bureaucrats and men and women from all walks of life—not just in Beijing but in cities all across China took to the streets in order to participate in peaceful protest for democracy. They were not throwing stones, they were not hurling Molotov cocktails, they were not brandishing Kalishnikovs. They were merely standing up and peacefully protesting for greater democratization and for an end to the pervasive corruption which exists today in the People's Republic of China. And after several weeks the gerontocracy which is now in power in the People's Republic of China decided to respond to the democratic aspirations of their people not with reconciliation, not with pledges and promises of progress toward democracy, not by a commitment to crack down on corruption, but by a massive repression spearheaded by the slaughter of what may one day turn out to have been thousands of their own people, who were gunned down and massacred in cold blood in and around the vicinity of Tiananmen Square.

Since that time the repression in China has deepened. We have reason to believe, based on the estimates of respected human rights organizations like Asia Watch and Amnesty International, that tens of thousands of Chinese remain in prison today, primarily because of their willingness to identify with the movement for democracy in China last spring.

Torture is by no means unknown. China still continues to jam the broadcasts of the Voice of America. While some cosmetic improvement have been seen in the sense that martial law has been lifted in Lhasa, the capital of Tibet, and Beijing, the capital of the country, and while several hundred political prisons have been released, the reality of oppression remains.

□ 1250

This resolution today, Mr. Speaker, pays tribute to those Chinese who were willing to put their lives, their fortunes, and their sacred honor on the line last spring on behalf of many of the same principles for which our Founding Fathers were prepared to put their lives, their fortunes, and their sacred honor on the line over 200 years ago.

I have no doubt that one day the principles and ideals for which the Chinese students and others sacrificed their lives last June will one day be realized, and I think it is terribly important in the interim that the people of China know that the United States stands on the side of democracy rather than of dictatorship in their country, that we support a process of reconciliation rather than a policy of repression.

So, in the text of this resolution we express our sympathy to the families of those who were killed as a result of the crackdown. We commend the courage and the conviction of those who were willing to take such great risks on behalf of a more open and pluralistic China.

We urge the Government of the People's Republic, if they are at all willing to listen, to release, not just a few hundred, but all of those who remain in prison, not because of any acts of violence, but simply because they were willing to stand up and speak out for democracy. We call upon the Government of China to respect the internationally recognized human rights of their own people, including the freedom of expression, assembly, and association.

A little bit later in the week the President of the United States is going to have to make a very important decision about whether or not to continue most-favored-nation tariff status for China. I very much hope that this decision can be made in a way which facilitates the emergence of broad bipartisan support in the Congress for the decision the President decides to make.

I think it is important, if at all possible, for us to speak with one voice. I think it was fortunate last year that for many months the President and the Congress were not singing from the same hymnal. We are always most effective abroad when we are united at home, and I think the President does have an opportunity to use this decision with respect to MFN to bring us together here in our own country so that we can speak to China with one voice.

Mr. Speaker, that implies that whatever decision he makes, it is done in a way which makes it absolutely clear that the United States is attempting to help those who are in the forefront of the struggle for political and economic reform in China and that the United States will not resume a business-as-usual relationship with a government which continues to systematically violate the fundamental human rights of its own people.

However, Mr. Speaker, if this decision is going to be made in a way which makes it possible for all of us to come together, it is going to require consultation. I regret to say that, even at this very late moment, with the decision only days or, perhaps, even hours away, so far as I know, none of the Members of Congress who has been most actively involved in the effort to shape a response to the repression in China which is compatible with the fundamental principals and interests of our own country, has yet heard anything either from the President or his chief advisers on this issue. I do not know if anybody downtown is observing this debate or listening to what will be said on the floor during the course of the consideration of this resolution. But it is still not too late to reach out because there are people here on both sides of the aisle who would like to work with the administration in order to shape a response which is consistent with our ideals and which is compatible with our interests.

However, Mr. Speaker, I do not think the President or the administration should be under any illusions. If this issue is not handled in an appropriate way, it will set the stage for

what will be, I think, a very divisive debate here in the Congress, not on a partisan basis by the way. I am pleased to say that, when we passed the bill to impose sanctions against China last year, the 418 Members of the House voted in favor of it, and no one voted against it. Here in the Congress, Democrats and Republicans were acting in unison, and I think it was unfortunate at the time that we did not have the President with us because that would have meant the message we sent to China would have been heard even more clearly.

Now we are back again at the same old China stand, and I only hope that this time we can work together. But whatever the President decides to do, this resolution, which does enjoy the support of the Republicans as well as Democrats, should make it very clear, both to the leaders in Beijing and to the Chinese people throughout that great country, that the House of Representatives admires what they tried to achieve last year and remains strongly committed to the great cause of democracy for which they sacrificed so much last June.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

First of all, Mr. Speaker, I would like to join with the gentleman from New York [Mr. SOLARZ] in paying tribute to the gentleman from Pennsylvania [Mr. YATRON], the principal sponsor of this legislation. This gentleman from Pennsylvania, of course, has been interested in human rights for ever since he has been a Member of this Congress, and he has done a yeoman's job. I also want to join the gentleman from New York [Mr. SOLARZ] in paying tribute to him.

We have a number of sponsors along with the gentleman from Pennsylvania [Mr. YATRON]. The gentleman from Florida [Mr. FASCELL], of course the chairman of the Committee on Foreign Affairs, has been very active along with the gentleman from New York [Mr. SOLARZ], the gentleman from Utah [Mr. OWENS], the gentleman from Ohio [Mr. FEIGHAN], the gentleman from New York [Mr. ACKERMAN], the gentleman from Washington [Mr. MILLER], the gentleman from New York [Mr. WEISS], the gentlewoman from California [Ms. PELOSI], the gentlewoman from Kansas [Mrs. MEYERS], the gentleman from New York [Mr. GILMAN], and myself are the principal sponsors of this resolution.

Mr. Speaker, it has been nearly a year since Chinese troops rolled their tanks into Tiananmen Square and killed hundreds, and possibly thousands, of democracy demonstrators. The vivid memory of military brutality and wholesale carnage suffered by the peaceful demonstrators has not been dimmed by the passage of time.

Since the massacre at Tiananmen Square, President Bush has gone more than the extra mile to encourage the Chinese leadership to end oppression and begin observing basic human rights. Even the President concedes that the Chinese response has been far from satisfactory.

Instead, we have seen continued efforts to hunt down and arrest those suspected of participating in last June's democracy demonstration. There have been harsh warnings and stern measures designed to suppress normal political activity or criticism of the Beijing regime. And, as Congress prepares to examine this important issue, we have been subjected to a cynical attempt to manipulate this body by the lifting of martial law in Beijing and Tibet while in fact the oppression continues unabated.

Mr. Speaker, despite the efforts of Beijing's government to crush democracy in China, they have failed. They currently control the reins of power, and oppression continues; but they have not defeated the democracy movement. The ideal of democracy endures in the hearts of the Chinese people, even during this dark period of brutal repression.

House Concurrent Resolution 393 pays tribute to the courage and dedication of the Chinese people and recognizes the inner strength of the democracy movement. It further calls upon the Government of China to recognize the legitimate aspirations of the people that were suppressed during the brutal assault at Tiananmen Square last June.

As an original cosponsor of this resolution, I thank Chairman FASCELL, and Congressmen YATRON and BEREUTER for their leadership in moving House Concurrent Resolution 393 to the floor, and urge my colleagues to support its passage.

□ 1300

Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. LAGOMARSINO], a member of the Committee on Foreign Affairs.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I want to commend the gentleman from Pennsylvania [Mr. YATRON], as well as the gentleman from New York [Mr. SOLARZ]; the chairman of the full committee, the gentleman from Florida [Mr. FASCELL] and, of course, the gentleman from Michigan [Mr. BROOMFIELD] for bringing this resolution before us.

The thing that is so different about what happened in Tiananmen Square compared to what had been going on in China for many years, where it is estimated that tens if not scores of people have been killed by the Red Chinese, is that it was done in the open. There were television cameras there. It was all recorded for all of us to see and watch and observe.

I think that it is important for us to remind not only those who are fighting for democracy in China, both in China and those who are here in the United States of Chinese extraction, but to remind the Chinese leadership as well that we have not forgotten and we will not forget and that we do stand very strongly by those who are fighting for democracy.

Hopefully they will get the message. China is one of the few places left in the entire world where the message apparently has not gotten through.

So, Mr. Speaker, again I want to commend everyone who has brought this resolution before us and I urge my colleagues to support it.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey [Mr. SMITH], a member of the Committee on Foreign Affairs.

Mr. SMITH of New Jersey. Mr. Speaker, I thank my friend, the ranking member, for yielding this time to me.

Mr. Speaker, I want to join with my colleagues in the accolades to the gentleman from Pennsylvania [Mr. YATRON], who has shown himself as chairman of the Human Rights Committee to be very even-handed and committed to principle. As chairman, he has helped expose the kind of atrocities we see going on throughout China, perpetrated by both the left wing and the right wing, the communists as well as the hard right. We have had a very active agenda and as a member of that committee, I want to commend the gentleman from Pennsylvania [Mr. YATRON] for his very effective leadership on these issues.

Mr. Speaker, today the House goes on record again deploring the slaughter of the prodemocracy students in Tiananmen Square. We also express our deepest sympathies to the families of those deceased patriots.

A brutal crackdown continues, Mr. Speaker, as we all know. Freedom-loving students are hunted, they are jailed, they are beaten, and they are tortured.

Mr. Speaker, last week in a hearing in the Foreign Affairs Committee we heard from one of the leaders of the student movement in this country, Dr. Haiching Zhao, the chairman of the National Committee on Chinese Student Affairs. His testimony was very moving. It was very eloquent. I would like to quote very briefly from it. Dr. Zhao said:

> Less than one year ago the world watched in horror as participants in the democracy movement in China were brutally massacred and suppressed by the current regime. We were all shocked and appalled to see troops fire indiscriminately upon peaceful protesters and curious onlookers alike. Thousands of unarmed civilians were killed, and many more injured last June. In the aftermath,

scores of young activists were summarily executed. Thousands upon thousands of political prisoners were detained, without trial or access to legal counsel. These prisoners underwent brutal interrogations, and many suffered severe beatings with electric batons and rifle butts.

The gross violations of human rights did not end with the events in Tiananmen Square. Today, de facto martial law exists in Beijing and Tibet and a repressive atmosphere lies heavily over the rest of the country. The central government will not tolerate the exercise of even the most basic political and civil rights.

Mr. Speaker, as they have in the past, the Communist hardliners in Beijing, and I do not think we should kid ourselves by suggesting that hardliners in Beijing are anything but an old commodity, they are not a new commodity; there have been hardliners there since the Communist revolution, but they continue to demonstrate to the world that the health and the well-being of the individual is of no consequence. It is truly a fact that people in that country are accorded little or no value. They do not count for much in the eyes of the hardliners. They are important only as far as their utility and their blind obedience to party dictates will go.

The People's Republic of China clearly makes a mockery of human rights.

Mr. Speaker, I would suggest and I think all of us would agree that the hardliners in Beijing have much to account for. The have demonstrated their callousness and extreme hate during the cultural revolution and they continue to demonstrate that toward women and children in their brutal implementation of the one child per couple policy.

I would point out to my colleagues that just last week on human rights, we have seen they are indivisible. When we speak of the massacre in Tiananmen Square, the crackdown on religion, the crackdown on the people of Tibet, we should also remember another human rights abuse that very often goes largely unnoticed, and that is the iron-fisted population control program.

I would recommend to my colleagues a book just published by Dr. John Aird, the former senior research analyst for the Census Bureau, entitled "Slaughter of the Innocents," in which he recounts in great detail the repression that is being visited upon the women in China as a result of this one child per couple policy.

I will include a book review on this contained in the Wall Street Journal of May 14, 1990, at this point.

[From the Wall Street Journal, May 14, 1990]

CHINA'S IRON-FISTED POPULATION CONTROL

(By R. Cort Kirkwood)

In September 1987, an expectant Chinese couple temporarily residing in the U.S. received a note from a factory back home where the wife worked. It wasn't a baby shower invitation.

The Walfantia Bearing Factory warned the couple that their pregnancy was unauthorized and that everyone from "the factory director . . . to the cadres in charge of the birth control program" would be punished if the baby was born. Because the "consequences for you are unthinkable," the factory authorities ominously warned, "you should . . . fix your problem any way you can. You must not delay! If you have real difficulties, return to China immediately for an abortion. . . ."

This international direct-mail program is just one of the dark aspects of the Chinese Communist Party's ferocious population-control effort, and just one of the grim details John Aird, the Census Bureau's former authority on China, provides in "Slaughter of the Innocents" (The American Enterprise Institute for Public Policy Research, 191 pages, $16.95).

Far from being a blessed event, nearly every birth in China is viewed with a jaundiced eye because it might violate the population policy, which evolved during some 30 years after Mao Tse-tung broke with traditionally optimistic Marxist thinking on large populations.

"It is a very good thing that China has a big population," Mao wrote in 1949. "Of all the things in the world, people are the most precious." But as the utopian vision of a communist Promised Land faded away, Mao was less prepared to let a thousand flowers bloom. By 1955 he was warning that unfettered population growth could lead to the "extinction" of the Chinese race.

Thus he set in motion a program to help the Chinese overcome their "feudal mentality" and "conservative tendency" toward large families and adopt "birth plans." Yet even under Mao's iron fist, birth-control efforts in China during the 1950s and 1960s were fairly mild.

Then in the 1970s a new anti-natalist campaign required local authorities to make planned parenthood and birth control part of the "class struggle." Opponents became (and today remain) "class enemies." Mr. Aird writes, and Beijing's birth directives grew increasingly more draconian. In 1979, with China's population taking a great leap forward, the authorities explicitly defined the state's interest: zero population growth by the year 2000.

Mr. Aird convincingly shows that China's government has been willing to do just about anything to reach that goal, justifying their efforts with the neo-Malthusian idea that people inhibit economic growth. That Hong Kong supports a vastly denser population is clearly of no interest to functionaries pursuing an economic system that is in fact directly responsible for China's woes. "Whether we can strictly control population growth," Mr. Aird quotes the People's Daily, "will directly determine whether we can smoothly achieve our economic development objectives." And so the Forbidden City's geriatric potentates prohibit "early marriages, early births" and decree forced sterilization and compulsory abortion. "Use whatever means you must," Deng Xiaoping urged in 1981, "but do it."

Far from stopping at hugh fines and cutting off a family's water and electricity supply for begetting an unauthorized child, the Communist Party has outlawed removing an intrauterine device. And while pregnant Chinese nationals living abroad receive letters urging abortions, women on the home front are treated to "study classes" and "heart-to-heart" talks during which birth control cadres press them into an abortion, followed by IUD insertion or sterilization.

Doctors now storm through villages on abortion and sterilization raids. To preserve the "happy peace" that state-sponsored birth-control efforts bring to the people, Mr. Aird writes, china has even "destroyed infants by injections of alcohol into the fontanel" and by stuffing gauze into their mouths.

The population control lobby will no doubt condemn "Slaughter of the Innocents" not only for the beam it shines on China's program, but also because Mr. Aird attacks this group in the book's opening chapter. Even as Chinese authorities committed mass infanticide, the United Nations Population Fund enthusiastically bestowed awards and money on a program it averred was "totally voluntary." Others less sanguine about China's zealous quest merely call the program "agressive" or "rigorous."

But as recently as last year, China permitted the publication of articles demanding coercive sterilization and compulsory abortion for all women under 24, all second pregnancies spaced less than five years after the first and all third pregnancies.

John Aird deserves acclaim not only for his painstaking academic research on a difficult subject, but also for dispassionately exposing China's brutal methods. The question is whether the population control movement that has championed China's model will learn something from it.

---

[From the Chicago Sun-Times, May 13, 1990]

CHINESE COUPLE FLEEING ABORTION WIN PERMISSION TO STAY IN UNITED STATES

(By Alan Flippen)

BUFFALO, NY.—The State Department has ruled that a Chinese couple who fled their homeland's forced abortion policy qualify for refugee status, clearing the way for them to receive political asylum, their lawyer said Friday.

Li Jin Lin and his wife, Wang Sai Zhen, are the first known cases to test President Bush's Nov. 30 directive that grants asylum to people fleeing forced abortions or sterilizations in their native countries.

They had been awaiting a U.S. Immigration and Naturalization Service hearing that would decide whether they could stay in the United States, but the State Department ruling ended the proceedings against them, said Kathleen Rimar, the couple's lawyer.

The State Department letter said they qualify for refugee status under federal law but did not specifically mention abortion.

Li, a 37-year-old machinist, and his 34-year-old wife fled their hometown of Fuzhou last year when Wang became pregnant with what would have been the couple's second child. Chinese law limits most families to one child and requires women who conceive again to undergo abortions.

Mr. Speaker, finally I just want to say that this resolution keeps this issue in the minds and in the hearts of the American people, and it particularly keeps it in focus for the Congress. We need to raise this issue of the democracy students over and over.

I would suggest that as we look forward to the MFN struggle, whether or not MFN should be continued for China, I am one of those who is a

sponsor of legislation that would suspend it, we need to figure out and craft what we hope will be the best policy to try to put the pressure on the hardliners in Beijing so that human rights will be recognized for all.

Mr. YATRON. Mr. Speaker, many Members of the House are aware that it will soon be 1 year since the Chinese authorities ordered the bloody crackdown on peaceful democracy demonstrators in Beijing. The current Chinese regime showed its true colors by using indiscriminate lethal force against peaceful demonstrators.

We were shocked by the images of June 4 and disappointed that the China we thought was on a path of reform had changed very little from the China of Mao Zedong. The Chinese leadership made its real fears known on June 4—that it is afraid of the free will of the Chinese people. This regime has proven that it will use any amount of force to maintain its ill-gotten power.

I have introduced House Resolution 393 to mark the first year anniversary of the military crackdown on the democracy movement in China. The events of June 4, 1989, are too powerful to forget and too many young lives were lost.

This resolution commends the democracy movement participants for their courage and determination in seeking democracy not only for themselves, but for every person in China. Moreover, this resolution urges the Chinese Government to release all political prisoners, refrain from persecuting democracy movement participants, and to respect internationally recognized human rights. House Resolution 393 also expresses our sympathy to the families of those who died for democracy.

Mr. Speaker, I commend the chairman of the Foreign Affairs Committee, Mr. FASCELL, and the committee's ranking minority member, Mr. BROOMFIELD, for expediting this resolution. I would also like to thank Mr. BEREUTER, Mr. SOLARZ, and Mr. LEACH for their leadership on human rights issues and for their prompt consideration of this resolution so we could report it in a timely fashion before the Memorial Day recess.

Mr. GILMAN. Mr. Speaker, I rise in strong support of House Resolution 393, legislation concerning the first anniversary of the Tiananmen Square massacre of June 4, 1989, in the People's Republic of China.

It is well known that the killings, torture, and repression of prodemocracy supporters continue unabated in the People's Republic of China and occupied Tibet. As the anniversary of the slaughter in Tiananmen Square draws closer, it is appropriate that our Nation review our present China policy. The sanctions put in place by the Congress in response to the repression have had no affect on the ruling authorities in the People's Republic of China. They continue their search for participants in the prodemocracy movement in order to severely punish them, they continue to support the Khmer Rouge and they continue to sell missiles to hostile nations in the Middle East.

It is abundantly clear that the leaders in Beijing have received the wrong sort of message from the United States and its allies. They do not feel that the West has yet to respond strongly to the ongoing repression in the People's Republic of China and in Tibet.

There are currently 40 cosponsors of legislation which would deny most-favored-nation status to the People's Republic of China. I hope that China's rulers will soon receive a clear message on just how strongly Americans feel about human rights and democratic freedoms.

Accordingly, I urge my colleagues to fully support House Resolution 393.

Mr. LAGOMARSINO. Mr. Speaker, as a cosponsor of House Resolution 393, I rise in strong support of this important resolution recounting the tragic, brutal events in Tiananmen Square last June and urging the People's Republic of China to take immediate steps toward political reform and Improvement of human rights.

Unfortunately, this is not the first time the Communist Chinese dictatorship has massacred the Chinese people it claims to represent. The People's Republic of China Government has a very long and bloody history of oppressing those wanting democracy, basic human rights, freedom and liberty. Tens, if not scores, of millions of Chinese have been murdered by the Communists since their takeover in 1949. However, unlike the brutal masacres of the past—like the great purges of the so-called cultural revolution—the terror in Tiananmen Square was witnessed by millions of television viewers around the world. The real brutal nature of the Communist regime in China was brought into our living rooms and kitchens through the media. We have justifiably reacted with great outrage and disgust against these cruel actions.

As a senior member of the House Foreign Affairs Committee, I have joined in many measures that have passed the House in strongly condemning the actions of the Communist authorities and in strongly supporting the movement for more democracy and freedom. I supported strict sanctions against the People's Republic of China following the massacre in Tiananmen Square and supported legislation providing special protection to Chinese students here in the United States.

I believe this resolution, reconfirming the United States House of Representative's condemnation of the Tiananmen Square massacre; calling on the People's Republic of China to respect internationally recognized human rights—including freedom of expression, assembly, and association; urging the People's Republic of China to release all persons detained for the peaceful expression of their views; commending those involved in the democracy movement for their courage, determination and the taking of great personal risk; and expressing sympathy to the families of those killed as a result of their involvement in the democracy protests is important. It reminds the Communist Chinese Government that Congress has not forgotten—we are still watching and will take actions based on the real situation in China today.

I am encouraged that some small steps have been taken. However, I believe these are only token measures designed for positive congressional consumption. Well, I will not be fooled. Much more needs to be done by the People's Republic of China Government. If the Chinese Government seeks an improvement in relations—including economic and trade relations—it is going to have to positively and seriously address all of the pressing issues raised in this resolution.

I want to take this opportunity to commend Congressmen SOLARZ and YATRON, the chairmen of the Subcommittees on Asian Affairs and Human Rights, respectively, full committee Chairman FASCELL and full committee Vice Chairman BROOMFIELD for crafting this resolution and moving it expeditiously through the Foreign Affairs Committees and to the House floor.

Again, I strongly support this resolution and urge my colleagues to join me in passing it today. Thank you.

Mr. FASCELL. Mr. Speaker, I rise in strong support of House Resolution 393, recognizing the first anniversary of the June 4 Tiananmen Square massacre when at least several hundred, and quite possibly many more Chinese citizens peacefully demonstrating for democracy were cruelly killed by People's Liberation Army soldiers.

It is a sad day for us as we commemorate this tragic event. At a time when we are encouraged by the emergence of democracy in many countries in Eastern Europe and Latin America, we hear reports from many sources of continued violations of internationally recognized human rights in China. In the year since the tragic events of June 1989 repression continues throughout China and many thousands of citizens continue to be detained without trial because of their participation in the democracy movement.

I commend Representative YATRON for his leadership in bringing this resolution to the floor of the House. I join with him and other colleagues in urging the release of those detained for their participation in the democracy movement and in calling on the Government of the People's Republic of China to respect internationally recognized human rights. Passage of this resolution provides us with one more opportunity to convey to the Government of China our strong distaste with their represssive policies.

Mr. MATSUI. Mr. Speaker, I would like to add my ardent support for House Resolution 393, and I thank the Speaker and the Foreign Affairs Committee for bringing this resolution to the floor in such a timely manner.

I know my colleagues will agree that there is no joy in our gathering to remember the massacre that took place in Tiananmen Square on June 4, 1989. There is nothing to celebrate. There has been almost no improvement in the deplorable human rights conditions in China and no reprieve to the suppression of democracy in that country.

The events of June 4 are well known around the world despite the silence of the Government and the repression of the press in China. What is perhaps not as well documented or publicizied is the campaign of punishment and persecution that the Government has waged upon its people since that fateful day last year.

Of course, it is important for us to recognize those who perished in the square defending their right to democratic reforms; those who were prosecuted and killed in the days following the massacre; and those who are continu-

ing that struggle in the face of the brutality inflicted upon their fallen comrades.

If democracy is ever to prevail in China, it will require the assistance and encouragement of the United States. Hopefully, our token of recognition today will spur on those committed to the democracy movement in China, and will make crystal clear to the Government of China on which side the United States comes down in this conflict.

Mr. Speaker, it is important that we remain attentive to the situation in China as it continues to evolve. Therefore, it is fitting that we pass this resolution as a vigil to the democracy movement in China. I commend Chairman FASCELL for his leadership on this measure, and I urge my colleagues to join me in supporting the resolution.

Mr. PORTER. Mr. Speaker, I rise in strong support of House Resolution 393, concerning the first anniversary of the Tiananmen Square massacre. I commend my colleague, GUS YATRON, for his advocacy of human rights in China and in other parts of the world.

We are here today to pay tribute to the students—those who bravely participated in a hunger strike last year in Tiananmen Square and those who commemorated their peaceful struggle for democratic reforms on Sunday, May 13.

In Tibet, like Tiananmen Square, students who have dared to speak out against Chinese repression have also faced open repression and violence.

There is one thing that these students know that the aged Chinese leadership does not realize—the desire for human rights cannot be suppressed by bullets and tanks.

The brutal dictators in Beijing whose power rests on the threat of crackdown will do all that they can to prevent the outbreak of freedom in China.

Despite lifting martial law, they will continue to imprison anyone for peacefully demonstrating against their regime. They will continue to harass and intimidate prodemocracy activists. They will continue to hold some 30,000 political prisoners without due process. They will continue to repress all forms of religious, political, social, and economic expression in the defense of Communist principles and Marxist ideology.

In Tibet, they will continue to repress the religious and political activities of Tibetans whose only desire is to live without oppression.

However, as the world knows, the leaders of Beijing are living on borrowed time.

Mr. Speaker, the Congress and the American people stand with the students who on May 13 commemorated National Day in Support of Freedom and Human Rights in China and Tibet.

We will also express our support for the Chinese students as they commemorate the anniversary of the military crackdown that crushed their peaceful drive for democracy in Tiananmen Square on June 3.

One of America's greatest legacies is the foundation we have established towards respecting fundamental freedoms and human rights.

It is up to us to uphold that legacy in other parts of the world, like China and Tibet, whenever freedom-loving people encounter resistance from wornout repressive governments.

The students who spoke out for their rights in Tiananmen Square and those who continue in their efforts are the future of China and I salute them for not giving up in the face of tyranny.

One day, democracy will come to China and I expect that day will be soon.

Mr. HOYER. Mr. Speaker, today I rise in strong support of House Resolution 393, a sense of the Congress resolution expressing sympathy to the loved ones of the hundreds, perhaps thousands of Chinese prodemocracy demonstrators killed by their own Government nearly 1 year ago.

In addition to the expression of sympathy, House Resolution 393 recognizes and commends those people who participated in the prodemocracy demonstrations, and urges the Chinese Government to release all demonstrators who have been detained for taking part in the protest.

Mr. Speaker, June 4 will mark the 1st anniversary of the Tiananmen Square massacre. We have all heard the widespread reports that once the disturbance was quelled, hundreds more demonstrators were executed simply because they chose to express their support for freedom and democracy. As Americans, sometimes we take the system of democracy and the rights guaranteed to us by the Constitution for granted. We do not spend enough time reflecting on the fact that these are rights for which wars were fought and many lives lost. We continue to fight to preserve these rights today but we are protected from retribution by the freedom mandated by our system of government.

In the year since the Tiananmen Square tragedy we have seen numerous East European countries fight for the right to exist independently and the right to be governed by a democratic system of government. Yes, some of these rights were attained by bloodshed and lives were lost in order to achieve progress but the same cannot be said for the prodemocracy demonstrators in China. They have not yet made any progress. Let us recommit ourselves that the lives that were lost were not lost in vain.

Mr. Speaker, the Chinese Government has not apologized for the atrocities that they committed in Tiananmen Square nor for the brutal castigation of those persons suspected of participating in the demonstrations. The Congress of the United States is appealing today to the Chinese Government to respect the human rights of their people by releasing all of those people imprisoned for peacefully demonstrating in favor of freedom and democracy. I urge all of my colleagues to remember the images of horror and terror we saw nearly 1 year ago and support the resolution before us today by voting to pass this legislation and to remember the courage of the people of Tiananmen.

Mr. FALEOMAVAEGA. Mr. Speaker, today I join my colleagues in support of House Resolution 393, which was introduced by Chairman GUS YATRON and cosponsored by several of my distinguished colleagues. House Resolution 393 marks the first anniversary of the Tiananmen Square massacre, which took place on June 4, 1989, in the People's Republic of China.

Mr. Speaker, last June the people of the world witnessed the Government of the People's Republic of China violently suppress student protests for democracy in Tiananmen Square.

Since that dark day, the Chinese Government has not expressed their regret about the loss of life or the way they handled the popular movement.

In fact, the Chinese Government has attempted to blame this popular movement as the work of a few counterrevolutionaries receiving outside financial support.

Today, the Chinese Government continues its repressive policies and gross violations of human rights. Furthermore, political repression has not ceased.

Mr. Speaker, House Resolution 393 will send a clear and strong message to the Government of the People's Republic of China that the Tiananmen Square massacre will never be forgotten in the minds of the people and that the Chinese Government cannot continue its repressive policies and human rights violations without international indignation.

Mr. BROOMFIELD. Mr. Speaker, I have no futher requests for time, and I yield back the balance of my time.

Mr. SOLARZ. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. WHITTEN). The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the resolution, House Resolution 393.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on House Resolution 393, the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## AUTHORIZING THE SECRETARY OF THE AIR FORCE TO PURCHASE CERTAIN PROPERTY AT PEASE AIR FORCE BASE, NH

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of the bill (H.R. 4252) to authorize the Secretary of the Air Force to purchase certain property at Pease Air Force Base, NH, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4252

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. PURCHASE AT PEASE AIR FORCE BASE, NEW HAMPSHIRE

(a) AUTHORITY.—Subject to subsections (b) through (f), the Secretary of the Air Force may purchase all right, title, and interest of members of the Air Force and their spouses in mobile homes located on the base mobile home park at Pease Air Force Base, New Hampshire, on January 1, 1989, and not moved from the base since that time.

(b) AMOUNT OF PAYMENT.—Payment shall be in an amount established by the Secretary, in his discretion, but shall not exceed an amount equal to the sum of—

(1) the initial downpayment by the member;

(2) purchaser closing costs for nonrecurring items;

(3) the current balance on a purchase money mortgage; and

(4) any second mortgage balance which the Secretary determines is attributable to purchase of the mobile home or a capital improvement thereto,

reduced by any reduction made under subsection (c)(2).

(c) DISPOSAL OF MOBILE HOMES.—The Secretary may, subject only to the provisions of this section—

(1) sell, donate, trade, or otherwise dispose of any mobile home acquired under authority of this section; or

(2) permit the member to retain the mobile home for removal from Pease Air Force Base, with an appropriate reduction for the value of the mobile home as personal property from the amount otherwise payable under subsection (b).

(d) SOURCE OF FUNDS.—(1) The payments authorized by subsection (a) shall be made from the Department of Defense Base Closure Account established by section 207 of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-526; 102 Stat. 2623).

(2) Proceeds of any leasing sale, or other disposal of the mobile homes shall be deposited into the Department of Defense Base Closure Account.

(e) OTHER TERMS AND CONDITIONS.—The Secretary shall require such other terms and conditions on any purchase or disposal under this section that are in the best interests of the United States.

(f) REPORTS.—(1) The Secretary shall report to Congress within 180 days after the date of enactment of this section, and at the end of each 180-day period thereafter, on the implementation of this section.

(2) No other requirement of law for reports to Congress on real property transactions shall apply to actions carried out under this section.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. BENNETT

Mr. BENNETT. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. BENNETT: Strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. PEASE AIR FORCE BASE, NEW HAMPSHIRE.

(a) IN GENERAL.—Subject to subsections (b) through (e), the Secretary of the Air Force may——

(1) make payment pursuant to subsection (b) to purchase all right, title, and interest of members of the Air Force and their spouses in manufactured housing located at the base manufactured housing park at Pease Air Force Base, New Hampshire, on January 1, 1989, and not moved from the base since that date; or

(2) make payment pursuant to subsection (b) and take action described in subsection (c)(2) with respect to such housing.

(b) AMOUNT OF PAYMENT.—Subject to subsection (c)(2), the Secretary shall establish the amount of the payment to be made under this section, but such amount shall not exceed—

(1) 90 percent of the member's purchase price of the manufactured housing; or

(2) if elected by the member, the amount of the outstanding mortgages on such housing that are attributable to purchasing the manufactured housing or making a capital improvement thereto.

(c) DISPOSAL OF MANUFACTURED HOUSING.—The Secretary may, subject only to the provisions of this section——

(1) sell, donate, trade, or otherwise dispose of any manufactured housing acquired under authority of this section; or

(2) permit the member to retain the manufactured housing for removal from Pease Air Force Base, with an appropriate reduction for the value of the manufactured housing as personal property from the amount otherwise payable under subsection (b).

(d) SOURCE OF FUNDS.—The payments authorized by subsection (a) shall be made from funds appropriated for operation and maintenance of the Department of the Air Force for any fiscal year.

(e) OTHER TERMS AND CONDITIONS.—The Secretary shall require such other terms and conditions on any payment made under this section that are in the best interests of the United States.

Mr. BENNETT (during the reading). Mr. Speaker, I ask unanimous consent that the amendments in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT. Mr. Speaker, the amendment in the nature of a substitute on H.R. 4252 would authorize the Secretary of the Air Force to purchase 50 mobile homes owned by military personnel at Pease Air Force Base, NH, which is in the process of being closed. This legislation is necessary to prevent the owners of these trailers from having to declare bankruptcy through no fault of their own. The Department of Defense supports the amendment in the nature of a substitute.

Mr. ASPIN. Mr. Speaker, as you may know, DAVE MARTIN has asked for our help in expediting action on H.R. 4252, a bill to authorize the Secretary of the Air Force to purchase certain property at Pease Air Force Base, NH. DAVE introduced this bill in order to help roughly 50 airmen at Pease Air Force Base who are caught in a unique Catch-22 related to the purchase of their mobile homes.

Here's the problem: because of a peculiarity in New Hampshire State law, some 50 trailers owned by airmen and their families at Pease Air Force Base cannot be moved from their current site. This was not a problem until recently, given that when one airman transferred to another duty station, there was always another waiting to buy the first airman's mobile home. The Air Force, in fact, waived certain regulations pertaining to these Pease mobile homes, which inadvertently had the effect of greatly inflating the price of the trailers as they were resold over time. The bottom fell out when the Department announced that Pease would close—making the trailers virtually worthless. Now 50 airmen face bankruptcy on large mortgages unless the Air Force is given the authority to buy back the trailers.

The Air Force and the Department of Defense agree that this situation is untenable, that the Air Force is, in part, responsible for creating the problem and that the airmen should be helped. The attached letter from Secretary Cheney provides additional details and concludes that legislative relief is in order.

DAVE would like to ask unanimous consent to waive the rules requiring the reporting of the bill and ask that it be considered by the House on Monday, May 21. Because this is a non-controversial bill with a special sense of urgency, I support this approach. In addition, BILL DICKINSON and PAT SCHROEDER have no objection to proceeding along this line.

Mrs. SCHROEDER. Mr. Speaker, I rise to congratulate DAVE MARTIN. He takes his job as ranking minority member of the Subcommittee on Military Installations and Facilities quite seriously. One way he does that is by putting in long hours to inspect military bases throughout the country.

Late last year, Congressman MARTIN went to see Pease Air Force Base, the first major installation actually to be closed under the recommendations of the 1988 Commission on Base Closure and Realignment. It takes a lot of guts for a member of Congress to visit a base in the process of closure. People at the base are often angry. But, DAVE MARTIN had the courage to serve as a Marine Corps aviator in Vietnam and he has the courage to visit closing military bases.

At Pease, Congressman MARTIN found a strange situation involving 50 military families and the mobile homes they had bought. With the base closed, there was no possibility of resale. And, because the situation involved mobile homes, traditional programs, like Homeowners Assistance, were inapplicable.

The Air Force bureaucracy knew of the problem but could not think of a way to solve it. DAVE MARTIN came up with the solution: the legislation before us today. It means that 50 enlisted Air Force kids will not face bankruptcy. At the same time, the legislation deals surgically with the problem DAVE MARTIN found. It effects no other base; it sets no precedent.

I congratulate DAVE MARTIN for his outstanding work.

□ 1310

Mr. BENNETT. Mr. Speaker, I yield to the gentleman from New York [Mr. MARTIN], the ranking Republican of the Subcommittee on Military Installations and Facilities, for further explanation of this amendment and bill.

Mr. MARTIN of New York. Mr. Speaker, a well-known quote by the distinguished gentleman from Alabama is "I don't have a dog in this fight." What I do have in this fight is a concern for 50 individuals who are not my constituents nor do they even live in my State. What I am trying to do today is what is right.

What is right is not to let the system forget 50 young dedicated Air Force individuals who, through no fault of their own, face the very real possibility of financial ruin and bankruptcy.

The Air Force, in their wisdom at the time, thought they were doing what was right by bending and altering their rules for the use of trailers at Pease AFB, NH. They changed the rules to help alleviate a critical shortage of affordable housing on and near the base. The Air Force allowed individuals who had brought trailers to Pease AFB to leave them in place on their departure and sell them to incoming personnel. Due to the overall shortage of affordable housing in this area, these trailers unjustifiably and unrealistically appreciated in value—some sold for over $50,000.

The Air Force should never have allowed this to happen. The lending institutions should have never allowed the inflated mortgages. And the Congress should not allow these 50 individuals to suffer the consequences of these poor judgments.

Normally, when a military base is closed there is a devaluation in property values. Congress recognized this problem and enacted the Homeowner's Assistance Act. This act has been in effect for a number of years and has worked well. Unfortunately, a trailer or manufactured home does not qualify under this act. It was assumed that those with trailers would simply hook them up and take them to their next duty station. Due to several local and State restrictions, the airmen at Pease AFB cannot do this—nor can they sell them on the local market, again due to State and local restrictions.

Changing the Homeowners Assistance Act to include trailers does not make sense as this is an isolated case. I can find no other similar situation—therefore a specific remedy is called for. This is indeed a unique situation.

That remedy is H.R. 4252. What this legislation does is as follows: The Air Force would be authorized to either, at the choosing of each individual, pay each trailerowner 90 percent of their purchase price—or—pay off all outstanding mortgages. If an individual has made a significant downpayment and lowered the amount of their existing mortgages—the 90-percent method should be the preferred option. On the other hand, if an individual is carrying a significant mortgage, or even a second mortgage used for improvements, the remaining mortgage payoff should be the preferred option. Again, the choice will be made by the owners of the trailers. The Air Force will then own the trailers and would sell them at the appropriate time with the very real possibility of recouping all of the payments.

Anyone who is familiar with the Homeowners Assistance Act could say this formula sounds familiar. It is familiar because this formula is loosely based on the same criteria contained in that act. What we are trying to do here is to be as fair as possible to these 50 individuals and treat them the same as we would if they were eligible under the existing law. I believe that this legislation is as fair as possible to the trailerowners and to the Government.

Let me say a few words as to why we need to expedite this legislation. Pease AFB is closing and will be shut down completely by December 31, 1990. The process is well under way. The Air Force began last January to reassign the people to other locations. This process is on a train going down hill and picking up speed. When reassignments come up for each 1 of these 50 trailerowners, they are faced with an unbearable burden. As they cannot sell or take their trailers with them, they are faced with either continuing to pay for them and also paying for housing at their new duty locations—or going bankrupt.

Most of us there in this Chamber know all too well what it is like to pay for two homes at the same time—think what it would be like for a young, low-ranking military member. The facts of life are that bankruptcy is the only alternative. Unfortunately, that alternative has already been taken by one of the owners. We cannot wait any longer—we must correct this problem quickly and effectively.

The Armed Services Committee has reviewed this legislation and has helped me fine tune the proposal. The Secretary of Defense has written to say that legislation is the only fix to this problem. As far as I know, no one disagrees with this proposal. The focus of discussion thus far has been concerned with timing. As I have stated, timing is essential. I believe that the chairman and ranking member of the committee agrees with me that we must do something quickly. Timing is why we are here today asking for the approval of the House on this noncontroversial but urgently needed legislation.

Mr. Speaker, through no fault of their own, these 50 loyal and dedicated airmen have been placed in an untenable position—a position that will financially ruin them if we do not act, and act today. I urge all my colleagues to join with me and do the right thing.

Mr. BENNETT. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore (Mr. WHITTEN). The question is on the amendment in the nature of a substitute offered by the gentleman from Florida [Mr. BENNETT].

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 4252, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

## CLEAN AIR ACT AMENDMENTS OF 1990

The SPEAKER pro tempore. Pursuant to the order of the House of Thursday, May 17, 1990, and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3030.

□ 1315

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3030) to amend the Clean Air Act to provide for the attainment and maintenance of the national ambient air quality standards, the control of toxic air pollutants, the prevention of acid deposition, and other improvements in the quality of the Nation's air, with Mr. HOYER in the Chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Pursuant to the order of the House of Thursday, May 17, 1990, the gentleman from Michigan [Mr. DINGELL] will be recognized for 3 hours; the gentleman from New York [Mr. LENT] will be recognized for 3 hours; the gentleman from California [Mr. ANDERSON] will be recognized for 30 minutes; the gentleman from Pennsylvania [Mr. SHUSTER] will be recognized for 30 minutes; the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recog-

nized for 30 minutes; and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Chairman, I ask unanimous consent that the last 30 minutes of debate be preserved, 15 minutes for the gentleman from New York [Mr. LENT] and 15 minutes for the majority to conclude the debate.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it has been 13 years since this body revised our air quality laws.

Clean air has always been one of the most difficult, divisive, complex, costly and important issues the Congress has had to confront. It has in the past pitted region against region, and industry against industry. Sometimes those conflicts have become very personal, fraying nerves and shortening tempers.

But since H.R. 3030 was introduced last year, we have managed to set-aside ancient animosities, and avoided creating new ones. The members of the Committee on Energy and Commerce have on many times worked well into the early hours of the morning. It has been worth it, because we have written a good bill.

It is the product of months of intense discussions and negotiations, always conducted in a spirit of comity and conciliation. For that, I thank the members of the committee—particularly Mr. LENT, Mr. WAXMAN, Mr. MADIGAN, Mr. SHARP, Mr. SWIFT, and Mr. ECKART, to name but a few who played important roles in crafting this legislation.

The bill we offer is tough—but fair. Those in the environmental community say it is cleaner than the bill produced by the Senate, while those in industry say it is cheaper.

The legislation in places goes a bit farther than I think necessary—but that was the will of the committee and the Congress, and I accept and trust their judgment.

The bill we are offering for your approval is the most comprehensive clean air bill—and the most comprehensive environmental bill—ever written. The 1977 Clean Air Act focused almost entirely on two issues: urban smog and motor vehicle emissions. They are but the first two of seven titles in the legislation we will consider. The Clean Air Act of 1970 contained provisions dealing with hazardous emissions; in practice, only seven substances have been regulated. Title III of this year's bill completely rewrites those provisions. The rest of the committee bill represents entirely new initiatives and approaches.

In the Energy and Commerce Committee, the most important environmental issues of the day—urban smog, motor vehicle emissions, cleaner burning fuels, toxic emissions, and acid rain—have been resolved in a series of bipartisan, almost unanimous agreements. These are the provisions that will provide by far the greatest environmental and health benefits to the American people, and they will also impose the most substantial burdens on American industry.

The simple fact is that this bill will reduce more air pollution caused by more substances from more sources.

The bill sets standards for the major pollutants such as ozone, carbon monoxide, sulfur oxides, particulates, nitrogen dioxide, and lead which contribute to urban smog. It sets procedures the States must follow to bring areas into compliance with air quality standards. All but 9 cities must comply with the standards by 1999; all cities with the exception of Los Angeles must comply by 2005; and Los Angeles—which has the Nation's most severe air quality problems—must comply by 2010. The EPA would have the power to enforce plans for reducing pollution in areas where the States were unwilling or unable to act.

With respect to motor vehicles, the bill sets new standards for motor vehicle tailpipe emissions. We have already reduced tailpipe emissions by between 75 and 96 percent; this legislation will require the automakers to reduce nitrogen oxide emissions by another 60 percent, and hydrocarbons by another 40 percent in the next 6 years—with the possibility of even of more stringent reductions in 2003.

On toxic emissions, all major sources, and 90 percent of the area sources, of 191 identified toxic pollutants will be required to use the maximum available control technology to reduce emissions within 10 years. And to control acid rain, by the year 2000, sulfur dioxide emissions will be reduced by 10 million tons annually.

These provisions were all adopted in committee. In the time since we reported the bill, we have also reached agreement on some other issues. We have agreed on requirements for clearner-burning fuels, we have agreed on emission permits and provisions for enforcement, and we have agreed on a program to improve visibility in our national parks.

What remains to be done are just a small number of issues. They may be important to individual Members and their communities, and for that reason, deserve serious consideration. But in terms of writing a strong, workable piece of national environmental legislation, the overwhelming majority of the work has been done.

The members of the committee—and the members of this body—have every reason to be proud of what we have accomplished. H.R. 3030—the Clean Air Act of 1990—deserves the support of my colleagues and is an important stride forward in resolving a major environmental concern and controversies which have been making it harder for us to address other important questions which will follow on after this legislation is enacted.

□ 1320

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Michigan [Mr. DINGELL] has consumed 10 minutes.

Mr. LENT. Mr. Chairman, I yield myself such time as I shall consume.

Mr. Chairman, for the past 12 years, the House has been locked in a stalemate over the best way in which to improve the Clean Air Act. During this period of legislative inaction, our air has become dirtier, resulting in a rapid deterioration of our natural resources and a tremendous cost to the health of Americans.

Two significant changes occurred this year that broke a decade's logjam. The first came from the White House. In his 1988 campaign, George Bush said that—if elected—he would offer a comprehensive plan to clean the air we breathe. A few months after taking office, President Bush fulfilled his pledge by proposing a tough, comprehensive clean air package that tackles the problems of acid rain, air toxics and smog. The bill that is before us today, H.R. 3030, satisfies President Bush's promise to the American people. Under his strong leadership, we accomplished something that had not been done in years: we reported a clean air bill to the House floor.

The second change that occurred this year was the willingness of Congressional leaders to compromise. Members whose absolute commitment to a particular point of view had prevented a bill from leaving committee in the past now found themselves sitting across the negotiating table, seeking and arriving at common ground.

H.R. 3030 is a result of compromises. Using the Bush language as a starting point, the interests of the environment and the economy were weighed in arriving at complex solutions to our air quality problems. The bill's 10 million ton sulfur dioxide reduction makes it the strongest acid rain provision ever considered by Congress, yet it does so in a way that helps those areas of the country, like the Midwest, which will be asked to bear the greatest share of the clean-up cost. Likewise, we arrived at compromises on the thorny issues of tailpipe emissions, smog, reformulated gasoline and air toxics, so that—unlike prior years—we

find ourselves in a position of relative agreement on the most important issues framing the clean air debate.

I would like to take this opportunity, Mr. Chairman, to thank my cosponsor and distinguished colleague from Michigan, the Chairman of the Energy and Commerce Committee, Mr. DINGELL, along with the gentleman from California, the chairman of the Subcommittee on Health and the Environment, Mr. WAXMAN, for their leadership in bringing this bill forward. Their willingness to tackle the tough issues and to work towards a comprehensive compromise have allowed us to bring this bill to a vote. I would also like to thank the ranking Republican members on the Health and the Environment and Energy and Power Subcommittees, Mr. MADIGAN and Mr. MOORHEAD, along with my distinguished colleagues on the Health and Environment Subcommittee: Mr. DANNEMEYER, Mr. WHITTAKER, Mr. TAUKE, Mr. BLILEY, Mr. FIELDS, Mr. NIELSON, and Mr. BILIRAKIS, for playing key roles in the exhaustive negotiations that brought about numerous compromises.

Title V, which dealt with acid rain, one of the most difficult issues we dealt with, included a fair and equitable distribution of allowances so that all areas of the country would have sufficient allowances to grow. Pivotal in those negotiations were Mr. SHARP and Mr. COOPER, who also deserve our thanks for their active participation.

When we reach final consideration, H.R. 3030 must still meet President Bush's tests of reasonableness and balance that he outlined to the Senate when that body considered amendments to the Clean Air Act. In a letter to Minority Leader ROBERT DOLE, the President stated, and I quote, "I will only sign legislation that balances environmental and economic progress," and he outlined five tests as follows:

First, the important environmental protections afforded by the administration's bill must be maintained in the final legislation and preserved over time.

Second, the bill should not impose aggregate costs on the economy that exceed the already-considerable costs embodied in the administration's bill—with an adjustment of no more than 10 percent to reflect certain mobile source provisions added in the House Energy and Commerce Subcommittee on Health and the Environment.

Third, controls in the bill should be designed to achieve reductions in the most cost-efficient way—that is, for the least cost per ton of reduced pollutant.

Fourth, the system of emissions trading, which allows acid rain reductions to be achieved in the least costly and most equitable fashion, must be allowed to work.

Fifth, the legislation must not include a national electricity tax to pay for controls, which would penalize consumers in those States which have already undertaken reductions by making them in effect "pay twice" for clean air.

Mr. Chairman, I believe that H.R. 3030—even after significant strengthening amendments made in subcommittee and committee—meets President Bush's five tests of balance and reasonableness. It is a delicate mosaic, whereby hundreds and thousands of complex, intricate tiles form one completed picture.

Several amendments on a number of outstanding issues threaten the delicate balance of this mosaic. If passed, these amendments could destroy the months of careful compromise that have brought us so far and result in the same type of legislative logjam with which we are so familiar. These outstanding areas include:

First, chlorofluorocarbons, second, production mandates for automobiles, third, assistance to those Americans in the labor force who are displaced due to the provisions of this Act, and fourth, air emissions from offshore oil platforms.

As we discuss and debate each of these amendments, we must remember how far we have come, and ask ourselves whether the adoption of a particular amendment will result in the collapse of our compromise efforts, a lack of consensus in the Congress and, finally, the likelihood of a Presidential veto if the five tests of balance and reasonableness do not continue to be met.

H.R. 3030 is a good bill. It is a landmark compromise that takes dramatic strides forward toward preserving and protecting our environment. Let us not allow our fervor for clean air to force us to lose sight of the forest for the trees. By passing H.R. 3030, President Bush's Clean Air Act Amendments of 1990, we can indeed leave our children and our grandchildren a world made better by our efforts, an America where clean air is not merely a distant memory, but a fact of life.

Before I conclude, Mr. Chairman, I would like to express on behalf of all my colleagues on the committee our heartfelt thanks and appreciation to our staff that served us so admirably throughout this debate. In particular, I would be remiss if I did not mention Chuck Knauss, David Finnegan, John Shelk, Michael Woo, Jessica Laverty, Phil Schiliro, Margaret Durbin, John Orlando, Jack Clough, John Hambel, Phil Barnett, Greg Whetstone, Judy Greenwald, and Shelley Fidler. These dedicated men and women worked virtually around-the-clock, drafting language that would be acceptable to all sides. This bill could not have been possible were it not for their dedication and commitment, and we are indeed fortunate to have professionals of this caliber serving us in Congress.

Mr. Chairman, I reserve the balance of my time.

□ 1330

The CHAIRMAN. The gentleman from New York [Mr. LENT] has consumed 9 minutes.

Mr. DINGELL. Mr. Chairman, I yield 16 minutes to the distinguished gentleman from California [Mr. WAXMAN], the chairman of the subcommittee, who has helped to craft this legislation and arrive at the compromise and who played a most important part in the entirety of its consideration.

Mr. WAXMAN. Mr. Chairman and my colleagues, this is a historical moment for us to meet and consider amendments to the Clean Air Act.

This is also the most important environmental issue that we will have before us in this Congress.

When I think back over the 10 years in which we have been toiling to get a bill to this point, I think how attitudes have changed.

In the early 1980's there were those who said that we need not be concerned about the stringency of the nonattainment program, the part of the Clean Air Act which sets in place the plans to reduce air pollution so that areas can be in compliance with the law and the air in those areas healthy enough to breathe. There were many who said we did not need such strict laws on the books because we were moving toward compliance by the late 1980's. And some people suggested in the early 1980's that we could double the amount of emission from automobiles without any difficulty, we could double the amount of emissions in our national parks without doing any great harm.

Well, they have been proved wrong. Here we are in 1990 and we have over 150 million Americans living in areas where the air pollution is so excessive that the Environmental Protection Agency has termed it unhealthy to breathe.

We need a strong Clean Air Act that will reduce air pollution in our cities and throughout our Nation. And the essential reason for the Clean Air Act is to accomplish that goal so that we can protect the public health. The bill we have before us accomplishes that result. It sets in place a strong program that will have the force behind it to reduce air pollution by requiring local communities to make an inventory of the sources of that pollution and to develop a plan that will reach, within a reasonable period of time, a deadline where the air will be clean.

As we strive to clean up the air, we have to be mindful of the fact that the leading cause of air pollution in our country is the motor vehicle.

We must reduce pollution from cars, trucks, buses.

Our bill that is presented to you today has strong standards for gasoline-powered cars. But we need more than that. We need to take the part of the proposal that the President sent us which he claimed was the most innovative and far-reaching—and he was right—that part which said we have to develop the technology for clean-burning cars and move in that direction.

Clean-burning cars that will run on alternative fuels, was key to the President's approach. It was the most innovative part of his proposal. We should restore that provision to the bill. The Waxman-Lewis amendment to this legislation will accomplish this. The House will have that issue before it when we consider amendments.

As I look back over the last 10 years, I think about the debate about acid rain. There were those who said there was not enough scientific certainty to deal with the acid rain problem. But people in the northeastern part of the country, who saw their lakes and forests being destroyed, did not doubt that acid rain was a real problem.

□ 1340

The National Academy of Sciences did not doubt it. In two separate studies on acid rain they concluded that sulfur dioxide and nitrogen oxide emissions were causing acid rain. Pollution carried over long distances turned into precipitation and that precipitation was destroying the environment.

Not only that, the pollution was adversely affecting public health.

In the early 1980's, our colleagues, the gentleman from Minnesota [Mr. SIKORSKI], and the gentleman from Massachusetts [Mr. CONTE], and the gentleman from New York [Mr. BOEHLERT], and the gentleman from New York [Mr. GREEN], argued that we needed to do something about acid rain. Years have gone by, and now this legislation before the Members will, in fact, have a program to reduce the pollutants that cause acid rain. In this regard, I want to pay tribute to President Bush for recognizing that acid rain is a problem, for seeing that 10 million ton reductions by the turn of the century were needed, and a cap on pollution thereafter was something we had to have in order to prevent pollution from going back on the upswing and doing all the damage that would otherwise occur.

At the beginning of the decade, many Members talked about toxic air pollutants. Those pollutants were different than smog. Smog causes problems of the lungs and heart. It causes problems for the elderly and children, but toxic air pollutants cause cancer, birth defects, and neurological damage, especially to those who live near these industrial facilities. We argued that more needed to be done. The Environmental Protection Agency, under several past administrations, had done virtually nothing. But when we argued that the only degree of regulation on toxic air pollutions that existed was whatever the industry placed on itself, people could not believe that was the case.

After the Bhopal tragedy in India, our committee held hearings, and our committee did more than that. We asked for an inventory to be developed about the extent of the toxic air pollutants in this country. We requested the industry to tell Members how many of these pollutants were going into the air from their facilities. From the reports back to members of the industry—and not all of them responded—we were told that 80 million pounds of toxic air pollutants were going into the air each year. When we announced that, there was a scream from industry, "That could not be, That was clearly an exaggeration." But when we adopted the Superfund legislation, the gentleman from Minnesota [Mr. SIKORSKI], succeeded by 1 vote in the House in getting a requirement that EPA do an inventory of toxic air pollutants. They released their inventory, a much more official report than ours. The EPA announced after their first survey that there were 2.7 billion pounds of toxic air pollutants going into the air from industrial facilities.

Clearly, this problem is one that is long overdue to be addressed by the Congress of the United States. I am pleased to say that this bill has a very strong toxic air pollutant section.

There are still some issues that we need to address when this bill comes before the full House in a couple of days. We are learning, and the science is moving very rapidly in illustrating, that there is a depletion of the upper ozone layer that shields our planet, due to the release of chlorofluorocarbons, a pollutant that chemically destroys this ozone. CFC's have created what is termed "a hole" in the ozone layer. There is no scientific dispute about this question. The experts tell Members there is this depletion of the ozone layer. It is causing more skin cancers. That is a fact upon which there is a consensus. Many experts tell Americans that more harm is being done than we really know at this time, that there are subtle changes to the whole ecosystem, and those subtle changes can have cataclysmic effects. The Bates-Boehlert amendment will deal with the problem of chlorofluorocarbons that are causing damage to the upper ozone. At the appropriate time, we will urge the House to adopt that amendment.

We have other issues, and negotiations are going on as of this moment to try to resolve many of these issues, as appropriately as they should. I want to acknowledge the fact that through negotiations in our committee, many of the issues that have been contentious for at least 10 years will not be the battleground before the House. The issues of the nonattainment program, acid rain, toxic air pollutions, are by and large resolved as they move to the House of Representatives, thanks in part to the leadership and ability and willingness to cooperate on the part of a number of our colleagues.

I want to pay tribute to our chairman, the gentleman from Michigan [Mr. DINGELL], who has shown the willingness to lead and to get Members together on so many of these important issues. I want to pay tribute to the gentleman from New York [Mr. LENT], the ranking Republican member of our full committee, the Committee on Energy and Commerce, also the gentleman from Minnesota [Mr. SIKORSKI], the gentleman from New Mexico [Mr. RICHARDSON], the gentleman from Oklahoma [Mr. SYNAR], the gentleman from Pennsylvania [Mr. WALGREEN], the gentleman from Massachusetts [Mr. MARKEY], the gentleman from New York [Mr. LENT], the ranking Republican [Mr. ECKART], the gentleman from California [Mr. BATES], the gentleman from Tennessee [Mr. COOPER], the gentleman from Texas [Mr. BRYANT], the gentleman from Washington [Mr. SWIFT], the gentleman from Indiana [Mr. SHARP], the gentleman from Illnois [Mr. MADIGAN], the gentleman from Iowa [Mr. TAUKE], and the gentleman from New Jersey [Mr. RINALDO]. These are all people who have played an active role in resolving some of these heretofore contentious issues.

I want to acknowledge some of our former colleagues who have been on the Committee on Energy and Commerce, and who have battled on this question over the years, and have continued to stay active, Senators WIRTH and MIKULSKI, and now Governor Jim Florio. They have all gone on from the House to other positions, but they have left their imprint on this legislation. A number of Members who are not on the Committee on Energy and Commerce have played and will continue to play a critical role in bringing this bill to the floor, and I am particularly grateful to the commitment of the gentleman from Massachusetts [Mr. CONTE], the gentleman from New York [Mr. BOEHLERT], the gentleman from New York [Mr. GREEN], the gentleman from California [Mr. LEWIS], the gentleman from Minnesota [Mr. VENTO], and many others, for a strong, fair, clean air bill.

I will not go into some of the detailed provisions in the bill, unless there are questions, the bill deals with many difficult issues, especially that very difficult one of acid rain which

divided our colleagues and our Nation. The efforts of people on our committee, such as the gentleman from Minnesota [Mr. SIKORSKI], the gentleman from Tennessee [Mr. COOPER], the gentleman from Indiana [Mr. SHARP], the gentleman from Illinois [Mr. MADIGAN], and the gentleman from Illinois [Mr. BRUCE] were particularly helpful during the committee's deliberations on acid rain. I am also pleased that we reached an agreement this weekend on an amendment by my good friend, the gentleman from Oregon [Mr. WYDEN], that will be offered on the floor to require the EPA to regulate regional haze and protect visibility in the national parks. The committee has reached agreement on some of these contentious issues, and there may be other agreements as well. But unless an agreement is reached we will have the amendment that I will be offering with my colleague, the gentleman from California [Mr. LEWIS], on alternative fuels, very similar to the alternative fuel plan that President Bush included in H.R. 3030. Unfortunately, the Committee on Energy and Commerce, by the narrowest of margins, significantly weakened the President's program. The gentleman from California [Mr. BATES], and the gentleman from New York [Mr. BOEHLERT] will have their amendment to control chemicals destroying the Earth's ozone layer. The gentleman from Minnesota, and the gentleman from New York will offer an amendment to extend car manufacturers' warranties for catalytic convertors and electronics, to 8 years or 80,000 miles. The bill out of committee, incredibly, lowered—lowered the warranty period, shifting the burden from the automobile manufacturers on to the consumer, to make the consumer pay the bill, so that antipollutant devices will work. What a ripoff of the consumer that is. Also, great harm will come to the environment as well if these catalytic convertors do not work as they should. The gentleman from California [Mr. LEVINE] and the gentleman from California [Mr. LAGOSMARSINO] will be offering an amendment to require the EPA to regulate oil and gas facilities on the Outer Continental Shelf, in the same manner it regulates nearby onshore facilities. Currently these activities escape EPA regulation.

Mr. Speaker, there are many people who have played an important role in this legislation. I have a deep sense of gratitude and satisfaction that the bill that is before Members is one that will go a long, long way to dealing with these air pollution problems, that many in the early part of this last decade refused to acknowledge as problems at all. I cannot tell Members how many times the gentleman from Minnesota [Mr. SIKORSKI] offered the different approaches to achieve acid-rain reductions, only to be told "Acid rain—there is no such problem as acid rain." Now we are not disputing the problem of acid rain. Now we are legislating to regulate the pollutants that cause acid rain. We have certainly made a great advance that now brings Members to this floor with this bill.

□ 1350

Mr. Chairman, our staffs have been magnificent. The gentleman from New York [Mr. LENT] went through the names of all the staff members, and they all deserve our gratitude. All have been professionals in the highest sense of that term, working incredibly long hours to try to work out differences and craft the bill to accomplish what the Members hope to accomplish.

I want to pay tribute to my staff members, Greg Wetstone and Phil Barnett, who are both counsel to the subcommittee, and my own administrative assistant, Phil Schiliro. They prepared something new to help our deliberations on clean air, and what they prepared is what we call the Clean Air Facts, solid statements of the issues involved. These Clean Air Facts are quite voluminous because we have had Clean Air Facts on every one of the issues involved. It was important to us that the Members get the facts about this clean air debate and not just hear from the lobbyists who have a vested interest in representing their organizations, and so often their representations are in fact misrepresentations of either the problem or the solutions.

The Clean Air Facts set out an enunciation of the issues before us, and I would like to have them appended to my remarks in the CONGRESSIONAL RECORD so they will be available to others who wish to read them.

Mr. Chairman, I thank the chairman of my committee for this opportunity to speak on this issue, and I thank my chairman for his leadership. I look forward to the completion of this legislation in the House and the conference with the Senate. I look forward to the time when we will be there with President Bush when I hope he will sign into law what he and we have promised the American people: Legislation that will bring us clean air, legislation that will reduce air pollution. That is the only way we are going to get clean air and a better environment.

Mr. Chairman, the Clean Air Facts to which I alluded are attached to my remarks, as follows:

[From the Clean Air Facts, Mar. 6, 1989]

THE CLEAN AIR ACT: AN INTRODUCTION

The Clean Air Act, as originally enacted in 1970, and amended in 1977, includes a number of programs intended to clean up unhealthful levels of pollution, and preserve air quality in areas with pristine air. This fact sheet offers a brief introduction to the structure of the Act, emphasizing parts most relevant to the current debate.

AMBIENT AIR QUALITY STANDARDS AND THE SMOG PROBLEM

All areas of the country are required by the Clean Air Act to meet air quality standards established by EPA at a level considered adequate to protect public health. These standards, called the National Ambient Air Quality Standards (NAAQSs), are the cornerstone of the Act's pollution control programs. Each ambient standard is based on a detailed review of scientific information, called a criteria document, prepared by EPA and expert advisors.

Achievement of the health standards is a driving force behind many of the pollution control requirements of the Act. States are given primary responsibility for attaining the standards. Each is required to prepare a State Implementation Plan (SIP) that specifies enforceable pollution control requirements sufficient to attain the standard. Although several of these standards have been achieved throughout the nation, the health standards for ozone and carbon monoxide are currently exceeded in most urban areas.

Areas not meeting the Act's standards are termed "nonattainment" areas, and are subjected to certain tougher control requirements for new sources. In addition, existing sources in nonattainment areas—those sources too old to be covered by the Act's new source standards—are required to use all Reasonably Available Control Technology (RACT). EPA issues guidelines for specific industry categories, called Control Technique Guidance (CTG), to define what technologies should be considered reasonably available.

Extensions of the Act's original deadlines gave areas until August 31, 1988, to meet the standards. When this deadline passed, and unhealthful levels of ozone and carbon monoxide pollution persisted, the vast majority of urban areas became subject to EPA sanctions. These sanctions include a ban on the construction of large new pollution sources, and at EPA's discretion, a cut-off of Federal highway funds. To date, however, the Agency has only sought to impose such sanctions on a handful of cities.

Carbon monoxide pollution comes mostly from cars, trucks, and buses. Ozone pollution is formed in the atmosphere from hydrocarbon and nitrogen oxide pollutants released by these sources, as well as from industrial facilities, chemical plants and numerous smaller sources.

NEW SOURCES

New pollution sources in all states are subjected to nationally uniform pollution control requirements that reflect use of the best technology available, taking cost into account. This is known as the New Source Performance Standard (NSPS) program. More stringent requirements are imposed on new sources because engineering considerations allow for cheaper and more effective pollution control when the effort is incorporated in the design and construction of the facility. The nationally uniform standards also serve to eliminate the possibility that states might compete for new industry through the relaxation of pollution requirements.

Those new pollution sources located in nonattainment areas are subjected to especially demanding requirements. They must use technology capable of reducing pollution to the Lowest Achievable Emissions Rate (LAER), and are required to offset new pollution that they will introduce to the area with comparable or greater pollution reductions from nearby sources.

ACID RAIN

The Clean Air Act was originally designed primarily to address air quality problems caused by high pollution levels relatively near the pollution source. It was expected that as long as pollution levels did not exceed the ambient standards, air quality objectives would be served. Although the approach was of questionable legality at the time, in the 1970s many states resorted to very tall smokestacks to disperse pollution. This approach allowed the ambient standard to be achieved without the use of expensive control technology. Little thought was given to the possibility that the pollution might cause environmental damage when it returned to earth.

Scientists have since learned that sulfur dioxide and nitrogen dioxide pollution from power plants, autos, and other sources can be carried hundreds or even thousands of miles through the atmosphere, chemically transformed in the process, and eventually returned to earth as sulfuric or nitric acids. These acids often come to earth in rain or snow, but sometimes they return as "dry deposition." Such acid pollution has been associated with a variety of harmful effects, including the acidification of lakes; the decline of forests; damage to man-made materials; and serious human health impacts.

AIR TOXICS

Section 112 of the Clean Air Act provides authority for control of especially dangerous chemicals, called "hazardous air pollutants." This is to be accomplished through National Emission Standards for Hazardous Air Pollutants (NESHAPs) to be set by EPA. Section 112 was intended to achieve stringent, uniform and relatively quick Federal regulation of substances that pose risks of serious illness at relatively low concentrations. EPA is directed to list and within one year regulate air pollutants that are hazardous to human health. Substances that might cause cancer, reproductive disorders, neurological effects, or other serious ailments were expected to be regulated under this section.

Unfortunately, Section 112 has not been effectively implemented. Although experts agree that hundreds of compounds released into the air meet the Act's definition of "hazardous," the Federal EPA has regulated only seven substances under Section 112 in the nearly 20 years since the law was enacted. The release of numerous substances formally classified as carcinogens by the EPA itself, including chloroform, formaldehyde, carbon tetrachloride, and PCBs, remains unregulated.

MOTOR VEHICLE EMISSION CONTROLS

Recognizing the importance of automobiles as a pollution source, Congress in 1970 legislatively established standards for auto-related pollutants. The legislation sought to reduce automotive hydrocarbon pollution (HC), nitrogen oxide pollution ($NO_x$), and carbon monoxide pollution (CO) by 90 percent of the uncontrolled levels.

In order to meet these targets, EPA set vehicle emission standards of 0.41 grams per mile for HC, 3.4 grams per mile for CO, and 0.4 grams per mile for $NO_x$. The hydrocarbon and CO standards were to be attained by 1975, and the $NO_x$ standards by 1978. This timetable was pushed back in the 1977 amendments, and passenger cars were given until 1981, with an extension available until 1983 for the CO standard. At the same time, the $NO_x$ standard was relaxed to 1.0 grams per mile. These 1970 standards, as altered by the weakening of the $NO_x$ requirement, remain in force today. They are required to be achieved both at "certification," when a new engine family is tested by EPA (before assembly line production), and "in use," when the vehicle is actually on the street. The in use requirement mandates that the standard be achieved throughout the first 50,000 miles of vehicle use.

The emission standards have worked to bring down motor vehicle pollutants on a per vehicle basis. Much of the gain, however, has been offset by increases in the number of cars on the road and in miles travelled. Motor vehicles remain the single largest source of ozone and carbon monoxide pollution in nonattainment areas.

---

[From the Clean Air Facts, Mar. 15, 1989]

OZONE POLLUTION: A PRIMER

Ozone pollution is our country's most pervasive air pollution problem, and a serious public health concern. The vast majority of our cities, as well as many rural areas, currently violate U.S. Environmental Protection Agency (EPA) health standards for ozone. This fact sheet describes how ozone pollution is formed, where it comes from, and its health and environmental impacts. (Ozone control strategies will be discussed in a separate fact sheet.)

WHAT OZONE IS

Ozone is a highly reactive gas that is one of the primary constituents of smog. Chemically, ozone is a form of oxygen composed of three atoms, as compared to oxygen gas which has two atoms. The three atom arrangement is by nature unstable. In a process known as "oxidation" the extra oxygen atom in the ozone molecule has an aggressive tendency to react with whatever substance is available.

The oxidation reaction is extremely corrosive. This is the reaction that causes metals to rust. It also causes cracking and fading of paints, dyes and rubber products. This corrosive character is largely responsible for ozone's adverse health and environmental effects.

HEALTH IMPACTS OF OZONE POLLUTION

Ninety percent of the ozone breathed into the lung is never exhaled. Instead, the ozone molecules react with sensitive lung tissues, irritating and inflaming the lungs. This causes a host of adverse health consequences, including chest pains, shortness of breath, coughing, nausea, throat irritation, and increased susceptibility to respiratory infections.

These adverse effects have been observed in healthy, exercising individuals at concentrations below the level of the Federal health standard. The intensity of the acute response increases as ozone levels rise, and as respiration rates increase. Vigorous exercise, which leads to heavier breathing, is likely to increase the health impacts of exposure to ozone. Unfortunately, the warm sunny conditions most conducive to ozone formation are also most attractive for outdoor activity.

A growing body of scientific evidence indicates that over the long term, repeated exposure to ozone pollution may scar lung tissues permanently. Researchers explain that the build-up of scar tissue stiffens the lungs, reducing their capacity and, in effect, prematurely aging the respiratory system. Ultimately, emphysema or lung cancer may result.

Young children are especially vulnerable to both the acute and the permanent effects of ozone pollution. This is so because their small airways are more easily obstructed by the inflammation ozone causes. Also, a child's more rapid breathing tends to draw ozone deep into the lungs; and children's lungs are often already compromised by their high rate of respiratory infections. Other especially vulnerable populations include victims of respiratory diseases, such as asthma or emphysema. Studies of asthmatics living in polluted areas have found that asthma attacks tend to occur more frequently as ozone levels rise.

Health researchers are also concerned that ozone pollution increases the lung's susceptibility to acute and permanent injury from exposure to the sulfuric and nitric acids commonly found in urban smog. Such interactions among air pollutants are poorly understood, and are now under study.

IMPACTS ON CROPS AND VEGETATION

Ozone pollution has been shown to damage many types of vegetation extensively. The pollution enters plant leaves through their gas exchange pores, in essence burning the cell membranes. EPA estimates indicate that ozone pollution levels common in many areas can reduce tomato yields by 33%, beans by 26%, and soybeans by 20%. Other studies have shown that ozone levels below the federal standard can cause wheat yields to drop by 30%. The Agency has concluded that ozone causes annual crop losses of $2 to $3 billion per year.

Forests can be damaged through the same processes. Forest damages attributable to ozone pollution, including premature death and stunted growth, have been found in the San Bernadino National Forest in Southern California, and along the length of the Sierra Nevada mountains. Ozone pollution is also a suspected cause of the widespread forest dieback occurring in high altitude forests throughout the East.

HOW OZONE IS FORMED

Ozone is not emitted directly from smokestacks or other pollution sources. Instead, it is a "secondary pollutant," or formed from the mixture of nitrogen oxides (NOx), and a large group of hydrocarbon pollutants called volatile organic compounds (VOCs). As explained below, these compounds are released into the air by motor vehicles, factories, and numerous smaller sources. The pollutant mix cooks in the sun, producing ozone through a complex chain of reactions. The hotter the temperatures, the greater the formation of ozone.

A typical ozone pollution episode involves a large stagnant air mass that allows pollutants to build up in the atmosphere. The polluted air mass slowly spreads downwind. In the summer, it is common for such air masses to build-up over the urban areas along the East Coast, and move into New England. As the air mass moves, ozone levels often continue to increase. In part, this is because the pollutants have more time to react and form ozone. The addition of new pollutants, originating in areas passed along the way, is also an important factor.

This process can eventually bring high ozone levels to areas hundreds of miles downwind of the urban pollution sources. As a result, ozone pollution can be a serious problem even in very rural parts of the country. For example, last summer one of the most pristine areas east of the Mississippi River—Acadia National Park on an island off the northern coast of Maine—recorded ozone levels so high that they would

produce a smog alert if they occurred in downtown Los Angeles.

SOURCES OF OZONE PRECURSORS

The two major ozone precursors, VOCs and $NO_x$, come principally from motor vehicles and industry. The Office of Technology Assessment estimated last year that the most important sources of VOC emissions are "mobile sources," mainly cars, trucks, and buses, which release about 40% of national VOC emissions. Other important sources include: organic solvent evaporation from stationary sources such as dry cleaners, printers, and paint shops (30%); and home fuel combustion (12%). (Home fuel combustion, however, tends to take place in cold weather, and not during ozone season.)

In most urban areas, transportation sources actually account for a much larger percentage of the VOC emissions, often over 50%, because of the high concentration of motor vehicles in city centers, and the relative absence of heavy industry in such areas.

In addition, EPA recently discovered that cars, trucks and buses are responsible for substantially more of the warm weather VOC pollution than even recent estimates indicate. The Agency last year determined that the pollution coming from automotive tailpipes may in fact be only a small percentage of the car's VOC emissions. On hot days, when ozone is most likely to be a problem, high levels of pollution escape by evaporation through the engine and fuel tank in a phenomenon termed "running loss." Preliminary estimates are that running losses alone could account for as much as 30% of that nationwide VOC pollution total.

The other major ozone precursor is nitrogen oxides, which is also a major contributor to acid rain. Nitrogen oxides are produced in all fossil fuel combustion reactions. The principal sources of $NO_x$ emissions are, once again, mobile sources, which account for about 45% of the $NO_x$ inventory. Other important sources include electric utilities burning fossil fuels (30%), and industrial fuel consumption (12%).

AREAS AFFECTED BY OZONE POLLUTION

Ninety-four of the nation's urban areas, with a collective population of 136 million people, violate the Clean Air Act health standard for ozone. The highest ozone levels are found in Southern California, with New York, Houston, and Chicago rounding out the list of major cities with the most severe ozone problems. Many other areas, however, experienced ozone levels last summer that exceeded the standard by more than 50%. Along the Eastern seaboard, ozone violations were especially frequent last summer, occurring about once every three days.

EPA's list of areas violating the ozone standard as of 1987 is provided in Table 1. Table 2 shows the 28 new areas that became nonattainment because of their 1988 ozone levels. In these tables, compliance is evaluated on the basis of "design value," which is the fourth highest one-hour ozone reading over three years. The multi-year design value is utilized in order to avoid basing compliance determinations on the ozone levels recorded in a single, perhaps aberrational, year.

OZONE POLLUTION TRENDS

Some success in reducing hydrocarbon emissions occurred between 1970 and 1982, when VOC levels dropped by over 25%. Since then, however, VOC levels have remained relatively flat, in part because many of the gains attributable to tighter tailpipe standards have been reversed by a substantial increase in vehicle miles travelled since 1970. $NO_x$ emission levels increased slightly between 1970 and 1986, and are expected to continue to rise.

Overall, the ozone levels recorded in 1988 were the worst of the decade, and in many areas the worst ever recorded. In fact, EPA has preliminarily added 28 new cities, with a combined populace of 15 million Americans, to the list of areas violating the health standard, as a result of last summer's high pollution levels. Air pollution experts agree that, given estimates of substantial increases in the use of motor vehicles in future years, and predictions of global warming, ozone levels in future years are likely to increase in the absence of new pollution controls.

TROPOSPHERIC VERSUS STRATOSPHERIC OZONE

The formation of ozone pollution discussed in this fact sheet occurs in the lowest level of the earth's atmosphere, called the "troposphere."

But ozone is also formed naturally in the earth's upper atmosphere, called the "stratosphere," where it serves a vital purpose in protecting the planet from dangerous ultraviolet radiation. Stratospheric ozone depletion is caused by the release of chlorofluorocarbons (CFCs) and is a major health and environmental concern. This issue will be discussed in detail in a later Fact Sheet.

Because of the reactive nature of ozone and the structure of the atmosphere, tropospheric ozone pollution cannot migrate to the stratosphere to replenish the depleted ozone levels there.

AREAS VIOLATING OZONE STANDARDS 1985–87

[Ozone Air Quality Summary Report, Nov. 28, 1988]

| Areas proposed nonattainment, June 6, 1988 | Exp.[1] Exc. | Design value[2] (ppm) | Number counties nonattainment[3] New | Current | Total | Population[4] 1985 (1,000) |
|---|---|---|---|---|---|---|
| Allentown-Bethlehem, PA–NJ | 1.4 | .125 | 0 | 4 | 4 | 650 |
| Atlanta, GA | 13.5 | .168 | 7 | 11 | 18 | 2,472 |
| Atlantic City, NJ | 3.4 | .141 | 0 | 2 | 2 | 293 |
| Bakersfield, CA | 35.1 | .160 | 0 | 1 | 1 | 481 |
